Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Health and International Development, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Development and Humanitarian Emergencies, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Late Development, MSc in Urban Policy (LSE and Sciences Po), MSc in Urbanisation and Development and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV420 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: When genocides, civil wars and famines are reported on television in countries such as Syria, Sudan or Yemen, we are often left with a sense of confusion. Why is this happening? Why do these disasters keep recurring? And which actors are driving the process? This course looks behind the headlines to get a deeper understanding of the causes and functions of humanitarian disasters.

By re-thinking common conceptions of conflict (such as the idea

that war is a contest between two or more sides aiming to 'win'), the course offers new ways of thinking about war, humanitarian intervention and peacebuilding. Who benefits from conflict? Who benefits from famine? How do these benefits shape the information we receive? How is the 'enemy' defined, and whose interests do these changing definitions serve? And how can one make peace a peace that doesn't propel society back into war? The course offers an understanding of the complex fault-lines that lie behind oversimplistic news coverage. It also expands our understanding of disasters to take account of the fact that many disasters (from climate change to 'migration crisis', from Covid to democratic crisis) are now 'coming home' as far as Western democracies are concerned.

The course draws on detailed empirical case-studies — including the course-leader's own fieldwork in Sudan, Sierra Leone, Sri Lanka, Serbia, Iraq, Guatemala, France and on the Syria/Turkey border. The course makes use of the political thought of Hannah Arendt and Michel Foucault, showing how they can help us to deconstruct the interests and the language that muddle our understanding of the causes and functions of contemporary disasters — in whichever part of the world they are found.

The course is interdisciplinary and looks at the political, economic and psychological functions of violence, though it requires no specialist knowledge of any particular discipline.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the WT.

Students on this course will have a reading week in Week 6.

Formative coursework: Students will co-produce seminar presentations. Students will also have the opportunity to receive feedback on formative work, in the form of a practice-assessed essay.

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. A useful text, which is designed in large part around the course, is David Keen, *Complex Emergencies* (Polity, 2008).

Other texts of interest include,

- David Keen, *The Functions and Legitimization of Suffering in Calais*, *International Migration* (2020), <https://onlinelibrary.wiley.com/doi/epdf/10.1111/imig.12800>

Assessment: Take-home assessment (100%) in the ST.

Students will produce 2 x 1500 word essays during a 7-day take home exam in week 1 of ST.

Exam questions may draw from the topics in two or more weeks and are designed to encourage you to think and read across the various topics in the course.

DV421 Half Unit

Critical Perspectives on Global Health and Development

This information is for the 2024/25 session.

Teacher responsible: Dr Philipa Mladovsky CON.6.13

Availability: This course is available on the MSc in Anthropology and Development, MSc in Anthropology and Development Management, MSc in Development Management, MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Global Health Policy, MSc in Global Politics, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV421 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: The course is concerned with health and international development in its social, cultural, historical, economic and political context. Students will learn to think critically about how global health policy and practice reproduce and/or change power relations - between states, communities and individuals. The course does this by exploring the history of global health, interrogating taken-for granted concepts and understanding how they have been socially constructed and suggesting alternative perspectives. Drawing on anthropological, sociological and other literature, it investigates how global health policies reproduce, change or are changed by values, morals, ethics and people's identities and subjectivity. Themes that run through the course include: legacies of colonialism; the critique of neoliberalism; and interrogating positivism in global health research. Case studies are drawn mainly from sub-Saharan Africa, Latin America, and Asia and typically focus on specific diseases, conditions or parts of the health system. Drawing on theories of power such as structural violence and governmentality, the course will enable students to question mainstream global health policy initiatives which might seek to promote equity and human rights, but may instead create new exclusions and marginalised populations.

Teaching: This course is delivered through a combination of lectures and seminars in the WT. Seminars and lectures will be at 90 minutes duration.

Student on this course will have a reading week in Week 6.

Formative coursework: Students are expected to prepare at least one class presentation and submit one written assessment.

Indicative reading: A detailed weekly reading list will be provided at the first lecture. The readings for this course are from journals and select book chapters mainly but not exclusively in the fields of anthropology and sociology. Readings will also include case studies from various countries and reports, papers and articles

published by international organisations, think-tanks, and a variety of other sources.

Assessment: Take-home assessment (100%) in the ST. The take-home (written) assessment will consist of a 3,000-word essay, due at the start of Spring Term.

DV423 Half Unit Global Political Economy of Development

This information is for the 2024/25 session.

Teacher responsible: Prof Robert Wade CON.7.07

Availability: This course is available on the Global MSc in Management, Global MSc in Management (MBA Exchange), MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Environment and Development, MSc in Global Politics, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies and MSc in Political Economy of Late Development. This course is not available as an outside option.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Pre-requisites: Undergraduate economics gives a big advantage, but is not pre-requisite.

Course content: The course takes off from "the Great Divergence", the relentlessly growing gap during the past two and more centuries between the average income, average living conditions, of the West and that of most regions and countries of the South. Northeast Asia is the only non-western region to have substantially caught up. How do we explain this central fact of the "wealth of nations" – which is all the more shocking in light of the large-scale western aid industry operating since the Second World War? Much of development studies treats development as analogous to a marathon race, in which each runner's (country's) rank is independent of the rank of others; there is no structure to the race (to development) such that some must be ahead and others must be behind. This is deeply misleading. Questions about appropriate development policies and institutions at country level have to be put in the context of the hierarchically ordered world economy and world polity, led since the Second World War by the US with its subordinate European states and Japan. At a minimum we

have to change the analogy to a mountain race, in which lead runners can throw down ladders to help selected lagging runners ("development by invitation") and also throw down rocks to block the progress of others. But that analogy too is unsatisfactory. The course covers the performance of the world economy as a whole (eg trends in growth, inequality, poverty, going back to the Industrial Revolution and before); the emergence of the emergence of British and then American hegemony in the world-system; international systems of production, trade, and finance; the rules or regimes which govern interaction between economies, states and firms (regimes such as Bretton Woods, the Post Bretton Woods dollar standard, Investor-State Dispute Settlement, etc.); and several international organisations (such as the World Bank, IMF, UNCTAD, G20). Along the way it analyses the major financial/economic crises of the 1980s, 1997-99 and 2007-09.

It is set in the context of "Global Political Economy", a variety more closely related to Economics than its cousin, "International Political Economy", which is more closely tied to International Relations. In contrast to the mostly western-centric literature in International Political Economy, DV423 looks at the above subjects from the perspective of low and middle-income countries in the spirit of the Swahili proverb, "Until the lions have their own historians, tales of hunting will always glorify the hunters"; and does not assume that the (all western, with the addition of Japan) G7 states and their international rules provide a generally benign ('win-win') environment for development in the rest of the world (as in the G7/IMF/World Bank/OECD/World Economic Forum mindset, "free trade and free capital mobility benefits all of us").

Teaching: This course is delivered through a combination of lectures and seminars in the Autumn Term. Seminars will be one and a half hours and lectures will be one and a half hours. There will be a reading week in Week 6.

Formative coursework: Students have the option of writing one essay of 2,000 words in Autumn Term.

Indicative reading: Core text: John Ravenhill (ed), *Global Political Economy*, 6th edition, OUP, 2020.

Assessment: Exam (100%, duration: 3 hours) in the January exam period.

The exam will be an invigilated on-campus 'e-exam'.

DV424 Half Unit International Institutions and Late Development

This information is for the 2024/25 session.

Teacher responsible: Prof Kenneth Shadlen CON.6.07

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in Media, Communication and Development, MSc in Political Economy of Late Development and MSc in Political Science (Global Politics). This course is available with permission as an outside option to students on other programmes where regulations permit.

2/3 of the spaces are reserved for ID and joint degree students, distributed on a random basis.

1/3 go to non-ID/joint students, distributed on a random basis.

All students not admitted in the initial allocation of spaces go on the waitlist, and as space opens the course leader will select students, without regard to degree/dept.

Course content: This course examines the politics of the international economy. We analyse the overarching rules and regulations that structure the international economy, and thereby provide context for development policy, and we assess the role of a range of actors (e.g. governments, firms, non-state actors) in

shaping and reshaping the international economic order. We are particularly interested in understanding the ways that developing countries respond to and participate in the bodies that make and enforce international rules, and how changes in global economic governance affect opportunities for economic development. The first week, which synthesises a variety of explanations of the role that international institutions play in global politics, establishes the theoretical spine for the course. We then examine governance in international sovereign debt in weeks 2 and 3, analysing the processes for restructuring debt owed to "public" (governments and international organizations) and "private" lenders. The course then turns to the politics of international trade, investment, and intellectual property. In week 4 we examine the emergence of the World Trade Organisation (WTO), focusing on the various agreements that the WTO administers, how it functions as an inter-governmental organisation with its own set of procedures for rule-making, policy monitoring and dispute-settlement, and the contemporary conflicts within the organization. In week 5 we examine the international trade regime beyond the WTO, including the proliferation of the bilateral and regional preferential trade agreements, focusing on the implications for development strategies in the Global South. In weeks 7 and 8 we analyse emerging arrangements for global governance in the areas of foreign investment and intellectual property, respectively. In week 9 we drill-down in more detail at global rules on intellectual property in pharmaceuticals, examining the challenges that the "globalization of pharmaceutical patenting" creates for developing countries. In week 10 consider the topic of "South-South relations," shifting the axis of the course from analysis of institutions and organizations dominated by rich countries to institutions and organizations of – and for – developing countries. The final week synthesizes and concludes.

Teaching: 20 hours of lectures and 15 hours of seminars in the WT.

Plus a 2-hour revision session in the ST. There will be a reading week in Week 6 of WT.

Indicative reading: A detailed reading list is presented at the beginning of term.

Assessment: Exam (60%, duration: 2 hours) in the spring exam period.

Essay (15%, 1500 words) and essay (25%, 1500 words) in the WT. 2 essays (15% and 25%, each 1,500 words) in the WT. The larger weight goes to the essay receiving a higher mark. The feedback on the first in-term essay serves as "formative" for second, and the feedback on both in-term essays are formative for the ST exam. The essays are based on – and linked to – the questions discussed in the weekly seminars. Further details are available on Moodle.

DV428 Half Unit Managing Humanitarianism

This information is for the 2024/25 session.

Teacher responsible: Professor Stuart Gordon CON.8.02

Availability: This course is compulsory on the MSc in International Development and Humanitarian Emergencies. This course is available on the MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Environment and Development, MSc in Gender (Rights and Human Rights), MSc in Gender, Peace and Security, MSc in Health and International Development, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in International Migration and Public Policy and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority first to MSc International Development and Humanitarian Emergencies students and

then to students on International Development and joint-degree programmes followed by MSc Human Rights students. In cases where there are more applicants than spaces then places will be allocated randomly in accordance with the priorities listed above.

Course content: The course looks at the causes and range of responses to disaster agents and conflict. Building on an analysis of the causes, construction and consequences of humanitarian disasters, the course focuses on the functioning of the system. It considers the history, principles and the politics of humanitarian action; the overlaps and tensions between practices of humanitarian assistance and humanitarian intervention and how humanitarian institutions shape and are shaped by global governance and state power. It also considers why humanitarian organisations and governments respond to some crises and not to others as well as the extent to which the system accommodates gender and embodies neo-colonial practices. It also critically examines the ways in which the humanitarian system has sought to professionalise itself. Examples will be drawn from humanitarian disasters in Africa, Central and South Asia and Latin America. However, there is also likely to be discussion of ongoing humanitarian emergencies, wherever they are located. The course is augmented by a visiting lecture series (the 'Voice of Experience' lecture series) through which practitioners discuss issues of relevance to the management of humanitarian emergencies. Past speakers have included former UN Under Secretaries General, gender advisers for major humanitarian organisations, emergencies and fundraising directors and organisations as diverse as the UNHCR, the International Committee of the Red Cross, Médecins Sans Frontières, Islamic Relief and southern based local organisations.

Teaching: 20 hours of lectures and 15 hours of seminars in the AT. The final lecture of AT week 11 is a revision lecture.

Five or six 'Voice of Experience' lectures. Programme to be announced in week 2 of AT.

The teaching strategy is diverse and innovative: using both conventional discussions as well as a variety of small group exercises. These will feed directly into a formative piece of work related to the summative assessment.

Students on this course will have a reading week in Week 6.

Formative coursework: Students will receive feedback on seminar group presentations and have the option to write a formative essay, not exceeding 1,000 words due in week 5 of AT. Essay topics will relate to seminar discussions and lecture material covered to date. Students will receive an indicative grade and written feedback within four weeks of submission (if submitted on time).

Indicative reading: Stuart Gordon and Antonio Donini 'Romancing Principles and Human Rights - Are Humanitarian Principles Salvageable?' *International Review of the Red Cross* / Volume 97 / Issue 897-898 / June 2015, pp 77-109;

M. Barnett, (2011). *Empire of Humanity: A History of Humanitarianism*, Ithaca: Cornell University Press;

M. Barnett, M. Barnett & T. G. Weiss (Eds.), 2008. *Humanitarianism in Question Politics Power and Ethics*, Ithaca: Cornell University Press;

A. De Waal, 1997. *Famine Crimes: Politics and the Disaster Relief Industry in Africa*. Oxford: James Currey;

G. Loescher, (2001). *The UNHCR and World Politics*, Oxford University Press;

D. Rieff, (2002). *A Bed for the Night: Humanitarianism in Crisis*, Vintage/Random House.

Assessment: Take-home assessment (100%) in the WT.

The exam paper will be released in week 11 of the Autumn Term.

The course is assessed through the submission of two 2100-word essays in week 1 of the Winter Term.

Exam papers will comprise a section A with questions drawn from specific taught weeks and a section B with questions that engage themes drawn from multiple weeks. Students are expected to address one question from each of section A and B.

DV431**Development Management****This information is for the 2024/25 session.****Teacher responsible:** Prof Elliott Green CON.8.07 and Dr Mahvish Shami CON.8.12**Availability:** This course is compulsory on the MSc in Development Management and MSc in Development Management (LSE and Sciences Po). This course is available on the MSc in Political Science (Political Science and Political Economy). This course is not available as an outside option.**Course content:** Why are some countries rich and others poor? Why are some governed well and others badly? This course employs a political economy approach to examine the causes of development, identify the underlying obstacles to development, and evaluate potential solutions. It focuses on the principles governing the institutions, politics, and organisations through which policies, programmes and projects are produced and implemented. Attention is given to the different kinds of authority, incentives and accountability mechanisms that govern the relationships between leaders, managers and recipients. It reviews ongoing debates about the best ways of designing state agencies, private firms and NGOs, by showing how centralised bureaucracies, markets, participatory and solidaristic agencies operate to provide services in practice. It explores the dynamics of different forms of democratic and authoritarian states, the determinants of good and poor governance, and how social, political and economic forces interact to drive change and stability. In order to enable students to make practical judgments about institutional reform programmes in various contexts, competing approaches to development are critically and constructively analyzed in light of case studies.

The course is divided into several parts: Analytical Assumptions, Government and Governance, Private Sector, and Civil Society. On completing the course students should be able to:

(i) use theory to identify the causes of actual development challenges, (ii) identify and assess relevant case study material to inform development practice; and (iii) employ the insights developed throughout the course to formulate policy recommendations and plans of action for improving development.

Teaching: This course is delivered through a combination of lectures, seminars and workshops in the AT and WT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration.

Students are expected to attend all these sessions. Lectures will focus on the theoretical debates driving current policy practice in the development community, while seminars will relate these to practical problems of implementation, drawing on case studies, class exercises, and the personal experience of participants. Seminars will discuss topics covered in the lecture, and will be conducted on the basis either of a student presentation or a class exercise.

There will be a revision session in early ST.

Formative coursework: In the Autumn Term, all students are expected to prepare a presentation and produce one short essay on the readings of a particular week, to prepare them for the final exam.**Indicative reading:** A detailed weekly reading list is provided at the first course meeting. Background readings include:

- Acemoglu, Daron and James Robinson. 2012. *Why Nations Fail: The Origins of Power, Prosperity and Poverty*. New York: Crown.
- Auerbach, Adam. 2019. *Demanding Development: The Politics of Public Goods Provision in India's Urban Slums*. Cambridge: Cambridge University Press.
- Easterly, William. 2002. *The Elusive Quest for Growth: Economists' Adventures and Misadventures in the Tropics: Economists' Adventures and Misadventure in the Tropics*. Cambridge, MA: MIT Press.
- Faguet, Jean-Paul. 2012. *Decentralization and Popular Democracy: Governance from Below in Bolivia*. Ann Arbor: University of Michigan Press.
- Kohli, Atul. 2004. *State-Directed Development: Political Power and Industrialization in the Global Periphery*. Cambridge: Cambridge University Press.

- Tang, Shingping. 2022. *The Institutional Foundations of Economic Development*. Princeton, NJ: Princeton University Press.

Assessment: Exam (35%, duration: 1 hour) in the spring exam period. Take-home assessment (55%) in the ST. Presentation (10%) in the WT.

(The take-home assessment will be a 24 hour exam over the weekend in ST).

DV432 Half Unit Not available in 2024/25
China in Developmental Perspective**This information is for the 2024/25 session.****Teacher responsible:** Prof Jude Howell CON. 8.02**Availability:** This course is available on the CEMS Exchange, MA in Asian and International History (LSE and NUS), MBA Exchange, MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in International and Asian History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Pre-requisites: Excellent reading and speaking skills ~(IELTS 7 minimum).**Course content:** This course looks at China from a comparative developmental perspective, locating the discussion of China within the interdisciplinary field of development studies. It examines China's developmental trajectory since 1949, explaining the fundamental shift in developmental path from late 1978 onwards. It considers China's role in low-income countries, as a model of innovation, as a voice for developing country concerns and as an important aid donor. It reflects on China's recent achievements in reducing poverty and places these in comparative context. The course considers the governance challenges posed by rapid economic reform, the attempts to reform the Party-state and to manage social tensions. It examines the social dimensions of rapid economic reform and the implications for social policies. It looks at the emergence of NGOs and other forms of civil society organising and considers changing state-society relations. Finally it considers China's role as aid donor and its emergence as a global economic and political power. The course will enable students to obtain an understanding of key developmental issues and discussions about China and to link these discussions to broader debates and theories in development studies.**Teaching:** This course is delivered through a combination of lectures and seminars in the MT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration.

In addition, one introductory seminar session in MT, one essay preparation session in MT and two exam revision sessions in MT. Students on this course will have a reading week in Week 6.

Formative coursework: Students have the opportunity to receive feedback on a formative essay of 1,500 words. Students will also receive feedback on their seminar performance. Students are welcome to come to course convenor's office hours to discuss any issues. These may be on skype or phone, depending on the COVID-19 situation.**Indicative reading:**

- Ang Yuen Yuen, 2016, *How China Escaped the Poverty Trap*, Cornell University
- Friedman, Eli 2014, *Insurgency Trap. Labour Politics in Post-Socialist China*. Cornell University Press.

Assessment: Essay (30%, 2500 words) and take-home assessment (70%) in the WT.

This course will be assessed by a 6 hour take-home exam and 2500 word essay.

DV433 Half Unit Not available in 2024/25 The Informal Economy and Development

This information is for the 2024/25 session.

Teacher responsible: Prof Kathleen Meagher CON 7.11

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: The expansion of the informal economy, which now employs more than 60% of the world's workers, represents a central paradox of contemporary development thinking. COVID-19 has further exposed the pervasive role of informal employment across the globe. Practitioners, policy makers and academics seek a clearer understanding of its impact on poverty, employment, governance and inclusive development. In a globalising environment, are large informal economies a poverty trap or an engine of growth? Do they stimulate entrepreneurship and popular empowerment, or promote criminality and exploitation? How does a greater understanding of the size and organization of informal economies affect policy on urban service provision, social protection or taxation? What are the implications of the informal economy for social cohesion and popular politics in developing countries?

This course will explore how high levels of informality in developing countries are shaping processes of growth and governance in the Global South. The effect of informality on new policy narratives of inclusive growth will be a central theme in the course. Using a comparative institutional approach, we will examine informal economies in a range of regional contexts, including Africa, the

Middle East, South and East Asia, and Latin America, highlighting variations in activities, relations with the state, global integration and development outcomes. Key issues covered in the course include the impact of the informal economy on labour markets, weak states, gender empowerment, urban services, social enterprise, social protection, taxation, and popular politics. Attention will be focused on the potential as well as risks of large informal economies in the face of contemporary development challenges, drawing on empirical evidence and comparative case studies from across the developing world.

Teaching: This course is delivered through a combination of lectures and seminars in the WT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration. There will also be a revision session in the ST. Student on this course will have a reading week in Week 6.

Formative coursework: Formative coursework will involve a 2,000 word essay during the term and at least one presentation.

Indicative reading: 1. Portes, Alejandro, Manuel Castells and Lauren A. Benton, eds. (1989) *The Informal Economy: Studies in Advanced and Less Developed Countries*. Baltimore: John Hopkins University Press.

2. Perry et al. (2007) *Informality: Exit and Exclusion*, World Bank (available on Google Books).

12. Meagher, K. (2010) *Identity Economics: Social Networks and the Informal Economy in Nigeria*, Oxford: James Currey.

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Essay (30%, 3000 words) in the ST.

DV434 Half Unit Not available in 2024/25 Human Security

This information is for the 2024/25 session.

Teacher responsible: Prof Tim Allen

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Gender (Rights and Human Rights), MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Late Development, MSc in Political Science (Global Politics) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority to ID and joint-degree

students. If there are more ID and joint-degree students than DV434 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: In 1994, the Human Development Report introduced 'human security' as a UN concept, equating the term with people rather than territories, and with development rather than arms. The idea of human security has subsequently been elaborated and commitment to it reiterated. For example, General Assembly resolution 66/290 (2012) explains that 'human security is an approach to assist Member States in identifying and addressing widespread and cross-cutting challenges to the survival, livelihood and dignity of their people.' It calls for 'people-centred, comprehensive, context-specific and prevention-oriented responses that strengthen the protection and empowerment of all people.'

However, the linking of security with a comprehensive view of livelihoods has had effects that were not initially anticipated by many of those who embrace it. Militarization and enforcement have become possible in situations in which formally they were viewed as problematic, and violent acts have been explained as acceptable or necessary.

The course takes the United Nations' concept of human security as its starting point but addresses it in a wider range of ways than is the norm. The course will draw heavily on previous and ongoing research at LSE, notably research associated with the Justice and Security Research Programme, The Centre for Public Authority and International Development (CPAID), and the Firoz Lalji Institute or Africa (FLIA). Students will be expected to engage critically with this research and contribute to discussions with colleagues currently involved in field research and the writing up of findings. Much of the material in the course will focus on African examples. It will address wider debates but will also have an orientation towards detailed ethnographic case material. It will emphasize the lived experiences of those actively struggling with aspects of their human security.

Topics are likely to include social responses to epidemics, interpersonal accountability, social protection and healing, moral panics (including witch-cleansing), environmental threats, international criminal law, public authority, populism, and mutuality. These things often look very different when seen from the ground-up, rather than from the perspective of state policy and international relations. There will be a particular emphasis on how human security relates to public authority - understood as forms of collective action beyond the family, involving a degree of consent. Students interested in taking the course should look at the websites below and read some of the publications.

- <https://www.lse.ac.uk/africa/centre-for-public-authority-and-international-development#:~:text=The%20Centre%20for%20Public%20Authority,international%20development%20and%20inclusive%20growth>
- <https://www.lse.ac.uk/africa/research>

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to undertake a class presentation. Students will also have the opportunity to receive feedback on formative work, in the form of a practice-assessed essay.

Assessment: Essay (100%, 4000 words) in the ST.

DV435 Half Unit Not available in 2024/25 African Political Economy

This information is for the 2024/25 session.

Teacher responsible: Prof Catherine Boone

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science (Conflict Studies and Comparative Politics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This is an introduction to the study of contemporary African political economy, with a focus on sub-Saharan Africa. The goal of DV435 is to set major questions of state, national economy, and development in historical, geographic, and international context. Course readings and lectures stress marked unevenness in national and subnational trajectories and in the political-economic character of different African countries, drawing attention to causes of similarity and difference across and within countries. Students completing DV435 will come away with a better understanding of the economic and social underpinnings of order and conflict in African states.

There is a research-driven component to DV435: each student will read secondary literature, grey literature, and other sources to develop particular knowledge of two countries. These will be used as "case studies" in assessed coursework to evaluate general arguments concerning the political economy of Africa, and to compare/contrast the historical trajectories of different African states.

The course includes an optional weekly film series that provides an additional venue for discussion of course themes.

Teaching: This course is delivered through a combination of lectures and seminars in the AT. Seminars will be at or upwards of 70 minutes duration and lectures will be at or above 90 minutes duration.

Students on this course will have a reading week in Week 6.

Formative coursework: Optional formative essay outline due in Week 7.

Indicative reading: Celestin Monga and Justin Yifu Lin, eds., *The Oxford Handbook of Africa and Economics*, Vol. 2, Policies and Practices (OUP 2015).

Assessment: Essay (100%, 3000 words) in the WT Week 1.

DV442 Half Unit

Key Issues in Development Studies

This information is for the 2024/25 session.

Teacher responsible: Dr Christine Hanrieder CON 8.14

Availability: This course is compulsory on the MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is available on the MSc in Anthropology and Development, MSc in Economic Policy for International Development, MSc in Environment and Development and MSc in Urbanisation and Development. This course is not available as an outside option.

Not available to students enrolled on DV400 & DV431.

Course content: This course provides an inter-disciplinary introduction to development studies. We explore key issues such as the SDGs, states and markets, growth and redistribution, colonial legacies, gender, climate change, and demography in development (key issues may change from year to year).

Teaching: 10 x 1.5 hour lectures and 10 x 1.5 hour seminars. in the AT. There will also be a 1.5 hour exam revision session at the end of AT.

Formative coursework: Students will submit one formative essay of 1500 words.

Indicative reading: The following are recommended basic readings for the course:

A Sen, *Development as Freedom* (Anchor, 1999).

Chang, H.J. (2002), *Kicking Away the Ladder: Development Strategy in Historical Perspective* (London: Anthem Press).

Recommendation for students with little previous exposure to economic debates:

Chang, H.J. (2014). *Economics: The User's Guide*. (London: Penguin Books).

Assessment: Take-home assessment (100%) in January. This is in the form of a 48 hour assessment

DV443 Half Unit

Development Management Consultancy Project

This information is for the 2024/25 session.

Teacher responsible: Dr Mahvish Shami CON.8.12

Availability: This course is compulsory on the MSc in Development Management (LSE and Sciences Po). This course is available on the MSc in Development Management. This course is not available as an outside option.

Course content: This unit is a compulsory core half unit course for the MSc Development Management. Students work on a consultancy report in Autumn and Winter Terms.

Students will gain practical experience of dealing with current policy issues and best practice in the field of international development by working as a part of a team on a live consultancy project for a real client. The consultancies are based around an experiential learning format. Clients provide Terms of Reference for the student groups to work on. Students receive guidance from academic staff through a structured supervision process and support from a staff coach through formal workshops. Students are allocated to consultancy teams usually comprising between three and six people. Students can express preferences for particular clients but may not be allocated to one of these. The roster of clients and projects changes every year.

The consultancy project begins in Autumn Term with client reports due in the Winter Term. The client report and final presentation form part of the assessment.

The course links the practical management of a development consultancy with broader issues of managing development.

Teaching: This course is delivered through a combination of 4 lectures and two student led formative problem-solving sessions (conducted over zoom) and one session dedicated to student inception report presentations in the AT and another 3-student led formative problem-solving sessions (conducted over zoom) in the WT. In addition, consultancy groups are expected to meet informally for two hours every week from week 2 -11 in the AT. The course is intended to take about 30 working days per person over two terms.

The lectures focus on two elements:

1. Dealing with the administration and management of a development consultancy at a group level as well as a
2. Critical engagement with development management interventions in practice (covering topics such as managerialism and results-based management, the politics of data, accountability, professionalisation, certification and credentialism, the political economy of projects/evaluation and log frames).

Autumn Term

Weeks 2, 3, 4 and 5: 2-hour lectures covering 1 and 2 above

Week 6: Reading Week

Weeks 7 & 11: Problem-solving drop-in sessions (zoom based)

Weeks 8 & 9: Inception report presentations

Winter Term

Weeks 1, 3 and 7: Problem-solving drop-in sessions (zoom based)

Final presentations in week 11.

Formative coursework: Students will participate in consultations with coaches to assist groups to formulate their proposals and negotiate their projects with their commissioning agencies. The inception report presentations in week 11 also provide verbal formative feedback from peers and coaches.

Indicative reading: There is no specific reading for this course as this will reflect the specific project Terms of Reference that students work to.

Assessment: Project (70%, 8000 words), other (10%) and group presentation (20%) in the WT.

Other (10%) = peer review (360 review)

Final client presentations are at the end of the Winter Term and are scheduled by the students in consultation with academic staff and the client. Students should be aware that presentations to clients may have to take place in the week after the end of WT, and students should plan accordingly and be available to participate if required.

DV444 Half Unit

Global Health Challenges: Epidemics, Disease, and Public Health Response

This information is for the 2024/25 session.

Teacher responsible: Dr Arjan Gjonca CON.7.08

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Global Health Policy, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV444 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Pre-requisites: No pre-requisites are required for this course.

Course content: This course aims at looking at some of the major global health challenges in the 21st century. The course analyses health challenges from a multidisciplinary approach including public health, demography, and development studies. The relationship between epidemics, diseases and the public health policies are core to the content of the course. The course takes an interest on population causes and consequences of diseases and epidemics. It focuses mainly on the social and environmental determinants of epidemics and disease pattern in low- and middle-income countries. Moreover, the course does this in a comparative perspective to high income countries. The course uses both evidence-based and theoretical approaches, such as epidemiological and nutritional transitions. Another important aspect of the course is that it sheds light on the future of global health challenges as a result of anticipated population health changes.

Some of the main topics covered are: Epidemics and pandemics in historical perspective; the effects of pandemics in the overall health and mortality patterns of populations; Covid 19 pandemic - characteristics and the public health response to it; obesity and undernourishment as public health challenges; The increased global burden of mental health, environmental challenges and the impact on health; the relationship of migration and health and its effect on urban population.

Teaching: 16 hours and 30 minutes of lectures and 15 hours of seminars in the AT.

There will be a revision session in the AT.

Student on this course will have a reading week in Week 6.

Formative coursework: Students are expected to contribute in seminars and submit a 1,500-word formative essay in AT.

Indicative reading: Jamison, D. T., Summers, L. H., Alleyne, G., Arrow, K. J., Berkley, S., Binagwaho, A., ... & Yamey, G. (2013). Global health 2035: a world converging within a generation. *The Lancet*, 382(9908), 1898-1955.

Montgomery MR. (2008) *The health of urban populations in developing countries*. New York, New York, United Nations, Department of Economic and Social Affairs, Population Division

Assessment: Essay (100%, 3000 words) in the WT.

The word count includes the body of the essay. It excludes title, headers, bibliography, list of abbreviations, appendices; it includes footnotes/endnotes and everything else.

DV445

Cutting Edge Issues in Development Thinking & Practice

This information is for the 2024/25 session.

Teacher responsible: Dr Laura Mann CON.7.10

Availability: This course is compulsory on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is available on the MSc in Political Economy of Late Development. This course is available as an outside option to students on other programmes where regulations permit.

It is a compulsory course for all ID students.

Course content: The objective of the course is to introduce students to some of the most important and innovative voices and ideas in contemporary development debates, both from the academic and practitioner communities, which will both facilitate their 'career paths' and also contribute to learning in courses and consultancy projects. Each week speakers from different disciplines, development organisations or research institutes will speak to students about a "hot topic" in development policy and research work. Previous speakers have included senior economists, serving and former Government Ministers, NGO chief executives and senior staff, innovative academic researchers and consultants, among others.

Teaching: 20 hours of lectures in the AT.

Lectures will be followed by open discussion and debate. There will be a reading week in Week 6.

Assessment:

This course is not assessed.

DV453 Half Unit**International Development Consultancy Project**

This information is for the 2024/25 session.

Teacher responsible: Professor Ernestina Coast CON.8.15

Availability: This course is available on the MSc in Development Studies and MSc in Health and International Development. This course is not available as an outside option.

MSc Health and International Development students are guaranteed a place on DV453. Places for MSc Development Studies students requesting to take this course as an option are strictly limited (5 places allocated by ballot amongst applicants). MSc Development Studies students must take DV458 to be able to apply for a place on DV453.

Course content: Students will gain practical experience of dealing with current policy issues and best practice in the fields of health and international development by working on a consultancy team project for an external client. The consultancies are based around an experiential learning format. Students receive guidance through a structured supervision process and work on the consultancy report in Autumn and Winter Terms with support from a staff coach.

Students are allocated to consultancy teams usually comprising between three and six people. Students can express preferences for clients but may not be allocated to one of these. The roster of clients and projects changes every year.

The consultancy project begins in Autumn Term with client reports due at the end of Winter Term. The client report and final presentation form part of the assessment.

There are 4 AT lectures plus 1 AT workshop [to include the inception report presentations] and 1 WT workshop each lasting up to two hours.

Teaching: This course is delivered through a combination of lectures and workshops. Up to 8 hours of lectures and up to 4 hours of workshops in the AT and WT.

This course will have a reading week in Week 6.

Formative coursework: Students will contribute to the Group inception report and presentation (in the AT) and will be given group feedback for each of these.

Indicative reading: There is no specific reading for this course as this will reflect the specific project Terms of Reference that students work to.

Assessment: Project (80%, 8000 words), reflective learning report (10%) and group presentation (10%) in the WT.

The reflective learning report comprises two individual diaries plus individual performance assessed through 360-degree student reporting and the coach's own assessment of individual contributions.

Final client presentations are at the end of the Winter Term and are scheduled by the students in consultation with academic staff and the client. Students should be aware that presentations to clients may have to take place in the week after the end of WT, and students should plan accordingly and be available to participate if required.

An alternative assessment pathway is available in situations where groups are dissolved or individual students are removed from groups usually, but not exclusively, for disciplinary, client related or personal reasons. The suitability of this pathway is determined by the respective Programme Director and Head of Department. The department may also require or request individual students who have performed extremely well or whose contributions are unclear to demonstrate contributions through a portfolio of assessed work.

DV454 Half Unit Not available in 2024/25**Gender, labour markets and social change in the Global South: theory, evidence, public action**

This information is for the 2024/25 session.

Teacher responsible: Prof Naila Kabeer

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Gender, Development and Globalisation, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: One of the longest running debates within the feminist literature, and one that has also played out in the field of gender and international development, relates to the relationship between women's access to labour market opportunities and their position within the family and community: the 'exploitation' versus 'emancipation' argument. These debates have been given fresh lease of life in the development literature as a result of the growing feminisation of labour markets in recent years in most regions of the Global South. They have been further complicated by additional claims (which have a great deal of traction in policy circles) that greater gender equality in the labour market has enormous potential for economic growth. At the same time, a great deal of contemporary feminist literature as well as international campaigns have highlighted the extremely exploitative terms on which most women take up paid work, contested the view that increased access to paid work has been empowering for women and questioned the instrumentality of the 'gender is good for growth' argument.

This course will be loosely organized around these debates. It will seek to equip students with the ability to analyse and assess these competing claims about what is a very critical issue in the field of international development by providing them with a firm grounding in theory, evidence and policy debates relating to gender and labour markets in the Global South. It will meet this objective through three components which will build on each other.

The first will focus on the different positions taken within these debates and the rationales put forward to justify these claims. It will examine key concepts and theories relating to gender, households and labour markets which provide the theoretical underpinning to these claims. In particular, it will distinguish between the concepts of capabilities, empowerment and economic citizenship as ways of capturing changes associated with work. It will also consider the different definitions of 'work' which feature in these theories and the extent to which they capture the labour market and livelihood strategies of households in different regions of the Global South.

The second component will draw together the empirical literature to consider the evidence relating to gendered patterns of labour market participation in different regions of the world. It will start out with a broad-brush account of the changes that have taken place in domestic and global labour markets over the last few decades. It will then consider in greater detail how these markets function in low-and middle-income countries and the intersectional segmentation of occupations and tasks that they generate. It will analyse how market forces are restructuring some of the intimate aspects of family relations through the commodification of reproductive and sexual services that were previously provided as part of the marital contract. It will conclude by considering what these changing dynamics of the labour market tell us about women's position within their families and the wider society and

revisit the arguments about gender and growth.

The third component will evaluate various forms of public action by policy, corporations and civil society actors that have been taken up in response to their positions with regard to the gender dynamics in the economy. These include policy measures to promote greater gender equality in the labour market, including minimum wage legislation, social protection and corporate responsibility. They will also include new forms of unionism and collective action that have sought to promote economic citizenship and the rights of women workers at global and local levels.

Teaching: This course is delivered through a combination of lectures and seminars in the WT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration. Student on this course will have a reading week in Week 6.

Formative coursework: Students can opt to submit a 1500 essay which will not count towards their final marks but which will allow them to receive feedback on their ability to read critically, to synthesise arguments and to ensure that their writing style meets the standards required by the school. It will also address learning outcomes 1 and 4.

Assessment: Essay (100%, 4000 words) in the ST.

DV455 Half Unit Advocacy, Campaigning and Grassroots Activism

This information is for the 2024/25 session.

Teacher responsible: Prof Duncan Green and Mr Thomas Kirk
Dr Duncan Green is Professor in Practice in the International Development Department, and Senior Strategic Adviser at Oxfam GB, an international NGO. His blog, *From Poverty to Power* (<http://oxfamblogs.org/fp2p/>) is one of the most widely read international development blogs. His most recent book, *How Change Happens* (OUP, 2016, 2nd edition June 2024) is the core text for this course. Dr Thomas Kirk is a researcher and consultant based at the London School of Economics and Political Science. Interests include the provision of security and justice in conflict affected regions, social accountability, civil society, local governance and public authority. Lived and worked in Afghanistan, Pakistan, India, Timor-Leste, the DRC and Kenya.

Together they run the Influencing component of the Global Executive Leadership Initiative Course (<https://www.geli.org/programs-courses/regional-training-programme/influencing-senior-leaders-analysis-strategy-and>).

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Health and International Development, MSc in Inequalities and Social Science, MSc in International Development and Humanitarian Emergencies and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course will be offered in Autumn term and capped at 75 students.

Selection criteria: applicants will be asked to submit 200 words on their background and why they want to take the course, to be assessed against interest, experience and passion.

If there are any spare spaces, the course is available as an outside option.

Course content: There are two blocks in this course:

1. Understanding How Change Happens, including systems thinking and power analysis.
2. The analytical frameworks used by INGOs and other change agents to inform and design their advocacy.

This course introduces students to some of the analytical frameworks and practical techniques used by INGOs such as Oxfam (where the course leader is senior strategic adviser), along with other activists (broadly defined, including 'change agents' in governments and the private sector) in influencing political, social and economic policy and practice.

Lectures will introduce the importance of systems thinking and power analysis in understanding and influencing processes of change and the role of civil society and advocacy in driving such change.

These will be used to explore how activists and activist organizations use these as organizing tools for influencing, through both 'insider' or 'outsider' strategies.

The course is designed for students who have been, or intend to become, active in driving change, whether as members of civil society organizations, in government, in aid donors or in the private sector. You will develop your understanding both of endogenous change processes in developing countries, and the design and limitations of deliberate efforts to bring about political, social and economic change.

Students will be asked to come with an initial idea for an influencing exercise that they would personally like to design and implement (for example a campaign, policy reform, or effort to shift public attitudes) and will apply the coursework to that case study, developing a project proposal at the end of the term that will be assessed.

Students will be required to produce a blog post or vlog (video blog) summarizing their individual project, which will also be summatively assessed (students will be offered a 'blogging for beginners' lecture on writing for impact).

Working in small groups, students will also choose and analyse a past case study of change, which will be assessed.

Teaching: Teaching will consist of a combination of lecture presentations, involving powerpoint, video and group discussion, and seminar discussions. There will be one lecture at or above 60 minutes duration each week of AT. This will be followed up by 60 minutes of seminar work in the AT. Reading week will occur in week 6, during which time there will be extended office hours available.

Formative coursework: Students will be asked to submit initial formative proposals (1000 words max) for their individual assignments in week 6, for feedback from the course leaders. Proposals for the group assignment will be submitted in seminars in weeks 7 & 8 for tutor feedback.

Assessment: Project (50%, 2500 words), project (40%) and blog post (10%) in the AT.

The course has three pieces of assessed work:

- a) Essay - Individual strategies (50%, 2500 words)
- b) Group presentation (40%, slide deck and group viva in WT)
- c) Individual blog/vlog posts (10%). The deadline for all 3 pieces of assessed work (final individual project, group slide deck and blog) is midday on 12 PM Friday 10th January 2025.

DV456 Half Unit

Population, Health and Development: Evidence and Projections

This information is for the 2024/25 session.

Teacher responsible: Prof Tiziana Leone, CON.8.11

Availability: This course is compulsory on the MSc in Social Research Methods. This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in

Economic Policy for International Development, MSc in Gender, Development and Globalisation, MSc in Global Health Policy, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority first to MSc Health and International Development students and then to students on International Development and joint-degree programmes. In cases where there are more applicants than spaces places will be allocated randomly in accordance with the priorities listed above. Spare places for non-ID/Joint Degree students will be allocated by random selection, with preference given to degrees that permit this option.

Pre-requisites: Some familiarity with personal computers is required, but a high degree of technical proficiency is not required. Familiarity with excel (basic functions) needed otherwise attend a course at LSE Life. For more details on whether the course might be suitable for you please visit Moodle.

Course content: The course is practical in nature and overviews key methods used for planning in population and development with an emphasis on the health sector. Key questions which will be answered in this course are: what is the future of the world population; what are the family planning needs of couples in low income countries; what will be the number of newly HIV infected in the next 15 years; what is the future of major diseases; what is the impact of key health interventions. The focus will be both on producing information as well as on searching and understanding data provided by key international agencies and on learning how to relate the information meaningfully to policy makers. Relevance will be given to methods used for assessing the implications of high levels of mortality in developing countries with specific reference to the HIV/AIDS pandemic, as well as the assessment of high fertility levels due to low uptakes of family planning methods. During the course students will learn to apply interventions-based models through the use of Spectrum to understand the impact on outcomes and on governments' health expenditure. The approach is practical and complements the more theoretical population courses giving additional skills such as an understanding of key international projections and estimates, planning for health workforce and for health supplies. Students will undertake a number of computer-based assignments (using either Excel or Spectrum) which will follow the topics highlighted during the lectures. The course covers concepts used for population analysis; the role of population projections in the population planning and development process; the basis of projections made by international agencies such as the UN Population Division; the formulation of projection assumptions and methods of making projections; methods for projecting and assessing the impact of HIV/AIDS and the use of software such as AIM (AIDS Impact Model), the framework of the ONEHealth model as well as planning maternal and child health interventions with the use of LiST. The course will also give an overview of projections for non-communicable diseases, Malaria and TB among others. Emphasis will be given to the learning of analytical skills which include data and information searching on the internet as well as presentation of the information. Former students have found the course useful to get a foundation of how UN agencies involved in data collection work, to gain analytical skills which are transferable as well as getting a grasp of how to translate data into policy.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Student on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to submit a formative assessment of 4 pages before the end of term.

Indicative reading: Relevant documents will be provided at the start of the course, mainly in the form of electronic documents. Suggested reading are Lutz "The future population of the world"; Cohen "How many people can the earth support"

Assessment: Coursework (90%) in the ST.

Continuous assessment (10%) in the WT.

Assessment will be by two forms of assessments.

Continuous assessment worth 10%: will be based on course participation, a group presentation along with homework submitted on Moodle during WT.

Coursework worth 90% - will be a 10 A4 page report. This will involve the formulation, execution and writing up of a project concerned with a model for population planning, to be agreed with the course teacher. This must be submitted by the second week of ST.

DV457 Half Unit

Sexual and Reproductive Health Programmes: Design, Implementation and Evaluation

This information is for the 2024/25 session.

Teacher responsible: Prof Ernestina Coast, CON.8.15

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Gender, MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Global Health Policy, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority first to MSc Health and International Development students and then to students on International Development and joint-degree programmes. In cases where there are more applicants than spaces then places will be allocated randomly in accordance with the priorities listed above. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: This course aims to equip students with the knowledge and skills to be able to critically appraise data and evidence for assessing sexual and reproductive health programmes. This course deals with the effectiveness of sexual and reproductive health programmes, especially those that deliver services. The key issues addressed are the design of programmes, their effective implementation, and their evaluation. The course focuses on the critical production and consumption of data and evidence – both quantitative and qualitative – for assessing sexual and reproductive health programmes. The course takes a global approach, incorporating evidence from a range of contexts, countries and populations.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. Students on this course will have a reading week in Week 6.

Formative coursework: Students are expected to prepare a group seminar presentation and an individual annotated bibliography during the term.

Indicative reading: Lecture and seminar electronic reading lists are available in Moodle.

Assessment: Coursework (100%) in the WT.

Coursework assignment to be a maximum of 10 A4 pages.

DV458 Half Unit

Key issues in Global Health and Development

This information is for the 2024/25 session.

Teacher responsible: Prof Tiziana Leone CON.8.11 and Dr Philipa Mladovsky CON.6.13

Availability: This course is compulsory on the MSc in Health and International Development. This course is available on the MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Gender, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development, MSc in Social Research Methods and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than DV458 can accommodate, these places will be allocated randomly. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: The course provides an up-to-date and comprehensive introduction to global health and health system trends in low and middle-income countries. The course examines the main determinants of health issues as they relate to development and their principal consequences, policies and politics to improve health and development; barriers to implementing those policies; and ways of overcoming those barriers. Key topics include the politics of diseases, framing health discourses, governance and the WHO, universal health coverage, impacts of conflict and climate change on health, pharmaceutical governance and global health metrics. Drawing on disciplines such as political science, health policy, demography, sociology and economics, this course argues for the need to improve global health equity in order to contribute to development. It will equip students with the skills needed to work in and help to improve mainstream global health organisations such as WHO, the World Bank, Gates Foundation and MSF among others. The course promotes equality, social justice and human rights as fundamental approaches to global health.

Teaching: 20 hours of lectures and 15 hours of seminars in the AT. Student on this course will have a reading week in Week 6.

Formative coursework: Students are expected to prepare a seminar presentation and complete a mock exam during AT.

Indicative reading: The course is supported by an electronic reading list. There is no single key text but here are some indicative readings:

- Birn, A. et al, 2017, "Textbook of global health". Oxford University Press
- Marmot, M., et al, 2008, Closing the gap in a generation: health equity through action on the social determinants of health. The Lancet, 372(9650), pp.1661-1669
- Shiffman, 2009, "A social explanation for the rise and fall of global health". Bulletin of the World Health Organization, 87(8), 608–613
- Adams, V. 2016, "Metrics: what counts in global health". Duke University Press
- Kieny, M.P., et al 2017, Strengthening health systems for universal health coverage and sustainable development. Bulletin of the World Health Organization, 95(7), p.537.
- Gill et al, (2020), Reflections on the political economy of planetary health in Review of International Political Economy. Review of International Political Economy. 27:1
- Watts et al. (2019), The 2019 report of The Lancet Countdown on health and climate change: ensuring that the health of a child born today is not defined by a changing climate. The Lancet, 394(10211), pp.1836-1878.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

DV460 Half Unit Not available in 2024/25

Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference

This information is for the 2024/25 session.

Teacher responsible: Dr Tasha Fairfield CON 6.02

Availability: This course is available on the MSc in Comparative Politics, MSc in Development Management, MSc in Development Studies, MSc in Global Politics, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in International Relations (Research) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be selected for DV460 based on a written statement of interest (max 150 words). Priority will be given to students on the programs listed above, if demand exceeds places.

Pre-requisites: This course has no prerequisites.

Students do not need any previous exposure to either Bayesian analysis or qualitative methods literature.

Course content: The way we intuitively approach qualitative case research is similar to how we read detective novels. We consider various different hypotheses to explain what occurred—whether the emergence of democracy in South Africa, or the death of Samuel Ratchett on the Orient Express—drawing on the literature we have read (e.g. theories of regime change, or other Agatha Christie mysteries) and any salient previous experiences we have had. As we gather evidence and discover new clues, we continually update our beliefs about which hypothesis provides the best explanation—or we may introduce a new alternative that occurs to us along the way.

Bayesianism provides a natural framework that is both logically rigorous and grounded in common sense, that governs how we should revise our degree of belief in the truth of a hypothesis—e.g., "mobilisation from below drove democratization in South Africa by altering economic elites' regime preferences," (Wood 2001), or "a lone gangster sneaked onboard the train and killed Ratchett as revenge for being swindled"—given our relevant prior knowledge and new information that we obtain during our investigation. Bayesianism is enjoying a revival across many fields, and it offers a powerful tool for improving inference and analytic transparency in qualitative research.

This course introduces basic principles of Bayesian reasoning with the goal of helping us leverage our common-sense understandings of inference and hone our intuition when conducting causal analysis with qualitative evidence. We will examine the foundations of Bayesian probability as well as concrete applications to single case studies, comparative case studies, comparative historical analysis, and multi-methods research. Students will practice applying Bayesian reasoning to assess the strength and quality of inferences in published studies, drawing on exemplars of qualitative research from various fields of socio-political analysis including development studies, comparative politics, international relations, and policy analysis. Students will also apply Bayesian principles to various aspects of their own dissertation research in progress—e.g., generating or revising hypotheses, selecting cases, identifying weaknesses in salient background literature, and assessing the inferential weight of available evidence.

Upon completing the course, students will be equipped with a concrete set of Bayesian-inspired best practices to deploy in their own research, as well as widely-applicable analytic skills that will help them to better evaluate and critique socio-political analysis.

Teaching: This course is delivered through a combination of lectures and seminars in the LT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration.

Student on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 exercise and 1 project in the WT.

Students will receive written and oral formative assessment on in-class exercises, which will ask them to explain key Bayesian

concepts (e.g., the "weight of evidence") in their own words and apply them to concrete examples (e.g. use Bayes' rule to derive an inference from several pieces of evidence).

In addition, students will receive feedback on the first section of their final project, which will set up rival hypotheses to be compared in light of case evidence.

Indicative reading: Methodological foundations:

Andrew Bennett, "Disciplining Our Conjectures: Systematizing Process Tracing with Bayesian Analysis," in Andrew Bennett and Jeffrey Checkel, eds, *Process Tracing in the Social Sciences: From Metaphor to Analytic Tool*, Cambridge University Press, 276–98, 2015; Tasha Fairfield and Andrew Charman, "Explicit Bayesian Analysis for Process Tracing," *Political Analysis* 25(363-380), 2017; Tasha Fairfield and Andrew Charman, "A Dialogue with the Data: The Bayesian Foundations of Iterative Research in Qualitative Social Science," *Perspectives on Politics* 17(1:154-167), 2019; Timothy McKeown, "Case Studies and the Statistical Worldview," *International Organization* 53(1):161-190, 1999.

Qualitative research exemplars:

Tasha Fairfield and Candelaria Garay, "Redistribution under the Right in Latin America: Electoral Competition and Organized Actors in Policymaking," *Comparative Political Studies* 50 (14) 1871-1906, 2017; Marcus Kurtz, "Reconsidering War and the 'Resource Curse' in Third World State Building," *Politics & Society* 37 (4) 479–520, 2009; Kenneth Schultz, "Fashoda Revisited" (Chapter 6) in *Democracy and Coercive Diplomacy*, Cambridge, 2001; Dan Slater, "Revolutions, Crackdowns, and Quiescence: Communal Elites and Democratic Mobilization in Southeast Asia," *American Journal of Sociology* 115 (1) 203-254, 2009; Elisabeth Wood, "An Insurgent Path to Democracy: Popular Mobilization, Economic Interests, and Regime Transition in South Africa and El Salvador," *Comparative Political Studies* 34 (8) 862-888, 2001.

Assessment: Project (80%, 3000 words) in the ST.

In-class assessment (20%) in the WT Week 11.

Students will choose a case-study article that is relevant to their dissertation topic and apply Bayesian reasoning to critique the article's inferences. This exercise entails assessing how the author's argument has been specified, identifying a plausible rival hypothesis (which may or may not be provided by the author), identifying the most salient pieces of evidence presented, and qualitatively evaluating the inferential weight the evidence provides in favour of the author's hypothesis relative to the rival.

DV462 Half Unit

Forced Migration and Refugees

This information is for the 2024/25 session.

Teacher responsible: Dr Myfanwy James

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Gender (Rights and Human Rights), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Health and International Development, MSc in Human Rights, MSc in Inequalities and Social Science, MSc in International Development and Humanitarian Emergencies, MSc in International Migration and Public Policy and MSc in International Migration and Public Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

Priority is given to students on the MSc International Development and Humanitarian Emergencies and MSc in International Migration and Public Policy, then International Development (ID) and joint ID MSc programmes and then students external to ID. At each stage course places will be allocated by random selection according to the priorities detailed above.

Course content: The course examines the politics of forced migration and humanitarian responses, the diversity of lived experiences among refugees, as well as contemporary debates about 'durable solutions' in the face of protracted crises. The

course is structured around four, interlocking themes. The first section critically examines the causes of displacement. The course challenges notions of mono-causality in favour of a more complex and dynamic understandings of why people move. We focus on two debates: first, the contested relationship between conflict and displacement, and second, the complex connections between environmental stress, climate change, and migration. The second section examines responses to forced migration. It examines the power and politics of the UN agency with a specific mandate for refugee protection and relief, the UNHCR, as well as the intersection between human rights and refugee law, and the contested relationship between humanitarianism and politics in contexts of forced displacement. We explore how displaced populations have been framed as security threats, and the way that this shapes both international responses and refugee experiences. The third section explores lived experiences of forced migration. It considers how experiences of flight, encampment, and exile can be mediated and shaped by factors such as gender, race, age, sexuality, ethnicity, and class. Drawing on ethnographic approaches, we consider processes of meaning-making and political mobilization during displacement, and the differing experiences of people living in refugee camps and urban settlements. The final section examines contemporary policy attempts at 'solving' protracted crises, and the limitations of these approaches. We consider existing practices and experiences of local integration, voluntary repatriation/return, and resettlement, and ask what it might mean to rethink these 'durable solutions.'

Teaching: 20 hours of lectures and 15 hours of seminars in the WT.

The course is accompanied by a film club which explores the representation and lived experiences of refugees. Students will have a reading week in Week 6.

Formative coursework: Students will co-produce seminar presentation and write a formative essay of 1500 words by week 8 of WT. Normally students will produce their formative essay within two weeks of presenting on that topic in the seminar.

Indicative reading: 1. Lischer, S. K. (2005). *Dangerous Sanctuaries: Refugee camps, civil war, and the dilemmas of humanitarian aid*. Cornell University Press.

2. Zetter, R., & Morrissey, J. (2014). The environment-mobility nexus: Reconceptualizing the links between environmental stress, (Im) mobility, and power. *The Oxford handbook of refugee and forced migration studies*, 342-354.

3. Moulin, C., & Nyers, P. (2007). "We live in a country of UNHCR"—Refugee protests and global political society. *International Political Sociology*, 1(4), 356-372.

5. Turner, L. (2015). Explaining the (non-) encampment of Syrian refugees: security, class and the labour market in Lebanon and Jordan. *Mediterranean Politics*, 20(3), 386-404.

6. Malkki, L. H. (1996). Speechless emissaries: Refugees, humanitarianism, and dehistoricization. *Cultural Anthropology*, 11(3), 377-404.

7. Janmyr, M. (2022). Sudanese Refugees and the "Syrian Refugee Response" in Lebanon: Racialised Hierarchies, Processes of Invisibilisation, and Resistance. *Refugee Survey Quarterly*, 41(1), 131-156.

Assessment: Take-home assessment (100%) in the ST.

The exam paper will be released in week 11 of the WT. The course is assessed through the submission of two 2100-word essays by Tuesday of week 1 of the ST.

Exam papers will comprise a section with questions drawn from specific weeks and another section with questions that engage themes from multiple weeks. Students are expected to address one question from both sections.

DV464 Half Unit

Democracy and Development

This information is for the 2024/25 session.

Teacher responsible: Prof Elliott Green CON.8.07

Availability: This course is available on the MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Environment and Development, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is also available with permission as an outside option to students on other programmes where regulations permit. Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Course content: One could argue that the 'holy grail' in the study of political economy is the relationship between democracy and development. Does economic development lead to democracy? Are democracies better at promoting development than non-democracies? This course examines this topic in a broad perspective, in both historical and contemporary contexts, and in theoretical and empirical debates.

The course is roughly divided into two, with the first half tackling theories of democracy and development while the second examines empirical evidence. In the first half we will examine historical theories explaining why development can promote democratization from authors such as Seymour Lipset and Barrington Moore, before focussing on contemporary debates from Acemoglu/Robinson, Przeworski and Rodrik. We then focus on the effect of democratization on both economic development and public goods provision, before examining the topic of inequality, redistribution and democracy with attention to Thomas Piketty's recent work. We conclude the first half of the course by discussing the indirect effects of development on democracy via changes in religion, ethnicity and nationalism, with attention to how development can promote secularism, ethnic homogenization and national identity formation.

The second half of the course focusses on specific countries and groups of countries. We start by examining countries which have developed without becoming democracies, with a focus on examples from East Asia (especially China and Vietnam) and the Middle East (the Gulf states). We then have lectures on three of the BRICS countries, namely South Africa, India and Brazil, as countries which have seen complex and varied attempts to democratize and develop. Finally, we conclude by speculating on the future of development and democracy in the developing world.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Formative assessment will be based on questions provided to students on the reading list assessed by the seminar leader, such that the feedback is given to the student before the end of Michaelmas term. Students will submit a practice essay that is 2000 words long. The marks will be indicative (i.e., P for Pass, D for distinction).

Indicative reading: Drèze, Jean and Amartya Sen. 2013. *An Uncertain Glory: India and its Contradictions*. London: Penguin. Guriev, Sergei and Daniel Treisman. 2022. *Spin Dictators: The Changing Face of Tyranny in the 21st Century*. Princeton: Princeton University Press.

Haggard, Stephan and Robert R. Kaufman. 2016. *Dictators and Democrats: Masses, Elites, and Regime Change*. Princeton, NJ: Princeton University Press.

Krishna, Anirudh (ed.). 2008. *Poverty, Participation and Democracy*:

A Global Perspective. Cambridge: Cambridge University Press
 Min, Brian. 2015. Power and the Vote: Elections and Electricity in the Developing World. Cambridge: Cambridge University Press.
 Przeworski, Adam. 2019. Crises of Democracy. Cambridge: Cambridge University Press.
 Rueschemeyer, Dietrich, Evelyne Huber Stephens and John D. Stephens. 1992. Capitalist Development and Democracy. Chicago: University of Chicago Press
 Tudor, Maya. 2013. The Promise of Power: The Origins of Democracy in India and Autocracy in Pakistan. Cambridge: Cambridge University Press.
 Wimmer, Andreas. 2018. Nation-Building: Why Some Countries Come Together While Others Fall Apart. Princeton, NJ: Princeton University Press.

Assessment: Essay (25%, 2000 words) in the WT Week 1. Essay (75%, 4000 words) in the ST Week 1. Students will submit a 2000- word long summative essay, at the beginning of Winter Term. They will then revise the essay according to the comments they receive and resubmit it as a 4000-word essay in Spring Term.

DV465 Half Unit Not available in 2024/25 Labour, Social Services and Development

This information is for the 2024/25 session.

Teacher responsible: Dr.Tine Hanrieder

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Gender, Development and Globalisation, MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in International Development and Humanitarian Emergencies, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. Places will be allocated with priority first to MSc Health and International Development students and then to students on International Development and joint-degree programmes. In cases where there are more applicants than spaces then places will be allocated randomly in accordance with the priorities listed above. Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: Development relies on a global workforce of health, care, and education workers in the public, voluntary/informal, and increasingly the private sector. This course examines this global workforce and the politics of labour for social development. It examines a set of cross-cutting development themes including the politics of training and skills, workforce migration and brain drain, and gendered and racialized divisions of labour. Students will learn to critically analyse debates about public sector wages in development strategies, the politics of professionalism and precarization, the role of volunteering and unpaid work, the moral and political economies of "corruption", the gains and losses incurred from labour migration, and the role of trade unions and international NGOs for the workplace, communities, and the state.

The course is broadly grounded in labour studies and feminist theories of social reproduction and care, and draws on research in disciplines including sociology, medical anthropology, political science, labour history, and public administration. It has a global outlook, working with case studies and examples from different regions and continents. It is both hands-on by unpacking current

workforce challenges for development, and critical by uncovering historical roots of these challenges and mobilizing social theory to interpret them.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the WT. Formative feedback on an essay outline is provided.

Indicative reading:

- Chambers-Ju, Christopher 2024: Mobilizing Teachers: Education Politics and the New Labor Movement in Latin America. Cambridge University Press.
- Maes, Kenneth 2017: The Lives of Community Health Workers: Local Labor and Global Health in Urban Ethiopia. Routledge.
- Marks, Shula 1994: Divided Sisterhood: Race, Class and Gender in the South African Nursing Profession. Wits University Press.
- Rodriguez, Robyn Magalit 2010: Migrants for Export: How the Philippine State Brokers Labor to the World. University of Minnesota Press.
- Wichterich, Christa & Maya John (eds.) 2023: Who Cares?: Care Extraction and the Struggles of Indian Health Workers. Zubaan Books.

Assessment: Essay (70%, 3000 words) in the ST.

Blog post (10%) and blog post (20%) in the WT.

The blog post receiving the higher mark is weighted 20%, the other 10%.

DV466 Half Unit Humanitarian Consultancy Project

This information is for the 2024/25 session.

Teacher responsible: Professor Stuart Gordon (CON.8.02)

Availability: This course is compulsory on the MSc in International Development and Humanitarian Emergencies. This course is not available as an outside option.

Course content: This unit is a core half unit course for the MSc IDHE. Students work on a consultancy report in Autumn and Winter Terms.

Students will gain practical experience of dealing with current policy issues and best practice in the fields of humanitarian assistance or international development by working on a live consultancy project for a real client. The consultancies are based around an experiential learning format. Students receive guidance through a structured supervision process and with support from a staff coach.

Students are allocated to consultancy teams usually comprising between three and six people. Students can express preferences for particular clients but may not be allocated to one of these. The roster of clients and projects changes every year.

The consultancy project begins in Autumn Term (AT) with client reports due in the Winter Term (WT). The client report and final presentation form part of the assessment.

Teaching: This course is delivered through a combination of lectures and interaction with coaches driven by student needs. Consultancy groups are expected to meet most weeks throughout AT and WT and group members generally commit around 30 days of their time to the course. During AT there will be a minimum of 4 lectures, 2 Zoom based problem-solving workshops and sessions devoted to student inception report presentations. There will be three scheduled Zoom problem-solving workshops in the WT.

Autumn Term

- Weeks 2, 3, 4 and 5: 2-hour Skills lectures
- Week 6: Reading Week
- Weeks 7 & 8: Zoom based problem-solving workshops
- Weeks 9, 10 and 11: Inception report presentations

Winter Term

- Weeks 1, 3 & 7: Zoom based problem-solving workshops

Formative coursework: Students will contribute to the Group inception report and presentation (in the AT) and will be given verbal feedback for each of these.

Indicative reading:

- John Rowley and Frances Rubin, 'Effective Consultancies in Development and Humanitarian and Humanitarian Programmes' (Oxfam: Oxford: 2006);
- Michael Bamberger, Jim Rugh and Linda Mabry, 'Real World Evaluation: working Under Budget, Time, Data and Political Constraints' (Sage: London, 2012);
- Michael Quinn Patton, 'Utilization Focused Evaluation' 4th Edition (Sage: London, 2008);
- Michael Edwards and Alan Fowler, 'NGO Management' (Earthscan: Oxford, 2002);
- Eric James 'Managing Humanitarian Relief: An Operational Guide for NGOs' (Practical Action Publishing: Rugby, 2008)

Assessment: Project (70%, 8000 words), reflective learning report (10%) and group presentation (20%) in the WT.

An alternative assessment pathway is available in situations where groups are dissolved or individual students are removed from groups usually, but not exclusively, for disciplinary, client related or personal reasons. The suitability of this pathway is determined by the Programme Director and Head of Department. The department may also require or request individual students who have performed extremely well or are suspected not to have contributed fully to demonstrate contributions through a portfolio of assessed work.

Students produce two reflective learning reports in the form of two individual diaries. Individual performance is assessed through a peer review exercise and the coach's own assessment of individual contributions.

Final client presentations take place in weeks 9, 10 and 11 of WT and are scheduled by the students in consultation with academic staff and the client. Students should be aware that presentations to clients may have to take place in the week after the end of WT, and students should plan accordingly and be available to participate if required. Participation in the final presentation is mandatory to complete the course requirements.

DV467 Half Unit**Famine, Data skills and Analysis**

This information is for the 2024/25 session.

Teacher responsible: Prof Stuart Gordon (CON.8.02)

Availability: This course is available on the MSc in International Development and Humanitarian Emergencies. This course is not available as an outside option.

Course content: This half unit course is intended to provide students with an opportunity to develop industry standard data handling skills and apply these techniques to real world case studies of food insecurity and famine.

Students will complete two digital skills laboratory courses (these are each about five days long) and to use these skills to conduct an independent exploration of data sets relating to the onset of famines. Using the food security literature to identify a range of processes and pathways thought to lead into or out of famine, students are asked to interrogate existing data sets and represent their findings as either confirming or altering these models through inductive inference. The data sets are likely to derive from those provided by OCHA Humanitarian Data Exchange, FEWSNET, Development Initiatives, the OCHA Financial Tracking Service, Glofpass and supported by data from relevant operational organisations (such as WFP, UNICEF and FAO as well as national capitals). Students can work independently or in teams of two or three (but with different outputs). This course will appeal to those wishing to pursue a career in combatting food insecurity. The causes of famine are generally considered to be found in widespread food scarcity which may derive from a range of factors: crop failure, natural disaster, armed conflict, chronic poverty or the failure of national political or economic policies. Famines 'that kill' (De Waal) are usually followed by 'regional malnutrition, starvation, epidemic, and increased mortality.' The onset of these type of events can be slow or fast but the more

serious episodes tend to be ones that develop over a protracted period and are complex social and economic processes. Many of these processes are tracked by international organisations and national capitals and these data sets provide a rich and often untapped description of underlying processes and the various ways in which these situations unfold over time as the crisis deepens and broadens.

The corpus of literature identifies a range of supposedly causal pathways; but four particular models stand out. Historically the Malthusian idea of sharp and sudden 'food availability decline' has tended to dominate analysis. But following the work of Amartya Sen in the early 1980s, authors have identified a range of other processes ranging from the collapse of household 'entitlements', through to patterns of progressive impoverishment, and narratives which focus on reductions in access to livelihoods and food, resulting first in displacement and then chronic public health crises. Equally the pathways out of famine have become more sophisticated; beginning with the provision of food commodities and water during throughout much of the Cold War but eventually evolving into far more complex livelihood, market based and food security interventions thereafter. The course will explore the various claims made by theorists in order to determine 'frames' for considering the evolution of such crises.

Teaching: 6 hours of seminars and 4 hours and 30 minutes of workshops in the AT. 9 hours of workshops in the WT.

2 x curated workshop courses from DSL (drawn from Power BI, STATA, R, Python, Tableau, Excel with individual advice to students on aspirations and suitability of courses from DSL - these vary in length but are approx. 5 days each). Plus, one 3 hour inception report presentations session in AT.

Final presentations in WT.

Formative coursework: Students will be expected to produce 1 presentation in the AT.

Plus various elements of formative work agreed with DSL. These differ by digital course

Formative assessment – presentation in AT (identifies digital platforms being used, selection of data sets, causal pathways to be explored). Autumn Term worth 5% of overall grade. Problem solving workshops 2 X 90 minutes each in WT.

Assessment: Essay (80%, 3000 words) and presentation (15%) in the WT.

Presentation (5%) in the AT.

DV472 Half Unit Not available in 2024/25

Covid-19 pandemic: health, socio-economic and political implications for development (Special Topics in International Development)

This information is for the 2024/25 session.

Teacher responsible: Dr Arjan Gjonça

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This year the course will focus on "Covid 19 pandemic: health, socio-economic and political implications for development" and will be run by Dr Arjan Gjonça. The main epidemiological, health, socio-economic and developmental issues related to the most important global health issue of the past 100 years will be addressed in this course. Some of the main topics to be covered are: Understanding Covid-19 pandemic – trends, patterns and differentials; Understanding the data, and assumptions in modelling the pandemic – Sensitivity and accuracy of the estimates; Health system readiness and public health intervention in the case of Covid-19; Demographic and health implications of Covid-19 pandemic; The implications for sexual and reproductive health and rights; Covid 19 pandemic in conflict and crisis regions. Drug discovery, production/supply/distribution, and patents in the Covid 19 pandemic; Globalisation in a post Covid 19 Pandemic – Implications for the role of international organisation; Globalisation in a post Covid 19 Pandemic – Implications for funding in development.

Teaching: This course is delivered through a combination of lectures and seminars in the MT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration.

For each session up to five readings will be given in advance of the seminar. Students will be asked to read the literature in advance and discuss their findings in an interactive debate during the seminar, monitored and led by the academic instructor. For certain topics, special designed policy-relevant tasks will be assigned and team discussion and debate will be encouraged. A general reading list for the course will be provided at the start of the course. Student on this course will have a reading week in Week 6.

Formative coursework: One 1,500 word formative essay in MT.

Indicative reading: A detailed reading list will be provided at the start of the course each year.

Assessment: Take-home assessment (100%) in the WT.

The take-home assessment will take the form of a take-home essay (100%, 3,000 words).

DV473 Half Unit

Health, conflict and crises

This information is for the 2024/25 session.

Teacher responsible: Prof Tiziana Leone CON.8.11

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Health and International Development and MSc in International Development and Humanitarian Emergencies. This course is available as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority first to MSc Health and International Development students and then to students on International Development and joint-degree programmes. In cases where there are more applicants than spaces places will be allocated randomly in accordance with the priorities listed above.

Spare places for non-ID/Joint Degree students will be allocated by

random selection, with preference given to degrees that permit this option.

Course content: The course adopts a multidisciplinary approach (IR, Political economy, global health, anthropology, health systems) to the study of health and crises, in particular conflict, pandemics, and environmental disasters. The course examines the politics and experiences of crisis and their humanitarian health responses and considers the ways in which conflict and disasters impact population health, health systems, medical research, as well as national and international and politics. The course considers the politics of medical and pharmaceutical research in contexts of crisis and looks at the politics of risk in healthcare. The aim is to draw parallels and lessons learned on crises and how they affect systems and decision making.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Students on this course will have a reading week in Week 6.

The teaching will rotate among the 4 core teachers and each set of two lectures will have an extended 2 hours seminar where discussion will be complemented by group work set up in advance.

Formative coursework: Students will be expected to produce a project proposal and key questions for the summative assessment (two pages maximum) in the WT.

Indicative reading:

Assessment: Project (100%) in the ST.

Words for the assessment: A range between 3000 and 4000 words, 8 pages.

DV477 Half Unit Not available in 2024/25

Rural Livelihoods, Development and Agrarian Transformation

This information is for the 2024/25 session.

Teacher responsible: Prof David Lewis OLD2.40

Availability: This course is available on the MSc in Development Studies, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University) and MSc in International Development and Humanitarian Emergencies. This course is available with

permission as an outside option to students on other programmes where regulations permit.

Students will be allocated places to courses with priority to ID students. If there are more ID students than the course can accommodate, these spots will be allocated randomly. Non-ID students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Knowledge of rural areas and relevant work experience is desirable but not essential. Knowledge of sociological and anthropological approaches to studying rural development also desirable.

Course content: This Course considers: Theories of rural development and transformation, history of rural development policy, changing rural livelihoods, land and agrarian reform, agricultural research and extension, the roles of private and non-governmental actors, natural resource management, food security, climate change and rural-urban linkages.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT. 1 hour and 30 minutes of lectures and 1 hour and 30 minutes of seminars in the ST.

Formative coursework: A formative 1500 word essay is required, and feedback will be provided.

Indicative reading: A detailed reading list is included in the seminar programme. The following is an introductory reading list:

- J Boltvinik & SA Mann (eds.) *Peasant Poverty and Persistence in the 21st century: Theories, Debates, Realities and Policies* (2016);
- T M Li, *Land's End: Capitalist Relations on an Indigenous Frontier* (2014);
- I Scoones & J Thompson, *Farmer First Revisited* (2009);
- R McAra, *Rural Development Theory and Practice* (2009);
- A Shepherd, *Sustainable Rural Development* (1998);
- B Crow & H Bernstein (Eds), *Rural Lives: Crises and Responses* (1992);
- N Long, *Development Sociology: Actor Perspectives* (2001);
- Rural Development Report 2016: *Fostering Inclusive Rural Transformation* (IFAD, 2016).

Assessment: Essay (100%, 3500 words) in the ST.

Students are required to write an assessed essay of 3,500 words.

DV480 Half Unit

Transforming Society: Revolutions, Evolutions and Colonialism

This information is for the 2024/25 session.

Teacher responsible: Prof Jean-Paul Faguet CON 8.06

Availability: This course is available on the MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

ID and joint-degree students will have priority in the allocation of places. If there are more ID and joint-degree students than the course can accommodate, places will be allocated randomly. Non-ID/Joint Degree students will be allocated available places by random selection, with preference given first to those degrees where regulations permit this option.

Pre-requisites: No specific course pre-requisites. A good social science background will be very helpful, especially politics and economics.

Course content: Revolutions break things, but do they also build? If so, what precisely? What causes revolutions? What do revolutions cause? This course examines the successes and failures of revolution as a model of change in generating

large and sustainable improvements in economic, political and social development. We begin by defining "revolution" as a discrete, analytically distinct model of change. We then examine revolutions per se – abrupt, significant, and often violent changes in governance and the distribution of power and wealth in society. Classic examples include the French, Russian, Chinese and Vietnamese Revolutions. We evaluate the immediate and long-term costs of these episodes in light of changes that resulted in each country's development trajectory. We contrast these cases with 'right-wing revolutions', such as South Korea, Taiwan and Japan, as well as more gradual processes of change ('evolutions', often called "reform"), such as Finland and New Zealand. We contrast capitalist vs. socialist models of economic growth and development. We focus on the conditions that sustained left vs. right revolutions, and also revolutionary vs. non-revolutionary processes of change. We analyse the ability of each model to generate lasting improvements in societies' economic, political and social development.

Teaching: This course is delivered through a combination of lectures and seminars in the AT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration. There will also be 4 hours of workshop in the AT. Student on this course will have a reading week in week 6.

Lectures will present key theoretical insights and lay out the contours of major debates from the literature. Seminars will be student-led, and will probe each week's topic in more detail, both to clarify concepts and to test them against evidence, some of which students will draw up and present independently. The workshop is a different sort of exercise, intended to give thorough review to students' research proposals in a constructively critical, collegial atmosphere. Each student will present their research proposal and then receive feedback from fellow students and faculty.

Formative coursework: Students will be expected to produce 1 presentation and 1 other piece of coursework in the AT.

In preparation for their research essay, students will submit a formative research proposal, which they will present in a research workshop in AT. This will receive detailed written, and also oral, feedback intended to improve the proposal. They will then revise the proposal and re-submit as summative work.

Students will also complete seminar presentations, individually or in pairs (depending on student numbers), which will also receive formative feedback.

Indicative reading: A detailed, weekly reading list will be provided at the start of term:

- Arendt, Hannah. 2006. *On Revolution*. London: Penguin Classics.
- Boix, Charles. 2015. *Political Order and Inequality: Their Foundations and their Consequences for Human Welfare*. Cambridge: Cambridge University Press.

- Tilly, Charles. 1995. *European Revolutions: 1492-1992*. Oxford: Blackwell.
- de Tocqueville, Alexis. 1865. *The Old Regime and the Revolution*. New York: Harper & Brothers.
- Tucker, Robert C. (Ed.). 1975. *The Lenin Anthology*. New York: W.W. Norton & Company.

- University Library.160Writing a Research Proposal. University of Illinois at Urbana-Champaign.

Assessment: Assessment path 1

Presentation (10%) and research proposal (20%) in the AT.

Research project (70%) in the ST.

Assessment path 2

Exam (80%, duration: 2 hours) in the spring exam period.

Presentation (20%) in the AT.

Two assessment tracks are available for this course:

Students must opt for one or the other by Friday of reading week (week 6).

DV483 Half Unit

Information Communication Technologies and Socio-economic Development

This information is for the 2024/25 session.

Teacher responsible: Dr Shirin Madon CON.8.09

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Management of Information Systems and Digital Innovation, MSc in Media, Communication and Development and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit. Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Course content: This is an interdisciplinary course about understanding the role played by Information & Communication Technologies (ICTs) in promoting development focusing on underserved sections of the population in low-and-middle income countries (LMICs). We interrogate the rationale found in much of the policy discourse about how ICT can solve complex historical developmental challenges based on empirical evidence to date. Throughout the course, we consider a range of ICTs that are currently prevalent in LMICs countries from basic computers/mobile phones to digital identity platforms and artificial intelligence whilst considering alternative policy options.

We begin by reviewing dominant theoretical perspectives on development and key ideas they embody regarding the role of information, knowledge accumulation and communication. Using this as our critical frame of reference, we study the extent to which ICT applications have promoted economic, social and political development. The topics we cover include global software outsourcing, e-commerce/m-commerce, digital technologies and smallholder agriculture, ICT and education, e-governance, health informatics, social media and collective action, ICT and humanitarianism.

Teaching: This course is delivered through a combination of lectures and seminars in the WT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration. Student on this course will have a reading week in Week 6.

Formative coursework: Students will be invited to submit an abstract of their summative essay for written comments.

Indicative reading: Taylor, L. and Schroeder, R. (2015) Is Bigger Better? The emergence of big data as a tool for international development policy, *GeoJournal*, 80, pp. 503-518.

Assessment: Essay (90%, 4000 words) in the ST.

Class participation (10%) in the period between WT and ST.

Class participation 10% (evaluated based on a combination of seminar attendance, active participation in discussions, and presentation)

DV490 Half Unit

Economic Development Policy I: Applied Policy Analysis for Macroeconomic Development

This information is for the 2024/25 session.

Teacher responsible: Dr Diana Weinhold

Availability: This course is available on the MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science (Political Science and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: DV490 is designed to be taken in tandem with Foundations of Applied Econometrics for Economic Development Policy (DV494). The methodological complexity and sophistication of DV490 evolves through the term in synchrony with DV494. In turn, the empirical material in DV490 is designed to enhance and reinforce methodological lessons from DV494.

The combination of DV490 and DV494 is designed to be accessible and challenging for students from a range of backgrounds, from those with no economics or statistics training to those with fairly strong backgrounds in both. We approach economic theory and quantitative causal inference from an applied perspective to enable students to understand and critically engage with the frontier of applied research in development economics.

Course content: This course explores the theory and empirics of long-run economic growth in developing countries. Lectures provide analytical but non-technical overviews of themes such as growth theory, institutions and history, economic geography, trade and globalization, inequality, industrial policy, inflation and financial crises, debt, and international aid. There is a strong emphasis on how the body of knowledge has evolved over time via the synthesis of theoretical advances and rigorous empirical testing.

Seminars are primarily designed around critical engagement with applied quantitative analysis in macroeconomic development. In tandem with methodological lessons taught in DV494, students in DV490 build analytical skills to critically engage with academic development research and appreciate the strengths and weaknesses of the evidence base for macroeconomic policies. While some background in economics and/or statistics is helpful, when taken in tandem with DV494 the course is designed to be engaging and challenging for students from a broad variety of backgrounds, from those with no economics and statistics to those with more advanced skills in either one or both areas. Strong analytical skills (whether quantitative or not) and a sturdy work ethic are the best predictors of success.

Teaching: This course is delivered through a combination of lectures and seminars in the AT.

Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration.

Students on this course will have a reading week in Week 6.

Formative coursework: Weekly online quizzes provide formative feedback on student progress. In addition students are expected to complete weekly unassessed problem sets and come prepared to discuss them in seminars.

Indicative reading: The bulk of the course will be taught using journal articles and a reading list will be handed out at the beginning of the Autumn Term sessions. We also refer to *The Quest for Growth* by W. Easterly, MIT Press (2001)

Assessment: Online assessment (70%) in January.

Problem sets (30%) in the AT.

On-line assessment 70% is a 48 hour online exam.

DV491 Half Unit

Economic Development Policy II: Microeconomic Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Sandra Sequeira

Availability: This course is available on the MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science (Political Science and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available on the MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science (Political Science and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be allocated places to courses with priority to ID and joint-degree students. If there are more ID and joint-degree students than the course can accommodate, these spots will be allocated randomly.

Non-ID/Joint Degree students will be allocated to spare places by random selection with the preference given first to those degrees where the regulations permit this option.

Pre-requisites: Foundations of Applied Econometrics for Economic Development Policy (DV494)

For students without strong skills in economics and statistics DV494 constitutes the foundational prerequisite for DV491 in the Winter term.

Course content: This course examines the microeconomic foundations of economic policy-making in developing countries. Classes will combine economic theory and rigorous empirical analysis to better understand the impact of economic development policy on development goals. We will focus on specific examples chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better economic development policies in the future.

The course is structured around three main themes:

- (i) Human Development: health policy, education policy and intra-household dynamics
- (ii) Institutions and Markets: labour markets, state capacity for public service delivery and private sector development
- (iii) Behavioural Economics and Development Policy Design: the importance of psychology in explaining economic behaviour and how it can inform better development policy design

Teaching: This course is delivered through a combination of lectures and seminars in the WT. Seminars will be 90 minutes duration and lectures will be 120 minutes duration. There will be a weekly workshop run by a Teaching Fellow for students to ask questions about the material.

Seminars start in week 1 and there will be a reading week in Week 6.

Duflo, Esther, and Petia Topalova. (2004) "Unappreciated Service: Performance, Perceptions, and Women Leaders in India."

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

In-class assessment (30%) in the WT.

DV492 Half Unit

Economic Development Policy III: Government Policy Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Joana Naritomi CON.6.12

Availability: This course is available on the MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available on the MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc

in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available to MSc and MPA students from throughout the LSE subject to space constraints; specifically we reserve the right to limit enrolment of students from outside the Department of International Development.

Entry onto the course might be limited at the discretion of the instructor.

Pre-requisites: Students must have completed Foundations of Applied Econometrics for Economic Development Policy (DV494).

Course content: This course explores key issues in government policies in developing countries. The course will draw on specific examples chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better economic development policies in the future. It begins introducing concepts from public economics to discuss the scope and impacts of government interventions. In particular, the course will cover issues related to market failures, redistribution, public goods and externalities. The course will also discuss theoretical and empirical work on the economic consequences of government interventions, with particular focus on economic incidence, efficiency trade-offs and unintended consequences of policies. In the second part, it focuses on challenges in raising government revenue and delivering public service in the developing world context, where limited state and fiscal capacity impose important constraints in policymaking. Beyond these topics, the course will provide background on relevant analytical tools in quantitative research, and develop skills to interpret empirical evidence in development economics.

Coursework will include a combination of class discussions, problem sets, and presentations.

Teaching: This course is delivered through a combination of lectures and seminars in the WT. Seminars will be 90 minutes duration and lectures will be at or above 90 minutes duration. There will also be a revision session in the WT or early ST. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 2 problem sets in the WT.

Indicative reading: 1. Alatas, V., Purnamasari, R., Wai-Poi, M., Banerjee, A., Olken, B. A., & Hanna, R. (2016). "Self-targeting: Evidence from a field experiment in Indonesia." *Journal of Political Economy*, 124(2), 371-427.

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Coursework (30%) in the WT.

The course assessment will be based on a final exam (70%) and problem sets and study aids (30%).

DV494 Half Unit

Foundations of Applied Econometrics for Economic Development Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Sandra Sequeira, Dr Joana Naritomi and Dr Diana Weinhold

Availability: This course is compulsory on the MSc in Economic Policy for International Development. This course is available on the MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Environmental Economics and Climate Change, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science (Political Science and Political Economy).

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is compulsory on the MSc in Economic Policy for International Development. This course is available on the MSc in Anthropology and Development, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Environmental Economics and Climate Change, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Political Economy of Late Development and MSc in Political Science (Political Science and Political Economy).

This course is available with permission as an outside option to students on other programmes where regulations permit.

DV494 is the required prerequisite for the three ID Economic Development Policy courses, DV490, DV491 and DV492.

The course is designed to be taken in tandem with DV490 in the AT, and/or alone in AT in advance of DV491 and/or DV492 in the WT.

DV494 can also be taken as a stand-alone course for students who would like training in quantitative methods for international development.

Pre-requisites: There are no prerequisites

Course content: The purpose of DV494 is to prepare a broad range of students to consume and critically engage with quantitative analysis for international development. Drawing upon applied papers from top academic journals in development economics, political science, political economy, and related disciplines, students will engage with the challenges of causal inference in settings where scarce data, omitted variables, reverse causality, and selection bias must be addressed. We engage with empirical debates from across international development, with examples illustrating how creative quantitative research designs can contribute to our understanding of economic growth, poverty, inequality, cultural and historical processes, gender norms, private sector development, health and education, and government capacity, among other themes.

We begin with an introduction to the philosophy of classical hypothesis testing and multiple regression analysis. We then explore how these tools are used in practice for causal inference in the real world; students will be introduced to a range of research designs, including panel data with fixed effects, difference-in-differences, event studies, instrumental variables, regression discontinuity designs, matching and synthetic controls, and randomized controlled trials. We also briefly explore recent advances in big data, AI and machine learning in development research.

The emphasis of the course is on developing applied skills for sophisticated engagement with frontier quantitative analysis in international development; there are no prerequisites - we focus

on teaching students from a broad range of backgrounds. As we teach from the frontier of research in international development there are opportunities for students with backgrounds ranging from little or no statistics to those with degrees in quantitative disciplines to challenge and expand their methodological intuition and skills.

While the primary focus of the course is on learning to read, understand and rigorously consume empirical research, a series of Stata exercises will also provide students with a basic introduction to data management and statistical modelling.

Teaching: 20 hours of lectures and 10 hours of seminars in the AT.

Formative coursework: A series of weekly problem sets and Stata exercises in the AT will provide formative skill building

Indicative reading: - Angrist, Joshua D., and Jörn-Steffen Pischke. *Mastering Metrics: The Path from Cause to Effect*. Princeton University Press, 2014.

- Cunningham, Scott. *Causal inference: The mixtape*. Yale University Press, 2021.

Assessment: Exam (60%, duration: 2 hours) in the January exam period.

Problem sets (40%) in the AT.

DV495

Dissertation in Economic Development Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Joana Naritomi, Dr Sandra Sequeira and Dr Diana Weinhold

Availability: This course is compulsory on the MSc in Economic Policy for International Development. This course is not available as an outside option.

Pre-requisites: Students must have completed Foundations of Applied Econometrics for Economic Development Policy (DV494).

Course content: DV495 will allow students to develop a quantitative research project in development economics. Students will apply the research methods and quantitative analysis skills they have learnt in DV494 and DV496 to write an original dissertation.

Teaching: 2 hour session at the start of term to set expectations about the dissertation and identify resources available at the LSE to support dissertation writing.

Formative coursework: Students will be expected to produce a final empirical paper in August 2024.

Indicative reading:

- Angrist, Joshua D., and Jörn-Steffen Pischke. *Mastering Metrics: The Path from Cause to Effect*. Princeton University Press, 2014.
- Angrist, Joshua D., and Jörn-Steffen Pischke. *Mostly harmless econometrics: An empiricist's companion*. Princeton university press, 2008.
- Cunningham, Scott. *Causal inference: The mixtape*. Yale University Press, 2021.
- Duflo, Esther, Rachel Glennerster, and Michael Kremer. 2008. "Using Randomization in Development Economics Research: A Toolkit." Vol. 4.
- T. Schultz and John Strauss, eds., *Handbook of Development Economics*. Amsterdam and New York: North Holland, 4

Assessment: Research paper (100%) in August.

DV496 Half Unit

Applied Econometrics for Economic Development Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Sandra Sequeira, Dr Joana Naritomi and Dr Diana Weinhold

Availability: This course is compulsory on the MSc in Economic Policy for International Development. This course is not available as an outside option.

Pre-requisites: DV494 is a pre-requisite for this course.

Course content: DV496 will build on DV494 to teach students how to develop a quantitative research project in development economics. It will cover micro-econometrics, causal analysis, data visualization and research design. It will discuss the latest research on experimental and quasi-experimental methods, and machine learning for big data analysis. The objective is to enable students (a) to critically assess the quality and validity of development economics research; and (b) to independently design their own research proposal. Students will learn about the challenges of research design, including how to generate a research question, how to select a research method, and the relative strengths and weaknesses of alternative research methods.

Teaching: 20 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce a draft of the empirical paper in the ST. The course will have the following formative assessments:

- Research proposal draft and in-class presentation: each student will perform at least three in-class presentations during seminar meetings in order to get peer feedback and oral feedback from the course convenors.

These two formative assessments will provide students with skills and feedback to write their research proposals and pursue their research paper projects. They will also be relevant data for course convenors to assess which areas may need strengthening.

Indicative reading: Angrist, Joshua D., and Jörn-Steffen Pischke. *Mastering Metrics: The Path from Cause to Effect*. Princeton University Press, 2014.

Angrist, Joshua D., and Jörn-Steffen Pischke. *Mostly harmless econometrics: An empiricist's companion*. Princeton university press, 2008.

Cunningham, Scott. *Causal inference: The mixtape*. Yale University Press, 2021.

Duflo, Esther, Rachel Glennerster, and Michael Kremer. 2008.

"Using Randomization in Development Economics Research: A Toolkit." Vol. 4.

T. Schultz and John Strauss, eds., *Handbook of Development Economics*. Amsterdam and New York: North Holland, 4

Assessment: Research proposal (100%) in the ST.

EC400

Introductory Course in Mathematics and Statistics

This information is for the 2024/25 session.

Teacher responsible: Dr Francesco Nava SAL 3.20

Dr Dmitry Mukhin SAL 1.24

Dr Ragvir Sabharwal SAL 1.28A

Availability: This course is compulsory on the MRes/PhD in Accounting (EoA) (Economics of Accounting Track), MRes/PhD in Economics, MRes/PhD in Economics and Management, MRes/PhD in Finance, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Economics and Management, MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MRes/PhD in International Development, MRes/PhD in Management (Marketing), MSc in Political Science (Political Science and Political Economy) and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on the MRes/PhD in Economics and on the MRes/PhD Economics and Management may be exempted from EC400 at their Department's discretion.

Master of Public Administration students may only apply to take EC400 at the beginning of their second year.

Outside applications for EC400 must be made to the Department of Economics by Friday 14th of June. This applies to offer holders/students who do not have any EC4XX courses listed in their

programme regulations for which EC400 is a pre-requisite. Please contact econ.msc@lse.ac.uk for more information.

Students not on the compulsory programmes listed above who wish to continue studying Economics MSc-level courses must achieve an overall grade of 50% in EC400 with no one subject exam less than 40%. Non-MRes students wishing to study MRes/PhD-level courses must achieve an overall grade of 70% with no one subject exam less than 60%.

Pre-requisites: EC400 is an introduction to MSc level concepts in mathematics and statistics, for which an undergraduate level understanding is assumed. EC400 is not intended as an introduction for students with little or no economics/mathematics background.

Course content: The aim of this introductory course is to provide students with the essential mathematical, statistical, economic, and econometric background for the core Economics courses of these programmes. The course starts with Mathematics Revision sessions and progresses to sections covering Static Optimization & Fixed Points, Dynamic Optimization & Differential Equations, and Probability & Statistical Inference.

MSc Finance and Economics students are required to attend all three sections of the course.

MSc Economics and Management students attend lectures on literacy in accounting instead of the Dynamic Organisation & Differential Equations section but will attend the section on Static Optimisation & Fixed Points, and the section on Probability & Statistical Inference.

Teaching: Approximately: 27.5 hours of lectures and 27.5 hours of classes.

Formative coursework: Students will be required to complete daily sets of self-testing exercises during the course.

Indicative reading: Students will be advised of recommended readings and preparation materials in the summer.

Assessment: At the end of the course there will be three examinations, one for each of the three parts: Static Optimization & Fixed Points, Dynamic Optimization & Differential Equations, and Probability & Statistical Inference.

- EC400 assessment is not mandatory for students on the MSc Economics, the MSc in Economics (2 Year Programme) and the MSc in Finance and Economics, though strongly advised for students intending to apply for doctoral studies. MSc Finance and Economics students wishing to request to take EC4B5 in WT are also strongly advised to sit the EC400 examinations.
- MRes/PhD Economics students and MRes/PhD Economics and Management students are to sit all three examinations, though may be exempted at their Department's discretion.
- MRes/PhD Finance students are to sit EC400 exams as mandatory.
- MSc Economics and Management are to be examined on Static Optimization & Fixed Points and Probability & Statistical Inference, but not on Dynamic Optimization & Differential Equations.
- All other students are to sit all three examinations unless advised otherwise by their department.
- Students on programmes for which EC400 is not a compulsory course who wish to continue studying Economics MSc-level or MRes/PhD level courses are required to sit the examinations and fulfil the grade requirements specified above.

EC402 Econometrics

This information is for the 2024/25 session.

Teacher responsible: Dr Vassilis Hajivassiliou SAL 4.23

Dr Ragvir Sabharwal SAL 1.28A

Prof Mark Schankerman SAL 4.30

Availability: This course is compulsory on the MRes/PhD in Accounting (EoA) (Economics of Accounting Track), MSc in Economics and MSc in Economics (2 Year Programme). This course is available on the MPhil/PhD in Environmental Economics.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Students should also have completed an undergraduate degree or equivalent in Economics and an introductory course in Econometrics.

In very exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via an online* face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk).

Course content: The course aims to present and illustrate the techniques of empirical investigation in economics. The lectures will focus primarily on the econometric methodology and the required assumptions. This is crucial so that you can assess whether specific techniques are valid in your particular contexts (i.e., whether they will estimate the underlying parameters consistently). Seminars will be a mix of technical exercises and computer-based data applications.

The following material will be covered by Dr Hajivassiliou in the Autumn Term:

- Regression models with fixed regressors (simple and multiple). Least squares and other estimation methods. Goodness of fit and hypothesis testing. Estimation Unbiasedness and Consistency.
- Regression models with stochastic regressors.
- Asymptotic theory and its application to the regression model. Sampling error vectors. Large sample approximations.
- The partitioned regression model, multicollinearity, misspecification, omitted and added variables, measurement errors.
- Generalized method of moments.
- Maximum likelihood estimation.
- Heteroskedasticity, autocorrelation, and generalized least squares. Clustered and Robust Standard Errors.
- Exogeneity, endogeneity, and instrumental variables. The leading causes of endogeneity. Instrument validity and relevance.
- Nonlinear regression modelling
- Binary choice models and other Limited Dependent Variables models.

The following material will be covered by Professor Schankerman in Winter Term (6 weeks):

- Estimating causal effects in panel data: differences in differences with single and staggered treatments, instrumental variables including Bartik instruments, sharp and fuzzy regression discontinuity, and (time permitting) marginal treatment effects.
- Panel data in static models: fixed and random effect estimators, conditional logit analysis, specification tests.
- Panel data in dynamic models: generalized method of moments.

The following material will be covered by Dr Sabharwal in Winter Term (4 weeks):

- Autoregressive and moving average representations of time series. Stationarity and invertibility.
- Ergodicity, Laws of Large Numbers, and Central Limit Theorems for Time Series
- Vector auto-regressions.
- Unit roots and co-integration.

Teaching: 30 hours of lectures and 9 hours of seminars in the AT. 30 hours of lectures and 9 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum 79 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Two marked assignments per term.

Exercises are provided each week and are discussed in classes. Working through these exercises on a weekly basis is essential for the successful completion of the course. Special test exercises will be set at three points during the year. These will be carefully

marked, and the results made available.

Indicative reading: W H Greene, *Econometric Analysis* (8th edn), traditional presentation of econometric analysis (with emphasis on the material in the Autumn Term)

J Wooldridge, *Econometric Analysis of Cross Section and Panel Data* (2002): traditional and thorough treatment of panel data in both static and dynamic models (treated in the Winter Term)

J Angrist and J Pischke, *Mostly Harmless Econometrics* (2009): focuses on modern "causal" methods analysis (treated in the Winter Term)

James D. Hamilton, *Time Series Analysis* (1994): traditional presentation of time-series econometric analysis (treated in the Winter Term)

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

EC411

Microeconomics

This information is for the 2024/25 session.

Teacher responsible: Dr Francesco Nava SAL 3.20

Prof Martin Pesendorfer SAL 4.19

Availability: This course is compulsory on the MPhil/PhD in Environmental Economics and MRes/PhD in Accounting (EoA) (Economics of Accounting Track). This course is available on the MPhil/PhD in Economic Geography, MRes/PhD in Management (Marketing), MSc in Economics, MSc in Economics (2 Year Programme), MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may enrol in the course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (at a face-to-face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: The aim of the course is to develop the basic tools for analysing problems of resource allocation used by economists working in research, government and business. The course deals with positive and normative problems. It aims to include modern developments without being overly mathematical, and to develop a capacity to apply economic concepts to real-world problems. The first part of the course focuses on classical theories of decision making, market behaviour, and strategic interaction. We begin by presenting decision theoretic foundations of choice behaviour, by analysing the optimisation problems faced by consumers and firms, and by modelling market interactions and the formation of prices in perfectly competitive markets. Then we study models of decision making under uncertainty and game theoretic solution concepts. Novel developments in these fields are also discussed in lectures. The second part of the course focuses on models of imperfect competition and information economics. We begin with an analysis of models of monopoly, oligopoly, product differentiation, and public goods. Then, we study markets with imperfect and incomplete information including search, adverse selection, auctions, signalling, screening, and moral hazard. Special emphasis will be given to economic applications.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 9 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT

(no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 59 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Weekly problem sets and two marked assignments per term which will contribute to the coursework mark.

Indicative reading: The course will draw on a variety of texts, the main ones being:

1. J G Riley, *Essential Microeconomics*, Cambridge.

2. J R Green, A Mas-Colell & M D Whinston, *Microeconomic Theory*, Oxford.

More detailed readings will be given at the beginning of the course. Some notes will be provided where textbook coverage is inadequate.

Assessment: Exam (45%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Exam (45%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Continuous assessment (10%) in the AT and WT.

EC413

Macroeconomics

This information is for the 2024/25 session.

Teacher responsible: Prof Matthias Doepke, SAL 1.18

Prof Rachel Ngai, SAL 1.15

Availability: This course is compulsory on the MSc in Economics and MSc in Economics (2 Year Programme). This course is available on the MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners, the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: The aim of the course is to give a wide-ranging overview of modern macroeconomics.

Economic growth (Autumn)

The Autumn term of EC413 is an introduction to the techniques needed to critically read and evaluate academic research in economic growth. Topics are facts about growth, the Solow growth model (theory and empirics), the Neoclassical Growth model (growth with dynamic optimization), the Malthus model, growth accounting, and endogenous technical change.

Business Cycles (Winter)

During the Winter term of EC413 you will learn the main characteristics of business cycle fluctuations with a special emphasis on what happens during severe economic crises. We will consider a range of different macroeconomic models to study business cycles. The course covers the Real Business Cycle model, the New-Keynesian model, models with frictions in labour and financial markets, agent-based models, the role of money, self-fulfilling beliefs, the role of monetary and fiscal policy (and in particular non-conventional monetary policy), and (un)sustainable sovereign debt. These models and policy studies will highlight important economic mechanisms that are relevant to analyse a range of past and current economic phenomena.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 9 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 59 hours across Autumn Term,

Winter Term, and Spring Term.

Formative coursework: Two marked assignments per term. Exercises are discussed in weekly classes.

Indicative reading: Primary reading will be journal articles and a few chapters from Daron Acemoglu, *Introduction to Modern Economic Growth*. A full list will be available at the start of each term.

Assessment: Exam (45%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Exam (45%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Continuous assessment (10%) in the AT and WT.

EC417

Advanced Macroeconomics

This information is for the 2024/25 session.

Teacher responsible: Dr Jane Olmstead-Rumsey SAL 1.12

Dr Maarten De Ridder SAL 1.11

Availability: This course is compulsory on the MSc in Econometrics and Mathematical Economics. This course is not available as an outside option.

Pre-requisites: Students must have completed Introductory Course for MSc EME (EC451).

Course content: Course objectives and main course elements:

1. The course will teach you the concepts used in empirical and theoretical macroeconomics.
2. The course will teach you the main empirical business cycle characteristics of developed economies and the main empirical findings regarding the growth of developed and less developed nations.
3. This course teaches you the main techniques used to analyse modern macroeconomics models. In particular, the course will focus on techniques such as dynamic programming, value function iteration, and the linearization of first-order conditions.
4. This course teaches you (prototype versions of) macroeconomic models used to analyse key questions related to business cycles and economic growth. Examples are New Keynesian models, Real Business Cycle models, the Solow growth model, and endogenous growth models.
5. The course will also discuss some more advanced models that have recently been developed to explain recent economic events, including models with heterogeneous agents, microeconomic shocks and labour market frictions.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 9 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

Some of the problem sets will consist of computer and data assignments and students will be taught some basic programming and data analysis skills.

This course is delivered through a combination of classes and lectures totalling a minimum of 59 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Students are assigned problem sets. These problem sets focus on key elements of the lectures, but they will also promote creativity and critical thinking by going beyond the material explicitly discussed in the lectures. There will also be computer assignments. The problem sets will be discussed in weekly classes.

Indicative reading:

- Acemoglu, Daron, 2009, *Introduction to Modern Economic Growth*.
- Ljungqvist, Lars and Thomas J. Sargent, 2012, *Recursive Macroeconomic Theory*.
- Stokey, Nancy L. and Robert E. Lucas Jr., 1989, *Recursive Methods in Economic Dynamics*.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

EC421

International Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Thomas Sampson SAL 2.34

Dr Dmitry Mukhin SAL 1.24

Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face-to-face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: A graduate course in international economics consisting of i) the fundamentals of international trade and its application to policy and ii) international macroeconomics. Trade: Comparative advantage and the gains from trade. Technology, factor endowments and patterns of international trade. Empirical tests of trade models. Trade and the labour market. Adjustment to trade liberalisation. Intra-industry trade. Gravity equation. Firm heterogeneity and selection into trade. Foreign direct investment. General equilibrium trade policy. International macroeconomics: Intertemporal trade and the current account balance. Dynamics of small open economies. The real exchange rate and the terms of trade. Uncertainty and international financial markets. Monetary model of exchange rate determination: flexible and sticky prices. Introduction to currency crises models.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 10 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Two marked assignments per term.

Indicative reading: A full reading list will be distributed at the beginning of the course. Some important items are:

- R Feenstra, *Advanced International Trade: Theory and Evidence*, Princeton, 2004;
- M Obstfeld & K Rogoff, *Foundations of International Macroeconomics*, MIT Press, 1996.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Essay (50%, 6000 words) in the ST.

EC423

Labour Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Guy Michaels, SAL 2.10

Dr Christiane Szerman

Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400). In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners, the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: An advanced course in labour economics issues, including theory, evidence, and policy. The course aims to familiarise students with the main theoretical and empirical issues in current labour economics and to provide them with the tools for developing independent research interests. The course has a strong applied focus. For each major topic covered, we will discuss theoretical implications, provide insights into the research methodology, discuss the advantages and limitations of existing empirical work, and where possible draw policy conclusions. The course will include hands-on experience in applying econometric tools, working with data, and thinking critically about results and their interpretation. Topics include labour supply and welfare systems, human capital, immigration, inequality and technological change, discrimination, labour market institutions, local labour markets and place-based policies, and intergenerational mobility.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 10 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: At least two marked assignments per term.

Indicative reading: Most of the reading is from journal articles. A detailed reading list is available on Moodle.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period. Essay (50%, 6000 words) in the ST.

EC424

Monetary Economics and Aggregate Fluctuations

This information is for the 2024/25 session.

Teacher responsible: Dr Kevin Sheedy, SAL.1.09
Dr Ambrogio Cesa-Bianchi

Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face-to-face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: The course aims to develop the student's ability to undertake research in macroeconomics by studying a number of current issues both theoretical and applied.

In the AT, we begin by studying money's role as a medium of exchange and the determination of the price level in a variety of theoretical models. We then study the role of monetary policy in affecting the macroeconomy, and the implications of nominal rigidities such as sticky prices. We analyse the costs of inflation and optimal monetary policy, and we also look at unconventional monetary policies such as those deployed when a central bank is constrained by the interest-rate lower bound.

In the WT, we discuss the causes and consequences of business cycles and how government policies can affect them. Specifically, we study in the different tools that central banks have to their disposal these days to control inflation, financial stability, and economic activity.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 10 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Two marked assignments per term.

Indicative reading: A reading list will be handed out by the lecturers at the beginning of their sessions.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period. Essay (50%, 6000 words) in the ST.

EC426

Public Economics

This information is for the 2024/25 session.

Teacher responsible: Prof Frank Cowell, SAL.3.25A
Prof Camille Landais, SAL.3.23
Prof David Seim

Availability: This course is available on the MPhil/PhD in Environmental Economics, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University) and MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: A graduate course in the principles of public economics and topics in public economics.

Principles of public economics cover: Welfare analysis; concepts of fairness, equity and efficiency; social welfare. Policy design: social insurance, income taxation. Taxation; household and firm behaviour. Public goods and externalities. Behavioural public economics; implications for welfare analysis and policy.

Topics in public economics may include: Behavioural responses to taxation. Empirical strategies in public economics. Poverty, inequality and optimal low-income support. Compliance problems. Inheritance and wealth taxation.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 10 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Two marked assignments per term.

Indicative reading: Most of the readings will be in the form of journal articles, but some use will also be made of the following texts:

- Auerbach & M S Feldstein (Eds), Handbook of Public Economics, Vols I-III, North-Holland;

- A B Atkinson & J E Stiglitz, Lectures on Public Economics, McGraw-Hill, Updated Edition, 2015;
- R Boadway and K Cuff, Tax Policy: Principles and Lessons, Cambridge University Press, 2022

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.
Essay (50%, 6000 words) in the ST.

EC427

The Economics of Industry

This information is for the 2024/25 session.

Teacher responsible: Dr Pasquale Schiraldi SAL 4.22
Dr Eduard Boehm

Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: The course examines the theory of firm behaviour and strategic interaction in both price and non-price dimensions. Topics covered include the econometric estimation of continuous and discrete differentiated product demands, estimation of conduct, merger analysis, information and search, entry models and the role of sunk costs, advertising, collusion in auctions, price discrimination, estimation of production functions and productivity, regulation of monopolies and oligopolies, vertical and horizontal contracts, theory of the firm and ownership, strategic competition and entry deterrence, horizontal and vertical product differentiation, and social responsibility. Both theoretical and empirical contributions are studied, with their implications for competition policy issues.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 10 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Two marked assignments per term.

Indicative reading: Two books which provide coverage of topics are Jean Tirole, Theory of Industrial Organization (MIT Press 1989) and John Sutton, Technology and Market Structure (MIT Press 1998). A full reading list will be supplied at the beginning of each term in the course.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.
Essay (50%, 6000 words) in the ST.

EC428

Development and Growth

This information is for the 2024/25 session.

Teacher responsible: Prof Maitreesh Ghatak SAL 3.08A
Dr Gharad Bryan SAL 3.10

Availability: This course is available on the MSc in Development Studies, MSc in Econometrics and Mathematical Economics,

MSc in Economics, MSc in Economics (2 Year Programme), MSc in Environmental Economics and Climate Change and MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Students should have completed courses in intermediate level microeconomics, macroeconomics and econometrics.

Course content: This course will cover a number of topics at forefront of development economics, combining theoretical and empirical analysis with a clear focus on policy implications. These include economic growth, poverty traps, inequality and occupational choice, credit markets, microfinance, property rights, land markets current methodological debates; the allocation of capital and labour across firms, space and sectors; structural change during the development process; finance; psychology and development; governance and accountability; conflict and civil war; motivation of civil servants; taxation and development; firms and markets; trade; infrastructure; energy and the environment; and climate change.

Development economics is, arguably, the fastest growing and most vibrant field within economics. The course will enable the students to apply their econometric and theoretical skills to what are some of the world's most pressing problems. The experience of applying their economic knowledge to these topics will generate analytical skills that that can be used in wide variety of applied settings.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 10 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Two marked assignments per term.

Indicative reading: Most of the reading is from journal articles which appear on reading lists distributed at the start of each part of the course.

However, the following references may serve as an introduction to material included in the syllabus.

D Ray, Development Economics, Princeton UP, 1998, Abhijit Banerjee and Esther Duflo's Poor Economics, New York: Public Affairs, 2011, and the symposium on The Agenda for Development Economics - Journal of Economic Perspectives Volume 24, Number 3, Summer 2010: Articles by Deaton, Acemoglu, Ray, Rodrik, and Rosenzweig.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.
Essay (50%, 6000 words) in the ST.

EC441

Microeconomics for MRes students

This information is for the 2024/25 session.

Teacher responsible: Dr Andrew Ellis SAL.3.15 and Prof Gilat Levy SAL.4.31

Availability: This course is compulsory on the MRes/PhD in Economics, MRes/PhD in Economics and Management and MRes/PhD in Finance. This course is not available as an outside option.

Pre-requisites: A good undergraduate knowledge of economic theory and calculus is required.

Course content: The aim of the course is to:

- introduce the basic analytical tools that are necessary to conduct theoretical research in many fields in economics.
- give the students a full understanding of the classic Microeconomic Theory and of the modern developments of Microeconomic Theory

iii. enable students to address a microeconomic problem by structuring it as a mathematical model and enhance the understanding of economic issues through the use of mathematical tools.

Topics include: consumer theory, producer theory, general equilibrium, welfare, choice under uncertainty, game theory, economics of information, agency theory, contracts, topics in mechanism design.

Teaching: 30 hours of lectures and 15 hours of classes in the AT. 30 hours of lectures and 15 hours of classes in the WT.

Attendance at classes is compulsory.

Formative coursework: Compulsory exercises are set for each class. A mock exam will take place in early WT.

Indicative reading: The main text is Mas-Collel, Whinston & Green, *Microeconomic Theory*, OUP.

Other sources include:

D Fudenberg & J Tirole, *Game Theory*, MIT Press; D M Kreps, *Microeconomic Foundations I & II*, Princeton Press; A Rubinstein, *Lecture Notes in Microeconomic Theory*, Princeton Press; H R Varian, *Microeconomic Analysis* (3rd edn), Norton; M J Osborne & A Rubinstein, *A Course in Game Theory*, MIT Press; G A Jehle & P J Reny, *Advanced Microeconomic Theory*, Longman.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

EC442

Macroeconomics for MRes students

This information is for the 2024/25 session.

Teacher responsible: Prof Benjamin Moll SAL.1.19, Dr Ethan Ilzetzki SAL.1.11 and Prof Matthias Doepke SAL.1.18
Prof Silvana Tenreyro SAL.2.17

Availability: This course is compulsory on the MRes/PhD in Economics, MRes/PhD in Economics and Management and MRes/PhD in Finance. This course is not available as an outside option.

Course content: The course will cover topics in advanced macroeconomics with emphasis on fundamentals and applications to recent theoretical advances:

- i. Economic growth: Neoclassical Growth Model, Optimizing Behaviour in Dynamic Models under Certainty, Endogenous Technological Change, Imitation and Convergence, Growth and Development Accounting, Appropriate Technology.
- ii. Search and Matching: The Matching Model, Efficiency Wages, Growth and Unemployment.
- iii. Dynamic Stochastic General Equilibrium Models: Real Business Cycles, Applications to Models of Heterogeneous Agents and Open Economy, Fiscal Policy Analysis.
- iv. Monetary Economics: Models with Credit Frictions, Sticky Prices, Search.

Teaching: 30 hours of lectures and 15 hours of classes in the AT. 30 hours of lectures and 15 hours of classes in the WT. Attendance at classes is compulsory.

Formative coursework: Compulsory exercises are set for each class. A mock exam will take place in early WT.

Indicative reading: A good general textbook that is mostly below the level of the course is:

D Romer, *Advanced Macroeconomics*, McGraw-Hill Advanced Series in Economics, New York, 1996.

For the growth part the main references are the textbooks by:

D. Acemoglu, *Introduction to Modern Economic Growth*, Princeton University Press, 2009; R J Barro & X Sala-i-Martin, *Economic Growth*, McGraw-Hill, 1997.

Other useful texts include:

L Ljungqvist & T Sargent, *Recursive Macroeconomic Theory*, MIT Press, 2000; N Stokey & R E Lucas, *Recursive Methods in Economic Dynamics*, Harvard University Press, 1989.

More economic applications, with some required readings can be found in:

M Obstfeld & K Rogoff, *Foundations of International Macroeconomics*, MIT Press, 2000; P Aghion & P Howitt,

Endogenous Growth Theory, MIT Press 1998; C A Pissarides, *Equilibrium Unemployment Theory*, MIT Press 2000.

Assessment: Exam (75%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

Problem sets (25%) in the AT and WT.

EC443

Econometrics for MRes students

This information is for the 2024/25 session.

Teacher responsible: Dr Yike Wang SAL.4.26, Prof Taisuke Otsu SAL.4.25 and Prof Jorn Pischke SAL.2.16

Availability: This course is compulsory on the MRes/PhD in Finance. This course is available on the MRes/PhD in Economics, MRes/PhD in Economics and Management and MRes/PhD in Management (Marketing). This course is not available as an outside option.

Pre-requisites: Students should have completed an undergraduate level course in econometrics and statistical theory. Linear algebra and multivariate calculus will be used frequently.

Course content: The first part of the course begins with a review of linear regression analysis. It proceeds with discussions on linear instrumental variable (IV) regression, generalised method of moments (GMM), panel data analysis, nonparametric methods, and treatment effect analysis. Then it discusses estimation and inference on general nonlinear models including various limited dependent variable models. It also covers basics of time series analysis and additional topics, such as bootstrap, quantile regression, and machine learning are also covered.

The second part of the course focuses on programme evaluation methods frequently used in applied microeconomics. It discusses issues arising in regression control, instrumental variables, differences-in-differences and fixed effects methods, regression discontinuity designs, and statistical inference. Throughout, the discussions are supported by many empirical applications.

Teaching: 30 hours of lectures and 15 hours of classes in the AT. 30 hours of lectures and 15 hours of classes in the WT. This course is delivered through a combination of classes and lectures totalling a minimum of 90 hours across Autumn Term and Winter Term. Attendance at lectures and classes is compulsory.

Formative coursework: Compulsory exercises are set for each class. A mock exam will take place in early WT.

Indicative reading: Course material will be made available through the course Moodle page. Please note there is no set book for this course.

Recommended books are:

- J. M. Wooldridge, *Econometric Analysis of Cross Section and Panel Data*, 2010
- B. Hansen, *Econometrics*, 2022
- J. Angrist and J. S. Pischke, *Mostly Harmless Econometrics*, 2009
- F. Hayashi, *Econometrics*, 2000
- T Amemiya, *Advanced Econometrics*, Harvard University Press, 1985.

Assessment: Exam (65%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Coursework (35%) in the WT.

EC451

Introductory Course for MSc EME

This information is for the 2024/25 session.

Teacher responsible: Dr Yike Wang SAL 4.26

Dr Eduard Boehm

Dr Dmitry Mukhin, SAL.1.24

Prof Taisuke Otsu, SAL 4.25

Availability: This course is compulsory on the MSc in Econometrics and Mathematical Economics. This course is not

available as an outside option.

The course is split into three parts: Microeconomics, Macroeconomics and Econometrics.

Non-EME students wishing to take EC487 Advanced Microeconomics as part of their programme must attend Week 1 of the EC451 course, Microeconomics, and sit the EC451 Microeconomics examination.

Non-EME students wishing to take EC484 Econometric Analysis as part of their programme must attend Week 3 of the EC451 course, Econometrics, and sit the EC451 Econometrics examination.

Non-EME students are not permitted to attend Week 2 of the EC451 course, Macroeconomics.

Course content: Microeconomics (Week 1):

This section focuses on introducing core topics and tools in microeconomic theory as preparation for the core course Advanced Microeconomics EC487. Topics are likely to include the economic concepts of choice, preference, and utility, the revealed preference approach, the consumer's problem and its properties, and the aggregation of social preferences. Tools covered may include basic real analysis foundations, correspondences, and fixed-point theorems.

Macroeconomics (Week 2):

This course serves as the prequel of the core course Advanced Macroeconomics EC417 and focuses on topics in modern macroeconomic theory, starting with basic national income accounting and the concept of general equilibrium. It discusses the economic growth and the business cycles, including the models with sticky prices and credit market imperfections.

Econometrics (Week 3):

Days 1-4 (Dr Yike Wang): This part introduces basic concepts and theory for mathematical statistics and probability. This part mostly focuses on linear regression model and covers the topics, such as (i) Conditional expectation and projection, (ii) Algebra of least squares, (iii) Finite sample theory, (iv) Maximum likelihood (v) Introduction to asymptotic theory, and (vi) Hypothesis testing. Also, some background mathematical results are reviewed.

Day 5 (Prof Otsu): The final session is devoted to introducing Econometric Analysis EC484. Further concepts and results on asymptotic theory and statistical methods are introduced.

Teaching: The course is taught in September. It consists of approximately 45 hours of lectures and an additional 22 hours of classes, across a 3-week period. Lectures and classes will be delivered in person on the LSE campus.

Formative coursework: After each lecture, some exercises will be handed to students. They will be solved during the classes.

Indicative reading: Hansen, Bruce (2022) *Econometrics* (main reference)

Hansen, Bruce (2022) *Probability and Statistics for Economists* (background reading for the econometrics sequence)

Rubinstein (2012) *Lecture Notes in Microeconomic Theory*
Ljungqvist, Lars and Thomas J. Sargent (2012) *Recursive Macroeconomic Theory*.

Romer, David (2011) *Advanced Macroeconomics*.

Assessment: At the end of the course, students will be examined on all three modules, microeconomics, econometrics and macroeconomics.

Students from programmes other than MSc EME wishing to continue studying MSc EME core courses must achieve a passing mark in each subject exam.

EC453 Political Economy

This information is for the 2024/25 session.

Teacher responsible: Prof Stephane Wolton CBG 3.40

Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and

Health (Environmental Economics and Climate Change) (LSE and Peking University) and MSc in Political Science (Political Science and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Students should have completed courses in intermediate level microeconomics, macroeconomics and econometrics.

Course content: This course proposes a broad overview of seminal papers and recent advances in the growing field of Political Economy. The course covers both theoretical and empirical works. Each lecture is organized around a theme, with themes changing every year as a function of recent debates in the scholarly community and current problems in the world. In the academic year 2023/24, topics will include elections in developed and developing democracies, the political affect of media online and offline, interest groups, populism, democratic backsliding, discrimination, as well as several lectures on politics in autocracies. The course material will expand students' capacity to think about policy and about relevant issues at the intersection of economics and political science.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 10 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn Term, Winter Term and Spring Term.

There will be a mock exam and a revision session in the first week of ST (on-campus if possible or online).

Formative coursework: At least two written assignment for handing in per term (assignment will include some work with data sets provided by the instructor).

Indicative reading: Most of the reading is from journal articles; lists will be supplied at the start of each term. Two books are of particular interest for students to get started: T Besley, *Principled Agents? Selection and Incentives in Politics*, Oxford University Press, 2005 and T Persson & G Tabellini, *Political Economics: Explaining Political Outcomes*, MIT Press, 2000.

Assessment: Assessment path 1

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Essay (50%, 6000 words) in the ST.

Assessment path 2

Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Students taking MSc Economics must take Assessment path 1 and will be required to submit the extended essay at the start of ST.

EC465 Economic Growth, Development, and Capitalism in Historical Perspective

This information is for the 2024/25 session.

Teacher responsible: Dr Jeremiah Dittmar SAL 2.22

Professor Neil Cummins SAR 5.13

Dr Melanie Meng Xue SAR 6.12

Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Economic History, MSc

in Economics and MSc in Economics (2 Year Programme).

This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Students should also have completed courses in intermediate level microeconomics, macroeconomics, and econometrics.

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: This course will provide a rigorous introduction to the analysis of long run economic growth and development. The focus is on acquiring the necessary empirical skills to engage in advanced analysis of economic evidence, and to develop an understanding of how historical evidence can shape and inform economic theory. Topics at the forefront of economics and economic history will be covered. These include political economy, technological change, economic growth, education, demography, Malthusian economics, the economics of law and property rights, gender, culture, social mobility, and inequality. The emphasis will be on combining theory and data to evaluate fundamental ideas in economics concerning the determinants of well-being, the origins of growth, and the dynamics of market economies.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 10 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn Term, Winter Term and Spring Term.

This course is jointly delivered by the Economics and Economic History Department.

Formative coursework: Students will be expected to produce at least 1 presentation and 1 exercise in the AT and WT. The formative coursework will consist of a combination of student presentations, written exercises, data analysis, and problems.

Indicative reading: Most of the reading is from journal articles which appear on reading lists distributed at the start of each part of the course. However, the following references may serve as an introduction to material included in the syllabus: Nunn, "The Importance of History for Economic Development" (2009); Robinson and Acemoglu, "Why Nations Fail" (2012); Acemoglu, "Introduction to Modern Economic Growth" (Princeton, 2009); Hall and Jones, "The New Kaldor Facts: Ideas, Institutions, Population, and Human Capital" (2010); Mokyr, "Lever of Riches" (1988); Piketty (2013) "Capital in the Twenty-First Century"; Diamond (1997) "Guns, Germs and Steel".

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Essay (50%, 6000 words) in the ST.

The summative assessment consists of an exam that reviews and synthesises all course materials and an essay. The essay will be a critical analytic essay providing an opportunity for original empirical research.

other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course for MSc EME (EC451) or Introductory Course in Mathematics and Statistics (EC400).

Knowledge of econometric theory and applied econometrics is expected. Students must be prepared to read journal articles with difficult mathematical and statistical content.

Course content: The course will focus on going through modern quantitative papers which demonstrate the application of econometric techniques to modelling the behaviour of individual economic agents (households and firms) and economies.

The first half of the course focuses on papers in the empirical literature on a wide range of topics in applied micro-econometrics including industrial organisation, labour economics, economic history, and energy/environmental economics. Papers are chosen to illustrate the challenges of identification and causal inference.

The focus of the content is on methods, however the papers covered as examples of those methods use data and study economic questions from a variety of countries and settings.

A goal is to provide a diverse view of economic research. The lectures will illustrate the interplay between models, data, and methods.

The second part of the course focuses on macroeconomic questions using data and tools from applied microeconomics. We cover four styles of empirical work: (1) "reduced-form" approaches (including difference-in-differences, event studies, instrumental variables, and Bartik research designs); (2) structural models; (3) "sufficient statistics" research designs, at the intersection of structural and reduced-form methods; and (4) machine learning techniques. Topics covered include the effectiveness of fiscal stimulus, the measurement of inflation, directed technical change, the welfare effects of trade, the macroeconomic impact of financial frictions over the business cycle, the macroeconomic impact of unemployment insurance, and the effect of Artificial Intelligence on the labour market.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 10 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: During Autumn term and Winter term, students will work on their essay and receive feedback from the instructors (defining the research question, choosing a research design, etc.). In Autumn term formative assignments will move students toward creating an idea for their paper and referee reports on papers that are discussed in seminars. Formative assignments in Winter term will be presentations of research papers and providing feedback to peers.

Indicative reading: Articles in economic journals will be assigned at the start of Autumn and Winter terms. The course will also draw on methodological topics covered in Wooldridge, *Econometric Analysis of Cross Section and Panel Data* (2nd edition, 2010), Greene, *Econometric Analysis* (7th edition, 2012), and Angrist and Pischke, *Mostly Harmless Econometrics* (2009).

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Essay (50%, 6000 words) in the ST.

EC475

Quantitative Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Michael Gmeiner (Autumn Term) SAL 4.28

Dr Xavier Jaravel (Winter Term) SAL 3.15

Availability: This course is available on the MSc in Econometrics and Mathematical Economics and MSc in Economics. This course is available with permission as an outside option to students on

EC476

Contracts and Organisations

This information is for the 2024/25 session.

Teacher responsible: Prof Gilat Levy SAL 4.31

Prof Philippe Aghion SAL 2.30

Availability: This course is available on the MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Environmental Economics

and Climate Change and MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students on the MSc Econometrics and Mathematical Economics programme must have completed the Pre-sessional Course for MSc EME (EC451). All other students must have completed the Introductory Course in Mathematics and Statistics (EC400).

In exceptional circumstances, students may take this course without EC400 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc Economics Programme Director and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: The course will cover topics from: social learning, reputation and career concerns, strategic information transmission, contract theory, incomplete contracts, the economics of moral hazard and adverse selection in strategic settings, dynamic theory of incentive contracts, optimal auctions and regulation, and the theory of mechanism design with multiple agents (multiple agents screening and common agency).

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 10 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Two marked assignments per term.

Indicative reading: No one book covers the entire syllabus; a list of references will be provided at the start of the course. The following textbooks provide a treatment of part of the material presented in the course: Jean-Jacques Laffont, *The Economics of Uncertainty and Information*, MIT Press; D Fudenberg & J Tirole, *Game Theory*, MIT Press; Jean-Jacques Laffont & Jean Tirole, *A Theory of Incentives in Procurement Regulations*, MIT Press; Bernard Salanié, *The Economics of Contracts: A Primer*, MIT Press, Bolton, P., and M. Dewatripont (2005), *Contract Theory*, MIT Press, Hart, O. (1995), *Firms, Contracts, and Financial Structure*, Oxford University Press.

Assessment: Assessment path 1

Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Assessment path 2

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Essay (50%, 6000 words) in the ST.

Non-MSc Econometrics and Mathematical Economics students must follow Assessment path 2.

MSc Econometrics and Mathematical Economics students can follow Assessment path 1 or 2.

EC484

Econometric Analysis

This information is for the 2024/25 session.

Teacher responsible: Prof Taisuke Otsu SAL 4.25
Prof Javier Hidalgo SAL 4.20

Availability: This course is compulsory on the MSc in Econometrics and Mathematical Economics. This course is available on the MRes/PhD in Economics, MRes/PhD in Economics and Management and MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course for MSc EME (EC451).

EC451 takes place prior to the start of Michaelmas Term, please

contact econ.msc@lse.ac.uk for more information.

Course content: This course gives an advanced treatment of the theory of estimation and inference for econometric models.

Part (a) Linear regression, nonlinear regression, general asymptotic theorems, nonparametric methods, generalized method of moments, instrumental variable regression, and limited dependent variables.

Part (b) Background; asymptotic statistical theory: modes of convergence, asymptotic unbiasedness, uniform integrability, stochastic orders of magnitude, convergence in distribution, central limit theorems, applications to linear regression, extensions to time series, consistency and asymptotic distribution of implicitly defined extremum estimators.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 9 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

This course is delivered through a combination of classes and lectures totalling a minimum of 59 hours across Autumn Term, Winter Term and Spring Term.

Formative coursework: Two marked assignments per term.

Indicative reading: No one book covers the entire syllabus; a list of references will be provided at the start of the course, and lecture notes and relevant articles will be circulated.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

EC485

Further Topics in Econometrics

This information is for the 2024/25 session.

Teacher responsible: Professor Javier Hidalgo SAL 4.20

Professor Taisuke Otsu SAL 4.25

Dr Yike Wang SAL 4.26

Availability: This course is available on the MSc in Econometrics and Mathematical Economics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Introductory Course for MSc EME (EC451).

In exceptional circumstances, students may take this course without EC451 provided they meet the necessary requirements and have received approval from the course conveners (via a face to face meeting), the MSc EME Programme Director, and their own Programme Director. Contact the Department of Economics for more information (econ.msc@lse.ac.uk) regarding entry to this course.

Course content: The aim of the course is to introduce the students to topics at the frontier of econometric research of importance both at a theoretical and empirical level. The course consists of four series of ten lectures on specialised topics in econometrics. These lectures change from year to year. For the academic year 2024-2025, they will include: generalised method of moments and related topics; high dimensionalities and machine learning; bootstrap methods; and nonparametric and semiparametric methods in econometrics.

Teaching: 20 hours of lectures in the AT. 20 hours of lectures in the WT.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures in those weeks).

This course is delivered through lectures totalling a minimum of 40 hours across Autumn Term and Winter Term. There are no classes.

Indicative reading: No one book covers the entire syllabus; lists of references will be provided and lecture notes circulated.

Assessment: Exam (25%, duration: 1 hour, reading time: 15 minutes) in the January exam period.

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Essay (25%, 2000 words) in the WT.

- The January exam is based on Prof Otsu's lectures on generalised method of moments and related topics.
- The Spring exam is based on Prof Hidalgo's lectures on bootstrap methods and on nonparametric and semiparametric methods.
- The essay due in the Winter Term is based on Dr Wang's teaching on high dimensionalities and machine learning, which provides an opportunity to critically review an academic paper.

EC486

Econometric Methods

This information is for the 2024/25 session.

Teacher responsible: Mr Ragvir Sabharwal COL 7.02B
Prof Alessandro Gavazza, SAL 4.21

Availability: This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.

Course content: This course aims to present the theory and practice of empirical research in economics. Beyond the theory, the course will put a substantial amount of effort in having the students work with Stata and other econometric software in analyzing actual data sets, reproducing and criticising results in previous work and learning the actual practice of econometrics as undertaken by the best applied economists, both in general (in MT) and specifically within the IO field (in the LT). Topics include: (MT) Ordinary Least Squares, hypothesis testing, omitted and added variables, measurement error, the role of controls, and functional form. Panel data, fixed and random effects. Instrumental Variables. The emphasis of this part is on the identification of causal effects, and applications in microeconomics (Labour Economics, Public Policy, IO, etc) are presented throughout. In LT you will learn the applications of many of these techniques to econometric questions in Industrial Organization, organizational economics and management.

Teaching: 20 hours of lectures and 8 hours of seminars in the AT. 20 hours of lectures and 10 hours of seminars in the WT. 2 hours of seminars in the ST.

Formative coursework: Students are required to complete answers to problem sets on a week by week basis.

Indicative reading: MT: James H. Stock and Mark W. Watson, Introduction to Econometrics; reading lists of chapters and journal articles will be supplied at the start of each term.

Assessment: Exam (65%, duration: 2 hours) in the spring exam period.

Take-home assessment (35%) in the WT.

EC487

Advanced Microeconomics

This information is for the 2024/25 session.

Teacher responsible: Dr Christopher Sandmann SAL 4.24
Dr Paula Onuchic

Availability: This course is compulsory on the MSc in Econometrics and Mathematical Economics. This course is available on the MSc in Applicable Mathematics, MSc in Economics and MSc in Economics (2 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit. Students on other programmes must get permission from the course conveners to take this course.

Pre-requisites: Students must have completed Introductory Course for MSc EME (EC451).

EC451 takes place prior to the start of Autumn Term, please contact econ.msc@lse.ac.uk for more information.

Course content: The aim of this course is to: (i) introduce and develop the analytical tools of graduate level Microeconomics with a special emphasis on mathematical models; (ii) provide the students with a firm grounding in classical Microeconomic Theory

as well as its modern development.

In Autumn term, topics are likely to include: Games of complete information (zero-sum and supermodular games, rationalizability, correlated equilibrium, equilibrium refinements, Nash + Rubinstein bargaining, repeated games, oligopoly), general equilibrium (existence + uniqueness, welfare theorems, core equivalence, Walrasian bargaining, jungle equilibrium). In winter term, topics are likely to include: games of incomplete information (Bayesian Nash Equilibrium and its refinements, with application to signalling games); topics on mechanism design, contracting, and strategic communication; and social choice theory.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. 20 hours of lectures and 9 hours of seminars in the WT. 1 hour of seminars in the ST.

This course is delivered through a combination of classes and lectures totalling a minimum of 59 hours across Autumn Term, Winter Term, and Spring Term.

There will be a reading week in Week 6 of AT and in Week 6 of WT (no lectures or classes in those weeks).

Formative coursework: Problem sets will be discussed in class and two marked assignments will be given in AT and WT.

Indicative reading: The main texts are:

Osborne and Rubinstein, A Course in Game Theory, The MIT Press, Mas-Colell, Whinston & Green, Microeconomic Theory, OUP, and, A Rubinstein, Lecture Notes in Economic Theory, Princeton University Press (with the most up-to-date version available for free download from the author's website).

Other sources include: Fudenberg and Tirole, Game Theory, MIT Press.

Assessment: Exam (40%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Exam (40%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Problem sets (20%) in the AT and WT.

Note that EC451 material will be covered on the exam.

EC4B5 Half Unit

Macroeconomics for MSc F&E

This information is for the 2024/25 session.

Teacher responsible: Prof Rachel Ngai, SAL.1.15

Availability: This course is available on the MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: This course will teach you the main characteristics of business cycle fluctuations with a special emphasis on what happens during severe economic crises. We will consider a range of different macroeconomic models to study business cycles. The course covers the Real Business Cycle model, the New-Keynesian model, models with frictions in labour and financial markets, agent-based models, the role of money, self-fulfilling beliefs, the role of monetary and fiscal policy (and in particular non-conventional monetary policy), and (un)sustainable sovereign debt. These models and policy studies will highlight important economic mechanisms that are relevant to analyse a range of past and current economic phenomena.

Teaching: 20 hours of lectures and 9 hours of seminars in the WT. 1 hour of seminars in the ST.

This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term and Spring Term.

There will be a reading week in Week 6 of WT only (no lectures or classes that week).

Formative coursework: Two marked assignments in the WT. Exercises are discussed in weekly classes.

Indicative reading: Primary reading will be journal articles. A full list will be made available at the start of each term.

Assessment: Exam (90%, duration: 2 hours, reading time: 15

minutes) in the spring exam period.
Continuous assessment (10%) in the WT.

EC4B6 Half Unit Microeconomics for MSc F&E

This information is for the 2024/25 session.

Teacher responsible: Dr Francesco Nava SAL 3.20

Availability: This course is available on the MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Pre-requisites: Students must have completed Introductory Course in Mathematics and Statistics (EC400).

Course content: The aim of the course is to develop the basic tools for analysing problems of resource allocation used by economists working in research, government, and business. The course deals with positive and normative problems. It aims to include modern developments without being overly mathematical, and to develop a capacity to apply economic concepts to real-world problems. The course focuses on classical theories of market behaviour and strategic interaction. We begin by presenting decision theoretic foundations of choice behaviour, by analysing the optimisation problems faced by consumers and firms, and by modelling market interactions and the formation of prices in perfectly competitive markets. Then we study models of decision making under uncertainty and game theoretic solution concepts. Novel developments in these fields are also discussed in lectures.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. There will be a reading week in Week 6 of AT with no lectures or classes.

Formative coursework: Weekly problem sets and two marked assignments in AT which will contribute to the coursework mark.

Indicative reading: The course will draw on a variety of texts, the main ones being:

1. J G Riley, *Essential Microeconomics*, Cambridge.
2. J R Green, A Mas-Colell & M D Whinston, *Microeconomic Theory*, Oxford.

More detailed readings will be given at the beginning of the course. Some notes will be provided where textbook coverage is inadequate.

Assessment: Exam (90%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Continuous assessment (10%) in the AT.

EH401 Half Unit Historical Analysis of Economic Change

This information is for the 2024/25 session.

Teacher responsible: Prof Leigh Gardner SAR 505 and Dr Anne Ruderman SAR 506

Availability: This course is compulsory on the MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available on the MPhil/PhD in Economic History. This course is not available as an outside option.

Course content: The course provides an overview of the central themes and key theoretical questions in economic history and examines the ways in which economic historians collect, analyse and interpret evidence. Specific topics evolve to reflect recent research trends, but include a range of issues such as processes of economic development; culture and economic behaviour; the role of institutions; and welfare outcomes. The course approaches these topics by considering problems of knowledge and explanation in economic history, and introduces quantitative and qualitative approaches to obtaining, analysing, and interpreting evidence. Lectures pair conceptual and theoretical reviews with

historical case studies illustrating applied research on these topics.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students are expected to write one essay or equivalent pieces of written work during the term.

Indicative reading: D. North, *Institutions, Institutional Change and Economic Performance* (1990); A. Greif, *Institutions and the Path to the Modern Economy* (2006); K. Pomeranz, *The Great Divergence: China, Europe and the Making of the Modern World Economy* (2000); R. Allen, *The British Industrial Revolution in Global Perspective* (2009); D Rodrik (Ed), *In Search of Prosperity* (2003); E. Helpman, *The Mystery of Economic Growth* (2004); T Rawski (Ed), *Economics and the Historian* (1996); J. Tosh, *The Pursuit of History* (2nd Edition, 1991); D. Little, *Varieties of Social Explanation* (1991); Leah Boustan, Philip Ager and Katherine Eriksson "The Intergeneration Effects of a Large Wealth Shock: White Southerners after the Civil War", *American Economic Review*, 2021; Claudia Goldin, "A Grand Gender Convergence: Its Last Chapter", *American Economic Review*, 104, no.4 (2014): 1091-1119.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

EH402 Half Unit Quantitative Analysis in Economic History I

This information is for the 2024/25 session.

Teacher responsible: Dr Tom Raster

Availability: This course is available on the MPhil/PhD in Economic History, MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is not available as an outside option.

Course content: This course is concerned with how economic historians use quantitative methods and with how researchers design and structure a research project. In terms of quantitative methods the emphasis is on the applied and practical rather than the theoretical and will range from the use of simple summary descriptive statistics to multiple regression. The course is concerned with the problems of analysing and interpreting quantitative historical evidence. It will consider topics such as sampling and statistical distributions, correlation, simple and multiple regression, specification problems, hypothesis testing, panel data analysis and instrumental variables, although the content may vary slightly from year to year. The course will also provide students with training in using an econometrics software package (STATA). An important component of the course is the deconstruction of historical articles that have used quantitative techniques.

Teaching: 9 hours of seminars and 20 hours of computer workshops in the AT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Autumn Term.

This course has a reading week in Week 6 of Autumn Term

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

- C H Feinstein and M Thomas, *Making History Count* (2002);
- P Hudson, *History by Numbers* (2002);
- C H Lee, *The Quantitative Approach to Economic History* (1977);
- G Hawthorn, *Plausible Words* (1991).

Assessment: Essay (80%, 3000 words) and online assessment (20%).

EH404 Half Unit

India and the World Economy

This information is for the 2024/25 session.

Teacher responsible: Prof Tirthankar Roy SAR 616

Availability: This course is available on the CEMS Exchange, MA in Asian and International History (LSE and NUS), MA in Modern History, MBA Exchange, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Financial History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply, but that may not continue to be the case.

Course content: From the eighteenth century, the South Asia region played an important part in international transactions in goods, people, and money. The world economy, in turn, shaped potentials for economic growth in the region. The aim of the course is to impart an understanding of the global factors that shaped economic change in the South Asia region in the 18th through the early-20th century. It will also deal with the principal ways in which South Asia contributed to economic change in the rest of the world. The political context of globalization, especially imperialism and colonial policies, will be considered. The course will be divided into a set of topics, which together cover a large ground, but a selection from which will be discussed in the class. Lectures and seminars will centre on the readings assigned to each topic.

Topics to be covered: Introductory: India and the world economy in the eighteenth and nineteenth centuries - how each shaped the other; textiles in eighteenth century India: scale - organization - impact on global consumption and innovation - trade and territorial politics; nineteenth century market integration: de-industrialization and the artisans; nineteenth century market integration: Agricultural exports, land rights, and the peasantry - Trade and famines; Government finance in colonial setting: The drain controversy - public debt; overseas migration in the nineteenth century: Who went where, how many, and why - private gains and losses - social effects: slavery and indenture, women, nature of work and skill-formation - labour and non-labour migrants compared; foreign capital and industrialization; balance of payments and the monetary system; overview: Globalization and economic growth.

Teaching: 10 hours of lectures and 20 hours of seminars in the WT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students are expected to write one essay or equivalent pieces of written work.

Indicative reading:

- G. Balachandran, ed., *India and the World Economy 1850-1950* (2003);
- C. Bates and M. Carter, 'Sirdars as Intermediaries in Nineteenth-century Indian Ocean Indentured Labour Migration,' *Modern Asian Studies* (2017);
- L. Chaudhary, B. Gupta, T. Roy and A. Swamy, eds, *A New Economic History of Colonial India* (2015);
- D. Haynes, *Small Town Capitalism in Western India: Artisans, Merchants and the Making of the Informal Economy 1870-1960* (2012);
- P. Marshall, ed., *The Eighteenth Century in Indian History* (2004);
- T. Roy, *A Business History of India: Enterprise and the Emergence of Capitalism 1700-2015* (2018).

Assessment: Essay (100%, 4000 words) in the ST.

EH409 Half Unit

Chinese Economic History: Culture, Institutions and Economic Growth

This information is for the 2024/25 session.

Teacher responsible: Dr Melanie Meng Xue SAR 612

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus), MSc in International and Asian History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students enrolled in this course are expected to have completed at least introductory undergraduate courses in statistics and/or econometrics.

Course content: The course provides a broad but selective survey of the root causes of economic development and economic growth in China. The course is based on cutting-edge research --- both articles and book chapters --- on a number of topics, including (1) Geography, (2) Institutions, (3) States, (4) Culture, (5) Gender, (6) Education, (7) Social Mobility, (8) Trade & Markets, (9) Modern Economic Growth.

Teaching: 20 hours of seminars in the AT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

- Richard von Glahn, *The Economic History of China: From Antiquity to the Nineteenth Century* (Cambridge University Press), 2016;
- Kenneth Pomeranz, *The Great Divergence, China, Europe and the making of the modern world economy* (Princeton, New Jersey: Princeton UP), 2000;

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

EH413 Half Unit

African Economic Development in Historical Perspective

This information is for the 2024/25 session.

Teacher responsible: Dr Matt Benson

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Financial History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus), MSc in International and World History (LSE & Columbia) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply, but that may not continue to be the case.

Course content: Many of Africa's current economic challenges, from persistent poverty to the weakness of state institutions, have deep historical roots. This course provides an introduction to the

economic history of sub-Saharan Africa since the early modern period. Its overall aim is to bring Africa and Africans into global economic history, allowing students to understand how Africans contributed to that history, as well as how global changes have influenced the patterns of African development.

The course addresses a number of issues which are current in studies of African development, including:

- Globalization and development
- Environmental challenges
- The structure of institutions
- Economic development and welfare outcomes

Close attention is paid to the ways in which economic development is measured and assessed in different periods with the available data. Seminars address the diverse experiences of specific countries and regions in addition to broader trends.

Teaching: 20 hours of seminars in the AT.

This course is delivered through seminars totalling a minimum of 20 hours across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term

Formative coursework: Students are required to complete one essay or equivalent during the term.

Indicative reading: Readings for this course reflect current trends in research on African economic history and development. For indicative work, please see the online textbook of the African Economic History Network, *This History of African Development*. For a general overview of African history over the period, see R.J. Reid, *A History of Modern Africa* (2009), J. Iliffe, *Africans: The History of a Continent* (1995).

Assessment: Essay (100%, 5000 words) in the WT Week 1.

EH421 Half Unit Economic History of Colonialism

This information is for the 2024/25 session.

Teacher responsible: Prof Tirthankar Roy SAR 616 and Prof Leigh Gardner SAR 507

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Financial History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply, but that may not continue to be the case.

Course content: Debates about the effects of European colonial rule on the non-European world animated economic history scholarship since the 1850s when Karl Marx published essays on British rule in India in the *New York Daily Tribune*. The relationship between colonialism and economic development has an important place in a number of distinct literatures in economic history, including work on globalization, divergence, migration, global finance, environmental change, and the shaping of development policy after colonialism. The aim of the course is to introduce the key readings in these themes, build connections between the discourses, and lead students to an informed view of colonialism as a force in shaping the modern world.

The broad topics include, (a) trade and the origins of colonialism (b) institutions and governance; (c) connections forged through trade, investment, migration, and the transfer of knowledge of institutions and technologies, including informal empire; (d) growth of corporate enterprise such as companies, factories, and plantation complexes, and the connection between state power and private enterprise, (e) decolonization, proximity between indigenous business and nationalist politics, the changing power of expatriate capital, and the appeal of new developmental ideology in the interwar period, (f) environmental change, studying a scholarship that sees European empires, alternatively,

as catastrophic in their impacts on the environment and as forerunners of governmental regulation of the commons. Seminars compare and contrast the experiences of Asia and Africa.

Teaching: 20 hours of seminars in the WT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to complete an essay and an equivalent assignment during term.

Indicative reading: The primary reading for the course will be:

Leigh Gardner and Tirthankar Roy, *Economic History of Colonialism* (Bristol, 2020)

Other indicative readings include:

Acemoglu, D., Johnson, S. and Robinson, J. A. (2001), 'The Colonial Origins of Comparative Development: An Empirical Investigation', *American Economic Review*, 91(5), pp. 1369-1401.

C.A. Bayly (2008), *Indigenous and Colonial Origins of Comparative Economic Development*, World Bank Policy Working Paper #4474.

<http://ideas.repec.org/p/wbk/wbrwps/4474.html>

Stanley L. Engerman, Kenneth L. Sokoloff, 'Colonialism, Inequality, and Long-Run Paths of Development', NBER Working Paper No.

11057, 2005. <http://www.nber.org/papers/w11057.pdf>

Assessment: Essay (100%, 4000 words) in the ST.

EH426A Half Unit Quantitative Analysis in Economic History II

This information is for the 2024/25 session.

Teacher responsible: Dr Melanie Meng Xue SAR 612

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply, but that may not continue to be the case.

Pre-requisites: Students enrolled for this course are expected to have completed at least introductory undergraduate courses in statistics and/or econometrics and economic theory. The course will begin with a revision of the main quantitative approaches but will not provide a comprehensive training in econometric methods or computer applications.

Please note: EH426A cannot be taken with EH426W.

Course content: The course will provide an overview of quantitative approaches in economic history mainly using cross-section and panel data. The course will examine the use of quantitative techniques through an examination of their application in recent literature. Techniques discussed will include propensity score matching, instrumental variables, regression discontinuity design, difference-in-differences analysis and spatial econometric models. The course is organised on a topic basis, with subjects chosen to illustrate particular theoretical, quantitative and methodological issues.

Teaching: 20 hours of seminars in the AT.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Autumn Term.

This year, while we are planning for most classes and seminars to be delivered in-person, it is possible that some or all of this teaching may have to be delivered virtually. Lectures will either be recorded or given in the form of live webinars.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students are expected to write one essay or equivalent pieces of written work.

Indicative reading: There is no mandatory textbook for this course, but the brief overview of quantitative methods during the first four weeks will follow:

- Wooldridge, J.M. (2009), *Introductory Econometrics: A Modern Approach*, International Student Edition.

Useful background readings include:

- J.L. Van Zanden, *The Long Road to the Industrial Revolution: The European Economy in a Global Perspective, 1000-1800* (Leiden, 2009);
- K.H. O'Rourke and J.G. Williamson, *Globalization and History: The Evolution of a Nineteenth-Century Atlantic Economy* (Cambridge MA, 1998);
- C. Goldin and L.F. Katz, *The race between education and technology* (Cambridge, MA, 2008);
- D. Greasley and L. Oxley (eds.), *Economics and History: Surveys in Cliometrics* (Oxford, 2011), 6).

Assessment: Essay (100%, 4000 words).

EH426W Half Unit Not available in 2024/25 Quantitative Analysis in Economic History II

This information is for the 2024/25 session.

Teacher responsible: Dr Melanie Meng Xue

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students enrolled for this course are expected to have completed at least introductory undergraduate courses in statistics and/or econometrics and economic theory. The course will begin with a revision of the main quantitative approaches but will not provide a comprehensive training in econometric methods or computer applications.

Please note: EH426W cannot be taken with EH426A.

Course content: The course will provide an overview of quantitative approaches in economic history mainly using cross-section and panel data. The course will examine the use of quantitative techniques through a critical discussion of their application in recent literature. Techniques discussed will include multiple regression analysis, regression diagnostics, instrumental variables, fixed and random effects, difference-in-difference analysis, regression discontinuity design, and more. The course is organised on a topic basis, with subjects chosen to illustrate particular theoretical, quantitative and methodological issues.

Teaching: 20 hours of seminars in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy

Formative coursework: Students are expected to write one essay or equivalent pieces of written work.

Indicative reading: There is no mandatory textbook for this course, but the brief overview of quantitative methods during the first four weeks will follow:

- Angrist, Joshua D., and Jörn-Steffen Pischke. "Mostly harmless econometrics." In *Mostly Harmless Econometrics* (Princeton University Press), 2008.

Assessment: Essay (100%, 5000 words).

EH427 Half Unit Topics in Quantitative Analysis in Economic History

This information is for the 2024/25 session.

Teacher responsible: Dr Jason Lennard SAR 605

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is not available as an outside option.

Pre-requisites: Students enrolled for this course are expected to have completed EH426 or the equivalent of undergraduate courses

in econometrics and intermediate economic theory.

Course content: This course will provide an overview of time series analysis in economic history. The methods studied will include filters, local projections, vector autoregressions, narrative identification, instrumental variables, natural experiments and more, combining theory, practical exercises and applications in the historiography.

Teaching: 20 hours of seminars in the AT.

This course is delivered through a classes totalling a minimum of 20 hours across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students are expected to prepare a group presentation and an individual essay.

Indicative reading:

- Stock and Watson, *Introduction to Econometrics* (2020)
- Wooldridge, *Introductory Econometrics: A Modern Approach* (2009)

Assessment: Essay (100%, 4000 words) in the ST.

EH429 Half Unit History of Economics: Ideas, Policy and Performativity

This information is for the 2024/25 session.

Teacher responsible: Professor Mary S. Morgan SAR 609

Dr. Andrés M. Guiot-Isaac

Availability: This course is available on the MA in Modern History, MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus), MSc in International and World History (LSE & Columbia), MSc in Philosophy of Economics and the Social Sciences and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have not been able to provide places for all students that apply. Students will be asked to submit a short statement of their reasoning to support their course choice.

Course content: The course aim is to understand how economics has been used to change the world. It brings together the long tradition of analysis of economics as a policy science with more recent ideas about the performativity of economics. It draws on the literatures of economic history, history of economics, political economy and sociology of accounting, and philosophy of science to explore the aims and methods used by economists to influence, shape and direct the economy. The focus of study will be on particular episodes from 20th century history in which economics features as a technical art that translates ideas through policy into action (e.g. the transition from colonial to independent economies; the Soviet and Cuban revolutions; and the reconstruction of depressed and damaged economies).

Teaching: 22 hours of lectures and seminars in the Winter Term.

This course is delivered through a combination of classes, lectures, and, if possible, archival visits, totalling a minimum of 22 hours across Winter Term.

This course includes an archive visit in Week 6 of Winter Term.

Formative coursework: Students will be expected to work in groups and produce one group work and one individual essay, and contribute reading notes to shared Moodle resources.

Indicative reading: Reading lists will be given out at the beginning of the course. Henry Spiegel's *The Growth of Economic Thought* (various editions, Duke University Press) provides a general background text to history of economics. T.M. Porter's *Trust in Numbers* (1995, Duke University Press) is an important item on the reading list that can be usefully read ahead of the course.

Assessment: Take-home assessment (100%) in the ST.

EH430 Not available in 2024/25

Monetary and Financial History

This information is for the 2024/25 session.

Teacher responsible: Professor Albrecht Ritschl

Availability: This course is available on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. This may mean that you are not able to get a place on this course.

Pre-requisites: There are no specific pre-requisites for this course. Nevertheless, some preliminary background in introductory macroeconomics and introductory statistics could be useful.

Course content: Where does money come from? How did financial markets first develop and integrate? What has been the impact of financial markets on economic development, growth, and business cycle fluctuations? When did financial crises first arise, and how did they develop in the twentieth century, up to the subprime and Euro crises of 2008-2015 and the Covid-19 pandemic? This course offers an opportunity to delve into these questions and analyse the evolution of the role of money in Western economies over centuries, from the Middle Ages to the 2000s.

The first part of the course will allow students to acquire a broad overview of the origins of financial markets from 800 to the eve of World War 1. It will explore the creation of mints and central banks, the role of finance in processes of long-run growth such as the Industrial Revolution, how financial bubbles and banking panics first arose, and how financial markets integrated in the 19C with the Gold Standard.

The second part of the course will start with a focus on the financial turmoil of the Great Depression, looking at the mechanisms leading to hyperinflation, bank failures, debt crises and capital flight on both sides of the Atlantic. It will then move on to analysing the evolution of financial institutions under Bretton Woods, sovereign debt crises, the 1990s bubbles, bank bailouts during the Great Recession in the US and in the Euro area, and demand management in high-debt worlds such as one affected by Covid-19. In the end, students will have a firm grasp of the evolution of financial markets over centuries up until now.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. 10 hours of lectures and 10 hours of seminars in the WT.

This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn Term and Winter Term.

This course includes a reading week in Week 6 of Autumn Term and week 6 of Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 essay in the WT.

AT Formative: Pick a question from AT that's different from your summative question. 2000 words; due after reading week.

WT Formative: Pick a question from WT: 2000 words; due after reading week

Indicative reading:

- Aliber, R., & Kindleberger, Charles P. (2015). *Manias, panics and crashes : A history of financial crises* (Seventh ed.). Palgrave.
- Eichengreen, B. (2015). *Hall of mirrors: The Great Depression, the great recession, and the uses-and misuses-of history*. New York: Oxford University Press.
- Ferguson, N. (2009). *The ascent of money : A financial history of the world*. London: Penguin.
- Rajan, R. (2011). *Fault lines : How hidden fractures still threaten the world economy* (1st pbk. ed.). Princeton, N.J.: Princeton University Press.
- Gorton, G. (2012). *Misunderstanding financial crises : Why we don't see them coming*. New York: Oxford University Press.

Assessment: Exam (70%, duration: 2 hours) in the spring exam

period.

Essay (30%, 3500 words) in the WT Week 1.

EH431 Half Unit

Women in Economic History

This information is for the 2024/25 session.

Teacher responsible: Dr Anne Ruderman

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is expected to be high. This may mean that you are unable to get a place on this course.

Course content: This course will explore the role of women in economic history, as economic actors, labor market participants and early founders of the discipline. As such, it will take a broad look at the economic activity of women, as well as the structures and institutions that have governed socioeconomic aspects of women's lives, from employment to marriage to savings and retirement. This course will consider the economic history of women from the Renaissance to the recent past, looking at differences and similarities between Europe, the Americas, Africa and Asia. It will look at themes such as women and work, invisible labor, women as productive and reproductive entities under slavery, female slave owners, medicine and women, the gendering of professions, and property rights. It will examine, for example, the dowry bond market in Renaissance Florence, female land-ownership in pre-colonial Gambia and the so-called "mental load" that professional women face in household management in the twenty-first century United States.

Teaching: 20 hours of seminars in the WT.

This course will be taught over 10 two-hour seminars in the Winter Term.

Formative coursework: Students will be expected to produce 1 annotated bibliography, 1 outline and 1 analysis of sources in the Lent Term.

Indicative reading:

- Hughes, Diane Owen. (1978) "From Brideprice to Dowry in Mediterranean Europe." *Journal of Family History* 3, no. 3: 262-96

- Daminger, Allison (2019) "The Cognitive Dimension of Household Labor," *American Sociological Review* 84, no.4: 609-633.

Assessment: Essay (100%, 4000 words) in the ST Week 1.

EH432 Half Unit Not available in 2024/25

Economic History and Geography: Advanced Topics and Methods

This information is for the 2024/25 session.

Teacher responsible: Professor Joan R Roses (SAR 5.15)

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students should have completed courses in intermediate level econometrics.

Knowledge of spatial econometric packages like GIS is not necessary. The course will not provide a comprehensive training in econometric methods or computer applications.

Course content: The course aims to introduce the student to topics at the frontier of Historical Economic Geography research of importance both at a theoretical and empirical level. Historical Economic Geography explores how and why the location of economic activities changes across time and space. To do so, it combines methodologies from several social sciences including Economic History, Economic Geography, Human Geography, Economics and Econometrics.

The focus is on acquiring the necessary skills to engage in advanced analysis of historical economic geography evidence and understand how History and Geography can shape economic development. The course consists of nine two-hours seminars on specialised topics in historical economic geography and one preparatory research workshop. This course contents change from year to year following the recent developments in the discipline. The topics considered in this edition of the course are the following. 1) general problems of research with historical and spatial data; 2) the construction of historical-spatial data; 3) historical analysis of market integration: time-series and dynamic panels; 4) historical analysis of the spatial concentration of economic activities: measurement and determinants; 5) historical and spatial analysis of factor markets; 6) historical analysis of the local labour markets; 7) natural experiments in Historical Economic Geography: policies and shocks; 8) the evolution and measurement of regional inequality; 9) historical analysis of the urban space.

Teaching: 20 hours of computer workshops in the WT.

Formative coursework: Students will produce several short reviews of research papers and participate in the research workshop with an original project. The reviews' objective is to familiarize the students with the different methodologies and prepare them for their research projects. The research workshop will help them design the project and discuss its methodology. All formative coursework will receive written or oral feedback.

EH436 Half Unit Not available in 2024/25

Economic History of the Early Modern New World (The Americas)

This information is for the 2024/25 session.

Teacher responsible: Dr Alejandra Irigoin, SAR 6.11

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Financial History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). We hope to be able to provide places for all students that apply, but this may not be possible.

Course content: This course surveys the economic history of the expansion and interaction of Europeans in the Americas in the early modern period (1500-1820). It focuses on the role of the New World in the origin and development of the World Economy, modern Europe and Asia before modern economic growth. The course mirrors mainstream interpretations of economic development centred on European and Old World trajectories on the New World's, to explain the global Smithian growth of the region in the period. It also poses a reciprocal comparison for particular developments in North and South America, as an empirical test for theories of long run development based on institutional legacies of colonialism, culture and factor endowments.

Combining a thematic approach with a loose chronological sequence, the course discusses topics such as: 1) the New World in Eurasia's Great Divergence, 2) Demographics and Living standards, 3) Factor Endowments and Agriculture, 4) The production of global commodities, 5) Labour institutions and markets in mining and agricultural commodities, 6) The world demand for sugar and silver; consumption and markets; 7) Trade, finance and commercial institutions over the Atlantic and the Pacific oceans, 8) Colonialism and European mercantilism overseas, 9) governance, war and state capacity in the sovereign states 10) The legacy of colonialism in the long run: the divergence within the New World by 1820s and the Great Divergence revisited. More specific topics are: the interaction with aboriginal societies and the establishment of market relations; the Columbian exchange and the transfer of knowledge to and from Europe; the trade and reproduction of enslaved people; the scope for domestic and overseas markets, the colonial trade.

Teaching: 20 hours of seminars in the AT.

Formative coursework: Students are expected to write two essays or equivalent pieces of written work.

Indicative reading:

Assessment: Essay (100%, 4000 words) in the ST.

EH437

History of Global Finance

This information is for the 2024/25 session.

Teacher responsible: Professor Olivier Accominotti

Availability: This course is compulsory on the MSc in Financial History. This course is not available as an outside option.

Course content: This course introduces students to the history of the global monetary and financial system. It examines the main changes in the architecture of global finance and in the

governance of international monetary affairs from the very early times to the twenty-first century. The course explores the rise of international finance, the origins of financial globalization and de-globalization, and the causes and consequences of global financial instability for both advanced and emerging market economies.

The course provides the necessary long-run, historical perspective to understand the most recent developments in the international monetary and financial system and the related policy debate. As part of this course, students will also design and conduct one research project in financial history drawing upon archival sources or historical data. The project will prepare students for their research dissertation.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 2 essays in the AT and WT.

Indicative reading:

- Eichengreen, B. (2008). *Globalizing Capital: A History of the International Monetary System*. Princeton University Press.
- Eichengreen, B., Mehl, A., & Chitu, L. (2018). *How Global Currencies Work. Past, Present and Future*. Princeton University Press.
- Neal L. (2015). *A concise history of international finance*. Cambridge University Press.
- Reinhart C. & Rogoff K. (2009). *This Time is Different. Eight Centuries of Financial Folly*. Princeton University Press.
- Tooze, A. (2018). *Crashed: how a decade of financial crises changed the world*. Allen Lane.

Assessment: Exam (80%, duration: 2 hours) in the spring exam period.

Project (20%, 3500 words) in the WT.

EH438 Half Unit

History of Financial Markets

This information is for the 2024/25 session.

Teacher responsible: Dr Pamfili Antipa

Availability: This course is available on the MSc in Financial History. This course is not available as an outside option.

Pre-requisites: Some knowledge of statistics is useful but not strictly required.

Course content: This course explores the historical evolution of financial markets from the early times to the present. It covers the origins of securitisation and the gradual spread of financial asset tradability in different parts of the world. We analyse the gradual deepening of financial markets with the emergence of major stock exchanges in the Early Modern period. We study the rise of stock markets and the emergence of secondary markets for sovereign debt from the 18th to the 20th century. With these financial innovations came financial bubbles, crises, and crashes. We delve into the ongoing debates about their causes and origins. The course provides a long run perspective on important questions about the efficiency of financial markets, their international integration as well as their regulation and de-regulation. It also presents a historical comparison of the emerging market crises of the late 20th century, as well as the financial crisis of 2008.

Teaching: 20 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 presentation and 1 essay in the WT.

Students will be encouraged to form and work in groups, and to briefly present joint slide sets on the reading and the class question every week so as to continually obtain feedback. The formative essay topic will typically be chosen from one of the presentations and deepen one aspect further.

Indicative reading:

- Aliber, R., & Kindleberger, C. P. (2015). *Manias, panics and crashes: A history of financial crises*. Palgrave.

Assessment: Essay (100%, 4000 words) in the ST Week 1.

EH439 Half Unit History of Banking Systems

This information is for the 2024/25 session.

Teacher responsible: Dr Niccolo Valmori

Availability: This course is available on the MSc in Financial History. This course is not available as an outside option.

Course content: This course introduces students to problematics around the history of banking. It explores the rise of financial intermediaries over the centuries and how their role evolved from simple money changers to money creators via lending. Banks can sometimes fail; historical causes of these failures as well as macroeconomic consequences will be explored, going from the 19C through the Great Depression to the 21C. Countries have historically been aware of the central tension between the necessity to save a financial system from collapse and the imperative of no moral hazard created in the process. By looking at the evolution of crisis resolution and aspects of preventive regulation students will gain a deep understanding of the history of banking in the developed world.

Teaching: 20 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the WT.

Indicative reading:

- Tooze, A. (2018). *Crashed: How a Decade of Financial Crises Changed the World*. London: Penguin Books.
- Aliber, R., & Kindleberger, Charles P. (2015). *Manias, panics and crashes: A history of financial crises* (Seventh ed.). Palgrave.

Assessment: Essay (100%, 4000 words) in the WT Week 10.

EH441 Half Unit Not available in 2024/25 Macroeconomic History

This information is for the 2024/25 session.

Teacher responsible: Dr Jason Lennard

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research) and MSc in Financial History. This course is not available as an outside option.

Pre-requisites: A course in undergraduate econometrics
A course in undergraduate macroeconomics

Course content: This course studies the boom and bust of the business cycle in a historical perspective. The first part of the course covers the basics: how to define and measure business cycles, the costs of business cycles, the key business cycle facts, and theory and empirics in macroeconomic history. The second part explores propagation mechanisms, such as sticky prices and wages. The third part focuses on impulses, such as shocks to technology, financial crises, expectations and uncertainty, and monetary and fiscal policy.

The course examines advanced economies from the Industrial Revolution to the present. This interval of modern economic

history includes deep recessions, major financial panics, reversals of expectations, and episodes of nominal inertia.

Teaching: 20 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 presentation and a 2,000 word essay in the WT.

Indicative reading:

- De Bromhead, A., Eichengreen, B., and O'Rourke, K. H., 'Political Extremism in the 1920s and 1930s: Do German Lessons Generalize?', *Journal of Economic History*, 73 (2013), pp. 371–406.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

EH442 Half Unit Labour Markets in Historical Perspective

This information is for the 2024/25 session.

Teacher responsible: Prof Christopher Minns SAR 6.15

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course explores a selection of topics related to the history of labour markets. The course is divided into four parts.

The first part is an introduction to issues and concepts from economics and other social sciences relevant to understanding labour markets in the past.

The second part of the course focuses on the role of human and physical capital in determining long-run patterns in wage levels, productivity, and the adoption of new technology and forms of organization.

The third part of the course explores issues related to geographical mobility and economic development, with particular focus on international migration and the immigrant experience at the destination.

The fourth and final part of the course address disparities in historical labour markets, with particular attention to differences in inequality and economic mobility over space and by gender and race.

The course draws on findings from a range of historical contexts to illustrate how social scientists have used theories, methods, and evidence to understand labour market developments in the past, and in turn considers what these findings imply about the relevance of different social science approaches.

Teaching: 20 hours of seminars in the AT.

The course will be taught as 10 two-hour seminars during Autumn Term

Formative coursework: Students will be expected to produce 1 essay in the AT.

One 2,500 word formative essay in the Autumn Term.

Indicative reading: The following indicative readings preview course topics:

- Abramitzky and Boustan, *Streets of Gold* (2022)
- Bayer and Charles, "Divergent Paths: a New Perspective on Earnings Differences Between Black and White Men Since 1940." *Quarterly Journal of Economics* (2018)
- Goldin, *Career and Family: Women's Century-Long Journey Towards Equity* (2021)
- Goldin and Katz, *The Race Between Technology and Education* (2008)
- Hatton and Williamson, *The Age of Mass Migration: Causes and Economic Impact* (1998)
- Humphries and Weisdorf, "Unreal Wages? Real Incomes and Economic Growth in England, 1260-1850." *Economic Journal* (2019)

A detailed, article-based reading list will be provided at the beginning of Autumn Term.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

EH443 Half Unit

The History of Premodern Money

This information is for the 2024/25 session.

Teacher responsible: Prof Oliver Volckart SAR.6.10

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Financial History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access).

Course content: The course examines European monetary and financial policies up to the early eighteenth centuries. It takes students from the simple beginnings of European monetary history to the more complex arrangements that emerged toward the end of the early modern age. The course thus focuses on an age when the very parameters that shaped policies differed fundamentally from those of the present: For example, there were no currency borders, with money supply being essentially international, and small change was only weakly integrated with the larger units of its currency. The course will discuss and compare developments in the major European countries (England, Spain, Italy, France, and Germany). It emphasises both the many features shared by these countries and their often considerable differences, places monetary and financial policies in the context of more general economic policies and discusses how money and finance influenced the wider economy.

Teaching: 20 hours of seminars in the AT.

Formative coursework: Each student is expected to give one presentation (5-8 minutes) and to produce one formative essay. While the presentation will be based on secondary sources, the essay will discuss a primary source of the kind also used in the summative assessment.

Indicative reading:

- Volckart, Oliver. *The Silver Empire: How Germany Created its First Common Currency*. Oxford: Oxford University Press, 2024.

- Drelichman, Mauricio, and Hans-Joachim Voth. *Lending to the Borrower from Hell: Debt, Taxes, and Default in the Age of Philip II*. The Princeton Economic History of the Western World. Princeton: Princeton University Press, 2014.
- Redish, Angela. *Bimetallism: An Economic and Historical Analysis*. Cambridge: Cambridge University Press, 2000.
- Spufford, Peter. *Money and Its Use in Medieval Europe*. Cambridge, New York, Port Chester, Melbourne, Sydney: Cambridge University Press, 1991.

Assessment: Take-home assessment (100%) in January.

Students have 2 weeks to complete the assessment in early January. The assessment will be based on primary sources of the kind whose analysis has been practiced in the seminar every week as well as in the formative essay.

EH444 Half Unit

Population Dynamics and Economic Growth: A Historical Perspective

This information is for the 2024/25 session.

Teacher responsible: Prof Eric Schneider SAR.5.18

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Global Economic History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no specified pre-requisites, but the course requires comfort with quantitative analysis and basic knowledge of regression analysis. Quantitative Analysis in Economic History I (EH402) or an equivalent course is highly recommended.

Course content: For millennia, population and the available resources in an economy were in careful Malthusian equilibrium with population growth preventing meaningful increases in income per capita. In the premodern era, many people died in childhood, waves of epidemic disease ravaged the population, and women gave birth to many children. This course explores how this equilibrium changed, first through changes in marriage patterns in early modern Europe and later through the demographic transition, falling mortality and fertility rates in the past 250 years, a pattern that has been or is being replicated all around the world.

The course is divided into three units. The first unit covers the premodern era, assessing the role of epidemics, famine, marriage patterns and fertility control on population dynamics. The second unit will explore the health transition, the vast improvements in health and decline in mortality since roughly the nineteenth century. We will track the health transition across different dimensions of health, discuss the causes of the health transition and consider the effect of the health transition on economic growth. The third unit will focus on the historical fertility decline, the shift from high birth rates to replacement level birth rates.

We will explore theories of fertility decline, the historical evidence on the timing and speed of the fertility decline and the causes of fertility decline in Europe and other parts of the world.

In addition to these themes, the course also introduces the sources, methods and basic demographic indicators used to reconstruct population history. The focus of the course is mainly on historical Europe, but there will be some topics and weeks that bring in other regional or global perspectives.

Teaching: 20 hours of seminars in the WT. 1 hour of seminars in the ST.

Formative coursework: There will be one formative essay due in Winter Term.

Indicative reading:

- Livi-Bacci, M. (2017). *A Concise History of World Population* (6th ed.). John Wiley & Sons, Incorporated.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

EH446 Not available in 2024/25 Economic Development of East and Southeast Asia

This information is for the 2024/25 session.

Teacher responsible: Prof Kent Deng SAR 517

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MSc in China in Comparative Perspective, MSc in Development Studies, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus), MSc in International and Asian History, MSc in Political Economy of Late Development and MSc in Political Science (Global Politics). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply, but that may not continue to be the case.

Pre-requisites: Knowledge of Asian history of the relevant period and region would be an advantage.

Course content: EH446 is, in nature, a guided reading course. Students will obtain in-depth knowledge of conditions and paths of economic growth and development in East Asia and Southeast Asia in past centuries, and become engaged in the ongoing scholarly debate.

The first part of the course looks at premodern/traditional economic performance, including resource endowments, institutions, technology and economic structures that evolved independently in Asia over time to support a large population with reasonable standards of living.

The second part of the course examines early modern East Asia and Southeast Asia in the context of 'product-rich economies', and easy access to international trade, and Western colonisation of the region.

The third part examines modern growth in East Asia and Southeast Asia, including the conditions and transformations in post-Opium War China, Meiji Japan, post-WWII 'Asian Tigers', post-WWII independence in Southeast Asia, ASEAN, China under post-Mao reforms, and 'new Asia' in the global economy today. Main debates in scholarship are included as the course moves on.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. 10 hours of lectures and 10 hours of seminars in the WT. 1 hour of lectures in the ST.

This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn Term and Winter Term.

This course includes a reading week in Week 6 of Autumn Term and Week 6 of Winter Term.

Formative coursework: Students are expected to write two essays

or equivalent pieces of written work.

Indicative reading:

- A G Frank, *ReOrient: Global Economy in the Asian Age* (1998);
- K Pomeranz, *The Great Divergence* (2000);
- J M Hobson *Multicultural Origins of the Global Economy* (2021);
- World Bank, *The East Asian Miracle* (1993);
- I Brown, *Economic Change in Southeast Asia* (1997).
- Rui H and P. Nolan, *Globalisation, Transition and Development in China* (2004).

Assessment: Essay (30%, 3500 words).

Take-home assessment (70%) in the ST.

EH448 Half Unit Craft, Human Capital and Innovation in Europe, 1400-1800

This information is for the 2024/25 session.

Teacher responsible: Prof Patrick Wallis SAR 511

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is expected to be high. This may mean that you are unable to get a place on this course.

Course content: This course explores how innovation occurs in product, process and technique within a preindustrial artisanal economy. In the three centuries before the industrial revolution, European manufacturing improved markedly. Buildings, clocks, clothing, furniture, art, books, glass, paper and a plethora of other products and industries all show advances in their quality, variety, price and availability. This course examines the nature of this 'Industrial Evolution'.

The course is divided into two parts. We examine the main mechanisms that have been identified to explain innovation and dissemination: apprenticeship and training; print and codified knowledge; the alliance of early science and craft; clustering, mobility and spillovers. We then explore in depth a set of industry case studies that we use to test the viability of these ideas in different contexts. Each week, the seminar will centre on a set of readings for each topic. The course aims to give students an understanding of the key historical explanations for innovation and the diffusion of ideas, and to connect these to an informed understanding of specific craft industries.

Teaching: 20 hours of seminars in the WT.

Formative coursework: Students are expected to write one essay or equivalent pieces of written work.

Indicative reading:

- Mokyr, Joel (2002), *The Gifts of Athena: Historical Origins of the Knowledge Economy* (Princeton: Princeton University Press)
- Finlay, Prak, Maarten, and Patrick Wallis (eds.) (2019), *Apprenticeship in Early Modern Europe* (Cambridge: Cambridge University Press)

Assessment: Essay (100%, 4000 words) in the ST Week 1.

EH449 Half Unit

History of Corporate Finance and Institutional Investment

This information is for the 2024/25 session.

Teacher responsible: Professor David Chambers

Availability: This course is available on the MSc in Financial History. This course is not available as an outside option.

Course content: The course provides students with an understanding of how some of the major features of modern finance emerged from the 19th century onwards with a particular focus on the US and UK. There is a particular focus on the main changes in how firms have used modern capital markets over time and on the historical development of institutional investors.

Teaching: 20 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

AT to WT

Indicative reading:

Assessment: Essay (100%, 4000 words) in the ST.

EH452 Half Unit Not available in 2024/25

Latin American Development and Economic History

This information is for the 2024/25 session.

Teacher responsible: Dr Alejandra Irigoin, SAR 611

Availability: This course is available on the MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus), MSc in History of International Relations, MSc in International and World History (LSE & Columbia), MSc in Political Economy of Late Development and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply, but that may not continue to be the case.

Course content: The course will consider some of the major topics in the development and economic history of Latin America. The topics to be explored will be the role of geography, the environment and factor endowments, the role of institutions and policies, problems of taxation, spending and representation in the capacities of the state and constitutional and political developments in the 19th and 20th century, the protracted character of Latin America's inequality, the 'curse' from natural resources dependence, the macroeconomics of industrialization and the political economic nature of Latin American populism. Using reciprocal comparisons with the US, South East Asia, between Latin American countries, and across time the course will revisit the current interpretations of Latin American development in the long run and will frame the analysis of particular issues of policy-making of the present into the economic historical context.

Teaching: 20 hours of seminars in the WT.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students are required to write one essay or equivalent pieces of written work.

Indicative reading: V. Bulmer-Thomas, V (2014) *The economic history of Latin America since independence* 2nd ed Cambridge, Cambridge University Press. S. Edwards, 2010. *Left behind: Latin America and the false promise of populism*. Chicago: The University of Chicago Press. P. Franko, 2007. *The puzzle of Latin American economic development*. Breaking with history?* (Washington IRDB); Edwards, Esquivel, G & Marquez, G (2007) *The Decline of Latin American Economics: growth, institutions and crises* (Chicago University of Chicago)

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

EH463 Half Unit

The Long-Run Analysis of Firms and Industries

This information is for the 2024/25 session.

Teacher responsible: Dr Gerben Bakker SAR 509

Availability: This course is available on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MSc in Accounting, Organisations and Institutions, MSc in Economic History, MSc in Economic History (Research), MSc in Financial History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus) and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. This may mean that you are not able to get a place on this course.

Course content: This course comparatively explores the history of strategies, business organisations and industries since the nineteenth century. Different approaches to analyse this evolution are discussed, as well as the history of thinking about management and organisational structure and how this affected

history itself. Introductory lecture(s) set the scene, discuss key concepts and various economic approaches to analyse the evolution of organisations. Subsequently the course looks at the origins of legal forms of organisation - such as the corporation, the private limited liability company and the cooperative - at the development of organisational structures, at the history of thinking about them, and at evolution of the industries.

Teaching: This course is delivered through a series of seminars totalling 20 hours across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students are expected to write two essays or equivalent pieces of written work.

Indicative reading:

EH482

The Origins of the World Economy: Europe and Asia, 1000-1800

This information is for the 2024/25 session.

Teacher responsible: Dr Jordan Claridge (Room SAR 5.05) and Dr Annie Ruderman (Room SAR 5.06)

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in China in Comparative Perspective, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus), MSc in International and Asian History and MSc in Political Economy of Late Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply, but that may not continue to be the case.

Course content: This course surveys long-term processes of growth and development in pre-modern Europe and the wider world. Its central question is how and why economic performance differed between differently structured societies and across societies at the same point in time. The course raises fundamental questions about the nature of pre-industrial societies and economies and it critically examines the numerous theories put forward to explain long-run economic change.

First, it asks if stagnation and poverty were normal conditions in pre-industrial societies and growth an aberration. Were societies 'Malthusian', and what kind of growth and development did they experience? Second, it addresses debates over the timing and causes of Western economic growth and its connections with the region's expanding political and military power. Was British or European success from the 17th century the result of unique social, institutional, or cultural features? It focuses on the developments of markets and their integration, on the development of technology and on the extension of manufactory in a fundamentally agrarian world. Third, it explores the range of alternative development paths within Europe and in other regions of the world, such as premodern China and India, considering both regions' internal economic dynamics and the impact of interactions with European powers as contact grew over the course of the early modern period.

The course is not chronologically arranged but rather along core topics relevant in economic history. These are presented and discussed in an explicitly comparative way. Themes include: population, agriculture, technology, manufacturing, labour regimes, economic effects of legal, political, and constitutional structures; political economy; trade and market integration, money, finances and commercial institutions, and the causes and effects of the European expansion overseas.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. 10 hours of lectures and 10 hours of seminars in the WT.

This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn Term and Winter Term.

This course includes a reading week in Week 6 of Autumn Term and Week 6 of Winter Term.

Formative coursework: Students are expected to write three essays or equivalent pieces of written work.

Indicative reading:

EH483

The Development and Integration of the World Economy in the 19th and 20th Centuries

This information is for the 2024/25 session.

Teacher responsible: Dr Karolina Hutkova

Availability: This course is available on the MA in Modern History, MSc in Accounting, Organisations and Institutions, MSc in Economic History, MSc in Economic History (Research), MSc in Empires, Colonialism and Globalisation, MSc in Global Economic History, MSc in Global Economic History, MSc in Global Economic History (Erasmus Mundus), MSc in Political Economy of Late Development and MSc in Political Science (Global Politics). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: This course aims to provide an overview of the development and integration of the world economy from 1800 to the present, giving an understanding of the origins of the challenges we face in the 21st century. The course raises fundamental questions about the sources of the unprecedented levels of economic growth in the last two centuries and the past and present challenges to economic development that have led to sharp divergences in income between countries and regions. The course explores the economic history at a global level, exploring developments in the western world as well as in Latin America, East and Southeast Asia, and Africa. Topics discussed will include fundamental transformations in economic experience, such as income and inequality, environmental change and the rise of population; sources of progress, such as technology, science, fiscal development; and explanations for divergent outcomes, for example human capital, economic policy, and management.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. 10 hours of lectures and 10 hours of seminars in the WT.

This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Michaelmas Term and Lent Term.

This course includes a reading week in Week 6 of Michaelmas Term and Week 6 of Lent Term.

Formative coursework: - One essay in AT
- Group presentation and essay outline in WT

Indicative reading: Broadberry, S. and O'Rourke, K.H. (eds.) (2010), *The Cambridge Economic History of Modern Europe*; Acemoglu, D., and Robinson, J.A. Assessment: Take-home assessment (100%) in the ST.

EH496

Research Dissertation A: Contextualisation, Theory and Research Design

This information is for the 2024/25 session.

Teacher responsible: Prof Christopher Minns SAR 6.15

Availability: This course is compulsory on the MSc in Economic History (Research). This course is not available as an outside option.

This course is taken in combination with EH497.

Course content: The dissertation must draw upon the research training provided through the core courses for the MSc (Research) and the generic courses taken by the student, and present the results of an original enquiry into a carefully defined problem. Students are expected to show an ability to draw on relevant social scientific concepts, an understanding of the advanced literature in one or more areas of economic history, and of the nature of historical explanation and analysis. Where appropriate, students are also expected to show the ability to use relevant quantitative techniques for data collection and analysis. The dissertation is intended as preparation for a research degree. Students expecting to continue on the MPhil/PhD programme within the Department may write their MSc dissertation on a different topic from that on which they plan to research at MPhil/PhD level.

Teaching: Co-taught with EH497.

Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department and, individually, from their supervisors. There will be several taught sessions in Autumn Term for all students on the programme in addition to meetings with supervisors during the course of the year.

Formative coursework: Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Winter Term (3) a presentation at a dissertation workshop; (4) a one-page project summary and an extended draft by the end of the Spring Term. Supervisors will not normally provide comments on drafts submitted after that date.

Assessment: Dissertation (100%, 15000 words) in the post-spring term.

The final dissertation, is equivalent to two full modules (EH496 and EH497). The dissertation will be marked on the formulation of the dissertation topic, its historical and historiographical context (including critical literature survey), its creativity and originality, and overall presentation. In addition, student's will be assessed on research design and discussion of methods, their collection and evaluation of primary and secondary sources, and the quality of analysis of evidence and interpretation. The dissertation should not exceed 15,000 words, excluding tables, references and bibliography. Presentation must be in accordance with appropriate academic conventions as laid down in the MSc Handbook. Work that fails to meet appropriate academic standards of presentation, including English language, will be subject to a maximum deduction of 15% from the first percentage mark. Marks will be deducted for late submission in accordance with the guidelines laid down in the MSc student handbook.

EH497

Research Dissertation B: Implementation, Analysis and Contribution

This information is for the 2024/25 session.

Teacher responsible: Prof Christopher Minns SAR 6.15

Availability: This course is compulsory on the MSc in Economic History (Research). This course is not available as an outside option.

This course is taken in conjunction with EH496.

Course content: The dissertation must draw upon the research training provided through the core courses for the MSc (Research) and the generic courses taken by the student, and present the

results of an original enquiry into a carefully defined problem. Students are expected to show an ability to draw on relevant social scientific concepts, an understanding of the advanced literature in one or more areas of economic history, and of the nature of historical explanation and analysis. Where appropriate, students are also expected to show the ability to use relevant quantitative techniques for data collection and analysis. The dissertation is intended as preparation for a research degree. EH498 Half Unit Dissertation

This information is for the 2024/25 session.

Teacher responsible: Prof Christopher Minns SAR 6.15

Availability: This course is available on the MSc in Economic History and MSc in Political Economy of Late Development. This course is not available as an outside option.

Course content: The subject of the dissertation should relate broadly to one of the economic history taught courses taken by the student. It should be either a critical survey of a well-defined problem in the literature, or a small self-contained research project using primary evidence. It must demonstrate adequate knowledge of appropriate literature in Economic History and an ability to handle problems of evidence and explanation.

Students on the MSc in Political Economy of Late Development are encouraged to consider topics that relate to themes in development, but are still required to develop a clear historical perspective within their analysis.

Students on the MSc in Global Economic History are encouraged to consider topics that relate to themes in global economic history, broadly conceived.

Teaching: Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department and, individually, from their supervisors. There will be several taught sessions in Autumn Term for all students on the programme in addition to meetings with supervisors during the

course of the year.

Formative coursework: Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Winter Term (3) a one-page project summary and an extended draft by the end of the Spring Term. Supervisors will not normally provide comments on drafts submitted after that date.

Assessment: Dissertation (100%, 6000 words) in the post-spring term.

The dissertation should be no longer than 6,000 words, excluding tables, references and bibliography. Marks will be deducted for late submission or excessive length.

EH499 Research Dissertation

This information is for the 2024/25 session.

Teacher responsible: Prof Christopher Minns SAR 6.15

Availability: This course is compulsory on the MSc in Financial History and MSc in Global Economic History. This course is available on the MSc in Economic History and MSc in Political Economy of Late Development. This course is not available as an outside option.

Course content: The dissertation should be an empirical study using primary source material to write on a topic of economic history. The topic should relate broadly to one of the economic history courses taken.

Students on the MSc in Political Economy of Late Development are encouraged to consider topics that relate to themes in development, but are still required to develop a clear historical perspective within their analysis.

Students on the MSc in Global Economic History are encouraged to consider topics that relate to themes in global economic history, broadly conceived.

Students on the MSc in Financial History are encouraged to consider topics that relate to monetary and financial problems in an historical context.

Teaching: Starting in the first term, students will receive advice on choosing a topic and how to tackle it, both from the Department and, individually, from their supervisors. There will be several taught sessions in Autumn Term for all students on the programme in addition to meetings with supervisors during the course of the year.

Formative coursework: Students are expected to complete a sequence of preparatory stages during the year. (1) The title must be approved by the student's supervisor; (2) an outline of the Essay must be submitted in Winter Term (3) a one-page project summary and an extended draft by the end of the Spring Term. Supervisors will not normally provide comments on drafts submitted after that date.

Assessment: Dissertation (100%, 10000 words) in the post-spring term.

The dissertation should not exceed 10,000 words, excluding tables, references, and bibliography. The title must be approved in advance by the student's supervisor. Marks will be deducted for late submission or excessive length.

EU410 Interdisciplinary Research Methods and Design

This information is for the 2024/25 session.

Teacher responsible: Prof Jonathan White CBG.7.09

Availability: This course is compulsory on the MSc in Culture and Conflict in a Global Europe and MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po). This course is available on the MSc in Culture and Conflict in a Global Europe (LSE & Columbia).

This course is not available as an outside option.

The Moodle page can be accessed by any European Institute student.

This course is only available to European Institute students.

Course content: This series of lectures and workshops offers an introduction to research methods and design for students on the MSc Culture and Conflict in a Global Europe programmes within the European Institute. Themes discussed include: methods in the social sciences and in the humanities; common problems of research design; advice on writing dissertations; advice on critical reading and interpretation of texts; an overview of comparative method and case-study research; and an introduction to discourse analysis and qualitative coding. Each session will consist of lecture elements followed by group work in which students with their different backgrounds will work together to solve specific problems of research design.

Teaching: This course is delivered via online and/or in-person teaching totalling a minimum of 10 hours spread across the Autumn Term. This course includes a reading week in Week 6 of the Autumn Term.

Indicative reading: Bob Hancké, *Intelligent Research Design: A guide for beginning researchers in the social sciences*, Oxford UP 2009.

Assessment: There is no examination for this course.

EU421 Half Unit Policy-Making in the European Union

This information is for the 2024/25 session.

Teacher responsible: Dr Eiko Thielemann

Availability: This course is available on the MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Media and Communications (Media and Communications Governance), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Pre-requisites: A solid knowledge of the role and functions of EU institutions is required.

Course content: This course offers the theoretically informed study of EU policy-making across a selection of key issue areas. The principal aim of the course is to provide a detailed understanding of how national and EU institutions interact in European policy-making. To achieve this, the course starts with a short summary of the actors and institutions governing the process of EU policy-making. The main part of the course analyses the evolving role of the EU in key policy areas, including economic and monetary policies, the EU single market, immigration and asylum policies, social policy and European foreign policy.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term, and a review session will be held at the start of the Spring Term to help students prepare for the e-exam.

Formative coursework: Students will be expected to submit two formative essays.

Indicative reading:

- H Wallace, M Pollack, C Roederer-Rynning & A Young, *Policy-Making in the European Union*;
- H. Lelieveldt & S Princen, *The politics of the European Union*;
- S Hix & B. Hoyland, *The Political System of the European Union*;
- M Pollack, *The Engines of Integration: Delegation, Agency and Agenda Setting in the European Union*;
- J J Richardson & S Mazey, *European Union: Power and Policy-making*.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

The summative assessment will take the form of an e-exam in the Spring Term. E-exams are assessments run under invigilated exam conditions on campus. Students will complete the assessment using software downloaded to their personal laptops.

EU430 Half Unit Not available in 2024/25 Europeanization: The Comparative Politics of Domestic Change

This information is for the 2024/25 session.

Teacher responsible: Professor Yaprak Gursoy CBG 7.04

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Course content: The course examines the effect of European Union membership on member states' policies, institutions and societies. The consequences of EU membership, as well as how and why we experience membership differently across our national political systems are increasingly important elements of the debate about the future of Europe. Crises of legitimacy, capability, and impact have been identified. Following this lead, this course evaluates the influence of European integration on member states, highlighting differences between policy mechanisms and sectors; institutional capacities and settings; and political (party and electoral) behaviour. The discussion and analysis is framed by the notion of 'Europeanization', to consider the linkages between the European and national levels.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce one formative essay (2000 words) and a presentation in the AT.

Indicative reading:

- Graziano, P. and Vink, M.P. (eds) (2006) *Europeanization: New Research Agendas*, Palgrave Macmillan;
- Exadaktylos, Claudio M. Radaelli (2012) *Research Design in European Studies: Establishing Causality in Europeanization* Palgrave;
- Bulmer, S. and Lesquesne, C. (eds) (2013) *The Member States of the European Union*, Oxford: Oxford University Press;
- Sanders, D (2012) *The Europeanization of National Politics?* Oxford University Press;
- K Featherstone & C Radaelli (Eds), *The Politics of*

Europeanization; Oxford University Press, (2003);

- K Goetz & S Hix (Eds), *Europeanised Politics? European Integration and National Political Systems*, Frank Cass, (2001);
- M Green Cowles, J Caporaso & T Risse (Eds), *Transforming Europe: Europeanization and Domestic Change*, Ithaca, Cornell UP;
- F. Schimmelfennig and U. Sedelmeier (eds) (2005) *The Europeanization of Central and Eastern Europe*, Ithaca: Cornell University Press.

Assessment: Essay (100%, 5000 words) in the WT.

EU432 Half Unit

The Philosophy of Europe

This information is for the 2024/25 session.

Teacher responsible: Prof Simon Glendinning CBG 7.01

Availability: This course is available on the CEMS Exchange, MA in Modern History, MBA Exchange, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: In this course we will read and discuss texts that draw the history of Europe into relation with philosophy. In its most classical form the assertion of this relation belongs to an understanding of Europe's history as inseparable from the project of a life predicated on reason. Europe, insofar as its cultural identity is caught up with the Greek ideal of scientific rationality, is not simply the place where philosophy was first elaborated and developed. On the contrary, Europe first arises as a place only in and through the elaboration and development of philosophy. Of course, philosophy is, in that name, a European phenomenon - although one which concerns above all the question, in principle open to anyone, of what it means to be a human being as such. Equally, however, Europe is itself a philosophical phenomenon - its identity inseparable from the idea of a project that concerns rational animality as such, and hence humanity as a whole.

The idea that Europe has a world-wide significance in virtue of its relation to philosophical thought is strikingly expressed in Kant's prediction of "a great political body of the future" emerging in Europe, a kind of league of nations, that will probably "legislate" - that is, at least serve as a guiding example - for all humanity. Indeed, the global "cosmopolitan existence" posited by Kant as the final end of world history is not just a philosopher's idea of humanity's collective political destiny: the very idea of a universal human community is essentially philosophical. On this view, the (particular) history of the peoples of "our continent" has a relation to the (universal) destiny - the liberation or emancipation - of humanity world-wide. This is not simply because of the hegemonic political and economic ambitions of imperialist Europeans, but the world-wide movement of a cosmopolitan and humanist culture. Starting with Kant's classic essay on "Idea for a Universal History with a Cosmopolitan Purpose" we will turn to the way in which Europe is understood and elaborated within the post-Kantian tradition: in Hegel, Marx, Husserl, Valéry, Berlin, Fukuyama, and Derrida.

Although this course focuses on carefully selected philosophical texts, there is no expectation that students taking the course will have a background in philosophy.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: Two essays of 2,000 words each

Indicative reading: Immanuel Kant 'Idea of Universal History with a Cosmopolitan Purpose', in *Political Writings*; Edmund Husserl 'The Vienna Lecture', in *The Crisis of European Sciences and Transcendental Phenomenology*; Paul Valéry, 'The Crisis of Spirit' in *History and Politics*; Jacques Derrida, 'Of the Humanities and the Philosophical Discipline. The right to philosophy from the cosmopolitical point of view (the example of an international institution)' (online).

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU437 Half Unit

Europe Beyond Modernity

This information is for the 2024/25 session.

Teacher responsible: Prof Simon Glendinning CBG 7.01

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in International Relations (Research), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: This course engages with the deepest roots and fundamental trajectory of the contemporary European world as identified by three major thinkers of the nineteenth and twentieth centuries: Nietzsche, Heidegger and Derrida. Taking up and problematising the claim made by Emmanuel Levinas that "Europe is the Bible and the Greeks", the course explores the idea that Europe today is a cultural and political movement in deconstruction, a movement beyond its own modern self-understanding which might be summarised by Nietzsche's madman's pronouncement of the death of God. As Derrida, a leading theorist of this conception puts it, "one should, more prudently, say "Greek, Christian and beyond" to conceive the formation of the contemporary European heritage. This suggestion not only makes it possible to acknowledge many other important cultural sources in this heritage (Judaic and Islamic at the very least) but also, and above all, directs us toward what, in Nietzsche's wake, can be identified as "the passage beyond" - the movement in which the European tradition "tends of itself to break with itself". There is no suggestion that the heritage and future of Europe are disconnected in this "passage beyond", and none of the authors explored in this course seek to reject the European heritage or want simply to destroy it. On the contrary, and always in its name, the attempt is made in their writings to effect a renewal of the European world which could propel it in a new direction beyond Enlightenment modernity. The key themes in this renewal will be explored in relation to a "beyond modernity" condition becoming visible in philosophy, politics, technology and religion. Although this course focuses on carefully selected philosophical texts, there is no expectation that students taking the course will have a background in philosophy.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: Two 2,000 word essays; seminar presentation.

Indicative reading:

- Friedrich Nietzsche, *Beyond Good and Evil*
- Martin Heidegger, *The Question Concerning Technology*
- Jacques Derrida, "Faith and Knowledge" in *Religion* (eds Derrida and Vattimo)
- Robert Pippin, *Modernism as a Philosophical Problem*.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU437 EU440 Half Unit

The Balkans in Europe: Transition, Democratisation, Integration

This information is for the 2024/25 session.

Teacher responsible: Dr Vassilis Monastiriotis CBG 5.05 and Dr Spyridon Economides

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: An examination of South East Europe from a political economy and international relations perspective, with particular emphasis on post-1989 developments. Topics include: The Balkans in Europe and Historical Legacies; the Dissolution of Yugoslavia; The Western Balkans and economic transition; the EU and the Balkans: regionalism and economic integration; Democratisation, state-building and Europeanisation in the Western Balkans; Conditionality and the mechanics of accession; the SEE2020 strategy and the structural reforms agenda; the Balkans and other external actors.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: One 1,500 word essay.

Indicative reading:

- M. Todorova, *Imagining the Balkans*, Oxford University Press, 1997;
- M. Glenny, *Balkans 1804-1999. Nationalism, War and the Great Powers*, Granta Publishers, 1999;
- S Woodward, *Balkan Tragedy*, Brookings Institute, 1995;
- Lavigne M. (1999), *The Economics of Transition*, 2nd edition;
- Petrakos G. and Totev S. (eds) (2001), *The development of the Balkan region*, Aldershot; S. Ramet, *Thinking about Yugoslavia: Scholarly Debates about the Yugoslav Breakup and the Wars in Bosnia and Kosovo*, Cambridge University Press, 2005;
- Bartlett W. (2007), *Europe's Troubled Region: Economic Development, Institutional Reform, and Social Welfare in the Western Balkans*, Routledge; 160
- A. Elbasani, *European Integration and Transformation in the Western Balkans: Europeanization or business as usual?*, 160 Routledge, 2013;
- Anastasakis O., Sanfey P. and Watson M. (eds) (2013), *Defining a New Reform Agenda: paths to sustainable convergence in South*

East Europe, South East European Studies at Oxford, St Antony's College, University of Oxford; EBRD (2013),

- *Stuck in Transition?*, Transition Report 2013, European Bank for Reconstruction and Development, London.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU443 Half Unit

European Models of Capitalism

This information is for the 2024/25 session.

Teacher responsible: Assistant Professor Donato Di Carlo

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is not available as an outside option.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Course content: The course studies capitalist systems in Europe drawing on literatures in comparative and international political economy, economic sociology, economics and political science. It introduces the key conceptual and methodological tools of comparative capitalism studies and how they can help to analyse the structure and dynamics of the main European models of capitalism. We will then use comparative perspectives on capitalism to discuss the contemporary challenges facing the advanced economies of Europe: financial crises, the green transition, the changing role of the state in the economy, the 'polycrisis' of Covid-19, security challenges and the climate emergency, and other contemporary themes. The underlying theme of the course is to understand how European economies have developed and reshaped themselves along with changing global circumstances in recent decades, and discuss how economic policies and institutions can address the dilemmas facing market economies in the 21st century.

Teaching: This course will be delivered through weekly lectures and seminars totalling a minimum of 25 hours during Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will write a short 1500-word essay during the Winter term. Students will also develop their summative essay plan with the teacher in Winter term.

Indicative reading:

- *Diminishing Returns. The New Politics of Growth and Stagnation*. Edited by Luccio Baccaro, Mark Blyth and Jonas Pontusson. New York, NY: Oxford University Press, 2022
- Peter A Hall & David Soskice (Eds), *Varieties of Capitalism: The Institutional Foundations of Competitiveness*. Oxford University Press, 2001;
- Crouch, Colin, *Capitalist Diversity and Change*, Oxford University Press, 2005;
- Hancké, Bob (ed.), 2009, *Debating Varieties of Capitalism: A Reader*, Oxford UP.
- Wolfgang Streeck, (2011) *E Pluribus Unum? Varieties and Commonalities of Capitalism*, MPIfG Discussion Paper No. 10/12;
- Natasha van der Zwan (2014) *Making sense of financialization*, *Socio Economic Review*, 12: 99-129;
- Kathleen Thelen, (2014) *Varieties of Liberalization and the New Politics of Social Solidarity*, Cambridge University Press;

- Colin Hay, Does Capitalism Still Come in Varieties? Review of International Political Economy, Volume 27, 2020.

Assessment: Essay (100%, 3300 words) in the ST.

Essay questions will be distributed in early Winter Term, and essay outlines and other relevant questions will be developed with the course convener or seminar teacher.

EU446 Half Unit

The Political Economy of European Monetary Integration

This information is for the 2024/25 session.

Teacher responsible: Prof Paul De Grauwe

Availability: This course is available on the MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Political Science (Political Science and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Pre-requisites: A basic understanding of macroeconomics is essential, which is why the auditing of the EU409 Moodle course is highly recommended.

Course content: The purpose of this course is to analyse the process of European monetary integration and its implications for the institutions of economic governance in the EU. There will be a strong emphasis on using the experience of the financial and economic crises since 2008 and the COVID-19 pandemic as sources of evidence to assess both the performance of EMU and the theories about monetary integration. We consider the political and economic rationale for the establishment of EMU. We study the theory of optimal currency areas and its relevance today. In particular, we study the incomplete nature of the Eurozone and how this incompleteness is a source of instability. Indicative questions addressed in this course include: how and why did the EU develop the EMU project? Did economic theories prepare us for the Euro area crisis of 2010-12? What are the challenges for member states in adjusting to the discipline of the 'Euro-zone'? How does the Euro affect the ability of member states to adjust to periods of crisis and to external shocks, in particular to a shock such as the COVID-19 pandemic? Is the sovereign debt crisis of 2010 indicative of imbalances within the EU and basic flaws in its institutional design? What are the collective action problems that explain the incompleteness of the monetary union? What is the role of the ECB in this process? Is a fiscal union necessary to make a monetary union sustainable in the long run?

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: One 2,000-word essay and one group essay of up to 3,000 words.

Indicative reading:

- Paul De Grauwe (2022) *The Economics of Monetary Union* (Oxford University Press, 14th ed.);
- Kenneth Dyson and Kevin Featherstone (1999) *The Road to Maastricht*, OUP;
- Waltraud Schelkle (2017) *The Political Economy of Monetary Solidarity, Understanding the Euro Experiment*, Oxford University

Press;

- Special issue (2006): 'Economic Governance in EMU Revisited', *Journal of Common Market Studies* vol.44, No.4 (November);
- Stefan Collignon, "The European Republic; Reflections on the Political Economy of a European Constitution". The Federal Trust, London, England, 2002. Download from www.stefancollignon.de

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU447 Half Unit

Democracy, Ideology and the European State

This information is for the 2024/25 session.

Teacher responsible: Prof Jonathan White

Availability: This course is available on the MA in Modern History, MSc in Comparative Politics, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: This course investigates various ways in which the State's authority to act has been underpinned in Europe, both ideologically and institutionally, in the modern period. It looks at how the State has been used to give expression to the democratic principle, and the ways this has been undermined or rejected. The module aims to provide students with a deep analytical understanding of the changing role of the State in European society. There will be three parts: A) Theorising the political; B) Democracy in post-War Europe; and C) Contemporary European trends. The course will conclude with an overview on possible trajectories to come, under the heading 'post-ideological, post-democratic and post-statal? - Europe today and beyond'.

Teaching: 20 hours of seminars in Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

A review session will be held at the start of the Spring Term.

Formative coursework: One 1500 word unassessed essay
One 10-12 minute class presentation

Indicative reading:

- Quentin Skinner (1989) 'The State', in Ball and Hanson (eds.) *Political Innovation and Conceptual Change* (Cambridge UP)
- Peter Wagner (2008) *Modernity as Experience and Interpretation* (Polity)
- James Tully (2002) 'The Unfreedom of the Moderns', *Modern Law Review* 63
- Margaret Canovan (2005) *The People* (Polity)
- Michael Freeden (1996) *Ideologies and Political Theory* (Oxford UP)
- Claus Offe (1996) *Modernity and the State: East and West* (Polity)
- Chantal Mouffe (2005) *On the Political* (Verso)
- Nina Eliasoph (1998) *Avoiding Politics* (Cambridge UP)
- Peter Mair (2006), 'Ruling the Void? The Hollowing of Western Democracy', *New Left Review* 42
- Jonathan White (2022), 'The De-institutionalisation of Power beyond the State', *European Journal of International Relations* 28
- Jonathan White (2019), *Politics of Last Resort: Governing by Emergency in the European Union* (Oxford UP).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

The summative assessment will take the form of an e-exam in the

Spring Term. E-exams are assessments run under invigilated exam conditions on campus. Students will complete the assessment using software downloaded to their personal laptops.

EU450

Engaging with Europe: Professional Skills

This information is for the 2024/25 session.

Teacher responsible: Dr Jennifer Jackson Preece CBG.7.05

Availability: This course is compulsory on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

This course is only available to European Institute Students.

Course content: This innovative programme introduces European Institute students to professional skills for a successful career that engages with Europe. The course consists of a number of workshops, seminar series and interactive simulations from which students can choose. The aim of the course is that European Institute students leave LSE with a competitive CV and connections with alumni and professionals.

Teaching: EU450 sessions are offered in both the Autumn and Winter Terms. The teaching format and hours for each session will vary across the different workshops and seminars on offer. Details about how to sign up for a place on sessions of interest will be provided during Welcome.

PLEASE NOTE: Students are **not** required to attend all workshops and seminars on offer and listed on the timetable. Students only need to attend those sessions for which they have signed up to attend and for which they have received a confirmed place.

Formative coursework: Formative work will vary based on the workshops attended.

Assessment: There is no examination for this course. Students will qualify for a certificate of participation for some workshops upon completion of formative work.

EU453 Half Unit

The Political Economy of Welfare States and Migration in Europe

This information is for the 2024/25 session.

Teacher responsible: Dr Angelo Martelli

Availability: This course is available on the MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Political Science (Political Science and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically high. Priority is given to students from the

European Institute, so students from outside this programme may not get a place.

Course content: The aim of the course is to apply concepts of economics and political economy to social policies in European welfare states and migration. The lectures establish the theoretical context, summarise the findings of quantitative case studies and discuss European experiences in the context of broader international experience. The seminars will further develop political-economic concepts, such as market and government failure, and apply them to qualitative case studies of welfare state arrangements in member states, considering in particular the role of social policy legislation and coordination at the EU level. We rely on the main models used to explain the migration decision and explore the main economic effects of migration and its welfare state nexus. The course will provide students with the conceptual and empirical background to enable them to answer questions such as: What does economic theory and political economy tell us about the design of welfare states? How do social policies in European welfare states reconcile equity and efficiency? What drives or stalls reform dynamics in member states? Is the EU gradually developing into a social union, through international mobility and the portability of social entitlements? What does a globally coordinated governance of migration entail?

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 27.5 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term, and a review session will be held at the start of the Summer Term to prepare for the final assessment.

In addition to standard lectures and seminars, there will be a simulation of G-20 negotiations on migration near the end of Winter Term, played over 2.5 hours. The simulation will see students working in teams to represent the interests of particular nations and international organisations involved in global migration governance. A review session will be held at the start of the Summer Term to prepare for the final assessment.

Formative coursework: Students will be expected to produce 1 presentation and 1 short formative essay (1200 words).

Indicative reading:

- Barr, N. (2020) *The Economics of the Welfare State*, 6th ed., Oxford: Oxford UP;
- Anderson, Karen (2015) *Social policy in the European Union*. Palgrave, 2015.

- Roy, A. D. (1951) "Some Thoughts on the Distribution of Earnings," *Oxford Economic Papers* (New Series), 3, 135-146.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

The summative assessment will take the form of an e-exam in the Spring Term. E-exams are assessments run under invigilated exam conditions on campus. Students will complete the assessment using software downloaded to their personal laptops.

EU455 Half Unit

Concepts in Political Economy

This information is for the 2024/25 session.

Teacher responsible: TBC

Availability: This course is available on the MPhil/PhD in European Studies, MSc in Global Economic History (Erasmus Mundus), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Course content: The aim of the course is to engage students with relevant concepts in political economy and their main applications in European studies. The course will anchor the degree in historical and current debates about the nature of political economy, the role of institutions and the pros and cons of different methodological approaches taken by political economists. The aim of the lectures is to outline key political economy concepts and their theoretical background while the seminars explore the uses and limits of the respective concepts through the systematic analysis of relevant research papers.

This course is particularly recommended for students who wish to pursue a research path in political economy, but also for those who have no background in political science and therefore not familiar with conceptual debate. EU455 is also one of the three core course options for the MSc Political Economy of Europe, two of which must be chosen.

Among the topics covered are: concepts and theories in political economy; the role of ideas, interests and institutions; the tension between democracy and capitalism; rational choice versus behavioural political economy; two-level games; delegation to independent agents; accountability and legitimacy in policy-making; veto players and joint-decision traps; representation and partisanship; crises and crisis-management.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: One formative essay of 1,200 words on a seminar question based on a presentation in class.

Indicative reading: Caporaso, J and Levine, D (1992) *Theories of Political Economy*, Cambridge; Olson, M (2000) *The Rise and Decline of Nations*, London: Yale University Press.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU457 Half Unit

Culture and Security in Global Politics

This information is for the 2024/25 session.

Teacher responsible: Dr Jennifer Jackson Preece CBG 7.05

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human

Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Political Science (Global Politics). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: This course will explore the relationship between culture and (in)security with a particular focus on the (in)security dilemmas of minorities and migrants within a world of nation-states. In so doing, our discussion will draw upon a variety of theoretical perspectives within security studies.

Teaching: This course is delivered through a combination of seminars and workshops totalling a minimum of 24 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: Essay (1200 words) due in Winter Term.

Indicative reading:

- Z. Bauman, *Wasted Lives: Modernity and Its Outcasts*, 2003;
- B. Buzan, O. Weaver and J. de Wilde, *Security: A New Framework For Analysis*, 1998;
- J. Jackson-Preece, *Minority Rights: Between Diversity and Community*, 2005;
- W. Kymlicka, *Multicultural Odysseys: Navigating the New International Politics of Diversity*, 2009;
- J. Mayall, *Nationalism and International Society*, 1990.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU458 Half Unit

Narrating Migration in a Global Europe

This information is for the 2024/25 session.

Teacher responsible: Dr Jennifer Jackson Preece CBG 7.05

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy and MSc in International Migration and Public Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: This course is concerned with cultural and identity politics in contemporary states. Taking a narrative approach, this course will examine competing representations of migrants and post-migration communities. Europe will be a major focus. Nevertheless, students with interests and expertise outside of Europe should feel free to include this wider perspective in their seminar discussions and assignments.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: Students are required to submit an essay (1200 words) in the Autumn Term.

Indicative reading:

- Z. Bauman, *Wasted Lives: Modernity and Its Outcasts*, 2003;

- B. Buzan, O. Weaver and J. de Wilde, *Security: A New Framework For Analysis*, 1998;
- J. Jackson-Preece, *Minority Rights: Between Diversity and Community*, 2005;
- W. Kymlicka, *Multicultural Citizenship*, 1995;
- C. K. Riessman, *Narrative Methods for the Human Sciences*, 2008;
- G. Rose, *Visual Methodologies: An Introduction to Researching With Visual Materials*, 2012.

A more detailed reading list is available from Dr Jackson-Preece.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU464 Half Unit

International Migration: EU Policies and Politics

This information is for the 2024/25 session.

Teacher responsible: Dr Eiko Thielemann

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Pre-requisites: A good knowledge of EU institutions and EU policy-making is required.

Course content: This course examines attempts to manage 'unwanted migration' to Europe. In particular, it deals with the European Union's governance of migratory flows such as asylum seekers and irregular migrants whose arrival states often seek to prevent or discourage. As the willingness of sovereign states to advance global governance in the area of immigration policy remains low and unilateral national policy-responses are limited in their effectiveness, interest in regional governance initiatives has grown. The European Union is usually viewed as the most advanced regional governance organisation that seeks to regulate, manage and control international migration flows. The course provides an in-depth treatment of the origins, evolution and major policy issues within asylum and immigration arena, which has been the fastest growing EU policy area since the 1990s. The course will normally focus on the following three policy areas: (1) the emerging EU asylum and refugee determination system; (2) border management, detention and deportation; and (3) responsibility allocation (the 'Dublin system'), burden-sharing and solidarity.

Students taking the course will learn how to systematically examine the origins and impact of EU policy instruments (as well as judgments by the European Courts). After completion, students will have gained insights into evidence-based policy making and be able to answer questions such as: Why, despite sovereignty concerns, have Member States dramatically intensified cooperation on asylum and immigration issues? What is the relationship between national asylum & immigration policies, international human rights instruments and EU law? Given the

influence of the EU's supranational institutions, do the Member States still effectively control policies on asylum and immigration? Has EU policy-making lead to a convergence of policies at the "lowest common denominator" or has EU governance lead to higher human rights standards in the Member States?

For their assessment, students will have the opportunity to develop a policy case-study, allowing them to apply the analytical skills developed in this course to analyse a specific EU asylum/immigration policy of their choice.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: A prospectus for the assessed research project (policy case study).

Indicative reading: Geddes A et al. (2020) *Migration and Mobility in the European Union*, Palgrave/Macmillan;

Zaun N. (2019) *EU Asylum Policies: The Power of Strong Regulating States*, Palgrave;

Milazzo, E. (2023) *Refugee Protection and Solidarity*, Oxford;

Thym, D (2023), *European Migration Law*, Oxford;

Chetail V. and P. De Bruycker (2016) (eds.), *Reforming the Common European Asylum System: The New European Refugee Law*, Brill;

Thielemann E R (ed.) (2003) "European Burden-Sharing and Forced Migration", special issue of the *Journal of Refugee Studies*, Vol.16, No.3.

Assessment: Project (100%, 5000 words) in the ST.

The summative assessment takes the form of a research project (policy case study).

EU469 Half Unit

The Political Economy of Finance in Europe

This information is for the 2024/25 session.

Teacher responsible: Dr. Benjamin Braun

Availability: This course is available on the MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Pre-requisites: A basic understanding of economics and economic terms is highly recommended.

Course content: Politics and policymaking in Europe happen in the context of a global monetary and financial order. This course teaches students a political economy framework to understand and analyse this order, and the privileges and constraints it imposes on financial, non-financial, and state actors in Europe. The introductory segment of the course examines the broad contours of the historical evolution of finance since the late 19th century: The first financial globalization in the shadow of European colonial expansion; the period of financial deglobalization following World War II; and the liberalization period that began in the 1970s. The second part focuses on the key actors (such as institutional capital pools) and the key assets (such as sovereign bonds) in Europe's contemporary financial system. In order to be able to map the relationships between financial and non-financial actors, students learn how to access, process, and visualize financial data. The third part of the course brings this understanding of finance to bear on

political challenges in Europe. What role does finance play in old-age provision? Can governments secure policy space in a world of global capital mobility? By the end of the course, students will have acquired the tools to analyse a broad range of political economy questions through a financial lens.

Teaching:

- This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Winter Term.
- This course includes a reading week in Week 6 of Winter Term.
- A review session will be held at the start of the Spring Term to prepare for the exam.

Formative coursework: Students must write up a data report in the WT.

- Report parameters: 800 words plus data visualizations.
- Data exercises relate to the topic of the respective week.
- We will mainly work with official data from the financial accounts or the balance of payments, or with important researcher-assembled datasets.
- Example data exercise: "We have learned about the structure of, and access options for, balance of payments data. Select two countries, explain why their international investment positions (IIPs) are interesting to compare, and then use balance of payments data to describe the composition and historical evolution of these countries' foreign assets and liabilities."
- Students select a data exercise from a list and submit their reports, in the form of a .pdf file, via Moodle.
- In class, students present and discuss their results in groups.
- Instruction will focus on data download, processing, and visualization in R, but the assignment can be completed using any software, including Excel.

- Reinhart, Carmen M., & Sbrancia, M. Belen (2015). Debt Liquidation. *Economic Policy* (April), 291–333.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

The summative assessment will take the form of an e-exam in the Spring Term. E-exams are assessments run under invigilated exam conditions on campus. Students will complete the assessment using software downloaded to their personal laptops.

EU470

How do we know? An introduction to research design and methods in political economy

This information is for the 2024/25 session.

Teacher responsible: Dr Robert Basedow (CBG.6.11) and Dr Angello Martelli (CBG.6.04)

Availability: This course is compulsory on the MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available on the MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is not available as an outside option. The Moodle page can be accessed by any European Institute student.

This course is only available to European Institute students.

Course content: The course introduces students to research design and core methods in political economy. It raises awareness for ontological and epistemological challenges in political economy and offers guidance on how to develop research questions. It further introduces students to the logic of case study research, most similar and most dissimilar research designs and offers an introduction into the logic of quantitative methods and notably regression analysis. The course is delivered through interactive lectures with theoretical and applied parts and group exercises. It is compulsory and unassessed for all students on MSc Political Economy of Europe and MSc Double Degree in the Political Economy of Europe (LSE & Sciences Po). The course is optional for students on the MSc Double Degree in the Global Political Economy of China and Europe (LSE & Fudan).

Teaching: 4 hours and 30 minutes of lectures in the AT. 4 hours and 30 minutes of lectures in the WT.

Formative coursework: This course is unassessed.

Indicative reading:

- George, Alexander, and Andrew Bennett. *Case Studies and Theory Development in the Social Sciences*. BCSIA Studies in International Security. Cambridge: MIT Press, 2005.

Assessment:

This course is unassessed.

EU471

Researching Migration: research questions and research methods

This information is for the 2024/25 session.

Teacher responsible: Dr Patrick McGovern and Dr Eiko Thielemann

Availability: This course is compulsory on the MSc in International Migration and Public Policy and MSc in International Migration and Public Policy (LSE and Sciences Po). This course is not available as an outside option.

Course content: Having introduced the students to a range of possible research strategies, the students will identify appropriate research methods training for their proposed thesis and undertake a number of practical exercises to help develop their ideas. They will also prepare informal seminar presentations on their proposed topic during AT and WT. Early in the ST, they will present their proposal in a 'Three-Minute-Thesis' workshop. A final proposal will be submitted after this workshop having completed a 2000 word prospectus on some aspect of the proposed dissertation. At each stage, participants will be encouraged to use feedback from the course convenors and fellow students to help develop their research.

Teaching: Lectures 3 x 2 hours (6); Seminars 2 x 2 hours (4); Workshop 5 hours (5). Total 15 hours
Teaching arrangements may be adjusted if online teaching is required at any point.

Formative coursework: Students will be expected to produce 3 presentations across the AT, WT and ST.

Indicative reading: Bryman, A. (2008) *Social Research Methods*, H62 B91; Gilbert, N. (ed.) (2008) *Researching Social Life* H62 R 43; Hancke, R. (2002) *Doing Qualitative Research: A Practical Handbook* H62 S58.

Assessment:

This course is not assessed.

EU475 Half Unit

Europe and the Politics of Secularism

This information is for the 2024/25 session.

Teacher responsible: Tahir Rashid

Availability: This course is available on the MSc in Comparative Politics, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Empires, Colonialism and Globalisation, MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in History of International Relations, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Social Anthropology (Religion in the Contemporary World) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Course content: In recent years religion has emerged as one of the most important factors in shaping domestic and European politics. This represents a remarkable shift in understanding when a generation earlier sociologist, historians and even some theologians were confidently predicting the irreversible collapse of organised European religion. How does the purported return of religion affect the secular self-understanding of Europe? What are the consequences of this shift for the future of secular Europe? This module aims to introduce the categories of secularisation, secularism, secular and religion with a view of understanding their impact on European society, politics, and culture. It hopes to incorporate a broad range of disciplinary perspectives to shed light how Europe's contemporary secular identity has come to be challenged by religion but also to reveal how far this identity has been irrevocably shaped by a history that cannot be fully articulated without some reference to religion.

Teaching: This course is delivered through 20 hours of seminars in the Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: 1 x 1200 word essay
1 x presentation

Indicative reading:

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU476 Half Unit

Emotions and Memory in European Politics

This information is for the 2024/25 session.

Teacher responsible: Professor Yaprak Gürsoy

Availability: This course is available on the MA in Modern History, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in History of International Relations, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: Political and social actors frequently mobilize the memory of glorifying or traumatic events to make claims about the present. All socio-political groups have memories. Some of these memories make them proud while others they remember as humiliating or shameful. What are the different registers in which memory is considered to operate (e.g., personal, collective, social, cultural, top-down, bottom-up)? What is the relationship between memories and collective emotions? How do these collective emotions impact world politics? This course seeks answers to these questions and discusses the linkages between collective identities, emotions and memories by examining the memorialisation of traumatic events, such as wars, ethnic conflict and terrorist attacks in Europe and beyond.

The cases the course will consider include (but not limited to) the following:

- 1 The memorialisation of the World Wars, in particular, the First World War in the UK and Turkey, as well as the Holocaust and the Second World War in Germany and wider Europe,
 - 2 Memories and emotions surrounding ethnic tensions in Europe's regional conflicts, in particular the violent breakup of Yugoslavia and hostilities in the Eastern Mediterranean, involving Greece, Turkey and Cyprus,
 - 3 Emotional responses to and memorialisation of the September 11 attacks in the USA and its European allies, and in comparison to reactions in the aftermath of the Madrid bombings in 2004.
- Through an overview of these cases, the course will demonstrate the theoretical significance of memories and emotions in constituting collective identities and how they impact international relations and European foreign policy. The cases will also shed

light on methodological questions and alternative approaches to the study of emotions and memory in politics. Students will be given the opportunity to investigate these or other cases from Europe in more depth through their formative and summative coursework.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework:

- Oral presentation in AT
- Short essay (1500 words)

Students will receive guidance and feedback on their formative coursework in preparation for their summative submission.

Indicative reading: In addition to weekly readings, the following sources are likely to enhance the benefits derived from the course:

- Sara Ahmed, *Cultural Politics of Emotion*, 2004;
- Jenny Edkins, *Trauma and the Memory of Politics*, 2003;
- Paul Gilroy, *Postcolonial Melancholia*, 2006;
- Emma Hutchison, *Affective Communities in World Politics: Collective Emotions after Trauma*, 2016;
- Andrew A. G. Ross, *Mixed Emotions: Beyond Fear and Hatred in International Conflict*, 2014;
- Michael Rothberg, *Multidirectional Memory: Remembering the Holocaust in the Age of Decolonization*, 2009.

Assessment: Essay (100%, 4000 words) in the AT and WT.

Students will conduct independent research and write an essay on a topic they choose in consultation with the instructor.

EU477 Half Unit

Labour Markets and the Political Economy of Employment in Europe

This information is for the 2024/25 session.

Teacher responsible: Dr Vassilis Monastiriotis CBG 5.05

Availability: This course is available on the MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science and Political Economy and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Pre-requisites: A solid background in economics and knowledge of some basic calculus is required.

Course content: The course offers an analytical treatment of key labour market issues, from unemployment and wage determination to skill formation and labour market regulation, within the context of processes of integration and governance in Europe. To do so, it combines a Labour Economics perspective on imperfect labour markets with a Political Economy perspective on EU institutions and policies. In the lectures, we address analytically policy-making questions on topics such as minimum wages, unions and collective bargaining, unemployment benefits, employment protection legislation, regulation of working hours, work-time subsidies (furlough), migration, and others. These topics are then linked in the seminars to the European policy-making context. Examples include: EMU, optimum currency area theory, wage flexibility and internal devaluation; structural unemployment,

labour market reforms, the European Employment Strategy and flexicurity; skills shortages, activation policies, European education policy and labour mobility; crises (COVID), short-time work schemes and activation policies; and others.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term. A Help Session focusing on the student's summative essay will also be offered in the form of extended office hours in the second part of the Autumn Term.

Formative coursework: Students will be expected to produce 5 problem sets, 2 other pieces of coursework and 1 other piece of coursework in the AT.

Formative assessment comprises a weekly set of problem sets / exercises; brief oral presentations on pre-allocated readings in the seminars; submission of a draft / extended outline of the summative project, which students will develop with the teacher late in Autumn term.

Indicative reading:

Assessment: Project (100%, 5000 words) in the WT.

EU478 Half Unit

The Culture of European Politics

This information is for the 2024/25 session.

Teacher responsible: Prof Simon Glendinning CBG.7.01

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: Over the last three hundred years European societies have undergone a fundamental changeover from a traditional form, with a largely self-sufficient agrarian economy, into

a modern, industrial and technological form based on international trade and tele-communication. This revolution developed in the seventeenth century first and only in Europe, but today, through processes of globalization that are often inseparable from colonialism, it has spread worldwide and increasingly dominates the entire planet. This course explores one of the basic dimensions of this unprecedented globalization: the culture of European politics.

We are used to speaking about globalization as a political-economic phenomenon, but its European origin makes it also an unavoidably cultural one. Europe's predominant cultural form – its double form, both Christian and secular – is not a neutral set-up, and other world cultures can find themselves alienated from and in revolt against everything that belongs to what might be called the Christianizing of the world, whether the forces in play are colonial, commercial, or ideological. International migrations and projects of European integration sharpen these concerns and add new ones. This is the background to our study of the culture of European politics, its history and heritage from ancient European empires, to the European Union and beyond.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: 2 essays of 2000 words

Indicative reading:

- Norman Davies, 'Introduction' to *Europe: A History*
- Anthony Pagden (ed) *The Idea of Europe*

Assessment: Online assessment (100%) in the ST. The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU481 Half Unit

The Future: Political Responses to a Challenge

This information is for the 2024/25 session.

Teacher responsible: Prof Jonathan White

Availability: This course is available on the MSc in Comparative Politics, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Political Sociology and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: The future is unknowable, but it can be made intelligible. It raises practical and conceptual problems, as well as reasons for conflict, but also promises to resolve contradictions. This course examines how the future is used and abused in politics, and the particular significance it holds for democracy. We begin historically, looking at the future as an emerging theme in eighteenth-century European Enlightenment thought and as a centrepiece of ideologies in the nineteenth and twentieth centuries. We go on to explore what is distinctive about the future orientations found in societies today; what these imply for the governance of salient issues, from economic crisis to climate change; and what institutions, national and transnational, can help democratise the future and counter pathologies of both short- and long-termism. As we shall see, beliefs about what lies

ahead carry implications for who should hold power, how it should be exercised, and for the sake of what ends. The course should provide students with a cross-disciplinary grasp of how present-day public affairs are shaped by the ways the future is conceived and acted upon.

Teaching: 20 hours of seminars in the Winter Term. This course includes a reading week in Week 6 of Winter Term.

A 2-hour review session will be held at the start of the Spring Term.

Formative coursework:

- One 1,500 word unassessed essay.
- A 10-12 minute class presentation.

Indicative reading:

- White, J. (2024), *In the Long Run: the Future as a Political Idea* (London: Profile).
- Delanty, G. (2024), *Senses of the Future: Conflicting Ideas of the Future in the World Today* (de Gruyter).
- Claeys, G. (2020), *Utopia: the history of an idea* (London: Thames & Hudson).
- Nowotny, H. (2016), *The Cunning of Uncertainty* (Cambridge: Polity).
- Mackenzie, Michael (2021), *Future Publics: Democracy, Deliberation, and Future-Regarding Collective Action* (Oxford: OUP).

- Urry, J. (2016), *What is the Future?* (Polity).
- White, J. (2024), 'Technocratic Myopia: on the pitfalls of depoliticising the future', *European Journal of Social Theory*.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

The summative assessment will take the form of an e-exam in the Spring Term. E-exams are assessments run under invigilated exam conditions on campus. Students will complete the assessment using software downloaded to their personal laptops.

EU482 Half Unit

Europe in World Trade

This information is for the 2024/25 session.

Teacher responsible: Dr Robert Basedow

Availability: This course is available on the MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Course content: After decades of globalisation and trade liberalisation, the world economy faces significant protectionist challenges. The Ukraine War, COVID pandemic, the spread of populism and the US-China trade war all put considerable pressure

on global value chains, the international trade regime and global governance. The purpose of this course is to provide students with the necessary knowledge to understand and analyse the EU's role in the global economy and evolving international trade regime. It familiarises students with the workings of EU trade and foreign economic policy and the World Trade Organisation. It further introduces students to different substantive trade domains including goods and services trade, trade defence instruments and sanctions, the diffusion of free trade agreements, investment regulation and investor-state dispute settlement as well as sources of regulatory power in world markets known as the 'Brussels effect'. It also dwells on the implications of the rise of new economic powers such as China and India for EU trade and foreign economic policy and the World Trade Organisation.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: Students will be expected to produce 1 presentation and 1 essay in the AT.

Indicative reading:

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU484 Half Unit Europe's Role in Global Migration Governance

This information is for the 2024/25 session.

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: This course provides an overview of Europe's role in global migration governance. The course will address different aspects in this regard, including the externalisation of EU and European Member States' migration policies, bilateral and multilateral agreements with third countries, the perception and response of partner countries and regions as well as regional/international courts and Europe's cooperation with international organisations such as the International Organization for Migration (IOM) and the United Nations High Commissioner for Refugees (UNHCR). Students will be equipped with a variety of theories to

analytically assess these areas of European activity, including theoretical frameworks such as venue-shopping, diffusion and securitisation.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: Formative coursework consists in regular (i.e. weekly) participation in the Moodle debate, the preparation of a 10-minute presentation and the submission of one mock exam (answering two out of eight questions) in the WT.

Indicative reading:

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU485 Half Unit Post-Conflict Justice and Reconciliation in Europe and Beyond

This information is for the 2024/25 session.

Teacher responsible: Dr Denisa Kostovicova CBG.7.03

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender (Rights and Human Rights), MSc in Gender, Peace and Security, MSc in International Migration and Public Policy and MSc in International Migration and Public Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for

all students that apply but that may not continue to be the case.

Course content: The pursuit of justice in the aftermath of mass atrocity and gross human rights violations has become a norm in a globalised post-Cold War world. It rests on the premise that states and societies ought to engage with the difficult past in order to transition from conflict to peace. But, the limitations of transitional justice practices, such as war crimes trials, truth commissions, reparations and others, are now evident. Instead of promoting peace and reconciliation, they have often had the opposite impact: they have further divided communities, distorted the truth about suffering, and traumatised rather than dignified the victims. With a comparative focus on transitional justice practices in Europe and elsewhere, this course examines how the pursuit of post-conflict justice is theorised and tackles the puzzle of its unintended effects in societies transitioning from conflict and repressive rule.

The course starts with a review of transitional justice and reconciliation as fields of study and practice. Following the introductory part that relates the emergence of a global norm of transitional justice to the lessons from Europe's history, the course proceeds with an examination of key mechanisms of transitional justice in various contexts: international trials, truth and reconciliation commissions, and lustrations. It then engages with more recent practices, such as the role of art and social media in transitional justice and reconciliation. Some of the examples we will examine include the work of the International Criminal Tribunal for the Former Yugoslavia, domestic war crimes trials in Ukraine, de-Baathification process in Iraq, photography about the Rwandan genocide and digital memory activism in relation to the war in Syria. Throughout the course and through these empirical examples we also examine cross-cutting themes, such as: gender, trauma, emotions, silence, resilience, and others, and their role in reckoning with past wrongs.

Theoretically informed and empirically grounded, the course adopts a multidisciplinary approach to address the question how we know and study the effects of transitional justice. It reflects critically on theorising, methods, and data in transitional justice research, and discusses implications for policy-making.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

The course will provide or mediate additional learning opportunities, such as research seminars on topics directly linked to the theme(s) covered in the course. These will serve to reinforce learning objectives by creating an opportunity for students to engage with core issues outside regular classes.

Formative coursework: Students will be expected to produce 1 presentation and 1 essay in the AT.

Assessment: Essay (100%, 5000 words) in the WT.

EU486 Half Unit Muslims in Europe

This information is for the 2024/25 session.

Teacher responsible: Tahir Rashid

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia) and MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Course content: Muslims are a well-established minority in Europe, constituting more than 5% of the European population. Yet the story of Muslims/Islam in Europe is very often blighted and understood through the lens of 'clash of civilisations' or race. In fact, the interaction between Muslims and Europe is far more interesting than accounts of embattled minorities fuelled by resentment. But is in fact a story that stretches over a millennium in the making and has had a fundamental role in the shaping of European identity. This is also a story of rich intellectual exchange, mutual learning, symbiosis and also suspicion. This course embraces a multi-disciplinary approach that focuses on the history, social, political, and cultural impact of Muslims in Europe as well as focusing on the diverse experiences of contemporary Muslims in Western and Eastern Europe. In particular we are interested in how the diverse experience of Muslims in Western and Eastern Europe are shaped by questions of racism, ethnicity, migration, citizenship, secularism, gender that essential to contemporary European politics.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: 1 x 1200 word essay

1 x presentation

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU487 Half Unit

European Integration from a Global Governance Perspective

This information is for the 2024/25 session.

Teacher responsible: TBC

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Pre-requisites: Students who have little or no background in political science, international relations, public policy or related disciplines are strongly advised to take the EU4V9 Moodle course.

Course content: Distances on a world scale are shrinking through the emergence and thickening of networks of connection – a process commonly referred to as globalization. The process is far from complete, with Europe being highly integrated and other regions lagging behind. This course engages recent positive and normative scholarship in various disciplines on governance in and beyond Europe. Putting European integration in this global and comparative perspective promises to illuminate current public and scholarly debates about nature and future of European integration. We study these questions by posing four issues: the nature of globalization; its actors, institutions and processes; the form and scope of governance; and its normative implications. For each of these themes, European integration will serve as the principal case study to be discussed in light of developments in the rest of the world. The course will give students a conceptual and thematic overview of European integration as a phenomenon of global governance. There will be no descriptive introduction to specific global governance institutions or policy fields. Instead, the course revolves around current public and academic debates about European integration and global governance that are discussed from a political science and political economy vantage point, while also engaging recent positive and normative scholarship in Comparative Politics and Political Theory.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students are required to submit a draft and a final non-assessed research paper outline in the WT.

Indicative reading:

- Weiss, Thomas G., and Rorden Wilkinson (eds.). 2018. *International Organization and Global Governance* (2nd edition). Oxon and New York: Routledge.

- Keohane, Robert O., Andrew Moravcsik, and Anne-Marie Slaughter. 2000. Legalized Dispute Resolution: Interstate and Transnational. *International Organization* 54 (3): 457-488.

Assessment: Essay (100%, 5000 words) in the ST.

Students submit by the beginning of the following term a 5,000 words research essay. Deadlines to be confirmed in class.

EU488 Half Unit

European Policy-Making and International Cooperation

This information is for the 2024/25 session.

Teacher responsible: Dr Spyridon Economides

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Pre-requisites: Students who have little or no background in political science, international relations, public policy or related disciplines are strongly advised to take the EU4V9 Moodle course.

Course content: This course is an introduction to the causes and nature of regional integration in Europe and the EU's governance system. The topic is presented from a historical, social scientific and normative perspective. We critically examine various theories and current debates about the European Union by studying the process of regional integration through different decades and crises, its effects on its members and third states, and its constitutional character. The first part of this course analyzes different stages in the integration process and asks under what conditions states have delegated (or not) authority to EU institutions and other regional integration bodies. The second part discusses a number of big public policy questions that this transfer of authority raises. What are the consequences of the single market and currency on national institutions? What is their impact on other markets and currencies? How does the EU enforce its laws and how does its legal system compare with the legalization of world politics? What is the EU's role and power in world politics? We conclude by reflecting on current and future challenges to the EU, notably questions of its legitimacy, democratic quality and the populist challenge. At the end of this course students will have gained an overview of the process of European integration, political science theories of regional integration, the EU's governance system as a political order beyond the nation-state, as well as public and scholarly debates about the reality and ideal of

European regional integration.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across the Autumn Term. This course includes a reading week in Week 6 of AT.

Formative coursework: One presentation.

One 1,200 words essay based on the presentation.

Indicative reading:

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU489 Half Unit

Analytical Politics and Policymaking in Europe

This information is for the 2024/25 session.

Teacher responsible: Prof Christopher Anderson CBG 6.05

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Course content: This course introduces students to governance in Europe at the national and European Union levels. This course has two objectives, one substantive and one methodological. First, students learn about politics and policymaking in European democracies and the European Union. Topics include the demand for and supply of policy options: e.g., public policy preferences, government formation and duration, representation and accountability, and supranational policy formulation. Second, this course is intended to introduce students to a set of analytical and empirical tools and concepts for understanding how political institutions and political agents jointly generate public policy, and to apply these tools in examining political and policy outcomes in European states. Lessons about political decision making, institutions, and the policy making process will be understood from the perspective of decision makers – that is, an individual or organisation that develops strategy in order to achieve political ends or advance policy change.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: Students will be expected to produce 1 presentation in the AT (including slides).

EU491 Half Unit

Political Economy in Theory and History

This information is for the 2024/25 session.

Teacher responsible: Robert Basedow, CBG.6.11

Availability: This course is available on the MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option. This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Course content: This course aims to provide a comprehensive coverage and analytical understanding of the evolution of the political economies of Europe within the context of the process of European integration. The course tries to understand how the relation between state and economy in both Western Europe and Central and Eastern Europe has evolved over the post-war period. We look at how capitalism and democracy were reconciled in different European socio-economic models and what role European integration played in their evolution.

Teaching: This course is delivered through a combination of

lectures and seminars totalling a minimum of 25 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: A formative essay of 1200 words and a presentation in AT.

Indicative reading:

- Blyth M. (2013) *Austerity: the History of a Dangerous Idea*, Oxford: OUP [esp. ch's 1-3, an engaging and controversial book on a big question of our times]

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU492 Half Unit Political Economy of Integration and Fragmentation in Europe

This information is for the 2024/25 session.

Teacher responsible: Dr Vassilis Monastiriotis

Availability: This course is available on the MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Course content: The course examines the politics and economics of policy formation in the EU, looking at two types of management issues: the management of crises (Eurozone, migration, Brexit, COVID-19) and the management of globalisation (new social risks, entrepreneurial discovery, trade relations, international investment, EU neighbourhood). It discusses key contemporary questions for the political economy of Europe, based on the concepts and empirical knowledge acquired in either EU455 or EU491; and brings students up to date with the key policy challenges facing the European (political) economy today.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Winter Term. This course includes a reading week in Week 6 of

Winter Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: Students will be expected to produce 1 essay in the WT.

The formative assessment is a 1200 word essay.

Indicative reading:

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU494 Half Unit International Migration and Immigration Management

This information is for the 2024/25 session.

Teacher responsible: Dr Eiko Thielemann

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is not available as an outside option.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Course content: This course offers a theoretically informed account of the challenges posed by international migration and resulting policy responses. The focus is on the comparative analysis of asylum and immigration policies in OECD countries, with a particular focus on EU countries, the US, Canada and Australia. The course is structured in three parts. The first introduces a number of theoretical models that seek to explain the dynamics of international migration and migration control policies, addressing questions such as: Why do people migrate? How effective are policies that aim to manage migration? The second, comparative part deals with national policy responses to the issue of asylum & refugees, 'irregular' migration & human trafficking and (legal) economic immigration. The final part focuses on the analysis of multilateral policy initiatives on migration management at the global, regional and bi-lateral level of governance.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. 1 hour of lectures in the ST.

Formative coursework: Students will be expected to produce 1 essay in the AT.

All students are expected to submit one non-assessed essay, due in Autumn Term Week 6.

Indicative reading: There is no single textbook but the following texts are useful introductions:

- H de Haas, *How Migration Really Works*, 2024;
- C Brettell, J Hollifield, *Migration Theory: Talking Across the Disciplines*, 2022;
- J Hollifield, et al., *Controlling Immigration: A Global Perspective*, 2022;
- A Geddes, *Governing Migration Beyond the State*, 2021;
- H de Haas, S Castles & M J Miller, *The Age of Migration*, 2019;
- A Betts and P Collier, *Refuge: Transforming a Broken Refugee System* 2018;
- D S Fitzgerald, *Refuge Beyond Reach: How Rich Democracies Repel Asylum Seekers*, 2019;
- A Geddes, L Hadj-Abdou, L Brumat, *Migration and Mobility in the European Union*, 2020.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

The summative assessment will take the form of an e-exam in the Spring Term. E-exams are assessments run under invigilated exam conditions on campus. Students will complete the assessment using software downloaded to their personal laptops.

EU495

Applied Policy Project

This information is for the 2024/25 session.

Teacher responsible: Prof Christopher Anderson CBG 6.05

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po). This course is not available as an outside option. This course is only available to European Institute Students.

Pre-requisites: The Applied Policy Project is available to students on the MSc European and International Public Policy who wish to research a current policy issue instead of submitting a dissertation.

Course content: Students will work on an applied policy project related to a public policy problem in lieu of a dissertation. This policy problem can be situated at the international, European, national, or sub-national level. Thematically, it can be related to a wide range of policy fields (e.g., international trade, social policy, environmental policy, or justice and home affairs and migration). The workshops will provide overviews of different styles and types of policy analysis writings. Students will have regular meetings with their supervisors. Students must submit formative work as part of the Applied Policy Project process. Students' summative work, on which the final grades of the project will be determined, consists of two applied policy papers: see below for details.

Teaching: This course is delivered through workshops totalling a minimum of 4.5 hours across both the Autumn and Winter Terms. This course includes a reading week in Week 6 of the Autumn and Winter Terms.

Formative coursework: Students will be expected to produce 1 condensed summary of the policy brief and 1 presentation in the WT.

Indicative reading: Useful preliminary reading:

Charles E. Lindblom and David K. Cohen, *Social Science and Social Problem Solving* (New Haven: Yale University Press, 1979); Martha S. Feldman, *Order Without Design: Information Production and Policy-making* (Stanford, CA: Stanford University Press, 1989);

Ray Pawson, *Evidence-based Policy: A Realist Perspective* (London: Sage, 2006);

Weible, Christopher M., and Paul A. Sabatier. *Theories of the Policy Process*. (4th ed. New York: Routledge, 2018.)

Howard White, *Theory-based Impact Evaluation: Principles and Practice* (3ie, 2011);

Assessment: Policy brief (30%) in the ST.

Policy paper (70%) in the post-spring term.

The assessment consists of two parts:

1. A 3,000 word policy brief; policy advocacy for the solution to a specific policy problem in/for the real world (not a theoretical or empirical question suitable for a conventional academic dissertation)
2. A 7,000 word policy study; exploring policy options and engaging in policy analysis

EU499

Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Spyridon Economides, Prof Jonathan Hopkin, Dr Eiko Thielemann and Prof Jonathan White

Availability: This course is compulsory on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available on the MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po). This course is not available as an outside option.

This course is only available to European Institute Students.

Course content: Students are required to write a 10,000-word dissertation on a topic within the field of their chosen programme. A Dissertation Supervisor will be assigned to students and we endeavour to team students with Supervisors with a close area of interest. Students also retain the right to discuss their project with other faculty both within the EI and beyond in the LSE (through advice and feedback hours). The dissertation should be an account of original research, but can rely on secondary sources. In preparation for the dissertation, students must submit a Preliminary Dissertation Topic Proposal, a Dissertation Prospectus and a Final Dissertation Topic Proposal, along with a research ethics review checklist (if applicable). Students must submit all required documents to be able to submit the Dissertation. Students must also receive approval of their Final Dissertation Topic Proposal Form before they are allowed to submit. Students must attend the relevant methodology course for their programme. Detailed information on the dissertation timeline, deadlines and format can be found on the EU499 Moodle page. Students are required to read any additional information relevant to their particular programme. Students will write the dissertation as an independent project over the summer.

Teaching:

- Students taking MSc in Political Economy of Europe and MSc in Political Economy of Europe (LSE and Sciences Po) are expected to attend EU470 *How do we know? An Introduction to Research Design and Methods in Political Economy*.
- Students taking MSc in Culture and Conflict in a Global Europe, MSc Culture and Conflict in a Global Europe (LSE and Sciences Po), MSc in Culture and Conflict in a Global Europe (LSE & Columbia) are expected to attend EU410 *Interdisciplinary Research Methods and Design*.
- Students taking MSc in International Migration and Public Policy and MSc International Migration and Public Policy (LSE

and Sciences Po) are expected to attend EU471 Researching Migration: Research Questions and Research Methods.

- Students taking MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (Sciences Po), MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Bocconi) and MSc in European and International Public Policy (LSE and Sciences Po) are required to take MY451A Introduction to Quantitative Analysis or MY452A Applied Regression Analysis.

Formative coursework: A written essay (prospectus) of 2,000 words is required as part of the approval process.

Assessment: Dissertation (100%, 10000 words) in the post-spring term.

EU4A1 Half Unit Not available in 2024/25 The Politics and Policies of 'Brexit': The UK's changing relationship with the European Union

This information is for the 2024/25 session.

Teacher responsible: Prof Kevin Featherstone CBG 5.04 and Prof Antony Travers CBG.5.28

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines the United Kingdom's departure from the European Union as an agenda of ongoing significance for both the UK and the EU27. With many issues under continuing review, it is an important focus for the UK and for the EU. To reflect the complexity of BREXIT, the course examines its politics and its policy implications as an episode and in the longer term.

The course begins with consideration of how BREXIT occurred: the history of a troubled relationship; the issue of EU membership in domestic party and electoral politics; and the course of the BREXIT negotiations themselves. BREXIT requires much adjustment in terms of governance and policies. The course examines these across a set of major policy agendas and discusses the implications for both the UK and for the EU27. With unresolved issues even after the UK's final departure from transitional arrangements, the discussion highlights the continuing significance of the BREXIT agenda for London and Brussels. The following is an indicative outline of topics covered.

- 'Europe' in Post-War British Politics: why the reluctant partner?
- The EU Issue in Party Politics
- The Brexit Divide in Electoral Politics
- Getting to a Deal/ No Deal: the two sides in the BREXIT negotiations
- Managing BREXIT and Beyond: the impact on Whitehall
- BREXIT and foreign and security policies
- BREXIT and migration
- BREXIT and The City
- BREXIT and the UK economy
- The US: 'BREXIT' and Europe.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: An early formative essay will address a challenging interpretive question of a historical nature or of current

political behaviour. Thereafter, group work/presentations will be part of the learning process for the the origination of an individual, extended policy paper (summative). The group work will have explored the issues and implications of a particular policy area; tutor support will be provided for the subsequent individual papers (design; coverage; sources; analytical frame).

Indicative reading:

- D. Dinan et al, eds. (2017) *The European Union in Crisis*; London: Palgrave.
- A. Geddes (2013) *Britain and the European Union*; London: Palgrave.
- B. Simms (2016) *Britain's Europe: A Thousand Years of Conflict and Cooperation*. London: Allen Lane.
- S. Wall (2008) *A Stranger in Europe: Britain and the EU from Thatcher to Blair*. Oxford: OUP.
- H. Young (1998) *This Blessed Polot: Britain and Europe from Churchill to Blair*. London: Macmillan.
- K. Armstrong (2017) *BREXIT Time: Leaving the EU -why, how and when?* Cambridge: Cambridge University Press.
- H. Clarke, M. Goodwin and P. Whiteley (2017) *BREXIT: Why Britain voted to leave the European Union*. Cambridge: Cambridge University Press.
- E. O. Eriksen and J. E. Fossum (2015) *The European Union's Non-Members: independence under hegemony?* London: Routledge.
- S. Hobolt (2016) 'The BREXIT vote: a divided nation, a divided continent', *Journal of European Public Policy*, 23, 9. And 'Debate Section': 'British exit from the EU - legal and political implications', in the same issue.
- L. Halligan and G. Lyons (2017), *Clean BREXIT: Why leaving the EU still makes sense*; London: Biteback Publishing.
- The LSE project: 'Generation BREXIT'.

Assessment: Project (100%, 5000 words) in the WT.

The summative assessment for this course is a Policy Project which requires students to prepare an extended analysis of a specific policy issue that has arisen from the 'BREXIT' process.

EU4A2 Half Unit Globalisation, Conflict and Post-Conflict Reconstruction

This information is for the 2024/25 session.

Teacher responsible: Dr Vesna Popovski

Availability: This course is available on the MSc in Comparative Politics, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender, Peace and Security, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Development and Humanitarian Emergencies, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Political Science (Global Politics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE and SciencesPo), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and SciencesPo), MSc in European and International Public Policy & Politics (LSE and Bocconi) and MSc in Conflict Studies.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: The course offers a theoretically informed

account of the challenges faced by post authoritarian and totalitarian transition countries in the era of globalisation, and examines them empirically in reference to the Balkans (Serbia, Kosovo, Bosnia-Herzegovina, Macedonia, Croatia), South Caucasus (Georgia, Armenia and Azerbaijan), Iraq, Libya and Afghanistan. These case studies were chosen because they have a legacy of authoritarian and totalitarian regimes and have experienced specific difficulties in an attempt to transition to democracy, market economy and integrate into a multilateral system. The course is structured around three areas of analysis: political ideologies, conflict analysis and post-conflict reconstruction. The course starts with an introduction to theories of globalisation and the reasons why the legacy of totalitarianism is different from the legacy of authoritarian rule, and why and how these legacies impede the development of democratic states and societies. Further the course progresses with employing conflict analysis to understand contemporary conflicts in relation to international peace building efforts concentrating on issues relating to the process of democratisation. Therefore, the course proceeds by examining a context of transition, from the perspective of: civil society, global diasporas and fundamentalist networks, informal economy (including the overview of illegal economic networks and organised crime) and transitional justice. The course concludes by examining external state-building policies in relation to post-conflict reconstruction of our chosen states and societies. All the topics are analysed bearing in mind regions and countries mentioned above to grasp unique aspects of simultaneous transitions on a long and bumpy road from war to peace and from totalitarianism to democracy. Two methodological principles underpin this course: 1) the course challenges the state-centric hegemony in the study and teaching of conflict, and instead focuses on the question how wider transnational context, factors and dynamics shape post-conflict transition; and 2) the course provides an alternative to top-down, i.e. formal and institutional study of conflict and post-conflict reconstruction, and instead provides a bottom-up perspective that includes the examination of civil societies (both liberal and illiberal) and well as informal actors and institutions.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: All students are expected to produce one written essay and one short presentation on topics assigned to them.

Indicative reading: This list should give you an idea of the range of material covered in the course. It is also provided in case you have a chance to engage with some of these authors whom you will find on the course reading list as co-/authors of articles and books. These reading are not required to be read before the enrolment on the course.

- Mary Kaldor, *New and Old Wars: Organised Violence in a Global Era*, Polity Press, third edition 2012.
- Vesna Bojicic-Dzelilovic, James Ker-Lindsay and Denisa Kostovicova (eds) *Civil Society and Transitions in the Western Balkans*, Palgrave Macmillan, 2013;
- Miles Kahler and Barbara F. Walter (eds.) *Territoriality and Conflict in an Era of Globalization*, Cambridge University Press, 2006;
- Vera Mironova, *From Freedom Fighters to Jihadists: Human Resources of Non-State Armed Groups*, Oxford University Press, 2019;
- Anthony Giddens, *Runaway World: How Globalisation is Reshaping our Lives*, Profile, 2002;
- Ruti Teitel, *Humanity's Law*, Oxford University Press, 2013;

Assessment: Essay (100%, 5000 words) in the ST.

EU4A3 Half Unit The Americas and Europe

This information is for the 2024/25 session.

Teacher responsible: Dr Cristobal Garibay-Petersen CBG.7.11

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Culture and Society, MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in History of International Relations, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: This course examines the role played by the idea of the Americas in the European imaginary and examines 'Europe', in turn, from the American context. By looking into processes of colonisation, decolonisation, modernisation, and globalisation, the course investigates the assumptions upon which different conceptions of the Americas have been construed, and seeks to understand the political, socio-cultural, and philosophical implications of those conceptions both for Europe and for the Americas. The course adopts a hybrid approach by making use of both European and American perspectives, and critically engages dichotomies such as settler/settled, coloniser/colonised, domination/subjugation, and self/other, to better understand the Americas and Europe.

The course follows a chronological order by looking, first, at the way in which early European explorers incorporated the so-called New World into their predominantly Christian worldview. It then maps the subsequent transformations of what the Americas signified through the European Enlightenment, through the 19th and 20th centuries of modern industrial states, and into the time of geopolitics, all the while remaining attentive to the changing role of the American conception of Europe. In doing so, the course shows the significance of different ideas of the Americas for what Europe understands as its own history, i.e. world-history: from an idea generated by complex mechanisms of othering that placed the Americas outside of European time and history to an idea that construes the Americas, with Europe at its side in notions such as 'the West', as the epicentre of hypermodern capitalism. The course borrows concepts and methodologies from a range of disciplines, including philosophy, cultural studies, history, geography, decolonial/postcolonial studies, politics, and anthropology. This course is not primarily concerned with any one specific nation (e.g. United States of America). Instead, it understands the

Americas in a broad sense.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term, and a review session will be held at the start of the Spring Term to prepare for the online assessment.

Formative coursework: Students will be expected to produce 1 essay and 1 critical literature review in the Winter Term. Questions for the formative assessments will be provided by the course convenor.

Chosen literature for the critical review should be cleared with the course convenor.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete the answers to questions and upload their responses back into Moodle.

EU4A4 Half Unit

The Politics of Inequality and Redistribution

This information is for the 2024/25 session.

Teacher responsible: Prof Jonathan Hopkin

Availability: This course is available on the MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Inequalities and Social Science, MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Political Science (Political Science and Political Economy), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other

programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Course content: This course provides an overview of the politics of inequality in the rich democracies. The objective is to explain why the distribution of wealth, income and opportunities differs so much between democratic countries with similar levels of economic development, particularly in Europe. The course draws largely on political science, although perspectives from other disciplines - such as economics and social policy - are brought in as appropriate. The focus is on understanding how institutions and policies redistribute resources in different ways across countries and over time. The course explains why welfare states emerged in the twentieth century and how welfare policies differ in different countries, the impact of labour market institutions, the redistributive implications of age, gender and ethnic differences, the role of competing economic and political ideologies, and the way inequality has been affected by structural changes to the global economy. The aim is to understand the striking differences in social cohesion and human development amongst the world's rich democracies.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: All students are expected to submit one non-assessed essay.

Indicative reading:

- Esping-Andersen, Gosta (1990), *The Three Worlds of Welfare Capitalism*. Cambridge: Polity Press
- Piketty, Thomas (2014), *Capital in the Twenty-First Century*. Cambridge: Belknap
- Piketty, Thomas (2020), *Capital and Ideology*. Cambridge: Belknap

Assessment: Essay (100%, 5000 words) in the WT.

EU4A5 Half Unit

People and Politics in Europe

This information is for the 2024/25 session.

Teacher responsible: Prof Christopher Anderson CBG 6.05

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po) and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: In this course, we will discuss how people engage with politics – what and how do Europeans think about politics (political attitudes and public opinion) and how and why do they participate in the political process (political behavior)? In addition, we will explore how a person's political opinions influence their political behavior. That is, we will explore how and why people participate in democratic politics, and how conventional and unconventional citizen participation influences the political

process. We will concentrate primarily on the politics of Europe and will pay attention to older and newer European democracies as well as the European Union.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: The formative coursework will take the form of a research design outline (500 words) and a brief oral presentation supported by a slide presentation (500 words).

Indicative reading:

- Alesina, Alberto, Rafael Di Tella, and Robert MacCulloch. 2004. "Inequality and Happiness: Are Europeans and Americans Different?" *Journal of Public Economics* 88 (9–10): 2009–2042.

Assessment: Essay (100%, 5000 words) in the period between WT and ST.

EU4A6 Half Unit Not available in 2024/25 Reconciliation and Crisis: Politics in Southern Europe

This information is for the 2024/25 session.

Teacher responsible: Professor Yaprak Gursoy CBG 7.04

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: When compared with their Northern counterparts, countries that lie on the Southern flank of Europe share different historical, political and socioeconomic trajectories. The interwar period that witnessed civil wars, authoritarianism and coups d'état transitioned into a more stable period through democratisation and EU membership in the 1970s–1990s. During this period, Portugal, Spain, Italy, Greece and Turkey (to varying extents) reconciled their long-lasting clashes between left and right politics, resettled debates over unitary versus federal structures and accommodated religious identities within politics. This phase of political resolution occurred decades later than other European countries that were also a part of the Western alliance during the Cold War. Yet, the domestic arrangements that brought about relative

stability to domestic politics in Southern Europe faced a series of new crises in the past 15 years. The financial crisis of 2008 separated Southern European members from other EU countries, once again. As party systems changed and populist parties asserted new demands, local differences and calls for regional independence heightened. The arrival of refugees through the Mediterranean and land borders, as well as growing Euroscepticism, compounded these problems while the pandemic has added extra pressure to these crisis-ridden systems. Taking into consideration the past and the present, this course investigates whether and to what extent Southern European countries are moving toward a new settlement. What lessons can be drawn from the period of reconciliation in the 1970s–90s? In what ways are the continuing problems the legacies of past conflicts? This course will seek answers to these questions by examining five Southern European countries through a comparative lens. While considering the unique dynamics of each country, common elements in their historical trajectories will be brought out by specifically examining the following issues: 1. the collapse of military regimes, and the process of democratisation and Europeanisation 2. economic crises and their political impact 3. rise of populist parties and party system change 4. regional governance, separatism and independence movements.

Teaching: 20 hours of classes in the WT.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 1 presentation and 1 essay in the WT.

Students will lead the class discussion by presenting a topic and discussing the presentations of their classmates. In this way students will take active part in two weeks during the term and will work in pairs and teams. Additionally, students will write a short essay of 2000 words, answering one of the discussion questions listed in the course syllabus on one Southern European country. Both types of formative assessment will give the students an opportunity to explore at length topics that were discussed in class, citing the relevant literature and engaging in discussions in oral and written form.

Students will receive guidance and feedback on their formative coursework in preparation for their summative submission.

Indicative reading:

- Yaprak Gürsoy, *Between Military Rule and Democracy: Regime Consolidation in Greece, Turkey and Beyond*, 2017
- Leonardo Morlino and Francesco Raniolo, *The Impact of the Economic Crisis on Southern European Democracies*, 2017
- Donatella della Porta, Massimiliano Andretta, Tiago Fernandes, Eduardo Romanos, and Markos Vogiatzoglou, *Legacies and Memories in Movements: Justice and Democracy in Southern Europe*, 2018
- Robert M. Fishman, *Democratic Practice: Origins of the Iberian Divide in Political Inclusion*, 2019
- Susannah Verney, Anna Bosco and Marina Costa Lobo, eds., *Southern Europe and the Financial Earthquake: Coping with the First Phase of the International Crisis* (South European Society and Politics Special Issue, 14.1 2009; also published by Routledge).
- Daniele Albertazzi and Davide Vampa, *Populism in Europe: Lessons from Umberto Bossi's Northern League*, 2021
- Caroline Gray, *Territorial Politics and the Party System in Spain: Continuity and Change Since the Financial Crisis*, 2021

Assessment: Essay (100%, 5000 words) in the period between WT and ST.

Students will conduct independent research through a comparative analysis of two countries in Southern Europe and write an essay on a topic relevant to the politics of these countries. Students will choose their topics in consultation with the instructor.

EU4A6 Half Unit Not available in 2024/25

Reconciliation and Crisis: Politics in Southern Europe

This information is for the 2024/25 session.

Teacher responsible: Professor Yaprak Gursoy CBG 7.04

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: When compared with their Northern counterparts, countries that lie on the Southern flank of Europe share different historical, political and socioeconomic trajectories. The interwar period that witnessed civil wars, authoritarianism and coups d'état transitioned into a more stable period through democratisation and EU membership in the 1970s-1990s. EU4A8 Half Unit

Migration From Below: Theories and Lived Experiences of Borders

This information is for the 2024/25 session.

Teacher responsible: Dr Eva Polonska-Kimunguyi

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the European Institute, so students from outside this programme may not get a place.

Course content: This course will explore mobility and borders as sites of contestation and focus on perspectives rising from the (everyday) practices of migration in Europe and beyond. Migration is part of human condition, however, in the contemporary media and political debates it is often approached through a framework of crises or a problem to be solved. Unlike this static approach to societies, this course takes distance from the normative lens of the nation-state and its control apparatus to the movement of people. It will introduce critiques of methodological nationalism, address issues of decolonisation and postcolonial condition in migration studies and examine mobility and rights as differentially accessed resources defined by global hierarchies.

The course is divided into two parts. The first part provides a historical and conceptual overview of the questions related to

border regimes, modern state formation, and rights. We will examine the historical development of border regimes in Europe and in the USA, their relation to colonial legacies and control of labour force, and how these formations inform contemporary understandings of the movement of people. Then we move to explore the core concepts, such as race, ethnicity, and nation, examine critically the categories of migration, and acquire an understanding of the international legal agreements concerning the movement of people. After orientating in concepts and providing a framework for discussion, we will move to more empirical accounts of the contemporary movement of people discussing themes such as lived experiences of border crossings, citizenship and illegality, diasporic and borderland identities, detention and deportations, and experiences of labour migration. Along the way, we will also discuss the ethical and political implications of researching (im)mobilities.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: There are three pieces of formative coursework designed to help students prepare for their summative essay:

1. Seminar discussion and presentation on the readings of the week that are relevant to your essay topics.
2. Weekly Moodle posts related to the readings.
3. Research question & long (500-word) abstract together with annotated bibliography submitted on the reading week.

Indicative reading: 1 Shahram Khosravi (2010). 'Illegal' Traveller: An Auto-Ethnography of Borders. New York: Palgrave.

Assessment: Essay (100%, 4000 words) in the WT.

Essay on a topic of your choice formulated with the instructor.

EU4A9

European Politics, Conflict and Culture: LSE-Columbia European Seminar

This information is for the 2024/25 session.

Teacher responsible: Dr Denisa Kostovicova CBG 7.03

This course is co-convened with Dr Tsveta Petrova at Columbia.

Availability: This course is compulsory on the MSc in Culture and Conflict in a Global Europe (LSE & Columbia). This course is available on the MSc in Culture and Conflict in a Global Europe and MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po). This course is not available as an outside option.

This course is only available to European Institute students.

Course content: Faculty from LSE and Columbia alternate to lead workshop sessions, presenting their research and leading

critical discussion with students on topics in the fields of European politics, conflict and culture, or facilitating discussions with guest speakers (scholars or practitioners) on these topics. The range of potential topics covered in the workshop matches the wide thematic range of the double degree programme. Students will be introduced to some of the long-standing debates over the origin and dynamics of contemporary European politics, economies, societies, and cultures. They will also explore how culture structures conflicts across political, economic, and social domains and frames effort at their resolution.

Teaching: 7 hours and 30 minutes of seminars in the AT. 7 hours and 30 minutes of seminars in the WT.

The workshop convenes 5 times a term in Autumn and Winter Term. The sessions are 90 minutes long. They will be hosted on-line, or in a hybrid format (in two seminar rooms, one at the LSE and the other one at Columbia, where the seminar participants are connected via a video link).

Formative coursework: This course is unassessed.

Indicative reading:

- S Glendinning, *Europe: A Philosophical History*, Part 1: The Promise of Modernity (Routledge 2021)
- J Jackson Preece, *Minority Rights: Between Diversity and Community* (Polity 2005)

- T Petrova, *From Geopolitics to Solidarity* (Cambridge University Press 2014).
- A Tooze, *The Wages of Destruction: The Making and Breaking of the Nazi Economy* (Allen Lane 2006)
- D Kostovicova, *Reconciliation by Stealth: How People Talk About War Crimes* (Cornell University Press 2023)

Additional reading

- B Anderson, *Imagined Communities: Reflections on the Origin & Spread of Nationalism* (Verso, 2016)
- Z Bauman, *Wasted Lives: Modernity & its Outcasts* (Wiley, 2003)
- L Colley, *The Gun, the Ship and the Pen: Warfare, Constitutions and the Making of the Modern World* (Profile 2021)
- A Pagden, *The Idea of Europe, from Antiquity to the European Union* (Woodrow Wilson 2010)
- R Scruton, *The West and the Rest, Globalization and the Terrorist Threat* (Bloomsbury, 2003)
- R Wodak, *Right-wing Populism in Europe* (Bloomsbury, 2013)
- S L Woodward, *The Ideology of Failed States: Why Intervention Fails* (Cambridge University Press, 2017)

Assessment: This course is unassessed.

EU4B1 Half Unit

Political Elites, Leadership, and Decision-Making

This information is for the 2024/25 session.

Teacher responsible: Dr Miguel Pereira (CBG.6.06)

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan) and MSc in Political Economy of Europe (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Course content: In public discourse, politicians and decision-makers are often described as resourceful, opportunistic actors driven by selfish interests. Reality is considerably more nuanced and less Machiavellian. Politicians often lack resources to make informed decisions, suffer from cognitive biases, and rely on misperceptions and stereotypes that are ultimately reflected on policy. Political elites are also responsible for a great deal of unrecognized work that cannot be explained simply by the desire to be re-elected. This course introduces students to the study of political elites and decision-making in European countries, drawing from historical and contemporary research in political science, psychology, and sociology. The course will pool insights from scholarship on elite behaviour in subnational, national, and supranational governments. Throughout the term we will learn: What drives individuals to run for office? How do politicians learn about policies? How do politicians coordinate with each other and make decisions? How do psychological biases influence the behaviour of politicians, and how can these biases be overcome? How do representatives build their image of the electorate? How do parties constrain legislators? By focusing on political elites, the course will help students understand the underlying challenges of the policymaking process as well as the pitfalls of representative democracy in Europe. More importantly, it will provide tools for students to address these challenges.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT. 1 hour and 30 minutes of seminars in the ST. Students will develop collaborative research projects on elite behaviour in three stages. First, students will work in groups to develop research questions related to topics in elite behaviour and political decision-making. Second, they will design a survey instrument to answer this question. Finally, students will have the opportunity to implement these survey instruments in the European Panel of Local Officials (EPLO) if approved by an external committee. EPLO is an international survey of local elected officials (mayors and council members) in seven European countries. This practical opportunity will allow students to test with real politicians some of the research questions covered in class. Students will be given detailed instructions about the project in week 2 so that they can start to work on this over the term.

Formative coursework: 1 x Individual oral Presentation, these will take place throughout WT.

1 x Research Proposal (research question + survey instrument), due in WT week 11 (1,000 words). Group work.

Indicative reading:

- Dahl, Robert A. (1961/2005). *Who Governs?*. New Haven: Yale University Press.

- Sheffer, L., Loewen, P. J., Soroka, S., Walgrave, S., & Sheaffer, T. (2018). Nonrepresentative representatives: An experimental study of the decision making of elected politicians. *American Political Science Review*.
- Pereira, M. M. (2021). Understanding and reducing biases in elite beliefs about the electorate. *American Political Science Review*.
- Payne, James L. et al. (1984) *The Motivation of Politicians*. Chicago: Nelson Hall
- Zelizer, A. (2019). Is position-taking contagious? evidence of cue-taking from two field experiments in a state legislature. *American Political Science Review*.
- Broockman, D. E., & Butler, D. M. (2017). The causal effects of elite position-taking on voter attitudes: Field experiments with elite communication. *American Journal of Political Science*.

Assessment: Online assessment (100%) in the ST.

The online assessment for this course will be administered via Moodle. Questions will be made available at a set date/time and students will be given a set period in the ST to complete

the answers to questions and upload their responses back into Moodle.

EU4C9

Policy Incubator

This information is for the 2024/25 session.

Teacher responsible: Prof Iain Begg

Availability: This course is compulsory on the MSc in Political Economy of Europe (LSE and Fudan). This course is not available as an outside option.

This course is only available to European Institute Students.

Course content: Students will undertake a group project (in teams usually of 3 to 5 people) relating to a policy problem faced by an external organisation. Such organisations might be public sector bodies, companies operating in the public management or public policy sector, international organisations, think tanks and NGOs.

Teaching: This course is delivered through a combination of workshops and help sessions totalling a minimum of 5 hours across both the Autumn and Winter Terms. Some or all of this teaching will be delivered through a combination of in-person and/or group virtual help sessions with an assigned Policy Incubator Supervisor, and student group presentations. This course includes a reading week in Week 6 of the Autumn and Winter Terms.

Formative coursework: During the WT, students will present their project and policy proposals in a group presentation to a jury of policy incubator supervisors and institutions' representatives. Relevant alumni, members of faculty and/or visiting fellows will also be invited to attend for the purposes of providing feedback. Each group presentation will be followed by questions and comments from the jury.

Indicative reading: Useful preliminary reading:

- Charles E. Lindblom and David K. Cohen, *Social Science and Social Problem Solving* (New Haven: Yale University Press, 1979);
- Martha S. Feldman, *Order Without Design: Information Production and Policy-making* (Stanford, CA: Stanford University Press, 1989);
- Ray Pawson, *Evidence-based Policy: A Realist Perspective* (London: Sage, 2006);
- Common Causes of Project Failure (London: OGC, 2004);
- Howard White, *Theory-based Impact Evaluation: Principles and Practice* (3ie, 2011);
- Curtis Cook, *Just Enough Project Management* (McGraw-Hill, 2004);
- J. E. McGrath and F. Tschan, 'Dynamics in Groups and Teams: Groups as Complex Action Systems',
- chapter three in M. S. Poole and A. H. Van de Ven (eds) *Handbook of Organizational Change and Innovation* (Oxford University Press, 2004).

Assessment: Policy brief (30%) in the WT.

Policy paper (70%) in the post-spring term.

Students are asked to present a group report in the form of a policy advocacy brief (3000 words, 30%). They will then, individually, submit a full policy report in which they discuss alternative policy options and evaluate their suggested policy solutions (7000 words, 70%).

FM402 Half Unit

Financial Risk Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Yves Nosbusch

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only)

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director.

This course is available to other students from the Departments of Economics, Mathematics, and Statistics where regulations permit.

This course is not capped, any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: The course assumes a basic knowledge of finance theory, statistics and mathematics (calculus, linear algebra).

Course content: This course aims to provide an overview of the main theoretical concepts underlying the analysis of financial risk and to show how these concepts can be implemented in practice in a variety of contexts. This course shares some topics with FM442 Quantitative Methods in Finance and Risk Analysis. The course will include a selection of:

- 1 Conceptual foundations: diversification, hedging and their limits
- 2 Fixed income securities
- 3 Options and dynamic replication
- 4 Value at Risk
- 5 Endogenous risk
- 6 Ideas from Behavioural Finance
- 7 Credit risk (ratings based models, structural models, reduced form models)
- 8 Credit derivatives

Teaching: 30 hours of lectures in the AT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Students will be expected to produce 8 problem sets in the AT.

Indicative reading: Course readings will vary from year to year depending upon the topics covered. Useful references are M Crouhy, D Galai and R Mark, Risk Management, McGraw-Hill, 2001; P Jorion, Value at Risk, McGraw-Hill, 2007; J Hull, Risk Management and Financial Institutions, Prentice-Hall, 2023; J Hull, Options, Futures and Other Derivatives, Prentice-Hall, 2021 and D Duffie and K Singleton, Credit Risk, Princeton University Press, 2003.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

FM403

Management and Regulation of Risk

This information is for the 2024/25 session.

Teacher responsible: Professor Martin Oehmke

Availability: This course is compulsory on the MSc in Finance and Risk. This course is not available as an outside option. This course does not permit auditing students.

Course content: This course introduces students to the foundational concepts and key issues in risk management, financial intermediation, and financial regulation.

The course covers (i) different aspects of market and non-market risk including their measurement and management and (ii) the nature, fragility and regulation of financial intermediation. Specific topics covered include the purpose of risk management, risk measures (e.g., Value-at-Risk, Expected Shortfall), the institutional details of financial institutions and their special functions, and canonical models of financial intermediation (liquidity transformation, monitoring, private money creation). These models will serve as a foundation to understand and assess the regulation of banks and other financial market participants.

Teaching: 60 hours of seminars in the AT.

Formative coursework: Students will be given weekly problem set assignments.

Indicative reading: Lecture Notes and additional course readings

that will be made available on Moodle.

Additional background reading: J. Hull, Risk Management and Financial Institutions, 5th Edition, 2018; P Jorion, Value At Risk 3rd Edition 2006; (McGraw Hill); X Freixas and J-C Rochet, The Microeconomics of Banking 3rd Edition, 2023.

Assessment: Continuous assessment (100%).

This includes mandatory attendance of Deutsche Bank seminars in WT.

A substantial (10,000 word) thesis, due in August, is an integral part of the course and represents 50% of the assessment.

FM404 Half Unit

Advanced Financial Economics

This information is for the 2024/25 session.

Teacher responsible: Professor Péter Kondor

Availability: This course is available on the MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

This course is not capped, any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: Students must have completed Financial Economics (FM436).

Course content: Advanced Financial Economics provides an introduction to the academic side of Finance. The course touches upon various topics of active research ranging from frictions in asset markets derived from asymmetric information, illiquidity, decentralized trading or speculative bubbles to the interaction of corporate finance and the macroeconomy. The course is targeted to students who are interested in how abstract models can be used to understand better the causes and consequences of existing and potential problems in financial markets. Additional information can be found on Moodle (for current students).

Teaching: 30 hours of seminars in the WT.

There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular problem sets.

Indicative reading: Lecture notes will be provided, and journal articles will be required to be read.

Assessment: Continuous assessment (100%).

FM405 Half Unit

Fixed Income Securities and Credit Markets

This information is for the 2024/25 session.

Teacher responsible: Prof Peter Kondor

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course is not capped, any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: Students must have completed either Asset Markets (FM423) and Corporate Finance (FM422) or Financial Economics (FM436)

Course content:

- Interest rate modelling and derivatives
- Credit risk
- Credit derivatives and risk management

This course provides a thorough grounding in recent developments in fixed income securities pricing, hedging and portfolio

management.

By the end of the course, the students will be familiar with the fixed income state of the art business practice and a variety of topics including (i) an analysis of the main products traded in the credit markets, such as government and corporate bonds, bond options, swaps, caps, floors, swaptions, callable, puttable and convertible bonds, and an analysis of the main credit derivatives such as total-return swaps, spread options and credit default swaps; (ii) the specific tools used in the industry practice to evaluate and hedge these products, which range from no-arbitrage trees and the calibration of yield curve derivatives to the main tools used to monitor and manage credit risk; (iii) the process of securitization, with particular reference to collateralized default obligations and mortgage-based securities.

Teaching: 30 hours of lectures in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Indicative reading: The primary source for this course is a comprehensive set of Lecture Notes, tutorials and case studies and the main reference is Pietro Veronesi: *Fixed Income Securities*, (Wiley 2010).

Assessment: Continuous assessment (100%).

FM406 Half Unit Topics in Portfolio Management

This information is for the 2024/25 session.

Teacher responsible: Dr Michela Verardo

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course is not capped, any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: Students must have completed either Asset Markets (FM423) and Corporate Finance (FM422) or Financial Economics (FM436)

Course content:

- Portfolio optimization and the Black-Litterman model
- Dynamic Investment Strategies
- Selecting and Monitoring Portfolio Managers: Mutual funds and hedge funds
- Transactions Costs and Liquidity Risk

The course covers a wide range of topics in portfolio management, with a strong focus on empirical applications. The first part of the course reviews the basics of portfolio theory and develops the Black-Litterman approach to portfolio optimization. The second part of the course introduces students to the implementation of several dynamic investment strategies and to the estimation of their performance; portfolio strategies include size, value, momentum, betting-against-beta, and quality-minus-junk. The third part of the course focuses on selecting and monitoring portfolio managers, with particular emphasis on the identification of selectivity, allocation, and timing skills for mutual funds and hedge funds. The last part of the course examines trading costs and liquidity risk, as well as their impact on the profitability of investment strategies. The course is based on recent empirical studies and applied exercises using financial data.

Teaching: 30 hours of lectures in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Students will be expected to complete coursework regularly.

Indicative reading: A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are: *Investments*, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin; *Modern portfolio theory and investment analysis*, by E. J. Elton, M. J. Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; *Modern investment management*, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press.

Assessment: Continuous assessment (100%) in the WT.

FM407 Half Unit Mergers, Buyouts and Corporate Restructurings

This information is for the 2024/25 session.

Teacher responsible: Professor Amil Dasgupta & Professor Alexander Gorbenko

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course is not capped, any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).

Course content:

- Financial analysis of corporate transactions
- Mergers and acquisitions
- Leveraged buyouts
- Corporate restructuring in financial distress
- Shareholder activism

This course focuses on the strategy, valuation and execution of corporate deals. In particular, the course examines several key types of transactions including mergers and acquisitions, leveraged buyouts, restructuring in financial distress, and shareholder activism. The course combines in-depth analysis based on financial economics drawing on academic research with a sustained focus on institutional details, utilizing a number of case studies to support the learning process.

Teaching: 30 hours of seminars in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Students will be expected to complete coursework regularly.

Indicative reading: A course pack will be distributed that includes case studies as well as additional readings such as textbook chapters, and practitioner articles.

Assessment: Continuous assessment (100%) in the WT.

FM408 Half Unit Financial Engineering

This information is for the 2024/25 session.

Teacher responsible: Dr Jean-Pierre Zigrand

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course does not permit auditing students.

Pre-requisites: Students must have completed either Asset Markets (FM423 or FM423E) and Corporate Finance (FM422 or FM422E) or Financial Economics (FM436)

Students will be expected to show some familiarity with calculus (including stochastic calculus) and statistics

Course content: This course provides a thorough grounding in the theory and practice of financial engineering. The emphasis is on the application of derivatives pricing and hedging methodology to equity and volatility derivatives and to structured products.

The course aims to cover the basics in derivatives theory, and to apply them to a multitude of financial securities and structured products, with a special emphasis on recent products in the equity and volatility derivative worlds. We review selected case studies in order to gain a better understanding of their practical usage. We also implement the models numerically in R.

Teaching: 30 hours of lectures in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Indicative reading: Based on a set of extensive lecture notes. No one book covers the material of the entire course. Books recommended include *The Volatility Surface: A Practitioner's Guide*, 2nd Edition, by Jim Gatheral, and *The Volatility Smile* by Derman, Miller and Parik. Background reading can be found in *Volatility: Practical Options Theory* by Adam Iqbal, *Derivatives Markets* by Robert McDonald or *Options, Futures and Other Derivatives* by John Hull.

Assessment: Continuous assessment (100%) in the WT.

FM409 Half Unit Risk Management in Financial Markets

This information is for the 2024/25 session.

Teacher responsible: Dr Christian Julliard

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course does not permit auditing students.

Pre-requisites: Students must have completed either Asset Markets (FM423 or FM423E) and Corporate Finance (FM422 or FM422E) or Financial Economics (FM436)

Course content:

- Hedging in equity and fixed income markets
- Market Risk, Value at Risk and Expected Shortfall
- Endogenous Risk and Limits to Arbitrage
- Credit risk and structured products

The aim of this course is to offer an introduction to the analysis and management of risk within financial markets. The course develops a conceptual framework for thinking about financial risk and shows how these concepts are implemented in practice in a variety of contexts. First, the course offers an overview of risk management in the context of portfolios of fixed income securities and derivatives. Next, we discuss the implementation and the merits of Value at Risk measures. We will spend some time on endogenous risk and limits to arbitrage. In the context of credit risk we will cover ratings based and structural models, as well as credit risk on portfolios and credit derivatives. A final topic covers regulation and the recent credit crisis. Throughout, the course spends a significant amount of time on practical applications of the theories that are introduced. Some limitations of current approaches are also discussed.

Teaching: 30 hours of lectures in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Problem sets. In addition, students will have the opportunity to present the results of a case study to the class.

Indicative reading: Course readings will vary from year to year depending upon the topics covered. The main reference is: John C. Hull, *Risk Management and Financial Institutions*, Wiley, 2015, 4th edition.

Additional useful references are: Michel Crouhy, Dan Galai and Robert Mark, *Risk Management*, McGraw-Hill, 2001. Philippe Jorion, *Value at Risk*, McGraw-Hill, 2007, 3rd edition. Jon Danielsson, *Financial Risk Forecasting*, Wiley, 2011. John C. Hull, *Options, Futures and Other Derivatives*, Pearson, 2012, 8th edition. Darrell Duffie and Ken Singleton, *Credit Risk*, Princeton University Press, 2003.

Assessment: Continuous assessment (100%) in the WT.

FM410 Half Unit Private Equity

This information is for the 2024/25 session.

Teacher responsible: Prof Per Stromberg

Availability: This course is compulsory on the MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is available on the MSc in Finance (full-time) and MSc in Finance (full-time) (Work Placement Pathway). This course is not available as an outside option. This course does not permit auditing students.

Course content:

- Evaluating and executing Private Equity Deals
 - Business Plans, Venture Capital, and Entrepreneurial Finance
 - Private Equity as an asset class and the private equity landscape
- This course provides a thorough grounding in the theory and recent developments in the field of private equity.

Starting by examining how private equity funds are raised and structured the course will examine how private equity can be used in start-ups, in scaling-up cash flow businesses, and in restructuring firms facing financial distress. The course explores the link between private and venture capital on the one hand and public securities markets on the other. The course will examine the process through which private equity investors exit their investments. The course will also give a detailed analysis of the types of finance used in private equity and an evaluation of the short and long-run performance of private equity investments. The course will include an evaluation of the performance of different types of private equity investment and a comparison with other forms of ownership will be undertaken.

This course takes a rigorous theoretical examination of private equity. It also employs some case study teaching and is taught in conjunction with a range of practitioners in the field.

Teaching: 30 hours of lectures and 30 hours of seminars in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Each week there will typically be a formative case study assignment (similar to summative cases).

Indicative reading: Ulf Axelson, Tim Jenkinson, Per Strömberg, and Michael S. Weisbach. *Leverage and Pricing in Buyouts: An Empirical Analysis*. August 28, 2007; Steven N. Kaplan and Per Strömberg. *Leveraged Buyouts and Private Equity*, Social Science Research Network, June 2008; Cendrowski, Harry. *Private Equity: Governance and Operations Assessment*. Hoboken: John Wiley & Sons. 2008; Lerner, Joshua. *Venture Capital and Private Equity: A Casebook*. New York: John Wiley & Sons. 2000; Acharya V V; Franks J R & Servaes H (2007) "Private Equity: Boom and Bust?" *Journal of Applied Corporate Finance*, 19(4), Fall 2007, 44-53.

Assessment: Continuous assessment (100%) in the WT.

FM411

Finance Work Placement and Assessment

This information is for the 2024/25 session.

Teacher responsible: MSc Academic Programme Director

Availability: This course is compulsory on the MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Economics (Work Placement Pathway) and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course must be taken in addition to the full 4 units of courses prescribed by the programme regulations. Completion of the work placement and assessment is a requirement for students to be eligible for graduation from the Work Placement Pathway.

Pre-requisites: The Finance Work Placement and Assessment is only available to students who are registered on the Work Placement Pathway for the following programmes: MSc in Finance (full-time), MSc in Finance and Private Equity or MSc in Finance and Economics. Students must complete the work placement and assessment in addition to four full units of courses, as described in the programme regulations.

Course content: There are no classes for this course. Students instead undertake a work placement during which they will be employed by an external company or institution. However, the work placement should be relevant to the topics studied during the student's academic modules, and be likely to build on and enhance topics studied during the year. Academic modules studied during the programme should also have a direct bearing on the role that a student will undertake on their placement. Students must hold a formal offer in writing of an appropriate work placement before approval will be granted to join the work placement pathway, and the aspects outlined above will be considered by the Department before approval to undertake a placement is granted. The student will be an employee of the relevant company or institution for the duration of the placement; they will be expected to undertake tasks as appropriate and all management of the placement will be undertaken by the employing institution or company. The course will be assessed by an essay which students are required to submit to the Department of Finance at the end of the placement.

Teaching: There will be no direct teaching for this course. Students will participate on a work placement which will be entirely delivered and managed by the company or institution with which they are employed. Students' learning and experience will be gained through participation in the placement as an employee of that company and they will be required to submit an assessed essay to the Department of Finance upon completion of the placement.

Formative coursework: There is no formative coursework for this course. Students will participate on a work placement which will be entirely delivered and managed by the company or institution with which they are employed. Students' learning and experience will be gained through participation in the placement as an employee of that company and they will be required to submit an assessed essay to the Department of Finance upon completion of the placement.

Assessment: Essay (100%, 2000 words) in the post-spring term. The assessment of the work placement will be on the basis of submission of a written piece of work following completion of the work placement. Students will be required to submit their work to the Department following completion of the placement. The essay will be required to be in the region of 2,000 words in which the student should describe:

- How the work placement built on or shed further light on the topics covered during the programme's academic modules, and/or how the elements of theory learned were applied in practice;
- How topics covered in the academic modules were relevant to the student's role on the work placement;
- How/whether the academic and pastoral aspects of the programme prepared students for their experiences in the workplace;
- What the student feels they have learned from the placement.

The essay submission will be marked on a Pass/Fail basis. Students will need to demonstrate that they have fully addressed

the topics described above, evidenced with examples from their placement, to be eligible for a pass mark. Students enrolled on the work placement pathway must satisfactorily complete the work placement and assessment in order to be eligible for graduation from the work placement pathway.

FM412 Half Unit

Quantitative Security Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Jean-Pierre Zigrand

Availability: This course is available on the Global MSc in Management, MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in Finance and Private Equity (Work Placement Pathway) and MSc in Finance and Risk. This course is not available as an outside option. Global MSc in Management (Accounting and Finance concentration only)

This course is not capped, any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: Some familiarity with finance and accounting.

Course content: This applied course uses theoretically well-founded quantitative analysis tools to uncover value in equity, debt, property, credit and volatility markets.

A simple fundamental valuation concept guides the student along a consistent, unified and logical thread in search of finding value in all of those markets.

Determining whether an asset class is of good or poor value also relies on an awareness of the macroeconomic and macrofinancial environment. Macroassets, such as fixed income and global equities markets, reflect this macro environment and are in turn required inputs into the valuation of both macro- and microassets. In this manner, we get by design a view that is coherent across markets.

For instance, the state of the macroeconomy (such as the phase of expansion and recession, the real estate cycle, the inflationary environment, the central bank rate setting policy, or the level of financial stability and risk) is shown to be mirrored in the nominal and real yield curves as well as in the macro risk-premia of the debt, equities and property markets that in turn trickle down to influence the value considerations of all of the micro-assets, including individual equities or credit.

Armed with these tools, we can then study how, in real life, style investors such as value, growth, quality or momentum approach the question of finding good deals from their own vantage points in the given macro environment. We cover colourful case studies, some of which possibly live, that include the detailed modelling of real-life corporate events via Excel spreadsheets based on the careful study of financial statements, balance sheets and analyst reports. Does management create or destroy value? Does growth create value, and how does one value growth? Is there a case for an activist restructuring of P&G? Is Amazon overpriced compared to other bricks and mortar retailers? Should Amazon be priced as a cloud provider? Is property overvalued? How would a value investor approach Intel, and would they buy Intel? Is value dead? How can value be complemented by quality? Is volatility overpriced?

Part I. Introduction. The challenge of active investing. The importance of NPV.

Part II. Valuation methodology

Part III. Valuing macroassets: Global Yield Curves

Part IV. Valuing macroassets: Diversified Equity Portfolios

Part V. Methodology: RADR, DDM

Part VI. Valuing macroassets: Property

Part VII. Valuing microassets: Equities Valuation

Part VIII. Valuing microassets: Case Studies in Value and Growth

Part IX. Different Styles for Identifying Value in Individual Equities

Part X. Valuing macroassets: Volatility

Teaching: 30 hours of seminars in the WT.

Formative coursework: Students will be expected to complete 2 group projects. In the first project, students study the historical performance of a chosen publicly traded company and analyse and value the equity on a forward-looking basis, evaluate its risks and make an investment recommendation. The second project requires the students to study and critically examine the investment decisions and style of a well-known value investor.

Indicative reading: Books

- Greenwald, B, Kahn, J., P. Sonkin, M. van Biema, Value Investing: From Graham to Buffett and Beyond, Wiley Finance, 2004.

Background reading:

- Koller, T., M. Goedhard, and D. Wessels (McKinsey and Company), Valuation: Measuring and Managing the Value of Companies, Wiley, 2015.

Numerous articles written by well-known practitioners and policy makers

Assessment: Continuous assessment (100%) in the WT.

FM413 Half Unit Fixed Income Markets

This information is for the 2024/25 session.

Teacher responsible: Professor Richard Payne

Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Finance and Risk, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director.

This course is available to other students from the Departments of Economics, Mathematics, and Statistics where regulations permit.

This course is not capped, any eligible student that requests a place will be given one.

Pre-requisites: Students taking this course are expected to be familiar with the theory of asset evaluation at the level of FM429 Asset Markets A.

Course content: This advanced course is designed for students seeking an understanding of fixed income valuation and hedging methods, and a basic familiarity with the major fixed income markets and instruments.

By the end of the course, the students will be familiar with a variety of topics, including (i) the basic concepts of fixed-income instruments, such as yield, duration, convexity; (ii) the basic techniques to analyse and hedge fixed income products, such as "curve fitting", "bootstrapping", duration-based hedging and asset-liability management; (iii) the forces, or "factors", driving the variation in the entire spectrum of interest rates at different maturities; (iv) the main evaluation tools, which can be applied to evaluate a wide range of products (trees, no arbitrage trees, calibration and some continuous time models); (v) the main fixed income products such as government bonds, corporate bonds (convertible, callable, puttable), and their evaluation; (vi) plain vanilla interest derivatives (caps, floors and collars, swaps, swaptions, etc.) and their evaluation; (vii) mortgage backed securities and credit risk transfers; (viii) the analysis of the "destabilizing" effects related to the use of certain derivatives written on fixed income instruments.

Teaching: 20 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 10 problem sets in the WT.

Indicative reading: The primary source for this course is a comprehensive set of Lecture Notes, tutorials and case studies, and a reading pack containing chapters from the following books: Sundaresan, S. (2001), Fixed Income Markets and Their Derivatives, South Western College Publishing. Duffie, D and Singleton, K (2003), Credit Risk: Pricing, Management, and Measurement, Princeton: Princeton University Press (Princeton

Series in Finance). Tuckman B. and A. Serrat (2011), Fixed Income Securities: Tools for Today's Markets, 3rd Edition, John Wiley & Sons. Veronesi, P. (2010), Fixed Income Securities: Valuation, Risk, and Risk Management, John Wiley & Sons.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

FM414 Half Unit Corporate Investment and Financial Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Ashwini Agrawal

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course is not capped, any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: Students must have completed Asset Markets (FM423) and Corporate Finance (FM422).

Course content: This is a case-based course that is geared towards applying corporate finance and investment valuation tools in a variety of real-world settings. Particular emphasis will be placed upon understanding the strengths and limitations of academic approaches to solving real-world problems. We will also discuss when and how these tools are used in various professional settings such as private equity/investment banking, buy-side research, and consulting. Some of the topics that we will cover include:

- Valuation of venture-capital based startups
- Risk management and hedging international currency exposures
- Valuation techniques for private vs. public firms
- IPO pricing
- Determining optimal capital structure
- Working capital management

Weekly case studies will be assigned and discussed in class.

Teaching: 30 hours of seminars in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Assessment: Continuous assessment (100%) in the WT.

FM421 Half Unit Finance for Mergers, Buyouts and Corporate Restructurings

This information is for the 2024/25 session.

Teacher responsible: Professor Pedro Saffi

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Econometrics and Mathematical Economics, MSc in Economics and Management, MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway) and MSc in Finance and Risk. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not capped for Department of Finance students; any students that request a place in Autumn Term will be given one. For students from other departments who meet the necessary criteria (outlined below), you are likely to be given a place, but this is not guaranteed. Chances of gaining a place on this course are increased if it is selected during initial course selection in the Autumn Term.

Students on the MSc in Global Management ('Accounting and Finance' and 'Finance' concentrations only).

Students on any programme other than the MSc in Finance

and Economics, or the MSc in Finance and Economics (Work Placement Pathway), may only take this course if they have taken at least one of the following courses in the **Autumn Term**: FM474A Managerial Finance or FM431A Corporate Finance A. There will be no exceptions to this rule.

This course does not permit auditing students.

Pre-requisites: This is an advanced applied course and a thorough understanding of the major theoretical issues and concepts is required.

There are no pre-requisites for students on the MSc in Finance and Economics or the MSc in Finance and Economics (Work Placement Pathway).

Students on all other programmes must have taken one of the following courses in the Autumn Term as a pre-requisite: FM473A Financial Markets, FM474A Managerial Finance or FM431A Corporate Finance A.

Course content: This course is designed to help students learn how to apply various theoretical frameworks to solve real-world problems that are commonly faced by corporate managers, investors, and entrepreneurs. The course will likely be useful for students who plan to pursue a professional career in finance or an academic career in finance and economics.

Teaching: 30 hours of seminars in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

This course will be taught in two separate groups. Each group will meet for a single block of three hours once a week. Each student will be assigned to one group. Students will **not** be allowed to choose their groups or to switch groups.

The course requires weekly in-class activities and discussions. Students must prepare for class activities in advance. Attendance is required.

Formative coursework: Weekly assignments based on case studies will be assigned to students. Each case's assignment questions will be discussed in class.

Indicative reading: Course materials (lecture notes and case studies) will be provided to the students at the start of the course.

Assessment: Exam (80%, duration: 2 hours and 30 minutes) in the spring exam period.

Coursework (20%) in the WT.

FM422

Corporate Finance

This information is for the 2024/25 session.

Teacher responsible: Professor Daniel Ferreira
Professor Dirk Jenter

Availability: This course is compulsory on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course does not permit auditing students.

Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

Course content:

- Financing
- Valuation

This core course provides a broad introduction to the key issues in corporate finance. The first half of the course, the Financing Module, investigates how companies finance their activities by issuing securities (debt, equity and convertible claims) and how business policy interacts with financial policy. The aim is to understand what factors determine optimal capital structures and how the interplay of these factors affects financing decisions. The second half of the course, the Valuation Module, covers firm and project valuation and establishes how companies should select among investable assets. The module focuses on fundamental

valuation techniques based on discounting future cash flows. The course goes on to introduce further valuations methods, such as real options analysis, as well as key applications of valuation concepts to major corporate decisions such as mergers and acquisitions and initial public offerings. The course interweaves key conceptual material with a series of cases.

Teaching: 60 hours of lectures in the AT.

This course is taught in an interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular homework will be completed as part of the formative assessment for this course.

Indicative reading: The recommended textbook for this course is Berk and DeMarzo, Corporate Finance. Other recommended readings will be included in a study pack.

Assessment: Continuous assessment (100%) in the AT.

FM423

Asset Markets

This information is for the 2024/25 session.

Teacher responsible: Dr Igor Makarov and Dr Georgy Chabakauri

Availability: This course is compulsory on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course does not permit auditing students.

Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

Course content:

- Investments and Securities Valuation
- Portfolio choice and performance evaluation
- Derivatives

The aim of the course is to familiarize students with the workings of financial markets, and equip them with the fundamental tools of asset valuation. The course will focus on the three main asset classes - fixed income, stocks, and derivatives - giving a unified perspective of modern valuation methods. The starting point will be the present value formula. The course will then proceed to fixed-income securities, focusing mainly on government bonds. These will be valued off the term structure of interest rates, using the present value formula. The connection with the principle of no-arbitrage will be emphasized. The course will then move to stocks, starting with portfolio theory and then deriving the relation between risk and return (CAPM). The CAPM will provide a risk-adjusted discount rate that will be used to discount stocks' cash flows with the present value formula. Alternative pricing models such as the APT and multi-factor models will also be covered, and the models will be applied to issues of asset allocation and portfolio selection. The last topic will be derivatives, especially futures and options. After familiarizing students with the use of derivatives, the course will cover the main valuation methods (binomial model, Black-Scholes) emphasizing again the principle of no-arbitrage.

Teaching: 60 hours of lectures in the AT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Students will be expected to complete coursework regularly.

Indicative reading: The organisation of topics of the course follows closely the treatment in Berk and DeMarzo, Corporate Finance, 6th Edition, Pearson International, and Bodie, Kane and Marcus, Investments, 12th Edition, McGraw Hill. Other recommended readings and case studies will be included in a study pack.

Assessment: Continuous assessment (100%) in the AT.

FM429 Half Unit Asset Markets A

This information is for the 2024/25 session.

Teacher responsible: Dr James Clark

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme), MSc in Financial Mathematics, MSc in Real Estate Economics and Finance, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

Global MSc in Management (Accounting and Finance Concentration only)

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director.

This course is available to other students from the Departments of Mathematics and Statistics where regulations permit.

For students from other departments who meet the necessary criteria (if applicable), you are likely to be given a place, but this is not guaranteed. Chances of gaining a place on this course are increased if it is selected during initial course selection in the Autumn Term.

This course cannot be combined with FM473 Financial Markets or FM474 Managerial Finance.

Outside students should consider the alternative option of FM473 Financial Markets or FM474 Managerial Finance.

This course does not permit auditing students.

Pre-requisites: Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised.

Course content: This course aims to equip students with the fundamental concepts and tools underlying the asset markets side of modern finance. The course covers asset markets and valuation. The valuation of fixed-income securities is covered first, followed by the valuation of stocks, and derivatives such as futures and options. Concepts emphasized include the present-value formula, valuation by arbitrage, portfolio theory, the CAPM, market efficiency, and binomial and Black-Scholes models.

Teaching: 20 hours of lectures and 10 hours of seminars in the AT.

Formative coursework: Weekly problem sets covered in classes.

Indicative reading:

- J. Berk and P. DeMarzo, Corporate Finance, Pearson International Edition.
- Z. Bodie, A. Kane and A. Marcus, Investments, 8th edition, McGraw Hill. ISBN:0-07-338237-X

Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

Assessment: Exam (100%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the spring exam period.

FM431A Half Unit Corporate Finance A

This information is for the 2024/25 session.

Teacher responsible: Dr Cynthia Balloch

Availability: This course is compulsory on the MSc in Economics and Management. This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Finance and Risk. This course is not available as an outside option.

Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director. This course is not available as an outside option.

Outside students should consider taking FM474 Managerial

Finance as an alternative option.

This course cannot be combined with FM474 Managerial Finance. This course is not capped, any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised.

Course content: The course provides a broad introduction to a range of key topics in corporate finance. The first part of the course investigates how companies finance their activities by issuing debt, equity, and other securities, and the interaction of business policy with financial policy. This illustrates the driving forces behind capital structure decisions and choices over debt and equity finance. Special consideration is given to the tax implications of those choices, the possible costs of financial distress, the incentive implications of financial decisions and the signalling impact of those for financial market participants. The second part of the course covers project valuation, discount rates, how future cash flows are discounted accounting for differences in capital structure and establishes how companies should select their investments. The course combines conceptual material with a series of cases, with an emphasis on the application of theory to real business decisions.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT.

Formative coursework: Students will be set weekly formative assignments. Solutions and guidance will be provided during the weekly lecture and seminar classes.

Indicative reading: J. Berk and P. DeMarzo, Corporate Finance, Pearson International Edition. Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

Assessment: Exam (90%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the January exam period.

Class participation (10%).

FM431W Half Unit Not available in 2024/25 Corporate Finance A

This information is for the 2024/25 session.

Teacher responsible: Professor Ulf Axelsson

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Econometrics and Mathematical Economics and MSc in Finance and Risk. This course is not available as an outside option. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only)

This course is available with permission on the Diploma in Accounting and Finance with the approval of the Programme Director.

This course is not available as an outside option.

Outside students should consider taking FM474L Managerial Finance as an alternative option.

This course cannot be combined with FM474 Managerial Finance. This course is not capped, any eligible student that requests a place will be given one.

Pre-requisites: Basic Mathematics and Statistics knowledge. The course is self-contained but it covers a broad set of topics. Some prior knowledge of economics, finance and accounting is advised.

Course content: The course covers range of topics in corporate finance starting with capital budgeting techniques, in relation to CAPM and other valuation instruments. The course then proceeds identifying the driving forces behind capital structure decisions and choices over debt and equity finance. Special consideration is given to the tax implications of those choices, the possible costs of financial distress, the incentive implications of financial decisions and the signalling impact of those for financial market participants. A final part of the course covers some specific topics in corporate finance: decision to go public, mergers and acquisitions and start-up finance (time permitting).

Teaching: 20 hours of lectures and 9 hours of seminars in the WT.
Formative coursework: Students will be set weekly problem set assignments. Solutions and guidance will be provided during the weekly seminar classes. The final seminar class, students will solve a formative mock exam. Students will receive individual feedback on the mock exam prior to the final exam.

Indicative reading: J. Berk and P. DeMarzo, *Corporate Finance*, Pearson International Edition. Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

Assessment: Exam (100%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the spring exam period.

FM436

Financial Economics

This information is for the 2024/25 session.

Teacher responsible: Prof Ian Martin and Prof Mike Burkart

Availability: This course is compulsory on the MRes/PhD in Accounting (EoA) (Economics of Accounting Track), MRes/PhD in Finance, MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

This course does not permit auditing to outside students.

Pre-requisites: Mathematical background at the level of the September Courses in Mathematics and Financial Economics Preparatory Course is assumed.

Course content: Financial Economics provides students with an in-depth introduction to the theories of asset pricing and corporate finance. The course analyses investors' behaviour, market equilibrium, the pricing of securities, the valuation of real assets, and capital structure choice. Topics in asset pricing will encompass portfolio choice, complete and incomplete markets, mean-variance portfolio theory and equilibrium asset pricing, pricing with no arbitrage, Black-Scholes and other contingent claims pricing models, and the behaviour of financial markets during crises. Topics in corporate finance will encompass valuation methods and financing decisions in the presence of taxation, agency frictions, and asymmetric information.

Teaching: 60 hours of lectures in the AT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Problem sets, covered in classes.

Indicative reading: Readings will be based on teaching notes and journal articles.

Assessment: In-class assessment (100%) in the ST. (Duration: 3 hours, reading time: 15 minutes)

FM437

Financial Econometrics

This information is for the 2024/25 session.

Teacher responsible: Dr Linyan Zhu (Autumn Term)

Dr Christian Julliard (Winter Term)

Availability: This course is compulsory on the MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

This course does not permit auditing students.

Pre-requisites: Mathematical background to the level of the course taught in September in the Economics Department (EC400) is assumed.

Course content: This course covers the techniques of empirical investigation in economics and finance. Students are introduced to recent empirical findings based on asset pricing and corporate finance models. The course includes a selection of the following

topics: multivariate regression; maximum likelihood estimation; hypothesis testing; omitted variables and misspecification; asymptotic theory; methods for causal inference; introduction to machine learning; time-series modelling; predictability of asset returns; event study analysis; econometric tests of the CAPM and multifactor models; volatility modelling; generalised method of moments estimation; introduction to Bayesian econometrics, model selection and model averaging, and large-scale modelling.

Teaching: 30 hours of lectures in the AT. 33 hours of lectures in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Exercises are provided each week and they are discussed in class.

Indicative reading: A complete reading list is available at the beginning of session. Readings will be based on Hansen, *Econometrics*; Hayashi, *Econometrics*; Hamilton, *Times Series Analysis*; Greene, *Econometric Analysis*, Prentice-Hall; Campbell, Lo & MacKinlay, *The Econometrics of Financial Markets*, Princeton University Press; *Econometric Analysis of Cross Section and Panel Data*, J. Wooldridge; *Contemporary Bayesian Econometrics and Statistics*, Wiley Series in Probability and Statistics, J. Geweke; selected published articles.

Assessment: Continuous assessment (100%).

FM439 Half Unit

Asset Markets for MSc Finance and Risk

This information is for the 2024/25 session.

Teacher responsible: Dr Cristina Scherrer

Availability: This course is compulsory on the MSc in Finance and Risk. This course is not available as an outside option.

This course does not permit auditing students.

Pre-requisites: Students must be registered for Management and Regulation of Risk (FM403).

Course content: This course aims to equip students with the fundamental concepts and tools underlying the asset markets side of modern finance. The course covers asset markets and valuation. The valuation of fixed-income securities is covered first, followed by the valuation of stocks, and derivatives such as futures and options. Concepts emphasized include the present-value formula, valuation by arbitrage, portfolio theory, the CAPM, market efficiency, and binomial and Black-Scholes models.

Teaching: 30 hours of seminars in the AT. This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Weekly problem sets covered in classes.

Indicative reading:

- J. Berk and P. DeMarzo, *Corporate Finance*, Pearson International Edition.
- Z. Bodie, A. Kane and A. Marcus, *Investments*, 8th edition, McGraw Hill. ISBN:0-07-338237-X

Full details of reading will be specified in the Course Programme and Reading List which will be distributed at the first lecture.

Assessment: Continuous assessment (100%).

FM441 Half Unit

Derivatives

This information is for the 2024/25 session.

Teacher responsible: Dr Rohit Rahi

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics,

MSc in Finance and Risk, MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

This course is not capped; any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: This is an advanced course. Students will be expected to have a good grasp of probability theory and multivariate calculus. Prior knowledge of stochastic calculus is not required; the necessary tools will be introduced as part of the course.

Course content: The course provides a thorough grounding in the theory of derivatives pricing and hedging. Both discrete-time and continuous-time models will be covered, including a comprehensive treatment of the Black-Scholes model. A special feature of the course is its emphasis on the modern theory of no-arbitrage pricing using martingale methods. These methods will be applied to the pricing of equity and currency options, forwards and futures, and interest rate derivatives. The uses of derivatives in hedging and risk management will be discussed as well.

Teaching: 30 hours of lectures in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Exercises will be discussed in class each week. Students will be expected to make positive contributions to class discussion.

Indicative reading: Teaching notes will be distributed. No one book covers the entire course, but the following is an excellent reference: John C Hull, *Options, Futures and Other Derivatives*.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

FM442 Half Unit

Quantitative Methods for Finance and Risk Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Jon Danielsson

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Finance and Risk, MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

This course is available to other students from the Departments of Economics, Mathematics, and Statistics where regulations permit. This course is not capped, any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: A strong background in statistics and quantitative methods at the undergraduate level is required. Prior programming experience is helpful.

Course content: This graduate-level course covers important quantitative and statistical tools in applied finance. It studies financial markets risk, with a particular focus on models for measuring, assessing and managing financial risk. Students will be introduced to the application of these tools and the key properties of financial data through a set of computer-based homework assignments and classes.

The course aims to introduce quantitative concepts and techniques in many areas of finance. Sample topics include risk

measures (e.g., Value-at-Risk and Expected Shortfall, including implementation and backtesting), univariate and multivariate volatility models, Monte Carlo Simulations, and associated topics in Econometrics. This list is meant to be representative, but topics may be added or removed. Recent stress events, such as the global crisis in 2008, Covid-19 in 2020, Russia's invasion of Ukraine and recent inflation are used to illustrate the various methodologies presented in the course.

An essential part of the course is implementing the models and tools in the programming language R. Further information on R as used in the course can be found in the R Notebook at <https://www.financialriskforecasting.com/notebook>.

The homework assignments are designed to guide the students to all stages of the analytical process, from locating, downloading and processing financial data to the implementation of the tools and interpretation of results. Students will have the opportunity to explore the databases available at the LSE and to become comfortable working with real data.

Teaching: 20 hours of lectures and 10 hours of seminars in the AT.

Indicative reading: No single text covers the course material. The relevant sections of the following readings would be appropriate for individual topics: Jon Danielsson (2011), *Financial Risk Forecasting*; The lecture slides and supporting programming material can be found on www.financialriskforecasting.com/. Other background reading is Ruey Tsay (2010), *Analysis of Financial Time Series*; Peter Christoffersen (2003) *Elements of Financial Risk Management*; Alexander J. McNeil, Rüdiger Frey, et al., (2015) *Quantitative Risk Management: Concepts, Techniques and Tools*.

Assessment: Exam (30%, duration: 1 hour and 30 minutes, reading time: 10 minutes) in the spring exam period.

Continuous assessment (70%) in the AT.

FM445 Half Unit

Portfolio Management

This information is for the 2024/25 session.

Teacher responsible: Dr Francesco Nicolai

Availability: This course is available on the Global MSc in Management, MSc in Accounting and Finance, MSc in Econometrics and Mathematical Economics, MSc in Economics and Management, MSc in Finance and Risk and MSc in Financial Mathematics. This course is not available as an outside option. Global MSc in Management ('Accounting and Finance' and 'Finance' concentrations only).

This course is available to other students from the Departments of Economics, Mathematics, and Statistics where regulations permit. This course is not available as an outside option.

This course is not capped, any eligible student that requests a place will be given one.

Course content: This course aims to cover the main topics in equity portfolio management. Some of the topics covered in the course include: Portfolio optimization techniques; Multi-factor models and their applications; Trading strategies; International portfolio management and currency hedging; Trading costs; Portfolio performance measurement and attribution; Style analysis; Mutual funds; Hedge funds. The course is based on a number of empirical applications and case studies, so that students can gain a better understanding of implementation issues related to managing an equity portfolio.

Teaching: 30 hours of seminars in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular classworks will be completed, handed in and marked as part of formative assessment for this course. For the most part, the classwork is based on Excel applications of the models and empirical studies covered in lectures.

Indicative reading: A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are Modern portfolio theory and investment analysis, by E. J. Elton, M. J. Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; Modern investment management, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press; Investments, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin.

Assessment: Exam (80%, duration: 2 hours, reading time: 10 minutes) in the spring exam period.

Coursework (20%).

FM447 Half Unit Global Financial Systems

This information is for the 2024/25 session.

Teacher responsible: Dr Jon Danielsson

Availability: This course is available on the MSc in Accounting and Finance and MSc in Financial History. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is not open to students on the MSc Economics and Management and students from the following departments: Economics and Finance.

This course does not permit auditing students.

Pre-requisites: Students should have some background in economics, and be comfortable with formal arguments

Course content: This course examines academic and policy debates regarding the operation of the global financial system. The course is designed to be topical, with economic arguments serving as the basis for issue analysis. The course begins with an examination of systemic risk, followed by a survey of significant institutions, focusing on central banks. The influence of cryptocurrencies, central bank-issued digital currencies, fintech, and artificial intelligence on the financial system will be examined. Several theories of financial crises are elaborated upon and assessed in light of historical evidence. Foreign exchange markets, including the numerous regimes and reserve currencies, will be discussed. The course examines recent policy and regulatory developments (including Basel III and macroprudential regulations), monetary policy and interest rate normalisation and their relationship with inequality and inflation. It concludes with a discussion of the latest threats to global financial and economic stability

Teaching: 30 hours of lectures in the AT.

Formative coursework: Students are expected to attempt the problem sets and essay questions set in the classes.

Indicative reading: Most material will be provided by the book Global Financial Systems, by Jon Danielsson, published by Pearson, and the lecture slides can be found on www.globalfinancialsystems.org

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

FM471 Half Unit Sustainable Finance and Impact Investing

This information is for the 2024/25 session.

Teacher responsible: Professor Christopher Polk and Dr Greg Fischer

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA

Dual Degree (LSE and Tokyo), MSc in Accounting and Finance, MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in Finance and Private Equity (Work Placement Pathway), MSc in Finance and Risk, MSc in Management (1 Year Programme), MSc in Social Innovation and Entrepreneurship, Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

No exceptions to the availability policy will be made, and audits of FM471 are not allowed.

This course is not capped for Department of Finance students; any students that request a place in Autumn Term will be given one.

For students from other departments who meet the necessary criteria (if applicable), you are likely to be given a place, but this is not guaranteed. Chances of gaining a place on this course are increased if it is selected during initial course selection in the Autumn Term.

This course does not permit auditing students.

Pre-requisites: Students must take one of the following: FM423/FM423E Asset Markets, or FM436 Financial Economics, or FM429 Asset Markets A, or FM439 Asset Markets for MSc Finance & Risk or FM431A Corporate Finance A, or FM473A/FM473W Financial Markets, or FM474A/FM474W Managerial Finance. The pre-requisite may be taken concurrently.

Students who can demonstrate comparable background in a graduate-level course (which must be confirmed with a transcript and syllabus detailing course content, translated into English if necessary) may be granted an exemption from this requirement at the discretion of the course leader. Undergraduate coursework or professional experience / qualifications are not sufficient and will not be considered.

Course content: This course provides a conceptual foundation in sustainable finance and impact investing along with a clear understanding of the empirical facts associated with how sustainable finance and impact investing affect firm and fund performance. Using a blend of readings, lectures, cases, and discussions, participants will learn to critically assess the actions of investors and firms with regards to sustainable finance and impact investing, including both motivation and resulting consequences.

Topics addressed will include corporate ESG (Environmental, Social, and Governance) investing, climate finance, and various impact investing topics. Participants will take away from the course a solid understanding of 1) the evolution of sustainable finance and impact investing from niche field to mainstream; 2) the variety of ways in which sustainable finance and impact investing are implemented in practice, and 3) the tools, models and frameworks behind sustainable finance and impact investing.

Teaching: 30 hours of seminars in the WT.

Formative coursework: Case studies and homework assignments will help communicate and develop understanding of course concepts.

Indicative reading:

- Freeman, Ed, 1997, "Stakeholder Theory of the Modern Corporation", Business Ethics, 5th Edition, 38-48.
- Friedman, Milton, 1970, "A Friedman doctrine: The social responsibility of business is to increase its profits," The New York Times Magazine, September 13, 1970.

- Pedersen, Shaun Fitzgibbons, and Lukasz Pomorski, 2021, "Responsible Investing: The ESG-efficient Frontier," Journal of Financial Economics 142 572-597.

Assessment: Continuous assessment (100%).

FM472 Half Unit International Finance

This information is for the 2024/25 session.

Teacher responsible: Dr Liliana Varela

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting and Finance, MSc in Financial History and MSc in Management (1 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on the International Political Economy MSc, on the Master in Public Administration and on other MSc programmes are also welcome to choose this course provided they meet the pre-requisites below. These students need to sign up for the course on LfY first and then email the course leader with information on their economics and/or finance background and their motivation for choosing the course. The course leader will then approve their application on LSE for You. In the past students on the IPE MSc, MPA, MSc in Economic History, European Institute, Master of Science in Development Management, Master of Science in Economy, Risk and Society, Master of Science in Law and Accounting have enjoyed this course.

This course is not open to students from the following departments: Economics, Finance, Mathematics, and Statistics. This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case. This course does not permit auditing students.

Pre-requisites: Some background in economics and / or finance.

Course content: The objective of the course is to equip students with the relevant academic research, techniques and analytical skills to interpret current developments in the fast-changing area of international finance.

This course approaches such key issues and topics in international finance using the exchange and rate as a unifying theme. The foreign exchange market is the largest financial market, turning over every couple of weeks the equivalent of the yearly value of pre-C19 global GDP. It is also a unique market where prices are determined not only by the fundamentals of this asset class but also by government and central bank interventions. Exchange rates are an open economy's most important price as they can affect the relative value of an entire economy.

First, the course considers what finance and economic theory identify as the determinants of the relative price of two currencies. Second, the course analyses governments' available policy choices to influence the level and volatility of the relative price of its currency and how these choices differ across countries. Third, the course examines exchange rates as a source and conduit of global financial instability. Fourth, the course focuses on the risk and exposure for investors and firms arising from exchange rate market volatility. It examines the valuation of currency instruments and their use in strategies to hedge that exposure. It also analyses the structure, trading and organisation of the forex market and its central role in international finance.

The teaching approach combines theory, analyses of data and empirical examples. It also gives emphasis on fundamental concepts, principles, and analytical theories that are more robust to answer the most relevant questions within the area of international finance.

Teaching: 30 hours of seminars in the WT.

Indicative reading: Bekaert, G., & Hodrick, R. (2017). *International Financial Management* (3rd ed.). Cambridge: Cambridge University Press. doi:10.1017/9781316282274

Keith Pilbeam *International Finance* (Palgrave, 2023, 5th edition)

Further readings (optional): textbooks for students who want to explore FM472 topics beyond the lectures' material. These readings are not part of the exam material.

- C. Eun, B. Resnick and T. Chuluun (2021), *International Financial Management*, 9th edition;
- Sercu, P (2020), *International Finance*, Princeton University Press ;

- P. Krugman, M. Obstfeld and M. Melitz (2018), *International Finance*, Pearson, 11th edition;

Handouts and Moodle: Slides presented during the lecture are posted on Moodle. Class assignments are also posted on Moodle the week before the relevant class. Guidelines to solutions for numerical questions are posted on Moodle after they are covered in class.

Assessment: Exam (75%, duration: 2 hours) in the spring exam period.

Research project (15%) and continuous assessment (10%) in the WT.

- Exam (75%): The exam is a two-hour written examination, which includes both essay-type and numerical questions. Two instances of exams from past years will be provided on Moodle along with solutions.
- Group project (15%): Group written report. Essential information for the compulsory group project is provided during the first lecture and the first class in January 2025.
- Continuous assessment (10%): Continuous assessment takes the form of in-class participation.

FM473A Half Unit Financial Markets

This information is for the 2024/25 session.

Teacher responsible: Dr James Clark

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Financial History, MSc in Management and Strategy, MSc in Real Estate Economics and Finance, MSc in Regulation and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

- Students on the MSc in Accounting, Organisations and Institutions need permission from the Programme Director to enrol in this course.
 - Students on the Diploma in Accounting and Finance need permission from the Programme Director to enrol in this course.
 - This course is not open to students in the MSc Accounting and Finance and students from the following departments: Economics, Finance, Mathematics, and Statistics.
 - This course cannot be combined with Asset Markets A (FM429)
- This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case. This course does not permit auditing students.

Pre-requisites: The course assumes no previous knowledge of finance, economics, and statistics, and requires only basic knowledge of mathematics. However, the course is quantitative and students must be willing to learn and work with new concepts in mathematics and statistics. Course work will involve a significant amount of algebra and numerical exercises. Students should be comfortable with 'High School' level Mathematics and simple algebra, e.g., the ability to solve linear systems of two equations and two unknowns.

Course content: This course is a self-contained introduction to finance and it covers roughly the same topics as FM429. The course explores the way that firms and the capital market function to channel savings toward productive investments. From the investor's perspective it considers characteristics of the major financial contracts and the principles used in their valuation. It considers how investors should select their portfolios and the implications of this behaviour for pricing assets in stock and bond markets. It explores the question of whether stock markets are efficient in reflecting investors' information. It applies these insights to the firm's financial management decision of whether or not to invest in a risky project and how to select among alternative investments. In addition, the course also covers some core corporate finance questions, such as capital structure choices. The course is also related to FM474 (Managerial Finance): both are introductory courses in Finance. FM473 focuses mostly on

understanding the workings of financial markets, the determination of asset prices, and the decisions made by financial investors. FM474 studies financial decisions from the perspective of firms (i.e., "Corporate Finance"). Although there is some small amount of overlap between FM473 and FM474, both courses can be taken simultaneously or sequentially, in any order.

Teaching: 30 hours of lectures in the AT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive. There will be ten three-hour sessions. Attendance is required.

This course is taught twice, in both Autumn and Winter Term.

Students must either register for FM473A which is taught in Autumn Term, or FM473W which is taught in Winter Term.

Indicative reading: Brealey, Myers, Allen, and Edmans, Principles of Corporate Finance.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

FM473W Half Unit Financial Markets

This information is for the 2024/25 session.

Teacher responsible: Dr James Clark

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Financial History, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Real Estate Economics and Finance, MSc in Regulation and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

- Students on the MSc in Accounting, Organisations and Institutions need permission from the Programme Director to enrol in this course.
- Students on the Diploma in Accounting and Finance need permission from the Programme Director to enrol in this course.
- This course is not open to students in the MSc Accounting and Finance and students from the following departments: Economics, Finance, Mathematics, and Statistics.

FM474A Half Unit Managerial Finance

This information is for the 2024/25 session.

Teacher responsible: Dr Cristina Scherrer

Dr Angie Andrikogiannopoulou

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting, Organisations and Institutions, MSc in Financial History, MSc in Management and Strategy, MSc in Regulation and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

- This course is not open to students in the MSc Accounting and Finance and students from the following departments: Economics, Finance, Mathematics, and Statistics.
- Students on the Diploma in Accounting and Finance need permission from the Programme Director to enrol in this course.
- This course cannot be combined with FM431 Corporate Finance A.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

This course does not permit auditing students.

Course content: This course is a self-contained introduction to finance and it covers roughly the same topics as FM431. The aim of the course is to provide a comprehensive overview of firms' financial decision making. The course is designed to provide an applied and practical approach to finance, enabling the students to address topical issues that modern corporations face. In particular, the course builds on concepts such as valuation and capital structure theories, and applies those tools in a systematic and rigorous way to real-life financial management problems. After a brief introduction to financial markets, the course focuses on corporate finance and business valuation. Topics such as initial public offerings will also be covered.

The course is also related to FM473 (Financial Markets): both are introductory courses in Finance. FM473 focuses mostly on understanding the workings of financial markets, the determination of asset prices, and the decisions made by financial investors. FM474 studies financial decisions from the perspective of firms (i.e., "Corporate Finance"). Although there is some small amount of overlap between FM473 and FM474, both courses can be taken simultaneously or sequentially, in any order.

Teaching: 30 hours of lectures in the AT.

• This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are

"sessions" only, and the pedagogical approach in each session is interactive.

- This course will be taught in two separate groups. Each group will meet for a single block of three hours once a week. Each student will be assigned to one group. Students will not be allowed to choose their groups or to switch groups.
- The course requires weekly in-class activities and discussions. Students must prepare for class activities in advance.
- Attendance is required.

Formative coursework: Weekly homeworks.

Indicative reading: Berk and DeMarzo, Corporate Finance, ed. Pearson.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

FM474W Half Unit Managerial Finance

This information is for the 2024/25 session.

Teacher responsible: Dr Cristina Scherrer

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting, Organisations and Institutions, MSc in Financial History, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Regulation and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

- This course is not open to students in the MSc Accounting and Finance and students from the following departments: Economics, Finance, Mathematics, and Statistics.
- Students on the Diploma in Accounting and Finance need permission from the Programme Director to enrol in this course.
- This course cannot be combined with FM431160Corporate Finance A.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

FM476 Half Unit Entrepreneurial Finance

This information is for the 2024/25 session.

Teacher responsible: Professor Daniel Paravasini and Dr Juanita Gonzalez-Urbe

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Accounting and Finance, MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in Finance and Private Equity (Work Placement Pathway), MSc in Finance and Risk, MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is not capped for Department of Finance students; any students that request a place in Autumn Term will be given one.

This course is, however, capped with a capacity limit to the number of students registered on the course. For students from other departments on the programmes listed above, you are likely to be given a place, but this is not guaranteed. Students from outside these programmes may not get a place, as demand is typically high. Chances of gaining a place on this course are increased if it is selected during initial course selection in the Autumn Term. This course does not permit auditing students.

Pre-requisites: Basic Mathematics and Statistics knowledge.

N.B. - It is **mandatory** to attend the first week's classes in Lent

Term in order to register for FM476 Entrepreneurial Finance.

Students who did not attend these classes will **not** be permitted to then join the course.

Course content: After introducing students to methods to assess business plans as well as methods to identify and value business ventures and growth opportunities in the opening part of the course, the bulk of the first half of the course concentrates on obtaining financial resources. It covers a broad set of instruments (venture capital, angel finance, crowdsourcing, venture debt) used by entrepreneurial firms and aims to help the student understand how the staged financing process of a new venture works, and to be able to assess when to raise financing and how to structure it. The second half of the course focuses on practical applications in negotiation, development of a business plan, and evaluation of real-life ventures raising funding.

Teaching: 30 hours of lectures in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

This course will be taught in three separate groups. There will be a joint one-hour session with all groups once a week and each group will have a separate additional two-hour session each week. Each student will be assigned a group at the beginning of the course and will continue with the same group for the rest of the term.

The course requires weekly in-class and out-of-class activities and discussions. Students must prepare for class activities in advance. There is a significant amount of in-term individual work, group work, and other activities. Attendance is required.

Formative coursework: All the work done in and out of the classroom will be assessed.

Indicative reading: Detailed course programmes and reading lists

are distributed at the start of the course. The course pack include lecture notes and case studies for summative and formative assessments.

Assessment: Continuous assessment (100%).

Summative assessment will take the form of individual reports, group reports, business plan exercises and peer evaluations.

FM477 Half Unit International Finance A

This information is for the 2024/25 session.

Teacher responsible: Dr. Liliana Varela

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity, MSc in Finance and Private Equity (Work Placement Pathway) and MSc in Finance and Risk. This course is not available as an outside option.

This course is not capped, any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: Students must have completed either: Asset Markets (FM423 or FM423E) and Corporate Finance (FM422 or FM422E); or Financial Economics (FM436); or Management and Regulation of Risk (FM403).

Course content: Following an introduction to the exchange rate market, the course will focus on key elements of international financial management, international risk exposure, hedging via FX derivatives (forwards, futures, options, and swap contracts), managing transaction and economic exposure, international portfolio investment. The course will next focus on exchange rate determination and forecasting, the international monetary system, balance of payments, crises in open economies and current issues of the global economy. Relevant concepts will be illustrated throughout via topical business and country cases.

Teaching: 30 hours of seminars in the WT.

The course will be taught in an interactive Harvard-style three-hour lecture block integrating lectures and classes.

Formative coursework: Weekly problem sets covering both theoretical methods and practical applications.

Indicative reading: Detailed course readings, cases, and slides will be distributed at the start of the course. Illustrative texts include: International Financial Management by C. S. Eun and B. G. Resnick, McGraw-Hill Education; 8th edition (2018), International Financial Management by G. Bekaert and R. Hodrick, Cambridge University Press; 3rd edition (2017) and Maurice Obstfeld and Kenneth Rogoff, Foundations of International Macroeconomics, The MIT Press (1996).

Assessment: Continuous assessment (100%) in the WT.

FM481 Not available in 2024/25 Financial Econometrics for Research Students

This information is for the 2024/25 session.

Teacher responsible: Dr Christian Julliard
Prof Alexey Onatskiy

Availability: This course is compulsory on the MRes/PhD in Finance. This course is available as an outside option to students on other programmes where regulations permit. Optional on MRes/PhD Economics.

Pre-requisites: Strong background in statistics and mathematics; some knowledge of Economics and Finance.

Course content: The Lent Term of FM481 is shared with FM404 Forecasting Financial Time Series.

Part 1 – Probability, Mathematical Statistics, and Asymptotic Theory, provides students with an understanding of basic concepts in probability and statistics with a view of eventual use for

econometric analysis of financial data. Including Basic Probability Concepts, Random Variables, Selected Probability Distributions, Modes of Convergence, Properties of Estimators, Frequentist Hypothesis Testing and Bayesian Inference.

Part 2 - Theory and application of regression analysis, covers estimation and inference theory for regression models. The topics covered are least squares estimation, maximum likelihood estimation, instrumental variable estimation, and generalized method of moments estimation, with applications to linear models, many and weak instrument problems, limited dependent variable models, and panel data models.

Part 3 - The course provides a survey of the theory and application of time series methods in econometrics. The main objective of this course is to develop the skills needed to do empirical research in fields operating with time series data sets. The topics covered are: Hilbert spaces, projections, Wold theorems, ARMA models, Z-transform, convolution theorem, W-K prediction, Spectral analysis; Structural VAR Models; State Space Representations; Models with time-varying coefficients and stochastic volatility; Nonlinear filtering (particle filters); Unit Roots, Spurious Regressions and Cointegration; Predictability.

Teaching: 22 hours of lectures in the AT. 22 hours of lectures in the WT.

Formative coursework: Weekly classwork and problem sets.

Indicative reading:

- Cameron and Trivedi: Microeconometrics. Methods and Applications.
- Campbell, Lo and MacKinlay: The Econometrics of Financial Markets
- Geweke: Contemporary Bayesian Econometrics and Statistics
- Gouriéroux and Jasiak: Financial Econometrics: Problems, Models and Methods.
- Greene: Econometric Analysis.
- Johannes and Polson: Computational Methods for Bayesian Inference.
- Hamilton: Time-Series Analysis.
- Hayashi: Econometrics
- Roberts and Whited: "Endogeneity in Empirical Corporate Finance," Handbook of the Economics of Finance, vol. 2.
- Sargent, T., (1987), Macroeconomic Theory, chapters IX-XI.
- Wooldridge: Econometric Analysis of Cross-Section and Panel Data.

Assessment: Exam (100%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

FM482 Research paper in Finance

This information is for the 2024/25 session.

Teacher responsible: PhD Programme Director

Availability: This course is compulsory on the MRes/PhD in Finance. This course is not available as an outside option.

Course content: Students produce a research paper, between 6,000 and 8,000 words, related to the student's designated major field, to be submitted at the end of August.

Teaching: There are no direct teaching hours.

Formative coursework: Feedback on progress will be provided by the student's PhD Supervisor.

Assessment: Research paper (100%).

The research paper will be 6-8,000 words in length.

FM4T2 Half Unit Finance for Mergers, Buyouts and Corporate Restructurings- Dissertation

This information is for the 2024/25 session.

Teacher responsible: Prof Pedro Saffi

Availability: This course is available on the MSc in Economics, MSc in Economics (2 Year Programme), MSc in Finance and Economics and MSc in Finance and Economics (Work Placement Pathway). This course is not available as an outside option.

Course content: See entry for FM421

Teaching: See entry for FM421

Assessment: Dissertation (90%, 6000 words) in the ST. Coursework (10%) in the WT.

The submission is a 6,000 word structured empirical project (90%), on a topic within the guidelines set out in the course. The dissertation option is to be chosen in only one half unit module and must be completed in line with the guidance issued by the course leader. The submission deadline for the project is in Spring Term, with a deadline to be set by the Department.

FM4T5 Half Unit Portfolio Management - Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Francesco Nicolai

Availability: This course is available on the MSc in Economics and MSc in Economics (2 Year Programme). This course is not available as an outside option.

Course content: See entry for FM445

Teaching: See entry for FM445

Assessment: Dissertation (80%, 6000 words) in the ST. Coursework (20%) in the WT.

6,000 word dissertation (80%) on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in WT by the course teacher who will act as the student's supervisor. The submission deadline for the project is in Spring Term, with a deadline to be set by the Department.

FM4U1 Half Unit Fixed Income Markets - Dissertation

This information is for the 2024/25 session.

Teacher responsible: Professor Richard Payne

Availability: This course is available on the MSc in Economics and MSc in Economics (2 Year Programme). This course is not available as an outside option.

Course content: See entry for FM413

Teaching: See entry for FM413

Assessment: Dissertation (100%, 6000 words) in the ST. 6,000 word dissertation on a topic to be agreed with the course teacher. The dissertation option is to be chosen in only one half unit module, with its outline approved in WT by the course teacher who will act as the student's supervisor. The submission deadline for the project is in Spring Term, with a deadline to be set by the Department.

GI402 Half Unit Gender, Knowledge and Research Practice

This information is for the 2024/25 session.

Teacher responsible: Dr Hakan Sandal-Wilson

Availability: This course is compulsory on the MPhil/PhD in Gender, MSc in Gender and MSc in Gender (Research). This course is available on the MSc in Culture and Society, MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities and MSc in Social Research Methods. This course is available as an outside option to students on other programmes

where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to gender studies students on programmes for which this course is compulsory or for whom it is one of a limited range of options.

Course content: This course introduces students to critical epistemological and methodological scholarship relevant for embarking on gender research at graduate and postgraduate level and beyond. The course provides a critique of 'mainstream knowledge' through an exploration of Black, queer, postcolonial and other intersectional feminist theories. In addition, the course offers an engagement with some of the practical, ethical and methodological challenges of conducting gender research and producing feminist knowledge through drawing on a variety of 'disciplinary' experiences and reflections. Finally, the course engages with decolonising and decentring initiatives and questions the place of Gender Studies as an interdisciplinary field. The course asks: what are the implications of producing research within, beyond and without the epistemic centres of global north feminism?

Teaching: This course runs in the AT. This course has a reading week in Week 6 of AT.

Formative coursework: Proposal Essay (1500 words) in the AT.

Indicative reading: Patricia Hill Collins (2000) *Black Feminist Thought: Knowledge, Consciousness and the Politics of Empowerment*. New York: Routledge.

Sara Ahmed (2016) *Living a feminist life*. Duke University Press.

Uma Narayan and Sandra Harding, eds (2000) *Decentering the Center: Philosophy for a Multicultural, Postcolonial and Feminist World*. Bloomington: Indiana University Press.

Assessment: Project (100%, 3000 words) in the WT.

GI403 Half Unit Gender and Media Representation

This information is for the 2024/25 session.

Teacher responsible: Dr Sadie Wearing

Availability: This course is compulsory on the MSc in Gender, Media and Culture. This course is available on the CEMS Exchange, MBA Exchange, MPhil/PhD in Gender, MSc in Culture and Society, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Policy and Inequalities and MSc in Organisational and Social Psychology. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students on the MSc Gender, Media and Culture. Students from outside this programme may not get a place.

Course content: This course aims to enable students: to think critically about representations of gender in a range of different media; to apply a range of theoretical and methodological approaches to the study of the media and culture; to examine changing representations of gender in the context of wider social changes and to explore questions concerning the interpretation and use of different media formats and content. The course focuses on examples largely drawn from Anglo-American media but students are encouraged to research and write on a wider range of contexts. The course usually includes topics such as gendered approaches to contemporary cinema; celebrity culture; online environments and gender; and contemporary cultural representations of feminism. It critically explores the history of gender studies and feminist scholarship in relation to media content and considers questions of media representations of gender in relation to dimensions such as sexuality, class, race, age and (dis)ability.

Teaching: This course runs in the AT. This course has a reading week in Week 6 of AT.

Formative coursework: A short essay to be submitted during AT.

Indicative reading:

- Carter C and Steiner L, Lisa McGlaughlin (eds) (2014) *The Routledge Companion to Media and Gender*
- Dyer, R. (2002) *The Matter of Images: Essays on Representation*.
- Gill, R. (2007) *Gender and the Media*
- Hall, S et al. (2013) *Representation: Cultural Representations and Signifying Practices* (2nd edition).
- hooks, B. (1994) *Outlaw Culture Resisting Representations*

Assessment: Essay (100%, 3000 words) in the WT.

GI407 Not available in 2024/25 Globalisation, Gender and Development

This information is for the 2024/25 session.

Teacher responsible: Dr Nazanin Shahrokni

Availability: This course is compulsory on the MSc in Gender, Development and Globalisation. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MA in Modern History, MPhil/PhD in Gender, MSc in Development Management, MSc in Development Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Policy and Inequalities, MSc in Human Rights and MSc in Human Rights and Politics. This course is available as an outside option to students on other programmes where regulations permit. This course cannot be taken alongside GI409 Gender, Globalisation and Development: An Introduction, or GI420 Globalisation, Gender and Development: Theorising Policy and Practice. This course will be capped at 30 students.

Course content: This course will provide students with a thorough knowledge of two key interconnected and intersecting literatures: gender and development and gender and globalisation. We begin by defining and theorising gender, development and globalisation and their operation in material spaces, policy and practice. The first part of the course considers contemporary theories of globalisation and development and the differences that a gender perspective makes. A particular focus is on how globalisation is associated with widening social, spatial and gender inequalities. Specific reference is made to household inequalities, state policies, global care chain and migrant labourers, the emergence of the "global city," and "natural" disasters and pandemics, and their implications for social and gender inequalities. The final session brings the issues raised in the first part of the course to a conclusion by addressing some alternative visions of social change in the context of a globalised world. The second half of the course is concerned with theorising policies and practice in the field of gender and international development. The course outlines key contributions to the analysis of power within public policy making processes and examines feminist visions of social change which draw on ideas about capabilities, empowerment, citizenship and gender justice to engage with these policy processes. This is explored in greater detail through case studies of feminist struggles over recognition, redistribution and representation as they play out in relation to particular policy issues, namely violence against women, microfinance, social protection, gender quotas and collective action.

Teaching: This course runs across both MT and LT. It contains both asynchronous and interactive teaching and learning elements. There will be a reading week in both terms in week 6 in line with departmental policy.

Formative coursework: Essay (1500 words) in the MT.

Indicative reading:

- Agarwal, B. (2016) *Gender Challenges* (Vol 1, 2 and 3). India: Oxford University Press.

Essay (50%, 3000 words) in the ST.

GI409 Half Unit

Conceptual Foundations in Gender, Development and Globalization

This information is for the 2024/25 session.

Teacher responsible: Dr Sharmila Parmanand

Availability: This course is compulsory on the MSc in Gender, Development and Globalisation. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPhil/PhD in Gender, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Empires, Colonialism and Globalisation, MSc in Environment and Development, MSc in Gender, MSc in Gender (Research), MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Human Geography and Urban Studies (Research), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in Political Science (Global Politics), MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of spaces (it is controlled access) and demand is typically very high. Priority is given to students on the MSc Gender, Development and Globalisation. Students from outside this programme may not get a place.

Course content: This course will provide students with a knowledge of two key interconnected and intersecting literatures: gender and development and gender and globalisation. We begin by defining and theorising gender, development and globalisation and their operation in material spaces, policy and practice. The course considers gender approaches to development such as Women in Development (WID), Women and Development (WAD), and Gender and Development (GAD). A particular focus is on how global development is associated with widening social, spatial and gender inequalities, illustrated by case studies of global integration and uneven development. Specific reference is made to household inequalities, social protection programmes, and microfinance schemes. The final session brings the course to a conclusion by addressing some alternative visions of development and social change in the context of a globalised world.

Teaching: This course runs in the AT. This course has a reading week in Week 6 of AT.

Formative coursework: Essay (1500 words)

Indicative reading:

Assessment: Essay (100%, 3000 words) in the WT.

GI410 Half Unit

Screening the 21st Century: Cinema and Cultural Critique

This information is for the 2024/25 session.

Teacher responsible: Dr Sadie Wearing

Availability: This course is available on the MPhil/PhD in Gender, MSc in Culture and Society, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality) and MSc in Gender, Development and Globalisation. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. This may mean that you're not able to get a place on this course.

Pre-requisites: Students need to have an awareness of and interest in contemporary cultural theory and film.

Course content: The aims of the course are to offer students the opportunity to critically explore 21st century international cinema as a site for the interrogation of contested contemporary social and political processes. The course links cinematic representations to the preoccupations of cultural theory in relation to themes such as, colonial/postcolonial memory, neo liberalism and cultural dislocations, ethics and subjectivity, gendered migration and gendered violence, environmental degradation and protest, sexuality and representation. The course introduces students to a range of international film and will develop the critical tools for the analysis of both mainstream and marginal (or marginalised) cultural productions. It explores a range of critical and theoretical writing on film considering questions such as cinema as oppositional practice, transnational cinema, questions of representation, global spectatorship and 'witnessing' and the affective dimensions of cinema. Indicative films are: *Black Skin White Mask* (dir. Isaac Julien), *24 City* (dir. Jia Zhang ke), *Cache* (dir. Michael Haneke), *Limbo* (dir. Ben Sharrock), *Parasite* (dir. Bong Joon-Ho), *Relic* (dir. Natalie James), *Dark Waters* (dir. Todd Haynes).

Teaching: This course runs in the WT. This course has a reading week in Week 6 of WT. It is taught in an interactive 3 hour class that includes lecture and seminar elements. There is a compulsory weekly film screening.

Formative coursework: Essay (1500 words) including an element

of film analysis in the WT.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

GI411 Half Unit

Gender, Post/coloniality and Development: Critical Perspectives and New Directions

This information is for the 2024/25 session.

Teacher responsible: Prof Sumi Madhok

Availability: This course is available on the MPhil/PhD in Gender, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Empires, Colonialism and Globalisation, MSc in Gender, MSc in Gender (Research), MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students on the MSc Gender (Rights and Human Rights), followed by other Department of Gender Studies students.

Pre-requisites: While there are no specific requirements, it is preferred that students have a background in social science or the humanities.

Course content: The aim of this course is to introduce students to the growing body of scholarship that critically interrogates coloniality, gender and developmentalism at various postcolonial sites. It provides an opportunity for students to encounter and critically engage with canonical works within postcolonial and decolonial theories alongside those of gender and feminist theory in order to examine the historical and contemporary policy and practices in relation to gender and development. As such, the course combines a study of the historical/textual/cultural/political and philosophical in relation to and alongside the political-economic in order to explore questions of developmentalism, critical race theories, coloniality, decoloniality, subalternity, orientalism, representation, agency, neoliberalism, globalisation, human rights and humanitarianism. Finally, the course also introduces students to new directions in contemporary theoretical thinking that are either explicit critiques of postcolonial scholarship, i.e. texts such as 'Empire' and 'Ethics' or are critical engagements and even critical extensions of postcolonial thinking into new directions e.g. Transnationalism.

Teaching: This course runs in the WT. This course has a reading week in week 6 of WT.

Formative coursework: A formative essay (1500 words).

Indicative reading:

- Fanon, Frantz. (1963) *The Wretched of the Earth*. New York: Grove Inc..
- Rodney, Walter (1972) 'How Europe Underdeveloped Africa', Verso.

Assessment: Essay (100%, 3000 words) in the ST.

GI413 Half Unit

Gender, Race and Militarisation

This information is for the 2024/25 session.

Teacher responsible: Dr Hakan Sandal-Wilson

Availability: This course is available on the MPhil/PhD in Gender, MSc in Comparative Politics, MSc in Gender, MSc in Gender (Research), MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Development and Humanitarian Emergencies, MSc in International Relations (Research) and MSc in Political Science (Conflict Studies and Comparative Politics). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to Department of Gender Studies students.

Course content: This course will provide students with a critical introduction to militarisation and its gendered and racialised basis and effects. Students will be introduced to theories of militarisation and martial politics; militarised masculinities and femininities; different geopolitical experiences of violence and war; 'diversity' issues within a variety of national militaries; racialised representations of gender and terror; the global colour-line and gendered division of labour in peacekeeping; and the global politics of peace and anti-militarism activities.

Teaching: This course runs in the WT. This course has a reading week in Week 6 of WT.

Formative coursework: Written exercise in the WT

Indicative reading:

- Cockburn, C. (2012) *Anti-militarism: political and gender dynamics of peace movements*, Palgrave.
- Sjoberg, L., and S. Via, eds. (2010) *Gender, war, and militarism: Feminist perspectives*. New York: Praeger Security International

Assessment: Project (100%, 3000 words) in the ST.

GI414 Half Unit

Theorising Gender and Social Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Asiya Islam

Availability: This course is compulsory on the MSc in Gender, Policy and Inequalities. This course is available on the MSc in Gender, MSc in Gender (Research), MSc in Gender (Rights and Human Rights) and MSc in Gender, Development and Globalisation. This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students on the MSc Gender, Policy and Inequalities programme. Students from outside this programme may not get a place.

Course content: This course aims to equip students with an understanding of how feminist scholars use theoretical and analytic concepts to engage with social policy issues and debates. The course provides an overview of mainstream theoretical explanations for the structure and evolution of welfare states, and feminist critiques and modifications of that literature. Students will develop an understanding of how key concepts like citizenship, work, and well-being have been conceptualized and applied in the academic literature to document and explain gendered inequalities. The use of gender as a category of analysis is examined and attention is paid to the potentially modifying effects of other social hierarchies such as race and class.

Teaching: This course runs in the AT. This course has a reading week in Week 6 of AT.

Formative coursework: Students are expected to submit a 1,500 formative exercise during AT.

Indicative reading:

Assessment: Project (100%, 3000 words) in the WT.
A 3000 word assessment

GI415 Half Unit

Gender and Welfare Regimes: Developments and Change

This information is for the 2024/25 session.

Teacher responsible: Dr Ania Plomien

Availability: This course is available on the MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender (Sexuality), MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Inequalities and Social Science and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students on the MSc Gender, Policy and Inequalities programme.

Course content: The course critically explores the ways in which gender is incorporated into welfare state scholarship and social policy practice. The material covers the theory and methodology of comparative studies and feminist and decolonial critiques of mainstream approaches. The critical lens illuminates how accounts of economic development and class politics are partial without considering gendered and racialised spheres of welfare generation and the role of exploitation, expropriation and exclusion within nation-states and transnationally. The analytical focus shifts between scales to include individual advanced welfare states, welfare regimes, and the role of supranational organisations such as the EU, ILO or OECD. The substantive politics, policies and patterns of inequality, and policy areas studied converge on the work-welfare-care nexus. Indicatively, we study the organisation of caring services, migration, family policy, provisions for groups with special care needs (e.g. lone parents, persons with disabilities), employment, the practices and roles of men (especially regarding fatherhood), demographic change. In looking at these areas students are encouraged to compare and contrast different welfare systems and consider the particularism of national policy approaches and the influence of supra- and transnational processes in shaping patterns of (in)equality.

Teaching: This course runs in the WT. This course has a reading week in Week 6 of WT.

Formative coursework: Students will be asked to prepare seminar facilitation activities in group work and submit a formative piece of work (1500 words) during the WT.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

GI417 Half Unit Not available in 2024/25 Feminist Population Politics

This information is for the 2024/25 session.

Teacher responsible: Prof Wendy Sigle PAN 11.01J

Availability: This course is available on the MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course considers both the politics of knowledge production in population studies and the politics surrounding international and national population policies. Although population change cannot be described, understood, or responded to without taking into account the wider – and profoundly gendered – social, political and economic context, feminist theory and gender theory have had relatively limited impact on population scholarship. This course explores the implications both theoretically and practically. Students will explore and evaluate the ways that feminist demographers and policy activists have sought to redress social and gender injustices. Moreover, they will be asked to consider how the integration of a feminist and gendered perspective might change the way research is carried out and used to inform policy.

Teaching: This course runs in WT.

There will be a reading week in week 6, in line with departmental policy.

Formative coursework: Students will meet with a study group to discuss papers and to complete assignments (presentations, assessments of papers, answers to questions) in preparation for seminars.

Students are expected to submit a 1,500 formative exercise and a self-assessment (attached as a coversheet).

Indicative reading: Eberhardt, P., & Schwenken, H. (2010). Gender Knowledge in Migration Studies and in Practice. *Gender Knowledge and Knowledge Networks in International Political Economy*, 94. (1993) If all we knew about women was what we read in *Demography*, what would we know? *Demography* 30(4): 551-577.

Assessment: Project (100%) in the ST.

The production of a final 3000 word report (due in ST: 90% of the final mark) with milestones including a progress report, a first draft, and an assessed 1000 word peer review report (5% of the final mark). Full participation (completion of all of the milestones) contributes 5% of the final mark.

GI418 Half Unit Feminist Economics and Policy: An Introduction

This information is for the 2024/25 session.

Teacher responsible: Dr Ania Plomien

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities and MSc in Human Resources and Organisations (International Employment Relations/CIPD). This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students on the MSc Gender, Policy and Inequalities programme.

Pre-requisites: The course is run by the Department of Gender Studies – an interdisciplinary department. One of the key objectives of the course is to bring a multi-perspectival approach to the understanding of economic processes and the role of policy in attaining economic equality and well-being. As economic processes have a profound influence on many dimensions of social life, gender relations and gender (in)equality, and vice versa, this course seeks to expose students interested in gender and economic issues to the work of Feminist Economists. An interest in gender is essential and undergraduate level course in economics would be an advantage.

Course content: Recent decades have seen the emergence of gender equality as a key policy concern and Feminist Economics as a sub discipline. The purpose of the course is to engage with the theoretical foundations and intellectual contributions of Feminist Economics and to develop an analytical understandings of gender issues with respect to economic processes and policies operating at macro and micro levels. At the macro level, the course explores the implications of contemporary economic and financial governance from a gender perspective, the gender bias in macroeconomic analyses, and the gendered impact of crises, such as austerity policies and the Covid-19 pandemic. At the micro level, the course analyses the gender dynamics of household and labour market inequalities, engages with the economic foundations and explanations of gender inequality within employment and within the household, focusing on wage and productivity differences and the gender division between 'productive' and 'reproductive' work. Gender as economically significant marker of inequality is contextualised, where possible, in relation to race, social class, sexuality and migrant status. Attention is also paid to the way in which individual well-being is influenced by the level of development and transnational trade relations. Accordingly, the course seeks to bridge the macro-micro divide by drawing together the gendered critique of existing biases in economic thinking and to provide an analytical foundation for alternative approaches to policies that aim to contribute towards securing sustainable development and gender equal well-being.

Teaching: This course runs in the WT. This course has a reading week in Week 6 of WT.

Formative coursework: Essay (1500 words) in the WT.

Indicative reading:

- Bargawi, H., Cozzi, G and Himmelweit, R. (2017) *Economics and Austerity in Europe: Gendered Impacts and Sustainable Alternatives*.

Assessment: Essay (100%, 3000 words) in the ST.

GI420 Half Unit**Transnational Feminist Development Agendas**

This information is for the 2024/25 session.

Teacher responsible: Dr Asiya Islam

Availability: This course is compulsory on the MSc in Gender, Development and Globalisation. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Gender, MSc in Gender (Research), MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Human Geography and Urban Studies (Research), MSc in Human Rights, MSc in Human Rights and Politics, MSc in Political Science (Global Politics), MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of spaces (it is controlled access) and demand is typically very high. Priority is given to students on the MSc Gender, Development and Globalisation. Students from outside this programme may not get a place.

Course content: This course engages with the relevant literature on globalisation and its discontents with a particular focus on feminist perspectives. Students will be provided with a thorough knowledge of the different modalities through which gender and other, related, axes of inequalities intersect with the complex processes of globalisation. Globalisation has worked through, built on, undermined and underlined various forms of inequality. To capture this complexity, this course focuses on global actors (i.e. networks, elites, and institutions) and sheds light on the three interconnected dimensions and processes of globalisation (economic, political, and cultural).

Teaching: This course runs in the WT. This course has a reading week in Week 6 of WT.

Formative coursework: One essay of 1500 words to be handed in midway through the WT.

Indicative reading: Basu, A. 2010. *Women's Movements in the Global Era: The Power of Local Feminisms*. Westfield Press. Bhattacharyya, G., 2018. *Rethinking racial capitalism: Questions of reproduction and survival*. Rowman & Littlefield.

Assessment: Essay (100%, 3000 words) in the ST.

GI421 Half Unit**Sexuality, Gender and Culture**

This information is for the 2024/25 session.

Teacher responsible: Dr Rohit Dasgupta

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Culture and Society, MSc in Gender, MSc in Gender (Research), MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Human Rights and Politics and MSc in Political Science (Global Politics). This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to Department of Gender Studies students.

Pre-requisites: Students from outside the Gender Studies Department wanting to take GI421 should provide a statement about their reasons for wanting to follow the course. This should include background in sexuality or gender studies, areas of related interest and experience, or other conceptual or theoretical grounding that might be relevant. GI421 is an interdisciplinary course with a **high theory content**, and students who do not provide evidence - e.g. prior courses in gender and/or sexuality, professional or political experience in related areas - of being at the appropriate level in this regard will not be admitted to the course.

Course content: 'Sexuality, Gender and Culture' introduces students to historical and theoretical components of the field, and explores case studies of the development of sexual cultures, identities and social movements from the late 19th century to the present. The course provides theoretical foundations in sexuality studies, incorporating intersectional, black feminist, postcolonial, queer, trans*, and social justice perspectives. Indicative topics include: colonialism and sexuality, sexualisation of culture, sexuality and political economy, pleasure and danger; pornography and sale of sex debates; LGBT emergence (these vary due to teaching team). It cuts across theory and social movements and requires students consider a reflexive approach to their own interests and perspectives. The course is interdisciplinary and demands a high level of student participation, but does not require a background in the field. It is also available as a first half of a full unit 'Transnational Sexual Politics' (GI422), though with different forms of assessment.

Teaching: This course runs during the AT. There is a reading week in Week 6 of AT. This course is taught alongside students from GI422.

Formative coursework: One 1500 word critical analysis to be submitted during AT.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the WT.

GI422

Transnational Sexual Politics

This information is for the 2024/25 session.

Teacher responsible: Dr Rohit Dasgupta

Availability: This course is compulsory on the MSc in Gender (Sexuality). This course is available on the MA in Modern History, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Gender, MSc in Gender (Research), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Global Politics, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and MSc in Political Science (Global Politics). This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students on the MSc Gender (Sexuality) programme. Students from outside this programme may not get a place.

Course content: 'Transnational Sexual Politics' takes a case-study approach to questions of sexuality, gender and culture (in the first term) and to sexuality in the contexts of globalization (in the second). The full unit considers a variety of ways in which sexuality is central to any understanding of the social world, and it explores queer methods for interrogating the world. It is an interdisciplinary course within which intersectional, black feminist, postcolonial, queer, crip, trans, and critical race perspectives are used to interpret particular sexual phenomena and contexts – rights, citizenship, fertility, representation, kinship, asylum and technology, for example. The course will allow a thorough grounding in sexuality and gender studies. Although it is interdisciplinary, it does not have a pre-requisite.

Teaching: This course runs across both AT and WT. This course has a reading week in Week 6 of AT and WT.

Formative coursework: One 1500 word critical analysis to be submitted during AT; submission of draft abstract for conference presentation to be submitted during WT.

Indicative reading:

- Jacqui Alexander (2006) *Gay Tourism: Culture and Context* (Binghamton, NY: Haworth Press).
- Clare Hemmings, ed. (2014) 'Sexuality Section', Mary Evans et al, eds, *Handbook of Feminist Theory* (London: Sage).

- Mitra Rastegar (2013) 'Emotional Attachments and Secular Imaginings: Western LGBTQ Activism on Iran', *GLQ* 19(1): 1-29.
- Diane Richardson (2000) 'Constructing Sexual Citizenship, Theorising Sexual Rights', *Critical Social Policy* 20(1): 105-135.
- Laura Ann Stoler (1995) *Race and the Education of Desire* (Durham: Duke University Press).
- Susan Stryker and Talia M. Bettcher (eds.), (2016) "Trans/ Feminisms" [Special Issue] *Transgender Studies Quarterly* 3(1-2).
- H. Sharif 'Herukhuti' Williams (2016) 'Introduction to Afrocentric Decolonizing Kweer Theory and Epistemology of the Erotic', *Journal of Black Sexuality and Relationships* 2(4): 1-31.

Assessment: Essay (50%, 3000 words) in the ST.

Paper (30%) in the WT.

Critical evaluation (20%) in the AT.

The paper will be submitted for a student conference at the end of WT, and will include the previous submission of a 300 word abstract.

The critical evaluation will be of a cultural event (lecture; exhibition; performance; conference), and submitted at the end of AT (2000 words).

GI423 Half Unit Not available in 2024/25

Globalisation and Sexuality

This information is for the 2024/25 session.

Teacher responsible: TBC

Availability: This course is available on the MSc in Gender, MSc in Gender (Research), MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Science (Global Politics). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students wanting to take GI423 but who are not part of a listed degree programme should provide a statement about their reasons for wanting to follow the course. This should include background in sexuality or gender studies, areas of related interest and experience, or other conceptual or theoretical grounding that might be relevant. GI423 is an interdisciplinary course with a high theory content, and students who do not provide evidence - e.g. prior courses in gender and/or sexuality, professional or political experience in related areas - of being at the appropriate level in this regard will not be admitted to the course.

Course content: 'Globalisation and Sexuality' explores the importance of sexuality for global politics and society. Starting from the assumption that 'sexuality matters' in today's globalised world, the course considers histories, theories and contexts within which the role of sexuality is pivotal. Since sexual identities, rights and health are central to citizenship and to how nations and states relate to one another contemporarily, this course combines theory and case study to think through how as well as why sexuality has become so important. Students will be introduced to theories of sexual citizenship and rights, homonationalism and homophobia, affect and fantasy, sexuality and labour, and use these to explore topics such as sex tourism, reproductive technologies, lesbian and gay asylum, abortion, sexual violence and sexual cultures globally. The course is interdisciplinary and takes a transnational approach to sexuality and globalisation. Students will join existing students taking the full unit GI422 for lectures, but may have separate seminars.

Teaching: 15 hours of lectures and 10 hours of classes in the WT. Seminars precede lectures on the same day.

Formative coursework: An abstract of the student essay (up to 300 words) submitted on Friday of week 5, with written feedback; a detailed outline (up to 2000 words) of the essay to be submitted by Monday of week 9, with written and in person feedback in office hours before the end of term.

Indicative reading: Jacqui Alexander (2006) *Gay Tourism: Culture and Context* (Binghamton, NY: Haworth Press)

Omise'eke Tinsley (2018) *Ezili's Mirrors: Imagining Black Queer Genders* (Durham: Duke UP)

Assessment: Essay (100%, 4000 words) in the ST.
Final essay due Monday week 1 of summer term

GI424 Half Unit

Gender Theories: An Interdisciplinary Approach

This information is for the 2024/25 session.

Teacher responsible: Dr Aiko Holvikivi

Availability: This course is compulsory on the MPhil/PhD in Gender, MSc in Gender, MSc in Gender (Research), MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities. This course is available on the MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically high. Priority is given to students in Gender Studies, for whom the course is mandatory. Students from outside this programme are welcome to apply, but may not get a place.

Course content: The course aims to enable students to: become familiar with the fullest range of gender theories with particular attention to the intersections of gender, sexuality and race; develop a critical appreciation of these different theories of gender; use gender theories to inform their appreciation of existing work in their own disciplines and in an interdisciplinary context; use the analysis of gender as a basis for case study evaluation and research.

It is a half unit course which runs for 10 weeks. It begins with a review of the formative influences on the development of gender theory, including the sex/gender distinction, race and intersectionality, production/reproduction. It enables students to consider the implications for analysis of a variety of sites and topics including coloniality, power and social and psychic structures of gender, representation, queer theory, nation, and rights. The course considers the impact of gender analysis on key areas of social science investigation, and develops these with particular attention to location, ethics and the importance of global and transnational dimensions. Our expectation is that this course provides a thorough grounding for work across all other courses and for the dissertation module.

Teaching: This half-unit foundational course runs in the Autumn term. It is taught through lectures and seminars.

Formative coursework: Short writing assignment in AT.

Indicative reading:

- hooks, bell. 1994. *Teaching to Transgress: Education as the Practice of Freedom*. Routledge.

Assessment: Coursework (100%, 3000 words) in the AT.

GI425 Half Unit

Introduction to Gender, Peace and Security

This information is for the 2024/25 session.

Teacher responsible: Dr Aiko Holvikivi

Availability: This course is compulsory on the MSc in Gender, Peace and Security. This course is available on the MSc in Gender, MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in International Development and Humanitarian Emergencies and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Places are guaranteed for those students for whom it is a degree requirement. Further places on the course are allocated based on a short motivational statement, with priority given to students for whom it is a listed option. Department of Gender Studies students do not need to provide a statement.

Course content: This course provides a critical examination of gender, peace and security issues in conflict and post-conflict contexts. Specifically, the course focuses on the international Women, Peace and Security (WPS) agenda, which originated in UN Security Council Resolution 1325 (2000), followed by a series of subsequent resolutions to date. The course covers the main pillars of the WPS agenda, namely participation; protection from gendered violence; the prevention of conflict and violence; and gendered approaches to relief and recovery in conflict and post-conflict settings. The course examines a range of issues through a gender and feminist lens.

Topics include: gendered perspectives on war and peace; the socio-legal context of the Women, Peace and Security agenda; the history of Women, Peace and Security laws and policies; definitions and scope of gender-based and sexual violence in conflict; peace processes, peacekeeping and humanitarian assistance; and evaluation of a range of different critiques of the Women, Peace and Security agenda.

Teaching: This half-unit foundational course runs in the Autumn term. It is taught through lectures and seminars.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the WT.

GI426 Half Unit Gender and Human Rights

This information is for the 2024/25 session.

Teacher responsible: Professor Sumi Madhok

Availability: This course is compulsory on the MSc in Gender (Rights and Human Rights). This course is available on the MSc in Gender, MSc in Gender (Research), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students on the MSc Gender (Rights and Human Rights) programme, followed by other Department of Gender Studies students.

Pre-requisites: A background in the Humanities and/or the Social Sciences with a basic familiarity with human rights and/or gender studies.

Course content: This course will provide the students with a transnational and intersectional gender perspective on contemporary theories and practices of rights/human rights and humanitarianism. It brings together different sets of scholarship: gender theories, decolonial, queer and postcolonial scholarship, theoretical perspectives on human rights alongside with legal and policy perspectives - and will be of interest to students wanting to study the question of human rights in an interdisciplinary manner but also one that is crucially sutured to the question of gender. Consequently, the course will introduce students to key scholars: CLR James, Sylvia Wynter, Gayatri Spivak, Michel Rolph Trouillot, Ratna Kapur, Hannah Arendt, Audra Simpson, Walter Dignolo, Giorgio Agamben, Jacques Rancière, Judith Butler, Lila Abu Lughod, Wendy Brown among others while drawing attention to the evolution and working of international legal frameworks for securing women's rights and other marginal groups. The course will pay special attention to the struggles over 'humanity', 'civilisation' and 'indigeneity', as well as to tensions between citizenship rights and human rights, and the transformation of the former in the light of the latter. It will also focus on feminist demands and struggles over sexuality, sexual rights, bodily rights, culture, development and citizenship; over entitlements to material resources; to gendered protections in conflict; and on vulnerability and precarity under neoliberal economic and political regimes. The course is focused on encouraging critical thinking on human rights together with introducing students to alternative, decolonial and anti colonial perspectives on rights and human rights.

Teaching: This course runs in AT. This course has a reading week in Week 6 of AT.

Formative coursework: Formative essay assignment.

Indicative reading:

- Trouillot, M.R., 1995. *Silencing the past: Power and the production of history*. Beacon Press.
- James, C.L.R., 2001. *The Black Jacobins: Toussaint L'Ouverture and the San Domingo Revolution*. Penguin UK.

(eds.) *Sexuality, Health and Human Rights*, Routledge, New York.

Assessment: Essay (100%, 3000 words) in the WT.

GI427 Half Unit Thematic Topics in Global Gender (In)Security

This information is for the 2024/25 session.

Teacher responsible: Dr Aiko Holvikivi

Availability: This course is available on the MSc in Gender, Peace and Security. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. Priority is given to students on the MSc in Gender, Peace and Security. Further places on the course are allocated based on a short motivational statement. Department of Gender Studies students will be prioritised and do not need to provide a statement.

Course content: Thematic Topics in Global Gender (In)Security provides an in-depth examination of peace and security issues from a gender perspective. The course explores issues related to but also exceeding the international Women Peace and Security agenda (WPS) and specifically considers areas not covered in as much depth in the foundational (GI425) course. These include: 1) critical approaches to peace and security (feminist foreign policy; queer perspectives on conflict and post-conflict spaces; GPS in cultural perspective) 2) implementing international policy frameworks (perspectives on national action plans; institutional gender work; resistance and backlash) 3) violence, masculinities and peace work (conflict-related gender-based violence; men, peace and security; peace and security case studies). Students develop an independent research paper in conversation with course themes.

Teaching: This half-unit course runs in the Winter term. This course has a reading week in Week 6 of WT.

Formative coursework: Essay title and essay abstract presented for feedback from course instructors and peers.

Indicative reading:

- Amiry, Suad. 2007. *Sharon and My Mother in Law: Ramallah Diaries*. Knopf Doubleday.
- Belkin, Aaron. 2012. *Bring Me Men: Military Masculinity and the Benign Façade of American Empire, 1898-2001*. Columbia University Press.

Assessment: Essay (100%, 3000 words) in the ST.

GI428 Half Unit Bodies, Culture and Politics

This information is for the 2024/25 session.

Teacher responsible: Dr Leticia Sabsay

Availability: This course is available on the MSc in Gender, MSc in Gender (Research), MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities.

This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to Department

of Gender Studies students.

Course content: 'Bodies, Culture and Politics' explores different understandings of "the human body," with a focus on how these have been mobilised by transnational artistic and cultural practices and politics of resistance. Bodies have been at the centre of debates within the social sciences and the humanities, and increasing attention has been paid to the significance of bodies in contemporary democratic politics. In the last decades, the uses of bodies and the arts in popular mobilisations and political activism have acquired renewed relevance, hand in hand with transnational dialogues and exchanges. Focusing on these trends, the course considers different theoretical approaches to bodies and embodiment (i.e. phenomenological, deconstructivist, materialist, psychoanalytic), and a set of related areas of inquiry, including the materiality of bodies, the differential value socially assigned to bodies, the affective dimension of embodiment, intersectional processes of racialisation, gendering and sexualisation, vulnerability, beauty ideals, and (dis)ability. These questions will inform our exploration of the imaginaries of the body mobilised by feminist and queer political art, activism, and cultural practices, as well as popular mobilisations and anti-racist and anti-austerity social movements, among others.

Teaching: The course runs in the WT. This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 project and 1 presentation in the WT.

Indicative reading:

- Ahmed, Sara (2006) *Queer Phenomenology*
- Butler, Judith (2014) *Notes Towards a Performative Theory of Assembly*
- Crimp, Douglas (2002) *Melancholia and Moralism: Essays on AIDS and Queer Politics*

Assessment: Essay (100%, 3000 words) in the ST.

GI429 Half Unit

Archival Interventions: Feminist, Queer and Decolonial Approaches

This information is for the 2024/25 session.

Teacher responsible: Clare Hemmings PAN

Availability: This course is available on the MSc in Empires, Colonialism and Globalisation, MSc in Gender, MSc in Gender (Research), MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security, MSc in Gender, Policy and Inequalities and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to Department of Gender Studies students.

Pre-requisites: The course is available for any MSc student at LSE, but students from outside the Dept of Gender Studies will need to seek permission to register. They will need provide a statement that shows a strong background in feminist, queer or post/decolonial theories, or a background in archives or library studies. These statements will be reviewed and entry cannot be guaranteed.

Course content: The course will foreground an interdisciplinary approach to the archive that provides students with skills to

approach archival work for their own research, and embed them in the critical work on archives that characterises much of the secondary and theoretical literature in the field. The course introduces students to archives both close to home – the Hall Carpenter Archive and the Women's Library, both at LSE – and further afield – within London, the UK and transnationally, and online. It highlights the importance of archives for research in gender studies, and teaches some key methods for archival data management and engagement. It explores the importance of archives generated through social movements as well as or as a critique of e.g. national archives and asks students to think about how to generate their own archives. The course's critical perspective assumes that the prioritisation of sources and the gaps within archives are fundamental to the generation of knowledge: what is lost is as important as what is visible or what remains. Students will be introduced to work that highlights the colonial, racist, homophobic and sexist nature of some archiving practices (and dominant archives) and will be asked to think about the kinds of critiques that transform our archival legacy. Finally, the course will encourage students to experiment with archives, in order to expand what we think of as an archive and to intervene to transform 'archival space'. Drawing on work on 'the sensed archive', on memoir, fiction and visual art practice, the course considers ways of bringing archives to life.

The course will be divided into three parts. The first '**archival fabrications**' asks what an archive is, how feminist, queer and critical race theorists have generated them, and will explore some fundamental techniques and issues that archiving presents to students. This will allow for the development of some methodological training and will engage students on the question of sources and how to gather or interpret them. Students will be introduced to oral history, online and social movement archives as well as the curation and form of more institutionalised archives. The second, '**archival readings**' highlights the different world-views archives generate from a critical perspective, foregrounding issues of nationalism, memorialisation, sexism and heteronormativity within archives and their curation. It also encourages students to think about alternative ways of understanding and reading archives, focused on 'exploring the gaps' that are inevitably part of any archival project. What kinds of reading tactics have feminist, queer and/or postcolonial critics developed for intervening in archives and to what effect? How might these tactics be harnessed for students' own research? The final part, '**archival experiments**' introduces students to a range of creative, interdisciplinary methods that generate new archives from a critical perspective (and moving beyond critique). Students will be introduced to experiments that foreground alternative sources, orderings, collections and imaginings as a way of extending archival knowledge. For example, black feminist work on 'critical fabulation' as a storytelling technique has been key to providing fuller archival knowledge of everyday lives; queer work on the sensed archive has extended the disciplinary range of archival sources; and feminist artists and activists have played with sources (and made others) in order to transform what we think of as past, present and future. Students will be asked to consider their own archival practice through all three parts of the course.

Teaching: This course runs in the WT. This course has a reading week in Week 6 of WT.

Formative coursework: Students will visit an archive of their choice (online or in person) and narrate their experience of the archive. What work does the archive do? How is the archive organised? What happened when they visited? Based on their visit, they will identify a research question they will use as the basis of further exploration for the summative. The formative is a 1500 word piece (due by the beginning of week 7), and should include a detailed account of the archive itself, the encounter with the space and its organisation, the research that drew you to the archive, and what you are hoping to learn.

NB. Students will be given lots of support for this process - LSE archivists will come to the workshops to introduce students to the range of materials/sources at the School; students will be given a list of possible archives to visit in person or online; and they will have at

least one workshop devoted to the needs of the formative, including the importance of identifying a research question going forward.

- Tanya Tagaq (2018) *Split Tooth* (Viking)

Assessment: Project (100%, 3000 words) in the ST.

Based on the formative, students will present and critically engage the archive they have visited as their course project. The assessment will include an extended account of the archive, any visit(s) made, encounters with the materials and people in the archive and methods used to access materials. Students will be supported to identify a key research question for exploring the archive (as part of their formative) and will be asked to critically assess the archive space from the perspective of that question. In line with the material and approaches covered in the course, students will also be encouraged (with close supervision) to integrate interdisciplinary and experiment approaches to the field. 3000 words split into background and archival encounter (part 1) and analysis (part 2) to be submitted in ST.

GI430 Half Unit Not available in 2024/25 Intersectional Inequalities in the Agro-Food System

This information is for the 2024/25 session.

Teacher responsible: Dr Anouk Patel-Campillo PAN11.01.M

Availability: This course is available on the MSc in Gender, MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities. This course is available as an outside option to students on other programmes where regulations permit.

Course content: In the past decades, there has been unprecedented change in the ways in which food is produced, distributed, and consumed. Scholars have grappled to understand the nature of systemic change and capture the processes and

mechanisms that characterize it to shed light on the impact that agro-food system restructuring has on people and places.

This course takes an intersectional and interdisciplinary approach to the analysis of agro-food system restructuring across scale (world region, national and transnational), space (flows, circulation, (in)mobility), and place (household, farm/food processing factory, community) to highlight the ways in which transformations in/of the agro-food system reflect struggles over claims and governance mechanisms by economic actors, states, and civil society.

In the first part of the course, the students will be introduced to (macro-level) causes and effects of agro-food system restructuring. The themes covered in this part of the course include trade and the corporate food regime to illustrate the ways in which globalization, neoliberalism and institutional architectures influence the geopolitics of the agro-food system while creating or maintaining macro-level and intersectional inequalities.

The second part of the course advances a granular understanding of the lived experiences of individuals, households and communities whose re/productive activities are central to the agro-food system and whose lives and environs are most affected by these transformations. Some of the themes covered in this part of the course include household gender inequality, land grabbing, and extractivism, among others. The course will end by examining some alternative paradigms for a more just and equitable agro-food system.

Teaching: This course runs in LT. It will be delivered using both asynchronous and interactive teaching and learning elements. There will be a reading week in week 6 in line with departmental policy.

Formative coursework: Students will be expected to produce one 1500 word essay in the LT.

Assessment: Essay (100%, 3000 words) in the ST Week 1.

GI431 Half Unit

Abolition and Anticarceral Feminisms

This information is for the 2024/25 session.

Teacher responsible: Dr S.M. Rodriguez

Availability: This course is available on the MSc in Gender, MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access).

Places are allocated based on a written statement. Priority will be given to students who have this course listed in their programme regulations. This may mean that not all students who apply will be able to get a place on this course.

Course content: This course centers around the critical feminist inquiry: are prisons obsolete? The class will focus on the history, growth, and current functioning of global systems of stratification, surveillance, and segregation/detention with the critical goal of questioning the future of such carceral structures. The course begins with the iconic book, *Are Prisons Obsolete?* by Angela Davis and foundational anticarceral feminist examinations. The texts for the course intersect with several fields, including Geography, History, Africana Studies, and Critical Disability Studies. Through transnational, decolonial and interdisciplinary exploration, students are introduced to a range of sites and strategies of carceral and anticarceral feminisms and exposed to methods of scholarly interrogation and analysis. The course introduces justice-based terminologies and political philosophies, and outlines various justice models such as retributive, rehabilitative, restorative, incapacitative, and transformative justice.

Teaching: 30 hours of workshops in the WT.

Formative coursework: Students will be expected to produce 1 reflection essay (1,000 words) in the WT.

Indicative reading: 1 Ben-Moshe, Liat. 2020. *Decarcerating disability: Deinstitutionalization and prison abolition*. U of Minnesota Press.

2 Bernstein, Elizabeth. 2012. "Carceral politics as gender justice? The "traffic in women" and neoliberal circuits of crime, sex, and rights." *Theory and society* 41: 233-259.

7 Thuma, Emily L. 2019. *All our trials: Prisons, policing, and the feminist fight to end violence*. University of Illinois Press.

8 Walia, Harsha. 2021. *Border and rule: Global migration, capitalism, and the rise of racist nationalism*. Haymarket Books.

Assessment: Research proposal (100%) in the ST Week 1.

The research proposal consists of three parts:

- Epistemological Reflection – 1,500-word written piece, reflecting on a selection of readings alongside social context or personal standpoint
- Site of Analysis (Case or Policy) – poster presentation, 1,000-word written piece, or a documentary video roughly 10 minutes in length
- Proposed Method of Study – 500-word review of methodological and ethical considerations

Availability: This course is compulsory on the MSc in Gender, MSc in Gender (Research), MSc in Gender (Rights and Human Rights), MSc in Gender (Sexuality), MSc in Gender, Development and Globalisation, MSc in Gender, Media and Culture, MSc in Gender, Peace and Security and MSc in Gender, Policy and Inequalities. This course is available on the MPhil/PhD in Gender. This course is not available as an outside option.

Course content: The Independent Research Project is a student-led module facilitating learning on how to conduct original research independently, with support to develop research ideas and to achieve research 'milestones' during development stages. The completion of the Independent Research Project module entails the following:

- Achievement of all 'milestones' / development stages of your project throughout the academic year.
- Completion of GI499 Methodologies Series - attendance at all compulsory (varies between six to eight) and a minimum of three optional classes.
- Submission of a dissertation/independent study project, meeting departmental standards and requirements.

The Independent Research Project and resulting dissertation may be on any approved topic within the field of the MSc programme studied.

The 'methodologies series' provides introductory compulsory and optional workshops in the Autumn, Winter and Spring Terms designed to provide support for the conception, development and completion of the Independent Research Project. Students will be introduced to dissertation guidelines, common difficulties, ethical issues, basics in research practice, managing sources, the process of research and writing, and ways of creating research impact.

The sessions will consider challenges raised by quantitative and qualitative methods, and include examples from and approaches to policy research, interviewing, discourse analysis, oral histories, archival studies, and visual and media analysis. The workshops may vary and are taught within the Department of Gender Studies according to expertise, and will involve student participation.

Teaching: The 'methodologies series' involves a combination of compulsory and optional dissertation workshops spread across the AT, WT and ST.

Students are provided supervision for the Independent Research Project during the WT and ST.

This course has a reading week in Week 6 of WT.

Indicative reading:

- Ackely, B. and True, J. (2010) *Doing Feminist Research in Political and Social Science*, Houndmills, Basingstoke: Palgrave Macmillan.
- Badgett, Lee (2016) *The Public Professor: How to Use Your Research to Change the World*. NY: New York University Press.

- Biggam, J. (2017) *Succeeding with your Master's Dissertation: A Step-by-Step Handbook*, Maidenhead: Open University Press.
- Creswell, J. W, Creswell, J. D (2018) *Research Design: Qualitative, Quantitative and Mixed Methods Approaches*, California: Sage.
- Harding, Sandra G. (ed.) (2003) *The Feminist Standpoint Theory Reader: Intellectual and Political Controversies*. NY: Routledge.
- Hart, C (2005) *Doing your Masters Dissertation: Realising Your Potential as a Social Scientist*, London: Sage.
- Hesse-Biber, S. N., Leavey, P. L. (2007) *Feminist Research Practice: A Primer*, Thousand Oaks, London: Sage.
- Swetnam, D., Swetman, R. (2000) *Writing Your Dissertation: How to Plan, Prepare and Present Your Work Successfully*, Oxford: How to Books.
- Weiss, Robert S. (1995) *Learning From Strangers: The Art and Method of Qualitative Interview Studies*. NY: The Free Press.

Assessment: Dissertation (100%, 10000 words) in August.

Additionally, in the WT students will submit milestone documents: (a) title or topic of research; (b) summary proposal including research question, methodological and analytical / theoretical approach; (c) and an annotated bibliography during the Spring vacation.

GI499

Dissertation - Independent Research Project

This information is for the 2024/25 session.

Teacher responsible: Dr Sharmila Parmanand and faculty of Department of Gender Studies.

GV408 Half Unit

Contemporary Disputes about Justice

This information is for the 2024/25 session.

Teacher responsible: Dr Bruno Leipold

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Theory.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access and is capped at two groups) and demand is typically very high. Priority is given to students on the MSc in Political Theory; students from outside this programme may not get a place.

Pre-requisites: None, though some previous exposure to normative political theory may be an advantage.

Course content: The course offers a critical analysis of key debates about justice which have followed the publication of John Rawls's *A Theory of Justice* in 1971. The first part of the course focuses on Rawls's own theory of justice as fairness and critiques of that theory by liberals, feminists, socialists and critical race theorists. The second part of the course explores a number of alternative accounts of justice, such as Iris Marion Young's focus on injustice and oppression, and some of the egalitarian alternatives to Rawls's difference principle, such as Ronald Dworkin's equality of resources and Elizabeth Anderson's democratic equality. The final third of the course delves into various ways in which discussions of justice have been extended and applied. This includes discussion of whether principles of domestic justice apply globally; how we should understand historical injustice and what remedies and reparations are justified in light of those injustices; and what sort of economic systems could realise the demands of justice, such as a property-owning democracy and liberal socialism, as well as discussion of specific economic institutions, such as workplace democracy and universal basic income.

Teaching: This course is delivered through 20 hours of seminars in the Winter Term. There will be a reading week in WT Week 6 for private study and assessment preparation.

Formative coursework: All students are expected to submit one formative (non-assessed) essay.

Indicative reading: J. Rawls, *A Theory of Justice*; Susan Moller Okin, *Justice, Gender and the Family*; Iris Marion Young, *Justice and the Politics of Difference*; Elizabeth Anderson 'What is the Point of Equality?' *Ethics*; Ronald Dworkin 'What is Equality? Part 2: Equality of Resources', *Philosophy and Public Affairs*; Charles Beitz, *Political Theory and International Relations*; Lea Ypi, *Global Justice & The Political Avant-Garde*; David Miller, *National Responsibility & Global Justice*; Laura Valentini, *Justice in a Globalized World*.

Assessment: Essay (100%, 4000 words).

GV439 Half Unit

Government and Politics in Central and Eastern Europe

This information is for the 2024/25 session.

Teacher responsible: Dr Vesselin Dimitrov

Availability: This course is available on the MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Political Science (Political Behaviour). This course is available as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you request a place and meet the criteria, you are likely to be given a place.

Course content: The course provides an analytical assessment of the transition from communism to liberal democracy in Central and Eastern Europe and integration with the European Union, including the Eurozone. The course offers an in-depth analysis of institutions, party systems, government and public administration,

nationalism, and EU integration, including the Eurozone. Topics covered include: The Communist system. Constitution-making and the development of democratic party systems. Reform of executive institutions and public administration. (Mis)management of ethnic conflict: the case of Yugoslavia. Integration with the European Union, including the Eurozone.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 32 hours in the Winter Term and Spring Term.

There will be a reading week in Week 6 of the WT for private study and formative/summative assessment preparation.

Formative coursework: Students are required to produce two essays in the Winter Term.

Indicative reading: V Dimitrov, K H Goetz and H Wollmann, *Governing after Communism: Institutions and Policymaking*; A Przeworski, *Democracy and the Market*; H Grabbe, *The EU's Transformative Power: Europeanization through Conditionality in Central and Eastern Europe*; J Elster et al, *Institutional Design in Post-Communist Societies*; R Taras (Ed), *Postcommunist Presidents*; R Crampton, *Eastern Europe in the Twentieth Century*, 2nd edn; S White, P G Lewis and J Batt (Eds), *Developments in Central and East European Politics* 5.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

GV441 Half Unit Not available in 2024/25

States and Markets

This information is for the 2024/25 session.

Teacher responsible: Dr David Woodruff

Availability: This course is available on the MSc in Development Studies, MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Political Science (Political Science and Political Economy), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped. Priority will be given to MSc in Political Science students. In 2023-2024 all students on Department of Government programmes who wished to take the course were able to do so.

Course content: To introduce politics students to basic economic theorising; to discuss the nature of markets; review contemporary discussions regarding the role of the state in the economy; provide a comparison of the relationship of states and markets in different political settings and historical contexts. Indicative topics: The state and the institutional foundations of markets; states and markets in the Great Depression; domestic and international monetary institutions; varieties of capitalism and change in varieties of capitalism; economics and politics of market bubbles; politics and policy in the financial crisis of 2007-2009; the Eurozone crisis.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 28 and a half hours in the Autumn Term.

There will be a reading week in Week 6 of the AT.

Formative coursework: All students are expected to submit one non-assessed essay.

Indicative reading: Block, Fred. "The Roles of the State in the Economy." *The Handbook of Economic Sociology*, edited by Neil J Smelser and Richard Swedberg, Princeton University Press, 1994, pp. 691–710.

Keynes, John Maynard. "The Means to Prosperity." *The Collected Writings of John Maynard Keynes*, edited by Elizabeth Johnson and Donald Moggridge, vol. VI, Cambridge University Press, 1978, pp. 335–66, doi:10.1017/UPO9781139524162.

Fourcade-Gourinchas, Marion, and Sarah L. Babb. "The Rebirth of the Liberal Creed: Paths to Neoliberalism in Four Countries." *American Journal of Sociology*, vol. 108, no. 3, 2002, pp. 533–79, doi:10.1086/367922.

Assessment: Exam (100%, duration: 2 hours) in the January exam

period.

GV454 Half Unit Parties, Elections and Governments

This information is for the 2024/25 session.

Teacher responsible: Prof Torun Dewan

Availability: This course is available on the MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Science (Political Behaviour) and MSc in Political Science (Political Science and Political Economy). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course focuses on key topics in political science concerning voting and representation. Topics covered include:

- Party and Candidate Strategy
- The Role and Origins of Parties
- Government Formation and Termination
- Electoral Systems: Franchise, Ballot, and Allocation formulas
- Leadership
- Political Careers
- Government Accountability

Examples will be drawn from a wide range of democracies.

Teaching: This course is delivered through seminars totalling 20 hours across the Winter Term. There is a reading week in Week 6 of the WT.

Formative coursework: All students are expected to submit one non-assessed essay.

Indicative reading: The course is focussed mainly on journal articles. However the following books are relevant to some of the topics covered:

Gary Cox, *Making Votes Count* (1995); Gary Cox & Mathew McCubbins, *Setting the Agenda* (2005); George Tsebelis, *Veto Players* (2002); Kenneth Shepsle and Mark Boncheck, *Analysing Politics* (1997); Tim Besley, *Principled Agents* (2005); John Aldrich, *Why Parties* (1995); Bruce Bueno de Mesquita, Alastair Smith, Randolph Siverson and James Morrow, *The Logic of Political Survival* (2003); Giovanni Sartori, *Comparative Constitutional Engineering* (1997); Michael Laver & Norman Schofield, *MultiParty Government: The Politics of Coalition in Europe* (1990).

Assessment: Essay (100%).

GV477 Half Unit Comparative Public Policy Change

This information is for the 2024/25 session.

Teacher responsible: Dr Michael Lerner
Dr Rehan Jamil

Availability: This course is available on the MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit. The course is capped at 2 groups.

Pre-requisites: Students should normally be taking GV4E9 *Approaches and Issues in Public Policy and Administration* or already have a good knowledge of comparative public policy. Waiving of these requirements will be at the discretion of the course teachers.

Course content: The course examines explanations of policy change using comparative methods. Students will become familiar with core models of agenda-setting and policy adoption, consider

dimensions of variation in public policy, and identify and test drivers of policy change. The course will also offer foundational instruction in research design, measurement, and methods for case-based comparative analysis. Specific topics include policy change for economic transitions, emerging technologies, and social protection.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across the Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Indicative reading: There is no single textbook but the following are particularly useful introductions:

Dodds, Anneliese. (2018), *Comparative Public Policy* (2nd ed.) Macmillan International Higher Education.

Hall, Peter (1997). "The role of interests, institutions and ideas in the comparative political economy of the advanced industrial state" in *Comparative Politics: Rationality, Culture and Structure* (Mark I. Lichbach and Alan S. Zucker, eds.). Cambridge University Press. Chapter 7.

Hacker, Jacob S., Paul Pierson, and Kathleen Thelen. (2015). "Drift and conversion: Hidden faces of institutional change" in *Advances in Comparative-Historical Analysis* (James Mahoney and Kathleen Thelen, eds.). Cambridge University Press. Chapter 7.

Breetz, Hanna, Matto Mildenberger, and Leah Stokes (2018). "The political logics of clean energy transitions." *Business and Politics*, 20.4: 492-522.

Brummer, Chris and Yesha Yadav (2019). "Fintech and the Innovation Trilemma." *Georgetown Law Journal*, 107.2:235–308.

Assessment: Video (20%) in the WT.

Research paper (80%) in the ST.

Students will create up to two 4–6 minute video blog posts interpreting a recent event through the lens of course material (one must be uploaded in the first half of term, and one in the second half of term), of which one will be submitted for assessment.

The research paper will consist of a comparative case analysis of 3000 words.

GV481 Half Unit Quantitative Analysis for Political Science

This information is for the 2024/25 session.

Teacher responsible: Dr Aliz Toth

Availability: This course is compulsory on the MSc in Political Science (Political Behaviour) and MSc in Political Science (Political Science and Political Economy). This course is available on the MRes/PhD in Political Science, MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Political Science (Global Politics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on the Political Science and Political Economy and Political Behaviour streams of the MSc in Political Science will be granted priority access as this is a compulsory course for their programme. Other postgraduates wanting to take the course (space permitting) require the permission of the teachers responsible.

Course content: The course provides an introduction to quantitative thinking in the field of political science. Its goal is to give students the tools to ask the right questions, be sceptical when appropriate, and distinguish between useful and misleading evidence. Students will be introduced to the basic toolkit of quantitative analysis, which includes hypothesis testing, regression, experiments, differences in differences, and regression discontinuity. Students will also learn how to use a statistical software program, RStudio, to organize and analyze data through weekly problem sets.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours in the

Autumn Term. There will be a reading week in Autumn Term Week 6.

Formative coursework: Two problem sets.

Indicative reading: Bueno de Mesquita, E.B. and Fowler, A., 2021. Thinking clearly with data: A guide to quantitative reasoning and analysis. Princeton University Press.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Coursework (50%) in the AT.

The coursework will consist of a data analysis exercise using R.

GV482 Half Unit

Political Science and Political Economy: Current Issues

This information is for the 2024/25 session.

Teacher responsible: Prof Stephane Wolton

Availability: This course is compulsory on the MSc in Political Science (Political Science and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit.

Other postgraduates wanting to take the course (space permitting) require the permission of the teacher/s responsible.

Pre-requisites: Students should either have attended GV4C8 and GV481 or equivalent courses. Knowledge of game theory at the level of GV4C8 and empirical method to the level of GV481 is required.

Course content: The course will cover four topics in political science and political economy. Each topic will be covered over two to three weeks. During these weeks, students will learn how game theory and empirical methods can be used to understand and think critically about pressing political issues. In recent years, the topics covered have been: 1) The critiques of democracy, 2) Populism, 3) Discrimination, 4) Autocracy or democracy?.

During the lecture, students will be taught important papers on the topics covered. Seminars will be of two sorts. Some seminars will consist of replication exercises (Weeks 1, 5, 8, 9, and 11). Others will be problem set based (Weeks 2, 3, 5, 7, and 10). All seminars will be related to topics viewed during the lectures.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across Winter Term (20 hours of lectures and 20 hours of seminars). There will also be a take-home mock exam and a two-hour revision seminar in the Spring Term.

There will be a reading week in WT Week 6.

Formative coursework: Students will hand in one problem set and one replication exercise before the reading week. There will also be a take-home mock exam in the Spring Term.

Indicative reading: Mostly journal articles. The reading list varies each year.

Assessment: Coursework (50%).

Online assessment (50%) in the ST.

The coursework will consist of a research project on a political science issue picked by the course convenor. Students will be provided with a dataset and will be asked to empirically investigate the question at hand. The online exam will consist of a problem question using game theory and an essay question (estimated amount of effort required for the online exam: 3 hours in a 24 hour-period, though there is no limit on how much time the student spends on the exam during the 24-hour period).

GV483 Half Unit

Public Management Theory and Doctrine

This information is for the 2024/25 session.

Teacher responsible: Prof Martin Lodge

Availability: This course is available on the MPA Dual Degree

(LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Public Policy and Administration, MSc in Regulation and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and access cannot be guaranteed. Priority will be given to students on the programmes listed above.

Course content: The course offers an intensive introduction into key areas of public management with reference to both developed and lesser developed world contexts. Topics include administrative doctrine, implementation, organizational change and inertia, capacity building, performance-management, leadership, institution creation, transparency and risk management. Public management is treated as an interdisciplinary field of study, with a particular emphasis on the administrative practices and change as well as the critical analysis of practical arguments about Public Management.

Teaching: This course will be delivered through a combination of seminars and lectures, amounting to a minimum of 23 and a half hours in the Autumn term. This course includes a reading week in Week 6 of term.

Formative coursework: Students are expected to complete two formative essays.

Indicative reading: M Barzelay, Public Management as a design-oriented profession discipline, 2019; C Hood, The Art of the State, 1998; C Hood and M Lodge, Politics of Public Service Bargains, 2006; C Hood and H Margetts, Tools of Government in the Digital Age, 2007; C Hood, The Blame Game, 2010; A Hassel and K Wegrich, How to Do Public Policy, 2022.

Assessment: Essay (60%, 2500 words) in the WT.

Blog post (40%) in the AT.

The blog would have a word limit of 1000 words, and would be due for submission at the end of Week 11 of AT.

GV488

Law and Politics of Regulation

This information is for the 2024/25 session.

Teacher responsible: Prof Martin Lodge, Prof Veerle Heyvaert, and Dr Michael Lerner

Availability: This course is compulsory on the MSc in Regulation. This course is not available as an outside option.

Course content: The course aims to give students an essential grounding in theories of regulation encountered in the legal, political science and law and economics literatures. It examines competing explanations of the origins, development and reform of regulation; the styles and processes of regulation; issues surrounding enforcement; the inter-organisational and international aspects of regulation; and questions of evaluation and accountability. Additional sessions offer an introduction to regulatory economics and practitioner-led seminars.

Teaching: This course will be delivered through a combination of seminars and lectures, amounting to a minimum of 50 hours across the Autumn and Winter terms. This course includes a reading week in Week 6 of both terms.

Formative coursework: All students are expected to produce two written essays.

Indicative reading: R Baldwin, M Cave and M Lodge, Understanding Regulation (2012); K Yeung and M Lodge, Algorithmic Regulation (2019); C Hood, H Rothstein & R Baldwin, The Government of Risk (2001); C Sunstein, Risk and Reason (2002); R. Baldwin, M. Cave and M. Lodge, Oxford Handbook of Regulation (2010); M Lodge and K Wegrich, Managing Regulation (2012); D. Carpenter and D. Moss, Preventing Regulatory Capture (2013).

Assessment: Exam (75%, duration: 3 hours) in the spring exam period.

Essay (25%, 2500 words) in the ST.

The summative assessment is composed of:

- Exam (75%, duration: 3 hours) in ST.
- Individual research paper (25%, 2500 words), to be submitted in Week 1 of ST.

GV498 Half Unit Multiculturalism

This information is for the 2024/25 session.

Teacher responsible: Prof Paul Apostolidis

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

This course is capped at two groups.

Course content: This seminar explores diverse theoretical perspectives on political and ethical responses to contemporary multiculturalism and the many different forms of cultural politics. In part, we confront normative-philosophical issues concerning how to justify special rights for particular cultural groups with reference to certain principles of freedom, justice or the human need for 'recognition.' We consider immigrants' and other groups' demands for cultural preservation in light of European cosmopolitan ideals, and explore how those ideals may not only embrace cultural openness but also carry legacies of colonialism. The course also takes up questions regarding the meaning and effects of cultural politics in relation to political struggles for socioeconomic justice and against racial, gender and sexual domination. Through what practices of communication can different cultural groups approach mutual understanding in the aftermath of empire and colonisation? Does engaging in sexual and gender identity politics clash with or strengthen political action against capitalist and racial power? Texts in the course's later phase combine political theory with empirical studies of indigenous, racial/ethnic minority, youth-subcultural and religious politics. These readings give us concrete grounds for addressing the course's key questions as well as examples of innovative methodological approaches to writing political theory.

Teaching: This course is delivered through a minimum of 20 hours of seminars in the Winter Term. There will be a reading week in Week 6 of the Winter Term.

Formative coursework: Students are invited to write one 1500 word formative essay, due no later than week 8.

Indicative reading: Charles Taylor, "The Politics of Recognition"; Will Kymlicka, "Multicultural Citizenship"; Iris Marion Young, "Polity and Group Difference"; Cristina Beltrán, "The Trouble with Unity: Latino Politics and the Creation of Identity"; Saba Mahmood, "Religious Reason and Secular Affect"; Glenn Coulthard, "Red Skin, White Masks"; Charles W. Mills, "Multiculturalism as/and/or Anti-Racism?"

Assessment: Essay (100%, 4000 words) in the ST.

GV499 Dissertation

This information is for the 2024/25 session.

Availability: This course is compulsory on the MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Political Science (Political Behaviour), MSc in Political Science (Political Science and Political Economy), MSc in Political Theory, MSc in Public Policy and

Administration and MSc in Regulation. This course is not available as an outside option.

Course content: A compulsory 10,000 word dissertation is required to be submitted as part of the assessment for each Government MSc programme. The dissertation is due in August 2025.

Assessment: Dissertation (100%, 10000 words) in August.

GV4A2 Half Unit Citizens' Political Behaviour: Elections, Public Opinion and Identities

This information is for the 2024/25 session.

Teacher responsible: Prof Michael Bruter

Availability: This course is available on the MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Political Behaviour), MSc in Political Science (Political Science and Political Economy) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 1 group.

Note that students from Masters or Doctoral programmes not listed above may still take the course subject to approval by the course convener.

Pre-requisites: Students intending to take this course are recommended to submit a brief research project idea by the end of AT Week 2. The recommended format is a 1 page proposal indicating a research topic and why it is interesting, a potential specific research question and a brief outline of the methodology the student intends to use to answer this question empirically.

Course content: This course intends to familiarise students with the study of electoral psychology and political behaviour in a broad sense. The three main objects of study in political science are institutions, policies, and citizens, and the study of political behaviour and political psychology is the field that centres on the third. A very important part of political behaviour is electoral participation and vote choice. We will explore general models of voting behaviour, electoral psychology, and participation, as well as specific aspects such as extremist politics. We will look closely at public opinion, how it is formed and how it can be studied. In the final part of the course, special consideration is given to political identities and how they are related to political behaviour.

Teaching: 20 hours of seminars in the AT. 4 hours of seminars in the ST.

The seminars include a mixture of 5 substantive seminars, 3 research clinics to discuss the research projects, and 2 election seminars discussing specific elections taking place during the teaching year.

Indicative reading: Bruter, M. and Harrison, S. Inside the Mind of a Voter

Harrison, S. Pathologies of Democratic Frustration
Lipset, S., Lazarsfeld, P. et al. The psychology of voting
Sniderman, P. Personality and democratic politics

Bruter, M., and Lodge, M. Political Science research methods in action

Baddeley, A. The psychology of memory

Cammaerts, B. et al. Youth participation in democratic life

Harrison, S and Bruter, M. Mapping extreme right ideology

Van der Eijk, C, and Franklin, M. 2009. Elections and Voters.

Basingstoke: Palgrave Macmillan.

Franklin, Mackie, et al. 1992. Electoral Change. Cambridge: Cambridge UP.

Assessment: Project (80%, 5000 words) in the ST.

Class participation (20%) in the AT.

One empirical research project, due at the start of ST, on a topic relevant to the course and approved by the course co-ordinator

with a word limit of 5,000 words (80%).

The class participation element (20%) involves critiques of further readings work as follows: to make the reading list more manageable for the 5 substantive seminars, all students will only be expected to familiarise themselves with the core readings, and will divide the further readings between themselves. Each student will be expected to be responsible for a total of 4-5 further readings throughout the year, each from different weeks.

Students responsible for a further reading will be asked to write a short (1-2 page) critique of it following a set format (1) what is the research question and why is it interesting, 2) what methods are the authors using, 3) what are the main findings, 4) what are the main shortcomings or what do you wish the authors had done differently) and post it on Moodle by the Sunday before the seminar so that students can quickly browse the week's 'menu' in advance. The students having each covered different further readings will bring them into the seminar discussion.

The students are asked to select their 3 best critiques which must have been submitted on time on Moodle and which will be marked.

GV4A8 Half Unit Political Violence and Terrorism

This information is for the 2024/25 session.

Teacher responsible: Prof James Hughes

Availability: This course is available on the MSc in Political Science (Conflict Studies and Comparative Politics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Availability to students outside the MSc in Political Science (Conflict Studies and Comparative Politics stream) is subject to space. This course is capped at two groups.

Course content: How can we distinguish legitimate resistance and political violence from terrorism? What is the relationship between war and terror? What distinguishes a combatant from non-combatant? Should we erode civil liberties and democratic values to fight terrorism? How do social scientists theorise about political violence and terrorism? This course attempts to answer these and similar questions by a comparative examination of the theories and ethics of political violence and the root causes, nature and types, and dynamics of violence. This course also evaluates different political and security policies and methods of conflict resolution as change agents. A number of case studies of historical and contemporary conflicts are examined to illustrate the theoretical and policy dilemmas. The course has two parts. Firstly, it examines definitions and concepts, the principles and efficacy of the laws and norms of armed conflict and ethical dilemmas in their application. We explore the causes and motivations for engaging and not engaging in political violence. We examine the historical evolution of policies of counterinsurgency and counterterrorism from the colonial era to the present day by analysing cases (France/Algeria, UK/Empire, US/Vietnam, Israel/Palestine, Russia/Chechnya). The effects of dealing with resistance, from coercive to cooperative approaches, is analysed, and the impact on the balance between security and liberty in democracies is mapped. Secondly, the course explores the key issues and debates through a number of detailed case studies that analyse political violence and terrorism in democracies and non-democracies, including the insurgency and counterinsurgencies in Northern Ireland, Iraq, and Afghanistan, the transnational challenges posed by Islamist violence and forms of White Supremacist violence. The relationship between war, ethnic cleansing and genocide is examined by comparing the cases of the Former Yugoslavia, Ukraine, and Israel/Palestine/Gaza. Throughout the course critical perspectives are encouraged, with lessons drawn from the performance of different regime types (colonial, democratic, and authoritarian) in managing political violence.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours per group in the Autumn Term. There will be a reading week in Week 6 of the

AT for private study and assessment preparation.

Formative coursework: One essay of 1,500 words, to be on a topic that differs from the summative essay. Students must also contribute to a team presentation.

Indicative reading: Tore Bjorgo ed. *Root Causes of Terrorism*, Routledge (2005); Andrew Silke ed. *Terrorists, Victims and Society, Psychological Perspectives on Terrorism and its Consequences*, Wiley (2003); David Whittaker, *The Terrorism Reader*, Routledge (3rd edn, 2007); Michael Walzer, *Just and Unjust Wars: A Moral Argument with Historical Illustrations*, Basic Books (1992); *Arguing about War*, Yale University Press (2004); Michael Ignatieff, *The Lesser Evil. Political Ethics in an Age of Terror*, Edinburgh University Press (2005); James Hughes, *Chechnya from Nationalism to Jihad*, University of Pennsylvania Press (2008); Marc Sageman, *Understanding Terror Networks*, University of Pennsylvania Press (2004) and *Leaderless Jihad, Terror Networks in the Twenty-First Century*, University of Pennsylvania Press (2007), and *Misunderstanding Terrorism*, University of Pennsylvania Press (2016); Jeff Victoroff and Arie W. Kruglanski eds, *Psychology of Terrorism. Classic and Contemporary Insights*, Psychology Press (2009); Cas Mudde, *The Populist Radical Right: A Reader*, Routledge (2017).

Assessment: Essay (100%, 5000 words) in the WT.

GV4B6 Half Unit Kant's Political Philosophy

This information is for the 2024/25 session.

Teacher responsible: Dr Tom Bailey

Availability: This course is available on the MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 2 groups.

Pre-requisites: Some familiarity with either the history of political thought or with philosophy is an advantage but is not strictly necessary. The course does not assume any prior exposure to Kant's political or philosophical writings. That said, Kant's writings are intellectually demanding; students should have an interest in engaging with political concepts at a fairly high level of abstraction.

Course content: This course offers an introduction to and critical appraisal of Immanuel Kant's political philosophy. Despite the enormous influence which Kant's moral philosophy has exerted on debates in contemporary political theory, his political philosophy has until recently been largely ignored. This is now changing: Kant's political philosophy is beginning to be studied in its own right. Such study shows that his political thinking is distinctive within the tradition of European political thought and from much contemporary political theory. The impact of Kant's thought upon the latter must, therefore, be re-assessed. Through close reading and analysis of the primary texts, this course introduces students to Kant's distinctive approach to political thinking.

The core text will be the *Doctrine of Right* (Part 1 of *The Metaphysics of Morals*). The course will also draw on Kant's other works, including his celebrated essay, 'On Perpetual Peace'; and his less well known, but no less important essay 'On the Common Saying: "This may be true in theory, but does it work in Practice"'. The analytic and substantive focus will be on three interrelated themes: Kant's idea of freedom as an idea of reason; his account and justification of individual property rights and related conception of state authority; and his cosmopolitan conception of justice. The analytic and philosophical focus will be on Kant's own political thinking, although we shall compare and contrast Kant's position with other – historical and contemporary – positions wherever appropriate.

Teaching: This course will be delivered in the form of a two-hour weekly seminar during the Winter Term, totalling 20 hours. There will be a reading week in Week 6 of Winter Term.

Formative coursework: Students are expected to come well prepared and take an active role in seminar discussion. Doing the weekly readings in advance of the seminars is essential for this course. Students are expected to write one formative essay

(of up to 2500 words). The formative essay will be marked and commented on, but does not count towards formal assessment for this course.

Indicative reading: Kant, *The Metaphysics of Morals*, Part 1; Kant, *Groundwork of the Metaphysics of Morals*; M Timmons (ed.), *Kant's Metaphysical of Morals. Interpretative Essays*; Katrin Flikschuh, *Kant and Modern Political Philosophy*; Arthur Ripstein, *Force and Freedom*; B. Sharon Byrd and Joachim Hruschka, *Kant's Doctrine of Right: A Commentary*; Onora O'Neill, *Constructions of Reason*; Pauline Kleingeld, *Kant and Cosmopolitanism*; Stephen Darwall, *The Second-Person Standpoint*.

Assessment: Essay (100%, 5000 words).

GV4B7 Half Unit The Idea of Freedom

This information is for the 2024/25 session.

Teacher responsible: Dr Bruno Leipold

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Theory. This course is not available as an outside option.

This course has a limited number of places (it is controlled access and is capped at two groups) and demand is typically very high. Priority is given to students on the MSc in Political Theory; students from outside this programme may not get a place.

Pre-requisites: Basic familiarity with concepts and methods in normative political theory.

Course content: The concept of freedom is often invoked in political life. Many policies and broader political agendas are justified in its name. Nearly all modern ideologies from liberalism to socialism and conservatism claim liberty as a central value. But what, exactly, does freedom mean? Is freedom best understood in terms of absence of interference or in terms of non-domination? Is one made unfree only when one's rights are violated? Does poverty constitute a constraint on freedom? Does wage-labour make workers unfree? And could citizens of an authoritarian regime be described as free? These are some of the questions addressed in this module. Depending on the particular year in which the module is taught, the approach taken may be either historical or contemporary-analytic or a combination of the two. Consequently, authors discussed may include key historical thinkers such as Hobbes, Locke, Rousseau, and Kant, as well as contemporary scholars such as Isaiah Berlin, Hannah Arendt, Charles Taylor, Philip Pettit, Nancy Hirschmann, Quentin Skinner, Amartya Sen, Martha Nussbaum and others. The overall aim of the course is to enable students to assess the quality and strength of different theorists' conceptions of freedom and to deploy those conceptions in the analysis and justification of some core institutions within the modern state.

Teaching: This course is delivered through 20 hours of seminars in the Autumn Term. There will be a reading week in Week 6 of the AT.

Formative coursework: All students are expected to submit one formative (non-assessed) essay.

Indicative reading: Isaiah Berlin, 'Two Concepts of Liberty' in Berlin, *Liberty* (edited by Henry Hardy); Hannah Arendt, 'Freedom and Politics', in Miller (ed.), *The Liberty Reader*; Gerald MacCallum, 'Negative and Positive Freedom', in *Philosophical Review*, 76 (1967); Nancy Hirschmann, *The Subject of Liberty*; Phillip Pettit, *A Theory of Freedom*; Robert Nozick, *Anarchy, State, and Utopia*; G. A. Cohen, 'Capitalism, Freedom and the Proletariat' in Miller (ed.) *The Liberty Reader*; John Stuart Mill, *On Liberty*; Jean-Jacques Rousseau, *The Social Contract*; Thomas Hobbes, *Leviathan*; John Locke, *Second Treatise of Government*.

Assessment: Essay (100%, 4000 words).

GV4B8 Half Unit Not available in 2024/25 Civil Wars: Concepts and Cases

This information is for the 2024/25 session.

Teacher responsible: Dr William Kissane

Availability: This course is available on the MSc in Comparative Politics, MSc in Conflict Studies, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po) and MSc in Gender, Peace and Security.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines social science explanations of the origins, intractability and outcomes of civil wars. It does this through the comparative analysis of various cases. These cases may vary from year to year. Particular stress is on: Civil war and civilization. The concept of civil war. Patterns of civil war since 1945. Large N approaches. Decolonisation and democratisation as causes of civil war. The emergence of security dilemmas. Partition and civil war. The idea of global civil war.

Teaching: This course provides a combination of seminars and lectures totalling a minimum of 30 hours in the Lent Term. There will be a reading week in week 6 of the LT for private study and assessment preparation.

Formative coursework: All students are expected to submit one non-assessed essay of 1500 words.

Indicative reading: Bill Kissane, *Nations Torn Asunder*; The Challenge of Civil War, OUP 2016.

Assessment: Essay (100%, 3000 words) in the ST.

GV4B9 Half Unit The Second Europe

This information is for the 2024/25 session.

Teacher responsible: Dr Vesselin Dimitrov

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Political Science (Political Behaviour). This course is available as an outside option to students on other programmes where regulations permit. This course is not controlled access. If you request a place and meet the criteria, you are likely to be given a place.

Course content: The course explores the problems of delayed modernisation, problematic democratisation, conflictual nation-building and geopolitical insecurity in the European semi-periphery, including countries such as Russia, Poland, Spain, Italy, Austria-Hungary, and Sweden. It analyses the socio-economic structures, political issues and problems shared by the European semi-periphery from the first wave of liberal globalisation and the emergence of mass politics in the late 19th century to European integration in the early 21st century. It analyses the strategies adopted by political elites and social classes in the face of modernisation, imperial decline, nationalism, and European integration.

Course topics include: The emergence of core and semi-periphery in Europe; Problems of economic modernisation; Political parties and ideologies; State nationalism, sub-state nationalism and problems of nation-state building; Religion: the socio-political power of the church; Ruling elites and structures of power; Fascism and varieties of right-wing authoritarianism in the 1920s and 1930s; Communism; Empire and EU integration.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 32 hours in the Winter Term and Spring Term.

There will be a reading week in Week 6 of the WT for private study and assessment preparation.

Formative coursework: Students are required to submit one

formative essay of 2000 words in the Winter Term.

Indicative reading: K Polanyi, *The Great Transformation: The Political and Economic Origins of Our Time* (Boston, 2001); M Mann, *The Sources of Social Power: Vol. 2, The Rise of Classes and Nation States, 1760-1914, Vol. 3, Global Empires and Revolution, 1890-1945, and Vol. 4, Globalizations, 1945-2011* (Cambridge, 2012-13); B Moore, *Social Origins of Dictatorship and Democracy* (Boston, 1967); E Hobsbawm, *The Age of Capital, 1848-1875* (London, 1975), *The Age of Empire, 1875-1914* (London, 1989), *Age of Extremes: The Short Twentieth Century, 1914-1991* (London, 1994), and *Nations and Nationalism since 1780* (Cambridge, 1992); D Lieven, *Empire* (London, 2000); N Stone, *Europe Transformed 1878-1919* (Oxford, 1999); J Zielonka, *Europe as Empire: The Nature of the Enlarged European Union* (Oxford, 2007).

Assessment: Exam (75%, duration: 2 hours) in the spring exam period.

Essay (25%, 2500 words) in the ST.

GV4C8 Half Unit Game Theory for Political Science

This information is for the 2024/25 session.

Teacher responsible: Prof Rafael Hortalá-Vallve

Availability: This course is compulsory on the MSc in Political Science (Political Science and Political Economy). This course is available on the MSc in Political Science (Political Behaviour), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit. Students enrolled on the Political Science and Political Economy stream of the MSc in Political Science will be granted priority access as this is a compulsory course on the programme. Other postgraduates wanting to take the course (space permitting) require the permission of the teacher/s responsible.

Course content: Game theory provides a scientific approach to the study of social interactions which focusses on the strategic aspects of decision-making between two or more individuals or groups. This course will cover the basic elements of game theory and how they have been applied in the area of political science and political economy. The aim of the course is to provide a deeper understanding of game theoretic tools and to help you understand how these ideas have been developed and applied in the political science literature. The course will be divided into looking at static games where all players move simultaneously and the dynamic games where players move in sequence. We will also analyse simple settings where all information is known to all players (complete information) and then move to more complex settings where some information is not known to all players (incomplete information).

Teaching: This course provides a combination of seminars and lectures totalling 40 hours in the Autumn Term and 2 hours in the Spring Term. There will be a reading week in Week 6 of the AT.

Formative coursework: Weekly problem sets to be completed and discussed in class and a two hour mock exam in week 11 of AT.

Indicative reading: The core text for the course is M J Osborne, *An Introduction to Game Theory*, Oxford University Press 2004.

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Problem sets (50%) in the WT Week 1.

GV4C9 Half Unit Not available in 2024/25 Globalization and Democratization in Southeast Asia

This information is for the 2024/25 session.

Teacher responsible: Prof John Sidel

Availability: This course is available on the MSc in Development

Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics) and MSc in Social Anthropology (Religion in the Contemporary World). This course is not available as an outside option.

This course is capped at 1 group.

Course content: This course focuses on the diverse processes of globalization and democratization observed in Southeast Asia over the past few decades. Special attention is paid to democracy in Indonesia and the Philippines, regression from democracy to military rule in Thailand and Myanmar, and 'creeping pluralism' and 'creeping constitutionalism' in Vietnam. The course examines important trends and developments accompanying globalization and democratization in the region - in government-business relations, in local politics, in civil society, in religious practices, in inter-communal relations, and in the organization and use of violence in politics. Throughout the course, the countries examined are treated as cases suitable for analysis and comparison in the light of the broader Comparative Politics and Global Politics literatures on globalization and democratization.

The course begins by situating globalization and democratization in Southeast Asia against a comparative historical and sociological backdrop, paying close attention to the variegated patterns of class, state, and religious formation in the region. The course compares patterns of globalization and democratization across the Philippines, Thailand, Indonesia, Myanmar, and Vietnam. Lectures, readings, and seminar discussions then turn to key trends accompanying globalization and democratization in Southeast Asia. The trends examined include populist challenges to established power structures; campaigns against 'corruption' and in support of 'the rule of law' and 'good governance'; social movements and struggles for popular empowerment; the democratization of religious practices and institutions; religious violence, and separatist mobilization. These trends are treated through comparative analysis of different cases within Southeast Asia and in the light of relevant theoretical literatures drawn from Comparative Politics and Global Politics.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours in the Michaelmas Term.

There will be a reading week in Week 6 of the MT.

Formative coursework: One non-assessed 1500-word essay.

Indicative reading: Teri L. Caraway and Michele Ford, *Labor and Politics in Indonesia* (Cambridge: Cambridge University Press, 2020); Nicole Curato (ed.), *A Duterte Reader: Critical Essays on Rodrigo Duterte's Early Presidency* (Ithaca, NY: Cornell University Southeast Asia Program, 2017); Renaud Egreteau, *Caretaking Democratization: The Military and Political Change in Myanmar* (Oxford: Oxford University Press, 2016); Federico Ferrara, *The Political Development of Modern Thailand* (Cambridge: Cambridge University Press, 2015); Michele Ford and Thomas B. Pepinsky (eds.), *Beyond Oligarchy: Wealth, Power, and Contemporary Indonesian Politics* (Ithaca, NY: Cornell University Southeast Asia Program 2014); Benedict J. Tria Kervliet, *Speaking Out in Vietnam: Public Political Criticism in a Communist Party-Ruled Nation* (Ithaca, NY: Cornell University Press, 2019); Wataru Kusaka, *Moral Politics in the Philippines: Inequality, Democracy, and the Urban Poor* (Singapore: NUS Press, 2017); Michael J. Montesano, Terence Chong, and Mark Heng (eds.), *After the Coup: The National Council for Peace and Order Era and the Future of Thailand* (Singapore: Institute of Southeast Asian Studies, 2018); Thomas Power and Eve Warburton (eds.), *Democracy in Indonesia: From Stagnation to Regression?* (Singapore: Institute of Southeast Asian Studies, 2020); Francis Wade, *Myanmar's Enemy Within: Buddhist Violence and the Making of a Muslim 'Other'* (London: Zed Books, 2017).

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Essay (50%, 3000 words) in the AT.

GV4D3 Half Unit**Local Power in an Era of Globalization, Democratization, and Decentralization****This information is for the 2024/25 session.****Teacher responsible:** Prof John Sidel**Availability:** This course is available on the MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Political Science (Global Politics). This course is not available as an outside option.

This course has limited availability, and it is necessary for students (regardless of MSc programme) to obtain permission from the teacher responsible. The course is capped at 1 group.

Course content: Over the course of the past three decades, the inter-related processes of globalization, democratization, and decentralization are said to have generated new social forces and political freedoms in localities around the world. Market reforms and village elections in China, the end of Communist Party rule in Russia and Eastern Europe, and trends of (re)democratization in Asia, Africa, and Latin America have all offered new opportunities for local people to effect change in local politics around the world. Yet academic, journalistic, and policy accounts have highlighted the rise and resilience of "local despotisms" – "authoritarian enclaves," "bosses," "caciques," "chiefs," "clans," "local strongmen," "mafias," "warlords" – in the midst of this reworking of market, electoral, and administrative circuitries. This course focuses on this phenomenon of what scholars have come to call "subnational authoritarianism", and competing explanations for its emergence and entrenchment, the diversity of its manifestations, and various challenges mounted against its perpetuation.

The goals of the course are twofold. First, the course offers a critical examination of competing accounts of and explanations for the phenomenon of "subnational authoritarianism" in the developing world. Second, the course helps students to think more carefully, critically, and creatively about local politics more broadly, and to do so with an eye towards the comparative analysis of local power structures rooted in local economies and societies. The course begins with an examination of an emerging new political-science literature on "subnational authoritarianism" and a more established body of scholarship on clientelism and machine politics. The course then turns to case studies in diverse settings, ranging from southern Italy to China, India, Indonesia, Nigeria, and Russia, and extending to cases of "warlordism" in contexts such as contemporary Afghanistan, Iraq, Libya, and Somalia.

The readings allow students to examine and evaluate competing explanations for the rise and entrenchment of local bosses, chiefs, clans, and mafias, diverging descriptions of their modes of domination, and alternative accounts of their disappearance, evolution, or transformation in the face of economic, social, and political change. Successive weeks also explore the links between constellations in local politics on the one hand, and patterns of economic development, ethnic conflict, and religious mobilization on the other. The final weeks of the course shift attention to the efforts to challenge entrenched local power structures and to create "countervailing power" through popular mobilization, political participation, and social empowerment in localities in diverse settings across the world.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 23 and a half hours in the Winter Term.

There will be a reading week in Week 6 of the WT.

Formative coursework: One non-assessed 1,500-word essay.**Indicative reading:** Jacqueline Behrend and Laurence Whitehead (eds.), *Illiberal Practices: Territorial Variance within Large Federal Democracies* (Baltimore, MD: Johns Hopkins University Press, 2016); Ward Berenschot, *Riot Politics: Hindu-Muslim Violence and the Indian State* (London: C. Hurst, 2012); Judith Chubb, *Patronage, Power, and Poverty in Southern Italy: A Tale of Two Cities* (Cambridge: Cambridge University Press, 1982); Edward L. Gibson, *Boundary Control: Subnational Authoritarianism in Federal Democracies* (Cambridge: Cambridge University Press, 2013); Ben Hillman, *Patronage and Power: Local State Networks and Party-**State Resilience in Rural China* (Stanford, CA: Stanford University Press, 2014); Kimberly Marten, *Warlords: Strong-Arm Brokers in Weak States* (Ithaca, NY: Cornell University Press, 2012); Wolfram Lacher, *Libya's Fragmentation: Structure and Process in Violent Conflict* (London: I.B. Tauris, 2020); Kelly McMann, *Economic Autonomy and Democracy: Hybrid Regimes in Russia and Kyrgyzstan* (Cambridge: Cambridge University Press, 2006); Gulnaz Sharafutdinova, *Political Consequences of Crony Capitalism inside Russia* (Notre Dame: Notre Dame University Press, 2010); Jane C. Schneider and Peter T. Schneider, *Reversible Destiny: Mafia, Antimafia, and the Struggle for Palermo* (Berkeley: University of California Press, 2003).**Assessment:** Exam (50%, duration: 2 hours) in the spring exam period.

Essay (50%, 3000 words).

GV4D7 Half Unit**Dilemmas of Equality****This information is for the 2024/25 session.****Teacher responsible:** Dr Sarah Goff**Availability:** This course is available on the MSc in Gender, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically high. Priority is given to students in the MSc Political Theory programme, and students from outside this programme may not get a place.

This course is capped at 2 groups.

Course content: The course starts with the general questions of why equality matters and what is to be equalized. It then introduces some of the major debates in the contemporary egalitarian literature: equality of opportunity versus equality of outcome; luck egalitarianism versus relational equality; and equality versus sufficiency. Throughout the course, and particularly in the latter half, we consider concrete social problems and dilemmas faced by those who are committed to the ideal of equality. Topics covered this year include discrimination and policies that aim to reduce inequalities between social groups.**Teaching:** This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours in the Autumn Term.

There will be a reading week in Week 6 of the AT for private study and assessment preparation.

Formative coursework: Students will submit a short formative essay (up to 1500 words) and will be given feedback on this before submitting their assessed coursework.**Indicative reading:** Samantha Brennan, 'Feminist Ethics and Everyday Inequalities' *Hypatia* 24, 2009; Derek Parfit, 'Equality and Priority' *Ratio* 10, 1997; Ronald Dworkin, *Sovereign Virtue: The Theory and Practice of Equality* (Harvard University Press, 2000); Amartya Sen, *Development as Freedom* (Oxford University Press, 1999); Elizabeth Anderson, 'What is the Point of Equality?' *Ethics* 109, 1999; Harry Frankfurt, 'The Moral Irrelevance of Equality' *Public Affairs Quarterly* (2000); and Deborah Hellman, *When is Discrimination Wrong?* (Harvard University Press, 2011).**Assessment:** Essay (100%, 4500 words).

GV4E1 Half Unit Not available in 2024/25 Comparative Democratization in a Global Age

This information is for the 2024/25 session.

Teacher responsible: Dr William Kissane

Availability: This course is available on the MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Political Science (Global Politics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: To introduce students to the fundamental political science debates about the phenomenon of democratization, to explore the explanatory strength of key paradigms, and to compare distinct modes of democratization. Specific topics are: Definitions of democratization and democratic consolidation; waves of democratization; capitalist development and democratization; elite transitions; post-civil war democracy; hybrid regimes; democratic backsliding; the current crisis of democracy and the existence of civil strife in the United States. Cases range from year to year but currently include China, Hungary, the United States, Spain, Turkey and Mozambique.

Teaching: This course provides a combination of seminars and lectures totalling a minimum of 30 hours in the Autumn Term. There will be a reading week in Week 6 of the AT for private study and assessment preparation.

Formative coursework: All students are expected to submit one non-assessed essay of 1500 words.

Indicative reading: D Potter et al, *Democratization*; J. Grugel, *Democratization*; Rueschmeyer, Stephens and Stephens, *Capitalist Development and Democracy*; J Linz and A S Stepan, *Problems of Democratic Transition and Consolidation*.

Assessment: Essay (100%, 3000 words) in the WT.

GV4E2 Half Unit Capitalism and Democracy

This information is for the 2024/25 session.

Teacher responsible: Dr David Woodruff

Availability: This course is available on the MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Political Science (Political Science and Political Economy) and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

Available as an outside option for students on other programmes with the teacher's consent. This course is capped. In 2023/2024, all Department of Government students who wished to take the course were able to do so.

Course content: Compatibility and incompatibility of capitalism and democracy; Constitutional restraints on economic policymaking in central banking and property rights; Democracy and economic crisis; Democracy and economic inequality. This course examines the uneasy interaction between the two dominant concepts underpinning political and economic institutions in advanced industrial societies. It addresses questions about the relationship of capitalism to democracy, both conceptually and empirically. We consider whether democracy undermines or supports capitalism, focusing on policies relating to central banking, redistribution, and property rights, as well as how inequality affects elections and policymaking. We also examine how capitalism may undermine or sustain democracy and what circumstances heighten the tension between democracy and capitalism.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours in the Winter Term.

There will be a reading week in Week 6 of the WT.

Formative coursework: All students are expected to submit one non-assessed essay.

Indicative reading: Schumpeter, *Capitalism, Socialism, and Democracy*. Holmes, 'Precommitment and the Paradox of

Democracy'. Mill, *Considerations on Representative Government*. Lohmann, 'An Information Rationale for the Power of Special Interests'. McNamara, 'Rational Fictions: Central Bank Independence and the Social Logic of Delegation'. Beard, *An Economic Interpretation of the Constitution of the United States*. Kenworthy and Pontusson, 'Rising Inequality and the Politics of Redistribution in Affluent Countries'. Ferguson, 'Deduced and Abandoned: Rational Expectations, the Investment Theory of Political Parties, and the Myth of the Median Voter'. Hopkin and Blyth, 'The Global Economics of European Populism: Growth Regimes and Party System Change in Europe'.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

GV4E3 Half Unit Not available in 2024/25 Conflict and State-Building in Eastern Europe and Eurasia

This information is for the 2024/25 session.

Teacher responsible: Prof James Hughes

Availability: This course is available on the MSc in Political Science (Conflict Studies and Comparative Politics). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. The course is available with permission as an outside option subject to space (and where regulations permit).

Course content: This course analyses a range of conflict cases in Eastern Europe and Eurasia and provides a theoretically informed assessment and critique of the current debates on the concepts of state-building, self-determination, and secession in these regions. It seeks to explain why some state-building projects and claims to self-determination and secession have succeeded while others are failing or have failed to achieve international recognition, or are otherwise seen as problematical cases. The concepts lie at the intersection of politics and international law, and the focus in this course is on the politics and policies. The first two weeks deal with the conceptual debates and theories and practices in state-building, self-determination, and secession, examining the collapse of the Soviet Union and Yugoslavia as communist federations, and the associated violent conflicts that followed the collapse. The collapse is located in the Cold War context, and the impact of internal and external ideas about democracy and nationalism on the collapse is explored. The rest of the course examines how the collapse has continued to reverberate across the regions. We use weekly case studies drawn from the former Soviet space and former Yugoslavia. The cases include wars and violent conflicts over self-determination and secession, the management of multiethnicity in state-building, and the role of international institutions and external intervention in managing state-building, self-determination and secession. The cases considered include many of the so-called "frozen conflicts" and several of the wars in the region: Kosovo, Bosnia-Herzegovina, Chechnya, Ukraine/ Crimea/Donbas, Georgia/Abkhazia, Nagorno-Karabagh, Estonia and Latvia. As an LSE Moodle course, almost all of the weekly readings are available online.

Teaching: This course provides a combination of seminars and lectures totalling a minimum of 30 hours per group in the Winter Term. There will be a reading week in WT Week 6.

Formative coursework: One essay of 1,500 words, to be on a topic that differs from the summative essay. Students must also contribute to a team presentation.

Indicative reading: Hurst Hannum, *Autonomy, Sovereignty, and Self-Determination: The Accommodation of Conflicting Rights*. Rev. ed. University of Pennsylvania Press, 1996; Jörg Fisch, *The Right of Self-Determination of Peoples: The Domestication of an Illusion*. Cambridge University Press, 2015; Fernando R. Teson, *The Theory of Self-Determination*. Cambridge University Press, 2017; Philip G. Roeder and Donald Rothchild eds, *Sustainable Peace. Power and Democracy after Civil Wars*, Cornell University Press, 2005;

Timothy D. Sisk, *Statebuilding: Consolidating Peace after Civil War*. Polity, 2013; Roland Paris, and Timothy D. Sisk, *The Dilemmas of Statebuilding: Confronting the Contradictions of Postwar Peace Operations*. Routledge, 2009; James Hughes, *Chechnya. From Nationalism to Jihad*, University of Pennsylvania Press, 2007; James Hughes & Gwendolyn Sasse (Eds), *Ethnicity and Territory in the Former Soviet Union*, Routledge, 2001; Christoph Zurcher, *The Post-Soviet Wars: Rebellion, Ethnic Conflict, and Nationhood in the Caucasus*, New York University Press, 2007; David Chandler, *Empire in Denial. The Politics of State-Building*, Pluto, 2006; Roberto Belloni, *State building and international intervention in Bosnia*, Routledge, 2007; Marc Weller, *Contested Statehood: Kosovo's Struggle for Independence*. Oxford University Press, 2009; Marc Weller, *Settling Self-Determination Disputes: Complex Power-Sharing in Theory and Practice*. Nijhoff, 2008; Gwendolyn Sasse, *The Crimea Question. Identity, Transition and Conflict*, Harvard University Press, 2007.

Assessment: Essay (100%, 5000 words) to be submitted early in the Spring Term.

GV4E8 Half Unit Power Sharing and Institutional Design in Divided Societies

This information is for the 2024/25 session.

Teacher responsible: Dr Paul Mitchell

Availability: This course is available on the MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Political Science (Political Behaviour), MSc in Political Science (Political Science and Political Economy) and MSc in Public Policy and Administration. This course is not available as an outside option.

Priority will be given to students on the MSc in Political Science (Conflict Studies and Comparative Politics). This course is capped at 2 groups.

Course content: The resolution of serious ethnic and national conflicts almost inevitably involves some form of power sharing and/or power division (autonomy and federation). While power sharing is often invoked in normative and comparative accounts of conflict resolution, it is less frequently systematically examined. Conflict and Institutional Design (CID) is a comparative analysis of the making, maintenance and too often breaking of power sharing agreements. We begin with the problems of political violence and civil wars. Civil wars end but often restart. When and how are peace agreements negotiated? What type of power-sharing and federal designs are available? Under what conditions is power sharing likely to help contain conflict, and when does it fail? The course will pay particular attention to what happens after a power-sharing agreement is reached. The institutional focus will include peace agreements and the making of new constitutions. We will analyse electoral system design for divided societies, the 'timing' of first elections, the dynamics of electoral and party competition within ethnic segmentation. The final section of the course looks at power-sharing designs for divided societies: consociational governance (power-sharing constitutions, executives, legislatures); and at territorial approaches to conflict regulation (partition, federalism, ethno-federalism and regional autonomy). Finally – Why do some power-sharing regimes succeed while others fail?

Teaching: This course is delivered through a combination of seminars (10 x 1.5 hours) and lectures (10 x 2 hours) totalling a minimum of 35 hours in Winter Term. There will be a reading week in Week 6 of the WT.

Formative coursework: Briefing papers on pre-selected key concepts/cases.

Indicative reading: Wallensteen, Peter (2023). *Understanding Conflict Resolution*. London: Sage.
Lijphart, Arend (2008). *Thinking about Democracy: Power Sharing and Majority Rule in Theory and Practice*. London: Routledge. [the collected writings of Lijphart].
Cederman, Lars-Erik, Simon Hug and Julian Wucherpfennig (2022).

Sharing Power, Securing Peace? Ethnic Inclusion and Civil War. Cambridge University Press.

Casperson, Nina (2017). *Peace Agreements*. London: Polity.

Cederman, Lars-Erik et al. (2013) *Inequality, Grievances and Civil War*. Cambridge: Cambridge UP.

McCulloch, Alison and John McGarry (2017, eds) *Power-Sharing: Empirical and Normative Challenges*. London: Routledge.

Noel, Sid (2005, ed), *From Power Sharing to Democracy*. Montreal: McGill-Queen's University Press.

Norris, Pippa (2008). *Driving Democracy: Do Power-Sharing Institutions Work?* Cambridge University Press.

Assessment: Essay (100%, 5000 words) in the ST.

The research essay will be on a topic of your choice. Having said that the topic will be discussed between each of you and myself and I must approve the topic. The research paper should ideally examine a research question using relevant concepts and theories, and must have an empirical dimension that is relevant to the themes of the course. 'Empirical' is understood in the broadest sense: your material could be a case study set in an appropriate theoretical framework, it could examine a theme with comparative case studies, it could be quantitative or qualitative. Whatever is deemed appropriate to the research question at hand. Bear in mind though that broad surveys are generally not a good idea. After all 5000 words is about half the standard size of a journal article. Much more advice about the essay will be given as the course progresses both collectively and in individual meetings with each of you. Since you will be working on something that really interests you I hope that this will be an enjoyable experience.

GV4E9 Approaches and Issues in Public Policy and Administration

This information is for the 2024/25 session.

Teacher responsible: Prof Dan Berliner

Availability: This course is compulsory on the MSc in Public Policy and Administration. This course is not available as an outside option.

Course content: The course is designed to introduce MSc students to major issues in understanding public administration and policy. Students will be divided into two to four classes, depending on the number of students taking the course. 18 of the lectures will reflect the topics to be covered in the weekly classes (18 plus 1 revision class) addressing key themes in Public Policy and Public Administration. Some of the lectures may be given by other colleagues teaching on the MSc degree as well as by outside speakers. 2 lectures and classes will cover dissertation writing (for GV499) in the field of public policy and administration.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 50 hours across the Autumn, Winter and Spring Terms. This course includes reading weeks in Week 6 of both the AT and WT terms.

Formative coursework: Two formative essays, one in the Autumn Term and one in the Winter Term.

Indicative reading: Arjen Boin and Martin Lodge (2024) *The Politics of Policymaking*; Christoph Knill and Jale Tosun (2020) *Public Policy*; Paul Cairney (2019) *Understanding Public Policy*; Merilee Grindle (2012) *Jobs for the Boys*; B Guy Peters (2018) *Politics of Bureaucracy* (7th edn); David L Weimer and Aidan R Vining (2016) *Policy analysis: Concepts and practice*; Steve Balla, Martin Lodge and Edward C Page (eds) (2015) *Oxford Handbook on the Classics of Public Policy*.

Assessment: Exam (75%, duration: 3 hours) in the spring exam period.

Essay (25%, 3000 words) in the WT.

GV4F2 Half Unit

Popular Politics in the Middle East

This information is for the 2024/25 session.

Teacher responsible: Prof John Chalcraft

Availability: This course is available on the MSc in Gender (Rights and Human Rights), MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Political Science (Global Politics). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped.

Course content: The course explores the role of popular politics in the making of the contemporary Middle East and North Africa. The primary focus is on the Arab world but reference is also made to Iran, Israel and Turkey. We study the origins, course and consequences of popular protest, social and political movements, uprisings and revolutions in the region. We ask how a wide variety of subaltern social groups have challenged subordination and brought about new social relations. Our cases are drawn from the early twentieth century to the present. Common topics include the Iranian revolution of 1979, everyday forms of resistance, the first intifada in the Occupied Palestinian Territories (1987-1991), social justice and labour movements, Islamic activism, the Arab uprisings of 2011 and the Rojava Revolution. The course draws on critical, historically-minded and Gramscian approaches, aims to grasp the role of active subjectivity and leadership in context, and evaluates the ways in which a wide variety of movements have aimed to bring about change, and how they have succeeded and/or failed to do so.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours in Autumn Term. Week 6 of the AT is a reading week.

Formative coursework: In order to develop essay skills and obtain feedback outside of formal assessment, students will complete a 2,000 word formative essay on which they will receive feedback as to overall standard, argument, evidence, structure and style. Students will choose one essay from a list of titles. To prepare for the 5,000 word essay, students will submit for approval a proposed title and a two-page handout summarising the question or puzzle that their essay will address. A seminar will also be held as a workshop to assist students prior to the final submission of their 5,000 word essay.

Indicative reading: Abrahamian, Ervand. *Iran between Two Revolutions* (Princeton University Press, 1982); Achcar, Gilbert. *The People Want*. (Saqi Books 2012); Bayat, Asef. *Street Politics: Poor People's Movements in Iran* (Columbia University Press, 1997); Chalcraft, John. *Popular Politics in the Making of the Modern Middle East* (Cambridge University Press, 2016); Cronin, Stephanie. *Subalterns and Social Protest* (Routledge, 2007); Kurzman, Charles. *The Unthinkable Revolution in Iran* (Harvard University Press, 2004); Swedenburg, Ted. *Memories of Revolt: The 1936-1939 Rebellion and the Palestinian National Past* (Fayetteville: University of Arkansas Press, 2003); Tripp, Charles, *The Power and the People* (Cambridge: CUP, 2013).

Assessment: Essay (100%, 5000 words) in the WT.

GV4F4 Half Unit

Policy Advice in Theory and Practice

This information is for the 2024/25 session.

Teacher responsible: Dr Elise Antoine

Availability: This course is available on the MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 3 groups.

Course content: Many masters graduates in public policy and

administration go on to work in organizations that produce or consume policy advice. With this in mind, this course will look at how policy advice is produced and used. It has three objectives: to introduce students to a range of theoretical and empirical scholarship on the issues involved in producing and using policy advice; to develop practical policy analysis and communication skills required of policy advisors; and to expose students to practitioners who produce and use policy advice. Students will develop their policy analysis and communication skills by critically analysing the theoretical scholarship on policy advice, the science-policy link, and research impact. Moreover, we will apply this analysis to real-world cases during the seminars, in group presentations and exercises, and in the formative and assessed coursework.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 35 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: One group presentation and a mock examination.

Indicative reading: Bardach, Eugene (2009) *A Practical Guide for Policy Analysis*, Third Edition. Washington, DC: CQ Press.

Stone, D.A., (2002). *Policy Paradox: The Art of Political Decision Making*, New York: Norton.

Scott, C. and Baehler, K. (2010) *Adding Value to Policy Analysis and Advice*, Sydney: University of New South Wales Press.

Weimer, David L. and Vining, Aidan R. (2005) *Policy Analysis: Concepts and Practice*, Fourth Edition. Upper Saddle River, NJ: Pearson.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Project (50%, 2500 words).

GV4F5 Half Unit

Advanced Study of Key Political Thinkers

This information is for the 2024/25 session.

Teacher responsible: Prof Lea Ypi

Availability: This course is available on the MA in Modern History and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit. This course is capped at 1 group.

Pre-requisites: An advanced undergraduate course in the History of Political Thought or Political Philosophy, or following consultation with the course teacher.

Course content: This course provides an opportunity to study the works of Machiavelli in-depth. It will focus on themes in his political theory: human nature, morality and politics, the role of the prince, the analysis of virtue and gloria, the conception of the state and the idea of Machiavellian democracy. We will situate Machiavelli's arguments in their political and theoretical context, as well as exploring both how subsequent theorists understood and employed his ideas, and the major contemporary critical debates in Machiavelli's scholarship. The seminar will therefore blend intellectual history and political theory.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours in the Autumn Term. There will be a reading week in Week 6 of the AT for private study and assessment preparation.

Formative coursework: Students will be encouraged to submit one formative extended essay plan of no more than 1500 words. This will form the basis of the final summative assessment. The course leader will provide written feedback on this plan, and provide the opportunity for a one-to-one meeting to discuss the plan, but will not provide a numerical grade or classification for it.

Indicative reading: Machiavelli, *The Prince*, ed. Q. Skinner, trans. R. Price (Cambridge, 1988).

Machiavelli, *Discourses on Livy*, ed. J.C. and P. Bondanella (Oxford, 2003) or ed. B. Crick (Penguin, 1970).

John McCormick, *Machiavellian Democracy* (Princeton: Princeton

University Press). Introduction, Ch. 1 and Ch. 3.
 John M. Najemi (ed.) *The Cambridge Companion to Machiavelli* (Cambridge: Cambridge University Press, 2010).
 Skinner, Q., *Visions of Politics, Volume II: Renaissance Virtues* (Cambridge: Cambridge University Press, 2002). Ch. 6 and 7.
Assessment: Essay (80%, 4000 words) and continuous assessment (20%).

GV4F8 Half Unit Institutions and Global Trade

This information is for the 2024/25 session.

Teacher responsible: Prof Stephanie Rickard

Availability: This course is available on the MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Political Behaviour), MSc in Political Science (Political Science and Political Economy) and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is controlled access and spaces are limited. Priority will be given to students enrolled on MSc programmes in the Department of Government and on the Master of Public Policy.

Course content: This course examines the role interests and institutions play in global trade and countries' trade policies. Theories from both economics and political science are used to understand how formal institutions and economic interests shape trade policies and politics. This course examines domestic political institutions, such as electoral systems, as well as international institutions, such as the World Trade Organization.

Teaching: This course provides a minimum of 30 hours of lectures and seminars in the Winter Term. There will be a reading week in WT Week 6 for private study and assessment preparation.

Formative coursework: Students will be asked to complete weekly writing assignments.

Indicative reading: Osgood, Iain. (2017) "The Breakdown of Industrial Opposition to Trade in World Politics." *World Politics* 69(1): 184-231.

Evans, Carolyn. (2009) "A Protectionist Bias in Majoritarian Politics: An Empirical Investigation." *Economics & Politics* 21(2): 278-307.

Zahrnt, Valentin. "Domestic Constituents and the Formulation of WTO Negotiating Positions: What the Delegates Say." *World Trade Review*. 7.2 (2008): 393-421.

Assessment: Essay (100%, 3500 words) in the ST.

GV4F9 Half Unit The Challenges of Governance in sub-Saharan Africa

This information is for the 2024/25 session.

Teacher responsible: Dr George Ofosu

Availability: This course is available on the MSc in Gender, Peace and Security, MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics) and MSc in Political Science (Political Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at one group.

Course content: This course introduces students to some of the major arguments, hypotheses and debates in the literature on politics in sub-Saharan Africa (SSA). The material will cover the period between the end of the colonial period to the contemporary era. The course will help students develop the skills to be more intelligent consumers of the extant literature on politics in SSA. The primary questions that motivate the course are: (a) to what extent are political outcomes in contemporary Africa a consequence of its history, society, and geography? (b) Why are state structures and institutions weak in Africa compared to most other regions?

(c) Why did (do?) African leaders choose growth-killing policies, (d) What is the role of ethnicity in Africa's economic and political development? (e) (Under what conditions) Are multiparty elections better for good governance in sub-Saharan Africa?

To this end, the course is structured into four parts. In the first part, we take a tour of Africa's recent political history, examining pre-colonial structures, the impact of the slave trade and colonialism on the politics, societies, and economies of post-colonial states. We then consider the social and political forces that shape African countries' forms of government and the structure and capacity of their states. In the third part, we briefly survey the determinants of Africa's economic development, focusing specifically on policy choices, legal systems, natural resources and the ambivalent role of foreign aid. The fourth part is devoted to Africa's democratic experiment focusing on the issues of political parties, election fraud and violence, transparency initiatives, and political representation in Africa.

Political scientists have sought to address these and other research questions using varied methodological approaches. Accordingly, the scholarly literature we will review draws on quantitative, historical, and qualitative methods — though students will not need any prior specialized training to understand the debates and questions raised in them. Also, because many developments in African politics cannot be understood in isolation from African societies or their historical context, this course augments political science research with work by journalists, historians, economists, and anthropologists.

Teaching: This course is delivered through 20 hours of seminars in the Autumn Term. There will be a reading week in Week 6 of the AT for private study and assessment preparation.

Formative coursework: Students will be required to complete one formative essay (1,500 words).

Indicative reading: Rodney, W. (1981). *How Europe underdeveloped Africa*. Washington, D.C., Howard University Press; Hyden, Goran. *African Politics in Comparative Perspective*, Cambridge: Cambridge University Press, 2006; Bratton, M. & Van de Walle N., *Democratic Experiments in Africa*, New York, Cambridge University Press, 1997; Jackson, R. and Rosberg C., *Personal Rule: Theory and Practice in Africa*, *Comparative Politics* 16:4, 1984; Posner D., *Institutions and Ethnic Politics in Africa*, New York: Cambridge University Press, 2005; Clapham C., *Africa and the International System*, New York, Cambridge University Press, 1996; Englebert P., *State Legitimacy and Development in Africa* Boulder: Lynne Rienner, 2000; Rotberg R, and Gisselquist R., *The Index of African Governance*, Cambridge, World Peace Foundation, 2009; Herbst J., *States and Power in Africa: Comparative Lessons in Authority and Control*, Princeton: Princeton University Press, 2000; Bates R., *Markets and States in Tropical Africa*, Berkeley: University of California Press, 1981.

Assessment: Essay (80%, 4000 words) in the WT. Class participation (20%) in the AT.

GV4G1 Half Unit Not available in 2024/25 Applied Quantitative Methods for Public Policy and Political Science

This information is for the 2024/25 session.

Teacher responsible: Prof Valentino Larcinese

Availability: This course is available on the MRes/PhD in Political Science, MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Political Science and Political Economy), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Please note: this course is **available to all MSc and MRes students from the Department of Government**. Students from other departments are also welcome but should request permission from the teacher.

Pre-requisites: A good knowledge of statistics and of the generalized linear model at the level of MY452.

Course content: This course provides an introduction to current empirical research in political science with a focus on methods for causal inference. The weekly meetings consist of a mix of lectures and tutorials. The lectures will present the techniques and illustrate their applications by making extensive use of the most up-to-date empirical literature. The tutorials will give feedback on formative work and will provide an opportunity to learn how to apply the methods with the statistical software Stata. After reviewing the rationale for simple OLS estimation, particularly focussing on the conditions for a causal interpretation of the coefficients, the course will cover instrumental variables, panel data, differences-in-differences, regression discontinuity and several applications to political science. Students will be stimulated to think in experimental terms and the main theme will be how to replicate or get close to the experimental ideal of natural sciences by using non-experimental observational data.

Teaching: This course is delivered through a minimum of 30 hours of lectures and tutorials in the Winter Term. There will be a reading week in Week 6 of Winter Term.

Formative coursework: There will be two pieces of formative work to be submitted to the lecturer.

Indicative reading: Most readings will be journal articles. The main references for the methods will be:

- Thad Dunning: Natural experiments in the social sciences, Cambridge University Press 2012.
- Angrist & Pischke: Mostly Harmless Econometrics, Princeton University Press 2009.
- Stock & Watson: Introduction to Econometrics, Pearson 2007 (Second edition).

Assessment: Exam (40%, duration: 2 hours) in the spring exam period.

Project (60%, 5000 words) in the WT and ST.

The project includes a presentation element.

GV4G7 Half Unit Marx and Marxism

This information is for the 2024/25 session.

Teacher responsible: Prof Lea Ypi

Availability: This course is available on the MA in Modern History and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit. This course is capped at 2 groups.

Course content: This course will try to develop an analysis of what we might call 'moral socialism' by engaging with authors who have developed the links between the thought of Kant and Marx and with one of the lesser known developments of Marxism in the 20th century: the Austro-Marxist school of thought. Together the group of thinkers associated to the Austro-Marxist movement provided one of the most original developments of Marx's theory by trying to combine aspects of Kant's moral philosophy with Karl Marx's critique of society. We will start with introductory sessions on the relationship between Kant and Marx and the historical context of Austro-Marxism. We will then each week explore different themes relevant to Austro-Marxist thought: from Max Adler's analysis of the social a priori to Otto Bauer's discussion of the nationalities problem, from Karl Renner's analysis of legal institutions to Rudolf Hilferding's analysis of finance capital. We will also cover the thought of Friedrich Adler and Otto Neurath and engage with criticisms of their theories by contrasting them with alternative Marxist analyses developed at the same time such as those of Lukacs, Lenin or Rosa Luxemburg. The focus throughout will be on understanding and assessing the Austro-Marxist's complex arguments. The course should be of interest to MSc students taking existing courses on liberalism and justice but also to students in Law, IR, Sociology, and International History.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours in the

Autumn Term. This course includes a reading week in AT Week 6.

Formative coursework: One formative essay of around 2,000 words.

Indicative reading: Bottomore, Tom, and Patrick Goode. Austro-Marxism. Oxford: Clarendon Press, 1978.

Rabinbach, Anson. The Austrian Socialist Experiment: Social Democracy and Austromarxism, 1918-1934. Boulder: Westview Press, 1985.

Blum, Mark E., and Smaldone, William (eds.) Austro-Marxism: The Ideology of Unity. Leiden: Brill, 2016.

Assessment: Essay (100%, 4000 words).

GV4H1 Half Unit Not available in 2024/25 Chinese Political Thought

This information is for the 2024/25 session.

Teacher responsible: Prof Leigh Jenco

Availability: This course is available on the MSc in China in Comparative Perspective and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at one group. **Priority will be given to students enrolled on the MSc in Political Theory.**

Pre-requisites: A specialist background in political theory is strongly recommended.

Course content: This course will introduce students to recurring debates and concepts within Chinese political thought. We focus on the germinal texts of the Warring States period (circa 400 BCE), such as the Analects of Confucius and the Dao De Jing of Laozi. Reading texts in translation, we will critically examine the variety of normative frameworks that have structured political thinking in early China, with a particular focus on the relationship between personal agency and political outcomes. This is NOT a history course; its broader goal is to help students use Chinese thought to think critically and creatively about political and social life in general and not just in "Chinese" contexts. This course is suitable for students interested in political theory, philosophical approaches to politics, Chinese studies, and/or the history of political thought. Readings are entirely in English and NO prior knowledge of Chinese language or history is required.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours in the Michaelmas Term. This course includes a reading week in Week 6 of the MT.

Formative coursework: One formative essay of 1500 words maximum, excluding footnotes and bibliography, on an assigned topic.

Indicative reading: Ivanhoe, Philip J. Readings in Classical Chinese Philosophy. Edited by Philip J. Ivanhoe and Bryan W. Van Norden. 2nd ed. Hackett Pub Co, 2006.

Selections from De Bary, Wm. Theodore, and Richard John Lufrano. Sources of Chinese Tradition. Vol. 2, From 1600 Through The Twentieth Century. New York: Columbia University Press, 2000.

Assessment: Essay (80%, 3000 words) in the WT.

Class participation (20%) in the AT.

The class participation element will be assessed via one group project and quality of contribution to seminar discussion.

GV4H3 Half Unit Feminist Political Theory

This information is for the 2024/25 session.

Teacher responsible: Dr Sarah Goff

Availability: This course is available on the MPhil/PhD in Gender, MSc in Gender, MSc in Gender (Research), MSc in Gender (Rights and Human Rights), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities and MSc in Political Theory.

This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case. Priority is given to students in the MSc Political Theory programme.

Course content: This course covers some of the central debates in contemporary feminist political theory, with a particular emphasis on the legacy and usefulness of liberalism. The course focuses on debates and differences within feminist political theory, rather than justifications for, or defences of, feminist political theory. Among the problems raised are conceptions of the individual and individual autonomy; the relative invisibility of gender issues in mainstream literature on justice and equality; the tendency to conceive of equality in sex-blind terms; the tendency to presume a universally applicable set of norms. We consider the theoretical debates in relation to a number of contemporary political issues. Topics likely to be addressed include: feminism and contract, individualism and autonomy, equality and the politics of difference, marriage and feminist perspectives on trans issues.

Teaching: This course provides a combination of seminars and lectures totalling 20 hours in the Winter Term. There will be a reading week in WT Week 6.

Formative coursework: Students will submit a short formative essay (up to 1500 words) and will be given feedback on this before submitting their assessed coursework.

Indicative reading: Simone de Beauvoir (1949) *The Second Sex*; Susan Moller Okin 'Forty Acres and a Mule for Women' *Politics, Philosophy & Economics* (2005); Carole Pateman (1988) *The Sexual Contract*; Iris M Young (1990) *Justice and the Politics of Difference*; Anne Phillips (1995) *The Politics of Presence*; Clare Chambers (2017) *Against Marriage: An Egalitarian Defence of the Marriage-Free State*; Serene Khader (2018) *Decolonizing Universalism: Towards a Transnational Feminist Ethic*; Talia Mae Bettcher 'Evil deceivers and make-believers: Transphobic violence and the politics of illusion' *Hypatia* (2007).

Assessment: Essay (100%, 4000 words).

GV4H4 Half Unit Foundations of Political Theory

This information is for the 2024/25 session.

Teacher responsible: Professor Kai Spiekermann

Availability: This course is compulsory on the MSc in Political Theory. This course is not available as an outside option.

Course content: This course provides an introduction to the philosophical and methodological foundations of political theory. It aims to give participants a conceptual toolbox that can be brought to bear on many different substantive problems and research questions in political theory and neighbouring fields. The course introduces some central methodological debates in contemporary political theory, explores the links between political theory and related disciplines, and familiarises students with different approaches to political theorising.

Teaching: This course provides a combination of lectures, seminars, and other activities totalling 25 hours in the Autumn Term.

There will be a reading week in AT Week 6.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: David Leopold and Marc Stears (eds.) (2008) *Political Theory: Methods and Approaches* (Oxford: Oxford University Press); Adrian Blau (ed.) (2017) *Methods in Analytical Political Theory* (Cambridge: Cambridge University Press); John S. Dryzek, Bonnie Honig and Anne Phillips (eds.) (2008) *The Oxford Handbook of Political Theory* (Oxford: Oxford University Press); Robert E. Goodin and Philip Pettit (eds.) (1993) *A Companion to Contemporary Political Philosophy* (Oxford: Blackwell); Keith Dowding (2015) *The Philosophy and Methods of Political Science*

(London: Palgrave).

Assessment: Essay (100%, 3000 words) in the WT.

GV4H5 Half Unit The Political Philosophy of Environmental Change

This information is for the 2024/25 session.

Teacher responsible: Prof Kai Spiekermann

Availability: This course is available on the MSc in Environment and Development, MSc in Environmental Policy and Regulation and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and priority is given to students on the MSc Political Theory. In previous years we have been able to provide places for most applicants, but that may not continue to be the case.

Pre-requisites: Some prior training in political theory, ethics, or related fields is recommended.

Course content: This course considers the problem of climate change from a political-philosophical perspective, drawing primarily on contemporary analytical political philosophy, political theory, and environmental ethics, but with cross-disciplinary input from the natural and social sciences. Some key questions will be abstract and theoretical, including: What kind of problem is climate change? How do we value nature? How ought we to distribute the costs of climate? How are the injustices of climate change related to other historical injustice? What do we owe future generations? At the same time, the course also challenges us to think about the application of theories from philosophy and the social sciences, leading to questions like: How can we improve the knowledge about climate change? How do we motivate citizens and states to reduce emissions? How do we decide what to preserve for future generations? Is civil or uncivil disobedience a promising route to bring about social change? Which democratic institutions might support effective climate policies?

Teaching: This course is delivered through a combination of lectures and seminars totalling 30 hours in the Winter Term. There will be a reading week in WT Week 6.

Formative coursework: Students will submit a short formative essay (up to 1500 words) and will be given feedback on this before submitting their assessed coursework.

Indicative reading: John Broome (2012) *Climate Matters: Ethics in a Warming World*, New York (W.W. Norton); Stephen Gardiner, Simon Caney, Dale Jamieson and Henry Shue, eds. (2010) *Climate Ethics: Essential Readings*, Oxford (Oxford University Press); Denis G. Arnold, ed. (2011) *The ethics of global climate change*, Cambridge (Cambridge University Press); Stephen M. Gardiner (2011) *A Perfect Moral Storm: The Ethical Tragedy of Climate Change*, Oxford (OUP); Jeremy Moss, ed. (2015). *Climate Change and Justice*, Cambridge: Cambridge University Press; Simon Caney (2020). "Climate Justice", in: *Stanford Encyclopedia of Philosophy*, Ed. Edward N. Zalta. Available at: <https://plato.stanford.edu/entries/justice-climate/>; Intergovernmental Panel on Climate Change (2021-2) *Sixth Assessment Report*, Available at www.ipcc.ch.

Assessment: Essay (100%, 4000 words).

GV4H6 Half Unit Behavioural Political Economy

This information is for the 2024/25 session.

Teacher responsible: Prof Rafael Hortalá-Vallve

Availability: This course is available on the MSc in Political Science (Political Behaviour) and MSc in Political Science (Political Science

and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: It is required that students have some familiarity with formal models (game theory) and basic statistical concepts.

Course content: In this course we will introduce behavioural concepts and use them in explaining decisions of politicians, candidates for political office, voters, lobbyists, and other actors in the political and policymaking arena. The focus of the course will be academic but we will also visit the recent development by public policy practitioners – both the UK and the US have behavioural insights teams working closely with the executive branch.

We will analyse different political phenomena that do not perfectly fit our rational choice models. We will cover issues such as turnout in large elections, populist policies, framing of public policies to influence public opinion, attribution of blame to politicians, opt-in/opt-out policies and paternalism in policy recommendations, etc. By introducing insights from psychology to our classical political economy models we will study the effects of social, cognitive, and emotional factors on political decisions. Parallel to this formal analysis we will also introduce experimental methods.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 24 hours in the Winter Term. There will be a reading week in WT Week 6.

Formative coursework: A presentation on the topic of your summative essay to be delivered in an extra session in WT Week 9.

Indicative reading: Berggren, N (2012), "Time for behavioural political economy? An analysis of articles in behavioural economics", *Review of Austrian Economics*
De Rooij, E (2009), "Field Experiments on Political Behavior and Collective Action", *Annual Review of Political Science*
Druckman, J (2006), "The growth and Development of Experimental Research in Political Science", *American Political Science Review*

Druckman, J, D Green, J Kuklinski, and A Lupia (2011), *Cambridge handbook of Experimental Political Science*, Cambridge University Press

Kagel, J and A Roth (1995), *Handbook of Experimental Economics*, Princeton University Press

McDermot, R (2002), "Experimental Methods in Political Science", *Annual Review of Political Science*

Morton, R and K Williams (2010), *Experimental Political Science and the study of causality: from nature to the lab*, Cambridge University Press

Palfrey, T (2009), "Laboratory experiments in Political Economy", *Annual Review of Political Science*

Thaler, RH and CR Sunstein (2009), *Nudge: improving decisions about health, wealth and happiness*, Yale University Press

Wilson, R (2011), "The contribution of behavioural economics to political science", *Annual Review of Political Science*

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (50%, 3000 words) in the ST.

Each student is required to submit an essay (3000 words including footnotes and appendix) in Week 1 of Spring Term composed of two parts: the analysis of a behavioural aspect in a political economy situation and a novel experimental design proposal related to it. This essay will count for 50% of the final mark. The remaining 50% will be assessed by means of an exam.

GV4J4 Half Unit

Citizen Representation and Democracy in the European Union

This information is for the 2024/25 session.

Teacher responsible: Prof Sara Hobolt

Availability: This course is available on the MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in

European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Economy of Europe, MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Political Science (Political Behaviour) and MSc in The Global Political Economy of China and Europe (LSE and Fudan). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 1 group.

Course content: This course studies representation, public opinion and party politics in the European Union. The aim of the course is to develop a better understanding of the functioning of democracy in the European Union and provide the analytical tools to evaluate and develop proposals for strengthening democracy. This course will examine both how citizens are represented in the European Union and how the EU shapes democratic politics in member states. The first part of the course assesses pathways of representation and accountability in the European Union, focusing on representation of citizens' interests in the Council, Commission and the European Parliament as well other avenues for citizen influence, such as referendums and the Citizens' Initiative. The second part of the course examines how national politics shapes, and is shaped by, European integration, examining party fragmentation, Euroscepticism, populism and democratic backsliding. The final part of the course evaluates different proposals for reform with the aim of strengthening democracy and representation in the EU, and students will have the opportunity to develop their own reform proposal.

Teaching: 20 hours of seminars in the Autumn Term and 2 hours of seminars in the Spring Term.

Each seminar will be a mix of lectures, group work and student presentations, ending with a conference on the future of Europe. This course includes a reading week in Week 6 of AT.

Formative coursework: One formative essay (1,500 words)

Indicative reading:

- C De Vries (2018) *Euroscepticism and the Future of European Integration* (Oxford University Press);
- C De Vries, D Hobolt, S-O Proksch and J Slapin (2021) *Foundations of European Politics* (Oxford University Press);
- S Hix, A Noury and G Roland (2007) *Democratic Politics in the European Parliament* (Cambridge University Press);
- G Marks and M Steenbergen, (2004) *European Integration and Political Conflict* (Cambridge University Press);
- F Scharpf (1999) *Governing in Europe: Effective and Democratic?* (Oxford University Press).

Assessment: Exam (75%, duration: 2 hours) in the spring exam period.

Essay (25%, 2500 words) in the WT.

GV4J6 Half Unit

Game Theory for Research

This information is for the 2024/25 session.

Teacher responsible: Prof Torun Dewan

Availability: This course is available on the MRes/PhD in Political Science and MSc in Political Science (Political Science and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Knowledge of game theory at the level of GV4C8 is required.

Course content: This course will help students think about the way game theory is applied to research in political science and political economy. Lectures will cover some advanced topics including: Repeated Games (Folk Theorems); Information Aggregation; Cheap Talk; Bayesian Persuasion; and Global Games. Seminars will focus on going through published papers; students will study one to two papers using game theory.

Teaching: 30 hours of lectures/seminars in the Winter Term. There will be a reading week in WT Week 6.

Formative coursework: Students will write a referee report on one

of the papers on the reading list. They will then discuss their report with the instructor.

Indicative reading: Two useful (but advanced) game theory textbooks are:

- Game Theory. Drew Fudenberg and Jean Tirole. MIT Press (1991).
- Game Theory. Michael Maschler, Eilon Solan, and Shmuel Zamir. Cambridge University Press (2013).

A reading list will be provided at the beginning of the term.

Assessment: Essay (100%) in the ST.

GV4J8 Half Unit

Middle East Politics in Transnational Perspective

This information is for the 2024/25 session.

Teacher responsible: Prof John Chalcraft

Availability: This course is available on the MSc in Gender (Rights and Human Rights), MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics) and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course offers an advanced introduction to the politics of the Middle East and North Africa in transnational perspective. It takes a critical, sociological, historically-informed, and qualitative approach. It focuses on cross-border forms of resistance and subaltern activism. We study such topics as transnational revolutionary movements, Third World national liberation, popular movements on the Arabian peninsula, feminism, Salafi-Wahhabism, human rights advocacy, and transnational Palestinian activism. Students will develop an advanced introductory understanding of the transnational politics of the region.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours in the Winter Term. There will be a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Abdelrahman, Maha. 2007. 'The Nationalization of the Human Rights Debate in Egypt', Nations and Nationalism, 13(2), pp. 285–300; Abu-Lughod, Lila. 2013. Do Muslim Women Need Saving? Cambridge MA: Harvard University Press; Chalcraft, John. 2016. Popular Politics in the Making of the Modern Middle East. Cambridge University Press; Farquhar, Michael. 2017. Circuits of Faith: Migration, Education and the Wahhabi Mission. Stanford: Stanford University Press; Featherstone, David. 2012. Solidarity: Hidden Histories and Geographies of Internationalism. London: Zed Books; Gill, Stephen. 2000. 'Towards a Post-Modern Prince? The Battle in Seattle as a Moment in the New Politics of Globalisation'. Millennium, 29, 1: 131–40; Moghadam, V. M. 2012. 'Global Social Movements and Transnational Advocacy'. In The Wiley-Blackwell Companion to Political Sociology John Wiley and Sons, pp. 408–420; Perugini, Nicola and Neve Gordon. 2015. The Human Right to Dominate. Oxford: Oxford University Press; Prashad, Vijay. 2007. The Darker Nations: A People's History of the Third World. New York: New Press; Pratt, Nicola. 2007. 'The Queen Boat case in Egypt: sexuality, national security and state sovereignty' Review of International Studies (2007), 33, 129–144; Tarrow, Sidney. 2001. 'Transnational Politics: Contention and Institutions in International Politics' Annual Review of Political Science 2001 4:1, 1–20.

Assessment: Essay (100%, 5000 words) in the ST.

GV4J9 Half Unit

Populism

This information is for the 2024/25 session.

Teacher responsible: Professor Francisco Panizza

Availability: This course is available on the MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Political Science (Political Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is capped at one group (it is controlled access), and so places are limited. Priority is given to students on the listed programmes; students from outside these listed programmes may not get a place.

Course content: The course studies populism from a conceptual and comparative perspective. Given the highly contested nature of populism, the first weeks will look in depth to different theories of populism, including ideational, strategic, and performative understandings of populism. It will then move to explore the conditions of emergence of populism, the relation between populism and democracy, varieties of populism and grassroots populist movements.

Teaching: This course provides a combination of seminars and lectures totalling 30 hours in the Winter Term. There will be a reading week in WT Week 6.

Formative coursework: Students will be expected to produce 1 essay in the WT.

One short essay (approx. 500–700 words) to be submitted in Week 7 of the WT. The formative essay will consist of a draft outline of the summative essay. It will require the choice of an essay topic and title, the justification of why it is relevant, a short literature review, the formulation of the essay question and a summary of how the question will be addressed (for instance, using comparative cases). The essay will not receive a grade, instead feedback will be provided to promote critical thinking and guide students to use critical thinking through the real-life process of academic writing. Students will not be allowed to submit the summative essay without previously submitting the formative essay.

Indicative reading: Priority Readings

- Ben Moffit. Populism. Cambridge: Polity, 2020.
- C. Rovira Kaltwasser, P. Taggart, P. Ostiguy and P.Ochoa-Espejo (eds.) Oxford Handbook on Populism. Oxford: Oxford University Press, 2017.

Further Readings

- M. Canovan, "Trust the People". Populism and the two faces of democracy. Political Studies 47 (11) 1999.
- Jan-Werner Müller. What is Populism? 160 Princeton: Princeton University Press, 2016.
- P. Ostiguy, F. Panizza and B. Moffitt. Populism in Global Perspective. A Performative and Discursive Approach. New York: Routledge, 2021.
- C. de la Torre (ed) Routledge Handbook of Global Populism. London: Routledge, 2019.
- Chantal Mouffe. For a Left Populism. 160 London: Verso, 2018.

Assessment: Essay (80%, 4000 words) in the ST.

In-class assessment (20%) in the WT.

The essay will be marked in line with departmental guidance on assessed essays. This will allow for a scale of outcomes in line with different levels of academic outputs. It will be marked for command of the literature, theories and empirical findings, analytical sophistication, use of evidence, critical judgement and originality.

The in-class assessment (20%) consists of a student-led seminar based on a presentation of 20 minutes, followed by a structured discussion of the issues raised by the lecture and the presentation. Particular value will be placed on the ability to present contending arguments in a clear and balanced way, the use of empirical evidence to support arguments, and the capacity to raise relevant questions for seminar discussion.

GV4K1 Half Unit

Participatory Governance

This information is for the 2024/25 session.

Teacher responsible: Prof Daniel Berliner

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Political Science (Political Behaviour), MSc in Political Science (Political Science and Political Economy), MSc in Public Policy and Administration and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high. This course is capped at 3 groups.

Course content: Participatory governance – involving ordinary people in policy making and implementation – is increasingly being adopted around the world and across many different policy areas. This includes initiatives like consultations, coproduction, petitions, policy crowdsourcing, participatory budgeting, complaints mechanisms, service delivery reporting, “civic tech” platforms, citizen juries, and citizen assemblies. These forms of participatory governance also vary in important ways, including the deliberativeness of interactions, the mode of participant selection, the role of technology, and the nature of linkage with public authority. While many scholars and policymakers hail the potential for public participation to lead to more effective, representative, and legitimate governance, others raise important concerns such as risks of exacerbating inequalities, limited accountability, or serving as mere “window-dressing,” among others.

This course examines participatory governance in theory and practice, with a global scope covering applications in both “developed” and “developing” countries as well as at a global level. It surveys theories of participatory and deliberative democracy, and their relationships with representative democracy, as well as themes of coproduction, collaboration, and social accountability; and their applications to applied policy cases and lessons for policymakers. The course also examines key cross-cutting questions, such as who participates and why, the possibilities of meaningful deliberation, relationships with political authority, and applications of information technologies and artificial intelligence. The course also incorporates recent empirical research on the impacts of participatory and deliberative governance and on the representativeness of participation in different settings. Students will have opportunities to apply these concepts and themes to specific case studies in their course essay.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours in the Autumn Term. There will be a reading week in Week 6 of AT.

Formative coursework: Students will have the option to produce one formative essay of 1,000 words, due by the end of week 9 in the AT.

Indicative reading: Fung, Archon, and Erik Olin Wright. 2001.

Assessment: Essay (100%, 4000 words) in the WT.

GV4K2 Half Unit Not available in 2024/25

Postcolonial and Comparative Political Theory

This information is for the 2024/25 session.

Teacher responsible: Prof Leigh Jenco

Availability: This course is available on the MSc in Gender (Rights and Human Rights), MSc in Political Science (Global Politics) and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at two groups. In previous years we have been able to provide places for all students that apply but that may not continue to be the case. **Priority will be given to students enrolled on the MSc in Political Theory programme.**

Course content: This course will examine the consequences of, and responses to, the historic domination of Euro-American forms of knowledge in the field of political theory. Situating political theory as one of many disciplines that reinforce the cultural imperialism of colonial orders, the course will consider how postcolonial theorists have diagnosed this form of epistemic imperialism. We will go on to discuss how recent attempts at forging a “comparative political theory” might (or might not) productively engage more diverse forms of thinking for the purpose of making our conversations about political life more truly global, rather than parochially “Western.” The course will provide students with the vocabulary and conceptual tools to navigate this difficult theoretical terrain, through a focus on a close reading of key texts. We focus in particular on how historical narratives and uses of the past complicate the attempt to overcome Eurocentrism. This course will be of interest to students of political theory, intellectual history, and the history of political and social thought.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours in the Winter Term. There will be a reading week in WT Week 6.

Formative coursework: Students will be expected to produce 1 essay (1500 words maximum excluding footnotes and bibliography) in the WT.

Indicative reading:

- Nandy, Ashis. 1988. *The Intimate Enemy: Loss and Recovery of Self Under Colonialism*. New Delhi: Oxford University Press.
- Chakrabarty, Dipesh. 2000. *Provincializing Europe: Postcolonial Thought and Historical Difference*. Princeton: Princeton University Press.

- Hokari, Minoru. 2011. *Gurindji Journey: A Japanese Historian in the Outback*. Honolulu: University of Hawaii Press.
- Dallmayr, Fred. 2004. "Beyond Monologue: For a Comparative Political Theory." *Perspectives on Politics* 2 (2): 124–44.

Assessment: Essay (80%, 3500 words) in the ST.
Class participation (20%) in the WT.

GV4K7 Half Unit

Conflict and Cooperation: Key Debates

This information is for the 2024/25 session.

Teacher responsible: Dr Omar McDoom

Availability: This course is available on the MSc in Development Studies, MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Political Science (Political Behaviour), MSc in Political Science (Political Science and Political Economy), MSc in Political Sociology and MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is controlled access (it is capped). Priority will first be given to students enrolled on the programmes listed above in the Department of Government, then the programmes listed above in other Departments, and finally other masters programmes by other Departments.

Course content: This course is structured around a series of distinct debates that broadly relate to the theme of conflict and cooperation. The debates may be normative or empirical in nature and the course scope is purposely broad to allow the choice of debates to evolve over time and to reflect the evolution in the scholarly literature of salient issues relating to conflict and cooperation.

Debates envisaged for the course may be considered either foundational (more likely to persist over time) and topical (more likely to change over time).

Foundational debates may include:

- Should governments be permitted to restrict civil liberties in the name of security?
- What role, if any, does inequality play in the onset of political violence?
- Should multiculturalism be preserved and promoted in plural societies?
- How may we distinguish between terrorist organizations and liberation movements?

Topical debates may include:

- How effective has non-violent resistance been in achieving political change?
- What are the forces driving the resurgence of nationalism and populism in the world today?
- What role can Big Data play in preventing and predicting violent conflict?
- What institutional solutions have worked to keep the peace in post-conflict societies?
- When is it permissible to kill civilians for a political cause?
- What is the relationship between ethnic diversity and social cohesion in plural societies?

Teaching: This course provides a minimum of 20 hours of seminars in the Autumn Term. There will also be a reading week in AT Week 6.

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT.

Formative assessment involves an essay plan (of 1000 words) which will be used for the summative long essay.

Indicative reading:

- Conor Gearty: *Liberty and Security*
- Chandran Kukatahas: *Are There Any Cultural Rights?* 160
- Al Qaeda: A statement from Al Qaeda regarding the mandates of the heroes and the legality of the 160 operations in New York and Washington
- Robert Putnam: *E Pluribus Unum: Diversity and Community in the*

Twenty-first Century

- Robert Pape: *Dying to win: the strategic logic of suicide terrorism*
- Joseph Carens: *Aliens and Citizens: The Case for Open Borders*
- Donald Horowitz: *Ethnic groups in conflict*, Chapter 4
- Daniel Byman: *Why Drones Work: The Case for Washington's Weapon of Choice*
- Roland Paris: *The 'Responsibility to Protect' and the Structural Problems of Preventive Humanitarian Intervention*

Assessment: Essay (80%, 3000 words).

Class participation (20%) in the AT.

The summative long essay will address one of the course debates.

The question will be set by the instructor. The class participation mark includes written contributions to an online discussion forum and oral contributions in the classroom.

GV4K8 Half Unit

Global Public Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Mathias Koenig-Archibugi

Availability: This course is available on the MSc in Political Science (Global Politics). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. The course is capped at one seminar group and admission is not guaranteed.

Course content: The course examines the process and outcomes of policy-making at the global level. Students can choose an area of specialization from a range of global policy issues, with a focus on those addressed by the Sustainable Development Goals (SDGs) set by the United Nations. Examples of policy areas covered in the course are environmental governance, with a focus on the protection of forests; global health governance, with a focus on tackling communicable diseases; the promotion of workers' rights in the global economy; the elimination of gender-based discrimination and violence; and the fight against tax avoidance and illicit financial flows. The course considers a range of modes of policy-making, from classic intergovernmental cooperation to novel forms of governance beyond the state such as transgovernmental networks, multistakeholder initiatives, and regulation by non-state actors. The sessions cover the following topics: 1. What are "global", "public" and "policy"? Does global public policy exist? 2. Who are the targets of global public policy and what are their interests? 3. How to assess the performance of global public policy: output criteria. 4. How to assess the performance of global public policy: input and throughput criteria. 5. Which types and combinations of actors develop global public policies and how does it matter? 6. How are global "problems" framed and interpreted, and how does this affect their solution? 7. Do the delegation of authority and the legalization of global public policy affect its outcomes? 8. What role does deliberation and experimentation play in global policy initiatives? 9. What are the consequences of fragmentation and competition in the overall architecture of global public policy? 10. What are the prospects for building a global polity?

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours in the Winter Term. There will be a reading week in Week 6 of the WT for private study and assessment preparation.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the WT.

Indicative reading: Koenig-Archibugi, M. (2002) 'Mapping Global Governance', in D. Held and A. McGrew (eds) *Governing Globalisation*. Polity Press.

Assessment: Essay (100%, 4000 words) in the ST.

GV4L1 Half Unit Not available in 2024/25 Analytical Approaches to British Politics

This information is for the 2024/25 session.

Teacher responsible: Prof Torun Dewan

Availability: This course is available on the MSc in Political Science and Political Economy. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is designed primarily for students on the MSc PSPE with the relevant training in quantitative methods and some game theory. It will also be available to students from other programmes with the relevant skill, space permitting.

Pre-requisites: The course is primarily for students on the MSc Political Science and Political Economy; students fulfilling the core requirements of the programme (completion of GV4C8 and GV481) will be eligible. Other students can be accepted if they have similar quantitative skills to students who have completed the first term of the PSPE programme, space permitting.

Course content: Strøm (2000) argues that the conceptual essence of Parliamentary government is a "historical evolution" – an accident of 19th century Britain that spread to other parts of the world. Recent analytical political science has shed light on Britain's political development and how its institutions function, using game theoretic modelling, rational choice narratives, and quantitative data. The course covers this literature and takes an analytical approach to topics such as: the historical development of British institutions and Imperial governance; the emergence and impact of Government-vs-Opposition; the historical development of the British party system; the causes and consequence of franchise extension; the Cabinet and its conventions; and the composition of the Executive and Parliament over time.

Teaching: 15 hours of lectures and 20 hours of seminars in the WT. 1 hour and 30 minutes of lectures in the ST. There will be a reading week in LT Week 6.

Formative coursework: One formative piece of work of 1500 words to be handed in at the end of reading week.

Indicative reading:

- Cox, G. (1987) *The Efficient Secret*, Cambridge University Press
- Berlinski, S., Dewan, T, and Dowding K. (2012) *Accounting for Ministers: Scandal and Survival in British Government 1945-2007*, Cambridge University Press
- Mclean, I (2002) *Rational Choice and British Politics: An Analysis of Rhetoric from and Manipulation from Peel to Blair*, Oxford University Press
- Schonhardt-Bailey, C (2006) *From the Corn Laws to Free Trade: Interests, Ideas and Institutions in Historical Perspective*, MIT Press

Assessment: Online assessment (100%) in the ST.

Online assessment duration: 7 days in the ST.

GV4L2 Half Unit The Politics and Policy of Climate Change and Sustainability

This information is for the 2024/25 session.

Teacher responsible: Dr Michael Lerner

Availability: This course is available on the MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Political Science (Political Science and Political Economy), MSc in Public Policy and Administration and MSc in Regulation. This course is not available as an outside option.

This course has a limited number of places (it is controlled access) and demand is typically very high. This course is capped at 2 groups.

Pre-requisites: A basic understanding of the physical science of climate change would be advantageous.

Course content: This course introduces students to the policy interventions and underlying political dynamics that shape the pace and direction of efforts to mitigate climate change and improve sustainability. Students will unpack the conceptual foundations of climate politics, assess climate and sustainability problems across a variety of practical cases, and learn to prescribe and justify policy interventions to accelerate sustainability transitions.

A unifying theme of the course will be its frequent attention to the political economy of climate (in)action. Specific topics include carbon lock-in; climate advocacy and obstruction; environmental authoritarianism; corporate climate governance; national climate institutions; just transition agreements; energy subsidies and carbon pricing; and geoengineering. The case studies in this course focus primarily, but not exclusively, on domestic environmental politics in advanced industrialized democracies.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

There will be a reading week in Week 6 of the Winter Term.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Indicative reading:

- Bernstein, Steven, and Matthew Hoffmann. "Climate politics, metaphors and the fractal carbon trap." *Nature Climate Change* 9.12 (2019): 919-925.
- Seto, Karen C., et al. "Carbon lock-in: Types, causes, and policy implications." *Annual Review of Environment and Resources* 41 (2016): 425-452.
- Parris, Thomas M., and Robert W. Kates. "Characterizing a sustainability transition: Goals, targets, trends, and driving forces." *Proceedings of the National Academy of Sciences* 100.14 (2003): 8068-8073.
- Meckling, Jonas. "Oppose, Support, or Hedge? Distributional Effects, Regulatory Pressure, and Business Strategy in Environmental Politics." *Global Environmental Politics* 15.2 (2015): 19-37.
- Stroup, Sarah S., and Wendy H. Wong. *The Authority Trap*. Cornell University Press (2017). Chapter 1.
- Finnegan, Jared J. "Institutions, climate change, and the foundations of long-term policymaking." *Comparative Political Studies* (2022).
- Baldwin, Elizabeth, Sanya Carley, and Sean Nicholson-Crotty. "Why do countries emulate each other's policies? A global study of renewable energy policy diffusion." *World Development* 120 (2019): 29-45.
- Stokes, Leah C. *Short Circuiting Policy: Interest Groups and the Battle over Clean Energy and Climate Policy in the American States*. Oxford University Press (2020). Chapter 1.

Assessment: Video (20%) in the WT.

Policy report (80%) in the ST.

Students will create up to two 4–6 minute video blog posts

interpreting a recent event through the lens of course material (one must be uploaded in the first half of term, and one in the second half of term), of which one will be submitted for assessment. The assessed policy report will have a word limit of 3000 words.

GV4L3 Half Unit Not available in 2024/25 Data Science Applications in Politics Research

This information is for the 2024/25 session.

Teacher responsible: Dr Melissa Sands

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Political Science (Global Politics), MSc in Political Science (Political Science and Political Economy) and MSc in Public Policy and Administration. This course is not available as an outside option. This course is capped at 1 group. Priority will be given to students enrolled on programmes in the Department of Government.

Pre-requisites: Quantitative Analysis for Political Science (GV481), Introduction to Quantitative Analysis (MY451), or equivalent.

Course content: This course introduces students to the latest empirical research and covers different applications of novel and "big" data in political science. Themes include causality and credibility, administrative and open data, media, social media, and search data, and text and image data. Students will be introduced to the set of questions that each type of data can help answer. The course situates the "big data" revolution within the broader context of political science and policy research and discusses some of the promises and pitfalls of digital innovations and new data science methods, with an emphasis on the importance of ensuring the integrity of the research process from start to finish.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

There will be a reading week in Week 6 of the Winter Term.

Formative coursework: Students will be expected to produce 1 presentation and 1 problem sets in the WT.

Presentation is a brief (10-15) overview and critique of one published research paper of the student's choice, selected from a menu of options.

Indicative reading:

- Brady, Henry E. "The challenge of big data and data science." *Annual Review of Political Science* 22 (2019): 297-323.
- Titunik, Rocio. "Can big data solve the fundamental problem of causal inference?." *PS: Political Science & Politics* 48, no. 1 (2015): 75-79.
- Carlitz, Ruth D., and Rachael McLellan. "Open Data from Authoritarian Regimes: New Opportunities, New Challenges." *Perspectives on Politics* 19, no. 1 (2021): 160-170.
- King, Gary, Jennifer Pan, and Margaret E. Roberts. "How the Chinese government fabricates social media posts for strategic distraction, not engaged argument." *American political science review* 111.3 (2017): 484-501.
- Chen, M. Keith, and Ryne Rohla. "The effect of partisanship and political advertising on close family ties." *Science* 360, no. 6392 (2018): 1020-1024.
- Nickerson DW, Rogers T. 2014. Political campaigns and big data. *Journal of Economic Perspectives* 28(2): 51-73
- Lerman, Amy E., and Vesla Weaver. "Staying out of sight? Concentrated policing and local political action." *The ANNALS of the American Academy of Political and Social Science* 651, no. 1 (2014): 202-219.
- Vomfell, L., Stewart, N. Officer bias, over-patrolling and ethnic disparities in stop and search. *Nat Hum Behav* 5, 566-575 (2021).
- Law, Tina, and Joscha Legewie. "Urban data science." *Emerging Trends in the Social and Behavioral Sciences: An Interdisciplinary, Searchable, and Linkable Resource* (2015): 1-12.

Assessment: Coursework (80%, 3000 words) in the ST. Problem sets (20%) in the WT.

The coursework would comprise a replication exercise, where

students replicate and extend the analysis of one published research paper.

GV4L4 Half Unit Critical Theory and Political Action

This information is for the 2024/25 session.

Teacher responsible: Prof Paul Apostolidis

Availability: This course is available on the MSc in Inequalities and Social Science and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

The course has a limited number of places (it is controlled access) and priority will be given to students on the programmes listed above.

Course content: This course engages students in the study of 'critical theory' in a broad and inclusive sense, with a special interest in exploring how theory can inform and be shaped by political practises. Students first will consider formative texts and ideas in twentieth-century critical theory from Gramsci and the early Frankfurt School, confronting issues such as the relation between advanced capitalism and popular thought-forms, the critique of positivism, and philosophy's entanglement with material, cultural and political history. Next, we turn our attention to late twentieth-century and twenty-first century writings that attune critical theory to dynamics of race, gender, sexuality, and the intellectual agency of dominated groups. We take up the Birmingham School's critical development of Gramscian theory to analyse racial power and resistance in Britain as well as Paulo Freire's theory of popular education. We also examine more recent writings in Marxism, feminism, and critical race theory. We explore relations between capitalism and racial domination, gender power, and sexual norms, and we consider the implications for political action that arise from critically investigating these relations. The course also highlights questions of method related to the task of placing theory and practical politics in dialogue, thus inquiring how to generate grounded and engaged critical theory.

Teaching: 20 hours of seminars in the AT.

There will be a 2-hour seminar each week, with a combined lecture and discussion in that time-block.

There will be a reading week in Week 6 of the Autumn Term.

Formative coursework: Students will be expected to produce 1 essay in the AT.

One 1,500-word formative essay will be due in AT Week 8. The essay will mainly provide preliminary examination of a question or debate in critical theory but also will include a brief proposal for a contemporary political phenomenon to analyse in the summative research essay.

Indicative reading: Essential readings typically include the following texts:

- Gramsci, Antonio. 2001. *Selections from the Prison Notebooks of Antonio Gramsci*. Edited and translated by Quintin Hoare and Geoffrey Nowell Smith. London: Electric Book Company.
- Adorno, Theodor W. 1973. *Negative Dialectics*. Translated by E. B. Ashton. New York: Continuum.
- Hall, Stuart. 1988. *The Hard Road to Renewal: Thatcherism and the Crisis of the Left*. London: Verso.
- Freire, Paulo. 2000. *Pedagogy of the Oppressed*. Translated by Myra Bergman Ramos. New York: Continuum.
- Weeks, Kathi. 2011. *The Problem with Work: Feminism, Marxism, Antiwork Politics, and Postwork Imaginaries*. Durham: Duke University Press.
- Davis, Angela. 1998. *The Angela Y. Davis Reader*. Edited by Joy James. Oxford: Blackwell.

Assessment: Essay (100%, 4000 words) in the WT Week 1. One 4,000-word essay due after the term's completion (i.e., in January, WT Week 1, given that this is an AT course). The essay will analyse a contemporary political practise or movement that has a popular or mass base, chosen by the student, using key concepts drawn from the course's main readings.

The summative essay will account for 100% of the course mark.

GV4L5 Half Unit Politics, Gender, and Development

This information is for the 2024/25 session.

Teacher responsible: Dr Nirvikar Jassal

Availability: This course is available on the MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Political Science (Political Behaviour), MSc in Political Science (Political Science and Political Economy), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case. Priority will be given to students on the programmes listed above.

Pre-requisites: Familiarity with basic research design and introductory statistics is strongly recommended.

Course content: While political science scholarship on gender often focuses on disparities between men and women in terms of political participation, the way inequalities in other domains such as (a) health, (b) education, (c) criminal justice, and (d) the bureaucracy intersect with politics may sometimes be overlooked. This course provides a survey of empirical social science research on gender over the past 20-years primarily from the disciplines of development economics and political science. The scholarship covers a wide range of countries, including those in the Global South. Some of the topics that the course will cover include: how does the representation of women in political institutions affect development? Are there any state policies that can serve to reduce gender-based violence or improve women's access to property rights? How can discrimination against the LGBTQ community be reversed? Broadly, the class explores research related to why and where disparities persist between men and women, as well as what kind of interventions – adopted by governments, NGOs, and other agencies – mitigate these gaps, as well as make public institutions more equitable and inclusive.

Teaching: 20 hours of seminars in the WT.

There will be a reading week in Week 6 of the Winter Term.

Formative coursework: Students will be expected to produce 1 essay at the end of the term on an original research question related to politics, gender, and development.

Indicative reading:

- Chattopadhyay, Raghavendra, and Esther Duflo. 2004. "Women as Policy Makers: Evidence from a Randomized Policy Experiment in India." *Econometrica* 72 (5): 1409–43.
- Alesina, Alberto, Paola Giuliano, and Nathan Nunn. 2013. "On the Origins of Gender Roles: Women and the Plough *." *The Quarterly Journal of Economics* 128 (2): 469–530.
- Mendelberg, Tali, Christopher F. Karpowitz, and Nicholas Goedert. 2014. "Does Descriptive Representation Facilitate Women's Distinctive Voice? How Gender Composition and Decision Rules Affect Deliberation." *American Journal of Political Science* 58 (2): 291–306.
- Bos, Angela L., Jill S. Greenlee, Mirya R. Holman, Zoe M. Oxley, and J. Celeste Lay. 2022. "This One's for the Boys: How Gendered Political Socialization Limits Girls' Political Ambition and Interest." *American Political Science Review* 116 (2): 484–501.
- Carrell, Scott E., Marianne E. Page, and James E. West. 2010. "Sex and Science: How Professor Gender Perpetuates the Gender Gap." *The Quarterly Journal of Economics* 125 (3): 1101–44.

Assessment: Essay (100%, 4000 words) in the ST.

The summative assessment comprises one final take-home essay on an original research question.

Students will be able to answer their original research question using any social science methodology discussed in class,

qualitative research, or any other technique discussed with the convener.

GV4L6 Half Unit Political Economy of Inequality

This information is for the 2024/25 session.

Teacher responsible: Prof Valentino Larcinese

Availability: This course is available on the MSc in Political Science (Political Behaviour), MSc in Political Science (Political Science and Political Economy), MSc in Public Policy and Administration and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: At the heart of the study of politics is a question about who gets what and when. Consequently, inequality features as a central theme in the discipline. Scholars have studied how inequality shapes democratization, redistribution, voting behaviour, and how the institutions of welfare and taxation in turn shape inequality. More recently, scholars have started to pay attention to how inequality across and within ethnicities, races, and gender may matter to political outcomes. The centrality of inequality is reflected in the significant increase in quantity and quality of research on this subject over the past two decades. In this course we will cover the following topics:

- Normative foundations and conceptual complexities involved in the study of inequality
- Measures of inequality
- Inequality in a comparative perspective: evolution over time and across countries
- Economic explanations for the changing patterns of inequality over the past two centuries – 160globalization, technological change
- Historical institutions and the persistence of Inequality
- The political economy of redistribution – 160Taxation, redistribution and the growth of welfare state
- Identity politics and redistribution – class, status, ethnicity/race and gender
- Beyond economic inequality: inequality in welfare, happiness and health
- Educational inequality, mobility and politics
- The constraints to addressing inequality: global market integration, state capacity and Robinhood Paradox.

Teaching: 25 hours of seminars in the AT.

There will be a reading week in AT Week 6.

Weekly classes will last 2.5 hours with a lecture component that will vary each week. Earlier in the term as we engage with definitions, concepts and measurement the lectures will comprise around 30-45 mins of class time. Later in the term, the lectures will provide a broad over view of the topic and set the terms of the seminar discussion and will likely run for around 15-20 mins of class time.

Formative coursework: Students will be expected to produce 1 essay in the AT.

The formative coursework comprises a 1000-word response essay written for the week that the student serves as a discussant in class. The lecturer will assign which week the student will write about.

Indicative reading:

- Ansell, B.W., 2010. *From the Ballot to the Blackboard: The Redistributive Political Economy of Education*, Cambridge: Cambridge University Press.
- Roemer, J.E. et al., 2009. *The Oxford Handbook of Economic Inequality*. 1st ed., Oxford: Oxford University Press.
- Atkinson, Anthony B, and François Bourguignon, 2000. *Handbook of Income Distribution*. Vol. 1, Oxford: Elsevier Science & Technology.

Assessment: Essay (100%, 4000 words) in the WT.

The summative assessment comprises a 4000-word final essay due at the start of WT, based on a topic on inequality.

GV4L7 Half Unit Not available in 2024/25 Political Participation and Representation in Latin America

This information is for the 2024/25 session.

Teacher responsible: Dr Mathias Poertner

Availability: This course is available on the MSc in Development Management, MSc in Development Studies, MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Global Politics), MSc in Political Science (Political Behaviour), MSc in Political Science (Political Science and Political Economy) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit. Priority will be given to students on the programmes listed above.

Course content: Latin America has long been the centre of dynamic political, social, and economic change. The region has suffered some of the most repressive political regimes, highest degrees of economic inequality, and worst organized crime. Yet Latin America has also been the focus of some of the most innovative experiments in democratic participation and social mobilization.

This course surveys key topics related to political representation and participation in the region. The first five weeks focus on key moments of political representation and participation in twentieth and twenty-first century Latin America, going from the emergence of mass politics in the 1930s and 1940s to the collapse of democracies in the 1960s and 1970s, the return to democracy in the 1980s, and more recent processes of democratic consolidation and economic liberalization. The second half of the course then explores specific topics of political participation and representation in more detail. Here, the course will focus on the role of social movement organizations (e.g., labour unions and indigenous movements) and political parties for representation, the formation of political attitudes and voting behaviour, the emergence and demise of partisanship, the inclusion and representation of crucial social identities (such as ethnicity, gender, and class), specific party-voter linkages, and participatory institutions in the context of the recent inclusionary turn in the region.

This course will offer a grounding in underlying institutional and behavioural theories behind political representation and participation, as well as the broader political and economic context in twentieth and twenty-first century Latin America. Students will gain empirical knowledge on the region's politics, a deeper theoretical understanding of issues of political representation and participation, as well as crucial analytical skills.

Tentative outline of weekly topics:

- 1 Overview & Introduction
- 2 The Emergence of Mass Politics
- 3 Democratic Breakdown
- 4 Democratization
- 5 Neoliberalism under Democratic Rule
- 6 Popular Interests: Labour, the Rural Sector, and Indigenous Movements
- 7 Political Parties and Partisanship
- 8 Party-Voter Linkages: Ethnicity, Gender, and Class
- 9 Party-Voter Linkages: Clientelism
- 10 The Inclusionary Turn and Participatory Institutions

Teaching: 20 hours of seminars in the WT.

This course is delivered through seminars totalling a minimum of 20 hours in the Winter Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

An annotated bibliography (1000 words) evaluating 3-6 sources which will be used in the summative long essay.

Indicative reading:

- Collier, Ruth Berins and David Collier. 1991. *Shaping the Political Arena: Critical Junctures, the Labor Movement, and Regime Dynamics in Latin America*. Princeton: Princeton University Press, excerpts.

- Collier, Ruth Berins and Samuel Handlin, eds. 2009. *Reorganizing Popular Politics: Participation and the New Interest Regime in Latin America*. University Park: The Pennsylvania State University Press, excerpts.
- Hagopian, Frances. 2009. "Parties and Voters in Emerging Democracies." In Carles Boix and Susan C. Stokes, eds., *The Oxford Handbook of Comparative Politics*. Oxford: Oxford University Press.
- Holland, Alisha and Brian Palmer-Rubin. 2015. "Beyond the Machines: Clientelist Brokers and Interest Organizations in Latin America." *Comparative Political Studies* 48(9): 1186-1223.
- Kapiszewski, Diana, Steven Levitsky, and Deborah J. Yashar, eds., 2021. *The Inclusionary Turn in Latin American Democracies*. Cambridge: Cambridge University Press, excerpts.

- Poertner, Mathias. 2021. "The Organizational Voter: Support for New Parties in Young Democracies." *American Journal of Political Science* 65 (3): 634-651.
- Stokes, Susan, Thad Dunning, Marcelo Nazareno, and Valeria Brusco. 2013. *Brokers, Voters, and Clientelism: The Puzzle of Distributive Politics*. New York: Cambridge University Press, pp. 3-26.
- Yashar, Deborah. 2006. "Indigenous Politics in the Andes: Changing Patterns of Recognition, Reform, and Representation," In Scott Mainwaring, Ana María Bejarano, and Eduardo Pizarro Leongómez, eds., *The Crisis of Democratic Representation in the Andes*. Stanford: Stanford University Press, pp. 257-294.

Assessment: Essay (80%, 2500 words) in the ST Week 1.

Presentation (20%) in the WT.

- **Classroom participation & country reporting (20%):** In addition to active participation in class, students are responsible for ongoing reporting about politics in one Latin American country, assigned in Week 1, throughout the course of the semester. Students will be responsible for following the news on "their" country every week. Once during the semester, each student will give a current event report on "their" country. This brief (5 minutes) presentation should describe one of the major political events that have affected "their" country within the last six months.

- **A summative essay (80%):** 1600 a critical research essay addressing one of the course topics (2500 words).

GV4L8 Introductory Maths for Political Science

This information is for the 2024/25 session.

Teacher responsible: Dr Marta Antonetti

Availability: This course is available on the MSc in Political Science (Political Science and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is strongly recommended for MSc in Political Science (Political Science and Political Economy). It is available for students from other streams/programmes with permission of the instructor.

Course content: The aim of this pre-sessional course is to provide students with the essential mathematical background for the study of political economy in political science. It is specially tailored to prepare students for the core courses in the MSc Political Science PSPE stream, but can be of use for any student interested in the field.

This course will cover key concepts in algebra (definition of function, derivation, limits), maximization problems (constrained and unconstrained), and some notions of probability (Bayes' rule,

random variables).

Teaching: This course provides 10 hours of introductory sessions at the beginning of the Autumn Term.

Please note that all the teaching for this course will take place in Autumn Term Week 0 (23-27 September 2024).

Indicative reading: There is no required reading for this course.

GV4L9

Introductory R for Political Science

This information is for the 2024/25 session.

Teacher responsible: Dr Marta Antonetti

Availability: This course is available on the MSc in Political Science (Political Science and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is strongly recommended for any MSc student who wishes to enrol on GV481. This includes, but is not limited to, students from the MSc in Political Science: Political Science and Political Economy (PSPE) stream and Political Behaviour stream, for which GV481 is a core course.

Course content: The aim of this pre-session course is to introduce students to the use of statistical software, which is essential background for the study of quantitative methods in political science. It is specially tailored to prepare students for the GV481 course.

The course is composed of up to five sessions dedicated to introducing R to MSc students. We will cover basic commands and some more advanced programming techniques, which will be used in GV481.

Teaching: This course provides 10 hours of introductory sessions at the beginning of the Autumn Term.

Please note that all the teaching for this course will take place in Autumn Term Week 0 (23-27 September 2024).

Indicative reading: There is no required reading for this course.

GV4M6 Half Unit Not available in 2024/25

Modern African Political Philosophy

This information is for the 2024/25 session.

Teacher responsible: Prof Katrin Flikschuh

Availability: This course is available on the MSc in Political Theory. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at one group.

Pre-requisites: This course assumes no particular pre-requisites aside from intellectual curiosity about non-Western traditions of thought. Some prior exposure to either political theory or philosophy will be an advantage.

Course content: This course introduces students to post-independent African philosophical and political thinking. The chief objective of the course is to get students to engage with the intellectual heritage of the African continent and critically to re-think historically ingrained misperceptions about its peoples and cultures. Please note that this course focuses on modern African philosophy and political theory. The orientation is not anthropological or developmental; nor is this a course in 'post-colonial studies' more broadly conceived. Throughout, we will be reading and engaging with texts written by contemporary African philosophers and political theorists. There will be three broad blocks:

1. Methodology: 'What is African Philosophy?' We will examine the development from an oral to a written tradition and the particular methodological challenges involved. We will assess the prefix 'African': is such a geographical and/or cultural scope restriction consistent with the very idea of 'philosophy'? If there is a distinctly 'African' philosophy, does this in turn challenge the universalising

assumption of 'Western' philosophy? If there is 'African' philosophy as well as 'Western' philosophy, what, then, is 'philosophy'?

2. Substantive Issues: 'Personhood, Agency, and Community'.

We will discuss African thinkers' claims to the distinctiveness of African cultures' metaphysical and moral conceptions of self and society, and how these in turn impact conceptions of moral and political agency. We will compare and contrast Western individualist conceptions of the person with communal African conceptions; we will consider the idea of ancestral existence as a form of moral life after death; we will compare and contrast conceptions of individual freedom, destiny, and communal responsibility. Throughout, we will ask whether divergent conceptions of moral personhood are coherently possible or whether we should seek to strive for convergence towards a universal norm.

3. Implications: We shall ask how African thinkers conceive their social and political contexts and how their views do or do not cohere with Western thinking about African developmental challenges. Given their colonial origins, are current state structures in Africa morally and politically viable? Are human rights discourses truly universal, or are they excessively individualistic and insufficiently cognisant of the value of community? Are current aid and development premised on adequate background assumptions about modern African polities, or do they need to be revised?

Teaching: This course is taught as a weekly two-hour seminar in the Autumn Term, totalling 20 hours of teaching. There will be a reading week in Week 6 of Autumn term.

Formative coursework: Students will be expected to produce 1 formative essay in the AT.

Formative assessment will consist of an essay of maximally 2500 words in length. A list of essay questions will be made available by Week 4 of AT. Students may design their own essay questions, if they prefer to do so. However, they must clear their proposed essay question with the course convener beforehand. Course work must be submitted by the end of Week 7. The essay will be read and commented on. It will be assigned a guide-mark but will not form part of the summative assessment. Essays substantially above 2500 words will not be read.

Indicative reading: Anthony Kwame Appiah, *In My Father's House. Africa in the Philosophy of Culture* (OUP 1992).

Paulin Hountondji, *The Struggle for Meaning* (Ohio State University Press 2002)

Kwasi Wiredu, *Cultural Universals and Particulars* (CUP 1996).

Odera Oruka, *Sage Philosophy*, 1990.

Emmanuel Chukwudi Eze, *On Reason. Rationality in a World of Cultural Conflict and Racism* (Duke University Press 2008).

Assessment: Essay (100%, 5000 words).

The assessed work for this course consists of one extended essay of 5000 words due at the beginning of Winter term, on a course topic either chosen from the list of essay questions or designed by the student him or herself in consultation with the course convener. Students are permitted to use their formative essay as a basis for their assessed essay. However, the assessed essay must advance substantially beyond the argument made in the formative essay; students must not submit the same work twice. The assessed essay must be submitted electronically to

the Departmental Office. The submitted essay will undergo a plagiarism check, including self-plagiarism. Plagiarism is a serious academic offence which, if proven, will likely incur the penalty of official course failure. Late submissions will incur penalties in the form of mark deduction.

GV4N1 Half Unit

Qualitative Analysis for Political Science

This information is for the 2024/25 session.

Teacher responsible: Dr Steffen Hertog

Availability: This course is available on the MRes/PhD in Political Science, MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Political Science (Global Politics). This course is not available as an outside option.

Course content: This course gives a practical overview of the major mainstream qualitative methods used in political science, including case studies and process-tracing, small-n comparisons, systematic case selection, and approaches for combining qualitative and quantitative approaches. It will be grounded in current debates about causal inference, how it can be achieved through qualitative methods, and how doing so is complementary to or rival to statistically based causal inference. Particular emphasis will be put on understanding how various authors apply various qualitative methods in practice (both implicitly and explicitly) and on how students can choose and deploy them in their own research projects. It will also discuss practical aspects of generating qualitative data through techniques such as interviews and archival research.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. There will be a reading week in Week 6 of the Autumn Term.

Formative coursework: The course will involve two shorter formative assignments in AT (750 words each) that will:

- critique the methods of a given research article or paper, allowing students to deepen and demonstrate their understanding of the benefits and drawbacks of different methods and the challenges in applying them in practice, and;
- present a short mock research design addressing a research question of their own choosing (subject to seminar teacher approval).

Indicative reading:

- Henry E Brady and David Collier, *Rethinking Social Inquiry: Diverse Tools, Shared Standards* (Lanham, Md.: Rowman & Littlefield Publishers, 2010).
- John Gerring, *Case Study Research: Principles and Practices* (Cambridge University Press, 2007).
- Gary Goertz and James Mahoney, *A Tale of Two Cultures: Qualitative and Quantitative Research in the Social Sciences* (Princeton University Press, 2012).
- Tasha Fairfield and Andrew E. Charman, "Explicit Bayesian Analysis for Process Tracing: Guidelines, Opportunities, and Caveats," *Political Analysis* 25, no. 3 (July 2017): 363-380.
- Nina Tannenwald, "The Nuclear Taboo: The United States and the Normative Basis of Nuclear Non-Use," *International Organization* 53, no. 3 (Summer, 1999), pp. 433-468.
- Anthony W. Marx, "Race-Making and the Nation-State," *World Politics* 48, no. 2 (1996): 180-208.

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Essay (50%, 2000 words) in the WT.

The summative assignments will consist of a 2000 word in-depth review of a published piece of research (due in early WT, 50%) and an exam (January, 50%) in which students will demonstrate the breadth of their knowledge of qualitative methods.

GV4N2

Introduction to Comparative Politics and Conflict Studies

This information is for the 2024/25 session.

Teacher responsible: Dr Sarah Brierley

Availability: This course is compulsory on the MSc in Political Science (Conflict Studies and Comparative Politics). This course is not available as an outside option.

Course content: The course introduces students to the broad fields of comparative politics and conflict studies. Students examine theoretical and methodological underpinnings and diverse examples of 'best practice' in research and writing in comparative politics of the broad discipline of political science.

Lectures and seminar discussions focus on important areas of research in comparative politics and the methodological challenges involved. At the end of the course students will have –

- Gained knowledge on substantive topics in the field of comparative politics and conflict studies; be able to define key concepts and understand how scholars measure important political and social outcomes.
- Understanding of the advantages and disadvantages of different methodological approaches to the study of comparative politics, and why scholars use different methods.
- Developed the ability to ask relevant research questions in the field of comparative politics.
- Been able to design a research project to answer their research questions.
- Evaluated and critiqued existing literature and discussed ways to move a research area forward.

This course exposes students to core topics and debates in the field of comparative politics. Topics include, for example, the state and state-building, electoral and party systems, democratisation, civil conflict, electoral violence, and crime. In discussing substantive issues, the course will expose students to a range of methodological approaches used in the study of comparative politics.

Readings treat such variegated topics of inquiry and debate in comparative politics as democracy, the state, political parties, ethnic and civil conflict. In discussing substantive issues, the course will expose students to a range of methodological approaches used in the study of comparative politics.

The course treats examples of real existing comparative politics as practiced by leading scholars in the field in recent years. These examples are chosen to cover diverse forms of comparison, diverse modes of analysis, diverse topic areas, and diverse countries and regions of the world. Cutting across these forms of diversity and sets of questions that will be addressed throughout the course concerning the practicalities and limitations of various methods of comparative analysis for explaining observable patterns in politics.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. 15 hours of lectures and 15 hours of seminars in the WT.

There will be a reading week in Week 6 of the Autumn and Winter Terms.

Formative coursework: Two short literature response papers to be submitted in the AT and WT.

Indicative reading:

- Przeworski, Adam, Susan C. Stokes, and Bernard Manin, eds. *Democracy, accountability, and representation*. Cambridge University Press, 1999.
- Putnam, R. D., Leonardi, R., & Nanetti, R. Y. (1993). *Making Democracy Work: Civic Traditions in Modern Italy*. Princeton University Press.
- Grzymala-Busse, Anna M. *Sacred Foundations: The Religious and Medieval Roots of the European State*. Princeton University Press, 2023.
- De Vries, C.E. and Hobolt, S.B. (2020). *Political Entrepreneurs*. Princeton University Press.
- Cederman, Lars-Erik, Kristian Skrede Gleditsch, and Halvard Buhaug. *Inequality, grievances, and civil war*. Cambridge University Press, 2013.

- Weinstein, J. M. (2006). *Inside rebellion: The politics of insurgent violence*. Cambridge University Press.
 - Fearon, James D., and David D. Laitin. "Ethnicity, insurgency, and civil war." *American political science review* 97.1 (2003): 75-90.
- Assessment:** Exam (60%, duration: 2 hours) in the spring exam period.
Research proposal (40%) in the WT.
The research proposal would have a word limit of 1,500 words.

GV4N3

The Politics of Globalization

This information is for the 2024/25 session.

Teacher responsible: Dr Mathias Koenig-Archibugi

Availability: This course is compulsory on the MSc in Political Science (Global Politics). This course is not available as an outside option.

Course content: The course examines the nature, the causes and the political consequences of globalization in a variety of domains, including security, culture, the economy, and the environment. The course aims at enabling students to assess the extent of continuity and transformation in key areas of global politics.

The course will analyse how globalization shapes, and in turn is shaped by, politics within countries, between countries and beyond countries. It will introduce the main approaches to the study of globalization and examine how it affects patterns of conflict, cooperation and competition between a range of politically relevant actors, including governments, political parties and citizens, great powers, intergovernmental and nongovernmental organisations, global companies and other non-state groups. These patterns of conflict, cooperation and competition will be examined with reference to a variety of policy domains, such as security, economy, environment, health and migration. The course will also assess the challenges to and opportunities for democracy in a global age.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. 15 hours of lectures and 15 hours of seminars in the WT. This course is delivered through a combination of lectures and seminars. There will be a reading week in Week 6 of the Autumn and Winter Terms.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the AT and 1 essay and 1 presentation in the WT.

Indicative reading:

- Held, David, Anthony McGrew, David Goldblatt and Jonathan Perraton (1999), *Global Transformations*, Cambridge: Polity Press.

Assessment: Essay (100%, 5000 words) in the ST Week 1.

GV4N4

Comparative Political Behaviour

This information is for the 2024/25 session.

Teacher responsible: Dr Mathias Poertner

Availability: This course is compulsory on the MSc in Political Science (Political Behaviour). This course is not available as an outside option.

Course content: This course examines how citizens see the political world and form opinions about it, and how their political behaviour is shaped by those opinions and their social identities. The course will start out by surveying some foundational work on different theoretical perspectives in political behaviour and central methodological challenges in political behaviour research. After that, we focus on research that addresses different voter motivations, the broader political and social context, and specific political behaviours. Throughout the course, we will pay special attention to the interplay between political institutions, contextual factors, and behavioural outcomes. Readings are drawn from all major world regions.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. 15 hours of lectures and 15 hours of seminars in the WT.

Students on this course will have a reading week in Week 6 of the Autumn and Winter Terms, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

This will consist of a research proposal (1500 words) outlining a research question and research design to be explored in the research paper.

Indicative reading:

Assessment: Presentation (20%).

Coursework (80%) in the ST Week 1.

For the coursework component (80%) students can choose between submitting a) a fully executed research paper or b) a

research proposal – a fully developed pre-analysis plan for a research project addressing one of the course topics that includes both a literature review and a research design. The word count for the research paper/proposal will be 6000 words.

GY400 Half Unit

The Economics of Urbanisation

This information is for the 2024/25 session.

Teacher responsible: Prof John Henderson CKK 4.31

Availability: This course is available on the MPhil/PhD in Economic Geography, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Geographic Data Science, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: No specific LSE course requirements. At a minimum, students should have an analytical course in micro-economics (or equivalent) and a basic statistics or econometrics course.

Course content: This MSc course will offer students the opportunity to learn some of the conceptual foundations and empirical regularities involved in studying why countries urbanise, the nature of structural and spatial transformation involved in the urbanisation process and the development of systems of cities. Complementing this will be a study of the internal spatial transformation of cities, the evolution of the location of production activities, the formation and role of slums, and the evolution of land market regulations and property right assignments. Critical to understanding these processes will be learning about the role of regulation and political processes, as well as policy initiatives, in shaping outcomes. The course will also examine the current process of urbanisation in Asia and Africa in the various special contexts of different regions and countries, drawing from lessons of the past as experienced in Latin America and parts of the developed world.

Teaching: 20 hours of lectures and 20 hours of seminars in the WT.

The first three weeks of seminars will involve a review of basic statistical methods to help prepare students for class and lecture material.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Indicative reading: Duranton G. (2008), 'Viewpoint: From cities to productivity and growth in developing countries', Canadian Journal of Economics, Vol. 41, No. 3, 689-736

Muralidharan, K., & Prakash, N. (2017). Cycling to school: Increasing secondary school enrollment for girls in India. American Economic Journal: Applied Economics, 9(3), 321-350.

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Presentation (30%) in the WT.

GY403 Half Unit

Contemporary Debates in Human Geography

This information is for the 2024/25 session.

Teacher responsible: Dr Austin Zeiderman and Dr Ryan Centner

Availability: This course is compulsory on the MPhil/PhD in Human Geography and Urban Studies and MSc in Human Geography and Urban Studies (Research). This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

Compulsary for MPhil/PhD Human Geography and Urban students without MSc Human Geography and Urban Studies.

Course content: This is a reading-intensive seminar focused on grasping contemporary debates in human geography and urban studies. Given the diversity of topic, approach, and style involved in geographical research and writing, it is impossible to provide a comprehensive overview in just ten sessions. Instead, we will read and discuss texts that expose a breadth of interests and modes of human-geographical scholarship, aiming to achieve theoretical understanding while considering how the ideas involved inform empirical research. Together, we will focus on some of the most pressing concerns and lively conversations in the discipline, as well as identify the points of tension and differences of position between them. We will pay attention not only to what scholars in human geography and urban studies are talking about, but how, why, and what is at stake. The essay that students write should help them situate their research interests and understand how they might contribute to wider bodies of scholarship.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of interactive lectures across Autumn Term and Winter Term.

This course includes a reading week in Week 6 of Autumn Term and Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the ST.

Indicative reading: Readings focused on in this course will vary from year to year.

Assessment: Essay (100%, 4000 words) in the ST.

GY404 Half Unit

Inclusive Growth

This information is for the 2024/25 session.

Teacher responsible: Prof Neil Lee

Availability: This course is available on the MPhil/PhD in Economic Geography, MSc in Geographic Data Science, MSc in Local Economic Development and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students from across LSE have done well in GY404, but a good background in economic geography, economics, public policy, social policy or political science helps.

Course content: Policymakers globally face two linked challenges. First, they need to achieve economic growth. Development has stalled across much of the advanced world, many countries are stuck in middle-income traps, and growth has been highly uneven in the 'developing' world. But alongside this they need to ensure this growth translates into shared prosperity. Many countries have

seen growing inequality. Where countries have achieved growth, this as too often failed to benefit workers. People's lives are shaped by the economies of where they live, so to meet these challenges will require place based solutions from both national and local government.

GY404 is a policy focused course looking at the intersection of economic change, place, and inclusive growth. We will consider two basic questions: Can economic development be made inclusive? And, if so, how? To help answer these questions we will engage with some key themes. These include the economics of technological change and implications for both developed and less developed economies, the relationship between innovation and inequality, the creation of 'good jobs', entrepreneurship, finance and microfinance as tools for poverty reduction, and the logics of place based industrial policy

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered via a series of seminars in Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: GY404 is a highly interactive course where students undertake simulations based on case studies and policy activities. Students are expected to present, debate, and participate actively in seminars.

Indicative reading: Lee, N. 2024. Innovation for the masses: How to share the benefits of the tech economy. University of California Press.

OECD. 2014. All on board: Making inclusive growth happen. OECD.
Moretti, E. 2013. The New Geography of Jobs. Harcourt Mifflin.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

GY409 Half Unit

Globalisation and territorial development: Theory, Evidence and Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Michael Storper

Availability: This course is available on the MPhil/PhD in Economic Geography, MSc in City Design and Social Science, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: The economic geography of globalization, and examination of some of the principal effects of globalization on economic development of cities, regions and nations. Theories of regional economic development, location, and trade are applied to the contemporary process known as "globalization", and used to decipher this phenomenon and its effects on development, employment, and political institutions. A number of major issues for regional and industrial policy are considered, including trade, convergence/divergence, corporate power, knowledge and technology, governance, and inter-place competition.

Teaching: This course is delivered through a combination of lectures and workshops across Autumn Term. This course includes a reading week in Week 6

Formative coursework: Students will be expected to participate in group work in the workshop sessions that take place every two weeks, using a combination of written presentations with written presentation slides, interactive games, and other methods used.

Indicative reading: P Aghion; J G Williamson, Growth, Inequality and Globalization, Cambridge University Press, 1998;
S Brakman, H Garretsen; C van Marrewijk, The New Introduction to Geographical Economics, Cambridge University Press, 2009;

J H Dunning (Ed), Regions, Globalization and the Knowledge-Based Economy, Oxford University Press, 2000;
P Krugman; M Obstfeld, International Economics: Theory and Policy, Harper-Collins, 1991; A Scott (Ed), Global City Regions, Oxford University Press, 2000;
M Storper, The Regional World: Territorial Development in a Global Economy, Guilford Press, 1997.

A number of more specialised texts will be recommended at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

The exam is organised as a set of essay questions that reflect the content of lectures and readings in the course. Students are offered a choice of questions from which to select. The questions are generally offered in two or three groups, where students will select one question from each group of offered questions.

GY410 Half Unit

Economics of Local and Regional Development

This information is for the 2024/25 session.

Teacher responsible: Prof Riccardo Crescenzi CKK 4.28

Availability: This course is available on the MPhil/PhD in Economic Geography, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: Why do some regions and territories perform systematically better than others in terms of economic development and wealth? What are the key drivers of local and regional economic performance? How can local and regional economic development policies boost economic activity and improve socio-economic conditions in disadvantaged areas? Technological change, evolving geo-political conditions and new patterns of economic integration have challenged the 'traditional' answers to these questions and call for new analytical and policy tools. This course provides students with an in-depth understanding of the economic determinants of regional and local economic development and of the policies influencing these drivers. After examining the existing disparities in regional economic performance between and within a number of advanced, emerging and developing countries, the course illustrates the scope and justification for government intervention in this area. Various theories and approaches to local and regional economic development, leading to different policy prescriptions, are analysed in order to identify different regional and local determinants of economic performance (from innovation and human capital to Foreign Direct Investment (FDI), Global Value Chains (GVCs) and

global connectivity). In particular, the course dwells on the regional policy of the European Union (EU) - one of the most important large-scale regional policy experiences - in order to discuss the practical pros and cons of existing policy tools and illustrate the benefits of a 'balanced' approach to the analysis, design, management and implementation of regional and local economic development policies in the context of digital and green transitions. Special attention will also be devoted to the cases of the United States, China and India in a comparative perspective.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT.

Indicative reading: R Capello, *Regional Economics* 2nd Edition, Routledge, 2016; R Crescenzi & O Harman O, *Harnessing Global Value Chains for Regional Development*, Routledge, 2023; R Crescenzi & A Rodríguez-Pose *Innovation and Regional Growth in the European Union*, Springer, 2011; C Jones, *Introduction to Economic Growth* 2nd edition, W. W. Norton & Company 2006; P McCann *Urban and Regional Economics*, OUP 2001; A Pike, A Rodríguez-Pose & J Tomaney, *Local and regional development* 2nd Edition, Routledge, 2017.

A number of more specialized texts will be recommended at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

GY413 Half Unit Regional Development and Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Andres Rodriguez-Pose

Availability: This course is available on the MPhil/PhD in Economic Geography, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Inequalities and Social Science, MSc in Local Economic Development, MSc in Public Policy and Administration, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Pre-requisites: A good background is required in one of the fields of management, economics, economic geography, development, regional and urban studies.

Course content: This course deals with the management and institutions of local and regional economic development. It dwells on the socio-economic implications of the emergence of local and regional governments and institutions as key actors in the design and implementation of economic development strategies across the world. In particular, the first section of the course analyses the consequences for economic efficiency and equality of the gradual but relentless shift of development responsibilities from the national and the supranational to the local and regional scale, linked of political and fiscal decentralisation. The second section of the course focuses, from a theoretical and empirical perspective, on the strategies being implemented by subnational governments across the world in order to cope and redress development problems. Strategies based on the building of infrastructure, the attraction of foreign direct investment,

the support to local production and the promotion of local human resources are analysed in different institutional and governance contexts. The course draws on examples from Europe, the US, Latin America, and Asia.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to participate in group debates throughout the course, with written presentation slides required. Feedback is provided in the sessions.

Indicative reading: N Brenner, *New state spaces: Urban governance and the rescaling of statehood*, Oxford University Press, 2004; P Dicken, *Global Shift: Mapping the Changing Contours of the World Economy* (7th edition), Sage, 2021; J D Donahue, *Disunited States*, Harper Collins, 1997; R Kanbur and A J Venables, *Spatial inequality and development*, Oxford University Press, 2005; P. McCann, *The UK regional-national economic problem: Geography, globalisation and governance*, Routledge, 2016; A Pike, A Rodríguez-Pose and J Tomaney, *Local and regional development* (2nd edition), Routledge, 2017; A Pike, A Rodríguez-Pose & J Tomaney, *Handbook of Local and Regional Development*, Routledge, 2011; R J Putnam, *Bowling alone: The collapse and revival of American community*, Simon & Schuster, 2000; A J Scott, ed., *Global city-regions*, Oxford University Press, 2001; J Rodden, *Why Cities Lose: The Deep Roots of the Urban-Rural Political Divide*, Basic Books, 2019; M Storper, *The Regional World: Territorial Development in a Global Economy*, Guilford Press, 1997. A number of more specialised texts will be recommended at the beginning of the course; M Storper, *Keys to the city: How economics, institutions, social interaction, and politics shape development*, Princeton University Press, 2013.

Assessment: Take-home assessment (100%) in the ST.

GY415 Half Unit Local Capacity and Economic Development Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Carolin Hulke

Availability: This course is available on the MSc in Geographic Data Science, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is not available as an outside option.

Course content: This course adopts a critical perspective to explore the micro-foundations of local economic development in the Global South embedded in a globalised economy with a special focus on multi-level actors and their agency as changemakers. It delves into the determinants, consequences, and power dynamics underlying the behaviour, strategies, and decisions of key economic players on the global, regional, national and local level. These actors encompass a diverse spectrum, including local firms of varying sizes, multinational enterprises, research institutions, government bodies, international organisations, non-governmental organizations (NGOs), civil society and local communities with a range of degrees of formality and informality. The study of different actors on multiple levels, and their interactions and linkages, will help building up the analytical framework to interpret the genesis of localised economic systems, their dynamics and evolution over time, and the policy options, particularly, from a bottom-up perspective of regions located in the Global South. The course will interactively tackle the following, non-exhaustive, set of policy-relevant questions:

- How can we critically engage with the concept and implementation of LED in diverse places of the Global South, especially given our contemporary capitalist global economy?

- Which are the central and marginal actors in LED?
- What are major bottlenecks and pitfalls in designing and implementing LED strategies successfully based on local capacities?

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of workshops and lectures across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Policy Brief outline to be submitted by week 5 and group presentations on case studies in different weeks of AT: written feedback will be provided on all formative coursework in order to help prepare for the assessed Policy Brief.

Indicative reading: The course is mainly based on academic articles and papers, all available through @reading list. Some chapters will also be used from books such as: A. Pike, A. Rodriguez-Pose & J. Tomaney, Local and Regional Development, 2006; B-A. Lundvall, KJ Joseph, C. Chaminade & J. Vang (eds.), Handbook of Innovation Systems and Developing Countries, 2009; J Cantwell & E Amann (eds.), Innovative Firms in Emerging Market Countries, 2012; S Iammarino & P McCann Multinationals and Economic Geography. Location, Technology and Innovation, 2013. In general, all readings are electronically available from the LSE Library unless otherwise indicated.

Assessment: Policy brief (100%) in the AT.

A 2,500 word Policy Brief is due in the week after the end of AT.

GY426

Environmental and Resource Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Sefi Roth

Prof. Hendrik Wolff

Dr Eugenie Dugoua

Dr Frank Venmans

Availability: This course is compulsory on the MSc in Environmental Economics and Climate Change and MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University). This course is available on the MPhil/PhD in Environmental Economics, MSc in Econometrics and Mathematical Economics, MSc in Economics, MSc in Economics (2 Year Programme) and MSc in Geographic Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Pre-requisites: A background in economics and calculus is highly desirable.

Course content: Environmental and resource economics is at the forefront of the response to local, national and global environmental problems. As such, it has become an essential part of the thinking and actions of national and regional governments, as well as international agencies and organizations. This course seeks to develop a rigorous treatment of the theory of environmental and natural resource economics, and to show how formal economic thinking can assist real world policymaking in areas such as climate change, ecosystem & biodiversity conservation and water resource management.

The course consists of four components which cluster together the principal areas of interest and research in environmental and natural resource economics:

PART I: Environmental Economics and Pollution Control

PART II: Behavioural Economics, Evaluation and the Environment

PART III: The Economics of Natural Resources: Efficiency,

Optimality and Sustainability

PART IV: Economics of Climate Change and Low-Carbon Transitions

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures Autumn Term and Winter Term.

This course includes a reading week in Week 6 of Autumn Term and Week 6 of Winter Term.

Formative coursework: Students will be required to solve problems sets that will be solved collaboratively during class sessions.

Indicative reading: Detailed reading lists will be provided to support each course component. The following texts will be particularly useful:

Autumn Term:

- Kolstad, C., Environmental Economics, Oxford: Oxford University Press, (2000).
- L. Perman, R., Y. Ma, J. McGilvray and M. Common, Natural Resource and Environmental Economics, Pearson Addison Wesley, Fourth Edition (2011), and Third Edition (2003)
- Bondy M, Roth S, and Sager, L. (2020) Crime Is in the Air: The Contemporaneous Relationship between Air Pollution and Crime, Journal of the Association of Environmental and Resource Economists 7:3, 555-585
- Dugoua E (2019) International Environmental Agreements and Directed Technological Change: Evidence from the Ozone Regime. Working Paper available at http://eugeniedugoua.com/papers/Dugoua2018_Montreal_Innovation.pdf

Winter Term:

- Conrad, J., Resource Economics, Cambridge: Cambridge University Press, (2005);
- L. Perman, et al., Natural Resource and Environmental Economics, Pearson Addison Wesley, Fourth Edition (2011), and Third Edition (2003);
- Arrow et al. (2013). Determining Benefits and Costs for Future Generations. Science 26 Jul 2013:Vol. 341, Issue 6144, pp. 349-350.

Assessment: Assessment path 1

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Assessment path 2

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Essay (50%, 6000 words) in the ST.

Assessment Pathway 1: For all students NOT enrolled on MSc Economics or MSc Econometrics and Mathematical Economics

Assessment Pathway 2: For MSc Economics and MSc Econometrics and Mathematical Economics students only.

GY427 Half Unit

Climate Change: Science, Economics and Policy

This information is for the 2024/25 session.

Teacher responsible: Professor Simon Dietz

Availability: This course is compulsory on the MSc in Environmental Economics and Climate Change and MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University). This course is available on the MSc in Environment and Development, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University) and MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. Priority will be given to students on the MSc in Environment and Development, and the MSc in Environmental Policy and Regulation, then students on other programmes within the Department of Geography and Environment. For further details, please contact your relevant Programme Coordinator.

Course content: A comprehensive guide to the issue of climate change, from fundamental concepts in climate science, through estimating the future impacts of climate change on economies and societies, to cutting greenhouse gas emissions by using economic instruments such as carbon trading. Interdisciplinary, but with an emphasis on economic analysis, albeit taught in a non-technical style.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through interactive lectures across the Winter Term.

This course includes a reading week in Week 6 of the Winter term.

Formative coursework: Students will carry out regular assignments.

Indicative reading: Detailed reading lists will be provided to support each course component.

Assessment: Take-home assessment (100%) in the ST.

GY428 Half Unit Applied Quantitative Methods

This information is for the 2024/25 session.

Teacher responsible: Dr Stephen Jarvis
Prof. Hendrik Wolff

Availability: This course is compulsory on the MSc in Environmental Economics and Climate Change and MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University). This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Regional and Urban Planning Studies, MSc in Geographic Data Science, MSc in Local Economic Development and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Pre-requisites: A background in undergraduate statistics or, preferably, econometrics is required

Course content: This course will provide an introduction to quantitative methods in use in modern environmental and resource economics. Emphasis will be placed on the practical use of empirical tools. This applied focus will be complemented by the investigation of assumptions and proofs that can improve the understanding of empirical results. Students will apply the methods taught using statistical/econometric software and data documenting some topical public policy questions. These applications will take place in ten seminars of one hour each. During the seminars the students will gain understanding of the statistical programming language R. Throughout the course, examples from relevant and topical empirical papers published in the area of applied econometrics and environmental economics will be critically discussed. The module will focus on linear regression methods, with an emphasis on their use for causal inference. The first part of the course will cover the standard linear regression model, its assumptions, violations and testing procedures. Functional forms and non-linear models will also

be discussed. The latter part of the course will cover a range of important estimation approaches, including fixed effects with panel data, difference-in-differences, instrumental variables and regression discontinuity designs. The course will conclude with a more general discussion of how these tools can be used in research and policy analysis.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes and lectures across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: There will be an opportunity to get feedback on one or more of the problem sets assigned during the AT.

Indicative reading: Detailed reading lists will be provided to support each course component, but the following texts will be particularly useful:

- Stock J.H. and M.W. Watson (2019). Introduction to Econometrics. Fourth Edition Pearson International Edition;
- J. Wooldridge (2006), Introductory Econometrics: A Modern Approach, Thomson;
- Angrist J and Pischke J.S. (2014) Mastering 'Metrics, Princeton.
- Angrist J and Pischke J.S. (2009) Mostly Harmless Econometrics, Princeton.
- Cunningham S. (2021) Causal Inference The Mixtape, Yale.

Assessment: Exam (70%, duration: 2 hours) in the January exam period.

Coursework (30%) in the AT.

The coursework assessment will take the form of problem sets or exercises that recap on some of the most important topics.

GY431 Half Unit Not available in 2024/25 Cities, People and Poverty in the South

This information is for the 2024/25 session.

Teacher responsible: Laura Antona

Availability: This course is available on the MSc in City Design and Social Science, MSc in Development Management, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Health and International Development, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Experience and/or knowledge of development and/or urbanisation in the South would be a distinct advantage

Course content: The course examines the patterns, processes and implications of urbanisation in developing societies (with an emphasis on the Middle East region), and with particular reference to the survival and well-being of low-income groups. The conceptual and empirical focus of the course revolves around strategies adopted at individual household and community levels to ensure sustainable livelihoods, and the interrelations of grassroots processes with policy interventions on the part of governments, international development agencies and NGOs. Specific themes include: trends in urban development in the 20th and 21st centuries; the conceptualisation and measurement of poverty and the urban; the 'urbanisation' of poverty; poverty reduction strategies by international organisations; intersectionality; urban informality; urbanisation of violence and conflict; and urban social movements.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of seminars,

pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Michaelmas Term.

This course includes a reading week in Week 6 of Michaelmas.

Formative coursework: Students will be expected to produce one formative essay during the course, as well as to prepare seminar presentations (usually in pairs), and to be actively involved in seminar discussions, including as discussants and rapporteurs.

Indicative reading: Detailed reading lists will be provided during the course. No one book covers the entire course. However, recommended essential reading is as follows: N. Brenner (ed), *Implosions/Explosions: Towards a Study of Planetary Urbanization*, 2014; F. Engles, *The Condition of the Working Class in England*, Oxford, 2009 (1845); S. Parnell and S. Oldfield (Eds), *The Routledge Handbook on Cities of the Global South*, 2014; S. Graham, *Cities Under Siege: The New Military Urbanism*, 2011; A. Mbembe, *Essays on Decolonization: Out of the Dark Night*, 2021; T. Mitchell, *The Rule of Experts: Egypt, Techno-Politics, Modernity*, 2002; Marx and Kelling, *Knowing urban informalities*, *Urban Studies*, 2019, 56, 3; United Nations Sustainable Development Goals: Knowledge Platform.

Assessment: Essay (50%, 2500 words) in the AT.

Essay (50%, 2500 words) in the WT.

GY432 Half Unit Urban Ethnography

This information is for the 2024/25 session.

Teacher responsible: Prof Gareth Jones

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course considers the role of ethnography to how we understand cities. We will look in detail at different types of ethnography, raise issues of methodology, ethics and writing. Specific themes will cover the urban belonging and the neighbourhood; gentrification, hustle, the sensory city; the 'ghetto' and abandonment; street ethnography; time, waiting and hope; bodies and sex; food ethnographies; infrastructure and mobilities; gates and the middle class; gangs, intimacy and violence. The course offers an opportunity to reflect on cities in ways which do not reduce them to arenas for technical, policy-driven interventions, and instead to consider the richness of the urban experience.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a series of seminars across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: A 1,500 word essay or review of readings on a chosen topic from class list.

Indicative reading: There are some useful Readers on urban ethnography such as:

- M. Duneier et al., *The Urban Ethnography Reader*, 2014;
- S. Low, *Spatializing Culture: The Ethnography of Space and Place*, 2016;
- The course is based on key ethnographies supplemented by articles.
- J.S. Anjaria, *The Slow Boil: street food, rights, and public space in Mumbai*, 2016;

- J. Auyero, *The Patients of the State: the politics of waiting in Argentina*, 2012;
- T. Belmonte, *The Broken Fountain*, 2005;
- P. Bourgois, *In Search of Respect: selling crack in El Barrio*, 2003;
- P. Bourgois and J. Schonberg, *Righteous Dopefiend*, 2009;
- M. Di Nunzio, *The Act of Living: Street Life, Marginality, and Development in Urban Ethiopia*, 2019;
- C. Freeman, *Entrepreneurial Selves: neoliberal respectability and the making of a Caribbean middle-class*, 2014;
- H. Garth, *Food in Cuba: the pursuit of a decent meal*, 2020;
- A. Goffman, *1600 on the Run: Fugitive Life in an American City*, 2012;
- R. Heiman, *Driving after Class: anxious times in an American suburb*, 2017;
- K.K. Hoang, *Dealing in Desire Asian Ascendancy, Western Decline, and the Hidden Currencies of Global Sex Work*, 2015;
- C. Jeffrey, *Timepass: youth, class the politics of waiting in India*, 2010;
- C. Melly, *Bottleneck: moving, building and belonging in an African City*, 2017;
- B. O'Neill, *The Space of Boredom: Homelessness in the Slowing Global Order*, 2017;
- L. Ralph, *Renegade dreams: living through injury in gangland Chicago*, 2014;
- A.M. Reese, *Black Food Geographies: race, self-reliance, and food access in Washington DC*, 2019;
- F. Stuart, *Down, out, and under arrest: Policing and everyday life in Skid Row*, 2016;
- S. Venkatesh, *Gang Leader for a Day*, 2008;
- J. Zhang, *Driving toward modernity: cars and the lives of the middle class in contemporary China*, 2019;
- T. Zheng, *Red lights: The lives of sex workers in postsocialist China*, 2009.

Assessment: Essay (100%, 5000 words) in the ST.

GY438 Half Unit Not available in 2024/25 Urban Asia: Cities and Social Change

This information is for the 2024/25 session.

Teacher responsible: Prof Hyun Shin

Availability: This course is available on the CEMS Exchange, MA in Asian and International History (LSE and NUS), MBA Exchange, MSc in China in Comparative Perspective, MSc in City Design and Social Science, MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in International and Asian History, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

The number of students able to be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator

Course content: This is an interdisciplinary urban course that encourages students to develop a critical understanding of how urban space is transformed in diverse social, economic and political settings, and what social implications are made upon the powerless and the poor. Examining the process of socio-spatial transformation in times of condensed urbanisation and economic development, this course makes use of Asia as an empirical site to unsettle Western notions of urban development. Various examples of urban policies and practices will be drawn from cities across East and Southeast Asia, with emphasis on newly industrialised capitalist economies as well as transitional economies such as mainland China.

Focusing on urban questions in particular, the course comprises of lectures and seminars on the following themes:

- the political economy of urbanisation;
- the politics of land;
- global gentrifications;
- displacement and dispossession;
- cities of spectacle and mega-events;
- urban social movements

Students will also have opportunities to view and discuss various sources of audiovisual materials and documentaries related to these themes.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars, workshops and lectures across Lent Term.

This course includes a reading week in Week 6 of Lent Term.

Formative coursework: Students are expected to complete one essay plan for their assessed essay and blog.

Indicative reading: Chen, Y.-L. and Shin, H.B. (eds.) *Neoliberal Urbanism, Contested Cities and Housing in Asia*. Palgrave Macmillan;

Assessment: Coursework (30%, 1500 words) and essay (60%, 3000 words) in the ST.

Class participation (10%) in the WT.

Coursework (30%) refers to a blog piece. Students are to submit regular reading responses via Moodle as part of class

participation. Further details will be included in the course guide.

GY439 Half Unit Not available in 2024/25 Cities, Politics and Citizenship

This information is for the 2024/25 session.

Teacher responsible: Dr Murray Low STC.S.512

Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Perspectives on contemporary urban politics.

The course will equip students interested in urban change and development to understand and critically assess the variety of ways in which urban politics and policies are imagined and discussed in universities as well as in the world of policy. It will also develop their understandings of key debates and themes in contemporary urban political life.

Topics covered will include: imagining urban politics; theories of urban politics, 'globalisation' and urban political life; urban governance; civil society and urban social movements; urban dimensions of citizenship and migration; policing, violence and urban politics; urban politics and 'neoliberalism.'

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through interactive seminars across Winter Term

This course includes a reading week in Week 6 of Winter Term

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Indicative reading: J Borja and M Castell, *Local and Global*, 1997; J Davies and D

Imbroscio, eds., *Theories of Urban Politics* (2nd Edition), 2009; M Douglass and J Friedmann, eds., *Cities for Citizens*, 1998; D Judge, G Stoker and H Wolman, eds, *Theories of Urban Politics*, 1995; P Le Galegrave;s, *European Cities*, 2002; L Sandercock, *Towards Cosmopolis*, 1998; S. Sassen

Territory, Authority, Rights, 2006; M P Smith, *Translocal Urbanism*, 2001.

Assessment: Take-home assessment (100%) in the ST.

GY441 Half Unit The Politics of Housing

This information is for the 2024/25 session.

Teacher responsible: Dr Romola Sanyal

Availability: This course is available on the MSc in City Design and Social Science, MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to examine the politics of housing from a transnational and comparative perspective. The course will link the empirical analyses on housing to theoretical discussions on class, community, gender, ethnicity and design. It will analyse housing issues ranging from informality, homelessness and gated communities to housing tenure,

Some of the themes covered in this course include: Traditional Housing, Communities, Gender and Housing, Race and Ethnicity and Housing, Homelessness, Housing and Emergencies etc.

This course includes a reading week in Week 6 of Winter Term.

One 1500 word essay and 4 one page reading responses

- Grewal, I. (1996) *Home and Harem: Nation, Gender, Empire and the Cultures of Travel*. Durham: Duke University Press
- Caldeira, Teresa. (2001) *City of Walls: Crime, Segregation and Citizenship in Sao Paulo*. Berkeley: University of California Press.
- Gowan, T. (2010) *Hobos, Hustlers, and Backsliders: Homeless in San Francisco*. Minneapolis: University of Minnesota Press.
- Gottesdiener, L (2013) *A Dream Foreclosed: Black America and the Fight for a Place to Call Home*. Westfield: Zuccotti Park Press

- Smart, A. (2006) *The Shek Kip Mei Myth: Squatters, Fires and Colonial Rule in Hong Kong, 1950-1963*. Hong Kong University Press.

Assessment: Essay (70%, 3000 words) in the ST.
Presentation (30%) in the WT.

This information is for the 2024/25 session.

Availability: This course is available on the MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: A critical examination of the issues involved in planning for sustainable development at the urban level together with a review of policies and practice; the course focus largely on the problems facing developed countries. The course comprises ten lectures covering issues of physical, economic and social measures to promote sustainability alongside understandings of how this may be measured in an urban context.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and

This course includes a reading week in Week 6 of Autumn Term.

Indicative reading: Detailed reading on specific policy areas will be provided.: J Agyeman & B Evans (Eds), *Local Environmental Policies and Strategies*, 1994; S. Wheeler. *Planning for Sustainability: Creating livable, equitable, and ecological communities*, 2004; Y. Rydin, *Governing for Sustainable Urban Development*, 2010; S. Davoudi, J. Crawford and A. Mehmood (Eds), *Planning for Climate Change: Strategies for Mitigation and Adaptation for Spatial Planners*, 2009.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

This information is for the 2024/25 session.

Availability: This course is compulsory on the MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available on the CEMS Exchange, MBA Exchange, MPhil/PhD in Economic Geography, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulation permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator

Pre-requisites: Students should normally have completed an introductory course in economics or attend the pre-session GY447 sessions and classes to obtain a minimal familiarity with the content.

Course content: The course aims to provide an economic framework in which to analyse the structure of economic activity within the urban and regional context; the impact of this structure on urban form; the role of government at the local level and local economic policy applications. Topics include: The determinants of industrial, commercial and residential location. The interaction between activities within a spatial context. The economics of land markets and of the development process. The determinants of rents and densities. Economic models of urban structure. Sources of market failure in the urban economy. The rationale of government intervention. Techniques of intervention in the urban and environmental context. The role of the public sector: pricing, allocation, production and investment decisions. Urban and regional economic policy issues.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/ seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Autumn Term only.

The course will also feature a pre-sessional element in week 0 of Autumn Term and a reading week in Week 6 of Autumn Term.

Formative coursework: A 1 hour, in person formative exam will be carried out during Winter Term.

Indicative reading: 1) A O'Sullivan Urban Economics;

2) J Brueckner, Lectures in Urban Economics

3) J F McDonald and Daniel P. McMillen, Urban Economics and Real Estate;

4) J Stiglitz, Economics of the Public Sector;

5) Pindyck & Rubinfeld Microeconomics, Suslow & Hamilton Study Guide.

6) D DiPasquale & W C Wheaton, Urban Economics and Real Estate Markets;

More detailed readings will be provided during the course.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

GY448 Half Unit Social and Political Aspects of Planning

This information is for the 2024/25 session.

Teacher responsible: Dr Alan Mace

Availability: This course is compulsory on the MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available on the MSc in City Design and Social Science, MSc in Geographic Data Science and MSc in Human Geography and Urban Studies (Research). This course is available as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator.

Course content: The course seeks to bring into conversation with one another the theory and practice of urban planning. Planning is understood as a discursive practice where issues are framed and policy is generated through multiple parties employing both data and lived experience. We therefore focus on how planning processes are deeply embedded in the social. Rather than offering training in particular planning tools such as impact assessments, which vary from setting to setting, the course provides you with skills to critique planning practices. You will look at key planning ideas such as the neighbourhood, community and participation. We consider the implications for practice of the increasing complexity of planning both within and across jurisdictions including sub-regions and regions. In the latter weeks we bring various aspects of the course together through case studies of different planning practices in various national settings. The course is primarily focused on planning in the global north as it draws on our practice and research experience, but examples are included from the global south.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will submit a timed assignment of 1,000 words in preparation for the summative exam.

Indicative reading:

- Friedmann, J., 2011. *Insurgencies: Essays in Planning Theory*, Routledge.
- Joss, S. 2015. *Sustainable Cities; Governing for Urban Innovation*. Palgrave.
- Sanyal, B., Lawrence, J.V and Rosan C.D.R. 2012. *Planning Ideas That Matter*. MIT Press.

Once on the course, all key readings are available online being either journal articles or electronic book chapters.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

GY449 Half Unit Urban Futures

This information is for the 2024/25 session.

Teacher responsible: Dr Austin Zeiderman

Availability: This course is available on the MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is strictly capped at 30. Students are required to apply through Graduate Course Choice on LSE for You by providing a short written statement of why they are interested in taking the course (this includes students on Geography and Environment MSc programmes). If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. Priority will be given to students on the MSc programmes listed above. For further details, please contact your relevant Programme Coordinator.

Pre-requisites: This course assumes that students already have a background in the social sciences and/or humanities as well as in urban studies. Exceptions will be made for students who can show that they are suitably qualified.

Course content: By now we are accustomed to hearing that, for the first time in history, the majority of the world's population lives in cities. We may also be aware that more than one billion people now live in the urban slums and shantytowns of the global South, and that this is where the majority of world population growth will take place. But what sort of futures are being imagined for the cities of the twenty-first century? In response to this question, GY449 Urban Futures will critically analyze how the future of cities, and the cities of the future, have been thought about and acted upon in different times and places. Students will learn to adopt a geographical and historical approach to urban futures by exploring how ways of envisioning the future of cities differ across time and space. Treating the future as a social, cultural, and political reality with a profound influence on the present, the course will examine how urban areas are planned, built, governed, and inhabited in anticipation of the city yet to come. Each week will be organised around a particular model for the future of the city: the ideal city, the dystopian city, the modernist city, the colonial city, the capitalist city, the socialist city, the organic city, the global city, and the secure city. These models will be examined through concrete examples and will enable the discussion of broader theoretical perspectives in urban studies, with a specific focus on the critical analysis of urban futures. Though grounded in urban geography, this course will draw upon texts and other materials from anthropology, sociology, history, cultural studies, literature, film, philosophy, social theory, architecture, art, and city planning. Its primary objective is to equip students with sophisticated, critical ways of thinking about the future of cities, since doing so has real significance for the kind of city we want to, and eventually will, ourselves inhabit.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through weekly interactive seminars across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to participate actively in seminar discussions throughout the course, with occasional presentations and discussion leadership roles required. Feedback will be provided in the sessions.

Indicative reading: This is a reading-intensive course and each session will be dedicated to in-depth discussions of book-length studies. A detailed reading list will be provided at the beginning of the course, but will include works such as: Jaime Amparo Alves, *The Anti-Black City: Police Terror and Black Urban Life in Brazil* (2018); Filip De Boeck and Sammy Balaji, *Suturing the City: Living Together in Congo's Urban Worlds* (2016); Hiba Bou Akar, *For the*

War Yet to Come: Planning Beirut's Frontiers (2018); Gökçe Günel, Spaceship in the Desert: Energy, Climate Change, and Urban Design in Abu Dhabi (2019); Erik Harms, Luxury and Rubble: Civility and Dispossession in the New Saigon (2016); Danny Hoffman, Monrovia Modern: Urban Form and Political Imagination in Liberia (2017); Natalie Oswin, Global City Futures: Desire and Development in Singapore (2019); Christina Schwenkel, Building Socialism: The Afterlife of East German Architecture in Urban Vietnam (2020); Keeanga-Yamattha Taylor, Race for Profit: How Banks and the Real Estate Industry Undermined Black Homeownership (2019).

Assessment: Essay (100%) in the WT.

Details will be discussed during class and guidelines will be provided on Moodle.

GY450

Planning Practice and Research

This information is for the 2024/25 session.

Teacher responsible: Dr Nancy Holman and Dr Alan Mace

Availability: This course is compulsory on the MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to provide students with an understanding of the current planning issues faced by practitioners and their policy responses. This will begin with an introduction to the planning context of London and an overview of the British planning system. This will be followed by weekly sessions with invited speakers involved in planning practice and research. They will be engaged in relevant current research or be practicing planners or policy-makers from central or local government, research agencies or consultancy. The content will consist of a series of guided walks, lectures and seminars covering issues of current concern and debate within urban and regional policy and planning.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is normally delivered through a combination of events, field trips and walks across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Assessment: There is no Assessment in this course but the content will be relevant to the assessed courses in the MSc Regional and Urban Planning Studies Programme.

GY452 Half Unit

Urban Research Methods

This information is for the 2024/25 session.

Teacher responsible: Prof Hyun Shin CKK.3.17

Additional teacher(s): Professor Neil Lee; Prof Gareth Jones; Professor Claire Mercer; Dr Romola Sanyal; Dr Jessie Speer; Dr Austin Zeiderman; A.N.Other

Availability: This course is compulsory on the MSc in Urbanisation and Development. This course is available on the MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research) and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available on the MSc in Urban Policy (LSE and Sciences Po) for those students who choose the MSc in Urbanisation and Development track for their Year 2 studies.

Course content: The course aims to introduce students to the key methods that are frequently mobilised to carry out research on

urbanising societies around the world. Additionally, the course is to help students think more systematically about methodological considerations in order to execute a successful dissertation research. Below is an indicative list of themes that are normally covered in the course:

- Designing an urban research project and ethics
- Comparative (case) studies
- Working with archives
- Interviews and focus groups
- Conducting ethnography
- Quantitative data and questionnaires
- Analysis and write-up

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Flyvbjerg, B. (2001) Making social science matter: Why social inquiry fails and how it can succeed again. Cambridge: Cambridge University Press

Hay, I. (ed.) (2010) Qualitative Research Methods in Human Geography. 3rd edition. Oxford: Oxford University Press

Heimer, M. and Thøgersen, S. (eds.) (2006) Doing fieldwork in China. Copenhagen: NIAS Press

Hennink, M. et al (2011) Qualitative Research Methods. London; Thousand Oaks, CA: SAGE

Sayer, A. (1992) Method in social science: A realist approach. London: Routledge

Ward, K. (ed.) (2012) Researching the city: a guide for students. London: Sage

Assessment: Essay (70%, 2500 words) and research proposal (30%) in the ST.

GY454 Half Unit

Urban Policy and Planning

This information is for the 2024/25 session.

Teacher responsible: Dr Nancy Holman

Availability: This course is compulsory on the MSc in Regional And Urban Planning Studies and MSc in Urban Policy (LSE and Sciences Po). This course is available on the MSc in Geographic Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Pre-requisites: Students must have completed Social and Political Aspects of Planning (GY448).

Course content: The course provides a synthesised approach to the analysis of urban policy-making and plan formulation. It will explore the way in which economic, political and social forces interact to effect policy approaches in different spatial settings. We will cover urban regeneration policy and community development as they relate to neighbourhood planning. The aim is also to gain an understanding of the causes of similarity and difference in policy approaches. Students will undertake a group research project based on a London neighbourhood including an assessment of local planning policy.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and

lectures across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 1 presentation in the WT.

Indicative reading: Urban Task Force, Urban Renaissance; DETR, Our Towns and Cities: The future; R Atkinson ; G Moon, Urban Policy in Britain; P Hall ; C Ward, Sociable Cities; E Blakely ; M Snyder, Fortress America; D Judd ; S Fainstein, The Tourist City; J Mannigan, Fantasy City; T Hall ; P Hubbard, The Entrepreneurial City.

Assessment: Essay (80%, 3000 words).

Presentation (20%) in the WT.

A 3,000 word essay linked to a planning brief.

A group presentation linked to a planning brief.

GY455 Half Unit Economic Appraisal and Valuation

This information is for the 2024/25 session.

Teacher responsible: Prof Giles Atkinson and Dr Stephen Jarvis

Availability: This course is available on the MSc in City Design and Social Science, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University), MSc in Geographic Data Science, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator

Course content: This course is concerned with the foundations and practical use of applied economics in the context of project appraisal and policy evaluation. Course content will be drawn from the following. Introduction to economic aspects of project appraisal and cost-benefit analysis. Efficiency, equity and distributional concerns. Measurement of costs and benefits with a specific emphasis on practical methods to value non-market goods and services. The use of appraisal and evaluation in policy processes. The application of project appraisal and policy evaluation methods to policy sectors such as transport, health and the environment. Seminars and lectures will focus on applied case studies and the practical tools involved in the appraisal of projects and policies. Examples particularly from environmental, health, development and transport policy across a range of countries.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course will be delivered through a combination of seminars and lectures across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Indicative reading: Detailed reading lists will be provided to support each course component. Emphasis will be placed on texts, case study material and state-of-the-art contributions to, for example, the literature on non-market valuation. For an overview and introduction to the main issues covered by the course, students may wish to consult the following: G Atkinson and S Mourato, "Cost-Benefit Analysis and the Environment", OECD Environment Working Paper No. 97; G Atkinson et al. (2018) Cost-Benefit Analysis and the Environment: Further Developments and

Uses, 2018; AE Boardman et al, Cost-Benefit Analysis: Concepts and Practice, 2018 (chapters 1 and 2).

Assessment: Essay (100%, 4000 words) in the ST.

A 4000 word essay linked to real-life examples of economic appraisal and valuation

GY457 Applied Urban and Real Estate Economics

This information is for the 2024/25 session.

Teacher responsible: Prof Christian Hilber

Availability: This course is compulsory on the MSc in Real Estate Economics and Finance. This course is available on the MPhil/PhD in Economic Geography and MSc in Geographic Data Science.

This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator.

Pre-requisites: The course assumes that students already have knowledge of economics equivalent to a good first degree in the subject. It is available as an option to students who can show that they are suitably qualified.

Course content: This course aims to provide students with a theoretical and empirical understanding of urban economic processes and price determination in land and real property markets within an institutional context. Examples of topics covered include: the functioning of cities and the urban system; the determinants of urban structure; patterns of urban land use; the determinants of urban growth - theory and evidence; land and real property markets; the impact of land market regulation including the economic impact of land use planning; local public finance and house price capitalisation; real estate cycles; homeownership; housing policies.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across the Autumn and Winter Term

This course includes a reading week in Week 6 of Autumn Term and in week 6 of Winter Term.

Formative coursework: Students can submit up to two essays of up to 1500 words (one per teacher/teaching term). Essay topics are exam questions from the previous year. Submission is voluntary. Upon request, teachers are happy to provide feedback on seminar presentations.

Indicative reading: Detailed reading list will be given out at the beginning of the course. Much of the reading will be journal articles. However, some important items are: J. Brueckner, Lectures on Urban Economics, 2011; P.C. Cheshire, M. Nathan & H. Overman, Urban Economics and Urban Policy: Challenging Conventional Policy Wisdom, 2014; D. DiPasquale & W. Wheaton, Urban Economics and Real Estate Markets, 1996; G. Duranton, V. Henderson & W. Strange, Handbook of Regional and Urban Economics, Vol. V, North Holland, 2015; M. Fujita, Urban Economic Theory: Land Use and City Size, 1989; E.L. Glaeser, Triumph of the City, 2011; Henderson, J.V. and J.F. Thisse, Handbook of Regional and Urban Economics Vol. IV, North Holland, 2004; J.F. McDonald & D.P. McMillen, Urban Economics and Real Estate, Theory and Policy, 2011; B. O'Flaherty, City Economics, 2005; A. O'Sullivan, Urban Economics (9th edn.), 2018.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

GY458 Half Unit

Real Property Market Practice

This information is for the 2024/25 session.

Teacher responsible: Dr Felipe Carozzi CKK.4.27

Availability: This course is compulsory on the MSc in Real Estate Economics and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

It is available by arrangement with the teacher responsible as an option to other students on other programmes who have an appropriate academic background and an interest in real estate markets.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator

Pre-requisites: Background (UG level) in basic statistics is required. Basic or Intermediate courses in econometrics (at the UG level) will be advantageous.

Course content: The course aims to introduce students to the analysis of real estate markets from two separate but related perspectives: that of academic empirical research and that of practitioners and professionals. In doing so, the course introduces students to the types of methods, questions and language that are employed in both fields when investigating the operation of Real Estate Markets. It will also introduce students to the types of data available and provide substantive training in econometrics and data science methods for the analysis of this data. Finally, it provides a stepping stone in the development of skills for applied economics research.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars, workshops and lectures across Autumn Term. This course includes a reading week in Week 6 of Autumn Term and Week 6 of Winter Term.

Indicative reading: There is no course text. Specific readings (papers and textbook chapters) will be provided in class. Readings on econometric methods will be mostly based on the following texts:

- 1) Angrist, J. D., & Pischke, J. S. (2014). *Mastering metrics: The path from cause to effect*. Princeton university press.
- 2) Angrist, J. D., & Pischke, J. S. (2008). *Mostly harmless econometrics*. Princeton university press.
- 3) Wooldridge, J. M. (2015). *Introductory econometrics: A modern approach*. Cengage learning.

Assessment: Essay (100%, 3000 words).

The course is assessed with a 3,000 word research project identifying a research problem in real estate markets on a specific issue (e.g., 'Does Mortgage Credit Supply Affect House Prices in Spain?', 'Are Council Tax Differentials Capitalised into Housing Prices?', 'Which Side of Beijing-Tianjin High-Speed Railway Benefits Most in terms of Housing Prices?') which will require the student to investigate data sources and implement quantitative methods in order to provide a suitable answer. Students should discuss their intended topics with their academic advisors and the teachers responsible.

GY459 Half Unit

Urban Theory and Policy in the Global South

This information is for the 2024/25 session.

Teacher responsible: Dr Laura Antona, Prof Claire Mercer and Prof Gareth Jones CKK 3.21

Availability: This course is compulsory on the MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available on the MSc in Development Management,

MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research) and MSc in Inequalities and Social Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: This course provides a grounding in key debates in urban studies with specific reference to the Global South. It highlights the interconnections between urban theory, research and policy. Anticipated topics include The City and Comparative Urbanism; Critical Urban Theory; Neoliberalism and Financialisation; Urban Governance and Citizenship; Social Life of Cities; Peripheral Urbanism; Housing Cities; Migration and Labour; Urban Exception and Spectacle; Environmentalism and Heat. Lectures will draw from staff research, with particular emphasis on Brazil, Ghana, India, Mexico, Singapore, South Africa and Tanzania.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: A comprehensive reading list mostly focussing on articles will be provided. Useful books include:

- A. Amin & N. Thrift, *Seeing like a City* (2016);
- A. Amin & M. Lancione (eds), *Grammars of the Urban Ground* (2022);
- G. Bhan, *The Routledge Companion to Planning in the Global South* (2017);
- S. Chant & C. McIlwaine, *Cities, Slums and Gender in the Global South* (2016);
- R. de Satge & V. Watson, *Urban Planning in the Global South: conflicting rationalities in contested space* (2019);
- S. Fox & T. Goodfellow, *Cities and Development* (2016);
- E. Glaeser, *Triumph of the City* (2012);
- M. Lancione & C. McFarlane (eds), *Global Urbanism: knowledge, power and the city* (2021);
- C. Lemanski & C. Marx (eds) *The City and Urban Poverty*, (2015);
- F. Mirafab & N. Kudva (eds) *Cities of the Global South Reader*, (2015);
- M. Murray, *The Urbanism of Exception: the dynamics of global-city building in the twenty-first century* (2017);
- S. Parnell & E. Pieterse, *Africa's Urban Revolution* (2014);
- J. Robinson, *Comparative Urbanism: Tactics for Global Urban Studies* (2022);
- R. Rolnik, *Urban Warfare: Housing under the Empire of Finance* (2019);
- P. Sendra & R. Sennett, *Designing Disorder: experiments and disruptions in the city* (2020);
- A. Simone & E. Pieterse, *New urban worlds: Inhabiting dissonant times* (2018).

Assessment: Essay (70%, 3000 words) in the WT.

Presentation (30%) in the AT.

GY460 Half Unit Techniques of Spatial Economic Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Filippo Boeri CKK 4.21

Availability: This course is compulsory on the MSc in Geographic Data Science. This course is available on the MPA in Data Science for Public Policy, MPhil/PhD in Economic Geography, MPhil/PhD in Regional and Urban Planning Studies, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Statistics (Social Statistics), MSc in Statistics (Social Statistics) (Research) and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. Students requesting this course should provide information on their prior econometrics and statistics training and their motivation for study. If the course is over-subscribed, places will be allocated at the Department's discretion based on this information and a waiting list may be created. For further details, please contact your relevant Programme Coordinator

Pre-requisites: Students must have a good understanding of statistics and applied micro-econometrics at an undergraduate level or, for example, have studied Applied Quantitative Methods (GY428) in Autumn term or another course which introduces topics such as instrumental variables and panel data methods. It is advisable to look at the first two key readings listed below before signing up for this course. Students who are comfortable working with computers, data and already have basic familiarity with STATA, R or other statistics/econometrics software will get the most out of this course.

Course content: The aim of the course is to develop the technical tools necessary to understand and analyse spatial economic and social phenomena and to apply quantitative techniques to analyse economic and social problems, processes and policies at the urban and regional scale. The course also uses Geographical Information Systems and other spatial computer applications for research purposes, but you should not expect to get a training in GIS from this course (GY476 provides a complementary GIS course).

Topics include: spatial weights, aggregation and smoothing methods; spatial econometric models and neighbourhood effects; answering causal questions in the spatial context; spatial interaction and discrete choice models; spatial cluster and point pattern analysis; inequality, competition and diversity; structural spatial economic models, applications of machine learning. Not all topics will be covered every year.

Much of the content will be covered by studying and replicating the results of research papers.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of computer practical classes/seminars and lectures across the Winter Term. There are opportunities for support for the second assignment in the ST.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Throughout the term, progress and understanding will be assessed by in-class exercises and quizzes.

Indicative reading: A reading list and outline is available on Moodle. Important readings are Gibbons, S., H.G Overman and E. Patacchini (2015) Spatial Methods, Ch. 3 in Duranton, G, J.V. Henderson and W. Strange (eds) Handbook of Urban and Regional Economics Vol 5a, Elsevier Baum-Snow, N. and F. Ferreira (2015) Causal Inference in Urban Economics, Ch. 1 in Duranton, G, J.V. Henderson and W. Strange (eds) Handbook of Urban and Regional Economics Vol 5a, Elsevier An overview of some topics is provided by: A Fotheringham, C

Brunsdon; M Charlton, Quantitative Geography: Perspectives on Spatial Data Analysis. Sage Publications, 2000.

Assessment: Project (70%, 2800 words) in the ST.

Coursework (30%, 1200 words) in the WT.

Assessment for this course is in two parts:

Exercise testing some of the key learning outcomes, typically a report in the style of a journal referee report providing a critical evaluation of a journal article. Deadline near end of WT. 1200 words. Weighting 30%.

Project proposal, data analysis exercise or other assignment.

Deadline around end of ST. 2800 words. Weighting 70%

GY462 Half Unit Real Estate Finance

This information is for the 2024/25 session.

Teacher responsible: Prof Olmo Silva CKK.4.30

Availability: This course is compulsory on the MSc in Real Estate Economics and Finance. This course is available on the MSc in Accounting and Finance and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

For further details, please contact your relevant Programme Coordinator.

Course content: This course aims to provide students with concepts and techniques for analysing financial decisions in real estate development and investment. Topics include: basic real estate investment analysis and financial leverage; real estate investment performance and portfolio considerations; private equity in real estate, structured investment deals and waterfall analysis; fixed and flexible rate mortgage loans and mortgage payment issues; real estate development and development finance; and current and international trends in real estate (e.g., sustainability issues in real estate investment).

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of classes/seminars and lectures across the Winter Term (plus one revision session in Spring Term).

External interventions by real estate practitioners will be scheduled when feasible.

This course includes a reading week in Week 6 of Winter Term.

Some enrichment (non-compulsory) activities related to the course might be scheduled during this period (e.g. sessions on cash-flow modelling in excel).

Formative coursework: Students will be expected to complete in-class exercises and up to two take-home case-studies.

Indicative reading: Key texts are:

Brueggeman, W. B. and J. D. Fisher (2005) Real Estate Finance & Investments (13th edition or newer), New York City, NY: McGraw-Hill/Irwin;

Linneman, Peter (2004) Real Estate Finance & Investments: Risks and Opportunities, (2nd edition or newer). Philadelphia: Linneman Associates.

A more detailed reading list will be handed out at the beginning of the course.

Assessment: Exam (70%, duration: 2 hours, reading time: 10 minutes) in the spring exam period.

Presentation (30%) in the WT.

The presentation will involve both individual as well as group work.

GY465 Half Unit

Concepts in Environmental Regulation

This information is for the 2024/25 session.

Teacher responsible: Prof Michael Mason, Dr Richard Perkins

Availability: This course is compulsory on the MSc in Environmental Policy and Regulation and MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University). This course is available on the MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Regulation and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: This course provides critical insights into the nature, dynamics and practice of environmental regulation. It considers different rationales for environmental regulation and the influence of different interest groups over public environmental policy making. The course proceeds to examine the characteristics, design, and performance of different policy instruments, together with various factors impacting policy implementation processes.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the AT.

In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students are expected to prepare one piece of formative coursework in the Autumn Term: feedback will be provided..

Indicative reading: While there is no one single text that covers all aspects of the course, you are welcome to consult the following:

- Bell, S., McGillivray, D., Pedersen, O., Lees, E., and Stokes, E. (2017) *Environmental Law* (9th edition). Oxford: Oxford University Press.
- Carter, N. (2018) *The Politics of the Environment: Ideas, Activism, Policy* (3rd edition). Cambridge: Cambridge University Press.
- Randall, A. (2011) *Risk and Precaution*. Cambridge: Cambridge University Press.

Assessment: Coursework (100%, 3500 words) in the WT.

The summative assignment will be a policy brief (3500 words).

This course is available to students in other departments and on other programmes where their regulations allow, and if there is space on the course.

Course content: The course begins with an overview of the ideas and debates shaping current thinking on African cities in theory and policy. We then examine key issues currently facing African cities drawing on contemporary research in human geography, African studies, development studies, urban studies, anthropology, sociology and planning studies. These include: histories, economies, livelihoods, mobilities, planning, land, housing, infrastructures and risks.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of classes and lectures across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term

Formative coursework: Students will be expected to produce 1 draft essay plan for the assessed essay in AT.

Indicative reading: de Boeck F and S Baloji (2016) *Suturing the city: living together in Congo's urban worlds*, Autograph ABP, London

Diouf M and R Fredericks (eds) (2014) *The arts of citizenship in African cities: infrastructures and spaces of belonging*, Palgrave Macmillan, Basingstoke

Goodfellow, T (2022) *Politics and the urban frontier: transformation and divergence in late urbanizing East Africa*, OUP, Oxford

Keith, Michael and Andreza Aruska de Souza Santos (eds) (2021)

African cities and collaborative futures: urban platforms and metropolitan logistics, Manchester University Press, Manchester

Obeng-Odoom F (2016) *Reconstructing urban economies: towards a political economy of the built environment*, Zed, London

Myers, Garth A (2016) *Urban environments in Africa: a critical analysis of environmental politics*, Policy Press, Bristol

Myers G (2011) *African cities: alternative visions of urban theory and practice*, Zed, London

Parnell S and E Pieterse (eds) (2014) *Africa's urban revolution*, Zed, London

Pieterse E and AM Simone (eds) (2013) *Rogue urbanism: emergent African cities*, Jacana Media with African Centre for Cities, University of Cape Town

Quayson A (2014) *Oxford Street, Accra: city life and the itineraries of transnationalism*, Duke University Press, Durham and London

Robinson J (2006) *Ordinary cities: between modernity and development*, Routledge, Abingdon

Simone AM (2004) *For the city yet to come: changing African life in four cities*, Duke University Press, Durham and London

Assessment: Essay (50%, 2000 words) and coursework (50%, 2000 words) in the WT.

Students will submit an extended essay addressing an issue of urban development in depth in one or two African cities of their choice.

GY470 Half Unit Not available in 2024/25

Urban Africa

This information is for the 2024/25 session.

Teacher responsible: Prof Claire Mercer CKK 3.20

Availability: This course is available on the MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

GY471 Half Unit Not available in 2024/25

Urban environments and more-than-human cities

This information is for the 2024/25 session.

Teacher responsible: Dr Julia Corwin

Availability: This course is available on the MSc in Environment and Development, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students are required to apply through Graduate Course Selection on LSE for You by providing a short written statement (3-4 sentences max) explaining why they are interested in taking the course and any experience they have with similar course topics or theoretical approaches.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created.

Priority will be given to students on the MSc programmes listed above.

Course content: While cities are often depicted as inanimate and cold, made of concrete and steel, this course examines cities as lively, interconnected spaces. Rather than separating nature from urban spaces, this interdisciplinary course looks at how cities around the world are produced through socio-ecological processes, and how certain forms of nature are produced within the city. Cities depend on and foster diverse forms of life and communities that are often unexamined or remain in the background, yet are integral both for urban life as well as for the functioning of the global economy. Drawing from human geography, science and technology studies (STS), urban political ecology and urban studies, we will study cities as productive, creative and convivial spaces, as well as destructive spaces that can restrict life (both human and non-human). Themes that thread through these topics are questions of power and inequality; cities of the Global South and North and nature in postcolonial cities; the interdependence of life in cities; and the role of cities in both local environments and the global economy. The course will draw from ethnographies and documentaries of nature in the city to explore the complexities of urban natures and intertwined urban lives, with the option of a creative final assessment.

Teaching: 25 hours of seminars in the WT.

Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 project in the WT.

The formative assessment is a short project proposal for their final project, outlining their topic and the methods they will employ, with the option of a longer proposal (up to 1000 words).

Indicative reading:

- Barua, Maan, and Anindya Sinha. 2023. "Cultivated, Feral, Wild: The Urban as an Ecological Formation." *Urban Geography* 44 (10): 2206–27.
- Haraway, Donna. *When Species Meet*. Minneapolis: University of Minnesota Press.
- Ginn (2017). *Domestic Wild: Memory, Nature and Gardening in Suburbia*. London: Routledge.
- Hetherington, Ed. (2019). *Infrastructure, Environment, and Life in the Anthropocene*. Durham: Duke University Press.
- Narayanan, Yamini. 2023. *Mother Cow, Mother India: A Multispecies Politics of Dairy in India*. Stanford: Stanford University Press.
- Pitt, Hannah. 2015. "On Showing and Being Shown Plants: A Guide to Methods for More-than-Human Geography." *Area* 47 (1): 48–55.
- Van Patter, Lauren E. 2023. "Toward a More-Than-Human Everyday Urbanism: Rhythms and Sensoria in the Multispecies City." *Annals of the American Association of Geographers* 113 (4): 913–32.
- Dooren, Thom van, Eben Kirksey, and Ursula Münster. 2016. "Multispecies Studies: Cultivating Arts of Attentiveness." *Environmental Humanities* 8 (1): 1–23.

Assessment: Project (100%, 5000 words) in the ST.

The summative assessment is a final project/portfolio of 5000 words or equivalent with options for creative and multimedia projects (multimedia projects will include a shorter accompanying essay). The assessment will have different options to support student and staff neurodiversity as well as different types of skills that students may want to practice. Potential assessment options include doing an urban ethnography project or a multimedia project such as a photo essay or documentary on an urban environment project in London, with accompanying analysis. Students will be given guidance on the different options and will be assessed primarily on the content rather than the format of the

assessment.

GY472 Half Unit Real Estate Investment

This information is for the 2024/25 session.

Teacher responsible: TBC

Availability: This course is available on the MSc in Real Estate Economics and Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Entry into the MSc Real Estate Economics and Finance or by request from other qualified MSc students. Those qualified will already have knowledge of economics equivalent to a good first degree in the subject.

Course content: This course broadly aims to study how methods from economics and finance can be used to evaluate real estate investment decisions and how to incorporate insights from urban economics to improve the profitability of investments.

In the first part of the term, the course will begin with an introduction to the urban economics of real estate investment, focusing on how shifts in supply and demand across real estate related markets impact the risk and return of an investment. The students will then work towards an understanding of how different methods of varying sophistication can be used in the empirical evaluation of risk.

The second part of the module will deal with more topical issues. These will include (amongst others): real estate development and asset management, with a focus on their impacts on risk and return; real estate investment trusts (REITs), their structures and their performance; real estate portfolio construction and analysis; trends in urban economics and their impact on investment evaluations; machine learning, data analytics and real estate investment.

Assessment for the course will centre on the valuation of a mixed-use retail property in London. A field trip to tour the property and surrounding urban environment will occur during the term.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of lectures, seminars and workshops across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 2 essays in the WT.

In their first essay, students will work in their groups to conduct the quantitative analysis for a case study using the standard tools in real estate investment. Each student will prepare a 1000 word essay based on this quantitative work, analyzing the assumptions and methods used and the results. The second essay will also be 1000 words and center on assessing the students ability to incorporate urban economic theory and empirical research into their valuation. These formative exercises closely match the style and structure of the summative coursework.

Indicative reading:

- Archer, Wayne R., and David C. Ling. "The three dimensions of real estate markets: Linking space, capital, and property markets." *Real Estate Finance* 14.3 (1997): 5–11.
- Brueggeman, W. B. and J. D. Fisher (2005) *Real Estate Finance & Investments* (13th edition or newer), New York City, NY: McGraw-Hill/Irwin
- Clayton, Jim, David C. Ling, and Andy Naranjo. "Commercial real estate valuation: fundamentals versus investor sentiment." *The Journal of Real Estate Finance and Economics* 38.1 (2009): 5–37.
- Hoesli, Martin, Elion Jani, and André Bender. "Monte Carlo simulations for real estate valuation." *Journal of Property Investment & Finance* 24.2 (2006): 102–122.
- Gunnelin, Åke, et al. "Determinants of cross-sectional variation in discount rates, growth rates and exit cap rates." *Real Estate*

Economics 32.2 (2004): 217-237.

- Danielsson, Jón. *Financial risk forecasting: the theory and practice of forecasting market risk with implementation in R and Matlab*. Vol. 588. John Wiley & Sons, 2011.

Assessment: Essay (100%, 3500 words) in the ST Week 1.

The summative essay will be 3500 words and count for 100% of the student's final grade.

The essay will centre on assessing the students' ability to use the materials and tools discussed during the course to present a rigorous investment strategy.

This will include the ability to produce estimates of the impact of shifts in demand and/or supply for commercial real estate using data and rigorous methods, and the capacity to incorporate these into the evaluation of an investment proposal's risk and return.

The assessment will include a group and an individual component – and students will be asked to reflect on all elements learnt during the term (not just a selected number of weeks).

GY473 Half Unit

Economic Development and the Environment

This information is for the 2024/25 session.

Teacher responsible: Prof Charles Palmer CKK 4.11

Availability: This course is compulsory on the MPhil/PhD in Environmental Policy and Development, MSc in Environment and Development and MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University). This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University) and MSc in Geographic Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Pre-requisites: The course is taught from the perspective of applied economics, and is principally designed for students with beginner to intermediate levels of economic knowledge and understanding. Students who have not completed a course in first year undergraduate level Economics might find it useful to audit EC1A5 Microeconomics I.

Course content: With a focus on individuals and countries defined as low- and middle-income, the starting point for this course is recognition of the importance of resource use and the environment as building blocks for economic development. Using concepts and tools of environmental and development economics, the course aims to impart knowledge and develop critical thinking about a number of selected topics concerned with the interface between environment and development, at both the macro- and micro-scale. Central to this is an examination of the trade-offs and

complementarities between environment and development.

The course is structured over 10 weeks. After an introduction, the course begins with an emphasis on the overarching role of institutions in governing development paths and the way in which resources are managed. It then concentrates on the sustainability of the national and global economy, focusing on the role of managing wealth in shaping development prospects, whether green growth can deliver sustainability, at the macro-scale. The course then considers several topics that explore different resources and areas of sustainability policy at the micro-scale. Specifically, the demand for and supply of key ecosystem services – food, water and energy – have important implications for resource use and the environment. They also serve as building blocks for economic development. The impacts of current development trends on natural and man-made ecosystems, in particular, forest and urban ecosystems, are examined at the end of course along with the role of global trade in explaining resource use and environmental degradation.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures in Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce 1 exercise in the AT.

There will be a piece of formative work set during AT to help students develop their critical thinking skills for the take-home assessment in ST.

Indicative reading:

- G Atkinson et al. (eds.), *Handbook of Sustainable Development*, Edward Elgar, 2014.
- R Lopez and M Toman (eds.), *Economic Development and Environmental Sustainability*. Columbia University Press, 2006.
- E Barbier, *Economics for a fragile planet*, Cambridge University Press, 2022.
- W Adams, *Green development: environment and sustainability in a developing world*, 2009
- A Banerjee and E Duflo, *Poor economics: a radical rethinking of the way to fight global poverty*, Public Affairs, 2011

Assessment: Take-home assessment (100%) in the ST.

There will be an online assessment.

GY474 Half Unit

Politics of Environment and Development

This information is for the 2024/25 session.

Teacher responsible: Dr Kasia Paprocki and Dr Tanya Matthan

Availability: This course is compulsory on the MSc in Environment and Development and MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University). This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: This course explores key themes at the intersection of development and environmental politics.

Specifically, the course is centred on the applications of political ecology, critical development studies, and materialist human geography to topics in environment and development. In exploring the complex relationships between historical dynamics of development, inequality, and the environment, it covers a range of important natural resource and environmental issues, such as climate change, conservation, waste, and decolonizing environmental governance.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Autumn Term.

This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce 1 project in the AT.

Indicative reading:

- Li, T. M. (2007). *The Will to Improve: Governmentality, Development, and the Practice of Politics*. Durham: Duke University Press.
- West, P (2006) *Conservation is Our Government Now: The Politics of Ecology in Papua New Guinea*. Durham: Duke University Press.
- Curley, A (2021) "Resources is just another word for colonialism." In M. Himley, E. Havice, & G. Valdivia (Eds.), *The Routledge Handbook of Critical Resource Geography* (pp. 79-89). London: Routledge.

- Whyte, K. P. (2017). Indigenous Climate Change Studies: Indigenizing Futures, Decolonizing the Anthropocene. *English Language Notes*, 55(1-2), 153-162.

Assessment: Essay (100%, 4000 words) in the WT.

GY475 Half Unit

Issues in Environmental Governance

This information is for the 2024/25 session.

Teacher responsible: Dr Richard Perkins, Dr Eugenie Dugoua and Prof Michael Mason

Availability: This course is compulsory on the MSc in Environmental Policy and Regulation and MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University). This course is available on the MSc in Development Studies, MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Local Economic Development, MSc in Regulation and MSc in Urban Policy (LSE and Sciences Po). This course is available as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: This Winter Term half unit is designed to highlight key issues in environmental governance. A basic premise of the course is that governing sustainability transitions requires us to consider environmental decision-making and action by an increasingly diverse set of actors – including private ones. The themes covered illustrate the challenges, approaches, and tools of environmental governance by these actors: governing technological change, corporate social responsibility, sustainable finance, civil regulation, and international negotiations.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the WT.

In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across the Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: All students are required to make one presentation on an agreed topic.

Indicative reading: While there is no one single text that covers all aspects of the course, students are advised to consult the following:

- Gupta, A. and M. Mason (eds.) (2014). *Transparency in Global Environmental Governance*. Cambridge, MA: MIT Press.
- Martindale, W. (2023). *Responsible Investment: An Insider's Account of What's Working, What's Not and Where Next*. Cham: Palgrave Macmillan/Springer.
- Rasche, A. et al. (eds.) (2023). *Corporate Sustainability: Managing Responsible Business in a Globalised World*. 2nd edition. Cambridge: Cambridge University Press.

Assessment: Take-home assessment (100%) in the ST.

GY476 Half Unit

Applied Geographical Information Systems

This information is for the 2024/25 session.

Teacher responsible: Dr Ana Varela Varela

Availability: This course is compulsory on the MSc in Geographic Data Science. This course is available on the MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Human Geography and Urban Studies (Research), MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Subject to approval by course organiser.

The number of students that can be accommodated is limited.

If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

Course content: Geographical Information Systems (GIS) offer the social scientist an array of tools for generating, manipulating and visualising spatial data. This course covers practical GIS techniques for the social scientist, demonstrating how these tools can be combined with advanced analysis to enhance social science research. It emphasises practical skills and the use of relevant software. Specifically, the course will introduce the use of GIS tools in R and in QGIS. Attention will be given to a critical reflection upon the nature of the data used, encouraging students to go beyond traditional data use, and think about the role of the spatial data scientist in selecting and developing evidence to support policymaking and practice. Examples of literature

with applications in economic geography, environment, planning and other spatial social sciences will be provided for self-study. Readings are intended to develop a sound understanding of how real-world (geo)data are produced, their potential insights and biases, as well as opportunities and limitations.

Some of the topics covered in the course include introducing GIS and spatial data; processing, editing, and visualising various types of spatial data; spatial modelling; network analysis; working with online mapping resources; and applying machine learning techniques to spatial data.

Teaching: 20 hours of computer workshops in the AT.

MSc in Geographic Data Science students will have additional sessions totalling 4 hours to cover more advanced material.

Formative coursework: Formative work includes tasks designed to enhance understanding of the course material through practical application.

Indicative reading:

- Singleton, A., & Arribas-Bel, D. (2019). Geographic Data Science, Geographical Analysis. 53:1, 61-75
- Lovelace, R., Nowosad, J., & Muenchow, J. (2024). Geocomputation with R. CRC Press.
- Donaldson, D., & Storeygard, A. (2016). The View from Above: Applications of Satellite Data in Economics. The Journal of Economic Perspectives: A Journal of the American Economic Association, 30(4), 171–198.
- Taylor, C. A., & Druckenmiller, H. (2022). Wetlands, Flooding, and the Clean Water Act. The American Economic Review, 112(4), 1334–1363.
- Davis, D. R., Dingel, J. I., Monras, J., & Morales, E. (2019). How Segregated Is Urban Consumption? The Journal of Political Economy, 127(4), 1684–1738.

Assessment: Assignment (100%) in the AT.

Summative assessment will comprise a practical GIS analysis task.

There will be two versions of the assignment, one for Geographic Data Science students and one for students from other programmes.

GY477 Half Unit Not available in 2024/25 Race and Capitalism in North America

This information is for the 2024/25 session.

Teacher responsible: Dr Jessie Speer

Availability: This course is available on the MSc in City Design and Social Science, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in Inequalities and Social Science, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies and MSc in Urbanisation and Development. This course is available as an outside option to students on other programmes where regulations permit.

Please note that the course is capped at 30 students.

Course content: This course examines how capitalist development manifests in uneven and racialised ways across the broader North American region. It begins with an overview of ideas and debates on race and capitalism, including discussions of:

- Indigeneity
- Colonialism
- Migration
- Urban disinvestment
- Environmental racism
- Prisons and policing

The remainder of the course looks at key regions of North America, including the Caribbean, Mexico, and US South, with a focus on internal peripheries and broader regional connections that reveal the intertwined relationship between race, class and uneven development.

By examining US politics in the larger context of North America, this course will untangle the complexities of region-making and the blurred boundaries of the nation state. Using contemporary

case studies combined with geographic and decolonial theory, students will examine how the region's internal peripheries are embedded with a web of colonial and capitalist relations that have broad impacts outside of the US. The course will take place through a weekly seminar-style discussion, during which students will be encouraged to bring their own ideas and interests into the classroom. Assessment will be based on a portfolio of weekly written reading responses as well as a final essay.

Teaching: 25 hours of seminars in the AT.

Formative coursework: Students will receive feedback on their first three weekly reading responses.

Indicative reading:

- Barra, M. P. (2021). Good sediment: Race and restoration in coastal Louisiana. Annals of the American Association of Geographers, 111(1), 266-282.
- Cahuas, M. C. (2020). The struggle and (im)possibilities of decolonizing Latin American citizenship practices and politics in Toronto. Environment and Planning D: Society and Space, 38(2), 209-228.
- Curley, A., & Smith, S. (2020). Against colonial grounds: Geography on Indigenous lands. Dialogues in Human Geography, 10(1), 37-40.
- Davis, A. (2011). Women, race, and class. Vintage.
- Domosh, M. (2015). Practising development at home: Race, gender, and the "development" of the American South. Antipode, 47(4), 915-941.
- Gilmore, R. W. (2007). Golden gulag: Prisons, surplus, crisis and opposition in globalizing California. University of California Press.
- Gorman, C. S., & Culcasi, K. (2021). Invasion and colonization: Islamophobia and anti-refugee sentiment in West Virginia. Environment and Planning C: Politics and Space, 39(1), 168-183.
- McKittrick, K. (2011). On plantations, prisons, and a black sense of place. Social & Cultural Geography, 12(8), 947-963.
- Pulido, L. (2016). Flint, environmental racism and racial capitalism. Capitalism Nature Socialism, 27(3): 1-16.
- Woods, C. A. (1998). Development arrested: The blues and plantation power in the Mississippi Delta. Verso.

Assessment: Essay (50%, 2000 words) and portfolio (50%) in the AT.

Students will submit short reading responses each week. The final portfolio due at the end of the term will include all weekly reading responses. Students will also submit a 2,000 word final essay after completing the course.

GY479 Half Unit Urban Transformations

This information is for the 2024/25 session.

Teacher responsible: Dr Ryan Centner

Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Environment and Development, MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University), MSc in Human Geography and Urban Studies (Research), MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course introduces students to key theories and debates about societies undergoing rapid urban change. Course lectures examine large urban transformations in three ways. The first pertains to 'urbanisation' as a historical process by which social life, even outside of cities, becomes 'urban'. This means addressing the relationship between the country and the city, the idea of the urban in historical perspective, and the relationship between urban life in the global North and South. The second approach considers the city as a site for radical political change, as well as social experimentation in planning and development. This means studying cities as spaces of

movement, resistance, and innovation, with an emphasis on urban experiments (especially in 'Southern' cities). Thirdly, urban transformation is analysed in terms of the explosion of theorisations about the nature of the urban, how to study it, and how to make a difference in 'the urban', both intellectually and materially, within a global economy. Through these three overlapping lenses – history, politics/planning, and theory – the course aims to equip students with a conceptual and empirical foundation for analysing city transformations and globalised urbanisation, with particular attention to emerging urbanisms in the global South.

Topics covered may include the following: industrialisation and immigration; processes of suburbanisation, ghettoisation, and gentrification; global cities; the colonial and postcolonial city; urban citizenship and the right to the city; urban uprisings; the geopolitics of urban theory; urban nostalgia; urban innovation and the politics of urban self-regard/self-representation.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures and other supplementary interactive live activities.

This course is delivered through a combination of seminars and lectures across Autumn Term.

This course includes a reading week in Week 6 of Michaelmas Term.

Formative coursework: Students will be expected to produce 1 essay in the AT.

An optional short essay of 2000 words (maximum). Critically explore the applicability of one week's readings from the first 5 weeks of the course to an empirical case outside the course reading. This will be due in Week 7 of AT.

Indicative reading: R. Beauregard. *When America Became Suburban*, 2006;

J. Brown-Saracino (ed). *The Gentrification Debates*, 2010;

T. Caldeira, *City of Walls: Crime, Segregation, and Citizenship in Sao Paulo*, 2000;

M. Davis, *Planet of Slums*, 2006;

D. Harvey, *Rebel Cities: From the Right to the City to the Urban Revolution*, 2012;

J.M. Jacobs, *Edge of Empire: Postcolonialism and the City*, 1996;

G. Moussawi, *Disruptive Situations: Fractal Orientalism and Queer Strategies in Beirut*, 2020;

J. Robinson, *Ordinary Cities: Between Modernity and Development*, 2006;

A. Roy and A. Ong (eds), *Worlding Cities: Asian Experiments and the Art of Being Global*, 2011;

T. Samara, S. He, and G. Chen (eds), *Locating Right to the City in the Global South*, 2013;

The reading list is intended only to be indicative of literatures broached in the course. Actual readings will consist of particular articles and chapters on a weekly basis, as well as a wider range of inclusions.

Assessment: Essay (90%, 5000 words) in the WT.

Class participation (10%) in the AT.

Due in the first half of WT, the essay (5000 words, maximum) will be based on a range of questions provided by the instructor during AT. Some options will be very specific about certain issues and/or regions, whereas others will be more conceptual and open for student exploration. Across all these options, there will be wide enough scope for students with different academic backgrounds and thematic or geographical interests to be accommodated, while still hewing to the organising topics of the course.

Attendance and active participation in seminar is also essential, and assessed. Students will be required to co-lead discussion with a peer and the instructor for one (out of ten) seminars.

GY480 Half Unit

Remaking China: Geographical aspects of Development and Disparity

This information is for the 2024/25 session.

Teacher responsible: Prof Hyun Shin CKK.3.17

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Environment and Development, MSc in Human Geography and Urban Studies (Research), MSc in International and Asian History, MSc in Local Economic Development, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The recent decades have seen China emerging as one of the most important global economic and political players. The course aims to offer opportunities to gain comprehensive and yet critical insights into China's development in urban, regional and global dimensions by reflecting upon the significance of China's role in the world economy as well as the challenges emerging within China. Tentative topics that the course covers include, but not limited to, the following: China's rise in the global capitalism; uneven development and regional disparities; the political economy of urbanisation; the role of the state; governing neighbourhoods; China on the move and migration; China's middle class; practising global China; public participation and rights activism.

Teaching: 30 hours of seminars in the AT.

Formative coursework: Students are expected to complete one essay plan for their assessed essay and blog.

Indicative reading:

- Campanella, T.J. (2008) *The concrete Revolution: China's urban revolution and what it means for the world*. Princeton Architectural Press
- Friedman, E. (2022) *The Urbanization of People: The Politics of Development, Labor Markets, and Schooling in the Chinese City*. Columbia University Press
- Hsing, Y-T (2010) *The Great Urban transformation*. Oxford University Press
- Ngai, P (2005) *Made in China: Women Factory Workers in a Global Workplace*. Duke Univ. Press
- Shao, Q. (2013) *Shanghai Gone: Domicide and defiance in a Chinese megacity*. Rowman & Littlefield Publishers
- Wu, F. (2015) *Planning for Growth: Urban and Regional Planning in China*. Routledge
- Wu, F. (2022) *Creating Chinese Urbanism: Urban Revolution and Governance Changes*. UCL Press

Assessment: Coursework (30%, 1500 words) and essay (65%, 3000 words) in the WT.

Class participation (5%) in the AT.

Students are to submit regular reading responses via Moodle as part of class participation.

GY484

Dissertation - MSc Regional and Urban Planning Studies

This information is for the 2024/25 session.

Teacher responsible: Dr Erica Pani

Availability: This course is compulsory on the MSc in Regional And Urban Planning Studies. This course is available on the MSc in Urban Policy (LSE and Sciences Po). This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/

seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a series of lectures across Autumn Term and Winter Term.

This course includes a reading week in Week 6 of both Autumn and Winter Term.

Assessment: Dissertation (100%, 10000 words) in the post-spring term.

GY485

Dissertation - MSc Geographic Data Science and MSc Real Estate Economics and Finance

This information is for the 2024/25 session.

Teacher responsible: Programme Director(s)

Availability: This course is compulsory on the MSc in Geographic Data Science and MSc in Real Estate Economics and Finance. This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of workshops and one to one supervision across Autumn, Winter and Spring Term.

Assessment: Dissertation (100%, 10000 words) in the post-spring term.

GY486

Dissertation - MSc Local Economic Development

This information is for the 2024/25 session.

Teacher responsible: Dr Erica Pani

Availability: This course is compulsory on the MSc in Local Economic Development. This course is available on the MSc in Urban Policy (LSE and Sciences Po). This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a series of lectures across Autumn Term and Winter Term.

The course includes a reading week in Week 6 of both Autumn and Winter Term.

Assessment: Dissertation (100%, 10000 words) in the post-spring term.

GY487

Dissertation - MSc in Human Geography and Urban Studies (Research)

This information is for the 2024/25 session.

Teacher responsible: Programme Director - Dr Ryan Centner

Availability: This course is compulsory on the MSc in Human Geography and Urban Studies (Research). This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must

be obtained from the relevant Programme Director.

Assessment: Dissertation (100%, 10000 words) in the post-spring term.

GY488

Dissertation - MSc Urbanisation and Development

This information is for the 2024/25 session.

Teacher responsible: Programme Director

Availability: This course is compulsory on the MSc in Urbanisation and Development. This course is available on the MSc in Urban Policy (LSE and Sciences Po). This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Two workshops are usually convened, the first in AT and second in WT to discuss dissertations. Each student is provided with a dissertation supervisor. A dissertation proposal is submitted as part of GY452.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of workshops as well as one to one supervision meetings across Autumn, Winter and Summer Terms.

Assessment: Dissertation (100%, 10000 words) in the post-spring term.

GY489

Dissertation - Environment Programme - MSc Environmental Economics and Climate Change, MSc Environmental Policy and Regulation and MSc Environment and Development

This information is for the 2024/25 session.

Teacher responsible: Programme Director of relevant MSc programme.

Availability: This course is compulsory on the MSc in Environment and Development, MSc in Environmental Economics and Climate Change, MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University) and MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University). This course is available on the MSc in Environmental Policy, Technology and Health (Environment and Development) (LSE and Peking University). This course is not available as an outside option.

Course content: The dissertation may be on any topic within the field of the MSc programme studied. Approval for the topic must be obtained from the relevant Programme Director.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through combined workshops and lectures.

Assessment: Dissertation (100%, 10000 words) in the post-spring term.

HP400 Half Unit Financing Health Care

This information is for the 2024/25 session.

Teacher responsible: Mr George Wharton

Availability: This course is compulsory on the MSc in Health Policy, Planning and Financing and MSc in International Health Policy. This course is available on the MSc in Global Health Policy, MSc in Health Data Science and MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. Places are allocated first to students in the Department of Health Policy and then on a first come first served basis.

Course content: This course aims to give students a thorough grounding in health financing policy. It focuses on the health financing functions of collecting revenue, pooling funds and purchasing services, as well as on policy choices concerning coverage, resource allocation and market structure. The course mainly draws on examples from health financing policy in European countries, but the general principles studied apply internationally.

The course provides an overview of key health financing policy issues, including the advantages and disadvantages of different ways of raising revenue for health; the role of private financing mechanisms; the importance of pooling; decisions about whom to cover, what services to cover, and how much of service cost to cover; allocating resources to purchasers, purchasing market structure and the principles of strategic purchasing; the incentives associated with different methods of paying providers; and the issue of financial sustainability.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 23 hours during Autumn Term. Students will work together in small groups on structured learning activities set by the course leads, ahead of the seminars.

There will be a departmental reading week in week 6 of term. There will be a 2 hour revision session held in the Spring Term ahead of the final exams.

Formative coursework: Students will receive feedback on formative activities of in-class group work and presentations.

Indicative reading: WHO, World Health Report 2010 - Health systems financing: the path to universal coverage (2010); E Mossialos, A Dixon, J Figueras & J Kutzin (eds), Funding health care: options for Europe, Open University Press (2002); J Kutzin, Health financing policy: a guide for decision-makers, World Health Organization (2008); T Rice, The economics of health reconsidered, Health Administration Press (3rd edn, 2009).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

The course will introduce concept of risk and risk reducing strategies, theories of planning, and priority setting techniques in health care. In addition, the course will examine the processes and forces shaping the development and implementation of health policy. The course will examine core concepts such as power, the role of the state and other policy stakeholders (e.g. NGOs, international organisations, etc.), institutions, and evidence, in shaping health policy agendas or choices.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 23 hours during Autumn Term. Seminars will take place in small groups where students will work together in small groups on structured learning activities set by the course leads.

There will be a departmental reading week in Week 6 of term.

Formative coursework: Students will sit a mock exam in the last week of term.

Indicative reading: Green, A., An Introduction to Health Planning for Developing Health Systems, new edn, OUP, 2007.

Walt, Gill. 1994. Health policy: an introduction to process and power. London: Zed Books.

Hill, M. The Policy Process, a reader, second ed. Harlow: Prentice Hall 1997

Buse, Kent, Nick Mays, and Gill Walt. 2012. Making Health Policy. Maidenhead, Berkshire: Open University Press.

D Leon & G Walt (eds), Poverty, Inequality and Health: An international perspective, OUP (2001)

Parkhurst, J. The politics of evidence: from evidence based policy to the good governance of evidence. London Routledge 2016.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

HP402 Half Unit Measuring Health System Performance

This information is for the 2024/25 session.

Teacher responsible: Dr Rocco Friebe

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically high. Places are allocated first to students in the Department of Health Policy and then on a first come first served basis to students outside the department.

Course content: This course aims to present a framework to discuss the opportunities and challenges with performance measurement in health care, examine the various dimensions and levels of health system performance, identify the measurement instruments and analytic tools needed, and examine the implications of these issues for policy makers and regulators. Lectures generally focus on measuring health system performance in high-income countries but draw on the experience of other countries where relevant.

After taking this course students are expected to:

- understand the principles of performance measurement
- appreciate the challenges, approaches, and opportunities in performance measurement in four dimensions: population health, patient outcomes, equity, quality and appropriateness of care, and productivity
- understand the methodological issues facing performance measurement relating to risk adjustment, developing composite measures, and measuring attribution and causality
- identify key issues relevant to policy makers relating to: developing targets and reporting on progress to the public, and developing incentives to improve performance

Teaching: Teaching will be delivered in no less than 29 hours and includes lectures, seminars and workshops in the Winter Term.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

HP401 Half Unit Introduction to Health Policy and Politics

This information is for the 2024/25 session.

Teacher responsible: Dr Justin Parkhurst COW 2.08

Availability: This course is compulsory on the MSc in Global Health Policy and MSc in International Health Policy. This course is available on the MSc in Health Data Science, MSc in Health Policy, Planning and Financing and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

Course content: A comparative approach to the development of health and healthcare policies in high, middle, and low income country settings, emphasising the goals of health policymaking, public health approaches, the political nature of health policy issues, and core concepts from policy studies that can be used to conceptualise policy change dynamics in health.

Indicative reading: Papanicolas I, Smith P (Eds) *Health System Performance Comparison: An Agenda for Policy, Information and Research*. Maidenhead: Open University Press, 2013; P Smith, E Mossialos, I Papanicolas S. Leatherman (Eds), *Performance measurement for health system improvement: experiences, challenges and prospects*. Cambridge University Press, 2010.

Institute of Medicine, *Crossing the Quality Chasm: A New Health System for the 21st Century*. Washington, DC, National Academies Press, 2001;

OECD, *Measuring up: improving health system performance in OECD countries*. Paris: OECD, 2002. World Health Organization (WHO), (2000)

The world health report 2000: Health systems: Improving performance, Geneva: WHO Publications

Assessment: Presentation (25%) in the WT.

Essay (75%, 3000 words) in the ST.

HP404 Half Unit

Global Health Policy: Institutions, Actors and Politics

This information is for the 2024/25 session.

Teacher responsible: Dr Clare Wenham

Availability: This course is compulsory on the MSc in Global Health Policy. This course is available on the MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. Places are allocated first to students in the Department of Health Policy and then on a first come first served basis.

Course content: Globalization has not only impacted on the nature of emerging global health but the policy responses to these challenges. This module critically examines the transnational institutions and actors involved in global health policy and the interplay between them. The governance of global health issues has traditionally been carried out by states and various United Nations agencies (namely, the World Health Organisation), but given the transboundary nature of many global health issues, a diverse range of actors, including the private sector, civil society organizations and national governments, are now integrally involved. The funding of global health programmes and policies, for example, has shifted from primarily bi-/multilateral donors to include private and public sectors and philanthropists in a global health governance mosaic. The module will use a number of case studies to examine the organisation and role of global health institutions, the challenges and opportunities presented by these governance arrangements, and their (intended and unintended) impacts on global health policy and practice. In doing so, the module will draw on contributions from a range of social sciences including sociology, political science and health services research.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 25 hours during Autumn Term. Seminars will be discussion-based and take place in small groups each week.

There will be a departmental reading week in Week 6 of term.

Formative coursework: One essay (1000 words) focusing on different approaches to framing global health

Indicative reading: Frenk, J., & Moon, S. (2013). Governance challenges in global health. *New England Journal of Medicine*, 368(10), 936-942.

Taylor, S. (2018). 'Global health': meaning what?. *BMJ Global Health*, 3(2) e000843.

Davies, S. (2010). Global politics of health. *Polity*.

McInnes, C., & Lee, K. (2012). Global health and international relations. *Polity*.

Assessment: Essay (100%, 4000 words) in the AT.

One extended essay (4000 words) will be due at the end of AT.

Essay questions will be provided at the start of the course, or students are welcome to select an essay topic of their choice, with approval from the course convener.

HP405 Half Unit

Social Determinants of Health

This information is for the 2024/25 session.

Teacher responsible: Dr Justin Parkhurst COW.2.08

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit. This course is a listed option on MSc's in the department of Health Policy and for the MSc in Health and International Development. The course will be capped and priority may be given to students in the Department of Health Policy or related MSc degrees as needed.

Course content: The course introduces the social determinants of health from a global perspective. Content will draw on low, middle, and high income country examples, (although a majority of material will come from middle and high income cases). The course begins by exploring the shift in focus from individual to population health, the link to social determinants, and methodological challenges. It then goes into specific social determinants and issues such as poverty, education, gender and the built environment. Specific health and intersectional issues are then introduced, before final lectures that consider the politics of policy responses dealing with social determinants. A set of 6 seminars compliment the lectures with the final seminar linked to assessment.

Teaching: The course will be delivered in no less than 27 hours and includes lectures and seminars in the Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the WT.

An outline or early draft of the term essay will be submitted in week 8 to allow feedback and guidance from teaching staff before final submission.

Indicative reading: Rose, Geoffrey. 2001. "Sick individuals and sick populations." *International journal of epidemiology* 30 (3):427-432. WHO Commission on the Social Determinants of Health. 2008.

Closing the gap in a generation: health equity through action on the social determinants of health. Final report of the Commission on Social Determinants of Health. Geneva: World Health Organization. Birn, Anne-Emanuelle, Yogan Pillay, and Timothy H. Holtz. 2009. *Textbook of international health: global health in a dynamic world*. New York: Oxford University Press.

Sallis, James F, Neville Owen, and Edwin B Fisher. 2008. "Ecological models of health behavior." In *Health behavior and health education: Theory, research, and practice*, edited by Karen Glanz, Barbara K. Rimmer and K. Viswanath, 465-486. San Francisco: John Wiley & Sons.

Subramanian, S. V., Paolo Belli, and Ichiro Kawachi. "The macroeconomic determinants of health." *Annual review of public health* 23.1 (2002): 287-302.

Assessment: Essay (75%, 3000 words) in the ST.

In-class assessment (25%) in the WT.

25% of the grade will be based on small group presentations in the final seminars.

75% of the grade will be based on a term essay (3000 words) that requires them to address a key health concern facing a population in a specific country of interest from a social and political perspective. They will need to write a policy brief that reviews literature, considers policy responses in relation to critical conceptual approaches covered, and proposes potential approaches to the problem.

HP407 Half Unit

Evidence Review and Synthesis for Decision Making

This information is for the 2024/25 session.

Teacher responsible: Dr Huseyin Naci

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

This course is relevant to all students with an interest in health and social care interventions.

Course content: Evidence review and synthesis methods (such as systematic reviews and meta-analyses) are increasingly used to evaluate the effectiveness of healthcare interventions. A broad range of decision making bodies across the health care sector (including health technology assessment bodies, drug and medical device licensing agencies, biopharmaceutical industry, and hospitals) need individuals equipped with the methods of reviewing and synthesising the existing body of evidence by performing systematic reviews and meta-analyses.

This course will be focused on the principles of reviewing and synthesising the existing body of literature. The course will have three components. The first will provide the rationale for adopting a systematic approach for evidence review and synthesis. It will equip students with the methods to undertake risk of bias assessments of randomised controlled trials. The second component will focus on the quantitative synthesis of multiple randomised controlled trials in meta-analysis. The third component will discuss the opportunities and challenges of using evidence for decision-making.

The intended learning outcomes of this course will be the following:

- Describe the rationale for adopting a systematic approach to literature review
- Define the principal threats to validity both in individual randomised trials and collections of randomised trials
- Critically evaluate the quality of randomised controlled trials in oral and written form
- Assess heterogeneity in a collection of studies
- Design and perform a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 33 hours during Winter Term. Students will work in small groups to complete weekly self-directed learning activities and meet with seminar leads for weekly feedback on their progress. A computer workshop will be held to introduce students to systematic review and meta analysis software.

There will be a departmental reading week in Week 6 of term.

Formative coursework: Feedback given on a completed meta analysis

Indicative reading:

- Cochrane Handbook for Systematic Reviews of Interventions (version 5.1.0, updated March 2011).
- Institute of Medicine. Finding what works in health care: standards for systematic reviews. 23 March 2011.
- Sutton AJ et al. Methods for Meta-analysis in Medical Research. Wiley, Chichester, UK, 2000.
- Cook DJ. Systematic reviews: synthesis of best evidence for clinical decisions. *Annals of internal medicine* 1997;126(5):376–80.
- Higgins, Julian PT, et al. The Cochrane Collaboration's tool for assessing risk of bias in randomised trials. *Bmj* 343 (2011): d5928.

Assessment: Project (100%, 3000 words) in the ST. Systematic review and meta-analysis report resembling an original article submission to a peer-reviewed journal (100%). Students will

develop their meta-analysis project in a group and individually write up as their summative assessment.160

HP409

Dissertation for MSc Health Policy, Planning and Financing

This information is for the 2024/25 session.

Teacher responsible: Currently Dr. E Courtin and Dr M. Bhatia (LSE) and Dr T Chantler (LSHTM) as Programme Directors though the Programme Directorship sometimes varies from year to year.

Availability: This course is compulsory on the MSc in Health Policy, Planning and Financing. This course is not available as an outside option.

Course content: The aim of the course is to provide core information to students on dissertation-writing as well as to address queries students may have in relation to their dissertation topic, the methodology used, the likelihood of ethical approval, and data acquisition, among others.

The dissertation could be on any topic in the field of health policy, planning and/or financing. The main body of the dissertation should include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.

Teaching: Teaching comprises two 2-hour seminars. It may be merged with other MSc students in the Department when covering overlapping issues.

Finally, there is individual supervision for students on the dissertation.

Formative coursework: Students will be required to write a summary of the proposed dissertation, outlining the title, background to the topic, methods to be employed, and likely expected results.

Assessment: Dissertation (100%, 10000 words).

HP412 Half Unit

Global Health Security

This information is for the 2024/25 session.

Teacher responsible: Dr Clare Wenham COW 1.03

Availability: This course is available on the MSc in Global Health Policy, MSc in Global Politics, MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in International Health Policy, MSc in International Health Policy (Health Economics) and MSc in International Relations. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Global health security has become a dominant paradigm in global health. Recent outbreaks of COVID-19, Ebola, Zika and pandemic influenza have heightened the global sense of vulnerability to the spread of infectious disease, and as a consequence global health policy is now complete with references to such health emergencies. These threats are even listed on national security strategies of many governments, and as such we see the ever increasing link between security and health across policy areas and levels. As we have all witnessed, COVID-19 has affected every part of the world, and every part of socio-economic life as we know it. Thus, we must understand how this has happened, and what we can do to prevent the next outbreak, and mitigate against future downstream effects of pandemics. This course interrogates this health-security nexus. It considers different conceptual understandings of security including global health security, national security, biosecurity and human security and considers these in multiple health contexts. These empirical explorations include COVID-19, Ebola, Zika, Anti-microbial resistance (AMR) and conflict and health. Yet, this

course also asks students to consider the assumptions inherent to the security discourse, and the challenges these has on global health policymaking. Should the global health community be championing global health security, or has the terminology run its course.

To examine these concepts, empirics and broader political questions, this module will draw on contributions from international relations, political science, law, epidemiology and public health research.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 20 hours during MT. Seminars will be led by a small group of students who will present the key discussion points to their colleagues. Small group work will be undertaken in the seminars to allow for more in-depth discussion and class debate. Additional seminar activities will provide students with real-life scenarios of global health security crises. Activities will aim to bring to life the theories, challenges and politics discussed during the course.

There will be a departmental reading week in week 6 of term.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Students will submit a short 1000 word essay (on the topic that they are writing on for the summative) during the teaching term. These will be graded and feedback given to students. This allows students to get valuable experience of writing critical essays have they not before in previous modules or degrees, and the expectations of the summative assessment. For example, if a student's formative work flagged particular concerns this could be addressed ahead of the summative submission.

Assessment: Essay (75%, 3500 words) and blog post (25%) in the AT.

1 x 3500 word essay – 75% of grade

Students will be asked to pick one essay question. They will be given the option to choose their own essay topic (after discussion with their seminar leader) or to select from a provided list of questions. The questions will be broad, allowing for student individuality to come across in their answers.

1 x Blog post – 25% of grade

Students will be assessed on their reflections of the course and any role play activity undertaken.

HP420 Half Unit Health Economics

This information is for the 2024/25 session.

Teacher responsible: Prof Andrew Street COW 1.02

Availability: This course is available on the MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

In allocating places in this course, students enrolled in the MSc in International Health Policy and MSc in International Health Policy (Health Economics) have priority.

Course content: This course develops basic economic concepts as they are applied to the health sector. We shall discuss economics issues at system-level, including options for financing health care, predicting future expenditure, and assessing the degree of health equity and equality. We shall consider demand for health care and for health insurance, discussing matters such as moral hazard, adverse selection and risky health behaviours. Then we shall turn to the supply-side of health care provision, considering the agency relationship between patients and physicians, the competitiveness of health care markets, the geographical configuration of health care services, and methods for paying health care providers. The course is designed to provide an intuitive understanding of a wide range of economic concepts, illustrated by practical examples.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 33 hours during Autumn Term. Workshops will be held throughout the term to enable students to work through key problem sets. Students will also take part in small group seminars.

There will be a departmental reading week in Week 6 of term.

Formative coursework: Mock exam in the AT.

Indicative reading: The course draws from a variety of textbooks and articles, with a thorough reading list provided prior to the lectures. The course makes repeated use of the following textbook:

- J Bhattacharya, T Hyde & P Tu, *Health Economics*, Palgrave Macmillan, 2014.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

HP421 Half Unit Economic Analysis for Health Policy in Low- and Middle-Income Countries

This information is for the 2024/25 session.

Teacher responsible: Dr Miqdad Asaria

Availability: This course is compulsory on the MSc in Global Health Policy. This course is available on the MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically high. Places are allocated first to students in the Department of Health Policy and then on a first come first served basis to students outside the department.

Course content: The aim of the course is to provide students with some key analytical methods and concepts used by economists to study health care policies in low- and middle-income countries. The course takes a micro-economic perspective, in that it will study how individuals involved in health care systems (patients, providers, insurers) make decisions which affect the utilisation and delivery of health care services.

The course will present key theoretical concepts and use empirical evidence particularly relevant for policy questions in low- and middle-income settings. The course will be applied in nature, as students will learn through case studies which will expose to different types of data and evidence to analyse decisions made by

individuals and then articulate recommendations for health policy. By the end of this course, students will be able to:

- define fundamental principles and concepts of health economics relevant to health policy challenges in low- and middle-income countries
- understand the economic models of decisions made by individuals on the demand- and supply-side of health care markets in low and middle-income countries;
- apply economic reasoning and models to identify problems and to recommend relevant health care policies;
- refer to seminal literature and evidence in the health economics and health policy fields in low- and middle-income countries;
- be able to interpret simple results from empirical economic studies, and formulate policy recommendations.

Teaching: The course will be delivered in no less than 28 hours and consists lectures and seminars in the Winter Term. A revision session will be held early in the Spring Term ahead of the exam.

Formative coursework: Coursework assessed throughout the WT

Indicative reading: The course draws from a variety of textbooks and articles, providing essential references to understand the theoretical concepts and read key empirical studies. A complete reading list is provided at the start of the term.

The following papers are a selection of readings used in the course:

- Dupas P (2011) "Health Behavior in Developing Countries" Annual Review of Economics, Vol. 3
- Lepine, A., M. Lagarde and A. Le Nestour (2018). "How effective and fair is user fee removal? Evidence from Zambia using a pooled synthetic control." *Health Economics* 27(3): 493-508.
- Dupas, P., V. Hoffmann, M. Kremer and A. P. Zwane (2016). "Targeting health subsidies through a nonprice mechanism: A randomized controlled trial in Kenya." *Science* 353(6302): 889-895.
- Capuno, J. J., A. D. Kraft, S. Quimbo, C. R. Tan and A. Wagstaff (2016). "Effects of Price, Information, and Transactions Cost Interventions to Raise Voluntary Enrollment in a Social Health Insurance", *Health Economics* 25(6) p650-662

- R. M. Scheffler, C. H. Herbst, C. Lemiere and J. Campbell. (2016). *Health Labor Market Analyses in Low- and Middle-Income Countries: An Evidence-Based Approach*.
- McPake, B, A Scott, and I Edoka. (2014). *Analyzing Markets for Health Workers: Insights from Labor and Health Economics*. Directions in Development. Washington, DC: World Bank.
- Lagarde, M. and D. Blaauw (2014). "Pro-social preferences and self-selection into jobs: Evidence from South African nurses." *Journal of Economic Behavior & Organization* 107, Part A: 136-152.
- Banerjee, A. V., E. Duflo and R. Glennerster (2008). "Putting a Band-Aid on a Corpse: Incentives for Nurses in the Indian Public Health Care System." *Journal of the European Economic Association* 6(2-3): 487-500.
- Björkman, M. and J. Svensson (2009). "Power to the People: Evidence from a Randomized Field Experiment on Community-Based Monitoring in Uganda." *The Quarterly Journal of Economics* 124(2): 735-769.
- Currie, J., W. Lin and W. Zhang (2011). "Patient knowledge and antibiotic abuse: Evidence from an audit study in China." *J Health Econ* 30(5): 933-949.
- Björkman Nyqvist, M. and S. Jayachandran (2017). "Mothers Care More, but Fathers Decide: Educating Parents about Child Health in Uganda." *American Economic Review* 107(5): 496-500.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

HP422 Half Unit

Health Care Economic Evaluation

This information is for the 2024/25 session.

Teacher responsible: Dr Ranjeeta Thomas COW 2.07

Availability: This course is compulsory on the MSc in International Health Policy (Health Economics). This course is available on the MSc in Global Health Policy, MSc in Health Data Science, MSc in Health Policy, Planning and Financing and MSc in International Health Policy. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Resource allocation is at the heart of decision-making in the health care sector. Economic evaluation is an approach used to support decision-makers in allocating resources by providing tools to compare the costs and benefits associated with multiple alternative scenarios or interventions.

This course will enable students to understand and apply the analytic methods used in the economic evaluation of health interventions. By the end of the course, students are expected to:

- Explain the welfare economic principles underlying health-care economic evaluations
- Identify the different approaches to economic evaluations (cost-effectiveness, cost-benefit, cost-utility etc)
- Measure and analyse costs and effects of health care interventions
- Construct a decision-analytic model to compare the costs and benefits of different interventions
- Apply statistical methods to deal with uncertainty in economic evaluations
- Evaluate how to make decisions under-uncertainty in health-care economic evaluations

It is recommended students taking this course have some knowledge of probability and statistics (similar to ST102).

As Microsoft Excel will be used for practical sessions, some experience of using Excel would be helpful.

Teaching: 1 hour and 30 minutes of lectures and 4 hours of workshops in the AT.

This course will be delivered through a combination of lectures and workshops totalling a minimum 26 hours during Autumn Term.

The lectures provide conceptual foundations, theory and statistical methods. Students will attend seminars where they will work together in small groups on structured learning activities set by the course leads.

There will be a departmental reading week in Week 6 of term.

Formative coursework: A piece of formative coursework will be set in the middle of the term, and feedback provided to students.

Indicative reading: The following are basic readings for the course:

- Drummond MF, Sculpher MJ, Claxton K, Stoddart GL, Torrance GW (2015). *Methods for the Economic Evaluation of Health Care Programmes*. Fourth edition: Oxford University Press, Oxford.
- Gray A, Clarke P, Wolstenholme J, Wordsworth S (2011) *Applied Methods of Cost-Effectiveness Analysis in Health Care*, Oxford University Press, Oxford.
- More technical and advanced textbooks, especially for statistical analysis.
- Briggs A, Sculpher M, Claxton K (2006). *Decision Modelling for Health Economic Evaluation*. Oxford University Press, Oxford.

Supplementary Reading List

This is made available on Moodle along with all other course materials, and includes references to specialised texts and articles on each subject covered within the course.

Assessment: Project (100%, 3000 words) in the WT.

Assessment is through a project that students will undertake in small groups and write up individually (3,000 word paper), to be submitted at the end of the course.

HP423 Half Unit

Advanced Health Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Miqdad Asaria COW.3.07

Availability: This course is compulsory on the MSc in International Health Policy (Health Economics). This course is available on the MSc in Health Data Science, MSc in Health Policy, Planning and Financing and MSc in International Health Policy. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Health Economics (HP420).

Students enrolling on this course will be expected to have taken advanced undergraduate courses in microeconomics and calculus.

Course content: The course will cover: international comparisons of health care expenditure, individual health-seeking behaviour, health care insurance, contract theory applied to the health care sector (including principal-agent theory and incentive payment mechanisms), and equity in health care.

Students may find material from the half unit HP426 Applied Health Econometrics, to be beneficial to studying this course. See the HP426 course guide for further detail.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 25 hours during Winter Term. Seminars will take place in small groups with students presenting assigned topics each week.

There will be a departmental reading week in Week 6 of term.

Formative coursework: Students will give a presentation in seminars and receive feedback from seminar leads

Indicative reading: Culyer, A.J., and Newhouse, J.P., (eds.), 2001, *Handbook of Health Economics Volumes 1A & 1B*, (North-Holland, Amsterdam); Zweifel, P. and Breyer, F., 1997, *Health Economics*, (OUP, Oxford).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

HP424 Half Unit

Pharmaceutical Economics and Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Panagiotis Kanavos

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to introduce students to the economics of pharmaceutical markets and related policies that affect national and international markets broadly. The course will

- Provide students with an understanding of basic features of pharmaceutical markets, how pharmaceutical markets work and how competition manifests itself in different parts of pharmaceutical markets.
- Illustrate to students how the pharmaceutical market is linked to the health care market, why it is often the focus of much regulation, and to help students understand the multidimensional goals of pharmaceutical policies.
- Introduce students to the economic and policy problems encountered in managing pharmaceutical markets and how to evaluate the impact of alternative policy approaches. The course will also give students some experience in critically evaluating the impact of policy on market outcomes.
- Facilitate consideration of various country-specific political, cultural and economic factors that may drive governments' approaches to pharmaceutical regulation. In this context, this course will help students consider the extent to which policies may be transferable.
- Enable students to analyse pharmaceutical markets from

the perspectives of several main actors: governments, third party payers, the pharmaceutical industry, doctors, patients, pharmacists and wholesalers. Literature from Health Economics, Industrial Organisation and Health Policy will be incorporated into lectures, discussions and seminars.

- Introduce students to the economics of pricing and reimbursing pharmaceutical products, to explore different models of pricing and reimbursing medicines in OECD countries, including rate of return regulation, value-based pricing, cost-plus pricing, external price referencing and internal reference pricing, among others.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum of 24 hours during Winter Term.

There will be a departmental reading week in Week 6 of term.

Formative coursework: A formative essay under exam conditions (1 question in 1 hour) will be a requirement and is to be submitted immediately after the revision session.

Indicative reading: 1. E Mossialos, M Mrazek & T Walley (eds), *Regulating Pharmaceuticals in Europe. Striving for Efficiency, Equity and Quality*, Buckingham, Open University Press (2004)

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

HP425 Half Unit

Statistical Methods in Health Care Economic Evaluation

This information is for the 2024/25 session.

Teacher responsible: Dr Ranjeeta Thomas

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: This course assumes knowledge of elementary mathematics and statistics. Students who wish to take HP425, but who have not taken an introductory university course in statistics or econometrics, may wish to consider auditing MY451 (Introduction to Quantitative Analysis) in Autumn Term in order to prepare themselves for this course. Students who are unsure whether they have the requisite background are encouraged to approach the Lecturer before the start of Winter Term.

This course is envisaged to be complementary to HP422 (Cost-Effectiveness Analysis in Health Care), which is offered in Autumn Term.

Course content: This course develops the statistical and modelling techniques necessary to apply economic evaluation to the health care sector. Introduction to random variables and probability distribution, linear regression analysis, logistic regression analysis, survival analysis for health outcomes, survival analysis for treatment costs, parametric and non-parametric approaches for missing data, economic evaluation and clinical trials. Estimation of confidence intervals for cost-effectiveness ratios. Transformation of ratios - net benefit approach. Presentation of results, acceptability curves.

Teaching: This course will be delivered through a combination of lectures and workshops totalling a minimum 30 hours during Winter Term. Students will also take part in computer workshops to complete problem datasets and practice key skills from the course.

Formative coursework: 1000 word essay

Indicative reading: A full reading list is provided at the start of the course. The course makes use of selected parts of the following texts:

- M Drummond & A McGuire (eds), *Economic Evaluation in Health Care: Merging Theory with Practice*, OUP, 2001.
- D Machin, YB Cheung & MKB Parmar, *Survival analysis: a practical approach*, 2nd edn, Wiley, 2006.
- J Klein & M Moeschberger, *Survival Analysis: Techniques for Censored and Truncated Data*, 2nd edn, Springer, 2005.
- M Cleves, W Gould, R Gutierrez & Y Marchenko, *An Introduction to Survival Analysis Using Stata*, 3rd edn, Stata, 2010.
- M Drummond, M Schulpher, K Claxton, G Stoddart & G Torrance, *Methods for the Economic Evaluation of Health Care Programmes*, 4th edn, OUP, 2015.
- M Gold, J Siegel, L Russell & M Weinstein, *Cost-Effectiveness in Health and Medicine*, OUP, 1996.
- M Johannesson, *Theory and Methods of Economic Evaluation of Health Care*, Kluwer, 1996.
- P Johansson, *Evaluating Health Risks: An Economic Approach*, CUP, 1995.

Assessment: Project (100%, 4000 words) in the ST.

HP426 Half Unit Applied Health Econometrics

This information is for the 2024/25 session.

Teacher responsible: Dr Ilias Ioannis Kyriopoulos

Availability: This course is compulsory on the MSc in Health Data Science and MSc in International Health Policy (Health Economics). This course is available on the MSc in International Health Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Most research questions, in health economics require students to apply econometric techniques. This course will introduce these techniques and students exiting the course can expect to have acquired a competency in econometrics as it is applied to health economics. The seminars - which are lab based - will allow students to apply these methods to practical problems using Stata and interpret the results.

This content of this course may be useful to those considering the half unit HP423 Advanced Health Economics.

Teaching: This course will be delivered through a combination of lectures and workshops totalling a minimum 25 hours in Autumn Term. Students will take part in computer workshops to complete problem datasets and practice key skills from the course. There will be a departmental reading week in Week 6 of term.

Formative coursework: One formative assessment will require the analysis of some data in STATA and the description of the results.

Indicative reading:

Assessment: Project (100%, 3500 words) in the WT.

100% Research project (data analysis with STATA and write-up of 3,500 words) 160

HP428 Half Unit Randomised evaluations of health programmes: from design to implementation

This information is for the 2024/25 session.

Teacher responsible: Dr Mylene Lagarde COW.3.02

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. Places are allocated first to students in the Department of Health Policy and then on a first come first served basis.

Course content: Randomized trials have long been used in the clinical world to test the efficacy of medical treatments. Increasingly, social scientists have used the same approach, randomly assigning groups to different interventions, in order to determine which policies are most likely to address the key behavioural problems faced by health systems, from inadequate provider performance to low adherence to treatment or risky health behaviours.

This course proposes a hands-on and intuitive approach to designing and conducting a randomised evaluation of a

behavioural health programme. The aim of the course is to provide students with the skills required to design and implement a successful randomised evaluation. By the end of the course, students should be able to:

- Explain the reasons for undertaking randomised evaluations;
- Design and plan a randomised experiment to ensure it answers relevant questions, informed by a conceptual framework;
- Understand the technical aspects of the randomised evaluation, including be able to perform and understand simple sample size calculation;
- Explore potential threats to randomisation, and implement strategies to mitigate them;
- Determine how to best measure the outcomes of interest, including reflecting on the accuracy of survey instruments;
- Understand the best practices in how to conduct and manage fieldwork, and follow ethical principles to conducting research.
- Understand the best practices to analyse data from different types of randomised evaluations.

Seminars will be designed to encourage students to critically engage with the topics and apply the technical skills taught in lectures. Each seminar will be closely aligned with the lecture content to give students the opportunity to apply the new knowledge. Case studies will be chosen from various cultural backgrounds, to allow the presentation of a diverse range of settings and issues. Throughout the courses, but more extensively in the second half of the term, seminars will be dedicated to discussing issues and problems raised in lectures in relation to the project chosen by students in their group for the research protocol.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum of 20 hours during Winter Term. Seminars will take place in small groups and consist of a mix of case studies and discussions/presentations of the students' own work. Ahead of the seminars students will work in small groups on structured learning activities set by the course lead. Each seminar will also be a forum for discussing, presenting and receiving feedback on students' research protocols.

There will be a departmental reading week in Week 6 of term.

Formative coursework: A draft protocol. Students will be asked to submit a short 1,500 word draft protocol by week 5. While some aspects of their work may still be work in progress (e.g. using bullet points), students will be expected to write up the start of their protocol in a detailed way. Detailed feedback will be given to each student.

Indicative reading: The main textbook that will be used throughout the course is:

- Glennerster, R., & Takavarasha, K. (2013). *Running Randomized Evaluations: a Practical Guide*. Princeton University Press.
- Other useful resources include:
- Gerber, A. S., & Green, D. P. (2012). *Field Experiments: Design, Analysis and Interpretation*. New York, NY: Norton.
 - Duflo, Esther, et al. (2006) *Using Randomization in Development Economics Research: A Toolkit*.
 - White, Howard (2009) 'Theory-based impact evaluation: principles and practice', *Journal of Development Effectiveness* 1(3)
 - Drost, E.A. (2011) *Validity and Reliability in Social Science Research*. *Education Research and Perspectives*, 38, 105- 123
 - Olken, B. A. (2015). "Promises and Perils of Pre-analysis Plans." *Journal of Economic Perspectives* 29(3): 61–80.
 - Rachel Glennerster and Shawn Powers *Balancing Risk and Benefit: Ethical Tradeoffs in Running Randomized Evaluations*
 - Dupas, P., & Miguel, E. (2017). *Impacts and Determinants of Health Levels in Low-Income Countries*. In E. Duflo & A. Banerjee (Eds.), *Handbook of Field Experiments*: North Holland.
- Other general interest books that discuss randomised evaluations (applications, challenges) include:
- Halpern, D. (2016). *Inside the Nudge Unit*. London, Penguin Press.
 - Leigh, A. (2018). *Randomistas: How Radical Researchers Are Changing Our World*, Yale University Press.

Assessment: Research proposal (100%) in the WT.

The objective of the research protocol (4,000 words max) will be to plan the randomised evaluation of a particular health programme. Students will be asked to choose an intervention

to address a particular behavioural problem from a proposed list (e.g. increasing health insurance uptake, improving doctor performance or quality of care; reducing risky health behaviours; increasing patient adherence to treatment etc.). Students will also be given the option to choose their own topic (pending agreement by their seminar leader).

HP429 Half Unit Not available in 2024/25

Behavioural Incentive Design in Health and Health Care

This information is for the 2024/25 session.

Teacher responsible: Prof Joan Costa-Font COW 1.06

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

Access to the course will be given in priority to students from the Department of Health Policy.

Course content: The course covers the role of social and monetary incentives in modifying related health behaviour, and especially prevention and health care use. It will primarily draw on theoretical frameworks from several social sciences including applied microeconomics and behavioural economics, psychology, and sociology to provide an integrated framework about how to think about incentives in health and health care. The course will extend health economics teaching to cover quasi-rational behaviour and behavioural economics issues, and it will primarily focus on non-experimental evidence, although it will sometimes draw from policy and quasi-experiments. Its main purpose will be to discuss key theoretical and empirical background to guide the design of health and health care policies.

The course will focus on the following issues: Quasi-rational actor and motivation. Risk-benefit decision-making framework. Monetary and non monetary incentives. Esteem, Stigma. Obesity and payments. Monetary Incentives, co-payment design, Social Incentives. Reference Points. Risk preferences and perceptions. Locus of Control and Health and Health Care Behaviour. Anchoring and social cues. Taxes and Health: the role of Sin Taxes. Subsidies and Health: the role of conditional cash transfers. Myopia and Insurance Purchase: the case of long-term care insurance. Defaults and Presumed Consent. Motivation Crowding-Out and organ Donation. Information provision: risk information campaigns on food labelling, GM food. Stigma and Esteem: Smoking, Obesity. Cultural economics of health and health care: the role of traditional medicines. Body Self-Identity and Anorexia. Sleep and working time trade-off. Media, narratives and health-related behaviour. Culture, social norms: use of traditional medicine. Identity and blood donation, Food disorders. Health Inequality Aversion and Attitudes to Health Care. Behavioural incentives private and public health insurance design.

Teaching: This course will be delivered through a combination of lectures, seminars and workshops totalling a minimum 25 hours during Winter Term. Students will take part in seminars presenting key readings and leading discussion. Students will work in small groups in workshops to develop skills in specific health policy problems and prepare their project to be presented to the entire class and submitted as a course assessment.

Formative coursework: Students will submit slides of a presentation based on their group project and complete in-class quizzes

Indicative reading: Costa-Font, J., Hockley, T., & Rudisill, C. (2023). *Behavioural Incentive Design for Health Policy: Steering for Health*. Cambridge University Press.

Assessment: Essay (100%, 3000 words) in the ST.

The assessment will be an individual essay based on group project work.

HP431 Half Unit

Dissertation in Health Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Ranjeeta Thomas, Dr Olivier Wouters and Dr Huseyin Naci

Availability: This course is compulsory on the MSc in Global Health Policy, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is not available as an outside option.

Course content: The dissertation could be on any topic relevant to topics studied in the student MSc. It should attempt to integrate approaches and knowledge learned across courses and present results to address a health policy issue or a problem identified through the use of either primary or secondary data. It must demonstrate adequate knowledge of relevant theoretical and empirical literature in the field. In addition, careful analysis of the policy implications and formulation of policy recommendations is essential. The main body of the dissertation should, in principle, include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.

Teaching: 4 hours of workshops.

The course comprising a total of two 2-hour lectures that will focus on issues pertaining to the dissertation (topic selection, structure, methods, result reporting, ethics approval), as well as general guidance on potential methodological approaches. The course will serve as a means to assist students with the preparation and finalisation of their dissertation proposals. In this context, students will also receive feedback and assistance from their supervisors, with whom they will need to meet separately.

These will be complemented by sessions of individual supervision.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT and ST.

This will comprise of your dissertation proposals which must be completed by all students.

Indicative reading: Dunleavy, P. (1986) *Studying for a Degree in the Social Sciences*, Macmillan.

(See Chapter 5: Writing a Dissertation)

Denscombe, M. (2007) *The Good Research Guide: for small-scale social research projects*.

Maidenhead: Open University Press. H61 D41

Dunleavy, P. (2003) *Authoring a PhD: how to plan, draft, write and finish a doctoral thesis or*

dissertation. Basingstoke: Palgrave-Macmillan. LB2369 D92

Grix, J. (2004) *The Foundations of Research*. Houndmills : Palgrave Macmillan LB2369 G87

Rudestam, K. and Newton, R. (2001) *Surviving Your Dissertation: a comprehensive guide to*

content and process. London: Sage. LB2369 R91

Assessment: Dissertation (100%, 6000 words).

All students undertaking a dissertation are required to submit an ethics form via LSE's Research Ethics Submission System, irrespective of their research topic, in order to ensure that their study is conducted with integrity and in compliance with ethical principles.

HP432 Half Unit

Mental Health Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Martin Knapp

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available as an outside option to students on other programmes where regulations permit.

The proposed course should appeal to students interested in the challenges of, and policy responses to mental illness across a wide range of societies and economies.

Priority will be given to students from the Health Policy Department.

Pre-requisites: Students are required to have some knowledge of health systems or mental health issues.

Course content: The aim of this course is to consider how public policy can be shaped to address the many personal, social and economic challenges posed by mental illnesses, across the full life-course (indeed, some mental illnesses start earlier, with origins in the womb). Mental health will be considered in a range of contexts: high-, medium- and low-income settings. An important emphasis will be on the global nature of the challenges, and the need to find responses that have relevance across different societies.

The strong associations with disadvantage will also be a core theme running through the course, linked to social and other determinants of (mental) health. Other key areas of policy-making will be covered, including how decision-making balances the roles of different stakeholders, particularly individuals with lived experience of mental illness, families and communities.

We will look at whether and how policy decisions are based on considerations of (and evidence about) the effectiveness, cost-effectiveness and viability of treatments, and the social impact of prevention and interventions in different cultural contexts and at different life-stages.

Students will discuss issues and strategies on how public policy – not just in the health sector but more widely – can play crucial roles in prevention (or at least risk-reduction), access to and funding of treatments, recovery and re-integration, social and economic inclusion, and so on. Some of the material in the course will be based on research recently or currently undertaken at LSE.

Course outline (by week)

1. What is mental illness?
2. Responses? What are the societal and policy responses to mental illness?
3. Stigma and discrimination
4. Perinatal mental health
5. Child and adolescent mental wellbeing
6. User / survivor movements
7. Adult mental health
8. Old age mental health
9. Global mental health, poverty and socio-economic disadvantage
10. Enduring lessons for mental health policy

Teaching: The course will be delivered in no less than 22 hours and consists of lectures and seminars delivered in the Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the Winter Term (of up to 1500 words) during the course, which could be linked to the topic of their group-based project.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

HP433 Half Unit Health Care Regulation

This information is for the 2024/25 session.

Teacher responsible: Dr Rocco Friebe COW 2.09

Availability: This course is compulsory on the MSc in International Health Policy. This course is available on the MSc in Global Health Policy, MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in International Health Policy (Health Economics) and MSc in Regulation. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Health care systems are complex organisational structures governed by an ambition to provide high-quality health care services to its population. In this context, governance describes a framework through which individual stakeholders are being held accountable to improving the quality of services and safe-guarding high standards of care. In turn, this framework ensures a consistent evaluation and regulation of care processes and is crucial for the efficient functioning of health care systems around the world.

This course provides a detailed perspective on the complexities surrounding the interplay between different stakeholders in the regulation of health care markets and the problems facing the management of health care services. The course builds on theoretical concepts and on principles of sound economic analysis and exposes students to learning from regulatory experiences beyond the health sector, including from data sciences, and medical research environments.

Following completion of this course, students will have an advanced understanding of the theoretical underpinnings of regulation and governance and they will be familiar with key topics of current concern, including the problems associated with health care management, planning, purchasing and commissioning, and quality of care. Knowledge drawn from this course will equip students with the necessary skills required to understand the complexities of health care regulation and governance and to critically assess policy decisions in their respective health systems.

Teaching: This course will be taught in no less than 25 hours and will consist of lectures and seminars delivered in the Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the WT.

1 x 1000 word essay. Students will be able to submit a short 1000 word essay (on any topic of their choice, but taken from the list of debates covered in the seminars). Students are expected to submit their formative assignment within one week of participating in the seminar debate that is linked to the topic of their choice. Therefore, submission of formative essays will be in waves, and not all at once. These will be graded and feedback given to students. This allows students to get valuable experience of writing at MSc level, and the expectations of the summative assessment. For example, if a student's formative work flagged particular concerns this could be addressed ahead of the summative submission.

Assessment: Essay (100%, 3000 words) in the ST.

HP434 Half Unit Methods and Data for Health Systems Performance Assessment

This information is for the 2024/25 session.

Teacher responsible: Dr Rocco Friebe

Availability: This course is compulsory on the MSc in Health Data Science. This course is available on the MPA in Data Science for Public Policy. This course is not available as an outside option. Students will not be permitted to take both HP402 Measuring Health Systems and HP434 Methods and Data for Health Systems Performance Assessment courses.

Course content: This course aims to present a framework to discuss the opportunities and challenges with performance measurement in health care, examine the various dimensions and levels of health system performance, identify and apply the measurement instruments and analytic tools needed, and examine the implications of these issues for policy makers and regulators. Lectures generally focus on measuring health system performance in high-income countries but draw on the experience of other countries where relevant.

After taking this course student will be able to:

1. understand the complexity of different health systems
2. appreciate the challenges, approached and opportunities in performance measurement in four dimensions; population health, patient outcomes, equity, quality and appropriateness of care, and productivity
3. be familiar with the construction of key indicators used by health systems and providers to measure population health, patient outcomes, equity, quality of care and productivity
4. apply different methodologies used for risk adjustment, to develop composite measures, and to measure attribution and causality

5. identify key issues relevant to policy makers relating to policy evaluation using measures of performance

Teaching: Teaching will be delivered in no less than 29 hours and includes lectures, seminars and workshops delivered in the Winter Term.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Indicative reading:

- Papanicolas I, Smith P (Eds) *Health System Performance Comparison: An Agenda for Policy, Information and Research*. Maidenhead: Open University Press, 2013;
- P Smith, E Mossialos, I Papanicolas S. Leatherman (Eds), *Performance measurement for health system improvement: experiences, challenges and prospects*. Cambridge University Press, 2010.

- The world health report 2000: Health systems: Improving performance, Geneva: WHO Publications

Assessment: Presentation (25%) in the WT.
Essay (75%, 3000 words) in the ST.

HP435 Half Unit Global Access to Medicines

This information is for the 2024/25 session.

Teacher responsible: Dr Olivier Wouters COW 2.06

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in Health and International Development, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students from the Department of Health Policy in the first instance.

Course content: An estimated 1 in 4 people worldwide lack access to essential medicines, with prescription drugs often unaffordable or unavailable. The United Nations' Sustainable Development Goals call for member states to guarantee "access to safe, effective, quality and affordable essential medicines and vaccines for all" by 2030. Yet precisely how this will be achieved remains highly contested among global health stakeholders.

This course asks students to explore the complex and contentious world of drug development and regulation across the globe. It will touch on topics such as incentives for research and development in the drug industry, intellectual property rights and medicines, and pricing and financing of essential medicines. The course lies at the intersection of health and public policy, economics, public health, and development studies.

The lectures and seminars will draw on real-world case studies to explore key policy and economic issues affecting pharmaceutical markets in a range of countries, with an emphasis on the affordability, availability, and accessibility of medicines and vaccines. The course will investigate these issues from the perspectives of different stakeholders, including health ministries and other government bodies, drug companies, non-governmental organizations, physicians, pharmacists, and patients.

By the end of this course, students should be able to:

- 1 Describe key features of pharmaceutical markets.
- 2 Identify policy and economic issues affecting access to medicines globally.
- 3 Assess national drug policies using an access to medicines framework.
- 4 Compare and contrast pharmaceutical policies regionally or internationally.

5 Evaluate pharmaceutical policy options given a set of aims and assumptions.

6 Critically appraise the quality of theoretical and empirical studies of pharmaceutical policies.

Teaching: This course will be taught in no less than 25 hours and will consist of lectures and seminars delivered in the Autumn Term.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: 1. Bigdeli M, Jacobs B, Tomson G, et al (2013).

"Access to medicines from a health system perspective." *Health Policy and Planning*, 28: 692-704.

7. Wouters OJ, Shadlen KC, Salcher-Konrad M, et al (2021).

"Challenges in ensuring global access to COVID-19 vaccines: Production, affordability, allocation, and deployment." *The Lancet*, 397(10278): 1023-1034.

Assessment: Essay (100%, 4000 words) in the WT.

HP436 Half Unit Evidence Appraisal for Health Policy Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Emilie Courtin

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students in the Department of Health Policy.

Course content: This course aims to introduce students to different ways in which evidence is generated and can be used to inform health policy. Taking a case-based approach, students will be introduced to a selection of key health issues and approaches to intervention in order to appreciate how different types of quantitative and qualitative evidence can inform analyses of complex policy problems. Students will also learn to interpret and critique health policy research and formulate policy-relevant conclusions from study results. Examples will be drawn from low-, middle-, and high-income countries, and will focus on forms of evidence and interventions that regularly feature in health policy analysis. Students will also be encouraged to draw on examples from their own countries and to relate the course content to their professional experience. Students will gain practical skills and learn to apply the concepts covered during the course to develop an evidence-informed policy brief.

Following the completion of this course, students will have an advanced understanding of the role of research in policy analysis and the role of theory in health policy research. Students will also be able to interpret the results of research concerning contemporary health issues and interventions, formulate policy conclusions, and develop an evidence-informed policy brief. Furthermore, students will be able to critically discuss evidentiary hierarchies in health policy and describe the respective roles of different approaches to evidence generation and their use in informing specific health policy questions.

Teaching: The course will be delivered in no less than 28 hours during Autumn Term, and consist of lectures and seminars.

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT.

Indicative reading:

- Craig, P., Dieppe, P., Macintyre, S., Michie, S., Nazareth, I. and Petticrew, M., 2008. Developing and evaluating complex interventions: the new Medical Research Council guidance. *BMJ*, 337, a1655.
- World Health Organization, 2012. Health policy and systems research: a methodology reader. Geneva: World Health Organization.

Assessment: Policy brief (100%) in the WT.

1 x 3000 word policy brief.

HP437 Half Unit

Health Equity, Climate Change and the Common Good

This information is for the 2024/25 session.

Teacher responsible: Dr Miqdad Asaria (COW.3.07)

Availability: This course is available on the MSc in Global Health Policy, MSc in Health Data Science, MSc in Health Policy, Planning and Financing, MSc in International Health Policy and MSc in International Health Policy (Health Economics). This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to Department of Health Policy students.

Pre-requisites: Whilst there are no formal pre-requisites for the course, the course does assume a familiarity with mathematical ways of thinking and a willingness to engage in groupwork.

Course content: Rising societal inequalities and climate change are two of the most important challenges facing the world today. "The cry of the Earth and the cry of the poor" are intimately related and together have immense implications for health and wellbeing in general, and even more so for the health and wellbeing of the marginalised.

In this course we examine the inter-related historical determinants of social inequality and climate change to understand how and why we have reached the contemporary crisis that we find ourselves in and the implications of this crisis for health inequality. We reflect on the ideas of social justice and the common good to understand what the current state of the world tells us about who and what we collectively value and use this as a framework to re-imagine how we would like our world to look. Finally, we apply tools from public economics, game theory and public choice theory to understand and model possible solutions to the collective action problems that lie at the heart of these crucial issues and can help us begin to progress towards our re-imagined futures.

The course will take a hands-on approach with students working in groups to build policy simulation models in the form of a board game to synthesise, draw insights from and critically engage with the key ideas covered in the course.

Teaching: 30 hours of workshops in the AT.

The course will be organised around 10 weekly 3-hour group-based workshops.

Formative coursework: Students will be expected to produce 1 essay in the AT.

The formative assessment comprises a 500 word critical assessment of another groups modelling project with recommendations on how to improve it

Indicative reading:

- Donella Meadows (2008) "Thinking in Systems: A Primer"
- Naomi Klein (2016) "Let Them Drown. The Violence of Othering in a Warming World" LRB
- Amartya Sen (2016) "Collective Choice and Social Welfare: An Expanded Edition"
- Pope Francis (2015) "Laudato Si': On Care for Our Common Home"
- Mancur Olsen (1965) "The Logic of Collective Action: Public

Goods and the Theory of Groups"

- Elinor Ostrom (1990) "Governing the commons: The Evolution of Institutions for Collective Action"
- Thomas Piketty (2021) "A brief history of equality"
- David Graeber & David Wengrow (2021) "The dawn of everything: a new history of humanity"
- Amitav Ghosh (2021) "The Nutmeg's Curse: Parables for a Planet in Crisis"
- Andreas Malm (2021) "How to blow up a pipeline"

Assessment: Essay (30%, 1000 words) and video (70%) in the WT. The summative assessment for the course comprises a 5-7 minute video clip based on the group-based modelling project (70%) and a 1,000 word individual essay critically reflecting on the final model produced (30%).

HY400

Crisis Decision-Making in War and Peace 1914-2003

This information is for the 2024/25 session.

Teacher responsible: Dr Svetozar Rajak SAR 3.15

Availability: This course is compulsory on the MSc in International Affairs (LSE and Peking University). This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in History of International Relations, MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: The course is intended for students with or without a detailed knowledge of the international relations of the twentieth century. Students without a detailed knowledge are advised to undertake preliminary background reading.

Course content: The history of international relations from the First World War to the Iraq War. Particular stress is placed upon key turning points and on crisis decision-making. Topics examined in this course include the outbreak of the First World War in 1914; peace-making, 1919; Manchuria, Abyssinia and the crises of collective security; the Munich agreement; the Nazi-Soviet Pact and the outbreak of war in 1939; Hitler's decision to invade the Soviet Union; the outbreak of the Pacific War; the creation of the state of Israel, 1948-49; the Berlin Blockade; the outbreak and escalation of the Korean War; the Suez Crisis; the Cuban Missile Crisis; the US and Vietnam, 1961-65; the Arab-Israeli Wars of 1967 and 1973; the collapse of the Soviet bloc and end of the Cold War; the Gulf War, 1990-91; and the road to the 2003 Iraq War.

Teaching: 20 hours of seminars in the AT. 1 hour of lectures and 20 hours of seminars in the WT.

There is a reading week in week 6 of the AT and the WT. There is a revision lecture at the end of the WT. Students will be expected to read widely in documentary and other primary sources, and to participate actively in the seminars, which will address the historiographical debates raised in the secondary literature on the topics covered.

This course has no designated weekly lectures; it is taught through two-hour seminars.

Students wishing for a survey of the period and topics covered by the course are welcome to attend or listen to the lectures for the undergraduate course HY116 International Politics since 1914.

Formative coursework: Students will write two essays (one in the AT and one in the WT), of up to 2,500 words in length, drawing upon primary sources.

Indicative reading: Full bibliographies are provided on the HY400 Moodle. Students may consult the following introductory accounts: W. R. Keylor, *The Twentieth-Century World and Beyond: an International History*; A. Best, J. M. Hanhimäki, J. A. Maiolo, and K. E. Schulze, *International History of the Twentieth Century and Beyond*; S. Marks, *The Ebbing of European Ascendancy: an International History of the World, 1914-1945*; Z. Steiner, *The Lights*

that Failed: European International History, 1919-1933; Z. Steiner, *The Triumph of the Dark: European International History, 1919-1939*; R.W. Boyce and J. A. Maiolo (eds.), *The Origins of World War Two: The Debate Continues*; O. A. Westad, *Reviewing the Cold War: Approaches, Interpretation, Theory*; D. J. Reynolds, *One World Divisible: a Global History since 1945*; M. P. Leffler and O. A. Westad, eds, *The Cambridge History of the Cold War*.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

HY411 Not available in 2024/25

European Integration in the Twentieth Century

This information is for the 2024/25 session.

Teacher responsible: Prof Nicholas Ludlow SAR 2.16

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Comparative Politics, MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A prior knowledge of 20th century European history will be an advantage. Students unfamiliar with the subject should do some preliminary reading. A reading knowledge of French and/or German will be useful but in no sense essential.

Course content: The antecedents and development of Western European integration from the First World War to the 1990s. European integration before 1914; German and Allied projects during the First World War; inter-war developments and the Briand Plan; the Nazi New 'Order'; Resistance and Allied planning during the Second World War; the impact of the Marshall Plan; Federalism and Christian Democracy; the Schuman Plan and the Coal and Steel Community; the European Defence Community project; the Treaties of Rome; the Common Agricultural Policy; the integration policies of the Six and Britain; de Gaulle and the Communities; enlargement; monetary integration; developments in the 1970s and 1980s; Treaty of Maastricht.

Teaching: 7 hours of lectures and 13 hours and 30 minutes of seminars in the AT. 3 hours of lectures and 15 hours of seminars in the WT. 1 hour and 30 minutes of seminars in the ST.

There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

Formative coursework: Three essays will be required in the course of the year. The essay in the LT will be an assessed piece of work counting towards the final assessment.

Indicative reading: Full bibliographies are provided. As introductory reading, students should consult: P M Stirk, *A History of European Integration since 1914* (London, 1996); D. Dinan, ed, *Origins and Evolution of the European Union* (Oxford, 2006); M. Gilbert, *European Integration: a Concise History* (Lanham, Md, 2012); J Gillingham, *Coal, Steel, and the Rebirth of Europe, 1945-55* (Cambridge, 1991); A S Milward, *The Reconstruction of Western Europe, 1945-51* (London, 1984); A S Milward, *The European Rescue of the Nation State* (London, 1992); N P Ludlow, *Dealing with Britain: the Six and the First UK Application to the EEC* (Cambridge, 1997); W I Hitchcock, *France Restored: Cold War Diplomacy and the Quest for Leadership in Europe, 1944-1954* (Chapel Hill, 1998); A Moravcsik, *The Choice for Europe: Social Purpose and State Power from Messina to Maastricht* (Cornell, 1998); N P Ludlow, *The European Community and the Crises of the 1960s* (London, 2006); W. Kaiser, *Christian Democracy and the Origins of the European Union* (London, 2008); W. Kaiser, B. Leucht and M. Rasmussen, . *The History of the European Union: Origins of a Trans- and Supranational Polity 1950-72* (London, 2009); A C

Knudsen, *Farmers on Welfare: The Making of Europe's Common Agricultural Policy* (Cornell, 2009).

Assessment: Exam (75%, duration: 3 hours) in the spring exam period.

Essay (25%) in the WT.

HY422

Presidents, Public Opinion, and Foreign Policy, from Roosevelt to Reagan, 1933-89

This information is for the 2024/25 session.

Teacher responsible: Prof Steven Casey SAR 2.10

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Using a range of secondary sources, the course explores the dynamic interaction between presidents, public opinion, and foreign policymaking in order to test a range of common assumptions about the determinants of American foreign policy in the period from 1933 to 1989. The course explores the interaction between opinion and policy in three periods: First, the Roosevelt era, with emphasis on FDR's response to American isolationism, the media and public attitudes towards Nazi Germany and the Second World War, and the influence of public pressures upon US policy. Second, the period of consensus on the Cold War, examining how Americans viewed the Communist world before, during and after the Korean War, the influence of the atomic bomb upon popular thinking, the limits of dissent in the period of McCarthyism, and the impact of public opinion upon policy-making during the Berlin and Cuban crises. Third, the period when the Cold War consensus broke down, focusing not just on the opposition to the Vietnam war and the new cleavages that emerged within US society but also on the changing nature of the American media and the very different attempts made by Nixon, Carter and Reagan to respond to this new environment.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 1 hour of seminars in the ST.

There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: Students are required to produce two formative essays during the year. There will also be a mock exam (a one-hour timed essay).

Indicative reading: A full bibliography accompanies the course and the teacher will advise on reading. M Small, *Democracy and Diplomacy* (1996); ; S Casey, *When Soldiers Fall* (2014); S Casey, *Cautious Crusade* (2001); S Casey, *Selling the Korean War* (2008); D Foyle, *Counting the Public In* (1999); R Sobel, *The Impact of Public Opinion on US Foreign Policy since Vietnam* (2001) O R Holsti, *Public Opinion and American Foreign Policy* (1996).

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

HY424

The Napoleonic Empire: The Making of Modern Europe

This information is for the 2024/25 session.

Teacher responsible: Dr Paul Keenan SAR.2.13

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International and Asian History and MSc in International and World History (LSE & Columbia).

This course is available as an outside option to students on other programmes where regulations permit.

Course content: The Napoleonic Empire was crucial in the formation of modern Europe. Much of Europe was dominated by the Napoleonic Empire and its impact was felt across the continent, as well as in parts of the non-European world. Through an analysis of those states and regions directly incorporated into the Napoleonic Empire, this course will examine the extent of the direct and indirect influence of this era on the development of what we understand by a modern European society and a modern state system. The course analyses how this empire was created, as well as the states and societies that it forged during the period of Napoleonic rule and in its aftermath. The developments embodied in and practised by the Napoleonic Empire will be compared with those of its major rivals, whether inspired by or in reaction to the Napoleonic model. This comparison encourages the analysis of the varied and sometimes contradictory elements of this era – from the impact of the growth of secularisation, constitutionalism and the codification of laws to the beginnings of Romanticism, manifestations of early nationalism and monarchical reaction after 1815. The course will also assess the significance of both the reality and the 'myth' of empire, in the assessment of contemporary observers and also in the works of later nineteenth- and twentieth-century scholars.

The course will cover the following topics: the origins of the Empire; changes in armies and warfare; analysis of the changing nature of the Napoleonic Empire from the core to the periphery; the impact of the Empire on allied and rival states; Europe's relationship with the non-European world during this period; the diplomacy of war and the 'system' that emerged after 1815; the impact of the Napoleonic era on the modernisation of society, the economy, law and the state; early manifestations of national consciousness and patriotism in Spain, Russia, and the Italian and German states; liberal and conservative reactions to the post-war settlement and the Restoration period between 1815 and 1825; the origins and development of Napoleonic imagery and mythology in the nineteenth and twentieth centuries.

Teaching: 20 hours of seminars in the Autumn Term. 20 hours of seminars in the Winter Term. 1 hour of seminars in the Spring Term.

There will be a reading week in the AT and the WT.

Formative coursework: Students will be expected to produce 1 essay in the AT, 1 essay in the WT and 1 essay in the ST. The third essay will be a mock exam answer, which can be completed by students over the Easter break. It will be graded and students given written feedback in the first week of the Spring Term.

Indicative reading: A detailed reading list will be issued at the beginning of the course.

Useful introductory works include: A. Mikaberidze, *The Napoleonic Wars: A Global History*; G. Ellis, *Napoleon*; G. Ellis, *The Napoleonic Empire*; M. Broers, *Europe under Napoleon 1799-1815*; S. J. Woolf, *Napoleon's Integration of Europe*; P. Dwyer (ed), *Napoleon and Europe*; C. Esdaile, *Napoleon's Wars: An International History*; O. Connolly, *Napoleon's Satellite Kingdoms*; P. Geyl, *Napoleon, For and Against*.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (35%, 3500 words) in the WT.

Presentation (15%) in the AT and WT.

HY429

Anglo-American Relations from World War to Cold War and Beyond, 1939-2003

This information is for the 2024/25 session.

Teacher responsible: Prof Nigel Ashton SAR M.09

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History

of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course analyses the changing nature of the Anglo-American "special" relationship from its creation against the backdrop of the Second World War in Europe through to the end of the Cold War and 9/11. It will illuminate the foundations of the relationship in terms of culture and ideology, and also the threat posed by common enemies in the Second World War and Cold War. The competitive dimension of the Anglo-American relationship will also be highlighted as a means of explaining instances of discord such as the Suez Crisis of 1956.

The topics covered include: Anglo-American relations in historical perspective; the creation of the Anglo-American alliance, 1939-41; competitive co-operation in war strategy and politics, 1941-45; the American "Occupation" of Britain during the Second World War; the emergence of the Cold War in Europe, 1945-49; the Cold War in Asia, 1945-54; the Palestine question; the Suez Crisis, 1956; nuclear relations and the Skybolt Crisis; Kennedy, Macmillan and the Cuban Missile Crisis; Anglo-American relations and European integration, decolonisation and Anglo-American relations since 1945; the impact of the Vietnam War; the Cultural Cold War; intelligence co-operation; Anglo-American relations in the 1970s; Thatcher, Reagan and the Cold War in the 1980s; the Falklands War; the relationship in the 1990s; and the impact of 9/11 together with the Iraq War of 2003.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: Three pieces of written work must be submitted by students taking this course. These consist of two essays of up to 3,000 words in length and one timed class essay.

Indicative reading: For an introduction to Anglo-American relations, students should consult the following texts: K. Burk, *Old World, New World: the Story of Britain and America* (2007); D Reynolds & D Dimbleby, *An Ocean Apart: the Relationship between Britain and America in the Twentieth Century* (1988); J Dumbrell, 'A Special Relationship': *Anglo-American Relations from the Cold War to Iraq* (2006); C Bartlett, *The Special Relationship: A Political History of Anglo-American Relations Since 1945* (1992); W R Louis & H Bull (Eds), *The Special Relationship: Anglo-American Relations since 1945* (1984); D C Watt, *Succeeding John Bull: America in Britain's Place, 1900-75* (1984). A detailed reading list will be issued at the start of the course.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

HY432

From Cold Warriors to Peacemakers: the End of the Cold War Era, 1979-1999

This information is for the 2024/25 session.

Teacher responsible: Professor Kristina Spohr, SAR 2.17 and Dr Aaron Clift.

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: We explore international relations from the early 1980s to the late 1990s, examining tensions, rivalries and linkages not merely between the Western and Communist blocs,

but also within them. We will study the events reflecting the shift from the era of bipolarity to the post-Cold War world. The aim is to address from a historical perspective – from the vantage point of the ongoing Ukraine War which destroyed the post-Wall order – the diplomacy of the end of the East-West conflict, China's exit from the Cold War, German reunification, Soviet disintegration, Yugoslavia's bloody implosion, European integration, and NATO enlargement. The domestic bases of as well as the political relations between the leading figures (Gorbachev, Yeltsin, Reagan, Bush, Deng, Thatcher, Major, Mitterrand, Delors and Kohl) and respective government machineries will be covered. Major topics include Thatcherism; Reaganomics; Gorbachev's new thinking; the 1989 revolutions; Kohl's unification drive; Soviet collapse and Russia's stillborn democracy; the Kuwait crisis and Yugoslavian Wars; America's unipolar moment; from the EC to the EU; the security arrangements of Russia and NATO after 1991.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a reading week in the AT and the WT.

Formative coursework: Students will be required to present one short class paper during the AT or the WT as well as to submit a practice essay (1,500 words) during the AT.

Indicative reading: A detailed course outline and reading list, subdivided by weekly topics, as well as selected documents will be available at the beginning of the course on Moodle. Key books include:

- Kristina Spohr, *Post Wall, Post Square* (2019);
- Philip Zelikow & Condoleezza Rice, *To Build a Better World* (2019);
- Hal Brands, *The Unipolar Moment* (2016);
- Vladislav Zubok, *Collapse* (2021);
- Kristina Spohr and David Reynolds, eds, *Transcending the Cold War* (2016)
- Margaret Thatcher, *The Downing Street Years* (1993);
- EHH Green, *Thatcher* (2006);
- Julius W Friend, *The Long Presidency, France in the Mitterrand Years* (1998);
- George Bush & Brent Scowcroft, *A World Transformed* (1999);
- William Taubman, *Gorbachev* (2018);
- Misha Glenny, *The Balkans 1804-1999* (2012);
- Saki Dockrill, *The End of the Cold War Era* (2005);
- Kenneth Dyson and Kevin Featherstone, *The Road to Maastricht* (1999);
- Sean Kay, *NATO and the Future of European Security* (1998);
- Daniel S. Hamilton and Kristina Spohr, eds, *Open Door: NATO and Euro-Atlantic Security After the Cold War* (2019).

Assessment: Essay (40%, 2500 words) in the WT.

Essay (60%, 3500 words) in the ST.

HY435

Ideology, State, Jihad: Political Islam from Ibn Taymiyya to ISIS

This information is for the 2024/25 session.

Teacher responsible: Dr Kirsten E. Schulze SAR 2.12

Availability: This course is available on the MA in Modern History, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia), MSc in Social Anthropology (Religion in the Contemporary World) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course has five objectives: i. To examine the evolution of political Islam as a set of ideas. ii. To compare and contrast different models of Islamic State. iii. To explore the strategies used by Islamist movements to Islamise a state as well as state strategies to prevent this. iv. To explore the phenomena of transnational Islamism and international jihadism. v. To familiarise the student with some of the primary sources (in translation) and the historiographical controversies. This course looks at the

evolution of Islamist philosophy and movements, focusing on ideas as well as intellectual, religious and political leaders. The key areas covered are: Islamist thinkers - Ibn Taymiyya, Wahab, Abdu, Rida, al-Banna, Qutb, Maududi, Khomeini, Faraj, Azzam and Zawaheri; Models of Islamic State - Iran, Pakistan, Afghanistan, and Malaysia; Islamist Movements – the Muslim Brotherhood, Islamic Jihad, Hizb'allah, Hamas, the Islamic Salvation Front, and Boko Haram; transnational Islam and international jihadism: Al-Qaeda, Jemaah Islamiyah, and ISIS.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: One formative essay (3000 words) in the Autumn Term.

Assessment: Essay (35%, 3500 words) in the WT.

Essay (35%, 3500 words) in the ST.

Presentation (15%) and class participation (15%) in the AT and WT.

HY436

Race, Violence and Colonial Rule in Africa

This information is for the 2024/25 session.

Teacher responsible: Dr Rishika Yadav SAR G.02

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines and debates the nature of colonial rule in Africa, its impact and its legacy. It is focused upon the violence inherent in this encounter, its different forms and origins. Fundamentally It seeks to provide an explanation of the conflicts which erupted in Africa after 1989 by developing a historical perspective from the pre-colonial period to the end of the Cold War.. It is essentially a political history but includes cultural, social and economic aspects. It often uses case studies from the British Empire in Africa and the Belgian Empire but 'other empires are available' as the saying goes. Topics covered include pre-colonial African kingdoms, the 'Scramble for Africa'; white settler culture and the colonial state; the origins of apartheid South Africa; the Mau Mau uprising in Kenya; the Congo crisis and the assassination of Patrice Lumumba; the rise and fall of 'white' Rhodesia; the genocide in Rwanda; the civil war in Sierra Leone; Mugabe and Zimbabwe; Somali warlordism and the 'collapsed state'. And last but by no means least Africa's so called first World War in the DRC. Histories of survival, trauma and healing are often present.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: Each student is required to write two essays and one mock exam.

Indicative reading: John Iliffe, *Africans: The History of a Continent* (CUP, 2017 edn); Cheikh Anta Diop, *Precolonial. Black Africa: A Comparative Study of the Political and Social Systems of Europe and Black Africa, from Antiquity to the Formation of Modern States* (1988); E Akyeampong et al, *Africa's Development in Historical Perspective* (CUP, 2014); Mary Kingsley, *Travels in West Africa* (Penguin Classic, 2015); Petina Gappah, *Out of the Darkness, Shining Light* (2020); Thomas Pakenham, *The Scramble for Africa* (Abacus, 1992); Sylviane A. Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

HY440

The Iranian Revolution

This information is for the 2024/25 session.

Teacher responsible: Dr Roham Alvandi SAR M.12

Availability: This course is available on the MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit. Please note that students taking this course cannot take GV4E7 Islamic Republic of Iran: Society, Politics, the Greater Middle East (H).

Course content: This course examines the origins of the 1978-79 Iranian Revolution in the cultural, diplomatic, intellectual, political, and social history of Pahlavi Iran. The course begins with the emergence of the modern Iran during the Constitutional Revolution in the Qajar era, before turning to the Iranian encounter with decolonisation and the Cold War under the Pahlavi monarchy. We discuss Iran's experience of American modernisation and the crisis of legitimacy that engulfed the last Shah of Iran, Mohammad Reza Pahlavi, following the 1953 coup in Iran. The course locates the origins of the Iranian Revolution in the global contest between the Shah and the Iranian opposition throughout the 1960s and 1970s, as both the state and its opponents contested notions of modernity, Shi'a Islam, universal human rights, and Third Worldism. Students are asked to look in depth at the politics and ideology of the Pahlavi state and the opposition forces arrayed against the Shah, both in a national and global context. A particular emphasis of the course is on the international relations of Pahlavi Iran, particularly Iran's relations with the United States. The course culminates with the fall of the Pahlavi monarchy in 1979 and the subsequent creation of the Islamic Republic.

Teaching: 10 x 2-hour seminars in the Autumn Term; 10 x 2-hour seminars in the Winter Term. There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: A 2,000-word essay in the Autumn Term.

Indicative reading:

- Abrahamian, Ervand, The Iranian Mojahedin (New Haven: Yale University Press, 1989).
- Janet Afary and Kevin B. Anderson, Foucault and the Iranian Revolution: Gender and the Seductions of Islamism (Chicago: The University Press of Chicago, 2005).

- Shakibi, Zhand, Pahlavi Iran and the Politics of Occidentalism: The Shah and the Rastakhiz Party (London: I.B. Tauris, 2020).

Assessment: Essay (35%, 3500 words) in the WT.

Essay (35%, 3500 words) in the ST.

Presentation (15%) and class participation (15%) in the AT and WT.

HY444

Latin America in the Cold War

This information is for the 2024/25 session.

Teacher responsible: Dr Tanya Harmer SAR M.11

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This seminar is designed to introduce students to new historical approaches to Latin America and the Cold War. It responds to new research and debates that have arisen in recent years regarding the meaning of the Cold War in a Latin American context. Students will examine the conflict's origins, who its protagonists were, the extent to which the superpowers were involved in it and its significance at a local, regional, and global level. The course places particular emphasis on the role of ideas and ideological struggles; the intersection between these ideas and the challenges of modernity and economic development; the causes of revolutionary and counter-revolutionary upheaval; debates about gender, morality and sexuality; the manifestations of violence and its effects; and the cultural Cold War; and memory. Students will be encouraged to explore the intra-regional and transnational dynamics of the Cold War in Latin America. They will study how events in one part of Latin America (for example, the overthrow of Jacobo Arbenz in Guatemala, the Cuban Revolution, the Brazilian and Chilean coups or the Central American crises in the 1980s) impacted upon other areas of region. The seminar will also devote time to looking at Latin America's experience of the Cold War from a global comparative perspective, particularly in contrast to other parts of the Third World. Although the seminar will mostly involve intensive reading and discussion of secondary sources, students will also be encouraged to reflect on new online archival material, published writings of principal thinkers and oral histories as a means of understanding key concepts and ideas.

Teaching: 10 x 2-hour seminars in the Autumn Term; 10 x 2-hour seminars in the Winter Term. There will be a reading week in the

Autumn and Winter terms.

Formative coursework: Students are required to write one 3,000 word formative essay in the Autumn Term and weekly discussion posts on Moodle.

Indicative reading:

- Michelle Chase, *Revolution within the Revolution: Women and Gender Politics in Cuba, 1952-1962* (2015)
- Benjamin Cowan, *Securing Sex: Morality and Repression in the Making of Cold War Brazil* (2016)
- John Dinges, *The Condor Years: How Pinochet and His Allies Brought Terrorism to Three Continents* (New York: The New Press, 2004);
- Thomas Field, Stella Krepp and Vanni Pettina, *Latin America and the Global Cold War* (2020)
- Cindy Forster, *The Time of Freedom: Campesino Workers in Guatemala's October Revolution* (2001)
- Piero Gleijeses, *Conflicting Missions: Havana, Washington, and Africa, 1959-1976* (2003);

- Odd Arne Westad, *The Global Cold War: Third World Interventions and the Making of Our Times* (2005);

Assessment: Essay (35%, 3500 words) in the WT.

Essay (50%, 5000 words) in the ST.

Class participation (15%) in the AT and WT.

HY446

Geo-Interventions and the Genealogy of the Anthropocene: The Transformation of Nature, Space, and Territory, 19th-21st centuries

This information is for the 2024/25 session.

Teacher responsible: Professor Paul Nolte

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: How do we reconceive modern societies (since, roughly, the 18th century) as agents in an intervention into nature, landscape, and resources? While today's consequences mostly affect the atmosphere, and are discussed as climate crisis, the roots of mankind making an indissoluble imprint on the planet has mostly been in what this course describes as call "geo-interventions", and more directly: as projects of digging the soil, drilling the earth, redirecting the waters.

This seminar will introduce M.A. students into the "Anthropocene perspective" in general, and discuss German developments from the 18th century to the present, in particular, albeit not be limited to Germany and Central Europe. Germany may be seen as an exemplary case for a modern society facing the challenge of the Anthropocene. Global approaches and case studies from other countries will be included, while the seminar also aims at a broad, interdisciplinary perspective that should be attractive not just for students of history, but of a variety of social sciences, too. The first semester will lay conceptual and empirical foundations, with a historical emphasis on the 19th century. In the second semester, the story will be continued for major problems of the

20th century and into the present, and with that, highlight political problems of governance and resistance. The seminar will cover themes such as the history of landscape, infrastructures, and earth interventions over many years.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: One formative essay of 2000-words, to be submitted in week 6 of the Autumn Term.

Indicative reading:

- **Introduction: Approaches to the History of Space** Charles S. Maier, *Once Within Borders. Territories of Power, Wealth, and Belonging Since 1500*, Cambridge, Mass. 2016, Introduction: A History of Political Space, pp.1-13, 299-303; Teresa Walch, "Editorial: Space and Place in Modern Germany", in: idem et al. (eds.), *Räume der deutschen Geschichte*, Göttingen 2022, pp. 7-19
- **The Origins of Modern Space: A Global Perspective** Jürgen Osterhammel, *The Transformation of the World: A Global History of the Nineteenth Century*, Princeton 2014, Ch. III: Space, pp. xxx-xxx
- **The Case of Germany: Nation, Order and Landscape in Recent Historiography** Helmut Walser Smith, *Germany: A Nation in Its Time: Before, During, and After Nationalism, 1500-2000*, New York 2020, Ch. 7: Developing Nation (c. 1815-1850), pp. 199-233, 513-521
- **Manipulating Rivers: The Case of the Rhine in the 19th Century** David Blackbourn, *The Conquest of Nature: Water, Landscape, and the Making of Modern Germany*, New York 2006, Ch. 2, pp. 77-119, 378-384
- **Nature into Commodities: The Case of the American Prairies.** William Cronon, *Nature's Metropolis: Chicago and the Great West*, New York 1991, Ch. 5, pp. 207-259, 436-447
- **Interlude: Fundamental Reconsiderations: A Current Approach to the History of the Anthropocene** Dipesh Chakrabarty, *The Climate of History in a Planetary Age*, Chicago 2021, Ch. 1: Four Theses, pp. 23-48, 233-239

Assessment: Essay (30%, 2500 words) and source analysis (30%) in the WT.

Essay (40%, 3000 words) in the ST.

HY458

LSE-Columbia University Double Degree Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Tim Hochstrasser SAR 2.14

Dr Artemis Photiadou SAR 3.13

Availability: This course is compulsory on the MSc in International and World History (LSE & Columbia). This course is not available as an outside option.

Pre-requisites: During their first year at Columbia University, students will identify a topic for the dissertation and will submit a detailed dissertation proposal form to their LSE supervisor. They will also have undertaken substantial research over the course of the summer, have written a Dissertation Research Report before arriving at LSE and be in a position to talk in a detailed manner with regards to their dissertation. These and the completion of other formal requirements for year one of the Double Degree will be needed before students can proceed to the second year of the programme at LSE.

Course content: The individual dissertation will be supervised and assessed at LSE in accordance with the Department's MSc regulations. It will be in the form of a thesis of no more than 15,000 words. HY458 is a dissertation workshop, which complements students' individual work on their dissertations by offering group sessions focusing on methods and approaches, historiography, archival visits, and writing support for work in progress. Overall,

students should be prepared to share a 3,000 word extract from their dissertations for group discussion, evaluation and analysis (Winter Term).

Teaching: See above.

Formative coursework: Students will be requested to submit a Dissertation Research Report for discussion in the Autumn Term. Students are also required to circulate a total of a 3000-word extract of their dissertation for discussion in the Winter Term.

Indicative reading: A reading list will be provided at the start of the course but will include the following introductory surveys: Berger, Feldner and Passmore, *Writing History*; D Cannadine (Ed), *What is History now?*; Iggers, Georg, Supriya Mukherjee and Qingjia E. Wang, 'Historical Thought and Historiography: Current Trends', pp. 39-47 in Wright, James D. *International Encyclopedia of the Social & Behavioral Sciences* (2015) [doi.org/10.1016/B978-0-08-097086-8.62028-7]; L Jordanova, *History in Practice*; M Bloch, *The Historian's Craft*; R G Collingwood, *The Idea of History*.

Assessment: Dissertation (100%, 15000 words) in the ST.

HY459 Not available in 2024/25

The Ottoman Empire and its Legacy, 1299-1950

This information is for the 2024/25 session.

Teacher responsible: Prof Marc Baer SAR 3.17

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The Ottoman Empire (1299-1923) was one of the longest lasting and most territorially extensive of all empires in history. Yet today few know about its nature, whether in Turkey or abroad. Who were the Ottomans? How did they run their empire? How did they manage diversity? How did their understanding and practice of Islam change over time? What was the secret of their success, and what ultimately caused the empire's fall? How do the Ottomans compare to other contemporary empires? What is the Ottoman legacy, especially in Turkey and Greece? What is the significance of the Ottoman Empire for world history?

In order to answer these questions we will study the following topics: three pillars of Ottoman inheritance: Byzantium, Islam, Mongols; the origins and rise of the Ottoman Empire; the conquest of Constantinople and its significance for world history; Ottoman state institutions in the "classic age;" gendering Ottoman History; the Ottomans and the Renaissance; the Ottomans and the Age of Exploration; the Ottoman-Safavid-Habsburg struggle for supremacy; Ottoman Jews: model minority?; sixteenth- and seventeenth-century transformations; pietism, conversion, and interreligious relations; reform and repression, 1839-1908; Orientalism and the Ottomans; the Young Turks and the revolution of 1908; World War I and the Armenian genocide; Atatürk: the "Father" of Modern Turkey and the new Turkish Republic; the Kurdish issue; the legacy of the Ottoman Empire in comparative perspective; and the Ottoman past in Turkish historical fiction.

Teaching: 10 x 2-hour seminars in the Autumn Term. 10 x 2-hour seminars in the Winter Term. There will be a reading week in Week 6 of the Autumn Term and Week 6 of the Winter Term.

Formative coursework: Essay, 4000 words, in the Autumn Term.

Indicative reading: The course textbook will be Marc David Baer, *The Ottomans: Khans, Caesars, and Caliphs* (Basic Books 2021). Other readings will include Karen Barkey, *Empire of Difference: The Ottomans in Comparative Perspective* (Cambridge, 2008); Jane Burbank and Frederick Cooper, *Empires in World History: Power and the Politics of Difference* (Princeton 2010); Ahmet Karamustafa, *God's Unruly Friends: Dervish Groups in the Islamic Middle Period, 1200-1550* (New York 2006); Franklin Lewis, *Rumi—Past and Present, East and West: The Life, Teachings, and Poetry of Jalal*

al-Din Rumi (New York 2007); Cemal Kafadar, *Between Two Worlds: The Construction of the Ottoman State* (California 1995); Rudi Paul Lindner, *Nomads and Ottomans in Medieval Anatolia* (Bloomington: Indiana University, 1983); Giancarlo Casale, *The Ottoman Age of Exploration* (Oxford 2011); Walter Andrews and Mehmet Kalpakli, *The Age of Beloveds: Love and the Beloved in Early-*

Modern Ottoman and European Culture and Society (Duke 2005); Leslie Peirce, *The Imperial Harem: Women and Sovereignty in the Ottoman Empire* (Oxford 1993); Baki Tezcan, *The Second Ottoman Empire: Political and Social Transformation in the Early Modern World* (Cambridge 2012); Ali Yaycioglu, *Partners of the Empire: The Crisis of the Ottoman Empire in the Age of Revolutions* (Stanford 2016); Erik Zürcher, *The Young Turk Legacy and Nation Building: From the Ottoman Empire to Atatürk's Turkey* (I.B. Tauris, 2010); and Ron Suny, *"They Can Live in the Desert But Nowhere Else": A History of the Armenian Genocide* (Princeton 2015).

Assessment: Essay; 45%; 4000 words, in the Winter Term.

Essay; 45%; 4000 words, in the Spring Term.

Weekly reading summaries (10%) in the Autumn Term and the Winter Term.

HY461

East Asia in the Age of Imperialism, 1839-1945

This information is for the 2024/25 session.

Teacher responsible: Dr Jose Canton-Alvarez SAR 2.18

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in China in Comparative Perspective, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no formal pre-requisites for this course, but some knowledge of the international history of East Asia would be useful.

Course content: The course looks at the origins and the political, strategic, economic and cultural consequences of the arrival of Western imperialism in East Asia. Subjects covered by the course include the clash between the Westphalian and Sinocentric international orders; the opium wars; the fall of the Tokugawa shogunate; the Japanese, Korean and Chinese responses to the arrival of the West; the history of Western imperialism in China and the rise of Chinese nationalism; the rise of Japanese imperialism; the Russo-Japanese War and its consequences; pan-Asianism, race and immigration; the Chinese revolution of 1911-12; the rise of intra-Asian trade; the effect of Wilsonian and communist internationalism; Japan's move towards aggressive expansion in the 1930s; the outbreak of the Pacific War.

Teaching: 10 hours of lectures and 9 hours of classes in the AT. 10 hours of lectures and 10 hours of classes in the WT. 1 hour of classes in the ST.

There will be a reading week in the Autumn and the Winter Terms.

Formative coursework: Students will be required to write three essays over the academic year. The second essay will be a mock examination and the third essay will be assessed.

Indicative reading: A detailed reading list will be issued at the start of the course, but the following provide a useful introduction to the themes, events and historiography:

- Shigeru Akita (ed.), *Gentlemanly Capitalism, Imperialism and Global History* (Basingstoke, 2002);
- Warren Cohen, (ed), *Pacific Passage: The Study of American-East Asian Relations on the Eve of the Twenty-First Century* (New York, 1996);
- Merle Goldman & Andrew Gordon, (ed.), *Historical Perspectives on Contemporary East Asia* (Cambridge, Mass. 2000);

- Akira Iriye, *Japan and the Wider World: From the Mid-Nineteenth Century to the Present* (London, 1997);
- Jonathan Spence, *The Search for Modern China* (1999);
- Chushichi Tsuzuki, *The Pursuit of Power in Modern Japan 1825-1995* (Oxford, 2000).

Assessment: Exam (75%, duration: 3 hours) in the spring exam period.

Essay (25%, 3000 words) in the WT.

HY463

The Roots, Origins and Dynamics of the Cold War, 1917-1962

This information is for the 2024/25 session.

Teacher responsible: Prof Vladislav Zubok SAR 3.13

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: As the world drifts from US-Western domination to new uncertainty, the Cold War came back to haunt imagination of policy-makers, media, and broader public. The developments and crises of the distant past survived to our day as the centrepiece of modern international history, a starting point for comparative analysis of international affairs. The Cold War triggered and/or accelerated many crucial developments that shaped the modern world, such as liberal globalization, de-colonization, anti-imperialist and non-aligned movements, statal-military-scientific complexes, global consumerism, environmentalism, human rights, and more. Yet do we understand the Cold War itself? Or we only see "the shadows" of it created by liberal Western memories and historiography? Intellectually, the course maps out the transformation of the international history from the field of (primarily American) diplomatic studies to a multi-versal international approach. This course focuses on the examines the roots and origins of the Cold War from Soviet, Chinese, German, Eastern European, Korean, and Vietnamese sides, as well as through the eyes of American and British actors. The course marshals the elements of economic, cultural, and social histories to clarify the dynamics of its rise during the period from World War II to the Cuban Missile Crisis in 1962. It looks at long-term trends as well as specific events, specific conjunctures, policy-makers' strategies as well as mass fears and cultural stereotypes. As an international history, the Cold War was the first truly global war: it left no continent untouched, it shook local as well as national politics, its destructive and liberational impacts shaped the ideals, fears, and aspirations of several generations. The course consists of seminar discussions, with intense engagement in historiographies and focused insights into more remarkable documentary revelations.

In addition to seminars, students attend lectures delivered within HY206 and covering the following topics: The Breakdown of the Grand Alliance, 1943-1946; The Division of Germany; The Iron Curtain; The Marshall Plan and the Foundation of NATO; The United States and Japan, 1945-1965; The Outbreak of the Korean War; The Sino-Soviet Alliance; The 1956 Hungarian Revolution; Technologies, Weapons, and the Arms Race; The Cuban Revolution and the 1962 Missile Crisis; Culture and Mindsets.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

The twofold emphasis of the seminars is on working with the historiography and with the primary sources, in order to understand how historians have interpreted (and re-interpreted) the origins of the Cold War in light of their changing methodological toolkit and source base.

Recorded lectures from HY206 The International History of the Cold War will also be available to HY463 students.

There will be a reading week in the Autumn and the Winter terms.

Formative coursework: Students are required to give two oral presentations during the year and to submit one 3000-word formative essay in the Autumn Term (the second essay is assessed, see below).

Indicative reading: M.P. Leffler/O.A. Westad (eds), *The Cambridge History of the Cold War*; V. Zubok, *A Failed Empire*; O. A. Westad, *Cold War: A World History*;

Assessment: Exam (75%, duration: 3 hours) in the spring exam period.

Essay (25%, 3000 words) in the WT.

HY465

The International History of the Balkans since 1939: State Projects, Wars, and Social Conflict

This information is for the 2024/25 session.

Teacher responsible: Dr Svetozar Rajak SAR.3.15

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: The course is intended for students with or without a detailed knowledge of the history of the Balkans. Students without a detailed knowledge are advised to undertake preliminary background reading (useful titles in the section Indicative and introductory reading).

Course content: This course examines the history of Southeastern Europe / Balkans in the second half of the Twentieth century and in the beginning of the Twenty First century. The course aims to integrate broader themes and interpretations of the Cold War and post-Cold War order, and of deeper historical and civilizational undercurrents of the Twentieth Century with the history of the region. The course invokes three main themes that facilitate insight into the interaction between the global, regional, and country specific. The course explores the regional and inter-bloc dynamics within the structured Cold War system. It examines the impact the Cold War had on the region and, inversely the influence the Balkans, in particular the Greek Civil War and Yugoslavia's conflict with the USSR exercised on the institutionalization and the dynamics of the early Cold War. Furthermore, the course investigates the unique role Yugoslavia played in the creation of the alternatives and challenges to the bipolar structure and rigidity of the Cold War world, namely the Non-aligned Movement, and the so called "Yugoslav Road to Socialism" that created a schism within the global Communism. Lastly, the course offers insight into the dramatic impact the end of the Cold War had on the developments in the region, namely the violent collapse of the Yugoslav federation and the transition of the regional Communist regimes. Moreover, it looks into the impact disintegration of Yugoslavia and the subsequent wars of secession had in inaugurating or legitimising concepts and phenomena that would define the post-Cold War international order, such as nation-building, humanitarian intervention, conflict-resolution, marginalisation of the UN, NATO's interventionism, US global hegemony, etc.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

There will be a reading week in week 6 of the Autumn and the Winter Terms.

This course has no designated lectures; it is taught through two-hour seminars.

Formative coursework: Students are required to write one 2,500-word essay in the Autumn Term. There will also be a mock exam (a one-hour essay, in class, to help prepare students for the exam) at

the end of the Winter Term.

Indicative reading: Indicative and introductory reading

Full bibliographies are provided on the HY465 Moodle. Students may consult the following introductory titles:

Crampton, Richard J., *The Balkans Since the Second World War*, (New York: Longman, 2002)

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (25%, 3000 words) in the WT.

Class participation (10%) and presentation (15%) in the AT and WT.

HY469

Maps, History and Power: The Spaces and Cultures of the Past

This information is for the 2024/25 session.

Teacher responsible: Dr Paul Stock SAR 2.15

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: How did past societies and cultures understand the world around them? How did those societies use maps to represent physical, social and imaginative spaces? Do maps merely reflect particular mentalities and social practices, or do they actively shape the experience and perception of the world? Maps, History and Power addresses these and other questions by exploring mapping practices and spatial thought in several European and non-European contexts from the medieval to the modern periods. The course explores how past societies have used maps to serve a number of practical and ideological purposes: to express religious belief, to aid navigation and commerce, to assert cultural superiority, and to enable state formation or imperial control. Alongside readings in history and cartography, the course will make extensive and innovative use of the latest digital resources, allowing students to view and discuss historical maps from the world's great research libraries and collections.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

There will be a reading week in week 6 of the AT and the WT.

Formative coursework: Students will be required to submit two formative essays (one per term). They will also have the opportunity to sit a mock exam.

Indicative reading:

- Jeremy Black, *Maps and History: Constructing Images of the Past* (New Haven: Yale University Press, 1997)

- Jerry Brotton, *A History of the World in Twelve Maps* (London: Allen Lane 2012)

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

HY471

European Empires and Global Conflict, 1935-1948

This information is for the 2024/25 session.

Teacher responsible: Dr David Motadel SAR 3.16

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines the history of the European empires in the Second World War. It covers the history of the war fought in the imperial world and its impact on the lives of millions of colonial civilians; the political, military, and social history of colonial soldiers who fought in Europe's multi-ethnic and multi-religious armies; the history of anti-colonial movements during the war, from Ho Chi Minh's Viet Minh to Gandhi's Quit India movement; and the history of the war's impact on decolonisation and the twentieth century world order. Overall, the course explores the non-European experience of the Second World War, examining the ways in which the conflict shaped societies and political orders in Africa, Asia, and beyond. Drawing on key secondary texts, primary sources, and visual material, the course provides a broad introduction to the most destructive and cataclysmic conflict in modern global history.

Teaching: 10 x 2-hour seminars in the AT; 10 x 2-hour seminars in the WT.

There will be reading week in week 6 of the AT and the WT.

Formative coursework: Students will be expected to produce one essay (2,500 to 3,000 words) in the AT; one presentation in the AT; and one presentation in the WT. Students will also be required to prepare short summaries of the readings (bullet points) for the weekly meetings.

HY472 Not available in 2024/25

China and the External World, 1711-1839

This information is for the 2024/25 session.

Teacher responsible: Dr Chung Yam Po SAR 2.18

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course provides a critical overview of the history of Qing China from the early eighteenth to the mid-nineteenth centuries, tracing political, institutional, cultural, and social continuities and changes, particularly in China's land and maritime frontiers. Beginning in the Qianlong period, the Qing Empire became involved in an ever-growing network of commerce and cultural exchange, extending from Manchuria to Inner Asia, and from the East Sea to the Indian Ocean. Following the bloody suppression of the Lhasa riots in 1750, a series of events further connected China to the external world: the infamous Dzungar genocide, European encroachment in Asian seas, the rise of port cities in Southeast Asia that were dominated by Chinese entrepreneurs, and increasing tension between China and Western powers over sea lanes and maritime boundaries. This course will use China's shifting frontiers as a fulcrum to re-examine Chinese history in the modern era, factoring in the movement of people, commodities, ideas, cultural meanings, and imaginaries, which clearly indicate "China's outwardness." This challenges the common perception of China as isolated and inward-looking.

Teaching: Students will engage with class content in large and small group meetings. Learning engagement will include live sessions, small group meetings, asynchronous moodle posts, video clips, and short presentations. There will be a reading week in week 6 of the Michaelmas and the Lent Terms.

Formative coursework: One formative essay in the Michaelmas Term.

Indicative reading: Mark C. Elliot, *Emperor Qianlong: Son of Heaven, Man of the World* (New York: Longman, 2009). Peter C. Perdue, *China Marches West: The Qing Conquest of Central Eurasia* (Cambridge, Mass.: Harvard University Press, 2009).

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (35%, 3500 words) in the WT.

Presentation (15%) in the AT and WT.

HY478

Genesis of the Modern World: Europe, China & India, 1550-1840

This information is for the 2024/25 session.

Teacher responsible: Dr Gagandeep S. Sood SAR 2.07

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is about the developments that led to the emergence of our modern world. A variety of conditions have been highlighted by historians as responsible for this, including government reform, agricultural practices, empirical rationality, consumption patterns, military conflict, property rights, family arrangements, territorial conquest, revenue administration - and sheer accident. Although scholarly consensus on the leading-edge factors still eludes us, there is broad agreement that the polities of northwestern Europe, eastern China and northern India played critical roles, and that the fateful changes occurred between the late sixteenth and early nineteenth centuries.

We examine these polities and the relations between them from two distinct but complementary perspectives. These perspectives define the two terms of the course. One is historiographical and centres on received interpretive frameworks, the other is historical and builds on our best current knowledge of the period. In Autumn Term, we study the most influential paradigms and narratives elaborated by historians to make sense of the early modern changes that ultimately transformed the capacities of human endeavour. Each crystallises a specific set of structures and gives primacy to different polities of Eurasia, with a particular stress on Early Modern England and the English Atlantic, Late Ming and High Qing China, and Mughal and post-Mughal India. In studying these frameworks, we gain familiarity with the most significant attributes of these polities, and how they have been interpreted by scholars. In Winter Term, we study the ways in which the individual polities of the three regions addressed the near-universal problems faced by all complex states and societies. The solutions to these problems - grouped under the rubric of 'metropolitan centre & sovereign ideology', 'indirect rule & political economy', and 'pluralism, them & us' - powerfully shaped their future trajectories, and had a direct bearing on relations between Europe, China

and India. By recovering the most consequential structures and solutions over the two terms of this course, we thereby seek to apprehend the genesis of the modern world.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a reading week in week 6 of the AT and the WT.

As no prior knowledge of the course's subject is either assumed or required, it is essential for students to do the set readings and assignments, attend the seminars and engage actively in discussion. Students are also encouraged to meet outside the class setting to compare notes and learn from one another.

Formative coursework: A 3000-word essay will be due towards the end of AT on a historiographical topic decided in consultation with the instructor. Each week, students will work through one or more core readings which provide important background information, as well as selected further readings in line with their developing interests. These tasks will be supplemented with short reading responses/memos to be posted on Moodle before the weekly seminars and unassessed debates and oral presentations during the seminars themselves.

Indicative reading: For general surveys, students may consult:

- David B. Abernethy, *The Dynamics of Global Dominance: European Overseas Empires, 1415-1980* (2000)
- Christopher A. Bayly, *The Birth of the Modern World, 1780-1914: Global Connections and Comparisons* (2004)
- John Darwin, *After Tamerlane: The Global History of Empire* (2007)

Signal contributions to the subject include:

- Fernand Braudel, *Civilization and Capitalism, 15th-18th Century*, 3 vols (1981-1984)
- Marshall G. S. Hodgson, *Rethinking World History: Essays on Europe, Islam, and World History* (1993)
- Antony G. Hopkins (ed.), *Globalization in World History* (2002)
- Victor Lieberman, *Strange Parallels: Southeast Asia in Global Context, c. 800-1830*, 2 vols (2003-2009)
- Geoffrey Parker, *Global Crisis: War, Climate Change and Catastrophe in the Seventeenth Century* (2013)
- Kenneth Pomeranz, *Great Divergence: Europe, China and the Making of the Modern World Economy* (2000)
- Bartolomé Yun-Casalilla & Patrick K. O'Brien (eds), *The Rise of Fiscal States: A Global History, 1500-1914* (2012)

Assessment: Essay (40%, 4000 words) in the WT.

Essay (45%, 4000 words) in the ST.

Class participation (15%) in the AT and WT.

HY483 Not available in 2024/25

Land and Conflict in Latin America since 1750

This information is for the 2024/25 session.

Teacher responsible: Dr Anna Cant SAR 3.12

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Extending from the late Spanish colonial era, through the wars of independence and up to present-day social conflicts, this course will focus on land. How has land been conceptualised and fought over? How have different social groups developed relationships with land? In what ways have conflicts over land shaped Latin American politics? Students will be encouraged to take an interdisciplinary approach to these questions, drawing on new research in geography, anthropology and political science, as well as various strands of history. Despite the great diversity of the Latin American continent, land is a constant reference point and one that lends itself to

rich comparative study. Topics will include the global and local politics of the colonial hacienda system, anti-colonial indigenous rebellions, scientific exploration and population displacement, peasant movements, land reform, Cold War development policies and ongoing social protests over land and resource extraction.

The course has three main objectives:

1. To critically examine the causes, dynamics and consequences of conflict over land in Latin American societies from the late colonial era to the present.
2. To familiarise students with the conceptual frameworks and methodologies used to study the history of land conflicts.
3. To enable students to develop skills in comparative history and the analysis of primary sources.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: Students are required to write one 3000-word formative essay in the Autumn Term and post weekly reflections to the Moodle discussion board in the Autumn and the Winter Terms. They must also give one 10-minute presentation in the Autumn and the Winter Terms.

Indicative reading:

Assessment: Essay (50%, 5000 words) in the ST.

Essay (30%, 3000 words) in the WT.

Class participation (20%) in the AT and WT.

HY486

The Anti-Slave-Trade Atlantic World, c. 1807-1870

This information is for the 2024/25 session.

Teacher responsible: Dr Jake Subryan Richards room SAR 2.08

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc

in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Britain's parliamentary act to abolish the transatlantic trade in enslaved African people in 1807 is a standard reference point in histories of enslavement and abolition. But much less is known about the consequences of enforcing that act in West Africa, Latin America, and the Caribbean. Enforcement required huge investment in colonial and naval forces to try to stop slaving ships from crossing the Atlantic; it caused a build-up of captives on the African coast because some traders could no longer sell them overseas; it prompted other traders to develop a huge illegal slave trade to Brazil and Cuba; and it generated new forms of bonded labour (such as indenture) in the Americas to replace the diminishing supply of enslaved people. These changes altered Britain's political and commercial relationships with polities in Africa and the Americas. This module investigates anti-slave-trade practices between British agents and the rulers, traders, enslaved, and free(d) peoples of different Atlantic societies. How did Britain's colonial empire adapt to accommodate the influx of African captives from captured slave ships? How did political authorities in Africa and Latin America respond to British demands for abolition? What did enslaved people make of the transformations wrought by abolition? We will explore these questions using sources such as slave narratives, legal cases, political pamphlets, travel literature, and diplomatic correspondence. Through this course, students will examine how abolishing the transatlantic slave trade produced new modes of encounter, empire, and labour in the Atlantic world.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a reading week in week 6 of the Autumn and the Winter Terms.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

Assessment: Essay (40%, 4000 words) in the WT.

Essay (60%, 6000 words) in the ST.

of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course looks at Islam, state and conflict in Southeast Asia in the twentieth century. Following a historical introduction on the Islamisation of Southeast Asia and the entry of the European colonial powers, this course examines the Darul Islam rebellions (Indonesia), the Aceh conflict (Indonesia), the Mindanao conflict (the Philippines), the southern Thailand conflict, and the Rohingya conflict (Myanmar). It also explores the role of Islam in social conflict in Malaysia as well as the rise of regional and international jihadism with Jemaah Islamiyah and the Southeast Asian affiliates of ISIS.

Teaching: 10 two-hour seminars in the Winter Term.

Formative coursework: One formative essay (3000 words) in the Winter Term.

Assessment: Essay (60%, 4000 words) in the ST. Presentation (20%) and class participation (20%).

HY488 Half Unit Not available in 2024/25 European Empires and Global Conflict, 1935-1948

This information is for the 2024/25 session.

Teacher responsible: Dr Diva Gujral

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines the history of the European empires in the Second World War. It covers the history of the war fought in the imperial world and its impact on the lives of millions of colonial civilians; the political, military, and social history of colonial soldiers who fought in Europe's multi-ethnic and multi-religious armies; the history of anti-colonial movements during the war, from Ho Chi Minh's Viet Minh to Gandhi's Quit India movement; and the history of the war's impact on decolonisation and the twentieth century world order. Overall, the course explores the non-European experience of the Second World War, examining the ways in which the conflict shaped societies and political orders in Africa, Asia, and beyond. Drawing on key secondary texts, primary sources, and visual material, the course provides a broad introduction to the most destructive and cataclysmic conflict in modern global history.

Teaching: 20 hours of seminars in the WT.

There will be a reading week in the WT.

Formative coursework: Students will be expected to produce one essay (2,500 words) and one presentation in the WT. Students will also be required to prepare short summaries of the readings (bullet points) for the weekly meetings.

Indicative reading:

Assessment: Essay (70%, 4500 words) in January.

Presentation (15%) and class participation (15%) in the AT.

HY490

MA in Modern History Dissertation

This information is for the 2024/25 session.

Teacher responsible: TBC

Availability: This course is compulsory on the MA in Modern History. This course is not available as an outside option.

Course content: The dissertation is an exercise in using primary sources to write on a specific topic in Modern History. Students will be required to write a 10,000-word dissertation based on their own research. This can be on any topic decided in consultation with a supervisor in the Department of International History, and include those which are international, domestic, theoretical and historiographical. Candidates should aim to include an element of originality in the argument and/or the treatment of the evidence.

Teaching: 4 hours of workshops in the AT.

Teaching is provided through dissertation workshop sessions and through the individual supervision of dissertation projects by supervisors in the Department of International History. Students should use the Autumn Term to find, decide on, and develop a suitable dissertation topic and consider possible dissertation supervisors. Help with this process is available from the students' personal advisers. Students are then required to complete the Dissertation Proposal Form and to seek approval for their project from their dissertation supervisor. It is the students' responsibility to locate a supervisor. They should meet with the potential supervisor late in the Autumn Term (every member of staff has weekly office hours) to discuss their dissertation proposal, and then ask the supervisor to sign the Dissertation Proposal Form before the published deadline. It is the students' responsibility to contact their supervisor to arrange at least one but no more than three meetings in the Spring Term to discuss their dissertation. At this stage the supervisor will be prepared to read and give feedback on a draft table of contents and a draft chapter, or a section or a detailed plan of the dissertation of no more than 1,000 words. Students should note that if they submit a dissertation proposal after the deadline the Teacher Responsible for the course may need to allocate them to a non-subject-specialist supervisor, if no specialists are available.

Assessment: Dissertation (100%, 10000 words) in September.

HY491 Half Unit Not available in 2024/25

Race, Gender and Reproduction in the Caribbean, 1860s-1930s

This information is for the 2024/25 session.

Teacher responsible: Dr Imaobong Umoren SAR G.04

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: In the wake of slavery, debates about the intersecting politics of race, gender, and reproduction arose in the Francophone, Anglophone, and Hispanic Caribbean. This module explores the ways in which formerly enslaved Africans as well as former planters, imperial officials, newly indentured labourers from South Asia, philanthropists, medical professionals, and welfare workers contributed to and shaped colonial social welfare, health policies, and ideas surrounding racial uplift colonialism, race consciousness and equality. Students will engage in comparative intellectual and social history by drawing on primary and secondary sources to consider the influence of European and American imperialism in the Caribbean. A range of topics will be explored including post-emancipation population decline; infant mortality; illegitimacy; venereal disease; birth control; inter- and extra regional migration; and eugenics.

Teaching: 20 hours of seminars in the AT.

There will be a reading week in week 6 of the MT.

Formative coursework: Students will be expected to produce one essay (1,500 to 2,000 words) in MT.

Indicative reading: Bourbonnais, Nicole, *Birth Control in the Decolonizing Caribbean: Reproductive Politics and Practice on Four Islands, 1930-1970* (Cambridge: Cambridge University Press, 2016)

Briggs, Laura, *Reproducing Empire: Race, Sex, Science and US Imperialism in Puerto Rico* (Berkeley: University of California Press, 2002).

De Barros, Palmer, Steven and Wright, David (eds.), *Health and Medicine in the Circum-Caribbean, 1800-1968* (New York: Routledge, 2009).

Palmer, Steven, *Launching Global Health: The Caribbean Odyssey of the Rockefeller Foundation* (Ann Arbor: University of Michigan Press, 2010).

Putnam, Lara, *The Company they Kept: Migrants and the Politics of Gender in Caribbean Costa Rica, 1870-1969* (Chapel Hill: University of North Carolina Press, 2002).

Assessment: Essay (85%, 5000 words) in January. Class participation (15%) in the AT.

HY498

Dissertation: LSE-PKU Double Degree MSc in International Affairs; MSc Theory and History of International Relations

This information is for the 2024/25 session.

Teacher responsible: TBC

Availability: This course is compulsory on the MSc in International Affairs (LSE and Peking University) and MSc in Theory and History of International Relations. This course is not available as an outside option.

Course content: The dissertation is an exercise in using primary source material to write on a precise topic in the history of international affairs. Although candidates may engage with relevant theories and concepts, the dissertation should be largely devoted to utilising such theories and concepts in the analysis of one or more specific historical events and should be based largely upon primary sources. Candidates should aim to include an element of originality in the conceptualising of the thesis or the treatment of evidence. The subject must fall within the syllabus of the degree and must be supervised by a member of staff in the Department of International History

Teaching: Four one-hour sessions in the Autumn Term.

HY498 teaching is provided through HY498 Dissertation workshop sessions and through the individual supervision of dissertation projects by supervisors in the Department of International History. Students should use the Autumn Term to find, decide on, and develop a suitable dissertation topic and consider possible dissertation supervisors. Help with this process is available from the students' personal advisers. Students are then required to complete the HY498 Dissertation Proposal Form and to seek approval for their project from their dissertation supervisor. It is the students' responsibility to locate a supervisor. They should meet with the potential supervisor in late Autumn term (every member of staff has weekly office hours) to discuss their dissertation proposal, and then ask the supervisor to sign the HY498 Dissertation Proposal Form before the published deadline. It is the student's responsibility to contact their supervisor to arrange at least one but no more than three meetings in the Spring Term to discuss their dissertation. At this stage the supervisor will be prepared to read and give feedback on a draft table of contents and a draft chapter, or a section or a detailed plan of the dissertation of no more than 1,000 words. Students should note that if they submit a dissertation proposal after the deadline the Teacher Responsible for the course may need to allocate them to a non-subject-specialist supervisor, if no specialists are available.

Assessment: Dissertation (100%, 10000 words) in September. The dissertation must not exceed 10,000 words (100% of course mark), including text and footnotes but excluding the cover page, the table of contents, the list of abbreviations, the bibliography and appendices. A Fail cannot be compensated, and a degree cannot be awarded unless HY498 has been passed. The dissertation must be submitted by the published deadline.

HY499

Dissertation

This information is for the 2024/25 session.

Teacher responsible: TBC

Availability: This course is compulsory on the MSc in Empires, Colonialism and Globalisation and MSc in History of International Relations. This course is not available as an outside option.

Course content: The HY499 dissertation is an exercise in using primary sources to write on a precise topic in International History. The only formal limit on the choice of subject is that it must fall within the syllabus - i.e. it has to be a topic in International History, and the dissertation has to be a study in the discipline of history. Dissertations that represent contributions to disciplines outside history, such as International Relations or Politics, will not be approved or accepted. Dissertations must therefore be

based substantially on a critical analysis of primary sources, and candidates should aim to include an element of originality in the argument and/or the treatment of the evidence. The subject must involve an element of engagement with the analysis of relations between states and/or societies; alternatively it may involve the study of the history of attitudes and/or policies in one society towards others or comparative studies involving at least two states and/or societies. The topic must not be confined purely to the domestic affairs of one society or state. The dissertation supervisor is the final judge of whether a particular topic falls within the syllabus.

Teaching: Four one-hour sessions in the Autumn Term. HY499 teaching is provided through HY499 Dissertation workshop sessions and through the individual supervision of dissertation projects by supervisors in the Department of International History. Students should use the Autumn Term to find, decide on, and develop a suitable dissertation topic and consider possible dissertation supervisors. Help with this process is available from the students' personal advisers. Students are then required to complete the HY499 Dissertation Proposal Form and to seek approval for their project from their dissertation supervisor. It is the students' responsibility to locate a supervisor. They should meet with the potential supervisor in late Autumn term (every member of staff has weekly office hours) to discuss their dissertation proposal, and then ask the supervisor to sign the HY499 Dissertation Proposal Form before the published deadline. It is the students' responsibility to contact their supervisor to arrange at least one but no more than three meetings in the Spring Term to discuss their dissertation. At this stage the supervisor will be prepared to read and give feedback on a draft table of contents and a draft chapter, or a section or a detailed plan of the dissertation of no more than 1,000 words. Students should note that if they submit a dissertation proposal after the deadline the Teacher Responsible for the course may need to allocate them to a non-subject-specialist supervisor, if no specialists are available.

Assessment: Dissertation (100%, 10000 words) in September. 100% by dissertation. A Fail cannot be compensated, and a degree cannot be awarded unless HY499 has been passed. Dissertations must not exceed 10,000 words, including text and footnotes but excluding the cover page, the table of contents, the list of abbreviations, the bibliography and appendices. The dissertation must be submitted by the published deadline.

HY4A4

Dissertation with an Asian focus

This information is for the 2024/25 session.

Availability: This course is compulsory on the MA in Asian and International History (LSE and NUS) and MSc in International and Asian History. This course is not available as an outside option.

Course content: The dissertation is an exercise in using primary sources to write on a precise topic in International and Asian History. The only formal limit on the choice of subject is that it must fall within the syllabus - i.e. it has to be a topic in International History with an Asian angle, and the dissertation has to be a study in the discipline of history. Dissertations that represent contributions to disciplines outside history, such as International Relations or Politics, will not be approved or accepted. Dissertations must therefore be based substantially on a critical analysis of primary sources, and candidates should aim to include an element of originality in the argument and/or the treatment of the evidence. The subject must involve an element of engagement with the analysis of relations between states and/or societies; alternatively it may involve the study of the history of attitudes and/or policies in one society towards others or comparative studies involving at least two states and/or societies. The topic must not be confined purely to the domestic affairs of one society or state. The dissertation supervisor is the final judge of whether a particular topic falls within the syllabus.

Teaching: Four one-hour sessions in the Autumn Term.

Assessment: Dissertation (100%, 10000 words) in September.

HY4A8 Half Unit Not available in 2024/25 Asian Borderlands

This information is for the 2024/25 session.

Teacher responsible: Dr Qingfei Yin SAR M.06

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in China in Comparative Perspective, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This seminar takes a borderland perspective to Modern Asian History, challenging the practice of treating national territories as the building blocks of academic enquiry. Through a wide range of readings, the participants examine the transformation of modern Asia by centring on the historically marginal societies and come to better understand a borderlands approach to the studies of history. The first part of the course follows a chronological scheme, tracing the changing political, social, and cultural landscapes of Asian borderlands in the eras of imperial encounters, decolonization, and the Cold War. The second part of the seminar focuses on a series of analytical lenses commonly applied in the study of borderlands history, such as state power, state resistance, identity, ethnicity, and environment. Through the course of the seminar, students will critically analyse "space," "frontiers," "geo-body," "Zomia," and other important concepts that have informed the historiography of Asian borderlands. Through the assigned readings, discussion, and written assignments, students will also learn about how historians synthesize contributions originating from different regional historiographical literatures.

Teaching: 10 x 2-hour seminars in the Autumn Term. There will be a reading week in week 6 of the Autumn Term.

Formative coursework: One essay (2000-2500 words) in the Autumn Term.

Indicative reading:

Assessment: Essay (85%, 5000 words) in January.
Class participation (15%) in the AT.

HY4B1

The Vietnam Wars, 1930-75: Regional and International Perspectives

This information is for the 2024/25 session.

Teacher responsible: Dr Richard Saich SAR M.13

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The purpose of this course is to place the wars in Vietnam in a fuller regional and international perspective in order to understand their course, outcomes and consequences. Hence, this will involve not just studying the internal dynamic of conflict within Vietnam, as first French colonialism was met with nationalist and Communist resistance, and then from c. 1959 when insurgency in the southern part of Vietnam eventually triggered wholesale US intervention, but the involvement and interests of other major powers, including the Soviet Union and China. There will also be a need to examine the relationship between developments in Vietnam and the rest of South East Asia (such as in Laos, Thailand and Indonesia), the connections between the wider Cold War and events in Vietnam, and decision-making on the part of the Vietnamese Communists. Although it will necessarily be important to look at US policies and attitudes, the general aim of the course is to encourage students to depart from a 'Washington-focused' perspective and consider the wars in Vietnam as multifaceted, where the interaction of different actors, ideologies, and agendas produced either conflict or moves toward negotiated settlements (as in 1954 and 1970-73).

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

Students will be expected to read essential primary and secondary

material for each weekly two-hour class and to participate in seminar discussions. Reading weeks will take place in week 6 of the AT and the WT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

Assessment: Essay (35%, 3000 words) in the WT.

Essay (35%, 3000 words) in the ST.

Source analysis (30%) in the AT.

HY4B2 Half Unit Not available in 2024/25

The Afterlives of Empires in the Neo-Colonial Caribbean

This information is for the 2024/25 session.

Teacher responsible: Dr Imaobong Umoren SAR G.04

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: One of the first regions in the world to be colonised by western powers the contemporary Caribbean is shaped indelibly by this historical legacy that is inextricably linked to neo-colonialism and neo-liberalism. This course introduces students to the twentieth century origins and diverse range of neo-colonialism in the Hispanic, Anglophone, and Francophone Caribbean and its ties to hierarchies of race, class, gender, and geography. It aims to expand students' knowledge of wide range of neo-colonial practices and policies in the context of the Caribbean from an economic, political, social, and cultural standpoint. Students unfamiliar with Caribbean history will at the start of the course learn about the origins of conquest, colonialism, and racial slavery in the region from the seventeenth to nineteenth century.

Next students will engage with the twinned rise of US imperialism and neo-colonialism in the Caribbean through an examination of both political economy and the US occupations of Cuba, Haiti, and the Dominican Republic and their control of Puerto Rico. The post-war period was critical to the reformed relationship that French Caribbean territories had with France and students will critically engage with the 1946 vote for departmentalisation and its legacies. Other topics the course will explore include Cold war conflicts in British Guiana and Cuba, constitutional decolonisation and Black Power, the debt crisis and role of the International Monetary Fund in Jamaica; the 1979 Grenadian Revolution and the 1983 US invasion of Grenada; the rise of offshore financial centres with a focus on the Bahamas, the Cayman Islands and Bermuda; tourism, development, and public health and climate change and reparations. Students will explore these themes through a combination of primary and secondary source material. By the end of the course students will be able to identify the origins of neo-colonialism in the Hispanic, Anglophone and Francophone Caribbean and will be able to critically evaluate the ways in which its practices and policies shapes hierarchies of race, class, gender and geography.

Teaching: 20 hours of seminars in the WT.

There will be a reading week in week 6 of the Lent Term.

Formative coursework: One 2000-word annotated bibliography in the Lent Term.

Indicative reading:

- Adlai Murdoch, H ed., *The Struggle of Non-Sovereign Caribbean Territories: Neoliberalism Since The French Antillean Uprisings of 2009* (Rutgers University Press, 2021).
- Bishop, Matthew Louis, *The Political Economy of Caribbean Development* (New York: Palgrave Macmillan, 2013).

Assessment: Essay (70%, 5000 words) in the ST Week 1. Class participation (15%) and presentation (15%) in the WT.

HY4B3 Half Unit Not available in 2024/25

Citizenship in 20th century political thought: intellectual history in case studies

This information is for the 2024/25 session.

Teacher responsible: Dr Malgorzata Mazurek

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The history of citizenship has often been linked both to the western Canon and to the rise of liberal democratic states, a connection which is itself the product of a particular lineage of teaching political philosophy and theory. This course will challenge students to re-examine this association by revisiting a range of cases in twentieth-century European and global social, political and intellectual history. We will begin with two prominent critiques of the European tradition of political education, which were launched in the wake of the First World War. From there, we will look back at the chief characteristics which had turned modern European and North American universities into global centres of the institutionalised study of citizenship and political obligation. In subsequent case studies, we will investigate alternative conceptions of civic consciousness, including competing ideas of rural self-government at the time of the Russian revolutions and in the early USSR, ideas of municipal self-government and the revival of cities in American and German political thought, the conceptualisation of denationalization and naturalisation entailed in the Nazi understanding of the Volk, postimperial forms of citizenship in the Anglophone and Francophone worlds, and competing conceptions of citizenship in the Cold War.

Teaching: 20 hours of seminars in the WT.

Students on this course will have a reading week in Week 6 of the WT.

Formative coursework: 1000 words, close reading of a primary source related to the course (can be taken from the weekly readings).

Indicative reading: There is now a vast set of readings on the subject. The list below contains a selection of surveys and edited collections ranging from older approaches in liberal political theory of citizenship, to more recent and historically specific studies of citizenship in particular national contexts.

- Alexander Aleinikoff and Douglas Klusmeyer, eds., *Citizenship Today: Global Perspectives and Practices* (Washington: Brookings Institution Press, 2010).
- Richard Bellamy, *Citizenship: A Very Short Introduction*. Very Short Introductions (Oxford; New York: Oxford University Press, 2008).
- Seyla Benhabib, *The Rights of Others Aliens, Residents, and Citizens* (Cambridge; New York: Cambridge University Press, 2004).
- Derek Heater, *What Is Citizenship?* (Malden, Mass: Polity Press, 1999).
- Engin F. Isin and Peter Nyers, eds., *Routledge Handbook of Global Citizenship Studies* (Abingdon, Oxon: Routledge, 2014).
- Niraja Gopal Jayal, *Citizenship and Its Discontents: An Indian History* (Harvard University Press, 2012)
- Leigh Jenco, *Making the Political: Founding and Action in the Political Theory of Zhang Shizhao* (Cambridge: Cambridge University Press, 2010)
- Ayelet Shachar, Rainer Bauböck, Irene Bloemraad, and Maarten Vink, eds. *The Oxford Handbook of Citizenship*. 1st ed. Oxford University Press, 2017.
- Gershon Shafir (ed.) *The Citizenship Debates: A Reader* (Minneapolis: University of Minnesota Press, 1998).
- Mira L. Siegelberg, *Statelessness: A Modern History* (Cambridge, Massachusetts: Harvard University Press, 2020).

- Bryan Turner, 'Outline of a Theory of Citizenship,' in Chantal Mouffe, *Dimensions of Radical Democracy* (London: Verso, 1992).

Assessment: Essay (60%, 2500 words) in the WT.

Presentation (20%) and class participation (20%) in the AT.

HY4B4 Half Unit

Maritime Asia in Transition, 1405-1839

This information is for the 2024/25 session.

Teacher responsible: Dr Ronald Po, SAR 2.18

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The subject of this course is the history of maritime Asia, particularly East and Southeast Asia, from the fifteenth to the early nineteenth centuries. If there is something we could refer to as a transition, would it be one related to a shift from being a not-so-maritime Asia to a relatively more-maritime Asia, or vice versa? Or perhaps the question should be one regarding a transition from one kind of Asia to another; for instance, from being secluded to embracing openness on its way to progress, or from being fairly continental to more maritime. Are there any fundamental differences between the conception of a maritime Asia and of a maritime Europe? These questions sound teleological in that the people of the time would hardly have made these enquiries. In the present century, however, it is imperative that we ask these questions in order to better situate Asia, especially during the early modern era, within a broader global context. In this seminar we will focus on a variety of themes so as to identify whether there were transitions and/or transformations in the history of maritime Asia that helped formulate the geopolitical order, cultural landscape/seascape, and trading networks of the Asian Pacific region and beyond. Throughout the course we will regard the ocean itself as an important segment of the world, whose fate is entwined with that of the human race. Using both textual and non-textual historical materials, we will critically examine various topics ranging from stories of an admiral, policy makers, and pirates, to the histories of a port city, an island, and a vast swath of sea space.

Teaching: 20 hours of seminars in the WT.

There will be a reading week in week 6 of the Winter Term.

Formative coursework: One essay (2000 words) in the Winter Term.

Indicative reading:

- David Armitage, Alison Bashford, and Sujit Sivasundaram, *Oceanic Histories* (Cambridge: Cambridge University Press, 2017).
- Edward L. Dreyer, *Zheng He: China and the Oceans in the Early Ming Dynasty, 1405-1433* (Old Tappan, N.J.: Pearson Longman, 2006).

- Adam Clulow, *The Company and the Shogun: The Dutch Encounter with Tokugawa Japan* (New York: Columbia University Press, 2014).
- James B. Lewis (eds.), *The East Asian War, 1592-1598: International Relations, Violence, and Memory* (London: Routledge, 2015).
- Xing Hang, *Conflict and Commerce in Maritime East Asia: The Zheng Family and the Shaping of the Modern World, c. 1620-720* (Cambridge: Cambridge University Press, 2015).
- Ronald C. Po, *The Blue Frontier: Maritime Vision and Power of the Qing Empire* (Cambridge: Cambridge University Press, 2018).
- John E. Wills., *China and Maritime Europe, 1500-1800: Trade, Settlement, Diplomacy, and Missions* (Cambridge: Cambridge University Press, 2011)
- Antony Reid (ed.), *Southeast Asia in the Early Modern Era: Trade, Power and Belief* (Ithaca and London: Cornell University Press, 1993).
- Leonard Blussé, *Visible Cities: Canton, Nagasaki, and Batavia and the Coming of the Americans* (Cambridge and London: Harvard University Press, 2008).
- Paul van Dyke, *The Canton Trade: Life and Enterprise on the China Coast, 1700-1845* (Hong Kong: Hong Kong University Press, 2007).
- Robert Antony, *Unruly People: Crime, Community, and State in Late Imperial South China* (Hong Kong: Hong Kong University Press, 2016).

Assessment: Essay (70%, 5000 words) in the ST.

Class participation (15%) and presentation (15%) in the WT.

HY4B7

Asian Borderlands

This information is for the 2024/25 session.

Teacher responsible: Dr Qingfei Yin SAR M.06

Availability: This course is available on the MA in Asian and International History (LSE and NUS), MA in Modern History, MSc in China in Comparative Perspective, MSc in Empires, Colonialism and Globalisation, MSc in History of International Relations, MSc in International Affairs (LSE and Peking University), MSc in International and Asian History, MSc in International and World History (LSE & Columbia) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This seminar takes a borderland perspective to Modern Asian History, challenging the practice of treating national territories as the building blocks of academic enquiry. Through a wide range of readings, the participants examine the transformation of modern Asia by centring on the historically marginal societies and come to better understand a borderlands approach to the studies of history. The first part of the course follows a chronological scheme, tracing the changing political, social, and cultural landscapes of Asian borderlands in the eras of imperial encounters, decolonization, and the Cold War. The second part of the seminar focuses on a series of analytical lenses commonly applied in the study of borderlands history, such as state power, state resistance, identity, gender, ethnicity, and environment. Through the course of the seminar, students will critically analyse "space," "frontiers," "geo-body," "Zomia," and other important concepts that have informed the historiography of Asian borderlands. Through the assigned readings, discussion, and written assignments, students will also learn about how historians synthesize contributions originating from different regional historiographical literatures.

Teaching: 10 x 2-hour seminars in the Autumn Term; 10 x 2-hour seminars in the Winter Term. Students on this course will have a reading week in Week 6 of the AT and the WT.

Formative coursework: One essay (2000-2500 words) in the Autumn Term.

Indicative reading:

- Gavrili, George. *The Dynamics of Interstate Boundaries*. Cambridge: Cambridge University Press, 2008.
- Guyot-Réchard, Bérénice. *Shadow States: India, China and the Himalayas, 1910-1962*. Cambridge University Press, 2016.
- Ishikawa, Noboru. *Between Frontiers: Nation and Identity in a Southeast Asian Borderland*. Athens, OH: Ohio University Press, 2010.
- Khan, Sulman Wasif. *Muslim, Trader, Nomad, Spy: China's Cold War and the People of the Tibetan Borderlands*. Chapel Hill, NC: University of North Carolina Press, 2015.
- Marsden, Magnus, and Benjamin Hopkins. *Fragments of the Afghan Frontier*. Oxford: Oxford University Press, 2011.
- Scott, James. *The Art of Not Being Governed: An Anarchist History of Upland Southeast Asia*. New Haven, CT: Yale University Press, 2009.
- Song, Nianshen. *Making Borders in Modern East Asia: The Tumen River Demarcation, 1881-1919*. Cambridge: Cambridge University press, 2018.
- Sunderland, Willard. *Taming the Wild Field: Colonization and Empire on the Russian Steppe*. Ithaca, NY: Cornell University press, 2004.
- Szonyi, Michael. *Cold War Island: Quemoy on the Front Line*. Cambridge: Cambridge University Press, 2008.
- Winichakul, Tongchai. *Siam Mapped: A History of the Geo-Body of a Nation*. Honolulu, HI: University of Hawaii Press, 1994.

Assessment: Essay (75%, 4000 words) in the ST.
Class participation (25%) in the AT and WT.

IR411

Foreign Policy Analysis III

This information is for the 2024/25 session.

Teacher responsible: Dr Federica Bicchi

Availability: This course is available on the MSc in Comparative Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply, but that may not continue to be the case.

Pre-requisites: Students need not have studied Foreign Policy Analysis before, but some familiarity with 1) theories of International Relations and 2) contemporary international history is essential.

Course content: Foreign Policy Analysis (FPA) looks at the way in which policies affecting external relations are made and shaped by state actors, as well as by actors below and above the state level. This makes it distinct from approaches to International Relations that take the structure of the international system as a starting point for analysis. By understanding how policies are shaped by domestic and international politics and structures, it is possible to arrive at new understandings of the foreign policies of individual states and to critique and enrich scholarship in the mainstream of International Relations. This course prepares students for such tasks by introducing them to the major theoretical concepts and approaches of FPA, and applying them to a range of case studies selected from a wide variety of states and international organisations.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the AT. 9 hours of lectures and 13 hours and 30 minutes of seminars in the WT. 1 hour of lectures in the ST. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce two 1,500 word essays for their seminar leader (1 essay in the AT and 1 essay in the WT). Students will also be expected to present one seminar topic.

Indicative reading:

- Alden, Chris and Aran, Amnon, *Foreign policy analysis: new approaches: understanding the diplomacy of war, profit and justice*, (Abingdon: Routledge, 2016).
- Morin, Jean-Frédéric, and Jonathan Paquin, *Foreign Policy Analysis: A Toolbox*, (Springer, 2018).
- Smith, Steve, Hadfield, Amelia and Dunne, Tim, (eds.), *Foreign policy: theory, actors, cases*, (Oxford: Oxford University Press, 2016).

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

e-Exam (3 hours, 100%) in the ST.

IR412

International Institutions

This information is for the 2024/25 session.

Teacher responsible: Dr Theresa Squatrito CBG 8.08

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Science (Global Politics) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply, but that may not continue to be the case.

Course content: International organizations and other international institutions are created and expected to provide solutions whenever governments face challenges across borders, such as conflict and war, humanitarian emergencies, pandemics, climate change, financial crises, trade restrictions, economic development, and human rights. But their role in world politics is controversial. Some perceive international institutions as effective and legitimate alternatives to unilateral state policies, while others view them as cover for the exercise of power by dominant states. Many are disappointed by the gap between the lofty aspirations and their actual performance in addressing global problems— and wonder how that gap could be closed. Global power shifts, geopolitical tensions and hostility to international governance pose major challenges to international cooperation.

While some observers tend to lump all international institutions together, in reality the functioning, power, and effectiveness of international institutions differ widely – across organisations, issues, regions, and over time. The first part of the course introduces influential explanations for key questions about international institutions: why they are created, why they differ, who makes the key decisions and how, when and why they help solve international problems, and how they relate to one another in complex webs of global governance. The second part answers these questions in relation to specific international organizations, including the United Nations, the North Atlantic Treaty Organisation, the World Trade Organisation, the International Monetary Fund and the World Bank, as well as international institutions in the areas of human rights, environmental protection, and global health. The course also considers international organizations that promote regional integration.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn and Winter Term. Students on this course will have a reading week in Week 6 of each term, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 formative essay in the AT and 1 formative essay in the WT. Each seminar participant is required to give 1 presentation and one presentation commentary.

Indicative reading: Volker Rittberger, Bernhard Zangl, Andreas Kruck and Hylke Dijkstra. 2019. *International Organization: Polity, Politics and Policies*, Third Edition, London: Red Globe Press
 Ian Hurd. 2018. *International Organizations: Politics, Law, Practice*, Third Edition. Cambridge: Cambridge University Press
 Aggarwal, V. K. and Dupont, C. (2014) Cooperation and conflict in the global political economy. In: Ravenhill, John, *Global political economy*. 4th edition. Oxford: Oxford University Press
 Fehl, C. (2004) 'Explaining the International Criminal Court: A 'Practice Test' for Rationalist and Constructivist Approaches', *European Journal of International Relations* 10(3): 357-94
 Niemann, A. (2006) 'Beyond Problem-Solving and Bargaining: Genuine Debate in EU External Trade Negotiations', *International Negotiation* 11: 467-97

Assessment: Essay (85%, 4000 words) in the WT.
 Class participation (15%) in the AT and WT.

IR415 Not available in 2024/25

The Strategy of Conflict in International Relations

This information is for the 2024/25 session.

Teacher responsible: Dr. Anna Getmansky CBG 8.05

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: A working knowledge of international history since 1815 and of traditional theories of international politics is desirable.

Course content: This course provides students with an opportunity to apply their theoretical knowledge and simulate decision-making based on a case study of an actual conflict. The first part of the course serves as an introduction and a refresher on several theories and models of conflict, and provides a background to one conflict. In the second part of the course, students will split into several teams, each representing a player in the conflict. They will receive scenarios and will re-enact specific events. The main goal of the course is to experience how IR theories and concepts can be applied to decision-making in somewhat realistic scenarios.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Lent Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write short weekly blog posts on Moodle and provide an 800-word outline of their assessed essay by the end of Week 8. This will be returned by the end of LT.

Indicative reading: The following short list comprises some of the most important and some of the best currently available books. An asterisk indicates publication in paperback edition. R Aron, *Peace and War*; C M Clausewitz, *On War* (Ed by M Howard & P Paret); J L Gaddis, *Strategies of Containment*; M E Howard, *War and the Liberal Conscience*; F M Osanka, *Modern Guerrilla Warfare*; C Coker, *War and the Twentieth Century*; J Keegan, *A History of Warfare*; C Coker, *War and the Illiberal Conscience*.

Assessment: Essay (100%, 4000 words) in the ST.
 Students will write a 4,000-word assessed essay selecting from a list of topics and questions provided by the course coordinator.

IR416

The EU in the World

This information is for the 2024/25 session.

Teacher responsible: Prof Karen Smith (CBG.10.14)

Availability: This course is available on the MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Science (Global Politics), MSc in The Global Political Economy of China and Europe (LSE and Fudan) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application on LSE for You. Admission is not guaranteed.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply but that may not continue to be the case.

Pre-requisites: Some basic knowledge of International Relations as an academic discipline is desirable, together with some acquaintance with the general evolution of world politics over the last one hundred years.

Course content: The development of the external activities of the European Communities, now the European Union, since 1957, including the development of European Political Cooperation and the Common Foreign and Security Policy, and trade and development policy. The relationship between the member states and these external activities, in particular the impact of the evolution of EU institutions and policies on national foreign policies. Relations between the EU and non-EU states and regions, including the United States, Russia, the Middle East, Asia and Africa.

Watch a short introductory video on this course:

<http://www.lse.ac.uk/internationalRelations/video/IR416-EUW-video.aspx>

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across Autumn and Winter Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are expected to submit two 2,000-word essays during the course, to be marked by seminar leaders. Students will be expected to produce 1 essay in the AT and 1 essay in the WT.

Indicative reading:

- Sieglind Gstöhl and Simon Schunz, eds, *The External Action of the European Union*, Macmillan, 2021
- Amelia Hadfield, Ian Manners, and Richard Whitman, eds, *Foreign Policies of EU Member States*, Routledge 2017
- Christopher Hill, Michael Smith, and Sophie Vanhoonacker (eds), *International Relations and the European Union*, 4th edition, OUP, 2023
- Stephan Keukeleire and Tom Delreux, *The Foreign Policy of the European Union*, 3rd edition, Palgrave, 2022
- Karen E. Smith, *European Union Foreign Policy in a Changing World*, 3rd edition, Polity Press, 2014

Assessment: Exam (90%, duration: 3 hours) in the spring exam period.

Class participation (10%) in the AT and WT.

The exam will be an on campus 'e-Exam'.

IR419

International Relations of the Middle East

This information is for the 2024/25 session.

Teacher responsible: Prof Fawaz Gerges CBG.10.03

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Science (Global Politics) and MSc in Theory and History of International Relations.

This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is intended primarily for students on programmes run by the Department of International Relations (IR). Students on the MSc in Comparative Politics and MSc in Global Politics may take the course, but this is subject to students demonstrating that they have a grasp of International Relations theory, or have made efforts to cover this ground before starting the course.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Students external to the IR department must clearly outline the extent to which they are familiar with IR theory / efforts they will make to familiarise themselves with this area before the course begins.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply, but that may not continue to be the case.

Pre-requisites: A knowledge of the international political system, of the major issues in its contemporary development, and at least a basic understanding of core International Relations theory, is required. Background in IR and/or political science and/or history is a prerequisite.

Course content: The course is intended to provide an analysis of the regional politics of the Middle East since 1918, and of their interaction with problems of international security, global resources and great power/super power/hyperpower politics.

Topics covered include: The emergence of the state system in the Middle East during the inter-war period; the interplay of domestic politics, regional conflicts and international rivalries; the Cold War and post-Cold War significance of the Middle East in global politics; the importance of oil and other economic factors and interests; conflict in the Gulf and the Arab-Israeli conflict; the foreign policies of major Middle Eastern states and the Lebanese civil war; the role of ideologies and social movements: Arab nationalism, militarism, political Islam and global jihadism; state and non-state actors; democracy and human rights issues, the Arab Spring uprisings; and international relations theory and its significance for the study of Middle East politics.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 40 hours across Autumn and Winter Terms. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 2 essays and 2 presentations in the AT and WT.

Seminar attendees will be expected to submit two 2,500-word essays, based on past examination papers, to be marked by their seminar teacher, and to give presentations in both the AT and WT.

Indicative reading: Students are strongly advised to read before the beginning of the course:

- Fawaz A. Gerges, *Making the Arab World: Nasser, Qutb, and the Clash That Shaped the Middle East*
- F. Halliday, *The Middle East in International Relations: Power, Politics and Ideology*
- Madawi al-Rasheed, *A Most Masculine State: Gender, Politics and Religion in Saudi Arabia*
- Fawaz A. Gerges, *The Superpowers and the Middle East: Regional and International Politics*
- Louise Fawcett, *International relations of the Middle East*

In addition they are recommended to consult:

- Nazih Ayubi, *Over-stating the Arab State: politics and society in the Middle East*
- Lisa Anderson, *'The State in the Middle East and North Africa'*

Comparative Politics, October 1987

- R Hinnebusch & A Ehteshami (Eds), *The Foreign Policies of Middle East States*
- B Korany & A Dessouki (Eds), *The Foreign Policies of Arab States*
- John Chalcraft, *Popular Politics in the Making of the Middle East*
- Madawi al-Rasheed, *Demystifying the Caliphate*
- Fanar Haddad, *Sectarianism in Iraq: Antagonistic Visions of Unity*
- Fawaz A. Gerges (ed.), *The New Middle East: Protest and Revolution in the Arab World*
- Z. Lockman, *Contending Visions of the Middle East: The History and Politics of Orientalism*

Assessment: Take-home assessment (100%) in the ST.

IR422 Not available in 2024/25

Conflict and Peacebuilding

This information is for the 2024/25 session.

Teacher responsible: Dr Milli Lake

Availability: This course is available on the MSc in Gender, Peace and Security, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Science (Global Politics) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Pre-requisites: A basic background knowledge of the subject would be an advantage.

Course content: This course combines theoretical, empirical, and conceptual work on conflict and peacebuilding with experiences and reflections from particular cases. The course integrates research on political violence, civil war onset, armed group mobilization, rebel governance, and civilian agency. It further explores international responses to conflict, engaging literatures on statebuilding, colonization, and liberal peace. While the course is primarily empirical in focus, it situates experiences of violence, conflict and peace within a broader historical trajectory, considering relationships between global structures of power and the microdynamics of conflict.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in the WinterTerm. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will produce a formative essay in the WT.

Indicative reading:

- Kalyvas, Stathis N. 2006. *The Logic of Violence in Civil War*. Cambridge: Cambridge University Press,
- Straus, Scott. 2015. *Making and Unmaking Nations: War, Leadership, and Genocide in Modern Africa*. Ithaca: Cornell University Press.

Assessment: Class participation (20%) in the WT.
Take-home assessment (80%) in the ST.

IR434 Half Unit European Defence and Security

This information is for the 2024/25 session.

Teacher responsible: Dr Spyros Economides

Availability: This course is available on the MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All students are required to obtain permission from the Teacher Responsible by completing the online application on LSE for You. Admission is not guaranteed.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students who apply but that may not continue to be the case.

Course content: This course examines the role of defence and security issues in European integration. It traces the evolution and nature of decision-making with respect to European defence initiatives, and examines the structures and institutions of EU defence and security. It also seeks to understand the relationship between foreign policy and security/defence policy in the EU especially in the context of transatlantic relations, and NATO, and the EU's wider international role. The course examines defence and security issues in European integration, as well as addressing the question of defence and European identity, the relationship between European defence and the national objectives of Member States, the link between collective defence and collective security, and the role of defence in the EU's evolution as a civilian, normative and global actor in international relations. The course also examines the relationship between NATO and European security concerns, and more contemporary developments with regard to provisions for crisis management and conflict prevention.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will produce a formative essay of 2000 words in the AT.

Indicative reading:

- Anne Deighton (Ed), *Western European Union: Defence Security Integration*;
- Andrew Cottey, *Security in the New Europe*;
- Jolyon Howorth, *Security and Defence Policy in the European Union*;
- Simon Duke, *The Elusive Quest for European Security*;
- From EDC to CFSP;
- Paul Gebhard, *The United States and European Security*;
- Heather Grabbe, *The Sharp Edges of Europe*;
- Francois Heisbourg et al, *European Defence: Making it Work*;
- Sean Kay, *Nato and the Future of European Security*;
- G Rees Wyn, *The Western European Union at the Crossroads*;
- Stanley Sloan, *The United States and European Defence*;
- Panos Tsakaloyannis, *The European Union as a Security Community* (1996).

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

The exam will be an on campus 'e-Exam'.

IR445 Not available in 2024/25 Global Politics of China

This information is for the 2024/25 session.

Teacher responsible: Prof William A. Callahan CBG.9.05

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Course content: China has long been of interest to students of International Relations due to its historical role as the major power of East Asia, and its current status as a great power with influence in geopolitics, world trade, and global governance. The course lectures examine the development of China's relations with the world in terms of history, culture, and policy-making, and consider how power works in various ways: economic power, military power, soft power, United Front Work, race and gender, and normative power. The remainder of the course analyses case studies on China's relations with the United States, Russia, Japan, Hong Kong and Taiwan, Southeast Asia, and on the topical issues of Chinese IR theory, grand strategy, the Belt and Road Initiative, the environment, global cyber-politics, and Chinese world orders (including analysing science fiction for China's futuristic 'galactic politics').

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 40 hours across Autumn, Winter and Spring Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will complete two 2,000 word essays during the course and will make two presentations to the seminar. It is permissible for the presentations to be on the same topics as the essays.

Indicative reading: Economy, Elizabeth C., *The World According to China*, Oxford University Press, 2022.

Breslin, Shaun. *China Risen? Studying Chinese Global Power*, Bristol University Press, 2021.

Yahuda, Michael, *The International Politics of the Asia-Pacific*, 4 edn. London: Routledge, 2019.

Zhao, Suisheng, *China's Big Power Ambition under Xi Jinping: Narratives and Driving Forces*, Routledge, 2021.

Assessment: Take-home assessment (100%) in the ST.

IR448 Half Unit American Grand Strategy

This information is for the 2024/25 session.

Teacher responsible: Prof Peter Trubowitz CBG 10.16

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application on LSE for You. Admission is not guaranteed.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply but that may not continue to be the case.

Course content: This course will explore American foreign policy at the broadest level of analysis – the level known as grand strategy. The course will showcase the main theoretical perspectives that inform the study of US grand strategy and apply them to historical and contemporary cases of American statecraft. In this connection, we will assess the relevance of the US experience for theorizing about power politics and the implications of alternative theories for thinking critically about American behaviour. Students will gain an appreciation of the debates and controversies that animate the study of US foreign policy, as well as of the unique challenges posed by making foreign policy in the American political, economic, and cultural context.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write short weekly blog posts on Moodle and provide an 800-word outline of their assessed essay by the end of Week 8. This will be returned by the end of AT.

Indicative reading:

- John Lewis Gaddis, *Strategies of Containment* (2005)
- Peter Trubowitz, *Politics and Strategy* (Princeton 2011)
- Linda Weiss, *America Inc.?* (Cornell 2014)
- Rebecca Thorpe, *The American Warfare State* (Chicago 2014)
- Fareed Zakaria, *From Wealth to Power* (Princeton 1998)
- Robert Kagan, *The Jungle Grows Back* (Knopf, 2018)
- Joan Hoff, *A Faustian Foreign Policy* (Cambridge 2008)

Assessment: Essay (100%, 4000 words) in the WT.

Students will write a 4,000-word assessed essay selecting from a list of topics and questions provided by the course coordinator.

IR452 Half Unit Empire and Conflict in World Politics

This information is for the 2024/25 session.

Teacher responsible: Dr David Rampton

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Gender (Rights and Human Rights), MSc in Gender, Peace and Security, MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application on LSE for You. Admission is not guaranteed.

This course has a limited number of places (it is controlled access) and demand is typically high.

Course content: This is a course about war and empire. Many peoples and places in the world have been shaped by imperialism. This course explores some of the violent dimensions of the imperial past and present. It imagines world politics as a space of co-constitution and war or violent conflict as a form of social

interconnection. The course considers armed conflict in imperial context from 'world wars', to colonial 'small wars' through to the War on Terror and beyond. It looks at how warfare shapes (and is shaped by) the societies, cultures and polities that populate world politics. The course also considers some of the intellectual traditions that have arisen out of the experience of, and inquiry into, imperial/colonial violence, from the thought of resistance leaders to subaltern and postcolonial/decolonial studies. The premise of the course is that imperial warfare and violence have been generative forces in shaping world politics, well beyond the times and places of specific battles and killings.

This course familiarises students with some themes from scholarship on empire and conflict in the social sciences and humanities. This involves, first, understanding the limitations of the sovereign nation-state as the basic unit of world politics. For most people in most times and places, international relations have taken imperial form of one kind or another. What would it mean to take empire seriously in international thought and inquiry? The course approaches this question by looking at the relations between imperial and global socio-political and economic forces in historical and theoretical context. Second, although much scholarship on empire concerns economy and culture, the history of empire is a history of continual warfare and armed resistance. Imperialism has informed both "world wars" and "small wars", all of which have shaped society and politics in both the core and periphery of the international system, and continues to do so long after the guns fall silent (e.g. in the case of the US and the Vietnam War). The course will cover the histories, strategies and theories associated with such wars and their effects. The course will also explore the intersection between empire and knowledge in political theory and social inquiry. Not only did anti-colonial resistance produce its own theorists, such as Frantz Fanon and Mao Zedong, but in recent decades empire has been the site of new turns in social and political theory and inquiry, as for example in subaltern and postcolonial/decolonial studies, as well as a spike in wider critical approaches in the wake of the War on Terror. The course will introduce students to these works and their application to understanding world politics, including in relation to specific contexts and historical periods of modern empire.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across Winter Term. Students on this course will have a reading week in Week 6, in line with departmental policy. The course also features a film series focused on themes of imperial/colonial and decolonial conflict. The film series also provides an opportunity for course socialisation and the exploration of course themes through accessible popular culture and media. The course coordinator will briefly introduce each film, which is followed by small-group and open-forum discussion in order to draw out the significance of the film for course themes.

Formative coursework: Students will be expected to produce a 3-4-page summative essay proposal, stating which question/title they are responding to, followed by an outline of their working argument or explanatory framework developed through a literature review in essay-like form, engaging the essential readings and a selection of recommended readings. The proposal should put these texts into conversation with one another in order to identify the key perspectives relevant to the proposed theme, question or title, demonstrating how the proposal's working argument is positioned in relation to these perspectives. This section will be followed by discussion of the kind of empirical evidence under consideration (e.g. case study or studies, dispersed empirical examples etc.). Finally, the formative assessment will include a bulleted essay structure outline and a bibliography. This essay proposal must be developed through an engagement of essential and recommended course literature relevant to the theme. The course coordinator will provide feedback on the proposal, highlighting both positive aspects and any potential problems with the essay project.

Indicative reading: Roxanne Doty, *Imperial Encounters* (Minneapolis: University of Minnesota Press, 1996). Alexander Anievas, Nivi Manchanda and Robbie Shilliam (eds.),

Race and Racism in International Relations: Confronting the Global Colour Line (Abingdon: Routledge, 2015).

Tzvetan Todorov, *The Conquest of America: The Question of the Other* (Norman: University of Oklahoma Press, 1999 [1984]).

Ranajit Guha, *Elementary Aspects of Peasant Insurgency in Colonial India* (Durham and London: Duke University Press, 1999).

Edward Said, *Culture and Imperialism* (New York: Vintage, 1994 [1993]).

Frantz Fanon, *The Wretched of the Earth* (Harmondsworth: Penguin Books, 1967 [1961]).

Gary Wilder, *Freedom Time: Negritude, Decolonization and the Future of the World* (Durham: Duke University Press, 2015)

Faisal Devji, *The Terrorist in Search of Humanity: Militant Islam and Global Politics* (London: Hurst, 2008)

Eric R. Wolf, (1997[1982]) *Europe and the People Without History*. Berkeley: University of California Press.

Michel Rolph-Trouillot, *Silencing the Past: Power and the Production of History* (Boston: Beacon, 2015 [1995])

Assessment: Essay (100%, 5000 words) in the ST.

The summative assessment is to be completed on the basis of the formative essay proposal (see above) and the feedback on this provided by the Course Coordinator. The essay's response to the question, working argument and analysis must be developed through an engagement of essential and recommended course literature relevant to the question/theme. Please note that all forms of plagiarism are prohibited, and that summative and formative assessments will be checked for plagiarism, including the use of generative AI.

IR453 Half Unit

Global Business in International Relations

This information is for the 2024/25 session.

Teacher responsible: Prof Robert Falkner CBG 8.02

Availability: This course is available on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Course content: This course examines the role of global business as an actor in international relations. It reviews the political and economic theories that explain the rise of global business and foreign direct investment, paying attention in particular to International Relations and International Political Economy approaches, but also covering the main economic explanations of MNCs. The course examines the interaction between global business and states in international relations, especially state-firm bargaining over investment decisions and the regulation of global business by states and international organizations. The course also considers the role that global business plays in selected global policy areas: climate change and the environment, economic development, and human rights.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

10 lectures and 10 seminars on the following topics:

- 1 Introduction: global business in international relations
- 2 Globalisation and the rise of MNCs
- 3 Economic theories of the global firm
- 4 The political economy of MNC-state relations
- 5 International investment rules
- 6 International taxation and global business
- 7 The tech giants and how to govern them
- 8 Global business and climate change
- 9 MNCs, FDI and economic development

10 MNCs and the global governance of human rights

Formative coursework: Students will be expected to produce 1 essay of 1500 words in the AT.

Indicative reading:

- Bonnitche, J., Poulsen, L. N. S., & Waibel, M. (2017). *The political economy of the investment treaty regime*: Oxford University Press.
- Cohen, Stephen D. (2007). *Multinational corporations and foreign direct investment: avoiding simplicity, embracing complexity*. Oxford: Oxford University Press.
- Dashwood, H. S. (2012). *The Rise of Global Corporate Social Responsibility: Mining and the Spread of Global Norms*. Cambridge, Cambridge University Press.
- Dunning, John H., & Lundan, Sarianna M. (2008). *Multinational enterprises and the global economy*: Edward Elgar Publishing.
- Falkner, R. (2008). *Business Power and Conflict in International Environmental Politics*. Basingstoke, Palgrave Macmillan.
- Jensen, Nathan M. (2008). *Nation-states and the multinational corporation: A political economy of foreign direct investment*. Princeton, NJ: Princeton University Press.
- Knudsen, J.S. and J. Moon (2017). *Visible Hands. Government Regulation and International Business Responsibility*. Cambridge, Cambridge University Press.
- Mikler, J., Ed. (2013). *The Handbook of Global Companies*. Wiley-Blackwell.
- Mikler, J. (2018). *The political power of global corporations*. Cambridge: Polity.
- Rugman, A. M. (2014). *Multinationals and development*: Yale University Press.
- Sundaram, Anant K., & Hansen, Robert G (Eds.). (2023). *Handbook of Business and Climate Change*: Edward Elgar Publishing.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

The exam will be an on campus e-Exam'.

IR454 Half Unit Not available in 2024/25

Governing International Political Economy: Lessons from the Past for the Future

This information is for the 2024/25 session.

Teacher responsible: Dr James 021858 CBG.8.06

Availability: This course is available on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Course content: History has always been central to the study and practice of international political economy. The field's most influential scholars and practitioners have repeatedly turned to history both to explain, and to offer a fresh perspective on, the great challenges of their times. This course is designed to help students cultivate that invaluable skill and habit of mind. Tracing the evolution of the global political-economic order across the last several centuries, this course examines:

- canonical theorists' particular treatments of international political economy.
 - the on-going, timeless debate between these theorists.
 - the major shifts in the global political-economic order.
 - the interaction between theories and policy shifts.
- A number of important questions will be considered, including:
- What role do ideas play in international relations?
 - To what extent can individual actors shape the global political-economic order?
 - Do circumstances determine which ideas and which leaders come to the fore? Or do men and women make their own history?

- What does this history reveal that might help us to shape international politics today and in the future?

This course considers international order from the standpoint of both international security and international political economy. It will appeal to students who want to delve deeper into the history and evolution of the international system.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce an essay and deliver an in-class presentation.

Indicative reading:

- Keynes, JM. *The Economic Consequences of the Peace*.
- Marx, Karl. *The Eighteenth Brumaire of Louis Napoleon*.
- Angell, Norman. *The Great Illusion*.
- Arendt, Hannah. *The Origins of Totalitarianism*.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

The exam will take place in the form of an e-Exam.

IR462 Half Unit

Theory of International Society

This information is for the 2024/25 session.

Teacher responsible: Dr Peter Wilson

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Science (Global Politics) and MSc in Theory and History of International Relations. This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Pre-requisites: A good knowledge of international history since 1870. Familiarity with the main theories of international relations.

Course content: The English School (ES) is an approach to International Relations (IR) that posits that the relationships between states and other significant actors take place in a social setting. This social setting consists of a complex web of rules, principles, practices, and institutions, the identification and analysis of which is a necessary first step to the understanding of 'how things work' internationally. As an approach to IR the ES has been influenced by classical Realism and shares common ground with Constructivism and liberal approaches such as Regime Theory. But it continues to set out a distinctive position, both methodologically and substantively, defining itself against these and other approaches. It has its roots in the teaching of C. A. W. Manning at LSE in the 1930s and 1940s and his explorations of the concept of international society. Later scholars traced its roots further back in time in the classical political thought of Grotius, Suarez, Gentili, Vattel and other notable jurists and politico-legal theorists of early-modern Europe. It began to take shape through the work of the British Committee on International Theory in the 1950s and 1960s and acquired international standing in the decades that followed through the widely cited and influential writings of Martin Wight and Hedley Bull. Today it is a body of theory with a growing number of adherents across the world, a strong presence at international conferences, and a steady output of scholarly publications. Course content includes: the nature of international society; the bases of international order; the institutional structure of international society; the expansion of international society; the eurocentrism of international society; pluralism vs. solidarism; inequality, legitimacy and justice; the diplomatic and political challenges of human rights, and environmental degradation.

Teaching: 20 hours of seminars in the WT.

The first seminar will consist of a lecture by the course convenor followed by Q&A.

Formative coursework: Students will be expected to produce a 1500-word formative essay in the WT.

Indicative reading:

- Hedley Bull, *The Anarchical Society* (Macmillan, 1977)
- Barry Buzan, *An Introduction to the English School of International Relations* (Polity, 2014)
- Ian Clark, *Legitimacy in International Society* (OUP, 2006)

- R. J. Vincent, *Human Rights and International Relations* (CUP, 1986)
- Adam Watson, *Hegemony and History* (Routledge, 2007)

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

The exam will take place in the form of an e-Exam.

IR464 Half Unit Not available in 2024/25

The Politics of International Human Rights

This information is for the 2024/25 session.

Teacher responsible: Dr Theresa Squatrito CBG 8.08

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Science (Global Politics) and MSc in Theory and History of International Relations. This course is not available as an outside option.

Course content: What are human rights? How can they exist? In what ways have they been institutionalized in the international political arena? What institutions, actors, and processes exist for the purpose of realizing human rights? Are global human rights policies false promises or causes for hope? These are among the central questions examined in this course. The course takes a thematic approach to studying the politics of international human rights. It first focuses on key controversies and debates about the philosophical foundations and historical origins of international human rights. It then explores global institutions (e.g., UN treaties and treaty bodies) and regional institutions (e.g., human rights courts) established to address human rights, asking how these institutions function and why states commit to and comply with them. The course then considers the policy responses employed by states to enforce human rights and address atrocity crimes (e.g., sanctions, humanitarian intervention), assessing their appropriateness and effectiveness. Finally, the course problematizes the statist premise of the international human rights regime to ask what role and responsibilities nonstate actors (e.g., corporate actors, NGOs) have toward the protection of human rights. Substantively, the course relates to a wide array of issues, including civil and political rights, socio-economic rights, women's and minority rights, war crimes, genocide and more.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Group presentation in the WT. Essay outline with annotated bibliography and human rights description (1500-2000 words) in the WT.

Indicative reading: Forsythe, David. *Human Rights in International Relations*. 4th edn. Cambridge: Cambridge University Press, 2018.

Donnelly, Jack. *Universal Human Rights in Theory and Practice*. 3rd edn. Ithaca: Cornell University Press, 2013.

Assessment: Essay (100%, 4000 words) in the ST.

IR465 Not available in 2024/25

The International Politics of Culture and Religion

This information is for the 2024/25 session.

Teacher responsible: Dr Katerina Dalacoura CBG.9.14

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Pre-requisites: Background in International Relations or a related discipline.

Course content: The overall objective of the course will be to explore the role of culture and religion in the discipline of IR from both a theoretical and an empirical perspective, using Islam as a major case study. The first part of the course will place culture and religion within the broader context of global history, global modernity and social science. In its second part, the course will concentrate on the role of culture and religion in a number of international relations theories, such as constructivism, the English School, cosmopolitanism and communitarianism, historical sociology, post-colonialism and feminism. The third part of the course will examine the role that cultural and religious issues play in the practice of international relations and in particular their influence on international norms, foreign policy, conflict and war and theories of the state.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 2 hours of seminars in the ST.

Formative coursework: Students will be expected to produce 1 essay in the AT and 2 essays in the WT. Formative essays 2,000 words.

Indicative reading: A detailed reading list will be available online and in printed form well before the first lecture/seminar.

W.C. Smith (1991) *The Meaning and End of Religion* (Fortress Press).

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

IR466 Half Unit

Genocide

This information is for the 2024/25 session.

Teacher responsible: Prof Jens Meierhenrich CBG.10.04

Availability: This course is available on the MSc in Gender, Peace and Security, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Science (Global Politics), MSc in Theory and History of International Relations and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Course content: This seminar course provides an introduction to the study of genocide. The course's disciplinary ambit ranges from anthropology to economics, from history to law, and from political science to sociology. Against the background of diverse disciplinary approaches, it explores major theoretical and empirical aspects of the role(s) of genocidal campaigns in international politics, inter alia, their origins, development, and termination; the manner of their perpetration, progression, and diffusion; their impact on the maintenance of international peace and security; their consequences for the reconstruction and development of states and the building of nations; and their adjudication in domestic and international courts and tribunals. Empirical cases to be discussed range from Australia to Gaza, and from Germany to Rwanda. The course is designed to equip students with the analytic tools necessary for making sense of the evolution of the international system from the nineteenth century to the present and for critically assessing the promise and limits of responding to collective violence.

Teaching: 10 hours of lectures and 15 hours of lectures in the WT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to research and write one formative essay (2,000 words) due in Week 7 of Winter Term. Essays must be fully - and carefully - referenced using one of the major conventions consistently.

Indicative reading: Lee Ann Fujii, *Show Time: The Logic and Power of Violent Display* (Ithaca: Cornell University Press, 2021).

William A. Schabas, *Genocide in International Law: The Crimes of Crimes*, Second edition (Cambridge: Cambridge University Press, 2009).

Assessment: Essay (100%, 4000 words) in the WT.

IR467 Half Unit

Political Economy of Climate Change

This information is for the 2024/25 session.

Teacher responsible: Dr Noah Zucker, CBG 9.03

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in Political Science (Global Politics), MSc in Political Science (Political Science and Political Economy) and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit. All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Course content: Why has climate change proven to be such a challenging issue for global governance? How will intensified climate disruptions and decarbonization transform countries' economies and politics? Who are the winners and losers of these transitions and how are they shaping climate governance today? This course will address these questions in a survey of the political economy of climate change. We will explore cutting-edge research on climate politics and critically analyze various theoretical concepts and models, assess the advantages and drawbacks of different empirical approaches, and draw connections to core debates in international political economy and political science. Students will gain familiarity with the frontier of climate politics scholarship, learn how to constructively critique academic work, and develop skills in designing and executing rigorous political economy research.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce an outline of the summative climate research proposal in the WT.

Indicative reading:

Assessment: Class participation (20%) and presentation (5%) in the WT.

Research proposal (75%) in the ST.

- Class participation is comprised of general class participation (15%) and discussion leadership (5%) in WT.
- Presentation of research proposal (5%) in WT.

- Research proposal (75%) in ST.

IR468 Half Unit

The Political Economy of Trade

This information is for the 2024/25 session.

Teacher responsible: Dr Boram Lee CBG.8.09

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research) and MSc in Political Science (Political Science and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit. All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Course content: This course examines how politics shape policies and institutions that govern international trade. The course is divided into three modules: i) introduction, ii) theories, and iii) topics in international trade. After the introductory week, the course surveys classical readings that provide different approaches to international trade. During the theory module, students will investigate how geopolitics, interest groups, institutions, and ideas shape international trade. Students will compare different arguments and evidence provided by scholars of these traditions and build foundations to apply these perspectives to analysing new topics in international trade. Once the theory module is complete, students will apply these theoretical approaches to new topics in international trade. This module focuses on a variety of topics: trade and climate, trade as a human rights strategy, the World Trade Organization, US-China trade war, populism & trade-related welfare policies, intellectual property rights, and negotiations of bilateral & plurilateral trade deals. Students will examine competing IR and political science theories that explain trade policy outcomes, and use those theories in analysing important topics on trade. Most of the required readings are by IR scholars and political scientists who are grappling with international trade policies from political science/IR perspectives. They are recently published journal articles, book chapters, and case studies.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will do a 7-minute presentation during seminar. In the presentation, students will choose a reading and critically assess it, comparing it to other essential readings. They will articulate how the chosen reading helps answer an important question or not and compare the author's approach to other approaches. Critical thinking is an important component that will help students do well in the summative exam.

Indicative reading: Davis, Christina L. *Food fights over free trade: how international institutions promote agricultural trade liberalization*. Princeton University Press, 2011.

Gowa, Joanne. *Allies, adversaries, and international trade*. Princeton University Press, 1995.

Woll, Cornelia. *Firm interests: How governments shape business lobbying on global trade*. Cornell University Press, 2008.

Steinberg, Richard H. "In the shadow of law or power? Consensus-based bargaining and outcomes in the GATT/WTO." *International organization* 56.2 (2002): 339-374.

Mutz, Diana C. *Winners and losers: The psychology of foreign trade*. Vol. 36. Princeton University Press, 2021.

Assessment: Take-home assessment (100%) in the ST.

IR469 Half Unit Politics of Money in the World Economy

This information is for the 2024/25 session.

Teacher responsible: Prof Jeffrey Chwieroth CBG.10.12

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in Political Science (Political Science and Political Economy) and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

This course has a limited number of places (it is controlled access) and demand is typically high.

Pre-requisites: Students intending to take the course should have a strong background in monetary economics.

Course content: This course is designed as a component of the study of a global system in which the management and mismanagement of money and finance are matters of fundamental consequence for international relations. It is intended to be of particular relevance to students specialising in international political economy. This is a course in applied international political economy theory. It deals with the basic concepts regarding the creation, use and management of money and finance in the global system. Students are then introduced to the political foundations of international monetary governance. Issues covered include the use of national currencies as international money, the politics of exchange rate adjustment, the operations of banks and other institutions in international money and capital markets, the evolution of global financial markets, the relationship between states and markets in the arena of global finance, international monetary cooperation, and the choices of monetary and financial policies open to developed and developing countries. The course emphasises that contemporary issues, such as international financial crises, international financial regulation and the politics of IMF conditionality, are best understood in a broader theoretical and analytical context.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the AT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will sit a mock e-Exam in the AT.

Indicative reading: No one book covers the entire syllabus, but the following general works provide a useful introduction:

- B Eichengreen, *Globalizing Capital* (2019);
- T Porter, *Globalization and Finance* (2005);
- D Andrews (ed), *International Monetary Power* (2006);
- J Frieden, *Currency politics: the political economy of exchange rate policy* (2015);
- E Helleiner, *The status quo crisis: global financial governance after the 2008 meltdown* (2014);
- C. Norloff, *America's global advantage: US hegemony and international cooperation* (2010);
- B Cohen, *Currency power: understanding monetary rivalry* (2015);
- J Chwieroth and A Walter, *The Wealth Effect* (2019)

Assessment: Exam (90%, duration: 2 hours) in the January exam period.

Class participation (10%) in the AT.

The exam will take place in the form of an e-Exam.

IR470 Half Unit International Political Economy

This information is for the 2024/25 session.

Teacher responsible: Dr James Morrisson CBG.8.06

Availability: This course is compulsory on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is not available as an outside option.

This course has a limited number of places (it is controlled access). Students who have this course as a compulsory course are guaranteed a place

Course content: This is the core course for the International Political Economy MSc degrees. It principally aims to introduce students to the wide array of approaches taken to the study of international political economy (IPE), broadly construed. This is undertaken so as to: (1) acquaint students with the diversity of approaches in the field; (2) help students identify the strengths and weaknesses of each set of approaches; and (3) enable students to employ—and, as necessary, advance—these approaches in the context of their own academic pursuits. Put more prosaically, the course aims to help students: (1) build a robust "tool kit" for understanding IPE; (2) deepen their understanding of where, when, and how to employ these "tools"; and (3) set students to task utilising these "tools" on their own projects. This should prove particularly helpful in the context of students' dissertation research; but the "core" learned here should complement students' study in all their other IPE courses as well.

Substantively, the course will grapple with the contending theoretical, analytical, and methodological challenges and opportunities in the field of IPE. The course will also use empirical material from the past and present to both illustrate and probe these approaches. Thus, the course does speak to timeless and contemporary issues in international economic relations; although it is expected that students will develop proper specialist knowledge in their optional courses.

The first part of the course introduces students to the traditional, "mainstream" approaches to IPE. The course then considers the more "modern," "non-mainstream" approaches. The course, however, goes beyond a mere "survey" of the field or a simple "tour" of the "menu" of approaches on offer. Instead, it emphasises the connections—often, the interactions—between the various approaches. For instance, it considers how domestic-level approaches evolved as a response to the perceived failings of system-level approaches (such as Hegemonic Stability Theory). Similarly, it explores the development of feminist approaches from—but also against—other "critical" perspectives.

Yet, the course is also neither a history of the global political economy nor an intellectual history of the field of IPE. Such history will indeed be considered throughout the course; but that will be done toward the end of helping students understand the approaches themselves. Instead, students will be encouraged—and challenged—to discover the insights that each approach can offer, particularly by applying each approach to their own substantive concerns.

This course design ensures that it will be accessible to students who have limited (or no) prior study in the field of International Political Economy. Those who do have such training will have the opportunity to broaden and advance their skills. Thus, previous training in International Political Economy is helpful, but it is not required. The same is true with the cognate fields of international relations (more generally), international economics, comparative politics, sociology, and history. Background in these fields is helpful, but it is not a requirement. The same is true of practical, work experience. It is quite valuable but not required.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will submit regular reaction and application papers throughout the term.

Students will also deliver an in-class presentation.

Indicative reading: It is advisable to begin reading before the

lectures start, particularly for students with no prior training in International Political Economy. The following texts are a good starting point. A more complete source list is provided in the course outline.

Oatley, 'International Political Economy' (2017)

Ravenhill, 'Global Political Economy' (2020)

Walter and Sen, 'Analyzing the Global Political Economy' (2009)

J Frieden, D Lake and JL Broz (eds), 'International Political Economy' (2017)

Assessment: Essay (100%, 2500 words) in the WT.

IR471 Half Unit

Critical International Law

This information is for the 2024/25 session.

Teacher responsible: Prof Jens Meierhenrich CBG.10.01

Availability: This course is available on the MSc in Gender (Rights and Human Rights), MSc in Gender, Peace and Security, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Theory and History of International Relations and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Course content: This taught graduate seminar introduces students to the theory and history of international accountability. Focusing on justice mechanisms from the Nuremberg, Tokyo, and Eichmann trials to the Waitangi Tribunal and international commissions of inquiry, and from the UN ad hoc tribunals to—especially—the International Criminal Court, the course inquires deeply into the violence of international law. Bringing critical international theory to bear, it blends methodological approaches from law, the social sciences and the humanities. By thinking critically about international law, the seminar raises—and answers—pertinent theoretical and empirical questions about the power—and pathologies—of international organizations. Paying special attention to the ICC's ongoing investigations and prosecutions—its so-called Situations—the course exemplifies the politics of international law in the context of one of the most embattled international organizations in the international system.

Teaching: 20 hours of seminars in the AT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students are required to research and write one formative essay (1,000 words) due in Week 7 of Autumn Term. Essays must be fully - and carefully - referenced using one of the major conventions consistently.

Indicative reading: Andrea Bianchi, *International Law Theories: An Inquiry into Different Ways of Thinking* (2016).

Clarke, Kamari Maxine, *Affective Justice: The International Criminal Court and the Pan-Africanist Pushback* (Durham: Duke University Press, 2019).

Richard Devetak, *Critical International Theory: An Intellectual History* (Oxford: Oxford University Press, 2018).

Alexander Laban Hinton, *The Justice Facade: Trials of Transition in Cambodia* (Oxford: Oxford University Press, 2018).

Martti Koskeniemi, *To the Uttermost Parts of the Earth: Legal Imagination and International Power 1300–1870* (Cambridge: Cambridge University Press, 2021).

Jens Meierhenrich and Oliver Simons, eds., *The Oxford Handbook of Carl Schmitt* (Oxford: Oxford University Press, 2016).

Anne Orford, *International Law and the Politics of History* (Cambridge: Cambridge University Press, 2021).

Kim Christian Priemel, *The Betrayal: The Nuremberg Trials and*

German Divergence (Oxford: Oxford University Press, 2016).

Judith Shklar, *Legalism: Law, Morals, and Political Trials* (Cambridge: Harvard University Press, 1964).

Benjamin N. Schiff, *Building the International Criminal Court* (Cambridge: Cambridge University Press, 2008).

Prabhakar Singh and Benoit Mayer, eds., *Critical International Law: Postrealism, Postcolonialism, and Transnationalism* (Delhi: Oxford University Press, 2014).

Assessment: Essay (100%, 5000 words) in the WT.

Essays must be fully - and carefully - referenced using one of the major conventions consistently.

IR472 Half Unit Not available in 2024/25

Diplomacy in the 21st Century

This information is for the 2024/25 session.

Teacher responsible: Professor Thierry Balzacq (Susan Strange Visiting Professor during 2022/2023)

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the online application linked to the course selection on LSE for You. Admission to the course is not guaranteed.

Course content: Diplomacy is one of the oldest institutions of world politics. Its study is on the rise, but the contours of diplomacy has considerably expanded which raises questions about its meaning if not its utility. This course investigates the discourses, theories and practices associated with diplomacy across time, types, and spaces. It equips you with the basic vocabulary of diplomacy and provides you with clear applications of its concepts to a wide range of subjects. Questions of central interest to the course are: What is diplomacy and where does it come from? What difference (if any) is there between state and non-state diplomacies? How is state diplomacy produced? What instruments actors employ to achieve their diplomatic objectives? Why International Organizations recruit "ambassadorial celebrities"? How do new technologies of information and communication influence classical tools of diplomacy? What are the characteristics of diplomacy in different areas (e.g., defense, culture, humanitarian and economics)?

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Michaelmas Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

Indicative topics include:

1. Introduction
2. The origins of diplomacy: Western and non-Western lineages
3. Diplomatic articulations: Ministry of foreign affairs and beyond
4. Relational social theories and diplomacy
5. Performing diplomacy: rituals and protocols
6. Enacting diplomacy: mediation and negotiation
7. Emotion and rationality: the case of humanitarian diplomacy
8. The character of diplomatic language
9. Diplomacies of entertainment
10. The rise of anti-diplomacies

Formative coursework: Students will be expected to produce 1 essay (1,500 words) in the MT.

Indicative reading: Balzacq, Thierry, Frédéric Charillon and Frédéric Ramel (eds.), *Global Diplomacy: An Introduction to Theory and Practice* (Basingstoke: Palgrave Macmillan, 2020).

Berridge, G. R., Maurice Keens-Soper and T. G. Otte, *Diplomatic Theory from Machiavelli to Kissinger* (Basingstoke: Palgrave Macmillan, 2001).

Cooper, Andrew F., Jorge Heine and Ramesh Thakur (eds.), *The Oxford Handbook of Modern Diplomacy* (Oxford: Oxford University Press, 2013).

Kerr, Pauline and Geoffrey Wiseman, *Diplomacy in a Globalizing*

World: Theories and Practices (New York: Oxford University Press, 2017).

Nicolson, Harold G., *Diplomacy* (Washington: Georgetown University Press, 1998).

Assessment: Essay (100%, 4000 words) in the WT.

IR473 Half Unit China and the Global South

This information is for the 2024/25 session.

Teacher responsible: Prof Chris Alden 9th Floor IDEAS, PAN

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply but that may not continue to be the case.

Course content: This course focuses on the substantive role that China plays in the Global South where its preponderance of material power and putative developing country status confers upon it a dominant position in bilateral and regional political economies. China's economic position, coupled to an astute use of finances flowing from its mercantilist policies, has enabled it to become the leading trading partner and a significant investor in the developing world. Moreover, the Global South is increasingly figuring in Beijing's expanding security interests and soft power provisions. Interpretations embedded in prevailing academic discussions like socialisation, threat and peaceful rise take on new meaning when studied through the lens of ties with developing countries. Understanding how dynamics in this relationship are impacting upon a host of global and contemporary issues (BRICs, multilateralism, peacekeeping, the environment) is crucial to the shape of the 21st century. Students will acquire a deeper appreciation of the concept of agency linked to the varied response of countries and regional organisations in the Global South, from policy elites to local communities, to China's growing structural power, as well as placing Chinese engagement within the context of other 'traditional' and emerging powers. This will offer a deeper analysis of the way in which the dynamics of China's economic and political model impact on its relationship with the Global South.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT.

Formative coursework: Students will submit a 2,000-word essay based on Week 1-3 materials. The essay question will include audio and/or video materials students will be asked to comment and incorporate in their essays as part of their work.

Indicative reading:

- Ariel Ahram, 'Theory and Method of Qualitative Area Studies', *Qualitative Research* (11:1 2011), pp. 69-90

- David Shambaugh (Ed.) (2016). *The China Reader: Rising Power* (6 ed.). Oxford, UK: Oxford University Press
- Ian Taylor, *Africa Rising? BRICs and Diversifying Dependency* (James Currey: 2014)

Assessment: Essay (75%, 3500 words) in the WT.

Presentation (25%) in the AT.

(75%) The essay question will include audio and/or video materials students will be asked to comment and incorporate in their essays as part of their work.

(25%) 10-minute pre-recorded video presentation to upload on Moodle 48 hours before the pre-assigned seminar together with a 400-word annotated bibliography.

IR475 Half Unit Race and Gender in International Relations

This information is for the 2024/25 session.

Teacher responsible: Dr Jasmine Gani CBG (Room TBC)

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for most students that apply, but that may not continue to be the case.

Course content: The course examines race and gender as ordering principles in world politics, which shape (and are shaped by) historical and contemporary colonial practices in international relations. In the first half of the course, students will excavate the often-unacknowledged roles of race and gender in political and International Relations theories. They will also engage with the ideas, epistemologies, and methods of anti-colonial thinkers and movements, such as Frantz Fanon, Edward Said, Angela Davis, Silvia Rivera Cusicanqui, Ali Shariati, and Steve Biko, to understand the structures, agents, mechanisms, and impact of imperialism, settler colonialism, apartheid, and epistemic injustice. In the second half of the course, students will reflect on the inextricable connections between international politics, race, and gender through the following substantive themes: sovereignty and nationalism; militarism, war, and policing; political economy, environment, and development; migration; civil rights and global solidarity movements. Grounded in postcolonial, decolonial, and feminist political thought, the course will enable students to develop their skills in applying political theory to the most pressing issues in contemporary world politics.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Mock Exam in the WT

Indicative reading:

- Frantz Fanon, "The Wretched of the Earth"
- Edward Said, "Orientalism"
- Angela Davis et al., "Abolition. Feminism. Now"
- Gloria Anzaldúa, "Borderlands/La Frontera: The New Mestiza"
- Kimberlé Crenshaw, "On Intersectionality: Essential Writings"

- Charles W. Mills, "The Racial Contract"
- Errol Henderson, "Hidden in Plain Sight: Racism in International Relations Theory."

Assessment: Exam (75%, duration: 2 hours) in the spring exam period.

Class participation (10%) and other (15%) in the WT.

The exam will be an on campus 'e-Exam'.

Reading Reflection (700 words) to be submitted in the WT

IR476 Half Unit Not available in 2024/25

Gender, Sexuality, Race and the Politics of Violence

This information is for the 2024/25 session.

Teacher responsible: Dr Katharine Millar CBG.8.13

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is not available as an outside option.

All students are required to obtain permission of the Teacher Responsible by completing the online application linked to LSE for You. Admission to the course is not guaranteed.

Course content: This course foregrounds gender, race, sexuality – as embodied, as social, and as forms of intersectional hierarchy/ies – to examine the interrelation of seemingly-disparate practices of violence and manifestations of conflict. It moves away from the concept of "security" to highlight assemblages of threats and vulnerabilities that connect and challenge traditional international relations concepts of both scale (e.g. local, national, international etc.) as well as the legitimately "political". The course encourages students to consider not only the ways different practices of violence are gendered, racialised, and sexualised, but also how these violences are implicated in social power relations, and the production of order/normality. The course examines both practices of violence and resistances violence. Particular thematic emphasis is placed on the questions of what constitute violence, and how this key conceptualisation relates to our ways of analysing, interpreting, and making sense, both academically and experientially, of the phenomenon.

Teaching: 20 hours of seminars in the AT.

Formative coursework: Students will submit a 2-page (max) bullet-point (no prose!) outline in Week Seven Autumn term that specifies their proposed research question, evidence, and essay structure for the summative assignment.

Indicative reading:

- M Zalweski, *Feminist International Relations: Exquisite Corpse* (2013)
- C Sylvester, *War as Experience* (2012)
- M Erikson Baaz and M Stern, *Sexual Violence as a Weapon of war?* (2013)
- V Hudson, *Sex and World Peace* (2012)
- C Nordstrum, *Shadows of War* (2004)
- M Jackman, 'Violence in Social Life', *ARS* (Vol.28, 2002)
- T N Coates, *Between the World and Me* (2015)

Assessment: Essay (75%) in the WT.

Presentation (15%) and class participation (10%) in the AT.

IR477 Half Unit

The Politics of Peace & Security in Sub-Saharan Africa

This information is for the 2024/25 session.

Teacher responsible: Dr Stephanie Schwartz

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other

programmes where regulations permit.

All students are required to obtain permission of the Teacher Responsible by completing the online application linked to LSE for You. Admission to the course is not guaranteed.

Course content: This course explores the politics of peace, civil wars, and security in sub-Saharan Africa as it relates to the broader global context. Using post-independence sub-Saharan Africa as the background, we will explore the causes of civil war and determinants of peace, as well as the different political responses embraced by African leaders and politicians to other security challenges characteristic of the post-colonial period. We will study with a range of cases, including Rwanda, Burundi, Sudan and South Sudan, through which we will engage topics such as the relationship between identity and conflict, the origins of insurgency, conflict prevention, and post-conflict justice and reconciliation.

Teaching: 20 hours of seminars in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Each student will be assigned one week to be the discussion leader. Each student must produce 2 reading memos over the course of the semester that draw bullet point links between readings / identify core debates. Students will submit 3 discussion questions each week via moodle.

Indicative reading:

- Ade Ajayi, J.F. 1982. "Expectations of Independence." *Daedalus* 3:2

Assessment: Essay (80%, 4000 words) in the ST. Class participation (20%).

IR478 Half Unit Critical War Studies

This information is for the 2024/25 session.

Teacher responsible: Dr David Rampton

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed

Course content: This course has two key, inter-connected aims. Firstly, it engages the points of contention around the theorisation and conceptualisation of war as these arise from the debates and conversations between differing perspectives and schools of thought in IR, political studies and the social sciences, including a specific emphasis on critical approaches. We ask whether war has fundamentally changed in late modernity, or if it reveals a transhistorical continuity in its core nature, or, if we can identify a common logic in its aims, motivations, methods, practices and effects. Secondly, the course explores the transformative impact and effects of war. In this, it frames war as disruptive of certainties, highlighting the way it regularly undermines expectations, strategies and theories, and along with them, the credibility of those in public life and the academy presumed to speak with authority about it. War both disturbs and disorders existing states, institutions, social orders, identities and quotidian practices, and yet, through these historical and socio-political processes, gives new shape and form to such orders, institutions and practices. At the same time, these transformations shape and inform the course and character of war. This violent but fecund juncture between war, society and politics is what this course seeks to understand, placing significant emphasis on the deep connections between war and transformations in the logic and practices of states, social-orders, identities and wider societal practices.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 20 hours across the Autumn Term. Students on this course will have a reading week in Week 6, in line with departmental policy. The course also features a film series focused on landscapes and narratives of war from diverse contexts of the world. The film series also provides an opportunity for course socialisation and the exploration of course themes through accessible popular culture and media. The course coordinator will briefly introduce each film, which is followed by small-group and open-forum discussion in order to draw out the significance of the film for course themes.

Formative coursework: Students will be expected to produce a 3-4-page summative essay proposal, stating which question/title they are responding to, followed by an outline of their working argument or explanatory framework developed through a literature review in essay-like form, engaging the essential readings and a selection of recommended readings. The proposal should put these texts into conversation with one another in order to identify the key perspectives relevant to the proposed theme, question or title, demonstrating how the proposal's working argument is positioned in relation to these perspectives. This section will be followed by discussion of the kind of empirical evidence under consideration (e.g. case study or studies, dispersed empirical examples etc.). Finally, the formative assessment will include a bulleted essay structure outline and a bibliography. This essay proposal must be developed through an engagement of essential

and recommended course literature relevant to the theme.

The course coordinator will provide feedback on the proposal, highlighting both positive aspects and any potential problems with the essay project.

Indicative reading: Hew Strachan, *Clausewitz's On War* (New York: Grove Press, 2007)

Michel Foucault, *Society Must be Defended* (London: Penguin, 2004)

Jens Bartleson, *War in International Thought* (Cambridge: Cambridge University Press, 2017)

Jarius Victor Grove, *Savage Ecology: War and Geopolitics at the End of the World* (Durham: Duke University Press, 2019)

Helen M. Kinsella, *The Image Before the Weapon: A Critical History of the Distinction between Combatant and Civilian* (Ithaca: Cornell University Press, 2011)

Cynthia Enloe, *Twelve Feminist Lessons of War* (London: Footnote Press, 2023)

Michael Howard *War and the Liberal Conscience* (London: Hurst & Co., 2008)

Caroline Holmqvist, *Policing Wars in the Twenty-First Century* (London: Palgrave Macmillan 2014)

Antoine Bousquet, *The Eye of War: Military Perception from the Telescope to the Drone* (Minneapolis: University of Minnesota Press, 2018)

Dave Grossman, *On Killing: The Psychological Cost of Learning to Kill in War and Society* (Boston, New York: Little, Brown & Company, 1995)

Debbie Lisle, *Holidays in the Danger Zone: Entanglements of War and Tourism* (Minneapolis: University of Minnesota Press, 2016)

Assessment: Essay (100%, 5000 words) in the WT.

The summative assessment is to be completed on the basis of the formative essay proposal (see above) and the feedback on this provided by the Course Coordinator. The essay's response to the question, working argument and analysis must be developed through an engagement of essential and recommended course literature relevant to the question/theme. Please note that all forms of plagiarism are prohibited, and that summative and formative assessments will be checked for plagiarism, including the use of generative AI.

IR479 Half Unit Eastern Europe: Domestic Regimes and Foreign Policies

This information is for the 2024/25 session.

Teacher responsible: Prof Tomila Lankina CBG.10.13

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Science (Global Politics) and MSc in Theory and History of International Relations. This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Pre-requisites: There are no formal prerequisites but some knowledge of social science methods will be taken for granted. Students who are new to international politics are advised to attend the lectures for IR202, Foreign Policy Analysis.

Course content: The course offers an analysis of key issues in the development of the domestic, foreign and security policies of East European countries. The course covers the various factors shaping the domestic, foreign and security policy of Ukraine, Belarus, Russia, as well as countries in Central Asia, the Caucasus, and the Baltic states. It will explore both the domestic aspects of politics,

political regime and protest; and foreign policy and security issues, such as national liberation struggles, geopolitical orientations, membership in regional organizations and alliances. It will also discuss Russia's war against Ukraine and Ukraine's popular movements and mobilization against Russia's aggression. Other topics that we will discuss in class are the economic power projection of countries in the region and those of external players like China and the European Union; the geopolitics of oil and gas; soft power and soft security aspects of the foreign policies of the countries studied in this class. We will also discuss authoritarian and democratic diffusion processes in the 1990s and 2000s; the role of the Russian state media and propaganda and attempts of other states to resist it; the role of ideas and norms in shaping national politics and geopolitical orientations; and the historical legacies influencing the politics and political regimes of the countries in the region. Each of the ten topics covered will speak to the major theoretical debates on the factors shaping domestic and foreign policy and students will be encouraged to evaluate the merits of the various theories based on available evidence. The background class focuses on the domestic and international politics of the countries studied, in the twentieth century, including national liberation struggles and Soviet forcible annexations, and we will also discuss the period immediately preceding the collapse of the Soviet Union. The subsequent sessions analyse the domestic and foreign policies of the countries surveyed with a special focus on the 2000s, including processes of democratization and authoritarian backsliding, domestic civil society and protests, energy politics, the role of China, cross-border cooperation among states in Central Asia and the Caucasus, ethnic and religious conflicts, European Union accession and/ or prospects for accession, the role of the US in the various states, and Russia's wars against Georgia and Ukraine. Some of the questions to be addressed in the course of the ten seminars and lectures are: How have domestic institutions and political regimes changed over the course of the twentieth and twenty-first centuries? What are the impacts of domestic politics on foreign policy making and thinking? How have regional powers like Russia and China sought to use traditional security mechanisms, hard power and soft power to influence neighbours and what mechanisms have the target states devised to resist external hard and "soft" power? What kind of relationships have the countries in the region forged with countries in Asia, Africa, the Middle East, North and South America, and with the EU and other non-EU European states? And what are the factors shaping these relationships? What role do energy politics play in the ties and alliances that countries have forged?

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will produce 1 presentation and 1 other piece of coursework in the WT.

Indicative reading:

Assessment: Essay (80%, 5000 words) in the ST.

Class participation (20%) in the WT.

IR480 Half Unit

The Politics of Inequality and Development

This information is for the 2024/25 session.

Teacher responsible: Dr Victoria Paniagua

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in Political Science (Global Politics) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Course content: This course examines the interaction between markets and states to understand the causes and consequences of development and economic inequality in the developing world and beyond. We will explore these topics in light of contemporary theoretical, substantive, and methodological debates within the fields of international and comparative political economy.

The course will examine the various forces that affect development, as well as exploring economic inequality as a consequence of economic development (or lack thereof). Forces we consider include the state, political institutions, socio-economic actors' preferences and power, and social structure. We will further interrogate the political and economic foundations of inequality, its political implications, and, finally, the main policy tools available to curb economic inequality in the developing world and beyond.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 2 pieces of coursework in the WT.

The 2 pieces of coursework will be reading response memos.

Indicative reading: Piketty, Thomas (2014). *Capital in the 21st Century*. Harvard University Press.

Boix, Carles (2015). *Political order and inequality*. Cambridge University Press.

Evans, Peter (1995). *Embedded Autonomy: States and Industrial Transformation*. Princeton University Press.

Assessment: Presentation (10%) in the WT.

Take-home assessment (90%) in the ST.

IR485

Dissertation in International Political Economy

This information is for the 2024/25 session.

Teacher responsible: Dr Noah Zucker

Availability: This course is compulsory on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is not available as an outside option.

Course content: MSc students are required to write a 10,000 word dissertation on a topic within the field of IPE approved by the student's dissertation lead. The dissertation need not be an account of original research and may rely on secondary sources.

Teaching: All MSc IPE students will be assigned dissertation supervisors before the end of the Autumn Term. The Department will allocate dissertation supervisors on the basis of the relevant expertise and availability of members of academic staff, with student preferences taken into consideration. Dissertation supervisors will be available to provide guidance in one-on-one meetings and through other forms of communication over the late Autumn, Winter, and Spring terms. Thereafter students are expected to work independently on their dissertations without further supervision.

In addition, the Department will provide support by offering a number of lectures and workshops throughout the academic year. An introductory lecture in the Autumn Term will provide an overview of the MSc Dissertation and the processes involved in terms of requirements, oversight and supervision, research and writing, submission and assessment. Bespoke workshops will be offered in the Autumn, Winter, and Spring terms in collaboration with LSE Life to guide students in choosing a topic and research question, designing and implementing a dissertation project. The MSc IPE programme director will also offer a question-and-answer session in the Spring Term in conjunction with the LSE Life workshop. Over the summer period the Department will also offer 'drop-in' sessions for students with individual queries.

Assessment: Dissertation (100%, 10000 words) in August.

IR488 Half Unit

International Politics of Southeast Asia

This information is for the 2024/25 session.

Teacher responsible: Dr Jürgen Haacke CBG.9.01

Availability: This course is available on the MSc in Development Studies, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Course content: This half-unit course examines the contemporary international politics of Southeast Asia. It is particularly concerned with the construction and maintenance of regional order against the backdrop of Southeast Asia's complex and changing politics and intra-regional relations as well as the wider geopolitical shifts associated with the rise of China and the often-competitive policies of external powers towards the region. The course will thus focus both on the different contexts in which Southeast Asian governments operate and the strategies they pursue to manage the multiple challenges they confront, not least vis-à-vis the great powers. Topics covered include ASEAN's institutional design and the nature of intra-regional political-security cooperation; the characteristics of economic regionalism; the US role in and policies toward Southeast Asia; China's relations with and influence in Southeast Asia; Indonesia's foreign policy; as well as the alignment and risk-management (hedging) strategies adopted by maritime and continental Southeast Asian states. The course also explores the case of political conflict and violence in Myanmar with reference to the responsibility to protect, ASEAN involvement, and wider geopolitical competition.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours in the Winter Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce one 2,000-word essay in the WT in preparation for the e-Exam in the ST.

Indicative reading:

- Michael Yahuda, *The International Politics of the Asia-Pacific, 1945-1995* (Routledge Curzon, 4th edn, 2019)
- Amitav Acharya, *The Making of Southeast Asia* (Cornell University Press, 2013)

- Weatherbee, Donald E., *ASEAN's Half Century: A Political History of the Association of Southeast Asian Nations* (Rowman & Littlefield, 2019)

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

The exam will be an on campus 'e-Exam'.

IR489 Half Unit Not available in 2024/25

Economic Diplomacy

This information is for the 2024/25 session.

Teacher responsible: Dr Boram Lee, CBG.8.09

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Political Economy (Research) and MSc in Political Science (Global Politics). This course is available with permission as an outside option to students on other programmes where regulations permit.

All students will be required to obtain permission from the Teacher Responsible by completing the Student Statement box on the

online application form linked to course selection on LSE for you. Admission to the course is not guaranteed, due to limited space. The course is primarily for students on the IPE Masters and LSE-Sciences-Po Double Degree masters.

Course content: The course introduces students to the theories and analytical frameworks relating to decision-making and negotiation in international economic relations and enables them to develop the skills needed to apply these to cases. It discusses the roles of the main actors, institutional settings and processes involved in domestic decision-making and international economic negotiations, and their interaction. The aim of the course is to provide participants with the ability to understand and analyse the factors shaping international negotiations in a range of policy issues from trade and investment, to the environment, economic summits and finance.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

The course is composed of two modules. The first module (Week 1-3) discusses analytical toolkits for understanding economic diplomacy. During these initial weeks, students will learn about four approaches to economic diplomacy: a) balance of power and coercive bargaining, b) negotiations within international institutions, c) the effect of domestic politics, and d) the role of ideas and issue framing.

The second module (Week 4-10) features specific negotiation tactics frequently adopted by policymakers and important challenges that negotiators face in policy processes.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will be expected to produce a short policy memo in the WT.

Indicative reading:

- Bayne, Nicholas and Woolcock, S. The new economic diplomacy: decision-making and negotiation in international economic relations, Third edition, Ashgate, Stephen 2013.
- Koremenos, Barbara. The continent of international law: Explaining agreement design. Cambridge University Press, 2016.
- Davis, Christina L. "Food fights over free trade." Food Fights over Free Trade. Princeton University Press, 2011.
- Oye, Kenneth A. Economic discrimination and political exchange: World political economy in the 1930s and 1980s. Princeton University Press, 1993.

Assessment: Take-home assessment (100%) in the ST. Take-home assessment (100%) in the ST. Students will be expected to produce a policy memo of no more than 2500 words.

IR490 Half Unit

The Strategy of Conflict in International Relations

This information is for the 2024/25 session.

Teacher responsible: Dr. Anna Getmansky CBG 8.05

Availability: This course is available on the MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research) and MSc in Theory and History of International Relations. This course is not available as an outside option.

All students are required to obtain permission from the Teacher Responsible by completing the Student Statement box on the online application form linked to course selection on LSE for You. Admission is not guaranteed.

Course content: This course introduces students to recent literature on conflict onset, management, and resolution, with particular focus on rational-choice theories and simple game-theoretic concepts. In addition, students will have opportunities to apply this knowledge to specific cases of international conflict and compare academic and non-academic accounts of conflicts.

While lectures and reading material focus on theories and examples of conflicts, during seminar discussions students will apply this knowledge to particular conflicts. Class activities will focus on work in small groups, and simulation of decision making in conflicts.

The main goal of the course is to experience how IR theories and concepts can be applied to decision-making in somewhat realistic scenarios.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will provide an 800-word outline of their assessed essay by the end of Week 7.

Indicative reading:

- Christopher Blattman. Why We Fight: The Roots of War and the Paths to Peace. Viking (2022).
- Thomas Schelling. Arms and Influence (Yale University Press 2008)
- Bruce Bueno de Mesquita, Alastair Smith, Randolph Siverson, and James Morrow, The Logic of Political Survival (MIT 2003)
- Susan Rice. Tough Love: My Story of the Things Worth Fighting For. Simon & Schuster (2019)
- Jeremy Bowen. The Making of the Modern Middle East: A Personal History. Pan Macmillan (2022)
- Anita Anand. The Patient Assassin: A True Tale of Massacre, Revenge and the Raj. Simon & Schuster (2020).

Assessment: Essay (100%, 4000 words) in the ST.

Students will select their 4000-word essay topic and essay question from a list provided by the course convenor in the WT.

IR491 Half Unit

Globalisation and Development

This information is for the 2024/25 session.

Teacher responsible: Dr Natalya Naqvi CBG.8.01

Availability: This course is available on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po) and MSc in International Political Economy (Research). This course is not available as an outside option.

Course content: What role should the state play in economic development? How has globalisation affected what the state can still actually do to promote economic development? Between the 50s and 80s, the East Asian 'developmental state' model delivered rapid industrialisation through extensive state intervention, seemingly refuting not only the claims of free market economics, but also of dependency theory: that poor countries could never develop due to the very nature of the capitalist world system. Since the 80s, the applicability of the East Asian model was challenged in new ways. Structural changes in the global political economy, including the end of fixed exchange rates, increased capital mobility, the development of international financial markets, privatisation of the commanding heights of the economy, the proliferation of restrictive trade and investment agreements, and the rise of global value chains, led many to argue that even if it was economically beneficial for other countries to implement the East Asian model, this was no longer possible because globalisation had dramatically constrained the power of the nation state. Others argued that concerns over the constraints posed by globalisation were overblown, and that domestic interests, institutions, and ideas were responsible for holding back structural transformation of the economy.

This course will combine debates in IPE, over how the process of globalisation has transformed the capacity for state action, with debates in the political economy of development over the role of the state in the process of late development. Students will gain an understanding not only of the debate over how much domestic policy autonomy developing countries have after globalisation, but also of the kinds of policies they need this policy space for. Problems of underdevelopment are approached through the prism

of both core-periphery power relations, and power relations arising from the domestic productive structure. By the end of the course, students will be able to:

- 1 Make theoretically informed arguments in written and oral form, supported by empirical evidence on key questions in the study of globalization and late development
- 2 Critically engage (understand and be able to point out the weaknesses and strengths of) with various theoretical approaches (dependency, developmentalist, liberal, Marxist) to the study of late development
- 3 Critically engage with various theoretical approaches (hyperglobalists, constraints school, sceptics, compensation hypothesis) to the study of globalisation
- 4 Apply these theoretical frameworks to concrete empirical situations
- 5 Undertake empirical research on country cases drawing on relevant theory in the study of late development and globalisation

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. Week 6 is a reading week, in line with departmental policy.

Formative coursework: For formative assessment, students will receive feedback on a plan of their final research essay. Personalised feedback on research design, literature choice, and argument will be given. This will provide students with the opportunity to refine their work prior to grading. Students will also get feedback on power point presentations on a seminar question applied to their chosen country case. This will further help students prepare for their final research essay. The feedback will focus not only on academic content, but also presentation skills.

Indicative reading:

- Kicking Away the Ladder, Ha Joon Chang
- States and Markets, Susan Strange
- States Versus Markets, Herman Schwartz
- Globalisation in Question, Hirst, Thompson and Bromley
- The Myth of the Powerless State, Linda Weiss
- Reclaiming Development Economics, Chang and Grabel
- The Developmental State, Woo-Cummings
- Business and the State in Developing Countries, Maxfield and Schneider

Assessment: Essay (90%, 2500 words) in the WT. Class participation (10%) in the AT.

IR492 Half Unit

The Political Economy of China's Technological Rise

This information is for the 2024/25 session.

Teacher responsible: Dr John Minnich CBG (Room TBC)

Availability: This course is available on the MSc in International Political Economy and MSc in International Relations. This course is not available as an outside option.

Course content: This course examines the causes and consequences of China's rise as an economic and technological great power over the past four decades. It provides a theoretically informed introduction to the political economy of contemporary China and to major debates surrounding China's relations with the United States and its allies and partners. Topics covered include Chinese industrial and innovation policies, China's capabilities in core technologies like semiconductors and artificial intelligence, the prospects for U.S.-China economic decoupling, the risk of conflict over Taiwan, the future trajectory of China's rise, and more. China's economic and technological rise may be the defining geopolitical event of the twenty-first century and, as such, will undoubtedly affect students' future lives and careers regardless of whether they study or work on China-related issues. This course is highly relevant for students interested in careers in policy or business because it will give them a solid understanding of the main features of and issues facing China's economy, as well as the impact of Chinese domestic and foreign economic policy choices on the future of the world economy. The course will also be of

substantive interest to students interested in pursuing a career in academia or other research-oriented professions with a focus on China or international political economy.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: A mock take home exam in the WT

Indicative reading:

- Farrell, Henry and Abraham Newman. 2019. "Weaponized Interdependence: How Global Economic Networks Shape State Coercion," *International Security*, Vol. 44, No. 1, pp. 42-79

- Miller, Chris. 2022. *Chip War: The Fight for the World's Most Critical Technology*. Scribner.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

IR493 Half Unit

Global Governance of Technological Risks

This information is for the 2024/25 session.

Teacher responsible: Dr Mathias Koenig-Archibugi

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is not available as an outside option.

Course content: Technological change can generate major benefits but also significant harm. The course examines harms that display three features. First, their impact is not limited to the country of origin but extends across borders, raising the problem of international collective action. Second, their impact may be particularly severe in the future, raising questions of intergenerational justice. Third, the harms are potentially catastrophic in magnitude. The scope of the course encompasses nuclear technologies, biological research with the potential to cause pandemics, growing antibiotic resistance, geoengineering, misaligned artificial intelligence, and cyberwarfare and cyberterrorism. The combination of international and intergenerational dimensions can make the governance of such risks especially challenging. The course applies to such problems the insights on the conditions for effective cooperation in a world of sovereign states that are offered by the current literature in International Relations and related disciplines.

The course has three parts. The first part analyses the features and implications of major risks that transcend national borders and have long-term impacts. The second part examines international governance schemes - those that are already in place, those that are being negotiated, and those that have been proposed. The third part consists of a classroom simulation of the negotiation of an international agreement aimed at mitigating a major contemporary risk, to be chosen in consultation with the students taking the course in any given year.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

The sessions of the last two weeks of the term will be entirely dedicated to the simulation.

Formative coursework: 1 A class presentation between Week 3 and Week 8 on the topic covered that week.
2 A background paper for the role performed in the simulation, due in Week 9.
3 Participation in policy simulation in Week 10 and 11.
Assessment: Essay (100%, 4000 words) in the ST.

IR494 Half Unit Conflict and Peacebuilding

This information is for the 2024/25 session.

Teacher responsible: Dr Milli Lake

Availability: This course is available on the MSc in Gender, Peace and Security, MSc in International Affairs (LSE and Peking University), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Science (Global Politics) and MSc in Theory and History of International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Pre-requisites: A basic background knowledge of the subject would be an advantage.

Course content: This course combines theoretical, empirical, and conceptual work on conflict and peacebuilding with experiences and reflections from particular cases. The course integrates research on political violence, civil war onset, armed group mobilization, rebel governance, and civilian agency. It further explores international responses to conflict, engaging literatures on statebuilding, colonization, and liberal peace. While the course is primarily empirical in focus, it situates experiences of violence, conflict and peace within a broader historical trajectory, considering relationships between global structures of power and the microdynamics of conflict.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in the Winter Term. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will produce a formative essay in the WT.

Indicative reading: Kalyvas, Stathis N. 2006. *The Logic of Violence in Civil War*. Cambridge: Cambridge University Press.

Assessment: Class participation (20%) in the WT.
Take home assessment (80%) in the ST.

IR495 Half Unit The Politics of Displacement and Refuge

This information is for the 2024/25 session.

Teacher responsible: Dr Stephanie Schwartz

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students on the MSc in International Relations, MSc in International Relations (Research), and MSc in International Relations (LSE and Sciences Po) programmes.

Course content: The number of forcibly displaced people has nearly doubled in the last decade. Amid this rise in forced migration, how are states, international organizations, and local communities responding? What is causing this increase in displacement and what are the political consequences - both in the Global North and the Global South? What are the everyday realities of being forcibly displaced? This course takes on these questions as we examine the politics of displacement and the evolution of the global asylum and refugee protection regime.

The course begins with an overview of the historical and legal origins of the asylum and refugee protection regime, including who qualifies as a refugee and asylum-seeker under international law and why. We then explore the disconnect between this foundation and the realities of displacement and mobility today. The course continues with an analysis of the causes and consequences of displacement, followed by an examination of the evolution of state, international and local responses to asylum-seeking. Throughout the course we pay particular attention to the politics of refugee and IDP hosting in the Global South, where the majority of displaced persons live, as well as refugees' and migrants' own perspectives on the experience and politics of displacement. By the end of the course students will be able to articulate complex issues related to forced migration and global asylum governance; synthesize and critique scholarly work from a variety of disciplines - including political science, sociology, and anthropology; and analyze the causes of displacement and state responses to asylum-seeking.

Teaching: Lectures and seminars totalling a minimum of 20 hours in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students can choose between one of two formative coursework options:

Option 1: Students can produce a case study proposal and a class presentation.

Option 2: Students can produce 1 research proposal in coordination with a London-based migration policy organisation and a class presentation in the Autumn Term (AT).

Assessment: Assessment path 1

Case study (80%) in the WT.

Class participation (20%) in the AT.

Assessment path 2

Research paper (80%) in the WT.

Class participation (20%) in the AT.

Students can choose one of two summative assessment paths listed above.

IR499

Dissertation in International Relations

This information is for the 2024/25 session.

Teacher responsible: Dr Katharine Millar CBG.8.13

Availability: This course is compulsory on the MSc in International Relations and MSc in International Relations (LSE and Sciences Po). This course is not available as an outside option.

Course content: All MSc IR student are required to write a 10,000-word dissertation on a topic within the field of IR, to be determined in consultation with their academic mentors and dissertation supervisors. The dissertation should be understood as a work of independent analysis. Original empirical research based on primary sources is not required.

Teaching: All MSc IR students will be assigned dissertation supervisors before the end of the Autumn Term. The Department will allocate dissertation supervisors on the basis of the relevant expertise and availability of members of academic staff, with student preferences taken into consideration. Dissertation supervisors will be available to provide guidance in one-on-one meetings and through other forms of communication over the late Autumn, Winter, and Spring terms. Thereafter students are expected to work independently on their dissertations without further supervision.

In addition, the Department will provide support by offering a number of lectures and workshops throughout the academic year. An introductory lecture in the Autumn Term will provide an overview of the MSc Dissertation and the processes involved in terms of requirements, oversight and supervision, research and writing, submission and assessment. The MSc IR Program Director will also hold further sessions to answer questions from students in the Autumn and Winter terms. Bespoke workshops will be offered in the Winter and Spring terms to guide students in crafting their research questions, designing their dissertation projects, and bringing them to fruition.

Over the summer period the Department will also offer 'drop in' sessions for students with individual queries.

Assessment: Dissertation (100%, 10000 words) in August.

IR4A1 Half Unit

International Relations: Core Theories and Debates

This information is for the 2024/25 session.

Teacher responsible: Dr. Rohan Mukherjee

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is not available as an outside option.

Course content: This course is a graduate-level introduction to the study of international relations. It has 4 objectives: (i) to enquire into the nature of international politics and the role of theory in advancing our understanding of it; (ii) to introduce students to

the main contributions and debates in theories of international politics; (iii) to provide students with a range of concepts, ideas, and perspectives to enable them to widen and deepen their understanding and analysis of international politics; and (iv) to encourage critical, independent thought. At the end of the course students should be able to think, talk and write in an informed, precise and analytical manner about developments within the field of International Relations, past and present.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will write one 2,000-word essay for their seminar teachers

Indicative reading:

- Jennifer Mitzen. *Power in Concert: The Nineteenth-Century Origins of Global Governance*. 2013
- Martha Finnemore and Kathryn Sikkink. *International Norm Dynamics and Political Change*. 1998
- Ayse Zarakol. *Before the West: The Rise and Fall of Eastern World Orders*. 2022
- James D. Fearon. *Rationalist Explanations for War*. 1995
- Robert Axelrod and Robert O. Keohane. *Achieving Cooperation under Anarchy: Strategies and Institutions*. 1985
- John J. Mearsheimer. *The False Promise of International Institutions*. 1994
- Joshua Shiffrin. *Rising Titans, Falling Giants: How Great Powers Exploit Power Shifts*. 2018
- Helen V. Milner. *Interests, Institutions, and Information: Domestic Politics and International Relations*. 1998

Assessment: Essay (100%, 3500 words) in the WT.

IR4A2 Half Unit

International Relations: Global Applications

This information is for the 2024/25 session.

Teacher responsible: Dr Jennifer Jackson Preece CBG.7.05

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is not available as an outside option.

Course content: This course is a graduate-level introduction to global applications of international relations. It provides an opportunity to gain an analytically deeper understanding of the issues that shape the development of the contemporary international order, and reflect critically on the practical applications of the discipline. The course encourages students to engage in debating the nature of, and possible responses to, contemporary challenges in international politics, while emphasizing the need for critical analytical depth when reflecting on the implications of global policy. The course complements IR4A1 with a more applied policy focus. Students will develop an awareness of the relationship between the discipline of International Relations as a field of knowledge and the practices of world politics.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the AT.

A 3-hour online simulation exercise will replace the lecture and classes in Week 11. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students deliver one seminar presentation and write one 2,000-word essay proposal for their seminar teachers.

Indicative reading:

- John Baylis, Steve Smith and Patricia Owen (eds), *The Globalization of World Politics* 8th ed (OUP: 2020)
- Chris Brown, *Understanding International Relations* 5th ed (Palgrave: 2019)
- Jenny Edkins and Maja Zehfuss (eds), *Global Politics: A New Introduction* (Routledge: 2019)
- Mary Kaldor and Iavor Rangelov (eds), *The Handbook of Global*

Security Policy (Wiley-Blackwell: 2014).

Assessment: Essay (100%) in the WT.

IR4A3 Half Unit

International Relations: Critical Perspectives

This information is for the 2024/25 session.

Teacher responsible: Professor Jens Meierhenrich

Availability: This course is available on the MSc in International Relations, MSc in International Relations (LSE and Sciences Po) and MSc in International Relations (Research). This course is not available as an outside option.

Course content: This lecture course introduces students to critical international theory, i.e., to modes of thinking that question, challenge, or repudiate conventional approaches to the study of international relations. It is a course about the conduct of inquiry—about alternative ways of seeing. Critical approaches to be discussed range from Marxism to post-structuralism and from feminism to critical race theory. By thinking critically about the study of international relations, the course raises—and answers—thorny questions about the promise—and limits—of international politics.

Teaching: 10 hours of lectures and 15 hours of seminars in the Autumn Term.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Students are required to submit one formative coursework (2,000-word essay). All students are expected to prepare for and participate in seminar discussions.

Indicative reading:

- Richard Devetak, *Critical International Theory: An Intellectual History* (Oxford: Oxford University Press, 2018).
- Patrick Jackson, *The Conduct of Inquiry in International Relations*, (London: Routledge. 2010);
- Christian Reus-Smit and Duncan Snidal (eds, 2010), *The Oxford Handbook of International Relations*, (Oxford: Oxford University Press).

Assessment: Blog post (15%) in the AT.

Take-home assessment (85%) in the WT.

Blog component (15%): Students will, via sign up, compose one blog post of up to 500 words applying the concepts (and readings) of the week to analyse and understand a contemporary event or phenomenon in international politics. This component is worth 10%. Students will also comment upon and engage with one (via sign up) of their peers' posts, for a completion grade of 5%.

Take-home assessment (85%): due in the January Exam Period: Students will compose two (2) 2000 word answers to questions from the take-home assessment paper.

IR4B1 Half Unit

Islam in World Politics

This information is for the 2024/25 session.

Teacher responsible: Prof John Sidel

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Columbia), MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in International Relations, MSc in International Relations (LSE and Sciences Po), MSc in International Relations (Research), MSc in Political Science (Global Politics) and MSc in Social Anthropology (Religion in the Contemporary World). This course is available with permission as an outside option to students on other programmes where regulations permit. All students are required to obtain permission from the Teacher Responsible by completing the online application form linked to

course selection on LSE for You. Admission is not guaranteed. This course has a limited number of places (it is controlled access) and demand is typically high.

Course content: The course focuses on the role of Islam in world politics, posing two inter-related questions: First, how can we explain the varying nature and strength of Islam as a discursive and mobilizational force in world politics? Second, how should we understand the impact of changes in world politics on the institutions, authority structures, and identities associated with Islam? In this course, the approach to these questions is comparative. The course begins by tracing the trajectory of Islam as a force in world history from the late nineteenth century through the tumultuous years of mass mobilisation in the interwar era, demobilisation with the formation of new nation-states in the early Cold War era, and the revival of Islam in world politics by the 1970s with the Iranian Revolution and developments elsewhere in the Muslim world. But most of the course covers the contemporary post-Cold War era, examining the varying role of Islam in diverse regional settings - Asia, Africa, the Middle East, and Europe - and in the contexts of globalization and democratization, mass migration, civil wars, and secessionist/national-liberation struggles. Close attention is paid to the role of Saudi Arabia and Iran and the rise of sectarian conflict between Sunnis and Shi'a. The course also focuses on important cases like Al Qa'ida and the Taliban in Afghanistan and Pakistan, the so-called 'Islamic State' in Iraq and Syria, the U.S.-led 'Global War on Terrorism', as well as important trends in the UK and across Europe, with close attention to the rise of Islamophobia in these contexts and elsewhere.

Teaching: 10 hours of lectures and 13 hours and 30 minutes of seminars in the AT.

Professor Sidel will be solely responsible for the lectures and the seminars. Students will be divided into seminar discussion groups at the beginning of the course.

Formative coursework: Students are expected to submit an essay of roughly 1,500 words in length by the Reading Week. The essay should address a question drawn from the course outline and reading list or agreed with the course instructor, who will also provide guidance on structure, substance, and sources, and extensive feedback.

Indicative reading:

- Akbar Ahmed, *The Thistle and the Drone: How America's War on Terror Became a Global War on Tribal Islam* (Washington, DC: Brookings Institution Press, 2013)
- Seema Alavi, *Muslim Cosmopolitanism in the Age of Empire* (Cambridge, MA: Harvard University Press, 2015)

- Mohammad Ayatollahi Tabar, *Religious Statecraft: Politics and Islam in Iran* (New York: Columbia University Press, 2017).

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Essay (50%, 3000 words) in the AT.

The exam will be an on campus 'e-Exam'.

LL468 Half Unit

European Human Rights Law

This information is for the 2024/25 session.

Teacher responsible: Professor Kai Möller

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Conflict Studies, MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The course will offer a theoretically informed introduction to the law of the European Convention on Human Rights. It will focus on both the doctrinal framework that the European Court of Human Rights has developed – in particular: proportionality, the margin of appreciation, negative and positive obligations, the living instrument doctrine, and the emerging consensus doctrine – and the substantive questions of what the values underlying human rights are and what these values require in specific contexts. With regard to the latter, more philosophical, aspect, we will pay special attention to the idea of human dignity, exploring in some depth the Court's view that respect for human dignity [and human freedom] is the 'very essence' of the Convention. Topics include: An introduction to the European Convention. Basic concepts of European Convention law: proportionality, the margin of appreciation, living instrument, emerging consensus. Human dignity - 'the very essence' of the Convention? Freedom from torture and inhuman or degrading treatment or punishment and the role of religious arguments in human rights law. The right to freedom of expression and the protection of offensive expression. Militant democracy and democratic backsliding in Europe. The right to private life and the enforcement of morality. The right to freedom of religion and religious pluralism in Europe.

Teaching: There will be 20 hours of teaching in Autumn Term and two hours in Summer Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: There will be a formative assessment; its format will be confirmed at the start of the course.

Indicative reading: There is no single text covering the course and required readings will be uploaded to Moodle before the seminars. The readings will consist of a mixture of cases and theoretical materials. The following are useful textbooks:

- Jacobs, White and Ovey, *The European Convention on Human Rights*, 8th edn (OUP 2020)
- Harris, O'Boyle and Warbrick, *Law of the European Convention on Human Rights*, 5th edn (OUP 2023).

A strong European perspective is to be found in:

- van Dijk, van Hoof, van Rijn and Zwaak (eds), *Theory and Practice of the European Convention on Human Rights* 5th edn (Intersentia, 2018)

Very good edited books include:

- Brems and Gerards (eds), *Shaping Rights in the ECHR* (CUP 2013)
- Follesdal, Peters and Ulfstein (eds), *Constituting Europe* (CUP 2013)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL469 Half Unit UK Human Rights Law

This information is for the 2024/25 session.

Teacher responsible: Professor Conor Gearty CKK.6.10. Professor Gearty teaches the whole course.

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Those seeking to take it, who are not studying law, will need to discuss this first with the course teacher: the course is quite legal in focus.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course will be made up of a detailed study of the UK Human Rights Act. The origins of and the political background to the Act will be explained, and the structure of the measure will be fully elaborated, relying on the text of the Act itself but also on the burgeoning case law that accompanies the measure. The course will identify the principles that underpin the Act and explain its proper place in English law. It will also explore the wider constitutional implications of the measure, looking at its effect on the relationship between courts and Parliament. The political context in which the measure has had to operate will be considered, and the relationship with the change to human rights protection following the UK's departure from the EU will be considered. The recent official review of the Act (and the further government consultation that has followed its publication) will be discussed. Persistent efforts by Conservative governments to repeal or fundamentally alter the measure will be considered, and the reasons for their failure discussed.

Teaching: 20 hours of seminars in the Autumn term. One two-hour seminar in the ST.

There will be a reading week in Week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: The key text is C A Gearty, *On Fantasy Island. Britain, Strasbourg and Human Rights* (OUP, 2016). Recent and useful background is Aileen Kavanagh, *The Collaborative Constitution* See also R Costigan and R Stone, *Civil Liberties and Human Rights* (11th edn, OUP, 2017); Kavanagh, *Constitutional Review under the UK Human Rights Act* (Cambridge, 2009); Hickman, *Public Law After the Human Rights Act* (Hart, 2010); Gearty, *Principles of Human Rights Adjudication* (Oxford University Press, 2004). While these books will be referred to, students will also be expected to read cases: they will receive a detailed reading list for each topic.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

This subject is examined by one two-hour paper, unseen in advance, composed of at least six questions of which two must be attempted. There will be a fifteen minute reading time during which the exam paper may be written on. The exam is closed book.

LL475 Half Unit Terrorism and the Rule of Law

This information is for the 2024/25 session.

Teacher responsible: Professor Conor Gearty CKK.6.10

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course will provide a theoretical and

historical introduction to the concept of terrorism, and of the evolution of counter-terrorism law. It will critically consider definitions of terrorism, and analyse the relationship between terrorism and the right to rebel, and the right to engage in civil disobedience. The historical development of the idea of 'terrorism' from the late eighteenth century through to the present will then be traced, with the emphasis on locating the practice of political terror in its political and military/quasi-military context. The role of international law generally and international human rights law in particular in the context of terrorism and anti-terrorism action will be considered in detail. A particular interest, based on the teacher's recent work, will be on the evolution of anti-terrorism law. The course will teach the material in context, so the subject will be analysed by reference to particular situations where necessary, eg Northern Ireland, the Palestine/Israel conflict and the post 11 September 'war on terror'. The recent widespread extension of state controls from terrorism to 'extremism' will be analysed. The aim of the course is to give the student a good critical understanding of this most controversial of subjects, and also to impart an understanding of the role of law in shaping the fields of terrorism and of counter-terrorism.

Teaching: This course will have two hours of teaching content each week in Autumn Term. There will be a Reading Week in Week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: The course will require students to read and engage with the teacher's latest book, Conor Gearty, *Homeland Insecurity. The Rise and Rise of Global Anti-Terrorism Law* (Polity, May 2024). There is no other set text though reliance is made on the work of authors such as Richard English, Adrian Guelke, Lawrence Freedman, Igor Primoratz, Paul Wilkinson and other works by the course teacher Conor Gearty. Students will receive a detailed reading list for each topic, which will include legal cases from time to time, particularly in the second half of the course. Two other recommended texts are Gearty, *Liberty and Security* (Polity Press, February 2013) and English, *Terrorism How to respond* (Oxford 2009).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4A6 Half Unit Climate Change and International Law

This information is for the 2024/25 session.

Teacher responsible: Professor Stephen Humphreys

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course covers international law in relation to climate change with a view to assessing how the harms and burdens associated with climate change are governed and allocated in different international law regimes. The course adopts the stance that the political and ethical questions raised by climate change cannot be addressed by reference to international environmental law alone. Climate change gives rise to a series of complexities touching upon a range of bodies of law (trade, human rights, migration, state responsibility) in a complex political and ethical environment. In approaching climate change as a concrete concern relevant to these various bodies of law and practice, the course will address the normative bases for choosing between actions designed to prevent and/or manage climate change and its consequences, given developmental imperatives and the concerns

raised by the 'fragmented' nature of international law. Projected seminars include: climate change science, politics and ethics; the theory of international law; international environmental law; trade law; human rights law; migration law. The course includes two case studies, from among the following: technology transfer; carbon markets; food security.

Teaching: This course will have two hours of teaching content each week in Autumn Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: One 1,800 word essay to be submitted by the end of Week 6.

Indicative reading: Good backgrounders are: IPCC, Sixth Assessment Report, Cambridge University Press (2021-22) (read at least the Summaries for Policymakers of the three Working Groups and of the Synthesis Report); IPCC, Special Report on Global Warming of 1.5°C (2018). Excellent for context: Paul Edwards, *A Vast Machine* (MIT Press, 2012); Andreas Malm, *Fossil Capital* (Verso, 2016); Stephen Gardiner, Simon Caney, Dale Jamieson and Henry Shue (eds), *Climate Ethics: Essential Readings*, Oxford University Press (2010); Stephen Humphreys (ed.), *Climate Change and Human Rights*, Cambridge University Press (2010); Larry Lohmann, *Carbon Trading*, Dag Hammerskjöld Foundation (2006); Margaret Young (ed.), *Regime Interaction in International Law: Facing Fragmentation*, Cambridge UP (2012); Rosemary Rayfuse and Shirley Scott (eds), *International Law in the Era of Climate Change*, Edward Elgar (2011).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4A8 Half Unit International Law and the Use of Force

This information is for the 2024/25 session.

Teacher responsible: Dr Devika Hovell CKK 7.06

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Gender (Rights and Human Rights), MSc in Gender, Peace and Security, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Some prior knowledge of international law is useful but not essential.

Course content: The use of force is prohibited in international law. This simple but fundamental legal principle can be obscured by a geo-political context littered with conflict and threatened conflict where the exceptions are more often seen as the rule. Relatedly, there can be a tendency to dismiss international law as a 'marginal enterprise' at moments of political crisis. Nevertheless, states continue to refer to legal justifications when they resort to force. The practice of states, even that forged in heated times of war and crisis, can harden into enduring legal principles unless debated, criticized and ultimately objected to in the aftermath. In this course, we consider the complex mix of law and politics at the heart of the legal regime for the use of force. We focus on the development and interpretation of the prohibition of the use of force and its two key exceptions, Security Council authorization and self-defence. We also look at other claimed or emerging exceptions, including humanitarian intervention, protection of nationals and self-determination. Finally, we consider the concept of 'war as crime' and consider the potential and pitfalls of recognition of the crime of aggression.

Teaching: 20 hours of seminars in the Autumn term. 2 hours of seminars in the Spring Term. There will be a reading week in Week 6 of Autumn Term.

Formative coursework: One 1500 word essay.

Indicative reading: A detailed reading list will be issued on Moodle. For a comprehensive textbook, see Christine Gray, *International*

Law and the Use of Force (4th ed., 2018).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4A9 Half Unit Law in War

This information is for the 2024/25 session.

Teacher responsible: Professor Stephen Humphreys

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Pre-requisites: Some prior knowledge of international law is useful but not essential. LL4A8 is useful but not essential.

Course content: This course covers the international law governing the conduct of hostilities (*jus in bello*, also known as the law of armed conflict (LOAC) and international humanitarian law (IHL))—as distinct from the law on the resort to force (*jus ad bellum*), which is covered in a separate course (LL4A8). The course will take a critical and historical approach to the international regulation and facilitation of armed conflict. As well as the laws governing the means and methods of war ('Hague' law), the 'protected' groups hors de combat ('Geneva' law), and the distinction between international and non-international armed conflict, the course will cover 'lawfare' more generally: the recourse to law as an element of the waging of war. It will examine the application of the laws of war, including occupation law, in historical, actual, and ongoing conflicts, including recent wars in Iraq, Afghanistan, and Syria, the 'war on terror', Ukraine, Gaza, and the Occupied Palestinian Territories. Students can expect to have a thorough grasp of the principles and regulations governing the conduct of hostilities, the context and efficacy of enforcement mechanisms, and a critical understanding of the normative and political stakes of international law in this area.

Teaching: This course will have two hours of teaching content each week in Winter Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: Students have the option of submitting a 1,800 word essay at the end of Week 6.

Indicative reading: It is worthwhile acquiring the following book: Yoram Dinstein, *The Conduct of Hostilities Under the Law of International Armed Conflict* (Cambridge UP, 4th ed., 2022). Good backgrounders are Michael Walzer, *Just and Unjust Wars* (Basic books, 4th ed. 2006); David Kennedy, *Of Law and War* (Princeton UP, 2006); Geoffrey Best, *War and Law Since 1945* (Oxford UP, 1997). Current debates in this field are very lively on blogs such as *Opinio Juris*, *EJILTalk!* and *Lawfare*. Detailed readings for each seminar will be made available on Moodle.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AD Half Unit Rethinking International Law

This information is for the 2024/25 session.

Teacher responsible: Professor Susan Marks

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is part of the following LLM specialism: Public

International Law.

This course has a limited number of places and we cannot guarantee all students will get a place.

Pre-requisites: There are no formal prerequisites.

Course content: This course is primarily designed for students who have already had some exposure to public international law and wish to deepen their understanding of the international legal dimensions of contemporary problems. Each week the relation will be explored between international law and a different global issue or theme, such as war, poverty, terrorism, humanity, and territory. Course readings will encompass both legal scholarship and relevant writing by scholars from other disciplines (geography, anthropology, philosophy, literary studies, etc.).

Teaching: This course will comprise one two-hour seminar each week in Autumn Term, except in Week 6, which is Reading Week. Students are expected to have done the set reading prior to each seminar and be willing to participate take active part in class discussion.

Formative coursework: Class exercises (which do not count towards the final assessment) will be set.

Indicative reading: Reading lists will be provided for each seminar on Moodle. Relevant readings are likely to include: David Kennedy, *Of War and Law*; Sundhya Pahuja, *Decolonising International Law: Development, Economic Growth and the Politics of Universality*; and Balakrishnan Rajagopal, *International Law from Below: Development, Social Movements and Third World Resistance*.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AE Half Unit The Politics of International Law

This information is for the 2024/25 session.

Teacher responsible: Professor Gerry Simpson

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: In this course, we study international law as a literary, historical and political project – and a diplomatic language – through which different arrangements of global power and well-being are advanced and defended. And we do this in relation to three moments in global history: the post WW1 period, the Cold War and the current crises in Ukraine, in Palestine and the United States. We begin with three classes on Ukraine/Gaza in which we think about the “relevant” legal rules, the politics behind the deployment of legal categories in the conflict (war crimes, sanctions, sovereignty) and the way in which international law might open up, or close down, the possibilities of some sort of resolution. We then reverse back to one of the origins of sovereignty, self-determination and institutionalism in 1919 with the apparent revitalisation of international law (and the re-colonisation of The Levant) at Versailles and in Geneva (Weeks 4 and 5). In Weeks 6 to 7, we turn to the Cold War as a lawful moment and international law as a Cold War project by re-thinking the nuclear threat as a juridical category (Week 6) and, by looking at the Cold War in - and of - the Global South (through a study of neutrality or non-alignment as a world-making effort and a Cold War ideal) (Week 7). The course ends with three thematic classes - based around my recently published book, *The Sentimental Life of International Law* (Oxford University Press: 2022) - on international law as lived experience, international law as friendship, and international law as utopian bet, respectively.

Teaching: There will be 20 hours of teaching in Autumn Term. There will be a Reading Week in Week 6.

This is a conversational course designed as a kind of Monday-

night salon. The usual practice is that I introduce the topics for 45 minutes and then we engage in a discussion of the readings. These are often relatively short but there is an expectation that everyone will have done the reading and be willing to participate in seminar discussion.

Formative coursework: One 2,000 word essay.

Indicative reading: Reading lists will be provided for each seminar on Moodle. Readings likely to be set include a selection of international legal texts (including work-in-progress and “new authors”) and readings from the fields of intellectual history, 18th century literature and political theory.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AF Half Unit Principles of Global Competition Law

This information is for the 2024/25 session.

Teacher responsible: Dr Niamh Dunne

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This module provides an overview of the major features of contemporary competition (antitrust) law. Competition law comprises a set of legal rules which aim to control the socially-harmful exercise of private market power, whether through hardcore cartels, single firm monopoly behaviour, or mergers that reduce structural competition. This is a discipline that has undergone a remarkable process of expansion in recent decades, and competition laws are now actively enforced in around 130 jurisdictions worldwide.

Instead of focusing on a particular regime, the module puts an emphasis on the fundamental debates underlying the adoption and evolution of this field, addressed in comparative perspective. Examples drawn primarily from EU and US competition law will be used by way of illustration. We will also consider on-going and often contentious debates in contemporary competition law, including the question of the optimal goals for competition enforcement, the appropriate role for economic analysis in this task, and the scope for regional divergences.

The course assumes no prior knowledge of competition law or economics, but aims to equip students to understand and analyse the key substantive elements found within most competition regimes. These include:

- Competition policy and basic concepts of antitrust economics;
- Anti-competitive agreements, including cartels and vertical restraints;
- Unilateral conduct rules, including refusal to deal and exclusionary practices; and
- Merger control, including horizontal and vertical mergers.

Teaching: This course will have two hours of teaching content each week in Autumn Term. Several optional supplementary lectures will be provided to address more technical concepts in greater detail. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: All students are expected to produce one 1,500 word formative essay during the course.

Indicative reading:

- Whish & Bailey, *Competition Law* (10th ed., 2021);
- Jones & Sufrin, *EU Competition Law: Cases and Materials* (7th ed., 2019);
- Roger van den Bergh, *Comparative Competition Law and Economics* (2017); and
- Hovenkamp, *The Antitrust Enterprise* (2005).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AG Half Unit

Competition Law, Technology and Intellectual Property

This information is for the 2024/25 session.

Teacher responsible: Professor Niahm Dunne

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Pre-requisites: Prior knowledge of Competition Law is desirable, but not essential.

Course content: This module addresses some of the most topical and intellectually challenging aspects of contemporary Competition Law. The emphasis will be put on US antitrust and EU Competition Law, but developments from other jurisdictions are discussed where relevant. The module examines, inter alia, the application of competition law in high-technology and digital markets as well as its intersection with intellectual property (in particular patents and copyright).

Topics may include the following:

- Competition Law in High-Technology Markets (including investigations involving the Big Tech)
- The regulation of the digital markets in the EU and the UK
- Competition Law and the pharmaceutical industry
- Standard-setting and technology licensing

Teaching: There will be 20 hours of seminars in the Winter Term and two hours of seminars in the Spring Term. Regular teaching may be complemented with visits from officials and practitioners from the UK and the EU. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Ibanez Colomo, *The New EU Competition Law* (Hart Publishing 2023).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AH Half Unit

Corporate Governance

This information is for the 2024/25 session.

Teacher responsible: Professor Eva Micheler

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Pre-requisites: Students should have some knowledge of corporate law.

Course content: This course will focus on the corporate governance of companies. The course will be taught largely on a comparative basis, focussing on English and German law. We will also cover the relevant EU materials. Topics such as the following will be discussed:

- 1- Introduction – mapping the topic
- 2- Theory and foundations
- 3- Shareholders – decision making rights
- 4- Shareholders – market infrastructure and stewardship
- 5- Corporate social responsibility and employees
- 6- Board structure and board diversity

7- Remuneration

8- Duty of skill and care

9- No-conflict rule and corporate opportunities

10- Auditors

These topics may slightly change from year to year reflecting current developments

Teaching: This course will have two hours of teaching content each week in Autumn Term and two hours of seminars in the Spring term, which is a review and revision session. Week 6 of Autumn Term is Reading Week.

Formative coursework: All students are expected to produce one 1,500 word formative essay during the course.

Indicative reading: Micheler, *Company Law - A Real Entity Theory* (OUP 2021); Gordon and Ringe, *The Oxford Handbook of Corporate Law and Governance* (OUP 2018); M Moore and M Petrin, *Corporate Governance: Law, Regulation and Theory* (Palgrave 2017)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AJ Half Unit Not available in 2024/25

Corporate Rescue and Reorganisation

This information is for the 2024/25 session.

Teacher responsible: Professor Sarah Paterson

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course focuses on the rescue of companies and the rescue of businesses in financial distress. We use Chapter 11 in the US as our jumping off point, before moving on to analyse the procedures which are available in England. We then consider the European Restructuring Directive, and we finish by setting everything we have studied against academic theories of the role of law in promoting rescue.

Teaching: This course will have two hours of teaching content each week in Autumn Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: One 1,500 word essay.

Indicative reading: A full Reading List will be distributed during the course. For introductory purposes, students are referred to V. Finch and D. Milman, *Corporate Insolvency Law: Perspectives and Principles* (Cambridge University Press, 2017) (3rd edition).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

LL4AK Half Unit Not available in 2024/25

Principles of Corporate Insolvency Law

This information is for the 2024/25 session.

Teacher responsible: Professor Sarah Paterson

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course is concerned with the principles and policies underlying the realisation and distribution of a company's assets in an insolvency. The impact of these principles on third

parties such as corporate groups, secured and unsecured creditors, directors, and employees, is also considered. Topics include: corporate governance in distress; corporate insolvency law theory; the distributional order of priority in insolvency; distribution and corporate groups; protecting unsecured creditors; setting aside transactions and European and international recognition of insolvency proceedings.

Teaching: This course will have 20 hours of teaching in the Winter Term and two hours in the Spring Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: One 1,500 word essay.

Indicative reading: A full Reading List will be distributed during the course. For introductory purposes students are directed to V. Finch and D. Milman, *Corporate Insolvency Law: Perspectives and Principles* (Cambridge University Press, 2017) (3rd edition).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

LL4AL Half Unit

International Business Transactions: Commercial Litigation

This information is for the 2024/25 session.

Teacher responsible: Dr Jacco Bomhoff

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Knowledge of conflict of laws (private international law) would be useful but is not essential. A general understanding of contract, tort, and commercial law is essential.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course deals with jurisdictional problems arising in litigation resulting from international business transactions. We consider relevant rules in English law and European Union law, and take a comparative look at developments in the United States. The following issues are included in the syllabus: (a) General jurisdiction over companies and individuals; (b) Specific jurisdiction in relation to contract and tort claims; (c) Jurisdiction over branches and agents; (d) Parallel litigation ('lis pendens', 'forum non conveniens', anti-suit injunctions); and (e) Constitutional limitations on jurisdiction in the United States.

Teaching: This course will have two hours of teaching content each week in Autumn Term and an additional two hours of teaching in the Spring Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: All students are expected to produce one 1,500 word formative essay during the course.

Indicative reading: Core textbook: Trevor C Hartley, *International Commercial Litigation* (Cambridge University Press, 3rd edn, 2020, (selected chapters). Further reading: Born (Gary B) and Rutledge (Peter B), *International Civil Litigation in United States Courts: Commentary and Materials* (Wolters Kluwer, Austin, Boston, Chicago, New York, the Netherlands, 6th edn, 2018); Fentiman (Richard), *International Commercial Litigation* (Oxford University Press, Oxford, 2nd edn, 2015).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AN Half Unit

International Business Transactions: Conflict of Laws, Extraterritoriality, and Global Governance

This information is for the 2024/25 session.

Teacher responsible: Dr Jacco Bomhoff

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and we cannot guarantee all students will get a place.

Knowledge of conflict of laws (private international law) would be useful but is not essential.

Course content: States often aim to regulate activities that transcend their own borders. When such measures are challenged or enforced through litigation, domestic courts become important sites of global governance. This course brings together perspectives from tort & company law, private international law (conflict of laws), public law, and regulation theory, to study such forms of extraterritorial and transnational regulation. Questions for discussion include: What law should a court in England apply to a case involving environmental damage allegedly caused abroad by a multinational mining company? Should companies operating in China ever be bound by US competition law rules or other US regulations? How free should companies be to choose the law they want to apply to their transactions? Topics to be studied throughout the course are: (1) Choice of law in contract and tort law (especially in Europe and the US); (2) Extraterritorial application of statutes (incl. competition law, securities law, internet regulation; environmental regulations; and other case studies); (3) theories of transnational regulation (e.g. institutional roles of courts, regulatory arbitration).

Teaching: 20 hours of seminars in the Winter Term. Revision seminar in Spring Term.

There will be a reading week in week 6 of Winter Term.

Formative coursework: All students are expected to produce one 1,800 word formative essay during the course.

Indicative reading: Core textbook: Trevor C Hartley, *International Commercial Litigation* (Cambridge University Press, 3rd edn, 2020) (specified chapters only). Further reading: Christopher Whytock, *Domestic Courts and Global Governance*, 84 *Tulane Law Review* (2009); Brilmayer, Goldsmith & O'Hara O'Connor, *Conflict of Laws: Cases and Materials* (7th edn., 2015).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AQ Half Unit

Constitutional Theory

This information is for the 2024/25 session.

Teacher responsible: Professor Martin Loughlin

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course takes its cue from the fact that today, more than ever, the constitution plays a major role in regulating the political and social life of the nation. How has this come about? With what political and social consequences? And what have been the implications for contemporary jurisprudence? This course seeks answers to these questions. It pursues this task by examining the emergence in the modern era of the constitution as a document of higher-order law and considering the ways in which this understanding has acquired a heightened significance

in recent decades. Course topics include: the invention of the documentary constitution, the ideology of constitutionalism, constituent power, constitutional rights, constitutional democracy, constitutional adjudication, constitutional recognition, and cosmopolitan constitutionalism.

Teaching: This course will have 20 hours of teaching in the Autumn Term and two hours in the Spring Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Most of the reading for the course consists of texts available online and delivered through Moodle. Students will find it useful to have regular access to Martin Loughlin, *Against Constitutionalism* (Harvard University Press, 2022).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.
Open book.

LL4AR Half Unit

International Criminal Law: Core Crimes and Concepts

This information is for the 2024/25 session.

Teacher responsible: Professor Gerry Simpson

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: In this course we probe the rules, concepts, principles, history, institutional architecture, and enforcement of what we call international criminal law or international criminal justice, a law embodied most obviously in three of the core crimes set out in the Rome Statute (crimes against humanity, genocide and aggression). I adopt an historical, philosophical and practical focus throughout, though the teaching is largely directed at the conceptual problems associated with the prosecution of war criminals and, more broadly, legalised retribution. Attention, in this respect, will be directed towards the moral and jurisprudential dilemmas associated with bureaucratic criminality and individual culpability during international criminal law's iconic events at Versailles in 1919, at 'Tokyoberg' between 1945 and 1948, in The Hague in recent times and in Jerusalem in 1961.

Teaching: This course will have two hours of teaching content each week in Autumn Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: One 2,000 word essay.

Indicative reading: Gerry Simpson, *Law, War and Crime*, (2007). Gerry Simpson 'Unprecedents' in *Retrials* (eds. Immi Tallgren and Thomas Skouteris, Cambridge: 2020)

Gerry Simpson 'Epilogue: The Next Hundred Years' in *The Oxford Handbook of International Criminal Law*. (eds. Kevin Heller, Jens Ohlin, Sarah Nouwen, Fred Megret, Darryl Robinson, Oxford: 2019). Philippe Sands, *East-West Street*, (2017).

Georg Schwarzenberger, *International Law and Totalitarian Lawlessness*, (1943)

Judith Shklar, *Legalism*, (1964)

Maurice Hankey, *Politics, Trials, Errors* (1950)

Christine Schwobel, *Critical Approaches to International Criminal Law: An Introduction* (2015)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AS Half Unit

International Criminal Law: Prosecution and Practice

This information is for the 2024/25 session.

Teacher responsible: Dr Devika Hovell CKK 7.06

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The 'justice cascade' of international criminal prosecutions may have started as a trickle but is generating momentum. The last few decades have witnessed the establishment of a steady stream of tribunals exercising international criminal jurisdiction, including ad hocs, hybrids, specialist courts and of course the permanent International Criminal Court. In more recent years, there has been a surge in the domestic prosecution of international crimes through the mechanism of universal jurisdiction. This bricolage of international criminal prosecutions is appropriately recognised as an emerging (decentralised) international criminal justice system. In the first half of the course, we will examine the different fora available for the prosecution of international crimes. The second half of the course will focus on the practice and procedure of the International Criminal Court through the lens of the different actors engaged: the judges, the Office of the Prosecutor, the accused, defence counsel, victims and states. The course takes practical, theoretical and critical approaches to issues such as jurisdiction, complementarity, selectivity, modes of liability, defences, victim participation and immunity.

Teaching: This course will have two hours of teaching content each week in Winter Term in the form of a two hour seminar. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: One 1500 word essay.

Indicative reading: Reading lists will be provided for each week's seminar on Moodle. Indicative reading includes Jose Alvarez, 'Crimes of States/Crimes of Hate: Lessons from Rwanda' (1999) 24 *Yale Journal of International Law* 365; Henry Kissinger, 'The Pitfalls of Universal Jurisdiction', *Foreign Affairs* (July 2001); Darryl Robinson, 'Inescapable Dyads: Why the International Criminal Court Cannot Win' (2015) 28 *Leiden Journal of International Law* 323; Sara Kendall and Sarah Nouwen, 'Representational Practices: The Gap Between Juridified and Abstract Victimhood' (2013) 76(3) *Law and Contemporary Problems* 235. Students may wish to refer to Robert Cryer et al., *An Introduction to International Criminal Law and Procedure* (Cambridge, 2019), 4th edition.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AT Half Unit

Regulation: Strategies and Enforcement

This information is for the 2024/25 session.

Teacher responsible: Professor Veerle Heyvaert

Also taught by: Dr Giulia Leonelli, Professor Nicola Lacey

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Financial Law and Regulation; Corporate and Commercial Law; Criminal Law and Justice; IT and Data Law; Intellectual Property Law; Law, Politics and Social Change; Public Law; European,

Comparative and Transnational Law; and Environmental, Climate Change and Energy Law.

This course has a limited number of places and we cannot guarantee all students will get a place.

Course content: The course provides an introduction to key topics relating to regulatory strategies and their implementation. It deals with issues from a systemic and comparative perspective and draws on approaches encountered in public administration, socio-legal studies and institutional economics. Topics include:

- What is Regulation and why regulate?
- Regulation Strategies: Command-and-control; regulating through rules, standards and principles; alternative approaches including emissions trading; and self-regulation
- Risk regulation as a regulatory paradigm
- Enforcement: tools, strategies and principles
- Regulatory Policy: Cost/benefit Assessment, Regulatory Impact Assessment and Better Regulation;
- Regulatory competition; and
- Transnational Regulation

Teaching: This course will have two hours of teaching content each week in Autumn Term in the form of a two hour seminar. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: The student can choose between a formative essay (1,000 - 1,500 word limit) or a mock exam.

Indicative reading: R Baldwin, M Cave and M. Lodge *Understanding Regulation* 2nd ed.(OUP, 2012); R. Baldwin, M. Cave and M. Lodge (ed.) *Oxford Handbook on Regulation* (OUP, 2010) Ian Ayres and John Braithwaite, *Responsive Regulation: Transcending the Deregulation Debate* by (OUP, 1992); V. Heyvaert, *Transnational Environmental Regulation and Governance* (CUP, 2019) B. Morgan and K. Yeung, *An Introduction to Law and Regulation* (CUP, 2007).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AV Half Unit Global Economic Governance

This information is for the 2024/25 session.

Teacher responsible: Dr Mona Paulsen

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has no prerequisites and is intended to be both an introduction and a complement to other course offerings at LSE Law. Students with no previous background in public international law may find it helpful to consider consulting G. Hernandez, *International Law* (2019). Students with deeper interests in cross-border trade, international investment, international financial law and arbitration are encouraged to consider the intersection of this course with other course offerings.

This course has a limited number of places (it is controlled access) and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: Students will study global economic governance through the analytical lens of development. This course focuses on how international trade, investment, and financial rules and institutions (collectively, the international economic order) impact states' development and vice versa—that is, what political and economic forces shape development practices and how this, in turn, constitutes the international economic order.

We will situate our discussion of the state's development strategies against live debates about the resiliency of economic globalisation in the face of several international economic disruptions.

Various readings are assigned to enhance participatory learning, particularly country case studies, primary source materials, and scholarly work. This is an interactive course that engages with both theory and practice; it is dependent on class participation.

We begin by clarifying and reflecting on different conceptions of development in legal and historical contexts (e.g. economic, institutional, sustainable). After that, we will investigate the various functions of "law" in international, transnational, and domestic economic orders. This investigation includes mapping the range of international, regional, and local actors and legal instruments governing the global economy. After that, we explore how international rules and institutions governing trade, foreign direct investment, foreign aid, and international lending impact various states' growth and development strategies. To do so, we will compare multiple countries' growth experiences to evaluate the successes and failures in international law and development, examining the roles of law and the state in their development approaches.

In the second half of the course, we utilise our theory work to appraise the role of international institutions in economic development in practice. We will explore emerging issues in the international economic order, such as injecting international rights into trade agreements, economic security policies, climate change, and the future of the data-driven economy. We will consider the advantages and disadvantages of global engagement by considering the relationships between politics, economics, and law in the work of the International Monetary Fund and World Bank, the role of developing countries in the World Trade Organization, and why and how developing countries conclude investment treaties. Finally, we will diagnose the challenges with global economic governance based on our course reflections from the comparative studies of institutions and state development approaches. Building upon our theoretical and cross-disciplinary studies, students will contextualise their studies against live debates about the resiliency of economic globalisation in the face of several international economic disruptions. Moreover, by the end of the course, students should be able to appraise academic and policy debates addressing the roles of international economic and financial institutions in encouraging, measuring, and facilitating development. Equally, students should be able to formulate reasoned arguments about international economic law-making for emerging global economic governance issues (such as development and digital technologies, climate change, and economic security).

Teaching: This course will have two hours of teaching content each week in Winter Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: One 2,000 word formative essay during the course.

Indicative reading: There is no singular textbook for the course. Reading assignments are provided for each seminar on Moodle and draw from various primary and secondary source materials, accompanied by reading guides and handouts to enhance student learning. LL4AV strives to string together a wide variety of materials, including cross-disciplinary readings, videos and podcasts.

Indicative scholarly readings include primary materials, such as The World Bank's Development Reports, the International Monetary Fund's Articles of Agreement, or Minutes of the General Council Meeting for the World Trade Organization.

Additionally, indicative academic scholarship includes the following examples: A. Anghie, *Imperialism, Sovereignty and the Making of International Law* (2005); A. Roberts and N. Lamp, *Six Faces of Globalization* (2021); M. Erie, "Chinese Law and Development" 61(1) *Harvard International Law Journal* (2021); M.J. Trebilcock and M. Moto Prado, *What Makes Poor Countries Poor? Institutional Determinants of Development* (2011); J. Bonnitche et al., *The Political Economy of the Investment Treaty Regime* (2017); L. Eslava, *Local Space, Global Life: The Everyday Operation of International Law and Development* (2015); A. Narlikar, *Power Narratives and Power Paradoxes in International Trade Negotiations and Beyond* (2020); A. Santos et al., *World Trade and Investment Law Reimagined: A Progressive Agenda for an Inclusive Globalization* (2019); A. Sen, *Development as Freedom* (1999); N. Woods, *The Globalizers: The IMF, the World Bank, and their Borrowers* (2012); H. Wang, "The Belt and Road

Initiative Agreements: Characteristics, Rationale and Challenges," World Trade Review (2021); G. Shaffer, Emerging Powers and the World Trading System (2021); and, S. Pahuja, Decolonising International Law; Development, Economic Growth and the Politics of Universality (2011).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AW Half Unit

Foundations of International Human Rights Law

This information is for the 2024/25 session.

Teacher responsible: Professor Susan Marks

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Development Studies, MSc in Gender (Rights and Human Rights), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and we cannot guarantee all students will get a place.

Pre-requisites: None

Course content: The course provides an introduction to key developments, issues and ideas that have given shape to the regime of international human rights law. We consider enduring debates about the foundations and universality of human rights, and look at a range of controversies relating to the interpretation and application of human rights treaties. Through the study of relevant concepts, norms, processes and debates, students are encouraged to develop an informed and critical assessment of the significance of international human rights law as a force for emancipatory change.

Teaching: This course will comprise one two-hour seminar each week in Autumn Term, except in Week 6, which is a Reading Week. Students are expected to have done the set reading prior to each seminar and be willing to take active part in class discussion.

Formative coursework: Class exercises (which do not count towards the final assessment) will be set.

Indicative reading: Reading lists will be provided for each seminar on Moodle. Relevant readings may include: Conor Gearty and Costas Douzinas (eds.), *The Cambridge Companion to Human Rights Law*; Samuel Moyn, *The Last Utopia: Human Rights in History*; Jessica Whyte, *The Morals of the Market: Human Rights and the Rise of Neoliberalism*; and Philip Alston and Frédéric Mégret, *The United Nations and Human Rights: A Critical Appraisal*.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AX Half Unit

Selected Topics in International Human Rights Law

This information is for the 2024/25 session.

Teacher responsible: Dr Margot Salomon

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Development Studies, MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course explores international human rights law through a range of contemporary topics. We consider international human rights law and issues such as water, property, sexuality, and indigenous rights to land and resources. This course also investigates overarching tensions that help us situate human

rights in wider socio-economic and political context. Here we tend to engage with human rights and resistance, the fragmentation of international law, and current developments at international human rights institutions. Through the study of relevant concepts, norms, processes and debates, students are encouraged to develop an informed and critical assessment of the significance of international human rights law as a force for emancipatory change.

Teaching: 20 hours of seminars in the Winter Term. 2 hours of seminars in Spring Term.

There will be a reading week in week 6 of WinterTerm.

Formative coursework: One 2,000 word essay.

Indicative reading: O de Schutter, *International Human Rights Law: Cases, Material and Commentary* (CUP); P Mecklem, 'Human Rights in International Law: Three Generations or One?' 3 *London Review of International Law* 1 (2015); C Clark, 'Of What Use is a Deradicalized Human Right to Water?' 17 *Human Rights Law Review* 2 (2017); W Schabas, 'The Omission of the Right to Property in the International Covenants' 4 *Hague Yearbook of International Law* (1991); J Kozma, M Nowak and M Scheinin, *A World Court of Human Rights - Consolidated Draft Statute and Commentary* (Neuer Wissenschaftlicher Verlag, 2010)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4AY Half Unit

International Tax Systems: A Global Perspective

This information is for the 2024/25 session.

Teacher responsible: Eduardo Baistrocchi, CKK 7.33

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course will be relevant to the following LLM specialisms: Competition and Innovation, Public International Law, International Business Law, and Taxation.

The course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Course content: The course offers a comprehensive introduction to international taxation. It examines how taxation applies to transactions in the international context. The focus is on rules that operate at a global level, particularly the OECD Model Tax Convention on Income and on Capital, which is the basis of over 3,500 bilateral tax treaties worldwide. The course will look at a series of cross-border transactions, starting with the basic example of export and import of goods and culminating with the treatment of some complex and artificial structures. The features of the international tax system will be studied through these transactions, particularly those found in double tax conventions and the law of the European Union. This approach will be supplemented by an analysis of some foundation concepts needed to study international taxation. Throughout the course, examples will be drawn from the tax systems of a range of jurisdictions, including G20 countries and tax hubs.

Teaching: 20 hours of seminars in the AT and 2 hours of seminars in the ST.

This module is based on a lecture-discussion format with the possibility of guest speakers where appropriate. Students in this course will have a reading week in Week 6, which aligns with law school policy.

Formative coursework: Students will have the option of producing a formative essay of 2,000 words.

Indicative reading: Detailed reading lists will be provided during the course via Moodle.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4B1 Half Unit International Trade Law

This information is for the 2024/25 session.

Teacher responsible: Dr Mona Paulsen

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Development Studies and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Pre-requisites: None. Students with no previous background in public international law may find it helpful to consider consulting a standard textbook such as M. Evans (ed.), *International Law* (5th ed., 2018) or G. Hernandez, *International Law* (2022).

Course content: The course aims to introduce students to the exciting, dynamic world of international trade – a vital driver of growth and development. This course will focus on the World Trade Organization (WTO): its principles, rules, practices, and institutions. In addition to students' doctrinal studies, select topics will grapple with the broader political and economic contexts that shape contemporary challenges with trade and the growing interdependence of our globalised economy.

This course focuses on the core legal principles and agreements that form the multilateral trading system. Students will predominantly evaluate the legal obligations of the General Agreement on Tariffs and Trade (GATT), a foundation for all WTO agreements. That said, students will assess the rising importance of plurilateral, regional, sectoral, and informal agreements, which form part of the growing trade governance of goods and services. Students will begin by exploring various theories about globalisation and the rationale for open markets. Students will evaluate why states trade with each other and the economic issues central to understanding the legal aspects of the multilateral trading system. After that, we examine the multilateral trading system's legal, economic, and political foundations. Students will draw upon the theory and practice of the multilateral trading system to weigh questions concerning the role of the state and debates concerning trade liberalisation and complex global supply chains, including industrial and subsidy policies.

The central aim of the course is for students to gain a solid theoretical understanding of WTO principles and practices, to gain the skills to evaluate WTO rules, and to debate the future of the multilateral trading system. Students will examine the most recent developments in international trade agreements and jurisprudence. To do so, students explore WTO rules in context, with opportunities to link topics to real-life events and contemporary challenges. In addition, students will investigate the evolving roles of the WTO, including its rulemaking, dispute settlement, and deliberative functions. By the end of the course, students should be able to develop reasoned arguments about the practice of the multilateral trading system and consider emerging cross-cutting issues respecting economic security, digitalisation, emerging technologies, climate change, and other resilience and financing

challenges.

Students with deeper interests in development issues and the political economy of trade may complement this course with LL4AV: International Economic Law and Development.

Teaching: This course will have two hours of teaching content each week in the Winter Term and two additional hours in the Spring Term. There will be a Reading Week in Week 6 of the Winter Term.

Formative coursework: One 2,000 word formative essay during the course.

Indicative reading: Reading assignments are provided for each seminar on Moodle and draw from various primary and secondary source materials, accompanied by reading guides and handouts to enhance student participatory learning. Indicative reading includes assigned textbook chapters, relevant WTO rules, and extracts from WTO dispute settlement reports. Additionally, students can engage in academic and policy debates based on various cross-disciplinary materials, including guest speakers, videos, podcasts, and academic scholarship.

The course relies upon a digital textbook: J. Hillman et al., *International Trade Law from Multiple Perspectives*. Every effort is made to provide online reading assignments to enhance accessibility. Other helpful textbooks include P. Van den Bossche & W. Zdouc, *The Law and Policy of the World Trade Organization: Text, Cases and Materials* (5th ed., 2021); S. Lester et al., *World Trade Law, Texts Materials, and Commentary* (3rd ed. 2018); and R. Howse et al., *The Regulation of International Trade* (4th ed., 2013). Primary WTO source materials are available for download from the WTO's website.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BA Half Unit International Law and the Movement of Persons within States

This information is for the 2024/25 session.

Teacher responsible: Dr Chaloka Beyani

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and we cannot guarantee all students will get a place.

Course content: The course provides a detailed study of the international legal framework in which the causes, problems, policies, standards, techniques and institutions concerning the movement of persons within States and protection of internally displaced persons are situated. The course explores the overlap between International Human Rights Law, International Humanitarian Law and Humanitarian Assistance with respect to internally displaced persons. It covers: the definition of internally displaced persons; individual criminal responsibility for forcible displacement before ad hoc Tribunals with criminal jurisdiction and the International Criminal Court; standards applicable in international law to the protection of internally displaced persons, the regime of humanitarian assistance to displaced persons; and finally the institutional protection of internally displaced persons by the United Nations Special Rapporteur on the Human Rights of Internally Displaced Persons, the United Nations High Commissioner for Human Rights, and the United Nations High Commissioner for Human Refugees.

Topics include:

- Regulation of movement within States in International Law
- Territorialism, movement, and displacement
- Internally displaced persons and the role of the UN Special Rapporteur on the Human Rights of Internally Displaced Persons

- Protection of Internally Displaced Persons in International Human Rights Law
- Protection of Internally Displaced Persons in International Humanitarian Law
- The Regime of Climate Change induced Displacement
- Individual Criminal Responsibility for Forcible Displacement
- Institutional Protection and Humanitarian Assistance
- Internally Displaced Persons in Post-Conflict Situations
- Remedies and 'durable' solutions for Internally Displaced Persons.

Teaching: This course will have two hours of teaching content each week in Winter Term.

There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: G.S. Goodwin-Gill and Jane MacAdam, *The Refugee in International Law*, 3rd ed., (Oxford, 2007).

Allehone Abebe, *The Emerging Law of Forced Displacement in Africa: Development and Implementation of the Kampala Convention on Internally Displaced Persons* (Routledge, 2017).

C.Phuong, *International Protection of Internally Displaced Persons* (Cambridge, 2009). J. McAdam, *Climate Change, Forced Migration, and International Law* (OUP, 2012)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BB Half Unit

International Law and the Movement of Persons Between States

This information is for the 2024/25 session.

Teacher responsible: Dr Chaloka Beyani

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and we cannot guarantee all students will get a place.

Course content: The course provides a detailed study of the international legal framework in which the causes, problems, policies, standards, techniques and institutions concerning the protection of asylum seekers, refugees and refugee women, and migrants are situated. The course explores the overlap between International Refugee Law, International Human Rights Law, International Criminal Law, the phenomenon of Migration, including Human Trafficking in the context of refugees, legal and illegal migrants. It covers: the definition of refugees, legal and illegal migrants, including trafficking in human beings; the concepts of 'well-founded fear' of persecution and group eligibility to refugee protection; procedures for determining refugee status on an individual and group basis, in Africa, Asia, Australia, the European Union, North America, and Latin America; temporary protection; the process of exclusion from refugee protection; the role, in refugee law and human rights, of the principle of non-refoulement in refugee protection; the cessation of refugee status, voluntary repatriation, and safe return; standards applicable in international law to the protection of refugees, migrants, and evolving standards against human trafficking; the regulation of migration in regional economic and political unions, namely the European Union, East African Community, the Union of West African States, the Caribbean Community and the Southern African Development Community; and finally the institutional protection of refugees, and migrants by the United Nations High Commissioner for Refugees and the International Organisation for Migration.

Topics include:

- International Law and the Movement of Persons Between States
- Definition of Refugees
- The Right to Seek and Obtain Asylum and Determination of

Refugee Status

- Exclusion from Refugee Protection
- Protection of asylum seekers and refugees from Refoulement
- Standards of Protection and cessation of refugee status
- Definition of Migrants
- Protection of Migrants in International Human Rights Law
- Regional Integration and Migration
- Trafficking in Human Beings and Human Smuggling

Teaching: This course will have two hours of teaching content each week in Autumn Term.

There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: G.S. Goodwin-Gill and Jane MacAdam, *The Refugee in International Law*, 3rd ed., (Oxford, 2007) J. Hathaway, *The Rights of Refugees under International Law* (Cambridge, 2005) E. Feller, V. Turk and F. Nicholson, *Refugee Protection in International Law: UNHCR's Global Consultations on International Protection* (Cambridge University Press 2003) I. Brownlie and G. Goodwin-Gill, *Basic Documents on Human Rights* latest edition, Oxford: Clarendon Press, OR Ghandi, *International Human Rights Documents*, latest edition, Oxford: Clarendon Press

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BF Half Unit

International Financial Regulation

This information is for the 2024/25 session.

Teacher responsible: Dr Philipp Paech

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Accounting, Organisations and Institutions, MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course focuses on the micro- and macro-prudential regulation of financial institutions and the financial system. It examines the prudential regulation of banks, bank resolution schemes, the regulation of shadow banking and other regulatory attempts to ensure financial stability, including with regard to novel, technology-induced types of financial services ('FinTech'). The focus will be on the regulation of national and international aspects of financial institutions and the financial system, rather than on private law and transactional aspects. No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. For non-lawyers, a willingness to engage in legal analysis will be necessary, although a legal background is not required.

The syllabus may include the following topics:

The Rational of International, EU and UK Regulatory Structures
Core concepts of Financial Regulation, pre- and post-Crisis
Financial Stability – Policy Issues, Principles and Global Standard
Setters
Prudential Regulation of Banks – The Basel Accords
National and Cross-border Resolution of Failing Banks
Regulating Shadow Banks
Regulating Credit Rating Agencies
Regulating FinTech

Teaching: This course will have two hours of teaching content each week in Winter Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course. The course offers also a voluntary mock exam.

Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students electronically where possible. In addition, the students will be invited to do independent reading. A good general introduction

is J. Armour et al, Principles of Financial Regulation, OPU 2016
Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BG Half Unit Rethinking EU Law

This information is for the 2024/25 session.

Teacher responsible: Prof. Floris de Witte

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

For the LLM (Specialisms: European Law, Public Law, Human Rights Law)

Pre-requisites: Basic knowledge (at an undergraduate level) of EU institutions, EU law or European integration is useful but not required.

Course content: The course offers a critical re-examination of some of the central themes in EU legal studies. It consists of two parts. In the first part, we will explore how to think about European integration – in its colonial, economic, social, and cultural dimensions, and what the role of law may be in this process. It analyses different methodological commitments in exploring these questions, and asks how the role of law has changed as the EU itself is facing new challenges.

The second part of the course applies what we've learned and explores a number of different dimensions of European integration. We will analyse and re-think how EU law is both an instrument that creates European integration, but also something that comes with specific economic, social and cultural assumptions. The areas that we will explore will be taken from the following range: animal rights, geographical indication protection rules, LGBTQ+ rights, access to welfare benefits for migrants, equality law, and the legislation on the EU's 'sovereign autonomy'.

Teaching: This course will have two hours of teaching content each week in Winter Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: All students are expected to produce one 1,500 word formative essay during the course.

Indicative reading: Azoulai, 'The Law of European Society' (2022) 59 CMLR 203.

Neuvonen, 'A way of critique: What can EU legal scholars learn from critical theory?' (2022) European Law Open.

Panasci, 'Unravelling Next Generation EU as a Transformative Moment: From Market Integration to Redistribution' (2024) 61 CMLR 13.

Von Bogdandy, 'The Emergence of European Society through Public Law' (OUP 2024).

De Witte, 'Where the Wild Things Are: Animal Autonomy in EU Law' (2023) 60 CMLR 391

Ristuccia, 'Ties that bind and ties that compel: Dependency and the Ruiz Zambrano doctrine' (2023) 60 CMLR 1227.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BH Half Unit Law and Government of the European Union

This information is for the 2024/25 session.

Teacher responsible: Prof. Floris De Witte

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Basic knowledge (at an undergraduate level) of EU institutions, EU law or European integration is required.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Pre-requisites: Basic knowledge (at an undergraduate level) of EU institutions, EU law or European integration is useful but not required.

Course content: How is the European Union governed? This course will discuss this question in both a descriptive and a normative fashion. In descriptive terms, the course looks at the way in which the EU institutions are structured, how they function internally, and the powers that they have. It looks at the power of the European Court of Justice, at the role of fundamental rights, and the way in which the Treaty can be amended. This descriptive discussion forms the backdrop for the (more central) normative discussion: how should Europe be governed? Is the EU democratic? Should it be? Should Member States have more or less power to challenge EU measures? What will the future of the EU look like? And what should it look like?

Students will be challenged to think about the EU as an institutional structure in which both law and politics play a crucial role.

Really understanding the EU requires knowledge of both areas as well as knowledge of their interaction. At no other time in the development of the EU has the interaction between law and politics so fundamentally affected the direction of the integration process. The coming years will see fundamental changes to the EU's structure; which are informed as much by political dynamics as by legal mechanisms. This course prepares you to fully understand those changes - and allow you to analyse critically both their normative content and institutional structure. We will of course discuss these questions with a focus on the contemporary challenges of the EU: ranging from Russia's invasion of Ukraine and Brexit to the rule of law crisis and the climate change challenge.

Teaching: This course will have 20 hours of teaching content in Autumn Term. There will be a Reading Week in Week 6.

Formative coursework: All students are expected to produce one 1,500 word formative essay during the course.

Indicative reading: Dawson & De Witte, 'EU Law and Government' (CUP 2022).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BK Half Unit Corporate Crime

This information is for the 2024/25 session.

Teacher responsible: Professor Jeremy Horder

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Accounting and Finance, MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on

this course.

Course content: This course focuses on crime committed within the commercial and business environment. The course considers the principles of corporate criminal liability and different models of corporate criminal liability. The exercise of prosecutorial discretion in corporate crime cases, with a consideration of deferred prosecution agreements, is examined. The course addresses the challenges in the international fight against corruption. As well as exploring the nature, extent and consequences of corruption, the course examines the law of fraud and false accounting, as well as international responses to corporate crime and their implementation into domestic law. The increasing emphasis placed by the law on a company's obligation to prevent the occurrence of corporate crime is also examined, in relation to fraud, environmental crime and the abuse of human rights. There is no overlap between this course and the course on Financial Crime in the Winter (second) Term.

Teaching: This course will have two hours of teaching content each week in Autumn Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: One 2,000 word essay.

Indicative reading: Reading is prescribed for each lecture and seminar. There are no core textbooks available for the course, although Ashworth's Principles of Criminal Law (10th edition) has an online chapter – available through LSE library at Oxford Scholarship online - on Financial Crime that may be of assistance. All the reading material is available from resources easily accessible through LSE Moodle, LSE Electronic Library and the internet. Preliminary reading is not required but for an understanding of the areas covered in the course students may read Wells: Corporations and Criminal Responsibility, 2nd edition, 2001, Oxford University Press; Gobert & Punch: Rethinking Corporate Crime, 2003, Butterworths LexisNexis; Green: Lying, Cheating and Stealing: A Moral Theory of White Collar Crime, 2007, Oxford University Press.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BL Half Unit Financial Crime

This information is for the 2024/25 session.

Teacher responsible: Dr Jonathan Fisher KC

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Accounting and Finance, MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course focuses on financial crime committed within the commercial and business environment and explores current perspectives in the detection, investigation and prosecution of these cases. The first part of the course considers the emergence of anti-money laundering regimes, through criminal offences and regulatory compliance, as the primary response to financial crime. In addition, the course examines models for confiscation of criminally obtained property following conviction and frameworks for non-conviction-based confiscation and taxation in the civil courts. The case for illicit enrichment offences and use of special investigation tools such as unexplained wealth orders and compulsory interrogation powers in the detection of financial crime is explored. The course addresses the compatibility of these initiatives with protections on due process and the rights to privacy and property set out in the European Convention on Human Rights and other international instruments. The second part of the course examines the engagement between financial crime and the global financial markets, with a close

focus on offences such as insider dealing, misleading the financial markets and false accounting. The challenges of detection and enforcement are discussed, and the contribution of financial crime to the global financial crisis in 2008 is studied. In addition, the course explores the potential criminality of other market malpractices such as manipulating the financial markets, short selling and reckless risk taking.

The course is bracketed by introductory and concluding sessions. The first session explores the nature and extent of financial crime, the relationship between organised crime groups and financial crime, and the social and economic impact of financial crime. The session also addresses the perceived ambivalence to the prosecution of financial crime cases, the limitations on public authorities to fight financial crime, the role of public / private partnerships and the rise of private prosecutions.

The course concludes with a session on the principles of sentencing in financial crime cases and an examination of alternatives to the imposition of lengthy custodial sentences.

There is no overlap between this course and the course on Corporate Crime in the Autumn (first) Term. Corporate Crime is not a pre-requisite for this course.

Teaching: This course will be taught in the Winter Term, in the form of a one hour lecture in person and a one-hour seminar class. Week 6 is a reading week. There are two revision sessions in the summer term.

Formative coursework: One 1,500 word essay.

Indicative reading: Reading is prescribed for each lecture and seminar. There are no core textbooks available for the course; however, all the reading material is available from resources easily accessible through LSE Moodle, LSE Electronic Library and the internet. Preliminary reading is not required but for an understanding of the areas covered in the course students may read Green: Lying, Cheating and Stealing: A Moral Theory of White Collar Crime, 2007, Oxford University Press; Alldridge: Money Laundering Law: Forfeiture, Confiscation, Civil Recovery, Criminal Laundering and Taxation of the Proceeds of Crime, 2003, Hart Publishing; Ryder: Financial Crime in the 21st Century, Law and Policy, 2012, Edward Elgar.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BM Half Unit Not available in 2024/25 The Legal Protection of Inventions

This information is for the 2024/25 session.

Teacher responsible: Dr Siva Thambisetty

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students interested in this subject are encouraged to consider enrolling onto Innovation, Technology and Patent Law (LL4BN) in the Winter Term.

This course has a limited number of places and we cannot guarantee all students will get a place.

Course content: Legally defined inventions are everywhere - in the tap or touch of a smartphone, in the food we relish, the medicines we need, the clothes we want, and in the buildings we choose to live in. Despite the vast differences in the subject matter of patents and the constant rise of unprecedented technologies, the legislative architecture of patent law remains on the face of it, technology neutral. The normative justifications for patent rights overwhelmingly focus on the incentive effect of these monopoly rights even as they raise issues such as inequities in access to medicines and essential technologies, socialisation of the risks of research and development, bioethical concerns around biotechnology or fears about food security raised by patents on genetic modification technologies.

The aim of this course is to develop a sound critical approach to

the general principles of the legal protection of inventions and gain familiarity with widely different contexts of innovation. The course will cover patent prosecution, patentability criteria, patent eligibility and exceptions in sectors as diverse as software, pharmaceuticals and biotechnology. A comparative approach based on UK, EU and US patent law will be adopted where relevant. Dominant narratives around the justification of patents in different sectors will be examined through carefully chosen cases.

Students do not need a scientific background and will be supported in understanding technical aspects. Unlike past years when the course was examined by a long essay, in 2023-24 the summative assessment will involve an examination for 100% of the marks.

Topics covered include: Novelty, inventive step, person skilled in the art, industrial applicability, sufficiency of disclosure, patent eligibility of computer implemented inventions and biotechnology, and exceptions (such as animal varieties, diagnostic methods, on grounds of morality).

Teaching: Two hours of teaching each week, part lecture and part seminar in Winter Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Bentley, Sherman, Gangjee and Johnson Intellectual Property Law Oxford University Press 2018
Tanya Aplin Intellectual Property Law: Text, Cases and Materials (Oxford University Press 2013)

Justine Pila The Requirement for an Invention in Patent Law (OUP 2010)

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

LL4BP Half Unit

Current Issues in Intellectual and Cultural Property Law

This information is for the 2024/25 session.

Teacher responsible: Dr Luke McDonagh

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course takes a historical, theoretical and contextual approach to intellectual and cultural property and aims to provide an overview of the concepts, institutional models, and socio-economic formations that cut across the diversity of both regimes. Expansive questions are asked but not in abstraction. Contemporary cases studies will be used to interrogate the normative bases and doctrinal architecture of rights to inventions, art, trade marks, biodiversity and more. A wide range of topics and interests will be covered and no previous background in intellectual property will be assumed.

Indicative seminar topics include the encroachment of the public domain by the pressure to protect unprecedented kinds of subject matter, the relevance of monopolies in 'negative spaces' (the fashion industry, fan fiction, magicians, and stand-up comedy); the evolution of non-conventional trade marks such as scents, shapes and over-arching brands, the link between incentives and innovation; the controversy over Covid-19 vaccine production and technology transfer, artificial intelligence as inventor and author, and the intersection of human rights and intellectual property.

Teaching: Two hours of seminar teaching per week in Winter Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading:

- Biagioli, Jaszi & Woodmansee, Making and Unmaking Intellectual Property (2011).
- Boyle, The Public Domain. Enclosing the Commons of the Mind (2009).
- Miles, Art as Plunder. The Ancient Origins of Debate About Cultural Property (2008).
- McDonagh, Performing Copyright: Law, Theatre and Authorship (2021).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BQ Half Unit

Trade Mark Law

This information is for the 2024/25 session.

Teacher responsible: Dr Luke McDonagh

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Intellectual Property Law; Information Technology, Media and Communications Law

Course content: This course offers in depth analysis of legislation and case law concerning trade marks in the UK and EU. In so doing the module considers relevant developments in international and comparative law. Topics covered include: national, regional and international trade mark registration systems; absolute grounds and relative grounds of refusal; the scope of trade mark rights; trade mark infringement; exceptions and defences; and the ownership of brand image in the context of the interaction between consumers and corporate brands.

Teaching: 20 hours of seminars in the Autumn Term.

There will be a Reading Week in week 6 of Autumn. 2 hours of seminars in the Spring Term.

Formative coursework: One 2,000 word essay.

Indicative reading: Core Textbook

- S Karapapa and L McDonagh, Intellectual Property Law 1st edition (OUP, Oxford 2019).

Students will be expected to read widely in designated journals and books. All of the recommended cases and journal articles are available in electronic form and additional materials will be made available on the Moodle website which supports this course.

A detailed reading list will be provided for the course, but the following are indicative (and available in the LSE Library):

- L Bently, J Davis, J Ginsburg (eds) Trade Marks & Brands: An Interdisciplinary Critique (CUP, Cambridge 2008);
- A Arvidsson, Brands. Meaning and Value in Media Culture (Routledge, London 2006);
- C Lury, Brands. The Logos of the Global Economy (Routledge, London 2004);
- G Dinwoodie & M Janis (eds) Trade Mark Law and Theory: A Handbook of Contemporary Research (Edward Elgar, Cheltenham 2008);
- S Maniatis & D Botis, Trade Marks in Europe: A Practical Jurisprudence 2nd ed (Sweet & Maxwell, London 2010).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BT Half Unit

Cultural Property and Heritage Law

This information is for the 2024/25 session.

Teacher responsible: Dr Tatiana Flessas

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School

LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course looks at cultural property and heritage law from legal, social theoretical and practice-oriented perspectives. It provides an overview of existing and emerging cultural property and heritage legislation (domestic and international). We will be looking in particular at the development of cultural property legislation in the 20th century and emerging international cultural property and heritage initiatives under the auspices of the UN and UNESCO. Topics to be covered include the origins of cultural property law, the problems in defining cultural property and heritage, current issues and cases in repatriation and restitution of cultural objects, the National Trust and other heritage protection regimes, and intangible cultural heritage. The course also addresses the creation and management of museums and heritage sites, primarily within the UK, but also including sites in North and South America, Europe and Asia. We consider how the issues that we've identified throughout the course arise in the ongoing construction, protection, and (primarily economic) uses of heritage. Along with specialist seminars, the course includes visits to museums and contact with practising experts in the field.

Teaching: This course will have two hours of teaching content each week in Autumn Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: One 2,000 word essay or other type of formative assessment.

Indicative reading: Neil Cookson, *Archaeological Heritage Law* (2000 Barry Rose); John Henry Merryman and Albert E. Elsen, *Law, Ethics and the Visual Arts* (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 1* (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 3* (1989 Butterworths); J.E. Tunbridge and G.J. Ashworth, *Dissonant Heritage: the management of the past as a resource in conflict* (1996 J. Wiley); Norman Palmer, *Museums and the Holocaust: law, principles and practice* (2000 Institute of Art and Law); John Henry Merryman, *Thinking about the Elgin Marbles: critical essays on cultural property, art and law* (2000 Kluwer Law International); Nick Merriman, *Beyond the Glass Case: the past, the heritage and the public in Britain* (1991); Jeanette Greenfield, *The Return of Cultural Treasures* (1989); Richard Prentice, *Tourism and Heritage Attractions* (1993); G.J. Ashworth and P.J. Larkham, eds. *Building a New Heritage: tourism, culture, and identity* (1994); Peter Mandler, *The Fall and Rise of the Stately Home* (1997); Patrick J O'Keefe, *Trade in Antiquities: reducing destruction and theft* (1997); Ismail Serageldin, Ephim Shluger, Joan Martin-Brown, eds. *Historic Cities and Sacred Sites: cultural roots for urban futures* (2001); Federico Mayor, *Memory of the Future* (1995); Peter J. Fowler, *The Past in Contemporary Society: then, now* (1992); David Brett, *The Construction of Heritage* (1996); Karl Ernest Meyer, *The Plundered Past* (1974).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BU Half Unit Art Law

This information is for the 2024/25 session.

Teacher responsible: Dr Tatiana Flessas

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course engages in a discussion of specific cases and issues regarding acquisition, ownership, and restitution of works of art, and the problems that arise in regulating markets in art and cultural artefacts. We will look at domestic (UK and US) and international legislation regulating the art trade. Against this legislative background, the course examines important cases in disputes regarding commodification and sale of cultural goods, including the issues that arise in the operation of the art market (dealers, museums, collectors and auction houses). 'Art Law' is a specialised area of practice and an emerging area of theory and scholarship. We will look at some of the cases and theory of art and law, including the practices of dealers and auction houses in valuing (and mis-valuing) art for sale; the recent developments in addressing the restitution of art taken during the Nazi era; museum loans and the cross-border movement of art; the restoration and conservation debate(s) and then turn to a scholarly and interpretive approach to the issues that arise in considering the art market. We will also return to the questions that arise in dealer, auction house and museum policies more generally. Finally, practitioners in these areas, museum and auction house professionals, archaeologists, and art experts will be contributing to the seminars on the emerging legal issues in this area.

Teaching: This course has 20 hours of teaching content in Winter Term and an additional two hours of teaching in the Spring Term. There is a Reading Week in Week 6 of Winter Term.

Formative coursework: One 2,000 word essay.

Indicative reading: Colin Renfrew, *Loot, Legitimacy and Ownership: The Ethical Crisis in Archaeology* (2000 Duckworth); Neil Cookson, *Archaeological Heritage Law* (2000 Barry Rose); James Cuno, *Who Owns Antiquity? Museums and the Battle over our Ancient Heritage* (2010 Princeton University Press); John Henry Merryman and Albert E. Elsen, *Law, Ethics and the Visual Arts* (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 1* (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 3* (1989 Butterworths); Norman Palmer, *Museums and the Holocaust: law, principles and practice* (2000 Institute of Art and Law); Olav Velthuis, *Talking Prices: Symbolic Meanings of Prices on the Market for Contemporary Art* (2007 Princeton University Press); Jason Felch & Ralph Frammolino, *Chasing Aphrodite: The Hunt for Looted Antiquities at the World's Richest Museum* (2010 Houghton Mifflin Harcourt); Sarah Thornton, *Seven Days in the Art World* (2009 Granta Books); Jeanette Greenfield, *The Return of Cultural Treasures* (1989); Patrick J O'Keefe, *Trade in Antiquities: reducing destruction and theft* (1997); Karl Ernest Meyer, *The Plundered Past* (1974).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BV Half Unit Transnational Environmental Law

This information is for the 2024/25 session.

Teacher responsible: Professor Veerle Heyvaert

Also taught by: Dr Oliver Hailes

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Environmental Policy and Regulation, MSc in Environmental Policy, Technology and Health (Environmental Policy and Regulation) (LSE and Peking University), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be relevant to the following LLM specialisms: Environmental, Climate Change and Energy Law, European, Comparative and Transnational Law; Law, Politics and Social Change; Public International Law; Public Law.

This course is capped at 30 students.

Course content: The course instructs students on key issues in environmental law and governance beyond the state. Through the

study of recent developments in international environmental law, transnational trends in national environmental law, and private environmental regulation, the course engages with the dominant environmental challenges of our age. It addresses a range of topical themes including the effectiveness of international treaties, the rights and responsibilities of large corporations, the meaning and impact of environmental legal principles, the role of science and of indigenous knowledge in environmental decision-making and dispute resolution, the potential and risks attached to rights-based approaches to environmental protection, and integration of environmental concerns into other legal disciplines and economic transactions. The questions are illustrated through case studies relating to, among others, climate change and biodiversity protection.

Teaching: This course will have 20 hours of teaching content in Winter Term and an additional two hours of teaching in the Spring Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: The students can choose between a formative essay (1,000 - 1,500 word limit) and a mock exam.

Indicative reading: A detailed reading list will be provided for each seminar. The overwhelming majority of readings are electronically available as e-books or in journals. Essential reference works include the journal *Transnational Environmental Law*; Heyvaert, *Transnational Environmental Regulation and Governance* (CUP, 2019); Heyvaert & Duvic-Paoli, *Research Handbook on Transnational Environmental Law* (Edward Elgar, 2020); Kingston, Heyvaert & Cavoški, *European Environmental Law* (CUP, 2017); Sands & Peel, *Principles of International Environmental Law* (4th ed, CUP, 2018); Bodansky, *The Art and Craft of International Environmental Law* (2010, Harvard University Press); Bodansky, Brunnee & Hey, *The Oxford Handbook of International Environmental Law* (OUP, 2007); and the Stern Review Executive Summary (online).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4BW Half Unit Law and Political Thought

This information is for the 2024/25 session.

Teacher responsible: Professor Thomas Poole

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Political Theory and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course examines the relationship between law and political theory. It does so through the study of classic texts of political thought, such as: Hobbes, *Leviathan*; Plato, *Statesman*; Harrington, *Oceana*; Schmitt, *Political Theology*; Arendt, *On Revolution*; Hayek, *Law, Legislation and Liberty*. Occasionally, we extend the range of analysis to include other forms of media, such as Fritz Lang's *M* in the context of a broader discussion of Weimar-era theorists of law and politics (Kelsen, Schmitt, Heller). In this way, the course deals with major topics of theoretical and juridical interest, such as law and government, theories of authority and legitimacy, revolution and counter-revolution, nationalism and cosmopolitanism.

Teaching: This course will have 20 hours of teaching content in Winter Term and an additional two hours of teaching in the Spring Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: The reading for the course consists of classic texts in political thought. Many are available online and the course is delivered through Moodle.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in

the spring exam period.

LL4C2 Half Unit World Poverty and Human Rights

This information is for the 2024/25 session.

Teacher responsible: Dr Margot Salomon

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Development Studies, MSc in Human Rights, MSc in Political Science (Global Politics) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

No pre-requisites but some knowledge of public international law is helpful.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course examines world poverty and inequality through the regime of international law aimed at the protection of human rights. It unpacks the duties of states and non-state actors and the ways in which they may be implicated in the deprivation that has 2.7 billion people concentrated in the South, and many in the North, unable to exercise even their minimum essential levels of human rights. The course is interested in studying conceptual, normative, and critical approaches to human rights and will draw on literature that situates human rights and development in broader interdisciplinary and structural contexts. It will explore the role of international actors and institutions that impact positively or negatively on human rights today, as well as examine global developments and the application of legal standards to some areas of outstanding concern.

Topics to be covered may include:

- Poverty as a human rights issue
- Human rights and development
- The right to development and claims against the public international order
- The scope, content and limits of the obligation of international cooperation
- Human rights, the World Bank and IMF
- Human rights and international trade, investment, and finance
- Interrogating the Sustainable Development Goals

Teaching: This course will have two hours of teaching content each week in Winter Term and an additional two hours of teaching in the Spring Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: One 2,000 word essay.

Indicative reading: G. Abi-Saab, 'The Legal Formulation of the Right to Development', in R-J Dupuy (ed), *The Right to Development at the International Level*, Hague Academy of International Law (1980)

B.S. Chimni, 'International Institutions Today: An Imperial Global State in the Making' *European Journal of International Law* (2004)

C. Chinkin, 'The United Nations Decade for the Elimination of Poverty: What Role for International Law?' 54 *Current Legal Problems* (2001)

P. Muchlinski, 'Holistic Approaches to Development and International Investment Law: The Role of International Investment Agreements' in J. Faundez and C. Tan (eds), *International Law, Economic Globalization and Development* (2010)

Maastricht Principles on Extraterritorial Obligations of States in the

area of Economic, Social and Cultural Rights (2011)

M.E. Salomon, 'Of Austerity, Human Rights and International Institutions' *European Law Journal* (2015)

Report of the UN Independent Expert on the effects of foreign debt and other related international financial obligations of states on the full enjoyment of all human rights, particularly economic, social, and cultural rights: Mission to Greece' UN Doc A/HRC/31/60/Add2 (29 Feb 2016)

O.C. Okafor, 'The Bandung Ethic and International Human Rights Praxis: Yesterday, Today and Tomorrow' in L. Eslava, M. Fakhri and V. Nesiha (eds) *Bandung, Global History, and International Law* (2017)

J. Linarelli, M.E. Salomon and M. Sornarajah, *The Misery of International Law: Confrontations with Injustice in the Global Economy* (2018).

A detailed reading list will be issued at the first seminar.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4C5 Half Unit

International Commercial Arbitration

This information is for the 2024/25 session.

Teacher responsible: Dr Paul MacMahon

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: Arbitration — binding adjudication outside the courts generally deriving its authority from party consent — is a standard way of resolving international commercial disputes. Supporters of international arbitration cite its neutrality, its confidentiality, its flexibility, the greater expertise of arbitrators, and the global enforceability of arbitral awards under the New York Convention on the Recognition and Enforcement of Arbitral Awards. To detractors, however, international commercial arbitration is often expensive and slow. Other critics contend, more fundamentally, that arbitration infringes the spheres appropriately occupied by national courts and national law. Regardless, the complex relationship between arbitrators and courts, especially when combined with transnational elements, raises a host of fascinating theoretical and practical problems.

In addition to the New York Convention, this course consistently covers the widely adopted UNCITRAL Model Law on International Commercial Arbitration, together with England's and France's distinctive approaches to the subject. Where appropriate, the course draws on legislation and case law from other jurisdictions, including Switzerland and the United States. Coverage includes:

- Legal framework of international commercial arbitration
- Scope and validity of arbitration agreements
- Conflicts of laws and the arbitration agreement
- Challenges to arbitral jurisdiction
- Appointment of arbitrators
- Arbitral procedure
- Law applicable to the merits of the dispute
- Challenges to arbitral awards
- Recognition and enforcement of arbitral awards
- Public policy limitations on international commercial arbitration

This course concentrates on arbitration resulting from agreements between private parties and may particularly appeal to students with interests in contracts and private international law.

Considerations specific to states and state-owned enterprises as parties to arbitration are left to LL4C6 International Arbitration, which complements this course and offers a perspective on all forms of international arbitration.

Teaching: 20 hours of contact time in Autumn Term with a

Reading Week in Week 6. 2 additional hours in Spring Term.

Formative coursework: One 2,000 word essay.

Indicative reading: Nigel Blackaby & Constantine Partasides, *Redfern and Hunter on International Commercial Arbitration* (7th edn, OUP 2022); Gary Born, *International Commercial Arbitration* (3rd edn, Kluwer 2021); Emmanuel Gaillard, *Legal Theory of International Arbitration* (Brill Nijhoff 2012); Jan Paulsson, *The Idea of Arbitration* (OUP 2013); Jan Kleinheisterkamp, 'Overriding Mandatory Laws in International Arbitration' (2018) 67 ICLQ 903

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4C6 Half Unit

Advanced Issues in International Arbitration

This information is for the 2024/25 session.

Teacher responsible: Dr Oliver Hailes

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Pre-requisites: None, but students would benefit from enrolling in LL4E6 International Dispute Resolution: Courts and Tribunals, LL4E7 International Investment Law and Arbitration, and/or LL4C5 International Commercial Arbitration. Commercial lawyers with no background in public international law are invited to read Roberts and Sivakumaran, 'The Theory and Reality of the Sources of International Law' in Evans (ed), *International Law* (2018). Students may also wish to consult one of three recent manuals that address interactions among different forms of international arbitration: Kröll, Bjorklund & Ferrari (eds), *Cambridge Compendium of International Commercial and Investment Arbitration* (2023); Lim (ed), *The Cambridge Companion to International Arbitration* (2021); Schultz & Ortino (eds), *The Oxford Handbook of International Arbitration* (2020).

Course content: From the Alabama Claims to climate change, international arbitration remains the preeminent procedure for resolving commercial disputes, protecting foreign investment, and delimiting sovereign entitlements. Such matters may be determined by public international law, when dealing with states in their governmental capacity, or commercial parties' choice of domestic contract law. The law governing the arbitration agreement and the law of the seat may also play decisive roles. Practitioners of interstate, investment, and commercial arbitration must be able to codeswitch among applicable laws and procedural rules when representing businesses or governments, whilst appreciating where these different types of disputes may overlap. Similarities and differences across these forms are equally important for academics and policymakers who take arbitration as an object of criticism or reform.

The three main forms of international arbitration are introduced in LL4E6 (interstate), LL4E7 (investment) and LL4C5 (commercial). Through a programme of wide reading and discussion, this course connects these specialised forms to develop a generalist perspective on international arbitration as a unified field of practice. Analytical essays should appraise this perspective, whereas problem questions call for strategic choices in making or facing claims that could be brought before any of the three forms of international arbitration and the application of legal techniques to resolve possible conflicts.

The course is organised in three parts. Part I (Foundations) introduces the theoretical debates, historical development, common rules of procedure, and sociological factors that underpin modern practice. Part II (Forms) digs deeper into the three main forms, including the relevant bases of consent, sources of applicable law, typical claims, and available remedies. This part

also highlights connections among the three forms through issues such international public policy, territorial disputes affecting natural resources, and contract claims under investment treaties. Part III (Frictions) turns to cross-cutting problems in arbitral practice and policy debates, including the protection of public interests, force majeure and other changes in circumstances, parallel proceedings, and the enforcement of arbitral awards.

Teaching: There will be 20 hours of teaching content in Winter Term and an additional two hours of teaching in the Summer Term. There will be a Reading Week in Week 6 of Winter Term. The first half of the course will include a mix of lecture material and class discussion, whereas Weeks 7 to 10 will include group presentations in response to problem questions, thus preparing students for practical scenarios and summative assessment.

Formative coursework: One 2,000 word essay.

Indicative reading: Alongside excerpts from arbitral awards (mainly ad hoc, ICC, ICSID or PCA) and domestic judgments (mainly UK Supreme Court but also Paris Court of Appeal and others), students will become familiar with key instruments: eg Arbitration Act 1996 (UK); ICC Arbitration Rules (2021); ICSID Arbitration Rules (2022); ICSID Convention (1965); ILC Articles on State Responsibility (2001); New York Convention (1958); UNCITRAL Arbitration Rules (2021); UNCITRAL Model Law on International Commercial Arbitration (2006); UNIDROIT Principles of International Commercial Contracts (2016); Vienna Convention on the Law of Treaties (1969).

Students will engage with foundational texts and recent literature: eg Crawford, 'Continuity and Discontinuity in International Dispute Settlement' (2010) 1 JIDS 3; Demirkol, 'Peaceful Settlement of Inter-State Energy Disputes: Applicable Law, Defence Arguments, and Remedies in the ICC Arbitration between Iraq and Turkey' (2023) 26 JIEL 786; Douglas, 'The Umbrella Clause Revisited' (2023) 38 ICSID Rev 472; Fietta and Upcher, 'Public International Law, Investment Treaties and Commercial Arbitration: An Emerging System of Complementarity?' (2013) 29 Arb Intl 187; Grisel, 'Treaty-Making between Public Authority and Private Interests: The Genealogy of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards' (2017) 28 EJIL 73; Kaufmann-Kohler, 'Arbitral Precedent: Dream, Necessity or Excuse?' (2007) 23 Arb Intl 357; Lalive, 'Transnational (or Truly International) Public Policy and International Arbitration' in Sanders (ed), *Comparative Arbitration Practice and Public Policy in Arbitration* (1987); Paulsson, 'Arbitration in Three Dimensions' (2011) 60 ICLQ 291; Pathak, 'Jurisdictional Conflicts between Investment Treaty and Commercial Arbitration—The Role of Lis Pendens' (2021) 12 JIDS 367; Viñuales, 'Defence Arguments in Investment Arbitration' (2020) 18 ICSID Rep 9.

Key journals, databases, and reports include *Arbitration International*, *ICSID Reports*, *ICSID Review*, *International & Comparative Law Quarterly*, *Investment Arbitration Reporter*, *Journal of International Arbitration*, *Journal of International Dispute Settlement*, *Jus Mundi*, and *Reports of International Arbitral Awards*.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4CC Half Unit Commercial Remedies

This information is for the 2024/25 session.

Teacher responsible: Professor Charlie Webb

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit. Students should have ideally studied Contract Law at undergraduate level.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The module will examine a range of remedial

issues in a commercial context. The syllabus does not seek to provide an exhaustive account of the law governing commercial remedies but instead picks out a series of questions of both practical and theoretical significance that can arise in commercial disputes. In addressing these questions, we shall not only examine the answers English law has given to these questions but also consider the soundness of those solutions and alternative approaches which have been proposed in the literature. Here is an indicative list of the sorts of issues to be considered on the module:

1. The aims of commercial remedies: What interests and other policies may be served by the law when remedying commercial disputes?
2. The function of contract damages: How do the courts assess damages for breaches of contract? Should the courts do more to protect the claimant's interest in performance?
3. Punishment: Is punishment of a defendant who has committed a breach of duty ever a legitimate aim of commercial remedies? Should punitive damages have a greater role in English law?
4. Agreed remedies: To what extent are commercial parties free to fix the remedies available to them in the event of breach? Does freedom of contract extend to the parties' secondary obligations?
5. Unjust enrichment: What is the law of unjust enrichment? What is its relationship to the law of contract? What can commercial parties recover under the law of unjust enrichment?

Teaching: This course has 20 hours of teaching content in Winter Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: All students are expected to produce one 1,500 word formative essay during the course.

Indicative reading: Burrows, *Remedies for Torts and Breach of Contract* (4th edn OUP 2019)

Virgo and Worthington (eds), *Commercial Remedies: Resolving Controversies* (CUP 2017)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4CE Half Unit Security and Criminal Law

This information is for the 2024/25 session.

Teacher responsible: Professor Peter Ramsay

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students ideally should have undergraduate study of criminal law (or equivalent).

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This is a course in advanced criminal law theory. The central concern of contemporary criminal justice policy is public protection. The course examines the different security interests that are protected by the different categories of criminal offence and the issues at stake in the expansion of the scope of the substantive criminal law. Examples will be drawn mainly from the criminal law of England and Wales, but also from other jurisdictions. An introduction to the structure of the criminal law in the common law world will be included. The theoretical issues are universal.

This course will cover:

- the concept of security;
- the concept of criminal law;
- the presumption of innocence;
- 'true crimes';
- public welfare offences;
- inchoate offences;
- pre-emptive offences;
- fear, harassment and speech offences;

• the right to security.

Each class will consist of a student presentation on a key question, class discussion and a teacher presentation.

Teaching: This course has 20 hours of teaching content in Autumn Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A Ashworth and L Zedner Preventive Justice (OUP 2014); I Dennis and GR Sullivan (eds), Seeking Security: Pre-empting the Commission of Criminal Harms (Hart, 2012); A Brudner, Punishment and Freedom (OUP, 2009); RA Duff, Answering for Crime (Hart, 2007); P Ramsay The Insecurity State: Vulnerable Autonomy and the Right to Security In the Criminal Law (OUP, 2012); A Ashworth (et al), Prevention and the Limits of Criminal Law (OUP, 2013).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4CF Half Unit UK Corporate Law

This information is for the 2024/25 session.

Teacher responsible: Dr Elizabeth Howell and Dr Suren Gomtsian

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: 1. The conception of the UK company - the nature and evolution of the company; the sole-trader and partnership organisational forms will be contrasted with the corporate/entity conception. 2. Legal personality, formation and structure – considering the implications and function of separate legal personality and the scope to disregard the corporate veil. 3. The distribution of power in a UK company – considering the location and contractual distribution of power in a UK corporation; the problem of separation of ownership and control/the agency problem; mandatory versus default rules; core mandatory rights: removal of directors and calling shareholder meetings. 4. Director's duties I: the nature of duties; who owes them; to whom; the loyalty dimension. 5. Directors Duties II: the duty to act within powers; the duty to promote the success of the company and the particular question of creditors; the duty to exercise independent judgement; the duty of care. 6. Directors Duties III: the conflict rules (self-dealing transactions, corporate opportunities, competing with the company, bribes and commissions). 7. Protecting shareholder rights and derivative actions: personal actions and reflective loss; the derivative action mechanism. 8. Minority shareholder protections I – common law restraints on the exercise of majority shareholder power and influence; statutory constraints on the exercise of such power and influence - section 994 Companies Act 2006. 9. Minority shareholder protections II – remedies under s994 Companies Act 2006 for unfairly prejudicial conduct. 10. Just and equitable winding up under section 122(1)(g) Insolvency Act 1986; arbitration.

Teaching: Teaching will be delivered through lectures and classes in Autumn Term (two hours of teaching content each week). This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: A mock examination will be held at a time to be advised during Autumn Term.

Indicative reading: B Hannigan, Company Law (6th ed OUP 2021); or P Davies and Sarah Worthington, Gower: Principles of Modern Company Law (11th ed 2021 Sweet & Maxwell)

For detailed reading lists please see the course Moodle page.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4CG Half Unit Tax Policy and Design

This information is for the 2024/25 session.

Teacher responsible: Dr Andy Summers CKK 6.04

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Inequalities and Social Science and University of Pennsylvania Law School LLM Visiting Students.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is suitable for students from any social science background, including but not only Law. No previous study of taxation is required. Some prior familiarity with tax concepts is advantageous but not essential.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Pre-requisites: This course is suitable for students from any social science background, including but not only Law. No previous study of taxation is required. Some prior familiarity with tax concepts is advantageous but not essential.

Course content: This course provides an introduction to tax policy using a variety of disciplinary perspectives including economics, philosophy, and political science, as well as law. It addresses questions such as: What is a 'fair' tax? What makes a tax efficient or inefficient? How do people respond to taxes? What can be done to improve tax compliance? What are the political influences on the tax policymaking process?

The aim of the course is to develop a 'toolkit' for thinking about taxes that enables students to critically assess existing tax policies and develop proposals for reform. We will use a range of examples from across the tax system including taxes on individuals and companies. Most examples will be drawn from the UK context but the principles are of wide application to other developed tax systems.

The seminar topics are: (1) Introduction; (2) Tax and fairness; (3) Tax and property rights; (4) Key economic concepts; (5) Economic impacts; (6) Tax planning; (7) Designing the tax base; (8) Setting tax rates; (9) Tax compliance; (10) Tax and the political process.

Teaching: This course will have two hours of teaching content each week in Winter Term, either in the form of a two hour seminar or an online lecture and one hour class. There will be a Reading Week in Week 6.

Formative coursework: Students will receive formative feedback on one 1500-word essay or equivalent essay plan.

Indicative reading: Devereux, M. et al (2021), Taxing Profit in a Global Economy. Oxford University Press.

Kay, J., & King, M. (1990), The British tax system. Oxford University Press.

Slemrod, J., (2013), Buenas notches: lines and notches in tax system design

Stanford Encyclopaedia of Philosophy, Distributive Justice

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4CL Half Unit**Explaining Punishment: Philosophy, Political Economy, Sociology****This information is for the 2024/25 session.****Teacher responsible:** Professor Peter Ramsay**Availability:** This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.**Course content:** The course aims to provide students with a comprehensive overview of the theories that purport to explain and/or justify the practice of punishment, a practice that is central to the criminal law. It will do this by introducing students to philosophical, sociological, political economy and comparative approaches to punishment. It will involve the discussion of all the major philosophical justifications and critiques of state punishment, and sociological and political economy explanations and critiques of punishment.

After an introduction discussing the different approaches to punishment, three seminars will discuss the classical philosophical justifications of punishment and a fourth the contemporary critiques of those classical approaches. Seminars 5 and 6 will discuss punishment from the perspective of sociology and political economy. Seminar 7 will consider comparative approaches to punishment. Seminars 8 and 9 will look at two key aspects of the sociology of punishment, punishment as a cultural phenomenon and punishment as an exercise of power and authority. The final seminar considers the relation between these different perspectives using a case study (which varies from year to year).

Teaching: This course will have two hours of teaching content each week in Autumn Term, either in the form of a two hour seminar or a lecture and one hour class. There will be a Reading Week in Week 6 of Autumn Term.**Formative coursework:** Students will be expected to produce one essay in Autumn Term and give one brief presentation in class during the term.**Indicative reading:**

- A von Hirsch, A Ashworth and J Roberts, *Principled Sentencing: Readings on Theory and Policy* (Hart, 2009)
- B Hudson, *Understanding Justice* (Open University Press 2003)
- N Lacey, *The Prisoners' Dilemma: Political Economy and Punishment in Contemporary Democracies*, (Cambridge University Press 2008)
- J Simon and R Sparks (eds), *The Sage Handbook of Punishment and Society* (Sage 2013)
- D Garland, *Punishment and Modern Society: A Study in Social Theory* (Oxford University Press 1990)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.**LL4CO Half Unit****Taxation of Wealth****This information is for the 2024/25 session.****Teacher responsible:** Dr Andy Summers - CKK 6.04**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Inequalities and Social Science and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. Students are strongly recommended to take LL4CG Tax Policy and Design together with (or prior to) this course. Alternatively, students must demonstrate that they have some familiarity with key principles of tax design via previous academic or professional experience. The course is suitable for students from any social science background and non-Law students are also welcome.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSE for You.

Pre-requisites: This course is suitable for students from any social science background, including but not only Law. No previous study of taxation is required. Some prior familiarity with tax concepts is advantageous but not essential. Students are recommended (but not required) to study LL4CG Tax Policy and Design alongside this course.**Course content:** The course examines the taxation of wealth (and the wealthy) and evaluates options for reform. It addresses questions such as: Should inheritance tax be paid on lifetime gifts? Should capital gains be taxed at lower rates than regular income? What are the arguments for and against an annual wealth tax? How does the UK's 'non-dom' tax regime work and how should it be reformed? What is the extent of offshore evasion and what steps can be taken to improve compliance?

We will draw on the latest research from multiple disciplines including economics, philosophy and political science, as well as law. The primary focus is on the UK context, although comparisons will also be made with other jurisdictions and students are encouraged to think about implications in their home jurisdiction. For each topic, students will learn (in outline) how existing UK taxes on wealth operate and then consider how they could be reformed.

The seminar topics are: (1) Introduction; (2) Inheritance tax; (3) Taxes on lifetime gifts; (4) Taxes on investment income; (5) Capital Gains Tax; (6) Taxes on property; (7) Net wealth taxes; (8) International dimensions; (9) Trusts; (10) Offshore evasion.

Teaching: This course will have two hours of teaching content each week in Winter Term, either in the form of a two hour seminar or an online lecture and one hour class. There will be a Reading Week in Week 6.**Formative coursework:** Students will receive formative feedback on one 1500-word essay or equivalent essay plan, based on past or sample summative essay titles.**Indicative reading:** Advani, A., and Summers, A. (2023), 'How Much Tax Do the Rich Really Pay? Evidence from the UK', *Oxford Review of Economic Policy*Advani, A., Chamberlain, E., and Summers, A. (2021), 'Ways of Taxing Wealth: Alternatives and Interactions', *Fiscal Studies*, 42, 485–507**Assessment:** Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.**LL4CP Half Unit****Tax Avoidance****This information is for the 2024/25 session.****Teacher responsible:** Dr Alexandra Evans**Availability:** This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of

Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you are not able to get a place on this course.

Course content: This course will provide a comprehensive overview of the phenomenon of tax avoidance and of the attempts by states to combat it: both unilaterally and multilaterally. Whilst using examples predominantly from the UK, Australia and USA, the issues addressed by the course are general across many jurisdictions and so will be applicable to those with interests beyond the UK, Australia and USA.

The course will be multi-disciplinary, in that the course will draw on accessible social-science literature.

Taxpayers have always sought to minimise their tax burden. However recent decades have witnessed a sharp rise in popular and governmental concern with tax shelters and other tax avoidance. Traditional strategies of tax avoidance have included postponement of taxes and tax arbitrage, in addition to attempting to exploit 'loopholes' through a formalist interpretation of legislation. In recent years the proliferation of complex financial instruments has increased the opportunities for such avoidance. Additionally, globalisation and the development of the digital economy have facilitated tax avoidance strategies of base erosion and profit shifting (BEPS). This rise in opportunities for tax avoidance has been accompanied by an increased public concern that individuals and companies pay their 'fair share' of taxation: which states have responded to both through unilateral and multilateral actions (including the OECD's project on BEPS and the EU's Anti Tax Avoidance Package).

Particular topics covered will include (i) defining avoidance; (ii) strategies of tax avoidance; (iii) statutory interpretation and judicial approaches to tax avoidance especially with reference to the UK and USA; (iv) General Anti-Abuse and Anti-Avoidance Rules and Specific and Targeted Anti-Avoidance Rules; (v) reporting rules and other policies to deter avoidance; (vi) BEPS and the EU; and (vii) corporate social responsibility, professional ethics and public attitudes with regard tax avoidance.

Teaching: This course will have two hours of teaching content each week in Winter Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: An open book mock exam (no mark awarded, duration: 1 hour, reading time: 7.5 minutes) will be offered to students in Week 7 of Winter Term. The mock exam will be similar in style and content to the final exam to provide an opportunity to practice and receive feedback ahead of the final exam. Undertaking the mock exam is not mandatory, but strongly recommended.

LL4CQ Half Unit

Legal Aspects of Private Equity and Venture Capital

This information is for the 2024/25 session.

Teacher responsible: Dr Simon Witney

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students should note that private equity is a specialist asset class, and the basics of debt and equity are not covered in LL4CQ. The course is, therefore, recommended for students who are taking other, relevant corporate law and financial law courses, or who have relevant experience.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course will equip students with a detailed understanding of the legal structures and issues arising in international private equity and venture capital. It is founded on academic analysis of pertinent theoretical and legal issues complemented by insights from relevant practitioners.

The course will cover: private equity and venture capital fund structures, terms and regulation; venture capital and buyout structures and terms; corporate governance in private equity-backed companies; and LBO financing terms.

The course has a UK focus but will include relevant aspects of European Union law with comparative global perspectives.

Teaching: This course is delivered through a combination of classes and lectures in Winter Term. This course includes a Reading Week in Week 6 of Winter Term.

Formative coursework: A formative essay will be due in Week 7 and detailed feedback will be provided shortly after. The essay will have a word limit of 1,500 and will provide invaluable preparation for the summative assessment.

Indicative reading: A full Reading List will be distributed during the course. For introductory purposes, students are referred to:

Gilligan, J. and Wright, M., Private equity demystified: An explanatory guide (2020, 4th edition, Oxford University Press),
Gullifer, L. and Payne J., Corporate Finance Law: Principles and Policy (2020, 3rd edition, Hart Publishing), Chapter 16 (Private Equity),

Hale, C. (ed), Private Equity: A Transactional Analysis (2020, 4th edition, Globe Law and Business),

Witney, S., Corporate Governance and Responsible Investment in Private Equity (2020, Cambridge University Press)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4CS Half Unit Not available in 2024/25 Law and Economics of Network Industries

This information is for the 2024/25 session.

Teacher responsible: Professor Pablo Ibáñez Colomo

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The course provides an overview of the regulation of network industries. It encompasses not only sector-specific regimes but also the ways in which competition law contributes to shaping those industries.

Instead of focusing on a particular system, it revolves around the main underlying issues. The EU-UK system provides the basis for class discussions. Examples from the US will be used where relevant.

The module is divided into three parts: one that discusses generalities about the law and economics of network industries; a second that focuses on the sector-specific regimes applying to three sectors (telecommunications, energy and transport); and a third that covers the application of competition law and examines how this area of the law is transformed and adapted when it engages with sectoral regulation.

Part I: Generalities

Session 1: The Economics of Network Industries.

This session addresses the features of network industries, in particular the concepts of natural monopoly, network effects and two-sided markets. It discusses the implications of the tendency of these industries towards monopoly.

Session 2: Regulatory approaches to network industries

The second session discusses the various regulatory techniques that have been used to deal with network industries. These techniques are also put in perspective: it covers the days of exclusive rights, the liberalisation efforts in the 1980s and 1990s (in the US, the EU and beyond) as well as the modern regimes. It covers both the substantive and institutional challenges that come with the regulation of these activities.

Part II: Specific issues

Session 3: Telecommunications and electronic communications (I)

This session provides an overview of the regulation of telecommunications (or electronic communications in the EU system). After a brief overview of the basic technology-related concepts (access, interconnection) and of the evolution of regulation, it will cover the EU Regulatory Framework for electronic communications.

Session 4: Telecommunications and electronic communications (II)

This session covers some specific issues at length, in particular access to the incumbent network by new entrants and the interaction of telecommunications operators with Big Tech.

Session 5: Energy (I)

The first session covers the basic concepts (TSO, DSO) as well as the regulatory models that have been put in place in the EU and the US.

Session 6: Energy (II)

The second session would deal in detail with some contemporary challenges, namely the decarbonisation of the economy and energy prices.

Session 7: Transport

The regulation of railways gives rise to major challenges and has been controversial, in the UK and beyond. This session covers the UK model and the various liberalisation steps taken in the EU.

Part III: Competition law and network industries

Session 8: The relationship between competition law and regulation

Competition law overlaps to some extent with regulation. The question is whether the former takes precedence, or vice versa. This session covers the EU and US responses.

Session 9: Competition law and network industries (I)

Competition law is transformed when it applies to network industries. This session explores the reasons for this transformation with some concrete examples.

Session 10: Competition law and network industries (II)

See above. It builds and expands on the preceding session.

Teaching: This course will have two hours of teaching content each week in Autumn Term and may include visits from experts based at regulatory authorities in the UK and the EU. Students will usually have two additional hours in the Spring Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

- Pierre Larouche, *Competition and Regulation in European Telecommunications* (Hart Publishing 2000)
- Christopher Jones (ed), *EU Energy Law, Volume I - The Internal Market* (Claeys & Casteels 2020)

Assessment: Essay (100%, 8000 words) in the ST.

Students will be free to choose a topic concerning the regulation of network industries, whether or not covered in class (for instance, postal services, or broadcasting). The essay can relate both to sector-specific regulation and to the application of competition law to network industries.

LL4E6 Half Unit International Dispute Resolution: Courts and Tribunals

This information is for the 2024/25 session.

Teacher responsible: Dr Devika Hovell CKK 7.06

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Some prior knowledge of international law is useful but not essential.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Pre-requisites: Some prior knowledge of international law is useful but not essential.

Course content: At both international and domestic levels,

international disputes are increasingly becoming the subject of judicial determination. In this course, we examine key courts and tribunals operating on the world stage, including the International Court of Justice, the International Criminal Court, the European Court of Human Rights, investment treaty arbitration and the WTO Dispute Settlement Body. The course provides the opportunity to consider the theory, politics and practical difficulties of international dispute resolution in these courts and tribunals. The course begins with a focus on the International Court of Justice, which is currently experiencing a surge in activity. We will examine the history, structure and jurisdiction of the Court before turning to questions arising with provisional measures, contentious cases and advisory opinions. The second half of the course examines a variety of other international courts and tribunals, such as the International Criminal Court, the European Court of Human Rights the WTO Dispute Settlement Body and investment treaty arbitration. There will be an opportunity to hear from guest speakers working in these different practice areas.

Teaching: 20 hours of lectures in the Autumn term. 2 hours of lectures in the Spring term.

There will be a reading week in Week 6 of Autumn term.

Formative coursework: 1500 word formative essay.

Indicative reading: Reading lists will be provided for each week's seminar on Moodle.

Indicative reading includes Karen Alter, *The New Terrain of International Law: Courts, Politics, Rights* (2014 Princeton); Gleider Hernández, *The International Court of Justice and the Judicial Function* (2014 OUP); Yuval Shany, 'No Longer a Weak Department of Power? Reflections on the Emergence of a New International Judiciary' (2009) 20(1) *European Journal of International Law* 73; Frederic Megret and Marika Giles Samson, 'Holding the Line on Complementarity in Libya: the Case for Tolerating Flawed Domestic Trials' (2013) 11 *Journal of International Criminal Justice* 571.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4E7 Half Unit

International Investment Law and Arbitration

This information is for the 2024/25 session.

Teacher responsible: Dr. Mona Paulsen

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students with no previous background in public international law may find it helpful to consider consulting a standard textbook such as M. Evans (ed.), *International Law* (OUP, 5th ed., 2018) or J. Crawford, *Brownlie's Principles of Public International Law* (OUP, 9th ed., 2019).

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: Students will examine the legal architecture that promotes, protects, and screens foreign investment flows. Accordingly, they will study international investment law (including the interface between treaties, domestic legislation, and contracts) to assess its capacity to promote and protect select foreign investments, shape public policy, support economic development, and influence international law generally.

The course focuses on the role of investment treaties in finance flows. It begins by highlighting the historical, political, and economic forces that drove governments to adopt investment treaties that combined standards of sovereign conduct with a standing offer for private individuals to access arbitration. Students will evaluate the core features of international investment law, relevant provisions in trade and investment agreements, and the various actors that influence finance flows. The course balances

doctrinal studies with an exploration of how the investment treaty system works in practice, with scrutiny of investment disputes. Within the course, we will examine market access and investment facilitation issues, including new legal instruments to address barriers to foreign entry and the success of FDI in foreign markets. We will discuss how far international investment law constrains the regulatory autonomy of states, particularly owing to commitments to accord 'fair and equitable treatment' to investors or with obligations to provide compensation for the indirect expropriation of an investment. Yet, we will complicate this issue further by studying how governments seek to defend policy judgments and challenge investor claimants. Finally, we will discuss the legal principles that govern compensation and the recognition and enforcement of investment treaty awards. The course will enable all students to draw connections with global commerce and cross-border investment to other contemporary legal topics, including the environment, trade, human rights, and global value chains.

Teaching: This course is delivered through weekly two-hour seminars totalling a minimum of 20 hours in the Autumn Term. Students will have two additional hours in the Spring Term. This course includes a Reading Week in Week 6 of Autumn Term.

Formative coursework: One 2,000 word formative essay during the course.

Indicative reading: Reading lists will be provided for each seminar on Moodle. Essential readings combine primary and secondary sources to help students navigate the topics. Additionally, the course offers political economy and history readings to supplement select topics. Where possible, readings will include relevant videos and podcasts to enhance student learning.

Indicative textbooks include C.L. Lim, et al., *International Investment Law and Arbitration* (2021); J. Bonnitcha et al., *The Political Economy of the Investment Treaty Regime* (2017); M. Sornarajah, *The International Law on Foreign Investment* (2021); C. McLachlan, et al., *International Investment Arbitration: Substantive Principles* (2017).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4EA Half Unit

Race, Class, and Law

This information is for the 2024/25 session.

Teacher responsible: Dr Roxana Willis

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and we cannot guarantee all students will get a place.

Course content: Have you ever wondered why we study law in the way we do? Have you ever questioned why the 'logic' of the law operates as it does? Have you noticed that certain issues, ideas, or voices are absent? And have you ever dreamt of using your legal education to effect change? In *Race, Class, and Law* we develop our critical, reflective, collaborative, and creative capacities to interrogate what the law does and to re-imagine what it can or should do. Borrowing from Andre Lord's influential metaphor, rather than attempting to use the master's tools to dismantle the master's house – rather than trying to change the law by staying within the bounds of the procedures we've inherited – in *Race, Class, and Law*, we traverse a range of disciplines in search of new tools and ways to use them. Taking the English legal system as its point of departure, the course centres several inquiries: an examination of the legal system as experienced 'from below', a historical understanding on the making and workings of 'modern law', and a critical analysis of law beyond the confines of the nation state. By the end of the course, you will have acquired a fresh perspective on the law as seen from a diversity of perspectives,

developed new skills to critique current laws, and engaged in innovative thinking about the future of law and potential for change. The course is delivered through ten interactive weekly seminars. The first part of the course involves expanding our critical toolkit by re-examining foundational concepts that underpin the law, such as 'neutrality', 'objectivity', and 'rationality', allowing for creativity and feeling to inform our work. During our search for alternative ways to study law, we critically engage with decolonial debates, exploring how these ideas apply to law and reflecting on whether they should. Relatedly, we delve into abolitionist debates and the potential for transformative justice to improve law and society. Substantive topics include revisiting the 'reasonable man' in law and assessing the significance of gender, class, and race in his formation. We also explore the impact of trans-Atlantic slavery on the creation of the modern law and how its afterlives persist. Over the remaining weeks, we use our newly acquired tools in overlapping fields of law, such as crime and criminal justice, welfare and housing, labour law and immigration, conflict and violence, and climate justice and the Anthropocene. Instead of accepting the law is as it is, in *Race, Class, and Law* you are invited to evoke your radical imagination and envision how the law could be transformed in ways still to be discovered.

Teaching: 20 hours of seminars in the WT.

Formative coursework: Students answer and submit a mock exam question (maximum 2,000 words).

Indicative reading:

- Bhambra, G. (2007). *Rethinking modernity: Postcolonialism and the sociological imagination*. Berlin: Springer.
- Adébişi, Folúke (2023) *Decolonisation and Legal Knowledge: Reflections on Power and Possibility*, Bristol University Press

- The (LSE) Decoloniality Reading Circle: A Suggested Reading List: https://drive.google.com/file/d/1uvoPddD3eFYySOu_GkyTqj1z5iPvvJAr/view

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4EB Half Unit

Key Issues in Medical Law and Ethics

This information is for the 2024/25 session.

Teacher responsible: Dr Cressida Auckland

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and we cannot

guarantee all students will get a place.

Course content: Medical law is a rapidly developing subject, as new technologies and treatments offer new possibilities for creating, extending, and enhancing life. Each week, we will interrogate a different key issue in medical law and ethics, considering issues such as how we ought to regulate innovations such as genome editing and artificial wombs; what the implications may be of increasing reliance on artificial intelligence in healthcare settings; how new treatments reinvigorate old debates around end-of-life decision-making or abortion; and how existing health inequalities have been highlighted, and exacerbated, in the wake of the Covid-19 pandemic. While the topics will be guided by current controversies, subjects for 2024-5 may include: autonomy and mental capacity; incapacity in adults; medical decision-making in the context of minors; claims for wrongful conception, life and birth; abortion; preimplantation genetic testing; assisted dying; health inequalities; patient choice and rights; and the role of artificial intelligence in healthcare.

Teaching: 20 hours of seminars in the AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

One 2,000 word essay

Indicative reading: A full reading list will be distributed during the course. Some examples of texts covered on the course include:

- F. Freyenhagen and T O'Shea, 'Hidden Substance: mental disorder as a challenge to normatively neutral accounts of autonomy' (2013) 9(1) *International Journal of Law in Context* 53-70
- E. Jackson, 'From "doctor knows best" to dignity: Placing adults who lack capacity at the centre of decisions about their medical treatment' (2018) *Modern Law Review* 81(2), 247-281
- A. Buchanan, 'Advance Directives and the Personal Identity Problem' (1988) 17(4) *Philosophy and Public Affairs* 277
- C. Auckland and I. Gool. 'Parental rights, best interests and significant harms: who should have the final say over a child's medical care?.' *The Cambridge Law Journal* (2019): 1-37.
- U. Schuklenk & S. Van de Vathorst, 'Treatment-resistant major depressive disorder and assisted dying' (2015) 41 *Journal of Medical Ethics* 577-583.
- S. McGuinness, 'Law, Reproduction, and Disability: Fatally 'Handicapped'? (2013) *Medical Law Review* 21(2) 213–242.
- J. Savulescu, 'Procreative Beneficence: Why We Should Select the Best Children' (2001) 15 *Bioethics* 413
- M. Marmot et al, *Health Equity in England: The Marmot Review 10 Years On* (The Health Foundation, 2020).

Those who have not studied medical law might find it helpful to read E. Jackson, *Medical Law: Text, Cases and Materials*, 6th edition (Oxford UP, 2022) as an introductory text.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4F2 Half Unit Not available in 2024/25

The Law and Practice of International Finance

This information is for the 2024/25 session.

Teacher responsible: Professor Jo Braithwaite

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: LL4F2 examines legal issues which arise in the international financial markets based in London. This course looks at the legal aspects of financial contracts, transactions and structures which are widely used in the financial markets, such with a focus on as 'over the counter' (OTC) derivatives and debt finance, in particular, syndicated loans. We make close reference to key terms in widely-used financial contracts and to certain sets

of trade association drafted terms throughout the course, subject to obtaining the necessary licences from the trade associations in question. With an emphasis on private law, the course considers the relevant legal, commercial and regulatory background, and the risks and protections available to participants in the global financial markets. For example, we look in detail at contractual credit risk mitigation and default management processes including close-out, and we consider in-depth various types of disputes that arise from financial contracts, in particular, in periods of widespread market stress. The course is based upon an analysis of the relevant issues under English law with some reference to other legal systems for comparative purposes.

The course will be underpinned by in-depth discussion of the legal principles involved in international finance, but the case studies referenced will be topical. In this sense, the content of the course will be adapted to the fast-moving developments affecting international markets in capital and in risk (for example, in recent sessions the course has examined mis-selling litigation in the international derivatives markets, the ongoing regulatory reform of the OTC derivatives markets, CCP clearing, the debate about recovery and resolution of CCPs and CCP location policy, and the worldwide project of benchmark transition away from LIBOR to so-called 'risk-free rates').

Teaching: Two hours of teaching content each week in Winter Term and a two hour revision class in the Spring Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: Students will be asked to submit one essay, which may be completed in exam conditions. The course also involves individual and group presentations and other classwork.

Indicative reading: Examples of texts which will be referenced on the course: J. Braithwaite, *The Financial Courts: Adjudicating Disputes in Derivatives Markets* (CUP, 2020); and L Gullifer and J Payne, *Corporate Finance Law: Principles and Policy* (Hart, 3rd edition, 2020). A full reading list will be distributed via Moodle.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

LL4F3 Half Unit

Mergers, Acquisitions and Restructurings in Europe

This information is for the 2024/25 session.

Teacher responsible: Dr Suren Gomtsian

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: In this course, we will explore the corporate law aspects of company mergers, acquisitions and restructurings in Europe. The course will examine the available legal techniques for the combination and restructuring of business operations in Europe, with a particular focus on cross-border transactions. Areas covered will include corporate mobility in Europe, an introduction to transaction structures, domestic and cross-border mergers, demergers, spin-offs, and public takeovers. Particular attention will be paid to the interaction between the relevant legal concepts and the economic and financial environment firms operate in.

Content overview

- The market for corporate control, corporate ownership structures and transaction structures for public and private acquisitions, and corporate restructurings in Europe
- European takeover regulation
- Domestic mergers
- Divisions & spin-offs
- Cross-border mergers in Europe

- Employee participation and its relevance for corporate transactions

Teaching: This course will have two hours of teaching content each week in Winter Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: One 1,500 word essay due in Week 7 of Winter Term.

Indicative reading: A full reading list will be made available via Moodle at the beginning of the course. Sample readings: R. Romano, *A Guide to Takeovers: Theory, Evidence and Regulation* (1992) 9 *Yale Journal of Regulation* 119; RD Kershaw, *Principles of Takeover Regulation* (OUP 2016); RD Kershaw, *Company Law in Context* (2012), Web Chapter A [available here: http://global.oup.com/uk/orc/law/company/kershaw2e/resources/chapters/Web_Chapter_A.pdf]; S Grundmann, *European Company Law* (Intersentia, 2nd ed. 2011); PL Davies et al, *The Takeover Directive as a Protectionist Tool?* [available here: <http://ssrn.com/paper=1554616>]; C Clerk et al, *A Legal and Economic Assessment of European Takeover Regulation*; E-P Schuster, *The Mandatory Bid Rule: Efficient, After All?* (2013) 76 *Modern Law Review* 529; KJ Hopt and E Wymeersch (eds), *European Takeovers: Law and Practice*.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4F4 Half Unit Not available in 2024/25

Takeover Regulation in the UK and the US

This information is for the 2024/25 session.

Teacher responsible: Prof. David Kershaw

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 90 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This course will look at the regulation of the market for corporate control in the United Kingdom and the United States. The course focuses in particular on the regulation of the bid process and takeover defence regulation in the UK and the US. For a full topic and reading list, see the Moodle web site.

Teaching: 20 hours of seminars in the AT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6 of MT.

Formative coursework: 1,500 word essay.

Indicative reading: A full reading list will be made available via Moodle at the beginning of the course. Background material can be found in D. Kershaw, *Principles of Takeover Regulation* (OUP, 2016), R. Kraakman et al, *The Anatomy of Corporate Law* (2004).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

LL4F9 Half Unit

Legal Research and Writing Skills

This information is for the 2024/25 session.

Teacher responsible: Dr Devika Hovell

Availability: This course is compulsory on the LLM (extended part-time) and LLM (full-time). This course is not available as an outside option.

Course content: This course on Legal Research and Writing has a taught component focusing on research and writing skills and a stand-alone dissertation (details about which may be found in the LLM Handbook), to be written in a substantive law area of the student's choice.

The taught part of the course is designed to enable students to

gain a better understanding of:

- the nature of research in general and of legal research in particular, and the range of questions and research methodologies to be found within legal scholarship;
- the processes involved in legal research, including research design, refining a research question, resource identification, and searching for relevant materials;
- legal writing skills, including issues of style, process, the use of sources and the presentation of findings and arguments.

Teaching: This course is typically delivered through a combination of classes and lectures throughout Winter Term. Students will usually have additional hours in the Spring Term.

Assessment: Dissertation (100%, 10000 words) in the post-spring term.

See the LLM handbook for full details and regulations about the dissertation.

LL4G8 Half Unit Law of Corporate Finance

This information is for the 2024/25 session.

Teacher responsible: Eva Micheler

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The course examines the private law rules governing how companies raise finance. The issues covered include e.g. capital structures, an introduction to basic finance concepts relevant to understanding the legal rules covered, the rules on raising equity capital, initial legal capital and alternatives, dividends, reduction of capital and share buy-backs, property rights in shares, the settlement and holding of securities including through distributed ledger (blockchain) technology.

Teaching: This course will have 20 hours of teaching content in Autumn Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: Students will have the opportunity to write a formative essay. All students are strongly encouraged to write at least one essay.

Indicative reading: Gower, *Principles of Modern Company Law*, 11th edn, 2021; Eilis Ferran and Look Chan Ho, *Principles of Corporate Finance Law*, 2014, Eva Micheler, *Interests in Securities*, 2007.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4H2 Half Unit Freedom of Speech, Media and the Law

This information is for the 2024/25 session.

Teacher responsible: Dr Andrew Scott

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Media and Communications (Media and Communications Governance) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The course examines freedom of speech and the legal and administrative regulation of mass media publication

that bears upon it (principally the press, the broadcast media, and institutionalised Internet publication). The course also considers content-related dimensions of social media regulation. The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media publication practise, theories of free speech and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law).

The course then examines potential restrictions on speech and publication that are aimed at promoting or preserving specific private and/or public interests. The key private interests considered are those in reputation (defamation), privacy, data protection, intellectual property, and confidentiality. The key public interests considered are the integrity of the judicial process (contempt and reporting restrictions), the impartiality and diversity of political representations, the deterrence of disinformation, fabrication and 'fake news', the avoidance of offence (based on obscenity, social difference and religion), and national security.

Teaching: This course will have 20 hours of teaching content in Autumn Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: Students must submit a formative essay at the end of the Autumn term.

Indicative reading: Supporting texts for the course include Greenawalt, 'Free Speech Justifications' (1989) 89 *Columbia Law Review* 119; Parkes and Busutill (eds), *Gatley on Libel and Slander* 13th edn, Thomson Reuters, 2022; Waldron, *The Harm in Hate Speech* (Harvard University Press, 2012); Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (OUP, 2016), Kenyon and Scott (eds), *Positive Free Speech: Rationales, Methods and Implications* (Hart Publishing, 2020), and Barendt et al, *Media Law: Texts, Cases and Materials* (Pearson, 2013). Most materials relevant to the course are made available via the BLPES electronic resources or online.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4H3 Half Unit Media Law: Regulating Newsgathering

This information is for the 2024/25 session.

Teacher responsible: Dr Andrew Scott

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Media and Communications (Media and Communications Governance) and University of Pennsylvania Law School LLM Visiting Students. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course focuses on the legal and normative frameworks regarding the obtaining of information by journalists and others. It examines in particular the legal and administrative regulation of newsgathering and content production practices undertaken by professionals working in the media sector, but extends to citizen-journalism, academia, and the activities of others across society. The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media newsgathering practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines a number of news- and information-gathering practices that are either facilitated or proscribed by law and/or other forms of regulation. These include the protection of sources and journalistic materials; the technological circumvention of source protections;

legal risks to sources and whistleblowers; 'cheque-book journalism' (including payments to witnesses and to criminals); access to information held by the state (freedom of information); access to courts, court documents and other criminal justice contexts (prisons); the safety of journalists and newsgatherers; reporting from conflict-zones; media-police interaction; harassment and media intrusion, and the regulation of surreptitious newsgathering practices (hacking, tapping and subterfuge).

Teaching: This course will have 20 hours of teaching content in Winter Term. There is a Reading Week in Week 6 of Winter Term.

Formative coursework: Students must submit a formative essay at the end of the Winter term.

Indicative reading: Supporting texts for the course include Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (Oxford University Press, 2016); Levine et al, *Newsgathering and the Law* (Mathew Bender, 2018); Leveson, *An Inquiry Into the Culture, Practices and Ethics of the Press: Report*, HC 780, 2012, Warby, Moreham and Christie (eds), *Tugendhat and Christie: The Law of Privacy and the Media*, (3rd ed, OUP, 2015), Flat Earth News (Chatto & Windus, 2008); de Burgh, *Investigative Journalism* (Routledge, 2nd ed, 2008). Many of these and other materials relevant to the course are made available via the BLPES electronic resources or online.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4H4 Half Unit International Financial Law

This information is for the 2024/25 session.

Teacher responsible: Dr Philipp Paech

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The law of the traditional financial market sectors of insurance, commercial banking, derivatives, capital markets and asset management are converging in practice, but their academic analysis is still largely sector-based. The main goal of this course is to offer a cross-sectoral, functional understanding of the commercial, property and insolvency law of finance, permitting students to grasp the big picture and apply acquired understanding to very diverse legal constellations in finance. The course also highlights certain anomalies in differing legal treatment of the respective sectors or certain types of transactions that induce regulatory arbitrage. Further, students will acquire the ability to identify and put into context key trends in finance.

The course provides an overview of the substantive law aspects (UK, EU and international) of international financial and business transactions. The focus is mainly on broad principles and policy issues rather than a detailed examination of statute, case law and drafting. However, where appropriate, legal concepts and market practice will be explained by reference to case law and other legal sources. The course is designed to be as topical as possible, and the content may change in the light of developments. While the precise topics covered will vary from year to year they typically will include the following:

- Introduction:

- Logic and players of the financial market

- Overview of types of financial transactions

- Reasoning and sources of financial law and regulation

- The different types of risk and the role of financial law

- European and global legal and regulatory architecture

- Raising capital:

- Taking risk through funded positions

- The nature of banks, deposit taking, loans, syndicated loans

- Issuance of debt securities, eurobonds and equity

- Investment funds

- Cross-comparison of funded positions, common patterns and differences

- Mitigating risk:

- Simple financial positions (guarantee, insurance, derivatives and credit default swaps)

- Close out netting, clearing

- Financial collateral

- Insolvency policy:

- Preferential treatment of financial firms

- Cross-jurisdictional analysis:

- Private international law analysis in financial law

- International bank insolvencies

- Specific constellations:

- Intermediated securities and cross-border collateral

- Securitisation

- Crypto assets, blockchain and other FinTech-related issues

Teaching: This course will have two hours of teaching content each week in Autumn Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: Students will be asked to submit a 2,000 word essay during Autumn Term. A voluntary mock exam is also offered.

Indicative reading: A detailed reading list will be made available on Moodle prior to teaching.

Recommended general reading: (a) Joanna Benjamin, *Financial Law*, Oxford University Press, 2007; (b) Colin Bamford, *Principles of International Financial Law*, Oxford University Press, 2011; (c) Philip Wood, *Law and Practice of International Finance* (University Edition) 2007, Sweet&Maxwell; (d) S. Valdez, Ph. Molyneux, *An Introduction to Global Financial Markets*, 6th ed., Palgrave-McMillan, 2010 (this last one is not a legal work but ideal for understanding market practice).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4H8 Half Unit Employment Law

This information is for the 2024/25 session.

Teacher responsible: Dr Astrid Sanders

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Inequalities and Social Science and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: Regulation of the content and the form of the employment relation. The contract of employment, including express and implied terms and the scope of employment law. Regulation of minimum wage and working time. Protection against discrimination in the workplace. Discipline and protection from dismissal and termination of employment. Business reorganisation and economic dismissals. Freedom of association and the right to strike. The approach involves theoretical perspectives, economic analysis, comparative law of employment, and examination of relevant European law.

Teaching: This course will have two hours of teaching content each week in Winter Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Detailed syllabus of weekly readings will be

available and the materials can all be accessed through Moodle. Hugh Collins, *Employment Law*, 2nd edn (Oxford University Press, 2010), Chapters 1-9.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4H9 Half Unit

Human Rights in the Workplace

This information is for the 2024/25 session.

Teacher responsible: Dr Astrid Sanders

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The sources and application of human rights in the workplace, including international and European laws and conventions. Civil liberties of employees. Social and economic rights of workers. Protection from discrimination in the labour market and employment. As well as detailed examination of legal materials, the approach involves discussion of theories of human rights and comparisons between legal systems.

Teaching: This course will have 20 hours of teaching content in Autumn Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: One 2,000 word essay.

Indicative reading: A detailed syllabus of weekly readings will be available and the materials can all be accessed through Moodle. Preliminary reading: Hugh Collins, *Employment Law*, 2nd edn (Oxford University Press, 2010), Chapters 9-10.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4K4 Half Unit

The International Law of Self-Determination

This information is for the 2024/25 session.

Teacher responsible: Dr James Irving

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit. Some prior knowledge of international law is useful but not essential.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course will provide a general introduction to the doctrine of self-determination in international law. Self-determination will be historically contextualised from its intellectual progenitors in the Enlightenment through to its political birth at the 1919 Paris Peace Conference and its formal induction into international law by virtue of the 1945 UN Charter. Both the detail of the doctrine's content and the dynamic governing its development will be explored. The relationship between self-determination and state formation (including decolonisation and secession), minority rights, aboriginal rights, women's rights and the nascent right to democratic governance will be central topics. Reference will also be made to the interplay between self-determination and economic rights, including permanent

sovereignty over natural resources, the right to development and the "third generation rights" movement more generally. Self-determination's influence upon the international rules governing the use of force will be discussed, but these rules will not be a primary focus. Upon completion of the course students will be in a position to legally analyse contemporary fact patterns and to identify both strengths and weaknesses in the existing legal framework. Students will have considered new and novel approaches to self-determination and will be able to situate the doctrine in relation to international law and human rights. Those taking the course will gain an appreciation for self-determination's particular contribution to political and economic liberty.

Teaching: This course will comprise one two-hour seminar each week in Autumn Term, except in Week 6, which is a Reading Week.

Formative coursework: Class exercises (which do not count towards the final assessment) will be set.

Indicative reading: Introductory reading: James Crawford, "The Right of Self-Determination in International Law: Its Development and Future" in Philip Alston, ed., *Peoples' Rights* (Oxford: Oxford University Press, 2001) 7. Additional sources: Philip Alston, ed., *Peoples' Rights* (Oxford: Oxford University Press, 2001); S. James Anaya, *Indigenous Peoples in International Law*, 2nd ed. (Oxford: Oxford University Press, 2004); Allen Buchanan, *Justice, Legitimacy, and Self-Determination: Moral Foundations for International Law* (Oxford: Oxford University Press, 2004); Cassese, Antonio, *Self-Determination of Peoples: A Legal Reappraisal* (New York: Cambridge University Press, 1995); Hillary Charlesworth, & Christine Chinkin, *The Boundaries of International Law* (Manchester: Manchester University Press, 2000); James Crawford, ed., *The Rights of Peoples* (Oxford: Clarendon Press, 1988); Hurst Hannum, *Autonomy, Sovereignty, and Self-Determination: the Accommodation of Conflicting Rights*, rev. ed. (Philadelphia: University of Philadelphia Press, 1996); James Irving, "Self-Determination and Colonial Enclaves: The Success of Singapore and the Failure of Theory" (2008) 12 S.Y.B.I.L. 97-122.; Christian Walter, Antje von Ungern-Sternberg & Kavus Abushov, eds., *Self-Determination and Secession in International Law* (New York: Oxford University Press, 2014).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4K5 Half Unit Not available in 2024/25

International Commercial Contracts - General Principles

This information is for the 2024/25 session.

Teacher responsible: Dr Jan Kleinheisterkamp, CKK 7.09

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Pre-requisites: Firm knowledge in contract law and/or international sale of goods from previous studies.

Course content: The course treats what can be called the general part of transnational contract law, i.e. the general principles of law which are of relevance in any kind of international contract, be it sale, construction, shipping, financing, or joint venture. These general principles relate to contractual formation and negotiations, interpretation, transversal general principles, changed circumstances and hardship, agency, third parties, assignment, self-help and set-off, direct performance and damages and penalties. At present, such contracts are governed either by uniform rules of international conventions or by the national laws applicable by virtue of conflict of law rules. The course puts the existing national and international solutions in a comparative perspective so as to work with the sources of such generally accepted principles. Where there are divergences between

existing solutions, the course focuses on the elaboration of new efficient solutions that are internationally acceptable and have the potential of becoming general principles in the future. For these purposes, special attention is given to the UNIDROIT Principles on International Commercial Contracts. Other national laws, however, are drawn upon from time to time. Students are also encouraged, in both classes and examination, to reflect upon the similarities and differences between their own national laws and the UNIDROIT Principles.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Lent Term. Students will usually have two additional hours in the Summer Term. This year teaching will be delivered through recorded online lectures and a mix of both in-person and online classes to accommodate students who are unable to physically be on campus. This course includes a reading week in Week 6 of Lent Term.

Formative coursework: One 2,500 word essay after week 6 on previous exam questions (choice of 1 out of 3).

Indicative reading: S. Vogenauer & J. Kleinheisterkamp, Commentary on the UNIDROIT Principles of International Commercial Contracts (1st edn, OUP 2009); H. Kötz, European Contract Law (OUP 1997); K. Zweigert & H. Kötz, An Introduction to Comparative Law (3rd edn, OUP 1998); H. Beale et al., *Lus Commune Casebook on the Common Law of Europe: Cases Materials and Text on Contract Law* (2nd edition, OUP 2010); T. Kadner Graziano, *Comparative Contract Law* (Palgrave 2009).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

LL4K8 Half Unit Not available in 2024/25

Law of Corporate Finance: Securities Regulation

This information is for the 2024/25 session.

Teacher responsible: Dr Elizabeth Howell

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The course examines the legal issues arising out of the operation of the capital markets as intermediaries between investors and issuers; it focuses on the regulation of capital-raising through the markets. The topics covered include: disclosure theory; the role of trading markets in finance-raising and their regulation; prospectus disclosure; ongoing disclosure; gatekeepers; market abuse; and the internationalisation of capital-raising and harmonisation. The course will focus primarily on English law but will consider the impact of the UK's withdrawal from the EU. Course coverage may vary slightly from year to year.

Teaching: This course is delivered through weekly two-hour lectures and through fortnightly (on average) one-hour classes in Winter Term. The course includes a Reading Week in Week 6 of Winter Term.

Formative coursework: A mock examination will be held at a time to be advised during Winter Term.

Indicative reading: Reading lists will be provided in advance for each session. Sample texts include Ferran, Howell and Steffek, *Principles of Corporate Finance Law* (3rd edition, 2023 (forthcoming)); and Payne and Gullifer, *Corporate Finance Law*, 3 ed 2020.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

LL4K9 Half Unit

European Capital Markets Law

This information is for the 2024/25 session.

Teacher responsible: Dr Alperen Gözlügöl CKK 7.28

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The course examines the EU's regulation of the capital markets. It considers the harmonized regulatory regime which applies to capital market actors across the Member States and which supports the integrated market. The topics which may be covered include: the rationale for integration and the role of law and the evolution of the integration project, including the impact of the financial crisis, Capital Market Union, and the UK's withdrawal from the EU; the deregulation, liberalization, harmonization, and re-regulation mechanisms used to integrate and regulate the EU market; market access and the passport for investment services; the liberalisation of order execution and the regulation of trading markets; retail investor protection; the prospectus and disclosure regime;; and the institutional structure supporting regulation and supervision, including the role of the European Securities and Markets Authority. Course coverage may vary slightly from year to year.

Teaching: This course has 20 hours of teaching content in Autumn Term. This course includes a Reading Week in Week 6 of Autumn Term.

Formative coursework: A mandatory in-class formative assessment (in the form of a timed exam question) will be held in Week 6.

Indicative reading: Reading lists will be provided in advance for each seminar and will include chapters from books, articles, and relevant legislative and policy materials. Sample texts include: Moloney, *EU Securities and Financial Markets Regulation*, 4th edition (2023) and Veil (ed), *European Capital Markets Law*, 3rd edition (2022).

Preliminary reading

Moloney, *EU Securities and Financial Markets Regulation* (2023), chapter 1

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4L6 Half Unit

Theory of Constitutional Rights

This information is for the 2024/25 session.

Teacher responsible: Professor Kai Möller

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Some knowledge of human or constitutional rights law of any jurisdiction may be helpful, but is not essential. A knowledge of philosophy is not required.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The course will provide an introduction to the theory of constitutional rights. The emphasis is on a combination of law and theory; to this end, each seminar will rely on a mixture of cases from various jurisdictions and theoretical and philosophical materials. Topics to be discussed will include: Robert Alexy's Theory of Rights as Principles; Ronald Dworkin's Theory of Rights as Trumps; The Debate about Proportionality; Absolute Rights; The

Justifiability of Judicial Review; The Culture of Justification and the Right to Justification.

Teaching: 20 hours of seminars in the AT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6.

Formative coursework: One 2,000 word essay.

Indicative reading: The course will rely on both cases from various jurisdictions and articles and book chapters from authors including Ronald Dworkin, Robert Alexy, Mattias Kumm, Jeremy Waldron and Frances Kamm.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4N6 Half Unit

Principles of Copyright Law

This information is for the 2024/25 session.

Teacher responsible: Dr Martin Husovec

Other Staff Involved: Dr Luke McDonagh

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The course explains the foundations and structure of copyright law. It is aimed at those who have not studied the subject in detail before but also those wishing to deepen their understanding of copyright law in the comparative context. Topics to be covered will include the history and evolution of copyright, protected subject matter, the scope of the economic and moral rights, and the principles underlying copyright enforcement. The course looks primarily at the European system, mostly as implemented in the UK.

Teaching: This course will have 20 hours of teaching content in Autumn Term and an additional two hours of teaching in the Spring Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: One 2,000 word essay.

Indicative reading: Reading lists will be issued on a weekly basis. The legislation, cases and soft law instruments will make up additional required reading for this course. All of this material is available in electronic form via the Moodle site which supports the course. Useful texts include Lionel Bently and Brad Sherman, *Intellectual Property Law* 4th ed. (OUP, Oxford 2018) and Thomas Dreier and P. Bernt Hugenholtz (eds.) *Concise European Copyright Law* (Kluwer, 2016).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4S1 Half Unit

Cyberlaw

This information is for the 2024/25 session.

Teacher responsible: Professor Andrew Murray

Other staff involved:

Dr Martin Husovec

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course does not require an in-depth understanding of contemporary computer technology.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on

this course.

Course content: This course examines and discusses topical issues in relation to law and technology. We begin by addressing issues relating to network regulation or control including questions such as "can internet-enabled communications be regulated?" and "who is competent to police online content and activity?". We discuss whether the internet can and should be neutral and politically charged questions regarding regulation of platforms and regulation by platforms. In the second half of the term, we will delve further into these issues through topical examples such as AI and justice, tackling online "harms" and regulating online platforms and AI systems.

Students taking the course will be expected to develop knowledge and understanding of the different values brought to bear in the regulation of new media technologies and communities formed through such technologies and the factors leading towards choices of particular values, regulatory institutions and process. Such knowledge and understanding will operate both at the theoretical level and the level of particular examples of regulatory regimes. Students will be expected to apply organisational and analytical skills to the investigation of evidence and problems and show effective communication through written work and seminar discussion. Students shall research an assessed extended essay.

Teaching: This course will have 20 hours of teaching content in Autumn Term. There will be a Reading Week in Week 6.

Formative coursework: Students should submit an essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises, and to submit one 2,000 word formative essay.

Indicative reading:

- Murray, *Information Technology Law: The Law and Society* (OUP, 5th ed, 2023)
- Husovec, *Principles of the Data Services Act* (OUP, 2024)
- Reed & Murray, *Rethinking the Jurisprudence of Cyberspace* (Edward Elgar, 2020)
- Pasquale, *New Laws of Robotics: Defending Human Expertise in the Age of AI* (Belknap, 2020)
- Murray, *The Regulation of Cyberspace* (Routledge, 2007)
- Reed, *Making Laws for Cyberspace* (OUP, 2012)
- Lessig, *Code Ver, 2.0* (Basic Books, 2006)
- Custers & Fösch-Villaronga (Eds), *Law and Artificial Intelligence* (Springer, 2022)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4S2 Half Unit

E-Commerce Law

This information is for the 2024/25 session.

Teacher responsible: Professor Andrew Murray

Other staff involved:

Dr Edmund Schuster

Professor Mark Lewis

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course is to introduce students from a legal background to the specialised legal structure which surrounds e-commerce. The course looks at the specific problems an e-commerce start-up must overcome in order to begin trading, including electronic contracting, payment and consumer protection, arranging cloud hosting agreements, designing terms and conditions of service and delivery, and arranging distribution agreements. Also examined will be smart contracts and distributed ledger technology. From here the course will develop to examine

the problems of more mature e-commerce businesses including jurisdiction, payment systems (including cryptocurrency) and access to, and ownership of, data. Classes on cybersecurity and the application of AI in the commercial environment complete the analysis. The course is designed to act as an interface between ICT law and commercial law and practice in that it examines in detail the close sub-set of online transactions which are clearly commercial in nature.

Teaching: This course will have 20 hours of teaching content in Winter Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: Students should submit an essay plan and working bibliography for the assessed essay. All students are expected to contribute to a series of class and online exercises, and to submit one 2,000 word formative essay.

Indicative reading: Murray: Information Technology Law: The Law and Society 5ed (OUP, 2023)

Lodder & Andrew Murray (eds) EU Regulation of E-Commerce: A Commentary 2ed (Edward Elgar, 2022)

Millard: Cloud Computing Law (OUP, 2021).

Fox & Green: Cryptocurrencies in Public and Private Law (OUP, 2019).

Finck: Blockchain Regulation and Governance in Europe (CUP, 2018).

Cohen: Between Truth and Power: The Legal Constructions of Informational Capitalism (OUP, 2019).

Susskind: Online Courts and the Future of Justice (OUP, 2019).

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4S4 Half Unit Digital Rights, Privacy and Security

This information is for the 2024/25 session.

Teacher responsible: Dr Sara Nogueira Silva

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Basic knowledge of EU law is desirable, but not essential, for this course. Students who do not have this background knowledge are advised to do some preparatory reading (2-3 chapters) before the seminar begins.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: Personal data is an important factor of production in data-driven economies, and the processing of personal data can generate significant economic and social benefits. However, personal data processing can also have a detrimental impact on established rights and values, such as autonomy, privacy and data protection. As a result, legal frameworks to regulate personal data processing have been enacted across the world, with the EU legal model used as a blueprint. Yet, despite the development of such legal frameworks, critical questions remain unanswered. For instance, disagreement persists regarding how the balance should be struck between effective data protection and other rights (such as freedom of expression and freedom of information) and interests (such as innovation and national security).

This course will critically evaluate the legal framework applicable to personal data processing. It will do this predominantly with reference to the EU framework, as this has served as a model for over 100 other jurisdictions. Participants will be introduced to techniques and technologies for monitoring and processing personal data in the information society. In order to bring key issues to life, a number of case studies will be considered, including the application of data protection rules to online behavioural advertising and the use of automated decision-making in the criminal justice context. In addition, this course will explore

the impact of AI systems' development and use in the processing of personal data.

Teaching: This course has 20 hours of teaching content in Autumn Term. Students will usually have two additional hours in the Spring Term. This course includes a Reading Week in Week 6 of Autumn Term.

Formative coursework: All students are expected to contribute to a series of class exercises and to submit one piece of formative work for assessment.

Indicative reading:

• Bygrave: Data Privacy Law: An International Perspective (OUP, 2015)

• Cohen: Between Truth and Power (OUP, 2019)

• Kuner: Transborder Data Flows and Data Privacy Law (OUP, 2013)

• Lynskey: The Foundations of EU Data Protection Law (OUP, 2015)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4S5 Half Unit Regulation of Digital Creativity and Investment

This information is for the 2024/25 session.

Teacher responsible: Dr Martin Husovec

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: The course examines how law and other regulatory systems incentivize creativity and investment in the digital space and with what consequences. Legislatures around the world constantly face the question of what intangible assets to protect and how to support social progress. The general intuition is that protecting from imitation is necessary to incentivize creativity and investment that are in everyone's interest. Several recent examples include potential protection of data, AI-generated creations, computer programs, and digital news.

The course provides a broad view of how legal incentives, social norms, technical architecture, and markets shape the legal design of new forms of protection of intangible assets. It draws on a number of recent policy developments in Europe and around the world to study when and by what means legislators decide to protect new digital assets from imitation and appropriation. It explores how legislators, regulators and industries interact in their attempts to develop a coherent and flexible body of law and regulatory practice.

At the end of the course, students should be able to:

- critically evaluate ongoing developments in law relating to IPRs and the digital environment.
- display an understanding of how these developments relate to one another.
- examine areas of doctrinal, academic and political debate surrounding rules and theories;
- evaluate those rules and theories in terms of internal coherence and practical outcomes;
- draw on the analysis and evaluation contained in primary and secondary sources.

Teaching: This course will have two hours of teaching content each week in Winter Term and an additional two hours of teaching in the Spring Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: All students are expected to contribute to a series of class exercises, and to submit to one one-hour mock exam.

Indicative reading: Academic papers by scholars of law, economics, and other social sciences, such as Alexrod, Coase, Husovec, Hugenholtz, Lemley, Mazzucato, Moser, and many others Justin Pila and Paul Torremans, European Intellectual Property

Law (OUP 2019)

Murray: Information Technology Law: The Law and Society 4ed (OUP, 2019)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4Y9 Half Unit

Comparative and Transnational Law

This information is for the 2024/25 session.

Teacher responsible: Dr Jacco Bomhoff

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students from other departments are allowed to apply with permission of the Course Convener.

This course has a limited number of places and we cannot guarantee all students will get a place.

Course content: This course covers both the comparison of law and legal institutions from different legal systems and traditions (comparative law), and the study of forms of legal regulation beyond the state (transnational law). For each these two fields, topics for discussion are selected based on their relation to one or both of two broad themes: First, the connections between law and its surroundings (culture, society, and economy); and second, the character of 'law' generally (as a form of reasoning, or a set of institutional arrangements, or a distinctive 'worldview'). Studying these two classic themes across of a range different national- and transnational settings allows us to ask a series of more concrete questions, such as: "Why are courts in some legal systems more powerful or more trusted than courts in other systems?"; "Why do some countries send far more people to prison than others?"; "Is it possible for a lawyer from one legal system to really understand what law means or how law works in some other system; or for a legal doctrine from one system to be 'transplanted' to another?"; and: "How is 'law' in non-state contexts similar to and different from state law?".

The course combines attention to theory (social- and cultural theory, theories of comparison, and of the transnationalisation of law) with detailed case studies in selected areas from different fields of law (comparative constitutional law, comparative private law, comparative criminal justice, EU law; and commercial arbitration, among others). The course might be especially interesting for students already taking other courses with a comparative- or a transnational law dimension, and for all students interested in the ways law works, and does not work, and in how lawyers and judges think, in different parts of the world.

Teaching: This course will have two hours of teaching content each week in Winter Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course. This essay is due in Week 7.

Indicative reading:

- Mathias Siems, *Comparative Law* (Cambridge, 3rd edn, 2022)
- Adams, Maurice & Bomhoff, Jacco, *Practice and Theory in Comparative Law* (Cambridge, 2013)
- Cotterrell, Roger, *What is Transnational Law?*, LAW & SOCIAL INQUIRY (2012)
- Frankenberg, Gunther, *Critical Comparisons: Re-thinking Comparative Law*, 26 HARVARD INTERNATIONAL LAW JOURNAL (1985)
- Pirie, Fernanda, *The Anthropology of Law* (Oxford, 2013)
- Reimann, Mathias and Zimmermann, Reinhard, *The Oxford Handbook of Comparative Law* (Oxford, 2nd edn, 2019)

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4Z1 Half Unit

Business Taxation: Principles and Practice

This information is for the 2024/25 session.

Teacher responsible: Eduardo Baistrocchi, CKK 7.33

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is recommended for those studying LL4AY International Tax Systems and LL4AZ Taxation of Multinational Enterprises: Transfer Pricing.

This course has a limited number of places (it is controlled access) and demand is typically high. This may mean that you're not able to get a place on this course.

The course will be relevant to the following LLM specialisms: Corporate and Commercial Law and Taxation.

Course content: This course provides a comprehensive introduction to business taxation using United Kingdom law as a case study. It focuses on how businesses, both incorporated and unincorporated, are taxed in the UK. Focusing on the key elements of UK business income taxation offers a useful example of business taxation in any country. These elements include an outline of the UK tax system, taxation of trading income, tax relief for losses, corporation tax and the nature of taxes on companies, taxation of dividends and other distributions, capital allowances (relief for depreciation), capital gains taxation, and partnership taxation.

Teaching: This course will have two hours of teaching content each week in the Autumn Term and an additional two hours of teaching in the Spring Term. There will be a Reading Week in Week 6 of the Autumn Term.

Formative coursework: Students will have the option of producing a formative essay of 2,000 words.

Indicative reading: Anne Fairpo, *Revenue Law: Principles and Practice*, Bloomsbury Professional; Edward J. McCaffery, *Income Tax Law*, Oxford University Press; Tolley's *Yellow Tax Handbook*; Eduardo Baistrocchi, 'Global Tax Hubs', *Florida Tax Review* (2024). Available at SSRN: <https://ssrn.com/abstract=4544786>. Detailed reading lists will be provided during the course via Moodle.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4Z2 Half Unit

Resolving International Tax Disputes: A Global Perspective

This information is for the 2024/25 session.

Teacher responsible: Eduardo Baistrocchi, CKK 7.33

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course will be relevant to the following LLM specialisms: International Dispute Resolution, Public International Law, and Taxation.

This course is capped at 30 students. Students must apply through Graduate Course Choice on LSEforYou.

Course content: This module is the first in Europe to provide an interdisciplinary analysis of international tax dispute resolution worldwide. It covers three different areas of public international law that are used for resolving international tax disputes: tax treaty law, bilateral investment treaty law, and World Trade Organization (WTO) law. The course will rely on case studies from all continents to identify global patterns in the resolution of such disputes. The analysis will examine the implications of institutional stability and instability, and touch upon the protection of taxpayers' rights.

Teaching: 20 hours of seminars in the AT. 2 hours of seminars in

the ST.

Formative coursework: One 2,000 word essay.

Indicative reading: E. Baistrocchi, 'Global Tax Hubs', Florida Tax Review (2024). Available at SSRN: <https://ssrn.com/abstract=4544786>;

E. Baistrocchi, 'The International Tax Regime and Global Power Shifts', Virginia Tax Review, Vol. 20, No. 2, 2021. Available at SSRN: <https://ssrn.com/abstract=3744992>;

E. Baistrocchi, ed. A Global Analysis of Tax Treaty Disputes. Cambridge University Press; 2017.

E. Baistrocchi, 'Tax Disputes Under Institutional Instability: Theory and Implications', Modern Law Review, Volume 75, Issue 4, 547-577 (2012), Available at SSRN: <https://ssrn.com/abstract=2336276>

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4Z5 Half Unit Not available in 2024/25 State Aid and Subsidies Regulation

This information is for the 2024/25 session.

Teacher responsible: Professor Pablo Ibanez Colomo

Availability: This course is available on the LLM (extended part-time), LLM (full-time), MSc in European and International Public Policy, MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Regulation and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course addresses the national and supranational regimes providing for the control of subsidies and similar measures (such as tax breaks, preferential loans and unlimited guarantees). It focuses on the EU and UK systems—in particular EU State aid law, the UK Subsidy Control Act 2022 and the EU Foreign Subsidies Regulation. Subsidies are a central aspect of policy-making in many jurisdictions. The decarbonisation of the economy and the re-shoring of manufacturing and services typically demand the use of financial incentives to change or to attract some activities. Subsidies may also be a part of an effective response to an economic shock (such as a pandemic or a financial crisis). These measures, while sometimes necessary and positive for society, also have the potential to distort competition and trade. For instance, schemes designed to attract multinationals by means of tax breaks and other sweeteners, can have a major impact on investment decisions by firms. As the example of the US Inflation Reduction Act shows, so-called 'green-subsidies' may alter the flow of trade in fundamental ways.

Regimes providing for the control of subsidies and similar measures must be understood against this background. These systems may be introduced at the national level (as is true of the UK) and also in the context of bilateral and multilateral trade agreements (including the EU).

The module is structured around four main areas. First, an introductory part explores the rationale behind subsidy control regimes and covers the basic institutional and substantive features of national and supranational arrangements. The second part deals with the boundaries of the notion of subsidy ('State aid' in EU parlance). The module then addresses to some of the most prominent areas of enforcement in theory and practice, including environmental and energy aid. The final part of the course is devoted to procedural matters.

Teaching: 20 hours of seminars in the AT. 2 hours of seminars in the ST.

There will be a Reading Week in Week 6.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Quigley, European State Aid Law and Policy (4th Edition, 2022); Bacon (ed), European Community Law of State Aid (3rd Edition, 2017).

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

LL4Z6 Half Unit Comparative Constitutional Law

This information is for the 2024/25 session.

Teacher responsible: Professor Jo Murkens

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: Comparative Constitutional Law is a rejuvenated discipline that attracts a broad range of interdisciplinary interest in the formation, design, and operation of constitutions. LL4Z6 examines the central issues across a range of jurisdictions and from a variety of perspectives. In Part I, we will discuss the idea of comparative law as a legal discipline with its own distinctive method as well as the transnational transfer of constitutional ideas and ideologies. Part II deals with key constitutional concepts, in particular the historical origins of fundamental law, constituent power, constitutional change, and the rule of law. Part III deals with questions of constitutional design, with a special focus on constitution-making in deeply divided and authoritarian societies. LL4Z6 offers a rich historical and conceptual account of the origins of Western constitutional ideas. It also examines their contemporary meaning and application in non-Western contexts. In so doing, the course develops its own critique of mainstream liberal thought that idealises constitutions as normative constraints on politics or essentialises the concept of constituent power in constitutional theory. We will ask whether formal constitutions facilitate democratisation and political change or whether they undermine democracy and entrench the ruling elite. The study of law, like the study of all social phenomena, is always comparative and inevitably fragmented. In LL4Z6, we will not be comparing, doctrinally and systematically, the constitutional codes of different legal orders. Instead, the objective of the course is to study comparative constitutional law comprehensively, critically, and contextually. This approach enables the student to deepen their understanding of law as a method and to connect that understanding independently to other disciplines.

Teaching: This course will have two hours of teaching content each week in Autumn Term and two hours of seminars in Spring Term.

Formative coursework: One 2,000 word essay.

Indicative reading: There is not a set book for this course. All materials will be made available in advance on Moodle.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4Z7 Half Unit Comparative Constitutional Rights

This information is for the 2024/25 session.

Teacher responsible: Professor Kai Möller

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is not available as an outside option.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on

this course.

Course content: This course examines a range of controversial issues in human and constitutional rights law from a comparative perspective. These issues include: abortion; euthanasia and physician-assisted suicide; same sex marriage; religion in the public sphere; hate speech and denial of the holocaust; obscenity; affirmative action. We will approach them by comparing and contrasting judgments from courts all over the world, with a certain emphasis on cases from the U.S. Supreme Court, the Canadian Supreme Court, the South African Constitutional Court, the European Court of Human Rights, the U.K. Supreme Court, and the German Federal Constitutional Court. The goals of the course are, first, to introduce the students to the jurisprudence of those powerful and influential courts, and, second, to invite them to think about and critically analyse some of the most controversial, difficult, and important rights issues of our time.

Teaching: This course will have two hours of teaching content each week in Winter Term and two hours in the Spring Term. There will be a Reading Week in Week 6 of Winter Term.

Formative coursework: One 2,000 word essay.

Indicative reading: The course is mainly case-based. Students will be provided with course packs including shortened versions of the relevant judgments via the Moodle page for this course.

Assessment: Exam (100%, duration: 2 hours and 30 minutes) in the spring exam period.

LL4Z9 Half Unit Not available in 2024/25 Banking Law

This information is for the 2024/25 session.

Teacher responsible: Professor Jo Braithwaite

Availability: This course is available on the LLM (extended part-time), LLM (full-time) and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places and demand is typically high. This may mean that you're not able to get a place on this course.

Course content: This course focuses on the private law of banking as it relates to the core banking activities. In particular, we look at the deposit-taking relationship, the legal issues surrounding bank payment services, and the inter-disciplinary debates about the changing nature of money and payments. The course aims to be both domestic and international in perspective, though the emphasis will be on English law. Topics include: 1. The deposit-taking relationship, including the duty of confidentiality; 2. Money, transfers of money and payment including the ongoing debates around/ development of new digital currencies by central banks and decentralised payment systems, including the debates about central bank digital currencies; 3. Bank payment methods: funds transfers and unauthorised payments including the debate around tackling 'authorised push payment' or APP scams; and 4. Bank payment services in an international context, letters of credit.

Teaching: Two hours of teaching content each week in Autumn Term and a two hour revision class in the Spring Term. There will be a Reading Week in Week 6 of Autumn Term.

Formative coursework: Students will be asked to submit one essay, which may be written in exam conditions. Students will also be expected to take part in individual and group presentations during the course.

Indicative reading: For introductory purposes, students are referred to Cranston et al, Principles of Banking Law (OUP, 3rd ed, 2017). Full reading lists will be distributed during the course. Please note that students will be expected to locate, review and prepare answers for discussion in class based on primary legal sources including English cases and legislation for this course.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

MA400

September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management)

This information is for the 2024/25 session.

Teacher responsible: Dr Albina Danilova

Availability: This course is compulsory on the MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit. Students who wish to select this course as an outside option must have a quantitative background.

Course content: The purpose of this course is to review some key concepts of probability used in finance. The course develops the common mathematical background that is assumed by the MSc Financial Mathematics and addresses some aspects of the mathematical theory that is central to the foundations of the programme: probability spaces, random variables, distributions, expectations and moment generating functions are reviewed; the concepts of conditional probability and conditional expectation as random variables are introduced using intuitive arguments and simple examples; stochastic processes, martingales, the standard Brownian motion are introduced; Itô integrals, Itô's formula and Girsanov's theorem are discussed on a formal basis.

Teaching: This course is delivered through a combination of classes and lectures over two weeks in September, prior to the start of the academic year. The material covered in the lectures will be totalling to an amount of roughly 30 hours of lecturing and 8 hours of seminars. The teaching will generally be in person, but some of the material maybe delivered via online videos or video link. There will be an informal examination at the end of the course. Its purpose is to provide student feedback and it does not count towards the degree.

Formative coursework: Exercises are assigned and form the basis of class discussion.

Indicative reading: Lecture notes will be provided.

S. Shreve, Stochastic Calculus for Finance II Continuous-Time Models, Springer.

D. Williams, Probability with Martingales, Cambridge University Press.

Assessment:

This course does not form part of the degree award.

MA402 Half Unit Mathematical Game Theory

This information is for the 2024/25 session.

Teacher responsible: Dr Galit Ashkenazi-Golan COL 3.08

Availability: This course is available on the CEMS Exchange, MBA Exchange, MPA in Data Science for Public Policy, MSc in Applicable Mathematics, MSc in Financial Mathematics and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

It is not available to students who have taken Game Theory (MA330) or Game Theory I (MA301).

Students on the MPA in Data Science for Public Policy are required to seek permission to take this course.

Pre-requisites: Familiarity with a rigorous treatment of mathematics (through definitions, theorems and proofs) is expected. Students must know basics of linear algebra (matrix multiplication, geometric interpretation of vectors), analysis (continuity, closed sets), and probability theory (expected value, conditional probability, independence of random events).

Course content: Concepts and methods of mathematical game theory. Nim and combinatorial games. Congestion games. Games in strategic form, dominated strategies, Nash equilibrium. Cournot quantity competition. Game trees with perfect information,

backward induction. Commitment. Expected utility. Mixed equilibrium. Zero-sum games, maxmin strategies. Extensive games with information sets, behaviour strategies, perfect recall. Bargaining. Geometry of equilibria.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term.

Formative coursework: Weekly exercises are set and marked.

Indicative reading: Required text: B von Stengel, *Game Theory Basics*. Cambridge University Press, 2022.

Assessment: Exam (90%, duration: 2 hours) in the January exam period.

Continuous assessment (10%).

MA407 Half Unit Algorithms and Computation

This information is for the 2024/25 session.

Teacher responsible: Dr Tugkan Batu

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Applicable Mathematics, MSc in Data Science, MSc in Operations Research & Analytics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. The course is compulsory for students on the MSc Applicable Mathematics.

Pre-requisites: Good general knowledge of mathematics, including familiarity with abstract concepts. A willingness to cope with technical details of computer usage, and with a rapid introduction to programming.

Course content: Introduction to programming in Python. Introduction to the theory of algorithms: running time and correctness of an algorithm. Recursion. Data structures: arrays, linked lists, stacks, queues, binary search trees. Sorting algorithms. Greedy algorithms. Dynamic programming. Online algorithms.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Autumn Term. There are also optional computer help sessions for this course. Before the start of Autumn Term, there will be 6 hours of pre-session programming tutorials.

Formative coursework: Weekly exercises are set and marked. Many of these will require implementation of programming exercises in Python.

Indicative reading: T H Cormen, C E Leiserson, R L Rivest and C Stein, *Introduction to Algorithms*.

Assessment: Exam (65%, duration: 2 hours) in the January exam period.

Coursework (25%) and continuous assessment (10%) in the AT.

MA408 Half Unit Topics in Discrete Mathematics

This information is for the 2024/25 session.

Teacher responsible: Prof Julia Boettcher

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students should have experience with proofs and proof techniques used in pure mathematics.

Course content: This course covers modern topics in Discrete Mathematics (connected, for example, to Graph Theory, Combinatorics, Discrete Probability, Information and Communication Theory, or Cryptography). The topics selected can differ year to year. A syllabus of the course content will be available

to students at the beginning of the academic year.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Autumn Term, and 1 hour of teaching in Summer Term.

Formative coursework: There will be regular homework assignments.

Indicative reading: A reading list will be provided in a syllabus that will be available to students at the beginning of the academic year.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA409 Half Unit Continuous Time Optimisation

This information is for the 2024/25 session.

Teacher responsible: Prof Adam Ostoja-Ostaszewski

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Operations Research & Analytics and MSc in Quantitative Methods for Risk Management. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students will need adequate background in linear algebra (facility with diagonalization of matrices for the purposes of solving simultaneous first-order differential equations is key here; knowledge of the relation between the range of a matrix transformation and the kernel of its transpose would be helpful), and in advanced calculus (manipulation of Riemann integrals such as 'differentiation under the integral' and the associated Leibniz Rule). Students unsure whether their background is appropriate should seek advice from the lecturer before starting the course. Background revision will be provided in the first two weeks of term.

Course content: This is a course in optimisation theory using the methods of the Calculus of Variations. No specific knowledge of functional analysis will be assumed and the emphasis will be on examples. It introduces key methods of continuous time optimisation in a deterministic context, and later under uncertainty. Calculus of variations and the Euler-Lagrange Equations. Sufficiency conditions. Pontryagin Maximum Principle. Extremal controls. Transversality conditions. Linear time-invariant state equations. Bang-bang control and switching functions. Dynamic programming. Control under uncertainty. Itô's Lemma. Hamilton-Jacobi-Bellman equation. If time allows: Applications to Economics and Finance: Economic Growth models, Consumption and investment, Optimal Abandonment, Black-Scholes model, Singular control, Verification lemma.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 32 hours across WinterTerm and additionally up to 4 hours of revision near the end of Winter Term.

Background review of (i) elementary methods for solving differential equations, and (ii) pertinent linear algebra (diagonalization) will be included in the seminars of Weeks 1 and 2. This course may have a reading week in WT by arrangement.

Indicative reading: A full set of lecture notes will be provided.

Reference will be made to the following essential books: D Burghes & A Graham, *Control and Optimal Control Theories with Applications*, Horwood; E R Pinch, *Optimal Control and the Calculus of Variations*, Oxford Science Publications; A. Sasane, *Optimization in Function Spaces*, Dover; J L Troutman, *Variational Calculus and Optimal Control*, Springer; and occasionally to: D G Luenberger, *Optimization by Vector Space Methods*, Wiley. Further Reading and Advanced Literature: G Leitmann, *Calculus of Variations and Optimal Control*, Plenum; A K Dixit & R S Pindyck, *Investment under Uncertainty*, Princeton University Press; D Duffie, *Security Markets*, Academic Press; D J Bell & D H Jacobsen, *Singular Optimal Control*, Academic Press; W H Fleming & R W Rishel, *Deterministic and Stochastic Optimal Control*, Springer; W H Fleming; H M Soner *Controlled Markov Processes & Viscosity Solutions*, Springer; G Hadley; M C Kemp, *Variational Methods in Economics*, North Holland;

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA411 Half Unit Probability and Measure

This information is for the 2024/25 session.

Teacher responsible: Dr Pavel Gapeev

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Some background in real analysis is essential.

Course content: The purposes of this course are (a) to explain the formal basis of abstract probability theory, and the justification for basic results in the theory, and (b) to explore those aspects of the theory most used in advanced analytical models in economics and finance. The approach taken will be formal. Probability spaces and probability measures. Random variables. Expectation and integration. Convergence of random variables. Conditional expectation. The Radon-Nikodym Theorem. Bayes' formula. Martingales. Stochastic processes. Brownian motion. The Itô integral.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: Full lecture notes will be provided. The following may prove useful: J S Rosenthal, A First Look at Rigorous Probability Theory; G R Grimmett & D R Stirzaker, Probability and Random Processes; D Williams, Probability with Martingales; M Caplinski & E Kopp, Measure, Integral and Probability; J Jacod & P Protter, Probability Essentials.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA414 Half Unit Not available in 2024/25 Stochastic Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Arne Lokka

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Financial Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: ST409 or MA411.

Course content: This course is concerned with a rigorous introduction to the area of stochastic analysis with emphasis on Itô calculus. The course begins necessary preliminaries, followed by a construction of the standard Brownian motion and a study of its properties. Subsequently, Lévy's characterisation of Brownian motion, martingale representation theorems and Girsanov's theorem are established. The course then expands on a study of stochastic differential equations.

Teaching: 20 hours of lectures and 10 hours of seminars in the WT.

Indicative reading: Full lecture notes will be provided. The following may prove useful: I Karatzas and S E Shreve, Brownian Motion and Stochastic Calculus, Springer; B Øksendal, Stochastic Differential Equations: An Introduction with Applications, Springer; D Revuz and M Yor, Continuous Martingales and Brownian Motion, Springer; L C G Rogers and D Williams, Diffusions, Markov Processes, and Martingales, Cambridge.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA415 Half Unit The Mathematics of the Black and Scholes Theory

This information is for the 2024/25 session.

Teacher responsible: Dr Arne Lokka

Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available on the MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (MA400).

Course content: This course develops the mathematical theory of risk-neutral valuation. In the context of the binomial tree model for a risky asset, the course introduces the concepts of replication and martingale probability measures. The mathematics of the Black & Scholes methodology follow. In particular, the expression of European contingent claims as expectations with respect to the risk-neutral probability measure of the corresponding discounted payoffs, pricing formulae for European put and call options, and the Black & Scholes PDE are derived. The course expands on PDE techniques for the pricing and hedging of several options. Implied volatilities as well as stochastic volatility models are then considered. The course also introduces the Black & Scholes model for foreign exchange markets and various foreign exchange options.

Teaching: 20 hours of lectures and 10 hours of seminars in the AT.

Formative coursework: Weekly homework

Indicative reading: N H Bingham and R Kiesel, Risk-Neutral Valuation, Springer; T Björk, Arbitrage Theory in Continuous Time, Oxford; P J Hunt and J Kennedy, Financial Derivatives in Theory and Practice, Wiley; D Lamberton and J Kennedy, Introduction to Stochastic Calculus Applied to Finance, Chapman & Hall; D. Lamberton and B. Lapeyre, Introduction to Stochastic Calculus Applied to Finance, Chapman & Hall/Crc Financial Mathematics Series, 2nd edition, 2007; S E Shreve, Stochastic Calculus for Finance: Continuous-time Models: vol. 2, Springer

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA416 Half Unit The Foundations of Interest Rate and Credit Risk Theory

This information is for the 2024/25 session.

Teacher responsible: Dr Christoph Czichowsky

Availability: This course is compulsory on the MSc in Financial Mathematics. This course is available on the MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Course content: This course studies the mathematical foundations of interest rate and credit risk theory. The course starts with a development of the multi-dimensional Black & Scholes theory with stochastic market data. This is then used to show how discount bond dynamics modelling can be approached by (a) the modelling of the short-rate process and the market price of risk, which underlies the family of short-rate models, or (b) the modelling of the market price of risk and the discount bond volatility structure, which gives rise to the Heath-Jarrow-Morton (HJM) framework. The course then expands on the theory of interest rate market models and credit risk.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Winter Term.

Formative coursework: The main formative assessment will be

in the form of weekly exercise sets, which will be discussed in the seminars. Some of the topics of these will be similar to what is expected in the summative assessment (exam).

Indicative reading: T R Bielecki and M Rutkowski, *Credit Risk Modeling, Valuation and Hedging*, Springer; M Musiela and M Rutkowski, *Martingale Methods in Financial Engineering*, Springer; R Rebonato, *Modern Pricing of Interest-rate Derivatives: The LIBOR Market Model and Beyond*, Princeton.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA417 Half Unit Computational Methods in Finance

This information is for the 2024/25 session.

Teacher responsible: Prof Luitgard Veraart

Availability: This course is compulsory on the MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

The only programmes on which this course is available as an optional course are MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (LSE and Fudan), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research).

Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (MA400).

Any students who are taking MA417 as an optional course and who have not completed MA400 need to obtain permission from the lecturer. They need to provide a statement explaining why and how they know the material covered in MA400.

Course content: The purpose of this course is to (a) develop the students' computational skills, and (b) introduce a range of numerical techniques of importance to financial engineering. The course starts with random number generation, the fundamentals of Monte Carlo simulation and a number of related issues. Numerical solutions to stochastic differential equations and their implementation are considered. The course then addresses finite-difference schemes for the solution of partial differential equations arising in finance.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Autumn Term.

Formative coursework: Weekly exercises and practicals are set and form the basis of the seminars.

Indicative reading: P.Glasserman, *Monte Carlo Methods in Financial Engineering*, Springer; R.U. Seydel, *Tools for Computational Finance*, Springer; P.E.Kloeden and E.Platten, *Numerical Solution of Stochastic Differential Equations*, Springer;

Assessment: Project (100%) in December.

MA420 Half Unit Topics in Financial Mathematics

This information is for the 2024/25 session.

Teacher responsible: Prof Johannes Ruf

Availability: This course is available on the MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Knowledge of financial mathematics (as for example provided in MA415).

Depending on the topics selected, programming experience might be required. These requirements are spelled out in a syllabus that

will be available to students at the beginning of the academic year.

Course content: This course covers modern topics in Financial Mathematics. The topics selected can differ year to year. A syllabus of the course content will be available to students at the beginning of the academic year.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Winter Term.

Formative coursework: There will be regular homework assignments.

Indicative reading: A reading list will be provided in a syllabus that will be available to students at the beginning of the academic year.

Assessment: Coursework (100%).

100% Coursework (More details will be provided in a syllabus that will be available to students at the beginning of the academic year.)

MA421 Half Unit Topics in Algorithms

This information is for the 2024/25 session.

Teacher responsible: Dr Tugkan Batu and Prof Andrew Lewis-Pye

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Algorithms and Computation (MA407) or have taken an equivalent course to provide a basic knowledge in analysis of algorithms: running time and correctness of an algorithm, and basic knowledge of computer programming (preferably in Python). Students should be comfortable with proofs and proof techniques used in pure mathematics.

Course content: This course covers modern topics in the theory of algorithms. The topics selected can differ year to year. A syllabus of the course content will be available to students at the beginning of the academic year.

Teaching: 20 hours of lectures and 15 hours of seminars in the WT. 2 hours of lectures in the ST.

Formative coursework: Weekly exercises are set and marked. Some of these will include programming exercises in Python.

Indicative reading: T. H. Cormen, C. E. Leiserson, R. L. Rivest and C. Stein, *Introduction to Algorithms*, 3rd or 4th ed., MIT; M.R. Garey and D.S. Johnson, *Computers and Intractability: A Guide to the Theory of NP-completeness*, W.H. Freeman, 1979; D. Williamson, D. B. Shmoys, *The Design of Approximation Algorithms*, Cambridge University Press, 2011; V. Vazirani, *Approximation Algorithms*, 2nd ed., Springer, 2002; Michael Mitzenmacher and Eli Upfal, *Probability and Computing*, 1st or 2nd ed., Cambridge University Press.

Assessment: Exam (65%, duration: 2 hours) in the spring exam period.

Coursework (25%) in the period between WT and ST.

Continuous assessment (10%) in the WT.

MA422 Research Topics in Financial Mathematics

This information is for the 2024/25 session.

Teacher responsible: Dr Ophelia Bonesini (AT)

Dr Ophelia Bonesini and Professor Johannes Ruf (WT/ST)

Availability: This course is available on the MPhil/PhD in Mathematics, MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available as an outside option to students on other programmes where regulations permit.

PhD students in the departments of Mathematics and Statistics along with other members of the research community are

welcome to attend.

Course content: The seminar ranges over many areas of financial mathematics, stochastic analysis and stochastic control theory.

Teaching: 6 hours of seminars in the AT. 6 hours of seminars in the WT.

6 x 1 hour talks by researchers in the AT and WT.

Additional seminars will be scheduled throughout the year. Please see the Timetables website for further information.

Formative coursework: This course is not assessed.

Assessment: This is a non-assessed course.

MA423 Half Unit Fundamentals of Operations Research

This information is for the 2024/25 session.

Teacher responsible: Dr Neil Oliver

Availability: This course is compulsory on the MSc in Operations Research & Analytics. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange and MPA in Data Science for Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must know basics of Linear Algebra (matrix multiplication, geometric interpretation of vectors), Probability Theory (expected value, conditional probability, independence of random events) and Calculus (derivatives, limits).

Course content: An introduction to a range of Operations Research techniques, covering: foundations of linear programming, including the simplex method and duality; integer programming; markov chains; queueing theory; dynamic programming; deterministic and stochastic inventory models; game theory.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 35 hours across Autumn Term.

Formative coursework: Weekly exercises are set and marked in Autumn Term.

Indicative reading: The course has its own textbook which will be provided at the start of the term. The course will be taught from the textbook and also slides.

In addition to the textbook, students may also wish to consult:

- F S Hillier & G J Lieberman, Introduction to Operations Research, 9th edition (2009) (7th edition of Hillier & Lieberman (2000) is also acceptable).
- Wayne Winston, Operational Research; Applications and Algorithms, Fourth/International Student Edition.

Assessment: Exam (90%, duration: 3 hours) in the spring exam period.

Coursework (10%).

Weekly exercises are set and marked in Autumn Term, and count as coursework.

MA424 Half Unit Modelling in Operations Research

This information is for the 2024/25 session.

Teacher responsible: Dr Katerina Papadaki

Availability: This course is compulsory on the MSc in Operations Research & Analytics. This course is not available as an outside option.

Pre-requisites: Students must know basics of linear algebra (matrix multiplication, geometric interpretation of vectors), linear programming, and probability theory (expected value, conditional probability, independence of random events). For students in the MSc in Operations Research & Analytics, MA423 and ST447 more than cover the prerequisites.

Course content: The course will be in 2 parts, covering the two

most prominent tools in operational research: mathematical optimisation, the application of sophisticated mathematical methods to make optimal decisions, and simulation, the playing-out of real-life scenarios in a (computer-based) modelling environment.

Optimisation: This part enables students to formulate, model and solve real-life management problems as Mathematical Optimisation problems. In providing an overview of the most relevant techniques of the field, it teaches a range of approaches to building Mathematical Optimisation models and shows how to solve them and analyse their solutions. Topics include: formulation of management problems using linear and network models; solution of such problems with a special-purpose programming language; interpretation of the solutions; and formulation and solution of nonlinear models including some or all of binary, integer, convex and stochastic programming models.

Simulation: This part develops simulation modelling skills, understanding of the theoretical basis which underpins the simulation methodology, and an appreciation of practical issues in managing a simulation modelling project. Topics include: generating discrete and continuous random variables; Monte Carlo simulation; discrete event simulation; variance reduction techniques; Markov Chain Monte Carlo methods. The course will teach students how to use a simulation modelling software package.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Autumn Term.

Further, there is a minimum of 6 hours of computer workshop sessions delivered in Autumn Term. Computer workshops are not mandatory.

Formative coursework: A mock project will be given to students that resembles the summative project.

Indicative reading: The reading will be a combination of lecture slides and chapters from the following list of books.

Optimisation

- W L Winston, Operations Research: Applications and Algorithms, Brooks/Cole (4th ed., 1998)
- D Bertsimas and J N Tsitsiklis, Introduction to Linear Optimization, Athena Scientific (3rd ed., 1997)
- George B. Dantzig and Mukund N. Thapa, Linear Programming 2: Theory and extensions, Springer (2003)

Simulation

- S Ross, Simulation, Academic Press (5th ed., 2012)
- Joseph K. Blitzstein, Jessica Hwang, Introduction to Probability, Chapman and Hall/CRC Press (2014)

Assessment: Project (100%) in the WT.

There will be a project on Mathematical Optimisation and Simulation. The deliverable is a report along with a soft copy of any computer code and solver output.

MA425 Project in Operations Research & Analytics

This information is for the 2024/25 session.

Teacher responsible: Dr Marie Oldfield

Availability: This course is available on the MSc in Operations Research & Analytics. This course is not available as an outside option.

Cannot be taken with MA426 Dissertation in Operations Research & Analytics.

Pre-requisites: There are no pre-requisites

Course content: The student will carry out and report upon a substantial practical piece of work in Operational Research and Analytics. This may include elements of data science, machine learning, AI and human factors. The project is typically a consulting-like placement with an industry, government, or non-profit partner.

The project is normally provided by the course team. Project allocation is via formal interviews with the client a student has

applied for.

A project may be suggested by the student, subject to approval by the MA425 convenor.

Teaching: Teaching for this course is delivered through seminars totalling a minimum of 16.5 hours across the year.

Formative coursework: Each student will be assigned an LSE project supervisor who will monitor their progress on a continuing basis and give tutorial advice as required.

Indicative reading: Detailed suggestions for reading will be provided in the course of supervision.

Assessment: Project (100%).

Assessment is based on a combination of the project report, reflective report, project presentation, and CV writing.

The student is expected to work on this full time from early June to end of August possibly at the client site. The report is due on a date around the end of August.

MA426

Dissertation in Operations Research & Analytics

This information is for the 2024/25 session.

Teacher responsible: Prof Jozef Skokan

Availability: This course is available on the MSc in Operations Research & Analytics. This course is not available as an outside option.

Cannot be taken with MA425 Project in Operations Research & Analytics.

Course content: The aim of the dissertation is for students to pursue an independent piece of research within the field of Operations Research and Analytics. The dissertation may be theoretical or empirical. Students must obtain the approval of an advisor before embarking on any research.

Teaching: There will be a minimum of 12 hours of lectures and seminars delivered across Autumn and Winter terms. Most of the teaching will be shared with MA498. The ratio of lecture time and seminar time varies each week. Seminars do not include personal supervision time, which is scheduled independently with the supervisors.

An initial seminar will include presentations by members of the Operations Research Group in the Department of Mathematics on proposed topics for dissertations that they would be interested in supervising. Additional seminars will cover important aspects of writing a dissertation in mathematics, including: what plagiarism is and how to avoid it, the use of libraries for research, electronic research, general aspects of writing mathematics, and preparing a manuscript using mathematical text processing software (in particular, LaTeX). Each student will be assigned a supervisor who will monitor their progress and provide appropriate guidance throughout the WT, ST, and over the summer.

Formative coursework: Students will be expected to produce an initial report (in WT) and an interim report (in ST) for which feedback will be provided.

Indicative reading: Detailed suggestions for reading will be provided by the supervisor.

Assessment: Dissertation (90%) in the WT and ST.

Oral examination (10%) in the ST.

Assessment is primarily based entirely on the Dissertation, an electronic copy of which must be submitted by early September (exact date to be specified later). The report may include some software relating to the project. Detailed information about the required format for this submission will be provided during the Seminars.

At the end of summer term, each student will produce a presentation on the topic of their dissertation. The presentation will be graded and worth 10% of the course grade. Students will be given support in the seminars on how to prepare, how to present and what is expected.

MA427 Half Unit

Mathematical Optimisation

This information is for the 2024/25 session.

Teacher responsible: Dr Giacomo Zambelli

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Applicable Mathematics, MSc in Operations Research & Analytics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have sufficient knowledge of linear algebra (linear independence, determinants, matrix inversion and manipulation) and of basic multivariate calculus (derivatives and gradients).

Course content: Introduction to the theory and solution methods of linear and nonlinear programming problems, including: linear programming duality, Lagrangian duality, convex programming and Karush-Kuhn-Tucker conditions, algorithms for linear and convex optimisation problems, theory of good formulations for integer linear programming models, integer linear programming methods (branch and bound and cutting planes).

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term.

Formative coursework: Weekly exercises will be given that will be solved and discussed during the seminars. Three of those exercises will be handed in as formative coursework and the students will be given feedback on their submissions.

Indicative reading: Extensive lecture notes covering all parts of the course will be provided. Students interested in further readings can look at the books below.

- D Bertsimas and J N Tsitsiklis, Introduction to Linear Optimization (1997)
- S Boyd and L Vandenberghe, Convex Optimization (2004)
- M Conforti, G Cornuejols, G Zambelli, Integer Programming (2014)

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

MA428 Half Unit

Combinatorial Optimisation

This information is for the 2024/25 session.

Teacher responsible: To be confirmed.

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is not available as an outside option.

Pre-requisites: Some familiarity with graph theory and some knowledge of linear programming is desirable. For students that have no linear programming background, it is recommended that they read the material of the first four lectures of course MA423, which can be found on the Moodle page of MA423.

Course content: The course is intended as an introduction to discrete and combinatorial techniques for solving optimisation problems, mainly involving graphs and networks. Topics covered include: minimum spanning trees; shortest path algorithms; maximum flow algorithms; minimum cost flow problems; matching and assignment problems; and other topics that may vary from year to year.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Winter Term.

Formative coursework: Students will be expected to produce 3 problem sets in the WT.

Students will be given weekly exercises. Oral feedback will be provided in the seminars, where the weekly homework will be

discussed. Three of these weekly exercises will be handed in as formative coursework and the students will be given written feedback on their submissions.

Indicative reading: Lecture notes will be supplied for all topics. Most of the lectures will be based on topics from:

R K Ahuja, T L Maganti and J B Orlin, *Network Flows* (2013).

William J. Cook, William H. Cunningham, William R. Pulleyblank, Alexander Schrijver, *Combinatorial Optimization* (1997).

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

MA429 Half Unit Algorithmic Techniques in Machine Learning

This information is for the 2024/25 session.

Teacher responsible: Dr Neil Oliver

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Marketing and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Priority is given to MSc students in the Department of Mathematics.

Pre-requisites: Students are not permitted to take this course alongside ST443, Machine Learning and Data Mining. Students must have knowledge of Statistics and the programming language R to the level of ST447, Data Analysis and Statistical Methods, or alternatively, a comparable knowledge of Python.

Course content: The course introduces fundamental machine learning methods for data analytics problems. Vast quantities of data are available today in all areas of business, science, and technology as well as social networks. The goal of data mining is to extract useful information from massive-scale data. The aim of this course is to equip students with theoretically grounded and practically applicable knowledge of the most important machine learning algorithms used for this task, as well as how they should be applied. Mathematics (e.g., optimisation, graph theory), computer science and statistics all play an important role.

For classification and regression problems, methods studied include naive Bayes, K-nearest neighbours, decision trees, support vector machines, and neural networks. The course will also cover unsupervised learning methods such as clustering. Ethical issues arising from machine learning are also discussed.

The methods are illustrated on practical problems arising from various fields. Students will make use of various machine learning and data mining packages in R and Python, as appropriate.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Winter Term.

Formative coursework: There will be a formative group project, in preparation for a similar summative project.

Indicative reading:

- James, Witten, Hastie, Tibshirani, *An Introduction to Statistical Learning: with Applications in R* (2016)
- Hastie, Tibshirani, Friedman, *The Elements of Statistical Learning: Data Mining, Inference and Prediction*, 2nd ed. (2009)
- Witten, Frank, Hall, *Data Mining: Practical Machine Learning Tools and Techniques*, 3rd or 4th ed. (2016)

Assessment: Exam (60%, duration: 2 hours) in the spring exam period.

Project (40%) in the ST.

The examination is critical to assessment. In order to pass this course, students need to achieve a mark of at least 50% in the examination. A fail mark in the exam will result in an overall fail mark for the course: it cannot be compensated by the marks in the other elements.

MA431 Half Unit Not available in 2024/25 Advanced Topics in Operations Research and Applicable Mathematics

This information is for the 2024/25 session.

Teacher responsible: Dr Ahmad Abdi and Dr Neil Oliver

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Basic knowledge of graph theory and linear algebra. In particular, students should be familiar with graph theoretic notions such as spanning trees, cycles, cuts, stable sets, etc. and linear algebraic notions such as eigenvectors, eigenvalues, projections, the characteristic polynomial, etc.

Course content: An examination of advanced topics in Operations Research. The topics selected differ year to year; the topic for 2021/22 will be "Spectral Graph Theory".

Spectral Graph Theory is concerned with how combinatorial properties of graphs relate to the algebraic structure of certain matrices associated with the graph. One can look at the adjacency matrix of an undirected graph, which is a symmetric matrix, and consider the list of its eigenvalues, called the spectrum, along with the corresponding eigenvectors. The spectrum gives us important insight about the graph and its induced subgraphs, and perhaps surprisingly, this viewpoint can be used in the design of graph algorithms, such as network flow problems, plane drawings of planar graphs, isomorphism testing, etc.

Some highlights of the course include:

- Eigenvalue interlacing, and applications to graph theory
- Connections to electrical networks, random spanning trees, and random walks
- Spring layout drawings of graphs using spectral methods
- Clustering: how to find good ways of partitioning a graph into pieces via the spectrum
- Expander graphs: sparse graphs with exceptional connectivity properties

Teaching: 2 hours of help sessions in the ST.

This course is delivered through a combination of seminars and lectures totalling a minimum of 35 hours across Lent Term. This year, the lectures will be live, online and recorded. Depending on circumstances, seminars might be live and online, too.

Formative coursework: There will be 5 biweekly homework assignments, each of which will be marked and the student will receive feedback.

Indicative reading: *Algebraic Graph Theory* (Springer 2001), by Godsil and Royle.

Spectral and Algebraic Graph Theory (online), by Spielman.

Assessment: Assessment path 1

Exam (100%, duration: 3 hours) in the spring exam period.

Assessment path 2

Project (100%) in the ST.

Exam (100%, duration 3 hours)

PhD students are expected to complete a research-based project (worth 100%) in the ST as a replacement for the final exam.

MA433 Half Unit Mathematics of Networks

This information is for the 2024/25 session.

Teacher responsible: Prof Andrew Lewis-Pye

Availability: This course is available on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Mathematical maturity and an ability to write mathematical proofs. Linear algebra (diagonalisation, eigenvalues and eigenvectors), some graph theory and some basic game theory would be useful, but necessary knowledge from these areas

will be revised during the course.

Course content: Globalisation and the growth of the internet have meant not only an increasing need to understand the way in which social and communication networks form and operate, but also an unprecedented amount of data available to aid in this analysis. The last decade has seen a coming together of multiple scientific disciplines in an effort to understand how these highly connected systems function. The aim of this course will be to give an introduction to the study of networks, requiring as little background knowledge as possible. The course will begin with an analysis of some of the fundamental properties normally observed in real world networks, such as the small world property, high degrees of clustering and power law degree distributions. After reviewing required notions from game theory, we shall then apply these techniques to an analysis of the spread of behavioural change on networks, together with cascading effects and epidemic models. The final part of the course will be concerned with specific applications to the world wide web and page ranking.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term.

Formative coursework: Written answers to set problems will be expected on a weekly basis.

Indicative reading: (1) D. Easley, J. Kleinberg. Networks, crowds and markets, Cambridge University Press, 2010.

(2) M. Newman. Networks: An Introduction, Oxford University Press, 2010.

(3) The Rise of the Network Society, The Information Age: Economy, Society and Culture, 2010 edition, Manuel Castells.

Assessment: Exam (80%, duration: 2 hours) in the spring exam period.

Presentation (20%).

20% of the final grade will be determined by groupwork, in which groups of around four or five students are each allocated a research paper by the lecturer. The students then have to meet (virtually or in person) in order to discuss and understand the paper, before giving a group presentation on the subject matter at the beginning of WinterTerm.

MA434 Half Unit Not available in 2024/25 Algorithmic Game Theory

This information is for the 2024/25 session.

Teacher responsible: Dr Galit Ashkenazi-Golan

Availability: This course is available on the MSc in Applicable Mathematics and MSc in Operations Research & Analytics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Algorithms and Computation (MA407) or have taken an equivalent course that provides basic knowledge in the analysis of algorithms. No prior knowledge about Game Theory is required.

Course content: The last 15-20 years have witnessed a lively interaction between computer science and economics. Many problems central to computer science – from resource allocation problems in large networks to online advertising – fundamentally involve the interaction of multiple self-interested parties. Game theory and mechanism design offer a host of models and definitions to reason about such problems. But the flow of ideas also travels in the opposite direction, as research in computer science has complemented the traditional economics literature in several ways. For example, computer science offers a focus on and a language to discuss computational complexity, has popularised the use of approximation guarantees in situations where exact solutions are unrealistic or unknowable, and proposes several alternatives to Bayesian- or average-case analysis that emphasise robust solutions to economic design problems. This course gives an overview over the key ideas and developments of this young research field. The focus is on the various new techniques and methods that have been developed,

and the new insights that they yield.

Topics covered:

- Complexity of equilibria: hardness of computing pure Nash equilibria, poly-time algorithm for correlated equilibria
- Best response dynamics and no-regret learning: existence and speed of convergence
- Tools for bounding the inefficiency of equilibria: price of anarchy, price of stability, the smoothness framework
- Algorithmic mechanism design: the VCG mechanism and its computational complexity, characterization of truthful mechanisms and techniques for obtaining truthful poly-time approximation mechanisms
- Tools for the design and analysis of simple, robust, non-truthful mechanisms
- Posted price mechanisms and prophet inequalities

Teaching: This course is delivered through a combination of classes and lectures totaling a minimum of 30 hours across Lent Term.

Formative coursework: Students will be expected to produce 10 problem sets in the WT.

Written answers to set problems will be expected on a weekly basis.

Indicative reading: 1 Noam Nisan, Tim Roughgarden, Eva Tardos, Vijay V. Vazirani. Algorithmic Game Theory. Cambridge University Press. September 2007.

2 Tim Roughgarden. Twenty Lectures on Algorithmic Game Theory. Cambridge University Press. August 2016.

3 David C. Parkes and Sven Seuken. Introduction to Economics and Computation: A Design Approach. Cambridge University Press. June 2019.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA435 Half Unit Machine Learning in Financial Mathematics

This information is for the 2024/25 session.

Teacher responsible: Dr Ofelia Bonesini

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is not available as an outside option.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Students are expected to have done ST409; students who haven't done ST409 need to obtain permission from the lecturer by providing a statement explaining why and how they know the material covered in ST409. Students are also expected to have a good command of linear algebra and calculus.

Course content: This course introduces a range of computational problems in financial markets and illustrates how they can be addressed by using tools from machine learning. In particular, portfolio optimisation, optimal trade execution, pricing and hedging of financial derivatives and calibration of stochastic volatility models are included. The course considers some theoretical results on machine learning basics such as empirical risk minimisation, bias-complexity tradeoff, model selection and validation as well as more advanced topics such as deep learning, feedforward neural networks, universal approximation theorems, stochastic gradient descent, back propagation, regularisation and different neural network architectures.

Teaching: 20 hours of lectures and 10 hours of seminars in the WT.

This course is delivered through a combination of seminars and lectures totalling to 30 hours across WT.

Formative coursework: The main formative assessment will be in the form of weekly exercise sets, which will be discussed in the seminars. Some of the topics of these will be similar to what is expected in the summative assessment (exam).

Indicative reading:

- M. Dixon, I. Halperin and P. Bilokon. Machine Learning in Finance. Springer, 2020.
- H. Ni, G. Yu, J. Zheng and X. Dong, An Introduction to Machine Learning and Quantitative Finance. World Scientific, 2021.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MA498

Dissertation in Mathematics

This information is for the 2024/25 session.

Teacher responsible: Prof Jozef Skokan

Availability: This course is compulsory on the MSc in Applicable Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The Dissertation in Mathematics is an individual, substantial project as an introduction to mathematical research methods. The student will investigate and study an area of mathematical research or application of advanced mathematical techniques, and to write a report on their findings. The project may include some programming. The dissertation topic will normally be proposed by the Department.

Teaching: A minimum of 15 hours of lectures/seminars across the Autumn and Winter terms. The ratio of lecture time and seminar time varies each week. Seminars do not include personal supervision time, which is scheduled independently with student supervisors.

Several seminars will include presentations by members of the Department of Mathematics on proposed topics for dissertations that they would be interested in supervising. Additional seminars will cover important aspects of writing a dissertation in mathematics, including: what plagiarism is and how to avoid it, the use of libraries for research, electronic research, general aspects of writing mathematics, and preparing a manuscript using mathematical text processing software (in particular, LaTeX). Each student will be assigned a supervisor who will monitor their progress and provide appropriate guidance thorough the WT, ST, and over the summer.

Formative coursework: Students will be expected to produce an initial report (in WT) and an interim report (in ST) for which feedback will be provided.

Indicative reading: Detailed suggestions for reading will be provided by the supervisor.

Assessment: Dissertation (90%) in the WT and ST. Oral examination (10%) in the ST.

Assessment is primarily based entirely on the Dissertation, an electronic copy of which must be submitted by early September (exact date to be specified later). The report may include some software relating to the project. Detailed information about the required format for this submission will be provided during the

Seminars.

At the end of summer term, each student will produce a presentation on the topic of their dissertation. The presentation will be graded and worth 10% of the course grade. Students will be given support in the seminars on how to prepare, how to present and what is expected.

MC401 Half Unit Not available in 2024/25

Mediated Resistance and Activism

This information is for the 2024/25 session.

Teacher responsible: Prof Bart Cammaerts

Availability: This course is available on the MSc in Media and Communications and MSc in Politics and Communication.

This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students are required to prepare a statement of no more than 200 words in response to the following question, which must be submitted when selecting this course on LSE for You: Why are you interested in the intersection of media, communication and activism?

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place

Course content: This course focuses on the various ways in which citizens, activists and social movements use, appropriate and shape media and communication technologies to resist, to mobilise for resistance, but also how resistance and movement discourses are represented and mediated, by activists themselves through movement and social media as well as by the mainstream media. The course will address several aspects of the intricate relationship between media and communication, resistance and activism. The course is organised around the core-concept of the 'mediation opportunity structure' referring to the opportunities for agency through media and communication, as well as the structural constraints preventing agency and stifling dissent. Both Information and Communication Technologies (ICT's) and more traditional media will be considered and a dialectical perspective on power and the relationship between agency and structure is adopted with a particular emphasis on strategies of resistance and circumvention.

At a theoretical level this course is situated at the intersection of social movement theory, political theory and media and communication theory. The different lectures will focus on various aspects of the mediation opportunity structure, including action repertoires, self-mediation practices, mainstream media representations, counter-hegemony, networked opportunities – using examples from various regions in the world. Some case-studies will be situated at a local level of analysis, others at a national, while again others might relate to regional contexts or even transnational levels of contestation.

Seminar discussions revolve around relevant readings as well as case study presentations.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Winter Term. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advanced reading, prepare seminar presentations and submit one essay of 1500 words.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

MC402 Half Unit The Audience in Media and Communications

This information is for the 2024/25 session.

Teacher responsible: Dr Alessandro Castellini

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Culture and Society, MSc in Marketing, MSc in Media and Communications, MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course. Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: This course examines a variety of social, cultural and psychological issues as they relate to the audiences for mass and social media. It analyses people's everyday engagement with a mediated world. We will review the history of audiences and audience research from the vantage point of the present digital age, also examining key theories of audiences' and users' interpretation, engagement, fandom and creativity in a global and cross-media perspective. Students will be encouraged to read widely, to forge links with other aspects of media, communications and cultural studies in order to critically examine the positioning of audiences and users within the field, and to debate the nature and future of audiences in a changing media landscape.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1500 words.

Indicative reading:

- Abercrombie, N. & Longhurst, B. (1998) *Audiences: A Sociological Theory of Performance and Imagination*, Sage.
- Athique, A. (2016) *Transnational Audiences: Media Reception on a Global Scale*. Cambridge: Polity.

Assessment: Essay (100%, 3000 words) in the WT.

MC403 Half Unit Contemporary Issues in Media and Communications Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Damian Tambini

Availability: This course is available on the MSc in Marketing, MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance) and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course will be particularly beneficial to students with some background knowledge of media policy, regulation and governance. You are advised to consult the course teacher if you have not taken MC424, or if you do not have relevant professional experience.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course. Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is accepted onto the course.

Preparation for this course could include reviewing the indicative reading, and auditing MC424 course materials and lectures on Moodle.

Course content: This course examines live issues in internet, broadcasting, press and telecommunications policy with a focus on current debates and an innovative format including practical exercises in policy engagement and guest speakers who are active in media policy. The aim will be to develop a practical approach to current debates at the same time referring to the longer term normative and theoretical background to intervention in this sector. After the first session, discussion will focus on a current issue each week, and the reading contains items relating to that issue. There may be some changes to the order of the sessions depending on availability of guest speakers, and supplementary readings may be advised during seminars or by email. Students will be encouraged to debate current policy issues including those that regulators and the government are currently consulting on, and develop a critical understanding of policy intervention, the policy process and strategy.

Teaching: 30 hours of seminars in the WT.

This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advanced reading, prepare seminar presentations and submit one essay of 1500 words.

Indicative reading: A reading list will be provided for each topic.

General works relevant to the course include:

Assessment: Essay (100%, 3500 words) in the ST.

MC404 Half Unit Political Communication in Democracies

This information is for the 2024/25 session.

Teacher responsible: Dr Nick Anstead

Availability: This course is compulsory on the MSc in Politics and Communication. This course is not available as an outside option.

Pre-requisites: None.

Course content: The aim of the course is to examine the relationship between the media and political processes in comparative perspective. It offers a critical review of key aspects of contemporary theory and research in political communications, examining a range of interconnected issues concerning the relationship between politics and media including: the political influence of the media; the concept of public opinion; the effects of election and referendum campaigning; data-driven political communication; populism and democracy; and public diplomacy in international relations.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare student-led seminars in small groups, and submit one 1500 word essay.

Indicative reading:

- Bennett, W. L. & Segerberg, A. 2012. *The Logic of Connective Action: Digital Media and the Personalization of Contentious*

Politics. Cambridge: Cambridge University Press.

Assessment: Essay (100%, 3000 words) in the WT.

MC407 Half Unit International Media and The Global South

This information is for the 2024/25 session.

Teacher responsible: Professor Shakuntala Banaji

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Inequalities and Social Science, MSc in Media and Communications, MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no formal pre-requisites, but students are required to prepare a statement of no more than 200 words in response to the following question, which must be submitted when selecting this course on LSE for You: Why do you want to take this course?

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: This course offers insight into how to approach the study of media constructions, discourses and representations of, and about, the global south and its citizens. The course challenges students to raise questions about the power and role of international media – including media originating in the global south, and that circulated by NGOs – in shaping discourses about the global south and group identities. Building on empirical examples, the lectures aim to demonstrate that the reporting and representation of gender, poverty, climate change, disasters, political unrest by international media organisations has implications, not only for the way the global south and its diverse populations are imagined and defined, but also for the arena of international and national policy and politics. Using theories of ideology, critical political economy and postcoloniality, the course critically investigates key questions concerning the role of international, national, NGO and subaltern media in colonial and violent relationships of power. The objectives are to: (a) Introduce debates about how media power shapes international development discourses and political realities for citizens in the global south; (b) Provide a postcolonial and Marxist critique of the study of representations of poverty, conflict, gender, participation and the global south; (c) Critically assess aspects of the political economy of international media production within the contexts in which international and local media groups and NGOs research, package and produce information about the world (d) Investigate

whether and in what ways new and mobile technologies, and small and participatory media formats enable alternative voices and critical frameworks from the global south to be engaged through respectful critique. The course is organized into three sections: 1) a historical and theoretical overview of international media and the global south locating the debate(s) around development and communication within postcolonial and other critical frameworks, 2) Critical perspectives, drawn selectively from studies of political economy, postcolonial theory and cultural studies and pertaining to race, identity, ideology, representation, regulatory frameworks, governance and democracy and 3) Cases and practices in reporting disinformation, poverty, inequality and humanitarian issues. Cross-cutting themes will include a consideration of gender, racism, ethnic and social conflict, tourism campaigns, social media and disinformation in the context of international media and change in the global south.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: All students are expected to complete advance reading, contribute to Moodle forums, prepare seminar presentations, and submit one essay of 1500 words.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

MC408 Half Unit

Theories and Concepts in Media and Communications

This information is for the 2024/25 session.

Teacher responsible: Dr Dylan Mulvin

The course will also feature guest lectures covering various topics from the field of media and communications, presented by faculty from the Department of Media and Communications.

Availability: This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications and Society. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MPhil/PhD in Data, Networks and Society, MPhil/PhD in Media and Communications, MSc in Culture and Society, MSc in Gender, Media and Culture and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

If this course is not listed as compulsory on your Programme Regulations, then please note that it is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course.

Students from outside the Department of Media and Communications should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: This course introduces key theoretical and conceptual issues in the study of media and communications, within an interdisciplinary, social science perspective. It grounds the analysis of media and communications in broader theories of social order and social change to better understand the historical, political, economic, and technological significance of media, justice, and a changing society.

This course is the compulsory, theoretical component for all students in the MSc programmes of the Department of Media & Communications. As such, it is oriented towards introducing students with a broad range of academic and professional backgrounds to the core questions and problems in media and communication studies. Accordingly, its topics range from the power of networks and the politics of representation and difference, to the social and economic role of platforms, algorithms, and media ownership, to the changing shape of the public sphere.

As a team-taught course that combines weekly lectures and seminars, its purpose is to expose students to a wide range of research-led debates at an advanced level, and to enable students to develop their understanding and critical appraisal of the relation between media and power.

The course also includes an invited speaker series ('Media in Action Talks') which addresses the interface between academic issues taught on the Media and Communications programmes and professional issues facing media and communications industries. Speakers will normally include a mix of journalists, activists, and executives working for UK and global media companies or in the NGO-sector in London. The purpose is to provide an opportunity for students to relate the topics and themes addressed within their academic studies to the debates and concerns currently facing

practitioners.

Teaching: 15 hours of lectures and 10 hours of seminars in the AT. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1500 words.

Indicative reading: A specialist reading list will be provided for each topic. General reference readings relevant to the course include:

Assessment: Essay (100%, 3000 words) in the WT.

MC409 Half Unit Media, Technology and Everyday Life

This information is for the 2024/25 session.

Teacher responsible: Dr Leslie Haddon

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course. Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: The course aims to explore how information and communication technologies are experienced in everyday life. This includes examining how ICTs are socially shaped, through looking at current theoretical frameworks as well as historical and contemporary examples. The course covers such matters as

the domestication of ICTs, their place in social networks and their implications for time and space. Finally, a range of potential social consequences are considered, from the specific implications for parent-child relationships to broader questions about the extent to which these technologies are changing social life.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading. One essay of 1500 words is recommended.

Indicative reading:

- boyd, d. (2014) *It's complicated. The social lives of networked teenagers*, New Haven: Yale University Press.
- Byam, N. (2015) *Personal communications in a digital age*, Cambridge: Polity. Chapter 2.

- Wajcman, J. (2015) *Pressed for time. The acceleration of life in digital capitalism*, London: University of Chicago Press. Chapter 6, pp.137-62.

Assessment: Essay (100%, 3000 words) in the ST.

MC411 Half Unit Media and Globalisation

This information is for the 2024/25 session.

Teacher responsible: Professor Lee Edwards

Availability: This course is compulsory on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT) and MSc in Global Media and Communications (LSE and USC). This course is not available as an outside option.

Pre-requisites: None.

Course content: The aim of this course is to explore and demonstrate the role of media, communications and technology in processes of globalisation by introducing the relevant literature, by examining various theories of globalisation and by exploring some of the key debates related to media, communication and globalisation. Topics taught include nationalism, the 'dewesternisation' and 'decolonisation' of knowledge production, comparative research, media imperialism, cosmopolitanism and racism.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across Autumn Term. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, participate actively in seminar discussions, carry out seminar presentations and submit one essay of 1500 words.

Indicative reading: A reading list will be provided for each topic. General works relevant to the course include:

- Appadurai, A. (1996). *Modernity at Large: Cultural Dimensions of Globalisation*. Minneapolis, MN: University of Minnesota Press.

- Assessment:** Essay (100%, 3000 words) in the WT.

MC416 Half Unit Representation in the Age of Globalisation

This information is for the 2024/25 session.

Teacher responsible: Dr Yael Gordon

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications and MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course. Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: Images and stories circulated in the media play a central role in informing how we imagine the world, others and ourselves. We become increasingly dependent, often exclusively, on what we see, read and hear in the news, on social media, our favourite television drama series, in advertisements, films, NGO communications or on the radio and podcasts. This course focuses on the way media representations are implicated in the exercise of power over how we think and feel through the construction of meaning. It explores the opportunities that media representations present for the creation of a global and interconnected space, which enables the people living in it to conduct their social, cultural, political and economic lives in more just and inclusive ways. At the same time, the course discusses some of the critical challenges, limits and threats representations circulating in the contemporary media present. The discussion focuses on the representation of the Other and the production of difference, examining two key themes: the representation of gender, and the representation of migration - timely issues which are ever more urgent in contemporary public life. The course examines how transformations in the contemporary media landscape, such as the expansion of social media platforms, the increasing commodification and global scope of communication, shape the ways in which public issues are framed, imaged, and constructed, the consequences this may have for the moral judgements people make and the possibilities for disrupting dominant narratives and imaginaries.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1500 words.

Indicative reading:

- Amin, A. (2012). Land of Strangers, Polity.
- Bauman, Z. (2016). Strangers at Our Door, Polity.

- Pickering, M. (2001). Stereotyping: The Politics of Representation, Palgrave.

Assessment: Essay (100%, 3000 words) in the WT.

MC418 Half Unit Communication: Cultures and Approaches

This information is for the 2024/25 session.

Teacher responsible: Professor Myria Georgiou

The course will also feature guest lectures covering various topics from the field of media and communications, presented by faculty from the Department of Media and Communications.

Availability: This course is compulsory on the MSc in Media and Communications. This course is available on the MPhil/PhD in Data, Networks and Society, MPhil/PhD in Media and Communications, MSc in Gender, Media and Culture, MSc in Media and Communications (Media and Communications Governance) and MSc in Media and Communications (Research). This course is not available as an outside option.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations.

Pre-requisites: There are no pre-requisites for this course.

Students for whom this course is not compulsory should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: This course examines key concepts and critical perspectives on the processes of communication that underpin social, economic and cultural relations across diverse spheres of modern life. It takes an interdisciplinary and theoretical perspective, comparing the claims and contribution of selected key approaches of communication in order to understand and critique the symbolic and material power of communication media. With a substantive focus on the shifts from mass to networked media and from national to globalised communication processes, the course offers a selective introduction to key approaches in communication. It examines a series of critical perspectives, drawing on current research debates in the field of media and communications and beyond. The course is team taught by active researchers in the field of media and communications and aims to enable students to develop their critical understanding of the communication processes central to the contemporary media and communications environment.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit an essay of 1500 words.

Indicative reading:

- Benjamin, R. (2019) Race after Technology. Cambridge: Polity Press.

Assessment: Essay (100%, 3000 words) in the WT.

MC419 Half Unit Modern Campaigning Politics

This information is for the 2024/25 session.

Teacher responsible: Dr Nick Anstead

Availability: This course is available on the MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is highly recommended for MSc in Politics and Communication students.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course. Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: The focus of this module is critical reflection on practical politics, drawing on both academic research and evidence directly from political practitioners. The course is taught by a series of invited guest lecturers who are experts in the field of political campaigning for political parties and NGOs. It will connect with theory taught on other courses in the department and will enable students to see how theory is relevant and applied to the practice of modern political campaigns in the context of the evolving nature of contemporary political communication. It will examine core and general concepts in campaigning including political strategy and how it is developed; the shaping and measurement of public opinion; and the role of NGOs in shaping government policy.

Teaching: 15 hours of lectures and 5 hours of seminars in the AT. To increase the geographic diversity of guest teacher sessions, a limited amount of this content may be delivered online. This course includes a reading week in Week 6 of term.

Formative coursework: This formative coursework for this course is a reduced length version of the summative assessment (see below for further details):

- A 500 word campaign memo advocating a specific strategy for a campaign of your choice (this might be for a candidate, a political party or a campaign / protest group).
- A 1000 word academic reflection on the strategy memo, where you will justify and explain your strategic recommendations with

reference to relevant academic research.

Additionally, students will undertake two other pieces of formative work relevant to course content:

- A short (approximately 200 words) midterm online exercise identifying a key variable which shapes campaigning practices in a particular comparative setting (e.g. electoral system, party system, political culture etc).
- A group end of term presentation where students will offer a campaign pitch for a particular political party / organisation.

Further details of this task will be given in the first lecture of term.

Indicative reading: As this course is largely taught by guest lecturers, a limited number of readings are provided in advance. Instead, reading lists are generated after their lectures in response to the comments they make and questions posed by their arguments.

In terms of indicative reading, there are a variety of items that might be relevant. Classical political texts on the art of politics (e.g., Aristotle On Rhetoric, Machiavelli The Prince, or Weber, Politics as a Vocation) will offer interesting insights. More recently, students might like to consult political memoirs, biographies, and diaries to gain an understanding of how politicians themselves see political strategy.

For a broader overview of political communication literature, students can consult the indicative reading list of MC404, our core course about Political Communication.

Finally, students might like to listen to The Times How To Win an Election podcast, which is organised around a variety of practical political campaigning questions. The three guests on the podcast (Peter Mandelson, Danny Finkelstein and Polly McKenzie) have all spoken to students taking this course in the past. Available from: <https://www.thetimes.co.uk/podcasts/how-to-win-an-election> or your preferred podcast platform.

Assessment: Essay (100%, 3000 words) in the WT.

The summative assessment for this course is a two-part piece of coursework.

- A 1000 word campaign memo advocating a specific strategy for a campaign of your choice (this might be for a candidate, a political party or a campaign / protest group).
- A 2000 word academic reflection on the strategy memo, where you will justify and explain your strategic recommendations with reference to relevant academic research.

NB. One additional requirement of the summative coursework is that it cannot be on the same example used in the formative coursework.

MC420 Half Unit Not available in 2024/25 Identity, Transnationalism and the Media

This information is for the 2024/25 session.

Teacher responsible: Professor Myria Georgiou

Availability: This course is available on the MSc in Culture and Society, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, priority will be given to students who have the course listed on their Programme Regulations.

Pre-requisites: There are no formal pre-requisites, but students are required to prepare a statement of no more than 100 words in response to the following question, which must be submitted when selecting this course on LSE for You: Why would you like to take this course?

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: This course examines the relation between identity and the media in the context of migration and transnationalism. As the world becomes increasingly interconnected – not least as a consequence of technological advances that enable information, people and things to move between places and across distances – questions are raised about the consequences of those changes for identity. More particularly, the course examines

- 1 How those who move, but also those who don't, develop a sense of self in an interconnected, mediated world;
- 2 How digital communication connects or disconnects people within and across space and what those connections mean for collective identities, communities and nations; and
- 3 How mediated communication raises or erases boundaries between people – locally, nationally and transnationally. Engaging with a range of theories, case studies and creative activities, the course invites students to develop a globally oriented and critical understanding of identity, media and transnationalism.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit a 1500 word case study.

Assessment: Essay (100%, 3000 words) in the ST. The essay will be based on a case study of students' choice.

ways in which the concepts of ideology, discourse, orientalism, reflexivity and power can enable a critical understanding of social life, participation and change in the global south. The course also offers a sharp critique of scholarly and policy oriented literature that regards the media, information, and communication strategies, and information and communication technology applications, as obvious direct means of alleviating poverty, improving health outcomes and fostering democracy and human rights in low-income countries. It offers alternative theorisations of the contested way in which developments in these areas become embedded in the cultural and social fabric, especially where injustice, poverty and unequal power relations influence the capacities of individuals to make changes in their lives and communities.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. This course includes one compulsory film screening and discussion in the AT, which lasts 3 hours.

There will be a 1 hour revision lecture in the ST, ahead of the summative assessment.

This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, participate in case studies and discussions on Moodle forums, prepare seminar presentations, organise and attend practitioner seminars and film/documentary viewings and submit one case study of 500 to 1000 words.

MC421 Half Unit

Critical Approaches to Media, Communication and Development

This information is for the 2024/25 session.

Teacher responsible: Professor Shakuntala Banaji

Availability: This course is compulsory on the MSc in Media, Communication and Development. This course is not available as an outside option.

Course content: The content of the course addresses the history of and tensions between 'media for development' and 'communication for development', while challenging mainstream development perspectives on aid, modernisation, and the role of ICTs and media and communication in low income countries and unequal social contexts. It achieves this aim by emphasising the conflictual relationships between economic and political power structures and the empowerment of individuals, as well as among collective groupings within their local and regional contexts. In particular, paying attention to issues of history, colonisation, race and gender, this course questions who constructs knowledge and how knowledge is constructed in modernisation approaches to Media, Communication and Development. It explores the

Assessment: Take-home assessment (100%) in the ST.

This is a seen examination with questions made available to students seven days prior to submission.

MC422 Half Unit

Critical Studies in Media and Journalism

This information is for the 2024/25 session.

Teacher responsible: Dr César Jiménez-Martínez

Availability: This course is available on the MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research) and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, priority will be given to students with the course listed on their Programme Regulations.

Pre-requisites: There are no pre-requisites for this course. Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: The news media is vital not just for the dissemination of information but as a forum for debate. Journalism shapes our individual and community lives. It frames ideological disputes and is a site of contestation. But journalism and the news itself is changing because of technological, social, economic and political forces. This course, led by a media academic with a decade of experience as a journalist, takes an ethical perspective on media change. It asks what impact journalism has, what kind of journalism do we want, and how will journalism reconstruct itself according to competing national, cultural, or political contexts. On completion of this course, students should be able to: understand the role of journalism in society today; critically discuss different theoretical conceptions of journalism as practiced in a wide variety of social and political contexts; compare and contrast the role of journalism in contexts ranging from mainstream to alternative media outlets; evaluate the normative and empirical connections between media journalism, the production of news and ethical considerations; critically assess contemporary debates about the changing nature of journalism and its implications for cultural understanding and democracy.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1500 words.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

MC423 Half Unit

Global Media Industries

This information is for the 2024/25 session.

Teacher responsible: Dr Jungmo Youn

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is not available as an outside option.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course. Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: The main goal of this course is to help students comprehend the theoretical frameworks of media political economy and the critical approaches to the production, circulation, and consumption of global media industries.

Locating an entity of 'global media industries' in the historical process of the capitalistic mode of production, this course reviews a range of theoretical developments and debates in political economy, as coevolved with the field of media political economy. In quest of theoretical frameworks for the global transformation of capital-accumulation, students are encouraged to speculate on the material conditions and mechanisms of the metamorphosis of global media sectors accompanied with the emergences of 'new' media platforms, digital technology, labour processes in the creative industries and intertextual forms of media commodities. This course's format is divided into two blocks. The first block introduces some key theoretical concepts and analytical categories proposed by a variety of theoretical strands of political economy: Lockean concepts of labour and value, Marx's conceptual distinction of labour power, Braverman's labour process and Burowoy's sociological adaptation, the controversy over the form of capitalist state between the Regulation school confining it in the relative autonomy and Institutionalist destined to media ownership, young Hall's bold Althusserian interpretation of Marx's 'capital-circuit' repeated later in his Encoding/Decoding model, and Smythe's sneaky return to mainstream economics and Jhally's attempt to reconcile 'media commodity' with Marxism. The second block, holding a comparative perspective, examines how the locality of media landscape have been articulated with

or responding to the global change of political economy since the Nixon Shock in 1971. Looking at concrete media sectors such as the advertising industry, news production, and film industry in local contexts, students will explore how the global restructuring production-relation reshaped the interface between the global economic demands and the historical particularities determined in local/regional contexts. Students are encouraged to understand how such 'contingent particularities' are actualizing or 'embedding' the historical 'necessity' as resonating with a universal logic of the capitalistic mode of production, and furthermore to attempt to trace the localities back to the uneven primitive accumulation stage in coloniality.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, prepare seminar presentations, and submit one essay of 1500 words.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

MC424 Half Unit Media and Communication Governance

This information is for the 2024/25 session.

Teacher responsible: Dr Seeta Peña Gangadharan

Availability: This course is compulsory on the MSc in Media and Communications (Media and Communications Governance). This course is available on the MPhil/PhD in Data, Networks and Society. This course is not available as an outside option.

Pre-requisites: None.

Course content: This course begins from the assumption that media and communication can only be fully understood if their governance and its implications for citizens and consumers, as well as producers and providers, are understood. Communication governance includes all attempts by public bodies to fund, licence or otherwise regulate or govern communication services or the providers of those services, usually for an alleged public benefit. The term 'governance' refers to the norms, rules and resources together with their theoretical underpinnings that inform the production and consumption of media and communication services. This course provides students with core theoretical perspectives and concepts required to critically analyse both the substance and processes of media and communication governance. Students will compare different rationales used to justify regulation of media and communication services. Students will also develop an understanding of regulatory instruments, institutional arrangements and institutional practices that help public authorities, corporations, citizens and consumers decide how to allocate public resources for the provision of such services. Illustrations are drawn from national and international contexts, thereby presenting a multi-levelled analytical approach to governance issues in the field.

Some of the questions addressed in this course include: Under what conditions should platforms be governed? Are industry professionals or regulators best positioned to determine when broadcasting institutions adequately serve the diverse information needs of a population? To what extent should legacy media laws

and policies be relaxed in the light of technological change? In what ways can 5G providers serve the public interest? These and other questions reflect the course's focus on developing a critical, informed and authoritative account of 'why', 'who', and 'how to' govern media and communication services.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. This course includes a reading week in Week 6 of term.

There will be a 1 hour revision lecture in the ST, ahead of the summative assessment.

Formative coursework: All students are expected to complete advance reading, participate in seminar activities and contribute to online discussion on Moodle. Students are also expected to complete an oral exam in the AT.

Assessment: Take-home assessment (100%) in the ST. This is a take-home examination, and the questions are made available to students up to seven days prior to the due date.

MC425 Half Unit Interpersonal Mediated Communication

This information is for the 2024/25 session.

Teacher responsible: Professor Ellen Helsper

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, priority will be given to students who have the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no formal pre-requisites, but students are required to prepare a statement of no more than 200 words in response to the following question, which must be submitted when selecting this course on LSE for You: Why do you want to take this course, what would you bring to it, and what do you think is the most important issue in Interpersonal Mediated Communication? Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: Communication media have simultaneously been blamed for a breakdown of social relationships and been hailed as powerful social tools that can connect people from all walks of life. This discussion is more important than ever, especially now the COVID 19 pandemic has moved our social lives online in unprecedented ways. The course looks at the impact digitisation might have on relationships and interactions. The aim of this course is to provide students with a critical understanding of mediated communication within small groups and dyadic relationships. It examines the influence of media on three key fields of interpersonal interaction which are identified as personal, social and professional communication. We will study the ways in which interpersonal relationships and communication are influenced by mediation, looking at harassment, discrimination, and social isolation but also at collaboration, connection and mutual understanding.

The first half of the course addresses the history of media in interpersonal communication as well as general interpersonal communication and relationship theories. The second half looks in more detail at how the interaction between media and interpersonal communication has been studied in relation to the cross-cutting themes of privacy/trust, isolation/socialisation and multi-modality. These central concepts of the course are reflected upon through theories of social norms, affordances, social capital and supplementation/substitution, and discussed from the perspective of different disciplinary and methodological paradigms. Application of theory to everyday life, practitioner and policy examples will give students the tools to understand what the practical implications are of the ways in which these different paradigms suggest that interpersonal communication processes vary depending on the type of platform this communication takes place on as well as the type of relationship that is under investigation and the context in which this relationship develops. As a result of the course the students will be able to evaluate the

weaknesses and strengths of the theories that aim to explain apparently contradictory observations about the practise of interpersonal mediated communication. This can be applied to professional areas such as intra-organisational communication, and the design, moderation and regulation of social media and discussion forums.

Teaching: 10 hours of lectures and 20 hours of seminars in the WT.

This course includes a reading week in Week 6 of term.

Formative coursework: This course has a number of formative elements, besides the creation of podcasts and weekly case study work, students create a wiki for each week which they present in class and receive feedback on. Based on the material brought in for the wiki, students write a formative assignment of 1500 words detailing how theories can be applied to a specific case study.

Assessment: Essay (100%, 3000 words) in the ST.

MC426 Half Unit Film Theory and World Cinema

This information is for the 2024/25 session.

Teacher responsible: Professor Shakuntala Banaji

Availability: This course is available on the MSc in Gender (Sexuality), MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Research) and MSc in Media, Communication and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, priority will be given to students who have the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no formal pre-requisites, but students are required to prepare a statement of no more than 200 words in response to the following question, which must be submitted when selecting this course on LSE for You: Why do you want to take this course?

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: This course is designed to enable a consistent, informed and plausible reading of popular film representations, discourses and cultures of consumption in specific geopolitical contexts. Introducing theories from the humanities and the social sciences, lectures offer alternative approaches to theorising sexuality, gender, race, class, religion, national identity, childhood, history and politics in popular commercial films and their interpretation by audiences. The impact of unequal power relations – on how representations are reproduced, spectatorship is theorised and censorship policies are formulated – will be demonstrated and analysed. While the course offers a particular focus on Bollywood, Hindi commercial cinema, as an example of World cinema, it refers more widely to examples from other National Cinemas such as those of China, Korea, Australia, Spain and Iran. A key learning method is the extensive interrogation of audiovisual materials. To this end, there will be five film screenings and accompanying discussions alongside the lectures and seminars. Additionally, films referred to on the course will be made available through the library or can be downloaded and watched from popular film sites on the internet.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. This course includes five compulsory film screening and discussion sessions in the AT, each of which lasts 3 hours. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, participate in Moodle forums, present in seminar discussions, attend five film screenings and submit one essay of 1500 words.

Assessment: Essay (100%, 3000 words) in the WT.

MC427 Half Unit Digital Media Futures

This information is for the 2024/25 session.

Teacher responsible: Dr Alison Powell

Availability: This course is available on the MSc in Media and Communications, MSc in Media and Communications (Data and Society) and MSc in Media and Communications (Research). This course is available as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course. Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: This course provides an historical, theoretical and methodological basis through which to assess the social and cultural transformations related to digital media infrastructures and related social practices. It focuses on the materiality and affordances of new media, as well as on the social transformations that have co-evolved, focusing on emerging media of the past, present and future. It critiques and questions the assumptions about the transformation of social and cultural life but also attempts to help students develop conceptual strategies beyond critique. Conceptual approaches draw from materialist studies of media and communication, as well as science and technology studies. Topics include but are not limited to: alternative and activist media and futures, the political economy and ecology of digital media, the politics of algorithms, remembering and forgetting, the anthropocene, artificial intelligence, data and AI ethics.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. This course includes a reading week in Week 6 of term.

Formative coursework: Students will complete a 1500 word formative essay or creative proposal. They will also receive formative feedback on class participation and on a formative assignment.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the WT.

MC428 Half Unit

Media Culture and Neoliberalism in the Global South

This information is for the 2024/25 session.

Teacher responsible: Dr Wendy Willems

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media, Communication and Development and MSc in Politics and Communication.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course. Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: This course offers a comparative perspective on changing media culture in the Global South in the context of the neoliberal turn. The course not only considers neoliberalism as a crucial factor that has brought media industries such as private broadcasting stations, mobile phone companies and digital platforms into existence but also examines the extent to which these new forms of media and technology have played a role in reproducing neoliberalism as a process. It provides an understanding of how shifting economic policy regimes have impacted on the way in which people engage with media and technology, and how media and technology engage with people in the Global South. The first part of the course introduces the key concepts of 'media culture', 'neoliberalism' and 'Global South' which will be deployed throughout the course. The second part of the course discusses how key processes of social change in the Global South are linked to changing media culture, including the commodification of national imaginaries, informality, crime and the rising middle class, religion and the prosperity gospel, self-help media and the neoliberal subject, and mobility and social relations. The course examines these themes through a series of empirically-grounded, mostly ethnographic case studies. The course encourages students to critically question, assess and evaluate the extent to which the three key concepts in the course are helpful in gaining an understanding of changing media culture in the Global South.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

This course includes a reading week in Week 6 of term.

Formative coursework: Students will complete a formative 1500 word essay based on a case study.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

MC429 Half Unit

Humanitarian Communication: Realities, Challenges and Critiques

This information is for the 2024/25 session.

Teacher responsible: Dr Suzanne Temwa Gondwe Harris

Contributor: Professor Lilie Chouliaraki

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media, Communication and Development and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, priority will be given to students who have the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course. Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: In this course, we explore the changing practices of humanitarian communication in the 21st century by addressing questions such as: What are the histories of humanitarian communication? How is it changing today and why? What are the tensions and dilemmas that organizations face as they struggle to communicate the plight of distant others? What kind of politics of visibility and voice is played out in humanitarian communication? What are the ideological and ethical positions informing and informed by the digital narratives and spectacles of vulnerable others - and how do these change when 'others' speak for themselves? And finally, what are the challenges of 21st century humanitarian communication and can we do it better? Today more than ever, images and narratives of vulnerable people in zones of poverty, disaster, violence and conflict routinely populate our everyday lives. They are produced by a wide range of organisations and individuals, and appear on a wide range of platforms, including NGO websites, news networks, social media and celebrity

advocacy.

To explore these issues, students will work with case studies to debate the theoretical principle and empirical realities of humanitarian communication, its contemporary power relations, and the tensions and complexities that underpin its practices and effects.

Teaching: 30 hours of seminars in the WT.

Formative coursework: All students are expected to complete advance reading, and to prepare and deliver a short presentation.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

MC430 Half Unit

Data in Communication and Society

This information is for the 2024/25 session.

Teacher responsible: Dr Alison Powell

Availability: This course is compulsory on the MSc in Media and Communications (Data and Society). This course is available on the MPhil/PhD in Data, Networks and Society. This course is not available as an outside option.

Course content: This course investigates the significance of data in communications, social and cultural life. It introduces core theoretical perspectives on data and information from a social scientific perspective, and outlines research approaches that take account of the contemporary influence of data within communication and society. The course begins with the social history of data, providing a strong baseline from which to analyse the contemporary position of data. The course will provide students with conceptual tools that will help unpack the logic of

data, and train them to critically analyse phenomena such as big data, algorithmic regulation and augmented civic space. Its focus on contemporary issues allows an investigation of the politics and culture of data production, and the use of data as evidence in a range of fields including politics, advocacy and audience research. Some of the questions addressed through the course include: Who owns data? Who makes data? Who makes sense of data? Is data public or private? How do different actors get access to data? How is data protected and regulated? What ethical and governance questions pertain to the study of data as a socio-technical assemblage? These and other questions reflect the course's focus on developing a critical account of how data is implicated in the structures that shape social life.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. This course includes a reading week in Week 6 of term.

Formative coursework: Students will be expected to produce a presentation (group project, student-led session) in the AT, along with written formative coursework. There are two options for written formative coursework on this course. Students can choose to submit either a 1500 word essay; or a 1000 word proposal for case analysis and recommendation

Indicative reading:

- Beer, D., & Burrows, R. (2013). Popular culture, digital archives and the new social life of data. *Theory, Culture & Society* 30(4), 47-71.
- Boyd, D., & Crawford, K. (2012). Critical questions for Big Data: Provocations for a cultural, technological, and scholarly phenomenon. *Information, Communication & Society* 15(5), 662-679.

- Vaidhyanathan, S. (2006). Afterword: Critical Information Studies: A Bibliographic Manifesto. *Cultural Studies* 20(2-3): 292-315.

Assessment: Assessment path 1

Essay (100%, 3000 words) in the WT.

Assessment path 2

Project (100%, 3000 words) in the WT.

The project comprises of a case analysis and recommendation:

1 Description of case

2 Analysis

3 Recommendations

4 Theoretical and normative contextualization

Case study analysis and recommendation: Students choose a current data-related product, service or use case, providing an analysis of how data are theoretically constructed, valued, managed and conceived within the project, using relevant theoretical material. The case study must identify an area of ethics, governance or social justice that this product, service or use case could improve, and provide a concrete set of recommendations, grounded in the existing theoretical, historical and empirical literature. This analysis and recommendation will be accompanied by a critical reflection that highlights the theoretical and normative aspects of the case, your analysis and your recommendation. This section should be grounded in the relevant theoretical material.

MC431 Half Unit

Critical Approaches to Strategic Communications

This information is for the 2024/25 session.

Teacher responsible: Professor Lee Edwards

Availability: This course is compulsory on the MSc in Strategic Communications and Society. This course is not available as an outside option.

Course content: This course provides an advanced understanding of theoretical knowledge in the field of media and communication as it relates to strategic communications and the key promotional industries of advertising, branding and public relations. The focus is on the role, scope and activities of strategic communications in contemporary societies and in the context of globalisation and the digital age. Topics cover the context, practices and challenges of strategic communications, and are likely to include: the advance of promotional culture in and across public, political, non-profit and corporate institutions; professional structures and identities of the strategic communications industries; discourses of strategic communications, including reputation and relationship management; technologies of strategic communications; strategic communications and inequalities (gender, 'race', class); and the ethics of strategic communications.

Teaching: 30 hours of seminars in the AT.

This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to submit one essay of 1500 words.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the WT.

MC432 Half Unit

Strategic Communication in Practice: Professional Perspectives

This information is for the 2024/25 session.

Teacher responsible: Dr César Jiménez-Martínez

Availability: This course is available on the MSc in Media and Communications, MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is

oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course.

Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: This course focuses on the intersection between academic research and the practice of strategic communications, paying particular attention to the relationship between brands and individual and collective identities. The module aims to connect academic discussions with professional perspectives through a mix of lectures, seminar exercises and guest speakers, in order to facilitate a cross-fertilisation between scholarly research, public debates and professional experiences.

The academic lectures will examine discussions about the significance of branding in society, the relationship of brands with different understandings of identity, as well as an overview of professional models employed in the practice of branding and strategic communications. Students will be expected to critically engage with ideas from both theory and practice in the seminars, developing reflexivity and analytical skills through the course, as well as getting an idea of how brands are developed in practice. Academic lectures will be complemented with guest talks from industry practitioners working in various forms of branding and strategic communications.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. This course includes a reading week in Week 6 of term.

Formative coursework: Students will be expected to produce 1 presentation in the AT.

Indicative reading:

- Aaker, D. (2010) Building Strong Brands.. London: Simon & Schuster.

- Sobande, F. (2024) Big Brands Are Watching You: Marketing Social Justice and Digital Culture. Oakland: University of California Press.
- Wernick, A. (1991) Promotional Culture: Advertising, Ideology and Symbolic Expression. London: Sage.

Assessment: Project (100%, 5000 words) in the WT.

The summative assessment is a group campaign plan and critical essay, delivered by students working in pairs.

MC433 Half Unit Not available in 2024/25 Technology and Justice

This information is for the 2024/25 session.

Teacher responsible: Dr Seeta Peña Gangadharan

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Inequalities and Social Science, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, priority will be given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no formal pre-requisites, but students are required to prepare a statement of no more than 200 words in response to the following question, which must be submitted when selecting this course on LSE for You: What, if any, past experiences (professional, scholarly, or otherwise) have shaped your interest in technology and justice, and how do you define justice?

Prior to the first session, students must also view a recorded lecture and complete select readings.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: This course addresses questions of justice and inequity in relation to communication technologies of the 20th and 21st centuries. It begins with two premises: 1) communication technologies are critical in shaping the conditions for individual and collective self-government, and 2) policies that regulate such technologies influence the nature of democracy and inclusion in society today. The course engages historical perspectives, normative theories of justice and democracy, and legal theories of technology and innovation to assess the power of communication technologies and consider their costs and benefits to historically marginalized groups. In so doing, this course questions the adequacy of regulation in the development and deployment of technologies which exacerbate existing social, political, and economic divides, on the one hand, or address or alleviate such divides, on the other. The course will primarily focus on histories and contexts of marginalized groups in the United States and the Global South.

The first part of the course will introduce students to the theoretical and historical frameworks for the course and concentrate on mass communication technologies of the 20th century, such as print and broadcasting, and policy debates highlighting issues of justice and inequity. The second part of the course will centre on digital communication technologies in the late 20th and early 21st centuries and examine the intersection between networked communication, justice, and rights in historically marginalized communities. The third part will investigate innovations in automated technologies with respect to redistribution and recognition, issues core to the notion of social justice. By the end of the course, students will be able to evaluate differences between justice-based and rights-based approaches, explore the nature of digital inclusion, and compare the nature of communication inequalities across technologies.

Teaching: 30 hours of seminars in the AT.

This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, view and respond to interactive lectures, participate in seminar activities, and contribute to online discussion. Students are also expected to produce one piece of coursework, which consists of short answers to four essay

questions. Questions will be made available to students up to seven days prior to the due date.

Assessment: Presentation (30%) in the AT.

Essay (70%, 2400 words) in the WT.

MC434 Half Unit

Digital Platforms and Media Infrastructures

This information is for the 2024/25 session.

Teacher responsible: Dr Jean-Christophe Plantin

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research) and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course.

Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: While US-based Tech giants (Google, Amazon, Facebook, Apple, Microsoft) are still studied as digital platforms, they now constitute major operators of the internet networking infrastructure, as witnessed by their involvement since early 2010s in four sectors: data centers, undersea cables, telecommunications networks, and cell tower. This course will study this radical extension of platform power over the internet architecture, uses, and governance. It will demonstrate that tech giants become dominant actors in these four infrastructural sectors by using the platform strategy that granted them their initial success, and by adapting it from the web economy to infrastructure management. The course presents key readings in media & communications and sciences & technology studies to analyse contemporary instances of digital media platforms. Students will explore the multiple facets of the increasing power of internet companies by critically analysing how they replace, conflict with, or influence existing infrastructures, and what are the social, political and epistemological consequences of these tensions. This focus on the relations between existing and emerging media configurations will invite students to investigate how platforms constitute ubiquitous media in everyday life, and how they increasingly shape communication, knowledge production, circulation of data, online participation and mobility.

The first part of the course will introduce the theoretical framework, blending together platform studies (coming from media & communication studies, political economy, management) with infrastructure studies (coming from history, information science, sciences & technology studies). The second part illustrates these interactions through four case studies that see tech giants taking over the existing infrastructure for global connectivity: data centers, undersea cables, telecommunications networks, and cell tower. The third part addresses current social debates around the platformization of the internet infrastructure, e.g. in terms of global access to internet, tension between states and sovereignty, and governance and regulation.

At the end of the course, students will be able to critically assess the increasing power that tech giants have over the global infrastructure for connectivity, and to discuss the challenges this process brings in terms of access to communication, knowledge and democratic life.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to submit either a 1500 word formative essay on current theoretical debates around platforms, infrastructure, and society; or a 1500 word formative proposal for a case study analysis of a digital platform.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the WT.

MC436 Half Unit

Mediating the Past

This information is for the 2024/25 session.

Teacher responsible: Dr Omar Al-Ghazzi

Availability: This course is available on the MA in Modern History, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, priority will be given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no formal pre-requisites, but students are required to prepare a statement of no more than 200 words in response to the following question, which must be submitted when selecting this course on LSE for You: Briefly explain what you hope to learn from the "Mediating the Past" course.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: This course starts with the premise that understandings and imaginings of the past and the future are socially constructed, mediated, and shaped by power relations within the present. It critically explores cultural, political and technological issues in relation to the passage of time. It addresses questions such as: How do we learn about history through media and why does that matter? How do power relations, historically, and at present, shape experiences of time? How do different media technologies and conventions represent and structure collective notions about time whether in relation to the present, the past or the future? In addressing these questions, this course centres temporality in the study of media and communication studies. It introduces students to the field of collective memory, differentiating it from history and historiography. It focuses on critical issues within the mediated politics of temporality, such as colonialism/postcolonialism, nationalism, authoritarianism, activism, environmentalism, and

the witnessing of war. By the end of the course, students will be able to identify key debates in the study of time and temporality, particularly as approached from the interdisciplinary perspective of communications and media studies.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT. This course includes a reading week in Week 6 of term.

Formative coursework: Students will be expected to produce one research proposal.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the ST.

MC437 Half Unit Media, Data and Social Order

This information is for the 2024/25 session.

Teacher responsible: Professor Nick Couldry

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Politics and Communication and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, priority will be given to students who have the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a

place on this course.

Pre-requisites: There are no formal pre-requisites, but students are required to prepare a statement of no more than 200 words in response to the following question, which must be submitted when selecting this course on LSE for You: Why do you want to take this course and what experience will you bring to it?

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: Visions of contemporary society and its reliance on data processes are highly polarised: do they represent the end of freedom under a regime of continuous surveillance or the freeing up of an extended group mind through awesome computing power? Today's starkly opposed visions of media's contribution to social order have however a much longer history which we must grasp if today's transformations are to be understood. Since the 19th century, technologies for mediated communication have developed in increasingly institutionalised forms. Those forms – from the traditional mass media (the press, radio, television) to contemporary media and information infrastructures – have played important roles in the organization of everyday life, and have been imagined to play a central role in the 'order' of society, even of the world. But do today's digital platforms for social interaction (including 'social media' but also many other AI-driven platforms), and the data processes that underlie those platforms (the process sometimes called datafication), create a completely different type of social order from in the past? How is that order being constructed, and what are its implications for social life?

This course offers a primarily sociological, but also interdisciplinary, exploration of how a social order is being constructed in the era of social platforms and large-scale data-collection, and the social –indeed ethical – challenges to which the new 'datafied' social order is giving rise. The course is structured into two main parts. After the introductory lecture, Lectures two to five will explore alternative entry-points for analysing this social order, via transformations of social space, the creation of social relations, the creations of new forms of meaning via algorithms, and macro-theories of the emerging order. Lectures six to nine will apply these theoretical insights to the expanding uses of data in four areas of daily life: social justice, personalized marketing, surveillance (at work and at home), and the formation of individual subjects (in education and through self-tracking). The concluding lecture will draw together the course's themes with a particular focus on the normative implications of the datafied social order, with particular reference to the questions of autonomy, surveillance and data extraction.

The course will be aimed at all MSc students interested in acquiring a broad social-theoretical understanding of the role that media institutions play in ordering contemporary societies and developing their own critical perspective on whether media and datafication, as processes do, or do not, overall enhance human life, especially its social and ethical dimensions.

Teaching: 15 hours of lectures and 10 hours of seminars in the WT. This course includes a reading week in Week 6 of term.

Formative coursework: Students will be given the option of choosing one of two alternative pieces of formative coursework in preparation for the summative essay. Students can submit either (1) a short essay on a theoretical approach to understanding data's role in social order (1200-1500 words); or (2) a short reflection: students should choose a short (200 word maximum) text of theory or business discourse, and then reflect on that text's implications for a data practice of their choice (1200-1500 words).

Indicative reading:

 - Trow, Joseph (2017) *The Aisles Have Eyes*. Yale University Press.
 - Van Dijck, Jose (2013) *The Culture of Connectivity*. Oxford: Oxford University Press.

Assessment: Essay (100%, 4000 words) in the ST.

Students will submit one piece of written work for the summative assessment: a 4000 word essay on questions set by the course convenor in which students will bring together theoretical discussion with the consideration of specific data practices.

MC438 Half Unit Mediated Feminisms

This information is for the 2024/25 session.

Teacher responsible: Dr Simidele Dosekun

Availability: This course is available on the MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course.

Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is accepted onto the course.

Course content: Media have been crucial to feminist politics across the globe, from 19th century pamphlets to early television representations to 90s zine culture to the multitude of hashtag feminisms in contemporary social media. This course explores the ways that feminisms in both the Global South and North are enacted through and represented on a variety of media platforms, from print to digital. Topics we will consider include: mainstream and alternative feminist media productions; the meanings and politics of feminist visibility and even popularity; feminist uses of the body as a medium of activism and communication; and mediated reactions to feminisms, including misogynist and sexist ones. The course draws on theories from cultural and media studies, creative industry studies, film studies and gender studies, and throughout we will take an intersectional and transnational approach, thinking of and across multiple forms and sites of 'difference.' The course is intended for MSc students interested in acquiring a broad cultural-theoretical understanding of the role that media play in defining feminisms for broad audiences, as well as those who are interested in feminist media productions across history.

Teaching: 15 hours of lectures and 10 hours of seminars in the WT.

This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to complete advance reading, participate actively in seminar discussions and submit one essay of 1500 words.

Indicative reading:

- Ahmed, S. (2016). *Living a Feminist Life*. Durham: Duke University Press.
- Al-Rawi, A. 2020. *Women's Activism and New Media in the Arab World*. Albany: State University of New York Press.

Assessment: Essay (100%, 3000 words) in the ST.

MC439 Half Unit Not available in 2024/25 Media, Technology, and the Body

This information is for the 2024/25 session.

Teacher responsible: Dr Dylan Mulvin

Availability: This course is available on the MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Research), MSc in Media, Communication and Development and MSc in Politics and Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course.

Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is accepted onto the course.

Course content: Every day we re-encounter our bodies through the mediations of technology. A sleep tracking app tells you about your bad night's sleep; your phone tells you which Underground stations are "step-free" but doesn't know about the broken lift at Victoria station, and it doesn't know about your knee pain; in the mail you receive some DNA results from a popular ancestry website (it's not the one that partners with drug companies; but it is the one that partners with law enforcement); your job, your university, and your grocery store ask you to select a race and a gender every time you fill out a form; on your way home your noise-cancelling headphones run out of battery; and adding insult to injury your phone tells you your "screen time" has increased 8% since last week. This class is prompted by such moments, by asking how sites of conflict and breakdown can illuminate the ways our bodies are understood, tested, and reconfigured through technology. Beginning with the assumption that there is no single, stable understanding of "the normal human body," this course introduces a wide range of interdisciplinary theories to interrogate human bodies and their relationships to technology. From the measurement of perception, to the micro-analysis of bodily gestures, to the surveillance of bodily functions, to the representation and coding of race, gender, and sexuality, media and

communication studies has long interrogated the technologization of human bodies.

In addition to key readings from our field, this course also introduces students to the encounter of body–technology problems from the perspective of science and technology studies, disability studies, surveillance studies, feminist and queer theory, critical design studies, and the history of technology. Through these theories and debates, we will familiarise ourselves with approaches for documenting, describing, and analysing how notions of human bodily similarity and difference are encoded and hardwired in the technologies, media, and environments of everyday life.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT. This course includes a reading week in Week 6 of term.

Formative coursework: The formative coursework includes a two-part mapping exercise:

1 Individual students will catalogue sites of conflict and friction between bodies and technologies. They will mark the site on a map and include 500-800 words describing the site and the conflict it produces. The compilation of these sites will serve as a shared database of techno-bodily conflict;

2 Students will outline how these sites could become research prompts for a larger project and annotate three potential sources to analyse a single site. Annotations should total between 300 and 500 words.

3 Participation will be measured based on the completeness of the above.

Assessment: Essay (90%, 3000 words) in the ST. Class participation (10%) in the WT.

MC440 Half Unit Children, Youth and Media

This information is for the 2024/25 session.

Teacher responsible: Professor Sonia Livingstone

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in

Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is 'controlled access', meaning that there is a limit to the number of students who can be accepted. If the course is oversubscribed, offers will be made via a random ballot process, with priority given to students with the course listed on their Programme Regulations. Whilst we do our best to accommodate all requests, we cannot guarantee you a place on this course.

Pre-requisites: There are no pre-requisites for this course. Students should apply via LSE for You without submitting a statement.

Please do not email the teacher with personal expressions of interest as these are not required and do not influence who is offered a place.

Course content: In a mediated world, children and young people are subject to considerable hopes and fears from experts, policymakers and the public. Further, children and young people have attracted a considerable multidisciplinary and increasingly global body of research examining their diverse and changing relations with media – especially digital media. This course will critically examine the debates surrounding children, youth and media through the lens of key theories, including moral panics, children's rights, mediation and mediatization, media effects, child development and socio-cultural approaches. Each year, we will apply these theories, along with relevant evidence, to topical issues relating to childhood and youth – for example, digital play, parental mediation, screen time, online risks and mental health, social media and wellbeing, datafication and digital literacies. The course will also recognise how historical and multidisciplinary perspectives on childhood and youth have been constructed with and through media.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT. This course includes a reading week in Week 6 of term.

Formative coursework: All students are expected to submit one formative essay of 1,500 words in the Winter Term.

Indicative reading:

- Banaji, S. (2017). *Children and Media in India: Narratives of class, agency and social change*. Routledge.
- Buckingham, D., Bragg, S., and Kehily, M.J. (2014) (Eds.) *Youth Cultures in the Age of Global Media*. Palgrave Macmillan.
- Gee, E., Takeuchi, L., and Wartella, E. (2018). *Children and Families in the Digital Age: Learning together in a media saturated culture*. Routledge.

- Third, A., Collin, P., Walsh, L. and Black, R. (2019). *Control Shift: Young people in digital society*. Palgrave Macmillan.

Assessment: Essay (100%, 3000 words) in the ST.

MC499 Dissertation: Media and Communications

This information is for the 2024/25 session.

Teacher responsible: Dr Simidele Dosekun will convene the teaching and organisation of this course, and will oversee allocation of dissertation supervisors (one per student).

Availability: This course is compulsory on the MSc in Global

Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications and Society. This course is not available as an outside option.

Course content: The aim of this dissertation is for students to pursue an independent piece of research within the field of media and communications following the guidelines provided in the Department's dissertation guide and the instructions of academic staff. The dissertation is usually a combination of theoretical enquiry and original empirical enquiry concerning an issue in the field of media and communications. On rare occasions it is based on a theoretical interrogation. Students are encouraged to select a topic that reflects the content of their MSc programme. In all cases, students must obtain the approval of their dissertation supervisor before embarking on any research.

Teaching: This course will be delivered through a combination of lectures, workshops and one-to-one supervision sessions. Dissertation supervisors will be allocated at the end of AT, with one-to-one supervision sessions taking place in WT and ST.

Formative coursework: Students are required to submit an ethics review, literature review and dissertation plan to their dissertation supervisor.

Indicative reading: As the dissertation is an independent project, students will curate their own reading list based on their research interests, with guidance from their dissertation supervisor and other academic staff. Practical strategies for dissertation development and writing will also be provided throughout the course.

Assessment: Dissertation (100%, 12000 words) in August. The dissertation must be no less than 10,000 words and no more than 12,000 words in length.

MC4M1 Half Unit

Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

This information is for the 2024/25 session.

Teacher responsible: Dr Rachel O'Neill

Availability: This course is available on the MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications and Society. This course is not available as an outside option.

Course content: This course aims to provide students with methodological grounding in media and communications. It comprises two interrelated elements, which are as follows:

1 Critical Data Literacy for Media and Communications (MY464): As part of MC4M1, students take MY464 in the Methodology Department in Autumn Term. This course is compulsory and automatically included within the MC4M1 course code; no separate registration is necessary. Summative assessment for MY464 takes the form of an exam and is weighted at 20% of the overall grade for MC4M1. Basic information about this course is included below, while full details can be found via the MY464 course page.

2 Research in Media and Communications: Principles and Practice: This is the main component of the course, taught 'in

house' in the Department of Media and Communications in Winter Term. Teaching for this component of the course comprises a combination of lectures (1 hour each x 2 weeks) and workshops (2 hours each x 8 weeks). Summative assessment takes the form of an essay and is weighted at 80% of the overall grade for MC4M1. The general remit for this main component of MC4M1 is as follows: Lectures will afford insight into what we research as well as how, why, and with what implications, while workshops offer practical instruction in several methods commonly deployed in our field, including interviews, surveys, textual analysis and more. Recognising the interdisciplinary character of media and communications research, course content will draw from this arena as well as disciplines such as sociology, cultural studies, linguistics, psychology, and anthropology. The integral links between theory and method will be underscored, as will crucial issues of ethics and reflexivity. Support will be provided in the development of key skills, from crafting a research question through to study design and methods writing.

Teaching: MC4M1, which includes MY464 within it, is delivered across 33 hours throughout the AT and WT. There is a Reading Week in Week 6 of each term.

1 Critical Data Literacy for Media and Communications (MY464): Delivered through a combination of seminars and lectures totalling 15 hours in the AT.

2 Research in Media and Communications: Principles and Practice: Delivered through 2 lectures and 8 workshops totalling 18 hours in the WT.

Formative coursework: 1 Critical Data Literacy for Media and Communications (MY464): Self-guided practical exercises and readings to be completed before seminars for discussion, and Moodle (online) quizzes to support learning.

2 Research in Media and Communications: Principles and Practice: One essay of 1500 words, to be submitted to the dissertation supervisor.

Indicative reading:

- Braun, V & Clarke, V. (2022). *Thematic Analysis: A Practical Guide*. London: SAGE.
- Brennen, B. S. (2017). *Qualitative Research Methods of Media Studies*. New York: Routledge.

- Vasquez, C. (2022) *Research Methods in Digital Discourse Analysis*. London: Bloomsbury.
- Yates, S., Wetherell, M. & Taylor, S. (2001). *Discourse as Data: A Guide for Analysis*. London: SAGE.

Assessment: Exam (20%, duration: 2 hours) in the January exam period.

Essay (80%, 3000 words) in the ST.

1 Critical Data Literacy for Media and Communications (MY464):

Exam (20% of overall mark for the course, duration: 2 hours) in the January exam period.

2 Research in Media and Communications: Principles and Practice:

Essay (80% of overall mark for the course, 3000 words) due in Spring Term.

MC4M2

Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

This information is for the 2024/25 session.

Teacher responsible: Professor Ellen Helsper

Availability: This course is compulsory on the MSc in Media and Communications (Research). This course is not available as an outside option.

Pre-requisites: Students who wish to take this course instead of MC4M1 must discuss their suitability with the course convenor before requesting a place. They will also be required to take a test to demonstrate sufficient knowledge of quantitative methods and statistics.

Course content: This course aims to provide students with methodological grounding in media and communications. Harvard style seminars combine insight into epistemology and ontology of academic research, alongside practical instruction in several methods commonly deployed in our field, including interviews, surveys, textual analysis and more. Recognising the interdisciplinary character of media and communications research, course content will draw from this arena as well as disciplines such as computer science, sociology, cultural studies, linguistics, psychology, and anthropology. The integral links between theory and method will be underscored, as will crucial issues of ethics and reflexivity. Support will be provided in the development of key skills, from crafting a research question through to study design and methods writing.

Please note, MC4M2 includes within it MY465: Intermediate Quantitative Analysis. This is a compulsory element and automatically included within the MC4M2 course code; no separate registration is necessary. Full details about this course, including structure, content, and assessment, can be found via the MY465 course page.

Teaching: This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 50 hours across the AT and the WT. This course includes a reading week in Week 6 of term.

1. **Advanced Principles of Social Research:** A series of ten two-hour Harvard style student assisted seminars led by media and communications faculty in the WT. Students are required to participate in all ten workshops.

2. **Intermediate Quantitative Analysis: Intermediate Quantitative Analysis:** Students take MY465 Intermediate Quantitative Analysis delivered through a combination of classes and lectures totalling a minimum of 30 hours across the AT. This course is compulsory and automatically included when students register for MC4M2.

Formative coursework: 1 Advanced Principles of Social Research:

All students are expected to complete advance readings and weekly assignments, and help prepare one seminar. Students submit one essay of 1500 words after reading week

2 **Intermediate Quantitative Analysis:** Self-guided computer exercises implementing statistics covered in the lectures with weekly online homework on the material covered in the lectures and exercises.

Indicative reading:

• Braun, V & Clarke, V. (2022). *Thematic Analysis: A Practical Guide*. London: SAGE.

- Brennen, B. S. (2017). *Qualitative Research Methods of Media Studies*. New York: Routledge.
- Couldry, N. (2000). *Inside Culture: Re-Imagining the Method of Cultural Studies*. London: SAGE.
- Costa, E., Lange, P. G., Haynes, N. & Sinanan, J. (2022). *The Routledge Handbook to Media Anthropology*. London: Routledge.
- Hansen, A & Machin, D. (2018). *Media and Communication Research Methods*. London: Springer.
- Jeppesen, S. & Sartoretto, S. (2020). *Media Activist Research Ethics: Global Approaches to Negotiating Power in Social Justice Research*. Cham, Switzerland: Palgrave.
- Jøregensen, M. & Phillips, L. (2002). *Discourse Analysis as Theory and Method*. London: Sage Publications.
- Kubitscho, S. & Kraun, A., eds. *Innovative Methods in Media and Communication Research*. Cham, Switzerland: Palgrave.
- Mason, J. (2018). *Qualitative Researching*. 3rd edition. London: SAGE.
- Miller, T. Birch, M. Mauthner, M & Jessop, J. (2014). *Ethics in Qualitative Research*. London: SAGE.

Assessment: Exam (20%, duration: 2 hours) in the January exam period.

Assignment (80%) in the ST.

1. **Coursework:** One written assignment of not more than 5000 words to be submitted in the ST (80%).

2. **One assessment relating to Intermediate Quantitative**

Analysis: One exam in the January exam period for MY465 (see Methodology Department course guides) (20%).

MC4M7 Half Unit

Methods of Research in Media & Communications (including Qualitative Analysis & Applied Regression Analysis)

This information is for the 2024/25 session.

Teacher responsible: Professor Ellen Helsper

Availability: This course is available on the MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications and Society. This course is not available as an outside option.

Pre-requisites: Students who wish to take this course instead of MC4M1 must discuss their suitability with the course convenor (see 'teacher responsible' above) before requesting a place. They will also be required to take a test to demonstrate sufficient knowledge of quantitative methods and statistics.

Course content: This course aims to provide students with methodological grounding in media and communications. It comprises two interrelated elements, which are as follows:

1 **Applied Regression Analysis (MY452A):** As part of MC4M7, students take MY452A Applied Regression Analysis taught by the Department of Methodology in the AT. This course is compulsory and automatically included within the MC4M7 course code; no separate registration is necessary. Summative assessment for MY452A takes the form of an exam and is weighted at 20% of the overall grade for MC4M7. Basic information about this course is included below, while full details can be found via the MY452A course guide page.

2 **Research in Media and Communications: Principles and Practice:**

This is the main component of the course, taught 'in house' in the Department of Media and Communications in Winter Term. Teaching for this component of the course comprises a combination of lectures (1 hour each x 2 weeks) and workshops (2 hours each x 8 weeks). Summative assessment takes the form of an essay and is weighted at 80% of the overall grade for

MC4M7. The general remit for this main component of MC4M7 is as follows:

Lectures will afford insight into what we research as well as how, why, and with what implications, while workshops offer practical instruction in several methods commonly deployed in our field, including interviews, surveys, textual analysis and more. Recognising the interdisciplinary character of media and communications research, course content will draw from this arena as well as disciplines such as sociology, cultural studies, linguistics, psychology, and anthropology. The integral links between theory and method will be underscored, as will crucial issues of ethics and reflexivity. Support will be provided in the development of key skills, from crafting a research question through to study design and methods writing.

Teaching: MC4M7, which includes MY452A within it, is delivered across 38 hours throughout the AT and WT.

1 Applied Regression Analysis (MY452A): Delivered through a combination of classes and lectures totalling a minimum of 20 hours in the AT.

2 Research in Media and Communications: Principles and Practice: 160 Delivered through 160a combination of lectures (1 hour each x 2 weeks) and workshops (2 hours each x 8 weeks).

There is a Reading Week in Week 6 of each term.

Formative coursework: 1 **Applied Regression Analysis** (MY452A):

Most statistics courses require weekly assignments.

2 **Research in Media and Communications: Principles and**

Practice: One essay of 1500 words, to be submitted to the dissertation supervisor.

3 **A Research Proposal**

Indicative reading:

- Agresti, A., & Finlay, B. (2008). *Statistical Methods for the Social Sciences* (4th ed.). Prentice Hall.
- Alasuutari, P. (1995). *Researching Culture: Qualitative Method and Cultural Studies*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

- Rose, G. (2012). *Visual Methodologies: An Introduction to Researching with Visual Materials*. London; Thousand Oaks, Calif: SAGE Publications Ltd.
- Schroder, K., Drotner, K., Kline, S., & Murray, C. (2003). *Researching Audiences: A Practical Guide to Methods in Media Audience Analysis*. London: New York: Bloomsbury Academic.
- Silverman, D. (2013). *Doing Qualitative Research: A Practical Handbook*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

Assessment: Exam (20%, duration: 2 hours) in the spring exam period.

Essay (80%, 3000 words) in the ST.

1 Applied Regression Analysis (MY452A): Exam (20% of overall mark for the course, duration: 2 hours) in the spring exam period.

2 Research in Media and Communications: Principles and Practice: Essay (80% of overall mark for the course, 3000 words) due in Spring Term.

MC4M8 Not available in 2024/25

Advanced Methods of Research in Media & Communications (including Qualitative & Advanced Quantitative Analysis)

This information is for the 2024/25 session.

Teacher responsible: Dr Jean-Christophe Plantin and Dr Rachel O'Neill

Availability: This course is available on the MSc in Media and Communications (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students taking non-research track media and communications MSc programmes may take this course instead of MC4M1 subject to their own degree regulations and with the agreement of the teacher responsible.

Course content: 1 **Principles of Research in Media and**

Communications: A series of lectures offered by media and communications staff in the AT. The lectures will normally cover the following topics central to research design across the social sciences, with a specific emphasis on their application to media and communications contexts: the general nature of research as social inquiry, interviewing, social network analysis, critical discourse analysis, content analysis, visual analysis, survey design/questionnaires, experiments, ethnography and participant observation, as well as research ethics.

2 **Principles and Specialist Research workshops:** A series of ten three-hour workshops (10 comprised of two x 1.5 hour sessions) offered by media and communications staff in the WT. Students are required to participate in all ten workshops.

3 **Quantitative Analysis:** Students take two statistics courses offered by the Department of Methodology: MY452A Applied Regression Analysis; and MY455 Multivariate Analysis and Measurement. Please note that these courses are compulsory and automatically included when you register for MC4M8.

Teaching: This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 80 hours across the AT and the WT. This course includes a reading week in Week 6 of the AT and the WT.

1 **Principles of Research in Media and Communications:** Delivered through lectures totalling a minimum of 10 hours across the AT and 1 hour in the WT.

2 **Principles of Social Research and Specialist Social Research Workshops:** Delivered through workshops totalling a minimum of 30 hours across the WT.

3 **Quantitative Analysis:** MY452A: Delivered through a combination of classes and lectures totalling a minimum of 20 hours across the AT. MY455: Delivered through a combination of classes and lectures totalling a minimum of 20 hours across the WT.

4 **Methodology pilot drop in clinics:** Delivered through workshops totalling 2 hours across the WT and the ST.

Formative coursework: 1 **Principles of Research in Media and Communications:** All students are expected to complete advance readings and submit one essay of 1500 words.

2 **Principles and Specialist Research Workshops:** All students are expected to complete advance readings and submit workshop assignments.

3 **Quantitative Analysis:** Most statistics courses require weekly assignments

Indicative reading:

- Alasuutari, P. (1995). *Researching Culture: Qualitative Method and Cultural Studies*. London; Thousand Oaks, Calif: SAGE Publications Ltd.
- Bauer, M. W., & Gaskell, G. D. (2000). *Qualitative Researching with Text, Image and Sound: A Practical Handbook for Social Research*. London; Thousand Oaks, Calif: SAGE Publications Ltd.
- Bell, A., & Garrett, P. (1998). *Approaches To Media Discourse*. Oxford; Malden, Mass: John Wiley & Sons.
- Bertrand, I & Hughes, P. (2005) *Media Research Methods. Audiences, Institutions and Texts*. New York: Palgrave.
- Bryman, A. (2012). *Social Research Methods*. Oxford; New York: Oxford University Press.

- Burton, D. (2000). *Research Training for Social Scientists: A Handbook for Postgraduate Researchers*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

- Kent, R. (1994). *Measuring Media Audiences*. London; New York: Cengage Learning EMEA.
- Robson, C. (1993). *Real World Research: A Resource for Social Scientists and Practitioner-researchers*. Oxford: John Wiley & Sons.
- Rose, G. (2012). *Visual Methodologies: An Introduction to Researching with Visual Materials*. London; Thousand Oaks, Calif: SAGE Publications Ltd.
- Schroder, K., Drotner, K., Kline, S., & Murray, C. (2003). *Researching Audiences: A Practical Guide to Methods in Media Audience Analysis*. London: New York: Bloomsbury Academic.
- Silverman, D. (2013). *Doing Qualitative Research: A Practical Handbook*. London; Thousand Oaks, Calif: SAGE Publications Ltd.

Assessment: Exam (17%, duration: 2 hours) and Exam (17%, duration: 2 hours) in the spring exam period.

Coursework (66%, 5000 words) in the ST.

Description of assessment:

1 **Coursework:** One written assignment of not more than 5000 words to be submitted in the ST (66%).

2 **Exams:** One exam in the spring exam period relating to MY455, and one exam in the spring exam period relating to MY452A (see Methodology Department course guides) (34%).

MG401 Half Unit Operations Management for Management Consultancy

This information is for the 2024/25 session.

Teacher responsible: Prof Richard Steinberg MAR 4.13

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Management of Information Systems and Digital Innovation. This course is available as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: There is a pre-assignment that is due in early January. The specification of the pre-assignment will be posted to Moodle on the last day of Autumn term 2024. **Note that the pre-assignment is compulsory and cannot be accepted late.**

Course content: Operations Management (OM) is concerned with the processes by which organisations produce goods and services. This course is designed for students having an interest in operations management who may be considering a career in management consultancy. It is not a course in management consultancy.

The course covers nine topics: (1) Process Flow Analysis, (2) Bottleneck Analysis, (3) The Toyota Production System, (4) Inventory Management, (5) Assembly Line Balancing, (6) Critical Path Method, (7) Quality Management for Services—with an emphasis on Quality Management in Healthcare, (8) Scheduling, and (9) Forecasting. The course is structured in three parts. Part

I is called 'Cases' and is based around a set of 5 readings: three Harvard Business School cases and two articles. Part II is called 'Techniques'. Part III is called 'The Goal', which takes place during the final 2-hour session, and consists of an in-depth discussion of the book, *The Goal: A Process of Ongoing Improvement*, by E.M. Goldratt and J. Cox.

Teaching: 16 hours of lectures and 12 hours of seminars in the WT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: In addition to the pre-assignment students will have six assignments throughout the term covering the material in the course and will be expected to work as a group on each assignment. The problems comprising each assignment will be discussed in the seminar classes, and each student will be individually responsible for answering all the problems for each assignment.

Indicative reading: (1) Case: 'National cranberry cooperative (abridged)'

(2) Case: 'Toshiba: Ome works'

(3) Case: 'Toyota Motor Manufacturing, U.S.A., Inc.'

(4) Article: 'Controlling variation in health care: a consultation from Walter Shewhart'

(5) Article: 'Distinguishing between common cause variation and special cause variation in a manufacturing system'

(6) Book: *The Goal: A Process of Ongoing Improvement*, E.M. Goldratt and J. Cox.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG402 Half Unit Public Management: A Design-Oriented Approach

This information is for the 2024/25 session.

Teacher responsible: Professor Michael Barzelay MAR 4.28

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: The public needs capabilities from public organizations, such as those to implement major shifts in public policies; to provide safe and otherwise adequate public services; to deliver technological and programmatic systems through projects; to create credible scientific information for public and policy use; and to deter corruption across the public sector. Furnishing

capability to accomplish such purposes requires management of public organizations, and, management, in turn, involves using professional knowledge and skilful abilities to devise mechanisms that will work in challenging situations and settings. In this course, students will learn how to engage creatively – as designers and managers – with practical theories and case-based knowledge in creating mechanisms that work in enabling public organizations to play their crucial roles in government. In particular, the course will focus on how a design-orientation in professional practice can be directed toward overcoming specific conditions and widespread tendencies that work against any specific public organization's success in furnishing the capabilities required of it. Case studies will be used to develop this design-orientation, while also expanding students' familiarity with varied roles played by public organizations, e.g., using regulation to promote waste-reduction in a region's industrial sector; using international cooperation projects to promote advanced technological education in a partner country; using design-projects to develop systems and operational procedures for performing sanitation functions in delivering a mass-gathering event attended by millions; using project organizations and tools to control the use of public money and authority in infrastructure projects; and using national-level auditing and criminal investigation tools to combat corruption at the local level. In this sense, and by using pedagogical methods common to professional schools of public policy and management, the course is emblematic of the design-oriented professional discipline of Public Management. (Additional course content information on the Course Moodle site.)

Teaching: 30 hours of combined lecture/seminars in the WT. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Essay: Write a 2000-2500 word essay that reflectively examines one course reading from a list of several options. The purpose of the essay is to show how the publication can serve to add breadth and depth to the body of professional knowledge in the Public Management field.

Case analysis: Contribute to a group-project whose deliverable is a 2000-2500 word report that recovers the design of a public organization's primary working phenomena so that it can serve as a design-reference for future use in managing public organizations. All groups will be given the same project assignment.

Indicative reading: Publications:

E Bardach, 'The Extrapolation Problem' (2004); M Barzelay, Public Management as a Design-Oriented Professional Discipline (2019); M. Barzelay, et al., 'Good Trouble in the Academy: Inventing Design-focused Case Studies about Public Management as an Archetype of Policy Design Research' (2021); M Barzelay & C Campbell, Preparing for the Future: Strategic Planning in the U.S. Air Force (2003); M Barzelay & S Seabra, 'Auditing Against Corruption' (2020); J Bryson, Strategic Planning in Public and Nonprofit Organizations (2017); T Cellucci, 'Developing Operational Requirements' (2008); J Koopenjan, et. al., 'Competing Management Approaches in Large Engineering Projects' (2011); B Lawson, What Designers Know (2004); J Tendler & S Freedheim, 'Trust in a Rent-Seeking Society' (1994); J van Aken et. al., Problem-Solving in Organizations (2007); D Vaughan, 'Organizational Rituals of Risk and Error' (2005); S. Glennan, The New Mechanical Philosophy (2017).

Teaching case studies:

'Brazil in Action'; 'Managing Long-Term Organizational Collaborations in International Development: The Egypt-Japan University of Science and Technology'; 'Managing a Governmental Campaign for a Mega-Event: Strategic Planning for the 2019 Kumbh Mela Hindu Festival in Uttar Pradesh'; 'Paying the Bills in the Junta of Andalusia'; 'Preventing Pollution in Massachusetts: The Blackstone Project'; and 'Assessing Strategic Risks: Col. Jim Engle and the U.S. Air Force Futures Games'.

Assessment: Essay (45%, 3000 words) and case analysis (45%) in the ST.

Class participation (10%) in the WT.

Essay: Write an essay that reflectively examines one course reading from a list of several options. The purpose of the essay is to show how the publication can serve to add breadth and depth to the body of professional knowledge in the Public Management field (3000 maximum word length). (45%)

Case analysis: Write a case-analysis that recovers the design of a public organization's primary working phenomenon/a. The purpose of the case-analysis is to furnish design-references for future use in managing public organizations. Choices of cases to analyse will be limited (3000 maximum word length) (45%)

Class participation: Based on attendance, contribution to class discussion, and posting responses to target statements about readings in early weeks of the course. (10%)

MG403 Half Unit Pricing Strategy

This information is for the 2024/25 session.

Teacher responsible: Prof Om Narasimhan MAR.6.32

Availability: This course is available on the MSc in Marketing.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: The content of the course is organised into two principal modules: (1) pricing strategy and fundamentals and (2) pricing tactics and implementation. The first module of the course covers the fundamental analytical tools, theories, and conceptual frameworks needed for price strategy formulation. Basic principles from marketing, economics, and psychology will be briefly reviewed and extended. The module provides an in-depth treatment of the role of price in the firm's value proposition to the customer and the determination of customer response to price. The second module of the course covers pricing tactics with an emphasis on pricing in the digital domain.

Teaching: 30 hours of seminars in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be engaged in analysing several cases, doing numerical problems, and analysing data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve numerical problems, case analysis, and analysing data sets). Students will be taking three short quizzes during the course of the term; these are meant to ensure a proper grasp of the concepts and tools covered in the lectures.

Indicative reading: The Strategy and Tactics of Pricing: A Guide to Growing More Profitably (2010): Nagle, Hogan, and Zale, Prentice Hall.

Pricing Information: How to customize both the product and the price (1998): Carl Schapiro and Hal Varian, Harvard Business School Chapters.

'Pricing as a Strategic Capability' (2002): Mark Bergen, Shantanu Dutta, Mark Ritson, Sloan Management Review

Assessment: Coursework (45%), project (40%) and quiz (15%) in the WT.

Coursework is an Individual Take-home assignment and the project will be in groups.

MG404 Half Unit

Consumer Insights: Behavioural Fundamentals

This information is for the 2024/25 session.

Teacher responsible: Dr Heather Kappes MAR 6.21

Availability: This course is compulsory on the MSc in Marketing. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: For many companies, non-profit organisations, and political figures, success relies on understanding the "consumers." What is it that they really want, and why? What information will they attend to, and what will they ignore? How do they make decisions, why do they sometimes make bad ones, and how can we help them make better ones? It can be tempting to answer these questions intuitively, based on your own experiences as a consumer. However, intuitions about human psychology are often wrong.

- Chronic and temporary sources of customer needs, desires, and motivations
- How customers search for information, acquire, and process information
- How customers allocate attention and how to attract it
- Customer decision-making processes, and the heuristics and biases that play a role
- The formation of attitudes and intentions, and processes for persuasively changing them
- Social influences on intentions and behaviour, including unconscious determinants
- Why intentions are or are not translated into behaviour, and what strategies can be used to narrow the intention-behaviour gap.

LSE offers two courses addressing consumer behaviour: MG404 Behavioural Fundamentals for Marketing and Management and PB417 Consumer Psychology for Sustainability. MG404 is designed for the students of Management to complement their curriculum, and PB417 targets the (future) decision-makers and advisers in business and organisations dealing with consumers, including non-commercial.

There are some similarities in the content of MG404 and PB417. Broadly, both courses introduce the psychological foundations of consumer behaviour, and are intended to equip students to apply psychological theories to business situations. There are, however, important differences in the orientations of the two courses. MG404 is intended for students studying management and related disciplines, who want to learn how to influence consumer behaviour (e.g., how to construct persuasive advertising or sway purchase decisions). MG404 introduces the principles of consumer behaviour that firms need to recognize for successfully marketing their products and services, and which consumers themselves can use to make optimal decisions.

PB417 provides a skillset and a toolbox of theories and methods for analysing consumer demand, finding the levers for change and building sustainable business models. For assessment, students choose a real case and write a set of (justified) recommendations to the CEO. PB417 may especially be of interest to students across a broad range of programmes who are interested in developing new modes of relationship with consumers or building sustainable business models as an alternative to the current consumer society. The courses share some content where appropriate; other content differs in accordance with the different goals of the two courses.

Teaching: 30 hours of seminars in the AT.

This course has a reading week in Week 6 of AT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of

our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Regular multiple-choice quizzes to assess understanding and application of course concepts. Students will also have the opportunity to write a formative essay and receive feedback.

Indicative reading:

- Consumer Behavior, 6th edition. Hoyer, MacInnis, & Pieters. South-Western Cengage Learning, 2010;
- Consumer Behavior: Science and Practice. Kardes, Cronley & Cline. South-Western Cengage Learning.
- Influence: The Psychology of Persuasion. Cialdini, Robert. Collins Business, 2006.

Further references, especially for journal articles and HBS case studies, will be provided at the commencement of the course.

Assessment: Essay (100%) in the AT.

MG409 Half Unit

Auctions and Game Theory

This information is for the 2024/25 session.

Teacher responsible: Prof Richard Steinberg MAR 4.13

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), MBA Exchange, MSc in Economics and Management, MSc in Management (1 Year Programme) and MSc in Management and Strategy. This course is available as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: Students should have a course equivalent to the LSE course Quantitative Methods (Mathematics) (MA107), which covers techniques of basic calculus and linear algebra, with emphasis on their application to economic problems. Students should also have some knowledge of probability.

Course content: The course provides an introduction to auctions and game theory. Topics covered are: noncooperative games, cooperative games, social choice, sequential and multi-stage games, auctions, and combinatorial auctions. In addition to the theory, a significant portion of the course will discuss applications. Specifically, four one-hour lectures each will be devoted to a single real-world application: caller display, competing Internet service providers, public housing space, and spectrum. We will also devote a two-hour lecture session to a Harvard Business School case based on five real-world applications of auctions: publishing, professional sport, on-line auctions, state privatization, and mergers and acquisitions. (Students planning to enrol on MG473 Negotiation Analysis might wish to consider enrolling on this course as well, as the topic of auctions and game theory is complementary to that of negotiation analysis. Note, however, that MG409 Auctions and Game Theory has a mathematics pre-requisite.)

Teaching: 16 hours of lectures and 12 hours of seminars in the WT. 2 hours of lectures in the ST.

A reading week will take place during Week 6. There will be no teaching during this week.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Very full lecture notes are provided, and every week a set of problems is given out in the lecture. These are discussed in the following seminars.

Indicative reading:

- Book: P. Cramton, Y. Shoham, and R. Steinberg, eds., Combinatorial Auctions.
- Book chapter: 'Auction Pricing', R. Steinberg, Chapter 27 in O. Ozer and R. Phillips, eds., Oxford Handbook of Pricing Management.
- Case study: 'Auction Vignettes', Harvard Business School

Publishing.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG410 2.0 Units Term Abroad

This information is for the 2024/25 session.

Availability: This course is compulsory on the Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: CEMS MIM degree:

During Year 2 of the Global MSc in Management (CEMS MIM), students can apply to spend an international exchange term at a leading CEMS school, along with exclusive CEMS core courses in Global Management, skills seminars, block seminars, and an international internship.

MBA Exchange Term Abroad:

During Year 2 of the Global MSc in Management (MBA Exchange) students can apply to spend a term abroad at one of LSE's leading partner business schools in the US and Asia. Students will join an MBA class at their chosen school, and take a choice of optional elective courses offered by the school.

All students should register for the course code MG410 (Term Abroad) as their only LSE course for Autumn Term.

Teaching: July/August/September (according to the host school timetable) to December.

CEMS MIM partner schools: <https://www.cems.org/academic-members/our-members/list/>

MBA Exchange partner schools:

- University of Chicago - Booth School of Business
- Cornell University - Samuel Curtis Johnson Graduate School of Management
- Dartmouth College - Tuck School of Business
- Duke University - Fuqua School of Business
- Emory University - Goizueta Business School
- University of Michigan - Ross School of Business
- Northwestern University - Kellogg School of Management
- Peking University - Guanghua School of Management
- University of Texas at Austin - McCombs School of Business
- Yale University - School of Management

Information for MBA Exchange track students

All MBA Exchange students must take the following minimum number of credits/courses during the exchange term:

- Cornell: 12 credits
- Dartmouth: 12 credits
- Duke: 12 credits
- Kellogg: 4 credits
- Yale: 16 units
- Chicago Booth: 4 courses / 400 units
- Michigan Ross: 12 credits
- UT Austin: 12 credits
- Peking: 8-12 credits (4 classes)

Please be aware of the course choice regulations whilst on the MBA Exchange:

- LSE cannot validate non-taught courses as part of a student's term abroad grade. E.g. language, sports, skills workshops, society activities, oral communication etc. Only taught courses will be accepted.
- All students must ensure they take courses that award actual grades such as alphabetical grades etc.
- We are unable to use pass/fail courses as we cannot quantify or convert them back into the LSE framework.
- LSE will not accept language courses.

Information for LSE CEMS track students

All LSE CEMS students must take 30 academic ECTS credits in Term 1.

All LSE students are required to take at least 30 ECTS credits in Term 1 so that they can meet the overall CEMS MIM Year ECTS course requirements.

- Total number of CEMS course (academic) credits that need to be taken in Term 1: 30 ECTS. 160 Students should not take courses that exceed the 30 ECTS requirement (unless due to the weighting of each course it is inevitable that the total amount of ECTS goes over by slightly by one or two ECTS credits).
- Total number of CEMS credits that should be acquired in Term 1: 34 ECTS. Academic courses and electives = 30 ECTS, Block Seminar = 3 ECTS, CEMS Skills Seminars = 1 ECTS.
- Maximum number of credits you are allowed to take in Term 1: 37.5 ECTS. This includes the Block Seminar and CEMS Skill Seminars.

Please be aware of the course choice regulations whilst on the CEMS term abroad:

- CEMS students must take the mandatory CEMS courses at their host institution and at LSE. In Term 1, this is Global Business Strategy (or similarly titled). In term 2, this is Global Leadership and the Business Project.
- Language courses are not included in the 30 ECTS requirement for LSE as the LSE GMiM degree does not recognise language courses as part of your LSE degree requirements. Students can take CEMS language courses to satisfy the CEMS language requirement only.

Final considerations when choosing your classes on your term abroad:

Students are not allowed to take more than the amount stated (unless due to the weighting of each course it is inevitable that the total amount of credits goes over by slightly by one or two credits). LSE are not responsible for the course selection at the exchange schools. Some exchange schools do not offer a wide range of courses and you may find that some courses do not appeal to you. However, you will still have to abide by minimum credit rule. The GMiM Programme Office will not be held responsible for students who fail to meet the requirements listed above.

Credit transfer from host university to LSE:

The LSE term abroad does not operate on a pass/fail basis, and you will receive ONE final grade for your overall term abroad that will show as 2.0 units for MG410 in your second year.

LSE will then assign a number grade that will be used for LSE MG410, which is calculated using a weighted average of all the grades from courses taken during the exchange term.

We also take into consideration the variation in units for different courses.

Students can be awarded a 45 or 0 for failed courses depending on the nature of the fail.

Assessment:

Courses equivalent to the value of 2.0 LSE units should be taken at one of the partner CEMS or MBA Exchange Institutions.

MG411 Firms and Markets

This information is for the 2024/25 session.

Availability: This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.

Course content: A graduate course in microeconomic analysis, geared towards those parts of the subject that are of primary importance in the Management area. The first section focuses on competition between firms, using standard game theoretic models. This leads to a general treatment of market competition by reference to the concept of firms' capabilities. The next section traces the basis of firms' capabilities to the set of elements of know-how possessed by the individuals comprising the firm, and by the mode of internal organization of those individuals. The analysis draws on the several strands in the modern literature on the theory of the firm. The final section of the course deals with the link between strategy and structure, and with the formulation of strategies in environments characterized by complexity and uncertainty.

The course syllabus covers Walrasian Equilibrium: Supply

and Demand. Beyond the Walrasian model: Nash Equilibrium. Applications of Nash Equilibrium: options and bargaining. General approaches to the analysis of competition in oligopolistic markets. Applications in Industrial Organisations. The concept of capabilities. The roots of firms' capabilities : individuals and their collective know-how. The internal organization of firms. Contract theoretic approaches to the theory of the firm. The Chandlerian nexus: from strategy to structure.

Teaching: 20 hours of lectures and 20 hours of seminars in the AT. 20 hours of lectures and 20 hours of seminars in the WT. A weekly seminar devoted to problem sets. A weekly seminar devoted to case studies.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Indicative reading: Milgrom and Roberts, Economics, Organization and Management; Sutton, Sunk Costs and Market Structure

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

MG417 Half Unit Extended Essay

This information is for the 2024/25 session.

Teacher responsible: Various (depending on title chosen).

Availability: This course is compulsory on the MSc in Economics and Management. This course is not available as an outside option.

Course content: Students will undertake an extended essay which should normally be based on one of the two option courses taken. Students can, with special permission, base this piece of work on one of the compulsory courses.

Teaching: A supervisor will be allocated to individual students based on the essay title chosen who will provide students with supervision for this piece of work.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Assessment: Essay (100%, 6000 words) in the ST. Extended essay of no more than 6,000 words to be submitted the week before Summer Term commences.

MG418 Half Unit Open Innovation

This information is for the 2024/25 session.

Teacher responsible: Dr Nadia Millington MAR 5.37

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Management of Information Systems and Digital Innovation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: Open innovation is a fresh take on innovation whereby a firm looks beyond its boundaries to exploit the creative power of users, communities, and customers to co-develop new products, services, and processes. Whether it is the fortune 500 companies that have used open innovation to transform their businesses (e.g. Procter and Gamble and IBM) or even start-ups (such as iStock Photo); Open Innovation, through tools like

crowdsourcing or open sourcing is disrupting markets and altering the nature of industries.

This course is divided into 2, a lecture stream and a project stream. During the lecture stream (roughly 5 weeks of the course) students will:

- (1) Learn about the emergence of OI and how OI differs from other sources of external innovation.
- (2) Learn to differentiate between the different types of OI tools (Crowdsourcing, Lead Users, Innovation Intermediaries, Design intermediaries, Innomediaries, Open Source) and to choose the right OI tool for different problem sets.
- (3) Explore an emerging range of companies using open business models (e.g. Google, Facebook) in contrast to more traditional business approaches.
- (4) Learn about the challenges of implementing OI and the drivers of success, not only based on practitioner sources but also in the context of organisational behaviour, innovation, and network theory.
- (5) Learn about solutions to OI challenges like ambidexterity and business model innovation

During the project stream (roughly 5 weeks of the course) students work on a real live OI project developing solutions via the implementation of one or more open innovation tools. Typical project partners/ clients include- Sunrise, Credit Suisse, Mastercard, KPMG, Google, ABB. In addition to faculty support, these five weeks will also involve guidance from our Innovation partners (which in the past included consultants from companies like Ludic Group, KPMG and Eidos).

Teaching: 30 hours of lectures in the WT.

Total of 40 contact hours in the WT

There are no seminars for this course, the additional 10 hours will comprise:

- Three 30-minute group sessions to help refine the scope of the project and develop the innovative solution
- An introduction to your project session which lasts approximately 1 hour. This is usually held after class in the 4th week of the semester. But further details will be provided
- An extended dress rehearsal at the end of the term where the student teams will exhibit their progress and will get feedback from the faculty team

Students on this course will have a reading week in Week 6, in line with departmental policy.

Students will be allocated to teams to undertake an Open Innovation consulting project. Whilst some class time is allocated to help teams progress their projects, as with any group project, student teams are expected to work independently beyond class times on their projects.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Student groups will be expected to produce a presentation outlining the progress made on their consulting project, at the end of the WT for faculty review and feedback

Additionally a formative essay question will be provided for those wishing to practice essay writing.

Indicative reading: Chesbrough, H.W. (2003). Open Innovation: The new imperative for creating and profiting from technology. Boston: Harvard Business School Press (chapter 1-3).

Brabham, D. (2008). Moving the crowd at iStockphoto: The composition of the crowd and motivations for participation in a crowdsourcing application First Monday, 13.

Fredberg, T., Elmquist, M. & Ollila, S. (2008) Managing Open Innovation: Present Findings and Future Directions, Vinnova VR 2008:02

Raffi Amit, C. Zott (2012), Creating value through business model innovation, Sloan Management Review, 53 (3), 41 - 49.

Tushman, M. L. and O'Reilly, C. A. (1996) 'Ambidextrous Organizations: Managing Evolutionary and Revolutionary Change', California Management Review, vol. 38, no. 4, pp. 8-30

Assessment: Essay (30%, 1200 words) and class participation

(10%) in the WT.

Group project (60%) in the ST.

The group project assessment comprises a pre-recorded oral presentation and submission of PowerPoint slides with detailed appendices which provide evidence in support of your presentation. Student teams will also be expected to present to their clients/project sponsors.

MG421 Half Unit International Business Strategy and Emerging Markets

This information is for the 2024/25 session.

Teacher responsible: Dr Christine Cote MAR 5.25

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: An undergraduate or graduate course in international business, micro-economics or competitive strategy. Pre-requisites to be assessed by teacher responsible.

Course content: This course analyses the emergence of firms which operate across borders, often on a global scale, and their current and likely future interactions with emerging markets. It will combine the development of conceptual frameworks primarily through the lectures with the analysis of cases in the classes. Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s and are responsible for a high proportion of global output, exports and investment, as well as the bulk of foreign direct investment. In the past few decades, their activities have been increasingly focused to developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as South Africa, and Latin American countries such as Brazil and Argentina. The "new institutional economics" has recently developed as a field to understand the impact of variation in institutions on economic performance. This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms, now and into the future. We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, and the resource based view. We provide an analysis of economic performance and growth in emerging markets building on the institutional economics and working with a large variety of data sets and sources. The course will then turn to key topics. These will include the determinants of FDI; the spillover effects of FDI on the host economy; entry mode choices; measures of institutional and cultural distance; and the growing importance of multinationals from emerging markets.

Students will work with case material as well as the required reading, and the group project will comprise a case write up, which will be presented prior to submission in class for comment and discussion.

Teaching: 20 hours of lectures and 15 hours of seminars in the WT. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in

the classroom.

Formative coursework: Students will be required to write a 1500 word essay and will be provided with feedback. They will also be required to present their group project in class.

Indicative reading:

- Côté, C., Estrin, S. & Shapiro, D. Expanding the international trade and investment policy agenda: The role of cities and services. *J Int Bus Policy* (2020). <https://doi.org/10.1057/s42214-020-00053-x>

Assessment: Project (40%) and class participation (10%) in the WT. Essay (50%) in the ST.

MG422 Half Unit Not available in 2024/25 Thinking Strategically

This information is for the 2024/25 session.

Teacher responsible: Marina Agranov

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Management (1 Year Programme) and MSc in Operations Research & Analytics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of basic algebra is necessary to take this course.

Course content: This course is concerned with strategic thinking. The course is an interaction of game theory, economics and business strategic management. The focus is the study of situations in which two or more decision-makers (e.g., individuals, firms, political parties, etc) interact in a strategic manner. Understanding strategic situations that involve conflict and/or cooperation has proven critical in many areas of economics, business, political science, sports, law and other areas. The emphasis is to provide the fundamental thinking of good strategic making in these situations, rather than a mathematical and formal analysis.

The purpose of this course is threefold: (1) first, to introduce relevant tools of game theory in order to capture the key elements of different strategic situations and determine the most likely outcome in each situation; (2) second, to study various real-life applications and case-studies where thinking strategically has proven critical; (3) third, to cover modern developments in behavioural game theory, in particular in the areas of intertemporal choices and strategies, decision-making under risk and uncertainty, and experiments in strategic interaction.

Students should note that this course will involve weekly calculations and numerical reasoning.

Teaching: 20 hours of lectures and 8 hours of seminars in the WT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual

freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will have to complete 5-8 written assignments throughout the course, handing in 1-2 of them, and feedback will be provided.

Indicative reading: Thinking Strategically: Competitive Edge in Business, Politics and Everyday Life, WW Norton, 1993, by Avinash Dixit and Barry Nalebuff. The Art of Strategy, WW Norton, 2008, by Avinash Dixit and Barry Nalebuff. Games of Strategy, WW Norton, 3rd edition, 2009, by Avinash Dixit, Susan Skeath and David Reiley. Beautiful Game Theory, Princeton University Press, NJ, 2014, by Ignacio Palacios-Huerta. Set of academic articles and/or case studies, plus lecture notes written by instructor. Set of articles from the media.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG430 Half Unit Firms & Markets in Emerging Economies

This information is for the 2024/25 session.

Teacher responsible: Prof Rocco Macchiavello MAR. 6.24

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), MSc in Economic Policy for International Development, MSc in Economics and Management, MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Marketing. This course is available as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: This course applies tools from microeconomics, industrial organisation and organisational economics to the analysis of strategy. The emphasis is on the application of these concepts to business situations, and as such the course relies heavily on the analysis of case studies. The course is divided into two parts. The first part focuses on the external context of strategy. It first reviews basic tools for understanding industry economics and the determinants of industry-wide profitability, focusing on positional aspects. It then applies basic game theory to analyse competitive interactions when the number of players is small and the industry profitability is largely determined by these players' interactions. This tool is used to analyse issues such as bargaining power, price competition and entry and exit decisions.

The second part studies the internal content of strategy. Topics vary from year to year and include, among others, strategy in the presence of standard setting and network effects, the scope of the firm, outsourcing and supply chain organizations, corporate governance in adding value and capturing synergies, internal management practices. This part relies on the application of both game theory, principal-agent problems and the analysis of empirical academic papers.

The course is heavily based on case discussions. For each class meeting, study questions will be assigned concerning a case study. We will discuss these questions and the material in the case during the class discussions. Students will need to prepare for class discussions by reading the assigned case and analysing it in view of the assignment questions. For each case, students are expected to prepare short slide deck discussing the case and be ready, if asked, to present their slides in the classroom to lead the discussion. Required cases and supplementary readings will be available on Moodle. The textbook, together with the lectures, contains the concepts necessary to analyse the cases.

Teaching: 20 hours of lectures and 8 hours of seminars in the WT. Students on this course will have a reading week in Week 6, in line with departmental policy

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students are expected to prepare for classes and actively participate in case discussions. Students will receive feedback on their class participation. Students might be asked to present during the class discussion to practice in view of the assessment. They will also be given the opportunity to discuss their preparation for the individual and group cases that count toward assessment during office hours devoted to this.

Indicative reading: A primary text will be: Saloner, G., Shepard, A. and Podolny, J. Strategic Management. New York, NY: John Wiley, 2001.

As mentioned above, cases and additional readings will be made available online.

Assessment: Group assignment (80%) in the ST.

Class participation (20%) in the WT.

Class participation will be evaluated based on the quality and quantity of the student's participation in class.

MG431 Half Unit Managerial Economics

This information is for the 2024/25 session.

Teacher responsible: Mr Jose Vasquez Carvajal MAR 6.12

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: A graduate-level introduction to the foundations of managerial economics. Topics include:

1. Basics of demand and supply
2. Choice under uncertainty.
3. The theory of the firm and organizations.
4. Strategic interaction and dynamic competition.

Teaching: 20 hours of lectures and 10 hours of seminars in the WT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6 of WT, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Sample exercises will be provided throughout the Winter Term and will be discussed during the class sessions. These sample exercises do not count for your mark in the course.

Indicative reading: Useful textbooks (in no particular order):

- Nick Wilkinson, Managerial Economics. Cambridge University Press
- D M Kreps, Microeconomics for Managers, W. W. Norton (2004)
- B. Douglas Bernheim and Michael D. Whiston, Microeconomics, McGraw Hill (2008).
- R. Pindyck and D. Rubinfeld, Microeconomics, Pearson.

Reading lists will be provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG434 Half Unit Organisational Behaviour and Leadership

This information is for the 2024/25 session.

Teacher responsible: Dr Emma Soane MAR 5.39 and Dr Niranjana Janardhanan MAR 5.33

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global

MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: This course develops understanding of individual, team and organisational-level attributes, processes and outcomes. Lectures and seminars review, discuss and apply psychological theories to explain workplace phenomena

Topics covered will include personality and individual differences; work motivation; reward systems and the design of work; health and well-being at work; creativity and innovation; identity, team processes; leadership; power, influence and politics at work; organisational risk; and organisational culture.

Teaching: 20 hours of lectures and 15 hours of seminars in the WT. 2 hours of lectures and 1 hour and 30 minutes of seminars in the ST.

The teaching includes lectures and seminars. The teaching style is highly participative. Group work in seminars is an integral part of the course and students are expected to actively contribute to all group exercises. The course requires student commitment and willingness to engage fully with the readings and with seminar activities.

Students on this course will have a reading week in Week 6 of WT, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: All course readings are articles from leading journals such as the *Academy of Management Journal* and the *Journal of Applied Psychology*. A full reading list is provided at the start of the course.

There is no set textbook for this course, however students may wish to consult one of the following:

- Colquitt, J., LePine, J. A., Wesson, M. J., & Gellatly, I. (2022). *Organizational Behaviour: Improving Performance and Commitment in the Workplace* (5th edition). McGraw-Hill.
- Robbins, S. P., & Judge, T. (2023). *Organizational Behavior* (19th Global Edition). Prentice Hall.

Assessment: Exam (75%, duration: 2 hours) in the spring exam period.

Presentation (25%) in the WT.

Students will work in groups to prepare and deliver a presentation that applies organisational behaviour concepts to a real organisation. Each group will select one specific organisation to focus on. Presentations must cover two topics from the course and include clear application of two relevant theories. Presentations are evaluated on the depth of subject knowledge; the quality of theoretical application and recommendations made; and, the structure and style of the presentation, including the quality of the materials and delivery of the presentation.

MG439 Half Unit

Organisational Behaviour for Master's in Management

This information is for the 2024/25 session.

Teacher responsible: Dr Shoshana Dobrow

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This course is about the people side of business. Although skills in finance, accounting, marketing and operations are crucial for organisational success, the ability to manage and understand an organisation, its groups, and its individuals is equally crucial. Technical skills may help you land a job, but people skills are likely to determine whether or not you keep it, and how much you can accomplish in your career.

In this course, we will explore a variety of perspectives and theories that explain the dynamics of individual, interpersonal,

group, and organisational processes. Learning about these ideas will help you develop and apply insights about human behaviour in organisational settings. The course material will be useful in planning careers, managing relationships with other people, making complex decisions, designing jobs, becoming a leader, and making sense of today's – and tomorrow's – corporate world. This course will also help you understand some of the challenges involved in both managing and being managed. Ultimately, the tools and skills developed in this course should equip you to become more effective contributors to the organisations that you join. Much of our learning in this course will be through case studies, exercises, and class discussions.

Teaching: 30 hours of lectures in the WT.

The format of the course is highly participatory and interactive and will involve a combination of case studies, interactive exercises, discussions and readings. Students are expected to attend course sessions and to participate actively in the discussions. Students' learning in this course is directly related to their willingness to expose their ideas and conclusions to the critical judgement of the class, and to their efforts to build on and evaluate the comments of classmates.

Full preparation for each session is essential. Students are to complete readings prior to the session for which they are assigned. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 project in the WT.

The formative assignment will allow students to demonstrate their learning and receive in-depth feedback in preparation for a summative assessment. Details will be provided during the teaching term

Indicative reading: There is no set text for this course. The following are examples of articles that will be assigned: Harvard Business School case studies, academic journal articles, Harvard Business Review articles. Students will be given electronic access to cases, texts and articles during the teaching term.

Assessment: Project (40%), take-home assessment (30%) and continuous assessment (30%) in the WT.

Project (40%). This is a term-long individual paper, due the final week of Lent Term. Further details will be provided in the teaching term.

Take-Home Assessment (30%). This will involve written analyses. Further details will be provided in the teaching term, with due dates announced as soon as possible.

Continuous Assessment (30%). The format of the course is highly participatory and interactive, and will involve a combination of case studies, interactive exercises, discussions and readings. Details will be provided in the teaching term.

MG452 Half Unit Not available in 2024/25

Behavioural Economics for Management

This information is for the 2024/25 session.

Teacher responsible: Dr Kristof Madarasz MAR 6.10

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: Advanced Microeconomics, Game Theory or Managerial Economics, Advanced Econometrics or Quantitative

Analysis is required.

Course content: The course covers formal (mathematical) models of behavioural economics and discusses both experimental and field evidence that motivate and test various aspects of these models.

This course is a post-graduate introduction to behavioural economics and strategy. The topics to be discussed are:

- 1 Risk Perceptions and Risk Attitudes.
- 2 Intertemporal Choice.
- 3 Social Motivation.
- 4 Processing Information and Mistakes in Cognition.
- 5 Projective Strategic Thinking.
- 6 Well-being and Mental Health.

Teaching: 30 hours of seminars in the AT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: A mock exam comprising of problem sets.

Indicative reading: Camerer, Colin, Linda Babcock, George Loewenstein, and Richard Thaler (1997) "Labor Supply of New York City Cabdrivers: One Day at a Time," *Quarterly Journal of Economics*

Fehr Ernst and Simon Gächter (2002) Fairness and Retaliation: The Economics of Reciprocity *Journal of Economic Perspectives*, 2000 (14); 159-181.

Kahneman, Daniel, and Amos Tversky (1979) "Prospect Theory: An Analysis of Decision under Risk" *Econometrica*, 47(2): 263-292.

Koszegi, B. and Matthew Rabin (2006) Reference-Dependent Preferences. *Quarterly Journal of Economics*

Laibson, David. (1997) Golden Eggs and Hyperbolic Discounting. *Quarterly Journal of Economics*

List, John A. 2004. "Neoclassical Theory Versus Prospect Theory: Evidence from the Marketplace," *Econometrica*, 72(2): 615-625.

Madarasz, Kristof (2012) Information Projection: Model and Applications. *Review of Economic Studies*

Thaler, Richard and Shlomo Benartzi (2004). Save More Tomorrow: Using Behavioral Economics to Increase Employee Saving, *Journal of Political Economy*.

Rabin, Matthew (2002) Inference by the Believers in the Law of Small Numbers. *Quarterly Journal of Economics*

Stortz, Richard. (1955) Myopia and Inconsistency in Dynamic Utility Maximization. *Review of Economic Studies*

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG455 Half Unit Decisions, Biases and Nudges

This information is for the 2024/25 session.

Teacher responsible: Dr Barbara Fasolo MAR 5.27

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Finance and Risk, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Marketing, MSc in Operations Research & Analytics, MSc in Social Innovation and Entrepreneurship and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Note for Exchange students: You can take this course if your programme deadlines do not conflict with the beginning of the

summer term deadline for MG455 summative coursework.

Note for Auditors: Due to the experiential nature of the course and groupwork required, this course is not suitable for auditing

Pre-requisites: It is an advantage to have had an introductory social science course in one of these fields: economics, management, psychology or sociology.

It is important to be comfortable with multi-disciplinary research, in-class activities and group work.

Course content: This course introduces students to Behavioural Decision Science: the science that explains and predicts how humans make decisions (the decision 'process') and how well (the decision 'outcome'). The course will focus on the process, and unveil the subtle and sometimes unconscious influences played by our mind (biases) and the context in which decisions are faced: What has been chosen in the past? Is there positive or negative affect - perhaps because of risk and uncertainty? All of these (and more) are factors that often determine how information is searched before choosing, how decisions are made, and the quality of the decision made.

In the theoretical part of the course, you will be guided to the scientific language of decisions, judgments and biases, and learn how to elaborate on behavioural science articles. In the applied part of the course, you will work as a group and apply the steps of our proprietary tool 'Decision Canvas' to improve a real decision that you will select, applying different behavioural interventions – from 'debiasing' to 'choice architecture'.

The course is entirely seminar-based and balances theory, experiments and applications. It involves group-work throughout the course. We will alternate teaching with interactive activities designed to observe and feel the process of decision making from the 'inside', before reviewing behavioural decision theories and evidence from lab and field studies. Students will be able to apply the decision making skills acquired across different sectors and domains (e.g., managerial, policy, health, consumer).

The assessment is designed to give students the opportunity to work as a group and apply their new skills to support a real decision, as well as produce, individually, a rigorous and scholarly report on a specific aspect of decision making, of their interest.

Teaching: 2 hours of lectures and 22 hours and 30 minutes of seminars in the WT.

Students on this course will have a reading week in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: 1. Group submission of mid-term progress on Decision Canvas (Group project) (week 5). Over several weeks (both in and outside class), you will work as a group to analyse a real decision that you will select. Students will submit progress on the group-work that they have done as a group in the first part of the course with the use of the 'Decision Canvas'. After the submission they will receive feedback as a group. This feedback will help you prepare for the summative Group project submission.

2. Individual review of anonymous essays (Week 7). Students will play the role of the "examiner" and review the anonymous essays (submitted by students from a previous year) by implementing the marking criteria which we use in this course. This exercise will help you develop your essay.

Indicative reading:

- Bazerman, M. (2017) *Judgment in Managerial Decision Making*. New York: Wiley. 8th edition;
- Kahneman, D. (2011) *Thinking Fast and Slow*. London: Allen Lane;
- Russo, J. E. & Schoemaker, P. J. H. (2002) *Winning decisions: How to make the right decision the first time*, Piatkus Publ. Limited.
- Larrick, R.P. (2004). *Debiasing* (Chapter 16). In D.J. Koehler, & N. Harvey, *Blackwell Handbook of Judgement and Decision Making*. Malden: Blackwell Publishing

Assessment: Essay (60%, 2000 words) in the ST. Project (30%) and class participation (10%) in the WT.

Group Project (30%) in week 10. Over several weeks (both in and outside class), you will work as a group to analyse a real decision that you will select. In Week 10, groups submit their project on Moodle and give a short timed presentation of the decision, the bias and behavioural interventions recommended for the decision problem investigated with the 'Decision Canvas'

Individual Essay (60% 2000 words) (due beginning of ST): In the Essay (no more than 2,000 words) you will zoom in on a particular aspect of the course, or of the Decision Canvas which you as a developing behavioural scientist have found intriguing (e.g. decision frame, a judgement, a bias, a de-biasing or choice architecture technique). This is done in a scholarly and rigorous manner. You will be required to provide full essay-style referencing.

PDAM skills

- self-management
- team working
- problem solving
- application of information skills
- communication

MG456 Half Unit

Group & Team Decision-Making Processes

This information is for the 2024/25 session.

Teacher responsible: Dr Nicole Abi-Esber MAR.5.36

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme) and MSc in Marketing. This course is available as an outside option to students on other programmes where regulations permit.

This course is complementary to any behavioural course offered at LSE.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: Elementary statistical and mathematical concepts. A curiosity towards the fascinating field of decision making and a strong interest in rebooting your analytical "decision-ware". Feeling comfortable with interdisciplinary research, as well as with the use and discussion of both qualitative and quantitative strategies for successful decisions. Group work, presentations, and participation will also be a key component of the course.

Course content: In organisations, employees are often required to work in groups, teams, and social networks. To be successful, managers and team leaders must create an atmosphere in which these groups of people produce high-quality decisions, generate creative or innovative solutions to problems, and complete their projects in a timely, efficient, and productive fashion. Moreover, they must be aware of common group decision-making biases, and learn to prevent them.

This course will delve into the dynamics of decision-making in groups, exploring topics such as how groups make decisions effectively and the common pitfalls that can impede their success. We will examine strategies for encouraging diversity within groups and explore the concept of group think, along with techniques for preventing it. Additionally, we will delve into the role of choice architecture in shaping group decision-making processes, and analyse various heuristics that individuals use, such as anchoring and receptiveness, which can impact group decision-making. We will also examine different decision processes utilized by groups, such as consensus-building and voting, and explore the factors that influence group conversations, including who speaks and why. By the end of this course, students will have a deep understanding of the complexities involved in group decision-making and will

have developed a range of skills and strategies for improving the effectiveness of group decision-making processes.

This course will provide the opportunity to learn about group decision making behaviour through interactive group exercises. These activities will simulate the process of group decision making, and will often be based on a real-world decision making context (i.e. NASA's decision to launch a spaceship). These activities are designed to bring out the natural variations in human behaviour that we see in teams at work, and to explore their consequences on teams and on decisions made, and expose common group decision-making biases. They are designed to vividly and memorably illustrate the challenge of managing teams, and to provide a common context for discussing course concepts, as well as your insights about your own and others' behaviour. These exercises will take place either during lectures or in seminars, depending on the exercise. As such, attendance is an important part of the course experience and the grade, and the class is not well suited to auditors.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the AT.

A reading week will take place in Week 6. There will be no teaching during this week.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: There are two pieces of formative assignments in the AT.

1. Group project plan presentation (i.e. the selected decision context, due in week 5). Over several weeks (both in and outside class), you will work as a group to analyse a real decision that you will select. Students will submit information about the team and the decision they have selected, as well as an outline of their proposed project plan for the group project. During Week 5 the student group will meet with the professor to review their project plan and receive feedback as a group. This feedback will help prepare for the summative Group project submission.

2. Case analysis (individual): As a preparation for the individual case analysis essay, students will be assigned to analyse a case study which will be real-world example of group decision-making provided by the instructor. Students should identify one key concept discussed in class that impacted the decision-making process. Students will be expected to write a short essay that outlines the concept and its effects on the decision-making process. This assignment will encourage students to apply their knowledge of the course material to a practical situation, while also helping them develop their skills in critical analysis and effective communication. Additionally, it will provide students with an opportunity to practice their research and referencing skills in preparation for the final report.

Indicative reading: Book:

- Hackman, J. Richard. (2011). *Collaborative Intelligence: Using Teams to Solve Hard Problems*. San Francisco, CA

Articles:

- Cosier, R.A., & Schwenk, C.R. (1990). "Agreement and Thinking Alike: Ingredients for Poor Decisions." *Academy of Management Executive*, Vol.4, No.1, 69-74.
- Mannix, E., & Neale, M. (2006). "Diversity at work" *Scientific American Mind*, August/September, 32-39.
- Duhigg, C., What Google learned from its quest to build the perfect team. *New York Times Magazine*, Feb 28, 2016.
- Wooley, Malone, & Chabris (2015) Why some teams are smarter than others. *New York Times*, January 18.
- Edmonson, A. (1999) Psychological Safety and Learning Behavior in Work Teams. *Administrative Science Quarterly*, Vol. 44, 2,350-383

Assessment: Group project (30%), assignment (30%), class participation (20%) and in-class assessment (20%).

MG458 Half Unit**Foundations of Management I: Organisations and Management Theory****This information is for the 2024/25 session.****Teacher responsible:** Dr Rebecca Campbell MAR 5.15**Availability:** This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.**Course content:** This course will equip students with a thorough understanding of the development of management and organisation theory since the emergence of modern industrial businesses in the late 19th century. Students will be provided with an overview of management as a subject of study and as a practice, and will develop an understanding of the disciplinary anchors in Sociology, Psychology and Economics. Within each field we will cover origins, disciplinary boundaries, triggers for growth, core concepts and the current state of play and debate. Weekly topics will include:

- 1 Course Introduction and the Origins of Management
- 2 The theory of the firm
- 3 The professionalisation of management: Taylorism, motivation and performance
- 4 What about the workers?
- 5 Understanding organisational structures
- 6 Organisational decision making
- 7 The origins of modern strategy
- 8 Contemporary strategic management: Firms as bundles of resources
- 9 Managed by markets?
- 10 The Challenge of the Age: Climate change

The course is also designed to introduce students to postgraduate study and learning at LSE, with instruction on academic reading, case analysis, critical thinking and writing skills.

Teaching: 20 hours of lectures and 15 hours of seminars in the AT. Lectures will cover theoretical materials and concepts. Seminars will cover the assigned readings in more depth and include case discussions which will apply content covered in lectures to business situations.

Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework:

- To help prepare for the group case study presentation: all groups given the opportunity to meet with their class teacher one week prior to their case presentation for feedback/ advice.
- To help prepare for the exam: In week 11 of AT we will provide suggested revision questions for the exam and discuss LSE assessment criteria.

Indicative reading:

- Willman, P. (2014) Understanding Management: Social Science Foundations. Oxford University Press.

A full reading list will be provided at the beginning of the course.

Assessment: Exam (60%, duration: 2 hours) in the January exam period.

Group presentation (30%) in the AT.

Class participation (10%).

as an outside option.

Course content: The aims of this course are to provide a basic grounding in the management literatures covering disciplines relating to financial control and management science, and of the literatures on the evolving managerial, organisational and professional contexts within which these disciplines are practiced. Students will be provided with an overview of each discipline with the aim that they acquire a basic working knowledge of each. The course will cover origins and disciplinary boundaries, the foundations of these disciplines in the social sciences, core concepts, practical applications and current state of play and debate. Weekly topics include:

- 1: Making Business Decisions that Commit Capital
- 2: Representing a Firm's Financial Condition: 1
- 3: Representing a Firm's Financial Condition: 2
- 4: Valuing and Managing Costs
- 5: Management Science
6. READING WEEK
- 7: Balanced Performance Measurement
- 8: Measuring Shareholder and Stakeholder Value
- 9: Occupations, Professions and Expertise
- 10: Individual and Institutional Investors in a Historical Context
- 11: Organisation and Management Theory

Teaching: 22 hours of lectures and 20 hours of seminars in the WT. 2 hours of lectures in the ST.

Weeks 1-11: WT: 1 two hour lecture and 1 two hour case discussion, weekly. Students on this course will have a reading week in Week 6 of WT, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will be expected to jointly produce 2 group case discussion summaries.

Indicative reading: Weeks 1-8: Berk, J. & DeMarzo, P. (2014) Corporate Finance, Weetman, P. (2019) Financial Accounting: An Introduction; Kaplan, R. & Atkinson, A. (2014) Advanced Management Accounting; Keys, P. (1994). Understanding the Process of Operational Research.

Weeks 9-11: Chandler (1990) Scale and Scope

Assessment: Essay (50%, 1500 words) in the WT.

Essay (50%, 1500 words) in the ST.

MG460 Half Unit Not available in 2024/25**Emergencies Management: Humanitarian Intervention and Digital Innovation****This information is for the 2024/25 session.****Teacher responsible:** Dr Shirin Madon MAR 4.31 CON 8.09**Availability:** This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in International Development and Humanitarian Emergencies, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.**Course content:** Globally, the world is dealing with an unprecedented number of humanitarian crises such as natural disasters, armed conflict, forced displacement and major disease outbreaks such as Covid-19.

The course is anchored on two main observations:

First, over the past few decades humanitarian emergencies have been increasing in number and duration with the most devastating and long-lasting socio-economic effects in countries with weak physical

and institutional infrastructures. Information and communication technologies have opened up new possibilities for the mitigation, preparedness and response to disasters, but its effective use requires change in the collaboration of humanitarian organisations and affected communities. In this course we will critically examine the potential opened by ICT innovation for managing crises.

Second, the course will connect core concepts and perspectives from humanitarian emergency literature to the unprecedented humanitarian crisis that the world is currently experiencing as a result of Covid-19 pandemic. At the global level, we will review and evaluate global networks and their value, while at the level of national economies and organisations we will study country strategies put in place to deal with the crisis. At all levels, digital innovations and technologies have become an absolute lifeline at different stages of the disaster management life cycle. As the Covid-19 crisis shows, the contribution from ICTs adoption needs to be carefully assessed in order to account for the economic, social and democratic challenges it might create.

More specifically, the course will cover the following thematic areas:

- humanitarian emergencies management and coordination structures for effective mitigation, preparedness and response
- emergency logistics and supply chain management
- ICT innovation and the development of organizational capacity for effective emergency action
- the link between episodic emergencies and long-term development in low-and-middle income countries
- managing pandemics through recent experiences

Teaching: 15 hours of lectures and 15 hours of seminars in the WT. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will receive formative comments on both the group project and their individual essays. The formative essay is intended to help students explore available literature on the topic of their summative essay and give them feedback on how to proceed.

Assessment: Project (30%, 5000 words), essay (55%, 3000 words) and class participation (15%) in the WT.

Group Project (30%, 25-30 pages) – this will relate to aspects of crisis management during the Covid-19 crisis

Individual essay (55%, 3000 words) – enabling students to explore available literature on a topic related to the course

Class participation (15%)

MG463 Half Unit CEMS Global Leadership

This information is for the 2024/25 session.

Teacher responsible: Professor Connson Locke MAR 4.14

Availability: This course is compulsory on the CEMS Exchange.

This course is not available as an outside option.

Pre-requisites: It is assumed that the students have already taken introductory Organisational Behaviour or Global Business courses. The 2nd year Global Master's in Management students are offered these prerequisites during their 1st year.

Course content: This course aims to answer the question, "How can I manage people in international settings and from different cultures?" By answering this question, you will develop the skills to pursue an effective global career while keeping the core CEMS values of being responsible leaders contributing to a more open, sustainable, inclusive world. You will also develop an understanding of the challenges of interacting with and managing a diverse workforce in a complex environment characterized by distance-based interactions. Topics include: leader traits and attributes, cultural diversity, team leadership and virtual teams, power and influence, gender and the perception of leadership, organizational culture and change, global social responsibility.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Mendenhall, M.E., Reiche, B.S., Bird, A., & Osland, J.S. (2012). Defining the "global" in global leadership. *Journal of World Business*, 47: 493-503.

Yukl, G. A. (2009). *Leadership in Organizations: Global Edition*. Pearson

Assessment: Essay (50%) and project (40%) in the WT.

Class participation (10%).

MG464 Half Unit**CEMS Global Business Strategy****This information is for the 2024/25 session.****Teacher responsible:** Dr Christine Cote MAR 5.25**Availability:** This course is compulsory on the CEMS Exchange.

This course is not available as an outside option.

This course is compulsory for CEMS students.

Course content: The course examines how firms shape their international strategies in an ever-changing global environment. It will consider the context of globalisation with a focus on the relationship between international trade and investment, the emergence of global supply chains and the transformative role played by technology and innovation. It will seek to understand why and how firms internationalise as well as how they can create and sustain competitive advantage while operating across borders and in different institutional environments. Themes covered in this course will include the growing importance of emerging markets, the role of disruptive technologies in transforming industries, exploiting firm's resources and capabilities and sustaining cross border competitive advantage through strategies of global integration or local adaptation, managing staff across borders and creating shareholder value while ensuring corporate social responsibility.

Teaching: 30 hours of combined lectures and seminars in the AT. Students on this course will have a reading week in Week 6 of AT, in line with departmental policy

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Assessment: Essay (45%, 2000 words), in-class assessment (45%) and class participation (10%) in the AT.

For the in-class assessment, the total mark (45%) will be comprised of one in-class group presentation.

an outside option.

Course content: This course is a graduate-level introduction to managerial economics with a focus on its applicability to business decisions. Students will develop a rigorous way of thinking about managerial problems, issues and decisions that managers face, as well as enabling a better understanding of the external business environment in which an organisation operates. The emphasis is on widely-used theoretical principles. Topics include an in-depth understanding of the geometric structure of the supply & demand model and its applications, the interaction of government and markets, efficiency analysis, international trade, game theory, monopoly and oligopoly strategy, price discrimination, dynamic competition, strategic moves, and information economics.

This course develops tools that are the foundation of courses in Marketing, Business Strategy, and Finance, which students will take in core courses throughout the rest of the year.

Teaching: 30 hours of combined lectures and seminars in the AT. In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 5 problem sets in the AT.

Indicative reading: T van Zandt; *Firms, Price and Markets*, available online (2006); S. Estrin et al, *Microeconomics*, Prentice Hall (2008).

D M Kreps, *Microeconomics for Managers*, W. W. Norton (2004); B. Douglas Bernheim and Michael D. Whiston, *Microeconomics*, McGraw Hill (2008).

Assessment: Exam (60%, duration: 2 hours) in the January exam period.

Class participation (10%) and in-class assessment (30%) in the AT.

MG468 Half Unit**Foundations of Management III: Business Ethics and Corporate Social Responsibility****This information is for the 2024/25 session.****Teacher responsible:** Dr Rebecca Campbell (MAR.5.15)

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Pre-requisites: This is a second year course for Global Master's in Management students who must have successfully completed the first year of the programme.

Course content: The purpose of the course is to provide students with a thorough understanding of key ideas in business ethics, the governance of social enterprises and ethical leadership, in order to prepare them for future leadership roles. Business leaders have a special role to play because of their ability to determine an organisation's mission, vision and values, how companies should be governed and led, and the ethical standards which business should aspire to.

In the first part of the module, we discuss some of the main philosophical approaches to ethics. Normative ethical theory helps us to do better than use vague opinions or hunches when we are trying to decide right from wrong. We make extensive use of case studies. For example, we look at the challenges faced by Tony's Chocolonely in building a supply chain free of slave labour. We consider Patagonia's transition to a new ownership structure in order to continue its mission to save the planet. We look at what led Siemens to being fined over \$1.6B for bribery, and how they then turned the organisation around.

In the second part of the module we look at the governance of social enterprises and other hybrid organisations, focussing on performance measurement and control.

In the final part of the module we look at organisational leadership in the context of business ethics and corporate governance. We examine various models of organisational leadership, including

Michael Maccoby's thesis that many business leaders today are "productive narcissists", as well as recent research on ethical leadership..

Our teaching encourages students to address questions such as:

- To what extent should we hold a company responsible for its supply chain?
- Are socially virtuous business practices compatible with shareholder capitalism?
- Who does bribery harm? What can companies do to limit corruption when they work in regions with less well-developed institutions?
- What are the incredible pros and inevitable cons of narcissistic leadership?
- Are normative questions of "character" relevant in an organisational context?
- What constitutes good ethical decision-making?

Teaching: 20 hours of lectures and 15 hours of seminars in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: To help prepare for the group presentation: all groups given the opportunity to meet with their class teacher prior to their case presentation to discuss their presentations and to be given verbal feedback.

Assessment: Assessment path 1

Project (60%) in August.

Class participation (10%) and group presentation (30%) in the WT. Assessment path 2

Class participation (10%) and group presentation (30%) in the WT. Case study (60%) in the ST.

Students who don't take MG469 or MG470, will take Assessment path one,

Students who take MG469 or MG470, will take Assessment path two.

MG469 Half Unit Extended Essay for Management

This information is for the 2024/25 session.

Teacher responsible: Dr Jonathan Liebenau MAR 5.30

Availability: This course is available on the Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Pre-requisites: Students must have taken either 'Introduction to Quantitative Analysis (MY451A / MY451W)', 'Applied Regression Analysis (MY452A / MY452W)' or 'Intermediate Quantitative Analysis (MY465)'.

Course content: Students will undertake an extended essay which should normally be based on previously studied courses. It will not involve any primary research.

Teaching: 1 hour of lectures in the AT. 2 hours of lectures in the ST. In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be required to submit a short outline of their proposed topic in week 8/9 of Winter term in order for a supervisor to be allocated. The supervisor will provide "light touch" supervision.

Indicative reading:

University Press.

- Gill, John and Phil Johnson (2010) Research Methods for Managers (3rd edition). London: Sage
- Easterby-Smith, Mark, Richard Thorpe, and Paul Jackson (2012). Management Research (4th edition). London: Sage.

Assessment: Essay (100%, 6000 words).

MG470

Management Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Jonathan Liebenau MAR 5.30

Availability: This course is compulsory on the Global MSc in Management. This course is not available as an outside option. This is available to students on Global Masters in Management only.

Pre-requisites: Students must have taken either 'Introduction to Quantitative Analysis (MY451A / MY451W)', 'Applied Regression Analysis (MY452A / MY452W)' or 'Intermediate Quantitative Analysis (MY465)' and another methods course from the electives list.

Course content: Dissertations are based on a research question which students are required to agree with their assigned dissertation supervisor in year two.

Research questions may be investigated by:

- (a) Framing the question via a literature review and examining the problem in more detail through a small scale empirical research project, using either primary or secondary data sources; OR
- (b) Carrying out an extended literature review to provide a rigorous analysis of existing research investigating the problem.

This course is compulsory on the Global MSc in Management. This course is not available as an outside option.

Teaching: 3 hours of lectures in the AT. 4 hours and 30 minutes of lectures in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: No formative work is appropriate but students will meet regularly with advisers so will have an indication of how they are progressing.

Indicative reading:

- Wray, Alison and Mike Wallace (2006). Critical Reading and Writing for Postgraduates. London: Sage
- Booth, Wayne C., Gregory G. Colomb and Joseph Williams (2008). The Craft of Research. Chicago: University of Chicago Press.
- Ridley, Diana (2008). The Literature Review: A Step-by-step guide for students. London: Sage.
- Tharenou, Phyllis, Ross Donohue, and Brian Cooper (2007). Management Research Methods. Cambridge: Cambridge University Press.
- Gill, John and Phil Johnson (2010) Research Methods for Managers (3rd edition). London: Sage
- Easterby-Smith, Mark, Richard Thorpe, and Paul Jackson (2012). Management Research (4th edition). London: Sage.

Other readings will be provided during lectures in AT and by dissertation advisors.

Assessment: Dissertation (90%, 10000 words) in August. Essay (10%, 1000 words) in the WT.

MG472 Half Unit Management and Socioeconomics of Digital Innovation

This information is for the 2024/25 session.

Teacher responsible: Dr Antonio Cordella MAR 4.35

Availability: This course is compulsory on the MSc in

Management of Information Systems and Digital Innovation. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>)

Pre-requisites: This course has a strong focus on the management and economics of digital innovation and assumes a general understanding of the key information and communication technologies. Students are expected to have a basic understanding of the implementation and management of information systems in organisations.

Course content: The objective of this core course on the MSc MISDI programme is to address the managerial challenges associated with the most innovative digital innovations. This course does not focus on one specific technology but rather on the managerial, economic and organisational factors that shape the value generated by different clusters of digital innovations. Examples will be drawn from the implementation of digital innovations, such as platforms and ecosystems; artificial intelligence and learning algorithms; blockchain technologies; social computing; information services; and open innovation. The focus of this course is on the factors and processes that determine how different digital innovations create value for the organisations adopting them.

Discussing technological and organisational factors that determine business value creation led by different digital innovations the course provides unique managerial skills to successfully manage and exploit digital innovations to enhance organisational performance and business value creation. Whether organizations operate globally, regionally or nationally they are highly dependent on digital innovations produced by information and communication technologies for fulfilling their missions. This course reviews the managerial and economic foundations of information systems and digital innovation and examines key insights about the emerging roles of ICTs and digital innovation in supporting organizations' performance. In this course we examine how the digital innovation-created value for organisations is dependent on specific economic dynamics and management strategies. Having reviewed distinctive digital innovations widely adopted by contemporary organisations, we identify issues of critical importance for information systems management including: the analysis of the economic dynamics that determine how different information systems generate value; the analysis of the technical functionalities of information systems; the assessment of the impact that these technical functionalities have on the business performance; the evaluation of business and organisational challenges associated with digital innovation adoptions; and how to best negotiate the organisation's business needs with technological requirements and functionalities. The course provides a strategic overview of the management of information systems and innovation. We review theoretical approaches and frameworks used in practice and consider them alongside the academic literature on transaction costs, network economics, information systems strategy, and organization studies. Students studying this course will gain an understanding of how trends in strategy and operations are entangled with current processes of digitization and what these conditions of possibility mean going forward.

At the end of the course participants will be able to:

- 1 Understand what digital innovation is and how it shapes the contemporary economy.
- 2 Learn the fundamental theories, frameworks and strategies of management, economics and technology that underpin digital innovation business evolution.
- 3 Understand how leading cases of digital innovation generate value and how to successfully manage the associated challenges.
- 4 Recognise the complexity of factors that shape digital innovation

business models

5 Use analytical frameworks for understanding the impact of digital innovation on organisational performance
