6 Recognise and make recommendations on the strategic potential and impact of information systems and digital innovation in different organizational contexts.

7 Decide how organisations can best evolve in new markets.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. 1 hour and 30 minutes of lectures in the ST.

A reading week will take place in Week 6. There will be no teaching on MG472 during this week.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Classes are based around reading and discussing selected journal articles from the course reading list. Formative feedback is provided on a mock examination, with questions from MG472, MG481 and MG487 will be held.

Indicative reading:

- Academy of Management Review
- Strategic Management Journal
- Long Range Planning
- Journal of Management Studies
- Journal of International Business Studies
- Journal of Management
- Management Information Systems Quarterly
- Executive
- Journal of Strategic Information Systems
- Organization Science
- Management International Review
- Harvard Business Review
- Sloan Management Review
- California Management Review

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

MG473 Half Unit Negotiation Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Jonathan Booth

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: Being a skilful negotiator is a core competence of effective managers in organisations today. This course introduces students to the essential concepts underlying effective negotiations and draws on both scholarly evidence and practical case exercises. The course curriculum covers essential negotiation concepts such as distributive and integrative bargaining, sometimes called pie-slicing and pie-expanding approaches, two-party and multi-party negotiation, as well as more advanced issues such as the impact of culture and the psychology of judgement and decision-making. Considering more advanced issues, lecturers highlight the importance of power, tactics, strategy, information and trust in shaping the structure and outcomes of negotiations. Students will engage in weekly negotiation simulation exercises to help them understand the concepts and develop their negotiation skills.

Because much of the learning comes from engaging in the weekly negotiation simulations, a significant portion of the grade in this course is related to in-class engagement as measured by the continuous assessment outlined below.

Teaching: 30 hours of seminars in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Over the course of the term, students will compile a weekly negotiation learning journal reflecting on their experience in the respective negotiation case exercises, their learning, their identified strengths and opportunities for growth, and their plan of goals and strategies to attain future personal development. Students will link their weekly analysis of the case

exercises to the concepts and theories in the literature which have been taught in a given week, as well as throughout the course. Learning journals then form the foundation of the students' later summative work on the essay.

Students will also complete a formative essay, using the content of negotiation learning journal as foundation for the formative. The formative essay is a learning activity which supports students to prepare for the self-reflection component of the summative essay.

Indicative reading: The main text, covering most of the material in the course is:

- Leigh Thompson, *The Mind and Heart of the Negotiator*, 7th edition Pearson, Harlow, 2020.

Students will be expected to read the set of essential readings which are provided in the MG473 Reading List. This is carefully curated for focus and quality over quantity.

The following texts are also recommended, as optional:

- Roger Fisher and William Ury, *Getting to Yes: Negotiating Agreement Without Giving In*, Penguin Books, New York, 2012
- Ken Binmore, *Game theory: A Very Short Introduction*, Oxford University Press, Oxford, 2007
- Andrew M. Colman, *Game Theory and its Application to the Social and Biological Sciences*. Routledge, Hove, 1999; Roy Lewicki et al 2020 *Negotiation*

Assessment: Essay (60%, 2000 words) in the ST. Continuous assessment (40%) in the WT.

MG475 Half Unit Organisational Theory and Practice

This information is for the 2024/25 session.

Teacher responsible: Dr Lourdes Sosa MAR 5.40

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Organisational Behaviour). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources) and MSc in Human Resources and Organisations (International Employment Relations/CIPD). This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: Structure drives behaviour. That is the principle that this course is designed to introduce. When an employee responds to the proposal of a change to their job content as "you are setting me up for failure", that is often what they mean – managers can alter the structure around employees and in doing so, alter an employee's success at work. We therefore need to carefully design structure, and we will do so with the perspective of rational change in mind. The course advances in two large complementary portions: the first weeks introduce the problem space, that is, the mechanisms that link structure to employee behaviour; the last weeks focus on the solution space, that is, the design of interventions to optimise the structure-behaviour link in organisations.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. 1 hour and 30 minutes of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will complete a formative assessment. Details will be provided in class.

Indicative reading: Hannan, M.T., & Freeman, J. (1984). Structural Inertia and Organizational Change. *American Sociological Review*. 49(2): 149-164.

Puranam, P., O. Alexy, & Reitzig, M. (2014). What's "New" About New Forms of Organizing? *Academy of Management Review*. 39(2):

162-180.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Class participation (10%) and group essay (40%) in the AT.

MG476 Half Unit

Corporate Social Responsibility and International Labour Standards

This information is for the 2024/25 session.

Teacher responsible: Dr Chunyun Li

Availability: This course is available on the MRes/PhD in Management (Employment Relations and Human Resources), MSc in Accounting, Organisations and Institutions, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Human Rights and Politics, MSc in Political Science (Global Politics) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: Any social science background.

Course content: Corporate Social Responsibility (CSR) is becoming an expected element of corporate strategy. This course critically evaluates CSR, focusing on firms' attempts to prevent labour standards violations in their supply chains. We begin by analysing the rise of CSR, setting it in the context of global value chains, international labour standards, and emerging private forms of regulation. We then analyse topics such as: the impact of CSR on corporate financial performance; whether CSR is an effective means of raising labour standards; theories of CSR; how to embed CSR within the firm and comparative CSR. The course includes plenty of examples of how large firms are dealing with the ethical challenges posed by global supply chains. The course is interdisciplinary, and students are encouraged to bring insights from their "home" discipline so that seminars become a mutual learning experience. The course will include one lecture from a CSR professional.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT. 1 hour and 30 minutes of seminars in the ST. In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: One 2,000 word essay in LT.

Indicative reading: Crane, A. et al. (2008) *The Oxford Handbook of Corporate Social Responsibility*, Oxford: OUP.

Kaplan, S. (2019) *The 360° Corporation: From Stakeholder Trade-offs to Transformation*. Stanford: Stanford University Press.

Kuruvilla, S. (2021) *Private Regulation of Labor Practices in Global Supply Chains: Problems, Progress and Prospects*, Ithaca and London: ILR Press

Vogel, D. (2005) *The Market For Virtue: The Potential and Limits of Corporate Social Responsibility*, Washington D.C.: Brookings Institution Press.

Assessment: Take Home Exam (55%) in the ST.

Essay (40%, 2000 words) in the ST.

Class participation (5%).

MG477 Half Unit

The Power of Incentives in Organisations

This information is for the 2024/25 session.

Teacher responsible: Dr Bethania Mendes De Brito Antunes
MAR.5.27

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: Incentives are a powerful driver of human behaviour within organisations. This interdisciplinary course delves into the realm of behavioural economics, a fusion of economics and psychology, to unveil the intricate dynamics behind individual decision-making. By understanding incentives, monetary and non-monetary, students gain insights into why and how individuals behave within organisational contexts. Through a rich exploration of theoretical frameworks and practical activities, students learn to design and manage incentive systems that tap into employees' underlying motivations, fostering value creation and organisational goals. This course offers valuable insights for students with diverse career aspirations. Moreover, for aspiring leaders, entrepreneurs and managers seeking to optimise and drive organisational success, the principles covered in this course are universally applicable across industries.

Course Objectives:

1. Introduce students to the interdisciplinary field of behavioural economics and its relevance in understanding organisational behaviour.
2. Explore theoretical frameworks and tools for designing and managing effective incentive systems.
3. Analyse the impact of incentive systems on employee motivation, attraction, promotion, and retention within organisations.
4. Provide students with the analytical skills to align reward strategy with business objectives.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

Students are expected to prepare for, and contribute to, the seminars. Seminars will include group work, preparing and giving presentations, case analyses, small group discussions, and self-assessment exercises. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Group presentation. All groups will be given the opportunity to meet with their class teacher one week prior to the assessment date to discuss their presentations and to be given verbal feedback. Students will also be given group feedback on presentations they do in the week 7 seminar.

Indicative reading: Students are expected to read widely in the appropriate journals; a detailed reading list will be provided at the start of the course.

Course text books:

Jones, E., and Perkins, S. (2020) *Reward Management, Alternatives, Consequences and Contexts*. CIPD, London (earlier editions are acceptable);

Pepper, A. (2015) *The Economic Psychology of Incentives*.

Palgrave Macmillan;

Pepper, S. (2006) *Senior Executive Reward – Key Models and Practices*. Gower Publishing;

White, G and Druker, J (2008) *Reward Management – a Critical Text*. Second edition. Routledge.

Assessment: Class participation (10%), group presentation (50%) and report (40%) in the WT.

The individual report (40%) will be based on the presentation.

MG478 Half Unit

The Management of People in Global Companies

This information is for the 2024/25 session.

Teacher responsible: Professor Ryan Lamare

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD) and MSc in Human Resources and Organisations (International Employment Relations/CIPD). This course is available on the Global MSc in Management, Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Organisational Behaviour) and MSc in Management (1 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: This course examines how current global factors influence the management of human resources in global enterprises. It explores how emerging digital technologies influence the forms of work and the roles of HRM in supporting digital transformation and virtual work, the roles of HRM in supporting organizational changes such as merger & acquisition or outsourcing, and how HRM can help organizations meet contemporary social expectations such as diversity and social responsibilities. This course draws heavily on case studies to analyze current issues in HRM and good practices. The course discusses topics such as: new HR technologies, global virtual teams, flexible work arrangement and employee wellbeing, global diversity and inclusion, HR in mergers & acquisitions, outsourcing and HR, and HR & global corporate social responsibility.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

Practitioners from leading industries may be invited to guest lectures in this course. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will have the opportunity to write a formative case study analysis assignment in this course. The feedback will prepare students for the summative case study analysis exam.

Indicative reading: Lazarova, M., Thomas, D. C., & Farndale, E. (2021). *Essentials of International Human Resource Management: Managing People Globally*. Edward Elgar Publishing.
Chong, S., Huang, Y., & Chang, C.-H. (D.). (2020). Supporting interdependent telework employees: A moderated-mediation model linking daily COVID-19 task setbacks to next-day work withdrawal. *Journal of Applied Psychology*, 105(12), 1408–1422.
Farh, C. I. C., Liao, H., Shapiro, D. L., Shin, J., & Guan, O. Z. (2021). Out of sight and out of mind? Networking strategies for enhancing inclusion in multinational organizations. *Journal of Applied Psychology*, 106(4), 582–598.
Edwards, M. R., & Edwards, T. (2013). Employee responses to changing aspects of the employer brand following a multinational acquisition: a longitudinal study. *Human Resource Management*, 52(1), 27–54.

Assessment: Exam (90%, duration: 2 hours) in the spring exam period.

Class participation (10%).

Students will have access to the case study in the exam one week prior to the exam date in the ST. The exam consists of unseen questions related to the case study.

MG479 Half Unit Not available in 2024/25

Information Systems for the Public Sector: Digital Government and Service Innovation

This information is for the 2024/25 session.

Teacher responsible: Dr Antonio Cordella MAR 4.35

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation, MSc in Strategic Communications and Society and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Digital government and digital public sector services are the result of the widespread adoption of ICTs, Web processes and social media in public sector organisation - which cumulatively transform and may 'producize' the nature of public services delivered to citizens. This course covers the recent and likely-future major organizational and technology change processes in the government sector. Core topics include: the distinctive aspects of the public administration context for technology-enabled innovation; digital government and public sector reform; public sector ICT innovation and public value creation; the use of ICTs to streamline public services as part of wider business process changes; measuring and growing productivity via digital changes; 'digital by default' services and social media in government; and next-generation shifts to EDGE (Essentially Digital Governance).

Teaching: 20 hours of lectures, 10 hours of seminars and 4 hours of workshops in the WT.

A reading week will take place in W6. There will be no teaching during this week.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the WT.

One 1000-word formative essay to be submitted in week 7.

Formative feedback is also provided on class participation with seminars based around reading and discussing selected journal articles.

Indicative reading:

Assessment: Essay (60%, 3000 words) and project (40%, 12000 words) in the WT and ST.

The project coursework will be done in groups.

MG480 Half Unit Foundations of Human Resource Management: Theory and Practice

This information is for the 2024/25 session.

Teacher responsible: Dr Jiaqing (Kathy) Sun, MAR 5.10

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/ CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

Course content: The course examines central issues pertinent to the theory and practice of Human Resource Management (HRM). It introduces students to a range of theoretical perspectives which underpin organisations' HRM practice. It also reviews challenges involved in the design, implementation and evaluation of both overall HRM strategy and specific practice areas. In this respect the course reviews HR practices in the areas of recruitment and selection, job redesign, compensation, employee voice and conflict, engagement, retention and attrition, performance management and appraisal, and strategic HRM.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: Students are expected to read widely in the appropriate journals; a detailed reading list will be provided at the start of the course.

For students who have not formally studied Human Resource Management previously and/or would like an introduction to course fundamentals, the following textbook is recommended:

- Torrington, et al. (2017). *Human Resource Management*. 10th edition.

For student who already have an understanding of Human Resource Management foundations, the following textbook is recommended as it encompasses more than a fundamental text:

- Boxall, P.; Purcell, J.; & Wright, P. (2008): *The Oxford Handbook of Human Resource Management*, Oxford University Press.

Additional textbooks of interest include:

- Boxall, P. and Purcell, J. (2016) *Strategy and human resource management*. 4th ed. Palgrave
- Marsden, D (1999) *A theory of employment systems*, Oxford University Press.

Assessment: Essay (90%, 2000 words) in the WT.

Class participation (10%).

MG481 Half Unit Innovating Organisational Information Technology

This information is for the 2024/25 session.

Teacher responsible: Dr William Venters MAR 4.33

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Operations Research & Analytics. This course is available as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: A basic knowledge of computing, including hardware and software.

Course content: The course provides students with a practical and theoretical insight into the processes and practices of developing contemporary digital systems and technologies. The course reflects the diversity of contemporary information systems contexts; discussing how we should manage the development of digital systems and services. The course focuses on new technologies and practices including cloud computing, Software as a Service, mobile and ubiquitous information technology, innovating customer relationship management, DevOps and Agility. The changing architectures of information systems towards

an Internet based cloud computing services are key themes of the course. Attention is however also given to the development of traditional information management systems which remain important within enterprises. The course also discusses the development challenges in small start-ups leveraging existing development platforms. Particular attention is given to problem structuring and problem design issues within such complex settings using Soft Systems Methodology and the Unified Modeling Language as a toolkit. Agile methods form a core part of the teaching. To ensure that students gain practical experience we include a one-week intensive Sprint project run during reading week in which outside consultants present a "real-world" case study of systems development and the groups undertake to rapidly analyse and design a proposal for a technical solution. This allows students to support their theoretical understanding with a strong practical experience of the pressures and difficulties of systems development today. The group sprint project provides a realistic experience of developing systems within a consulting role and is supported by classes and question and answer session and face to face discussion. Students gain an understanding of the benefits and difficulties of working within and leading a small team under pressure.

Teaching: 20 hours of lectures, 5 hours of lectures and 10 hours of seminars in the AT.

8 hours of these lectures, and 5 hours of classes will occur be during the "Bootcamp" Sprint week which runs during reading week (Week 6) of AT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students discuss articles, practice systems development techniques, and critically evaluate their success. Formative feedback is provided on class participation. Formative feedback is provided within the Sprint Project by outside experts.

Indicative reading:

- Avison, D. & G. Fitzgerald, *Information Systems Development: Methodologies, Techniques and Tools*, McGraw Hill, 2006.
- Beck, K. and C. Andres (2005). *Extreme Programming Explained*. Addison-Wesley; Benkler, Y. (2006): *The Wealth of Networks*. Yale University Press.
- Beynon-Davis, P. (2019) *Business Information Systems*, Red Globe Press *This is a textbook on information systems and well regarded. We do not use a textbook in this course and will not refer to this book but if you feel more comfortable with an easy to access textbook on key ideas this is a good place to start.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Project (50%) in the AT.

A two-hour unseen examination taken in the ST (50%). The team 'boot camp' project in Week 6 of the AT (50%).

MG482 Half Unit Innovation and Technology Management

This information is for the 2024/25 session.

Teacher responsible: Dr Jonathan Liebenau MAR 5.30

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>)

Course content: The main focus of this course is on how innovative technologies are managed and their consequences. It includes technological innovation in areas such as telecoms, hi tech industries, pharmaceuticals, biotechnology, space technology, financial technologies. Aspects covered are how new industries are created, how existing industries can be transformed by new technologies, linkages between technological development and the creation of wealth, and implementation success and failure of technological systems. Topics include: technology and entrepreneurship, technology strategy, R&D management, patents and intellectual property, disruptive radical and incremental innovation, technology policy. Economic, systems, managerial and sociological approaches will be compared using a variety of case

studies.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Classes are based around reading and discussing selected journal articles and case studies available on or through the course Moodle site. Formative feedback is provided on class participation. In addition, students will present an essay plan in preparation for the final case-based essay, on which formative feedback will be provided.

Indicative reading: JJ Howells, *The Management of Innovation and Technology*, Sage, 2005;
J Fagerberg, D.C. Mowery, and R.R. Nelson (Eds.), *The Oxford handbook of innovation* (Series Oxford Handbooks in Business and Management), Oxford University Press, 2006;
D MacKenzie, *Knowing Machines: Essays on Technical Change*, MIT Press, 1998;

M Biagioli (Ed), *The Science Studies Reader*, Routledge, 1999;
H Collins & T Pinch, *The Golem at Large: What you should know about technology*, Cambridge University Press, 1998;
C Perrow, *Normal Accidents: living with high-risk technologies*, Basic Books, 1984;
D Mowery & N Rosenberg, *Paths of Innovation: technological change in 20th century America*, Cambridge University Press, 1998;
Assessment: Essay (80%, 5000 words) in the WT.
Presentation (20%) in the AT.

MG483 Half Unit eHealth: Policy, Strategy and Systems

This information is for the 2024/25 session.

Teacher responsible: Dr Elzbieta Taylor MAR 4.26
Teacher known as Ela Klecun.

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Health and International Development and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: There are no prerequisites. Students should have some appreciation of information management and systems implementation issues, and some understanding of healthcare systems. A short set of readings will be provided for students who require this background understanding.

Course content: This course aims to give the students theoretical and practical insights into the key issues informing policy and practice for digitalisation of healthcare. It does not teach technical design or programming skills but rather it aims to develop 'hybrid professionals' able to bridge healthcare management and information technology worlds. Hence, students from all backgrounds are welcomed.

Healthcare is undergoing rapid transformation, with digital technologies playing an important role in this process. Telemedicine is enabling online delivery of services. Simulation modelling and population based management tools are increasingly utilised to better plan and manage health of populations and delivery of health services. Robotics and AI are hailed as breakthrough innovations. Many of the information technologies (IT) and service models utilized currently have existed

in some form for years. Their adoption has been hindered by complex regulatory, organizational, social and technical problems. In this course we will explore opportunities for transforming healthcare and challenges faced in planning for, developing and adopting digital services and underlying healthcare information systems and infrastructures. The approach taken in this course to understanding those issues is informed by a socio-technical perspective that considers society (institutions, rules and regulations, work practices and people) and technology as inter-related. Both lectures and seminars are dedicated to presenting different aspects of eHealth. The seminars consist of student-led, in-depth discussions on issues related to particular topics within eHealth. The course assignments offer the students an opportunity to critically engage with their chosen topic. Topics addressed in the course include: assessing the transformative potential of digital technologies for health, the evolution and current state of information systems in primary and secondary care with international comparisons, healthcare policies for digital technologies and information infrastructures, issues of information systems implementation and use, evaluation of IT and building of an evidence base, new trends in health IT. Selected application domains discussed include: electronic health records and national information infrastructures, medicine management systems and e-prescribing, health apps, big data and data analytics, AI and robotics.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the WT.
A reading week will take place in W6. There will be no teaching during this week.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Seminars are based around reading and discussing selected journal articles and case studies. Formative feedback on coursework is provided during seminars. In addition, students complete formative proposals for their essay on which written feedback is provided.

Indicative reading:

- Volpe, S. (ed.) (2022) *Health Informatics: Multidisciplinary Approaches for Current and Future Professionals*, Productivity Press, New York.

Assessment: Essay (85%, 4000 words) and class participation (15%) in the WT.

MG486 Half Unit Not available in 2024/25 Social Computing, Data Analytics, and Information Services

This information is for the 2024/25 session.

Teacher responsible: Prof Jannis Kallinikos and Dr Zhi Cheng
Dr Cheng is known as 'Aaron'.

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Media and Communications (Data and Society). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course is about the significance of digital data and the role they play in the current economy and society. The course reviews the technological arrangements, organisational forms and business models through and by means of which data are being produced and used. More specifically, the course pays attention to the role social media and commercial platforms play in engineering user participation to produce a computable data footprint that is subsequently used to develop a range of data-based resources and services.

The course also deals with the state-of-the-art data analytics techniques and methods used by social media and digital platforms to deploy personalisation strategies as a means of boosting user platform engagement and generating data. It covers the current and emerging approaches in data extraction, aggregation, predictive computing, personalisation and recommender systems, which shape the future of digital business strategy that builds on big data, machine intelligence and analytical thinking.

Overall, the course takes a unique approach to social media and commercial platforms by examining the data work they perform – encoding, aggregating, and computing – from the organisational, managerial and technical perspectives. The course blends theories, ongoing research insights, data analytics concepts and techniques, as well as real-life examples to analyse the socio-economic implications of these significant developments.

After students complete the course, they shall be able to:

- Explain the drives behind the evolution of social computing
- Understand data practices that underpin social computing and the digital economy
- Understand data infrastructures and ecosystems and the role they play in sustaining the operations of social media platforms and the digital economy
- Analyse business models of social media platforms
- Develop data-analytic thinking for decision-making in management and business
- Design a digital business strategy using the platform and algorithmic thinking
- Critically assess data-driven information services (e.g., personalisation, recommender systems) and their socio-economic implications.

Teaching: 20 hours of lectures, 9 hours of seminars and 3 hours of workshops in the WT.

The workshops will be dedicated to essay development. There is a Reading Week in Week 6. There will be no teaching during this week.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Written formative feedback is provided on the 500 words proposal for the summative essay.

Assessment: Essay (100%, 3000 words) in the WT.

MG487 Half Unit Innovation and Information Systems: Concepts and Perspectives

This information is for the 2024/25 session.

Teacher responsible: Dr Elzbieta Taylor MAR 4.26

Teacher known as Ela Klecun

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Management (1 Year Programme), MSc in Media and Communications (Media and Communications Governance) and Master of Public Administration. This course is available as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: The course explores the theoretical foundations for the study of digital innovation and concomitant organizational and social change. It integrates concepts and perspectives from the field of information systems and a range of other disciplines of the social sciences. By the end of this course, students will be able to draw from existing theories to address critically issues of

digital innovation, organizational change and information systems management.

The lectures cover literature related to three broad themes: digital ecosystems; the socio-technical process of the construction of digital technologies; information technology and organizational change. For each of these themes we identify and discuss relevant theoretical concepts and perspectives. The discussion of theories is structured in terms of technical/rational and socially embedded approaches.

Teaching: 15 hours of lectures, 18 hours of seminars and 5 hours of workshops in the AT. 1 hour of lectures in the ST.

This course has a reading week in Week 6 of the AT. There will be no teaching during this week.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Formative feedback is provided at the seminars and the workshops. Seminars guide students to discuss selected journal articles that elaborate on concepts and theories introduced at the lectures. Workshops assist students to develop their critical literature review essay.

In addition, students will complete a formative essay of 750 words on which feedback will be provided.

A mock examination, shared with MG472 and MG481 will be held.

Indicative reading:

- Brynjolfsson E (2010), *Wired for innovation*, Cambridge, MA, The MIT Press
- Ciborra, C (1993) *Teams, Markets, and Systems: Business Innovation and Information Technology* Cambridge, Cambridge University Press.
- Ciborra, C. (2000) *From Control to Drift: The Dynamics of Corporate Information Infrastructures* Oxford, OUP.

- Tiwana, A. (2013) *Platform Ecosystems: Aligning Architecture, Governance and Strategy*, Amsterdam, Elsevier.
- Willcocks, L., and Mingers, J. (2004) *Social Theory and Philosophy for Information Systems*, Chichester, Wiley.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (50%, 3000 words) in the AT.

MG488A

GMiM Capstone Course - Management in Action

This information is for the 2024/25 session.

Teacher responsible: Dr Emma Soane (MAR 5.39) and Dr Rebecca Newton

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: The GMiM Capstone Course builds connections between management theory and practice and aims to equip students with the skills necessary to succeed in their managerial careers. MG488 runs throughout the first and second years of the Global Master's in Management.

First year students attend MG488A sessions during the first year of the programme. The MG488A programme comprises five speaker-led sessions for each of Autumn Term and Winter Term. The remaining sessions can be used by students to have one to one meetings with a Careers Consultant or a member of the Capstone team from the Department of Management. Second year students are welcome to attend MG488A sessions.

Teaching: 7 hours and 30 minutes of lectures in the AT. 7 hours and 30 minutes of lectures and 1 hour of seminars in the WT.

Year 1

GMiM Capstone Lectures run once a fortnight throughout the Autumn and Winter Terms. First year students are expected to attend all sessions. Students will also participate in a 30-minute blog group meeting in either the Autumn or Winter Term.

Additionally, there is a 60-minute assignment information session in the Winter Term to help students prepare for their assignments. In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students are invited to produce one essay in the Winter Term of their first year. The formative essay does not count towards grades but is an opportunity to get essay feedback in preparation for the summative essay.

One essay title will be made available in Winter Term of the first year. Students produce an individual essay which considers the links between theory and practice. Essays will be submitted in the same term of the first year.

Indicative reading: Recommended readings will be provided for Capstone lectures when relevant.

Assessment: Essay (25%, 2000 words) in the AT.

Project (65%) and class participation (10%) in the AT and WT.

Essay: due in Autumn Term of the **second year**. See individual summative assignment below.

Project: See MG488B course guide for details.

Attendance at Capstone lectures – 10% of total course marks.

Students are required to attend 10 Capstone lectures over the two years of the programme, with credits for attendance attached pro-rata to each session. Students must engage fully with session activities in order to receive attendance credit. It is recommended that students attend the 10 Capstone lectures in the first year of the programme.

Individual Summative Assignment – 25% of the total course marks. In year 2, students will write an academic essay on one of the Capstone lecture topics. Essay questions will be provided by the MG488 course team and will be made available in Spring Term of the first year. Essays must consider application of management theory and practice. Students will submit their essays in the Autumn term of the second year.

MG488B Half Unit

GMiM Capstone Course - Management in Action

This information is for the 2024/25 session.

Teacher responsible: Dr Nadia Millington MAR 5.37

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Pre-requisites: Students must have completed GMiM Capstone Course - Management in Action (MG488A).

Course content: The capstone/ business project provides an opportunity to apply, integrate, and/ or deepen the knowledge, insights, and skills that students learn in the GMiM Master's programme at LSE or an affiliate university that forms part of CEMS.

The project is a quasi-academic/ applied project which aims to analyse a real-world problem in a broadly related domain of the master's program at one of LSE's corporate partners.

More specifically a quasi-academic / applied project requires students to support their analysis of the client partner's challenge / brief, with relevant theory - sourced from academic journals - and with some primary data collection, leading to an evidence-based analysis and compelling recommendations. Every effort must be made to collect some first-hand evidence using standard research methodologies, but in different ways and to different degrees depending on the project.

Criteria for evaluation:

- 1 Clarity of Project Scope: Assesses the coherence and precision of the project's objectives and deliverables.
- 2 Use of Academic Theory and Research: Assesses how effectively theory and research from academic journals, whether taught in the degree program or independently sourced, are utilised to enhance the analysis and recommendations of the project.
- 3 Robustness of Research Methodology: Evaluates the quality and reliability of the data collection and data analysis approaches employed.
- 4 Strength of Recommendations: Assesses the thoroughness and implementability of the recommendations in the context of the client partner's objectives and deliverables.
- 5 Quality of Final Presentation: Considers the effectiveness of the final presentation, including oral clarity, slide design, presentation flow and overall delivery.
- 6 Effectiveness of Client Management: Additionally, your effectiveness in managing client interactions and meeting their needs will be considered.

Project details:

The projects will be sourced by LSE and are allocated, on average to groups of 4-6 students.

Client partners range from large multinational organisations to small social enterprises, located both in the UK and globally.

Students will be asked to indicate their project preferences and every aim will be made to place students in one of their preferred projects by week 3 of the term.

Teaching: Within the first 3 weeks of the term, the course leader is responsible for 3 separate lectures

- Course introduction
- Project Introduction
- Project kick-off

Further details about these sessions can be found in your timetable.

In the third week of the term/ beginning of the 4th week, each team will be provided with a dedicated faculty coach who will

1 provide guidance and advice throughout your project

2 approve your research ethics form - Student groups must complete an online Ethics Review form for their project.

3 if required, co-sign a non-disclosure agreement with your client partner and other members of your team. Should the client request one, a standard LSE non-disclosure agreement is available (see Moodle/ dom.gmim), but students may also be required to sign company-specific non-disclosure agreements.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students are expected to work with their client to produce work products as agreed including progress reports. It is important to establish expectations around feedback and interim progress reports, with your clients early.

The faculty coach may also require sight of certain work products to keep the team on track, but there is no formal deadline for any formative course work as each project is so idiosyncratic.

Indicative reading: There are no specific readings for this course since all the projects differ greatly. However, many student groups utilise interviews / qualitative research as part of their data collection. The following book is particularly useful: An Introduction to Qualitative research – UWE Flick.

Assessment: Project (65%) and class participation (10%) in the AT and WT.

Essay (25%, 2000 words) in the AT.

Student groups will be assessed via:

- An oral presentation (approx. 30 minutes)
- Written material - PowerPoint Slides of the oral presentation + appendices illustrating evidence in support of analysis and recommendations. There is no specific word count for this submission, but all written material must conform to LSE standards of post-graduate academic work, including explicit prohibitions against plagiarism.

Deadline for presentations will be established in the first week of the course.

For details relating to class participation and the essay, see MG488A course guide.

MG492 Half Unit

Data Governance: Privacy, Openness and Transparency

This information is for the 2024/25 session.

Teacher responsible: Prof Edgar Whitley (MAR.4.32)

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation and MSc in Media and Communications (Data and Society). This course is available as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>)

Course content: The course provides a detailed consideration of the key elements of the concept of informational privacy, the open data movement and transparency. These topics lie at the intersection of diverse contemporary issues including, public sector reform, human rights, digital ecosystems and social networking, and the global and national regulation of business. The course content is international in focus, and reviews contemporary issues arising from new technologies, new policies of governments, new practices and business models in the private sector. Topics include personal privacy and identity systems; motivations for information sharing and transparency and its potential for driving beneficial change; transformations in the management of government information and processing practices; the technological and regulatory challenges faced by public sector and business; the protection of sensitive personal data including medical and financial information; data-mining in the context of national security and anti-terrorism policies; communications surveillance policies; behavioural studies of privacy attitudes and the evolution of trust and consent in online environments. The course enables students to develop their understanding of the challenges presented by new informational regimes, their regulatory development and emerging governance structures.

Teaching: 20 hours of lectures and 10 hours of seminars in the WT.

A reading week will take place during Week 6. There will be no teaching during this week.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Classes are based around reading and discussing selected journal articles. Formative feedback is provided on class participation. In addition, students will complete a formative essay plan on which feedback will be provided.

Indicative reading:

- Elliot, M., Mackey, E., O'Hara, K., and Tudor, C. (2020). The anonymization decision-making framework (Second edition.), UKAN Manchester (available at <https://ukanon.net/framework/>).
- ENISA (2015). Privacy and Data Protection by Design, (available at <http://www.enisa.europa.eu/activities/identity-and-trust/library/deliverables/privacy-and-data-protection-by-design>).
- van Maanen, G. (2023). Studying open government data: Acknowledging practices and politics, Data & Policy 5.
- Kaye, J., Whitley, E. A., Lund, D., Morrison, M., Teare, H., and Melham, K. (2014). Dynamic Consent – A Patient Interface for 21st Century Research Networks, European Journal of Human Genetics 23(2), 141–146.
- Murray, A. (2010). Chapter 18: Data protection, in Information technology law : the law and society , Oxford University Press

Oxford

Assessment: Coursework (20%, 800 words) and essay (70%, 5000 words).

Class participation (10%) in the WT.

10% class participation.

20% 800 word "blog" article that summarises the key argument of the research essay.

70% 5000 word research essay on an approved topic

MG493

Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Bethania Mendes De Brito Antunes MAR 5.27

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

Course content: This course consists of an academic dissertation in which students explore a research question that is grounded in the academic literature. While students will be assigned a dissertation supervisor, the supervisor will only provide guidance as needed – students are expected to take the lead and demonstrate their ability to conduct independent research. Students can also apply for a Links project and, if accepted, will conduct research on an HR question posed by the Links sponsor. More information about Links projects will be provided in class.

Teaching: 15 hours of lectures in the AT. 1 hour and 30 minutes of lectures in the WT.

Lectures in AT will introduce students to planning a research project and to quantitative and qualitative research methods. Students will be expected to work independently on preparing a dissertation proposal, to be submitted at the end of AT. Supervisors will be assigned during the first few weeks of WT. Students selected for the Links Project will have 1.5 hours of lectures in the Winter Term (WT).

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will work with their dissertation supervisors in order to gauge their progress.

Indicative reading: Students will be instructed on how to conduct literature searches to find readings relevant to their research project.

Assessment: Dissertation (100%).

MG496

Study Skills and Contemporary Topics in Information Systems and Digital Innovations

This information is for the 2024/25 session.

Teacher responsible: Dr Antonio Cordella MAR 4.35

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is not available as an outside option.

Course content: This course provides students with both a

broader context for the study of information systems and digital innovation as well as the essential skills relevant to the MISDI programme.

The course will discuss the most contemporary trends in information systems and digital innovation and provide an overview of the changing nature and environment of information technology. It will include seminars by various visiting speakers from academia and industry who discuss a wide range of issues relevant to contemporary information systems. It will also offer an overview of different IS research domains and trends.

Career advice, study skills, and other practical skills will be provided.

Teaching: 10 hours of lectures in the AT. 10 hours of lectures in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Indicative reading: Burrell, J. 2016. "How the Machine 'Thinks': Understanding Opacity in Machine Learning Algorithms," *Big Data & Society* (3:1), p. 2053951715622512.

Kohli, R. and Melville, N.P., 2019. Digital innovation: A review and synthesis. *Information Systems Journal*, 29(1), pp.200-223.

Nambisan, S., Lyytinen, K., Majchrzak, A. and Song, M., 2017. Digital Innovation Management: Reinventing innovation management research in a digital world. *Mis Quarterly*, 41(1).

Rossi, M., Mueller-Bloch, C., Thatcher, J.B. and Beck, R., 2019.

Blockchain research in information systems: Current trends and an inclusive future research agenda. *Journal of the Association for Information Systems*, 20(9), p.14.

Other books and journal articles will be recommended.

Assessment:

The course is not formally assessed.

MG497 Half Unit

Dissertation: MSc Management and Strategy

This information is for the 2024/25 session.

Teacher responsible: Dr Jörn Rothe, MAR.6.13

Availability: This course is compulsory on the MSc in Management and Strategy. This course is not available as an outside option.

Course content: The dissertation consists of a research project within the subject of management. Students work on this project individually under the guidance of a dissertation advisor. The dissertation should make a contribution towards understanding a topic or question related to management based on original analysis and empirical evidence.

Teaching: There will be an introductory meeting, which will set out the requirements for the dissertation, the process, caution of plagiarism, etc. After this meeting students are welcome to approach staff with preliminary ideas in one-to-one meetings. In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will submit a preliminary proposal by the end of Autumn Term and will be allocated a dissertation advisor, under whose guidance they will complete a detailed project proposal by the end of Winter Term. Students work on their dissertation over the summer, with supervision available until the end of the Summer Term.

Assessment: Dissertation (100%, 6000 words) in the post-spring term.

MG4A1

Introduction to Studying for GMiM

This information is for the 2024/25 session.

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is not available as an outside option.

Course content: The course is divided into the following subject areas:

- Introduction to maths for economics
- Impact and Influence for Young Professionals
- Careers
- Alumni
- Introduction to quantitative analysis: Installing and navigating R
- Understanding company accounts

Introduction to maths for economics

This is for all students and the key learning objectives cover:

- 1 How to compute and draw the slope and the intercepts of a linear function.
- 2 How to graph a function: linear, quadratic, min, max,
- 3 Solving a linear equation of degree one and solving a linear system of two equations and two unknowns.
- 4 Partial derivatives of a polynomial in one variable. Differentiation of a polynomial and a Cobb-Douglas function of two variables with respect to each variable. Finding the maximum or the minimum of a one-variable function.
- 5 Computing the expectation of a discrete random variable.

Impact and Influence for Young Professionals

For one day students attend an engaging and highly participative workshop at the Royal Academy of Dramatic Arts, covering a variety of topics including communication styles, personal behaviour insights, physical presence, vocal presence, overcoming stage fright, influencing others, structuring presentations, handling challenging questions, networking and making a positive first impression. Individual coaching and feedback is provided throughout the day, with a focus on increasing self-awareness and personal impact.

Careers

Various interactive sessions are delivered throughout the two weeks by our dedicated GMiM Careers Consultant. This includes: Kick Start Your Job Application, Start Your Internship Search and Team Dynamics. 1-2-1 sessions are also available to book throughout the two weeks.

Alumni

Alumni are invited to a panel(s) to share their experiences of GMiM and where they are now. A variety of alumni are invited to attend and network with students, with the aim that the panel is made up of diverse career pathways and GMiM second year tracks.

Introduction to quantitative analysis: Installing and navigating R

Students will attend an R workshop to install R and RStudio. The session will provide an introduction to:

- the RStudio environment and the application to MY courses
- understanding R syntax and basic R concepts (calculations, variables, and vectors)

R is the statistical programming language that is used in MY451 (Introduction to Quantitative Analysis). MY451 is one of the core courses in the Autumn term. While no prior knowledge of R (or indeed statistics) is assumed for MY451, this workshop can help smooth your first few weeks. All students will be provided with instructions of how to download the R package onto their laptop and navigate within the programme.

Understanding company accounts

Two pre-recorded online lectures are available for students to watch during pre-sessional.

Writing Skills for postgraduates

Sessions titled 'Navigating the GMiM' take place throughout the two weeks, including discussion about writing skills. This is particularly helpful for students who have backgrounds outside the social sciences and humanities who are transitioning to postgraduate work. Topics covered include identifying and making an argument and the fundamentals of essay writing.

Teaching: Sessions will be delivered during the two week pre-sessional activities prior to Autumn Term. Rounding out the schedule is a full programme of talks and activities designed to smooth your transition to postgraduate study at LSE.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Indicative reading: Introduction to maths for economics:

The following book is good and it is open source.

- Link: <chrome-extension://efaidnbmninnbpcjpcglcglcfindmkaj/https://www.stitz-zeager.com/Precalculus4.pdf>

The chapters we cover:

- Chapter 1 (functions).
- Subchapter 8.1
- Appendix A.6 (systems of equations).

These readings should cover points 1-3 of the key learning objectives above. We strongly recommend that students read this in advance of the pre sessional if they are new to this material.

Introduction to quantitative analysis: Installing and navigating R:

If you are new to statistics MY451 starts from first principles and there is no requirement to do any pre reading. However, you may wish to look at the MY451 course pack to give you a head start:

- The course pack for MY451 is available to download at: <https://lse-methodology.github.io/MY451/>. You can also find it on the Moodle page of MY451 when it is open for enrolment.
- Spiegelhalter, D., 2019. The art of statistics: Learning from data. Penguin UK. An accessible and engaging introduction to statistics.

Assessment:

No formal assessment. Students may sit a mock exam at the end of the introduction to maths for economics course based upon the material to aid learning.

MG4A3 Half Unit

Incentives and Governance in Organisations

This information is for the 2024/25 session.

Teacher responsible: Dr. Pawel Dziejewski

Availability: This course is compulsory on the MSc in Management and Strategy. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Marketing and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: A knowledge of Mathematics and Economics.

Course content: The course uses economic theory to gain insight into issues related to internal organisation, structure, and management of firms. The course will draw on various fields including management science, industrial organisation and microeconomics. The course deals with three main topics:

- the provision of incentives in organisations;
- the use of information in markets and firms, and;
- the relationship between organisational structures and decisions.

A major theme concerns the question of how to provide incentives efficiently in organisations. Other important themes include efficiency, coordination, incompleteness of contracts and the use of the market versus internal exchange. The implications of asymmetric information are examined. Corporate governance is discussed in a principal-agent framework.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line

with Departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Indicative reading: Main text:

• Roberts J (2004), *The Modern Firm. Organizational Design for Performance and Growth*, Oxford University Press, UK.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG4A5 Half Unit Behavioural Strategy

This information is for the 2024/25 session.

Teacher responsible: Dr Veronica Rappoport, MAR.6.28

Availability: This course is compulsory on the MSc in Management and Strategy. This course is available on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: The objective of this course is to provide students with a critical appreciation of economics and game theory relevant for strategic management. This course will help students to understand how managers in the real world ought to read situations from an economic and strategic angle. The course emphasises the participation of firms in global markets, both for inputs of production as for output sales. Attention will be given to conceptual underpinnings.

Teaching: 30 hours of seminars in the AT.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be given formative feedback on group work undertaken during the weekly seminars.

Indicative reading: Reading material will be provided via Moodle

Assessment: Exam (85%, duration: 2 hours) in the January exam period.

Class participation (15%) in the AT.

MG4A6 Half Unit Strategic Competitive Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Jörn Rothe, MAR.6.13

Availability: This course is compulsory on the MSc in Management and Strategy. This course is not available as an outside option.

Pre-requisites: Students must have completed Behavioural Strategy (MG4A5).

Course content: The aim of this course is to build on and integrate industrial economics, game theory and management strategy to develop a framework for thinking about competition within markets and industries. Game theory provides the abstract theory of strategic interaction, and microeconomics (specifically industrial economics) provides the background on demand, production, and market structures. In this course we discuss the integration and application of these approaches in thinking about competitive strategy for firms in markets.

This course focuses on the strategic aspects of competing against other firms within the same industry

The course focuses on the strategic aspects of competing against other firms within the same industry. It starts with an introductory industry case study, and then investigates why a purely empirical approach to strategy cannot work. It then covers market definition,

market structure, factors of production, and the estimation of cost and demand. It then analyses price competition in its relationship with market structure, first from a static perspective, which is then extended to a two-stage and then a fully dynamic perspective, which allows analysing collusion and price wars. The course then focuses on the strategic dimension of innovation and competition in R&D, discusses market entry and exit, and brings the topics together in an example of an intra-industry study of strategic competition. In this way the course provides a theoretical framework and relates theory to examples and case studies.

Teaching: 20 hours of lectures and 8 hours of seminars in the WT. 2 hours of lectures and 1 hour of seminars in the ST.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Indicative reading: There is no fully adequate textbook for this course.

Indicative texts for background reading are David M. Kreps, *Microeconomics for Managers*, 2nd edition, Princeton University Press, 2019 (selected chapters) and D Besanko, D Dranove, M Shanley and S Schaefer, *Economics of Strategy*, 7th edition, Wiley, 2017.

A detailed reading list will be provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG4A8 Half Unit Strategy for the Information Economy

This information is for the 2024/25 session.

Teacher responsible: Dr Jörn Rothe, MAR.6.13

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: Basic knowledge of economics.

Course content: The internet has created many new market opportunities. Web-based technology allows for new kinds of products and market interactions. Understanding the design and functioning of these new markets is central for business strategy. This course develops the relevant economic principles and applies them to the formulation of strategies for the provision of information goods and the competition between online market platforms.

The course examines the strategic aspects of the provision of information goods (such as news, music, software, search results) and strategic competition in platform markets. Topics include the pricing of information goods, versioning and bundling, switching costs and network effects. The course provides a theoretical framework and relates theory to examples and case studies.

Teaching: 10 hours of lectures and 9 hours of seminars in the AT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Two exercise sets.

Indicative reading: Hal R. Varian: *Intermediate Microeconomics*,

W.W.Norton, 2014 (selected chapters); Carl Shapiro and Hal R. Varian: Information Rules, HBS Press, 1999 (selected chapters). A detailed reading list will be provided at the beginning of the course.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG4A9 Half Unit

Business Strategy, Management and Analytics

This information is for the 2024/25 session.

Teacher responsible: Dr Xu Li

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD) and MSc in Human Resources and Organisations (International Employment Relations/CIPD). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

Course content: A basic grounding in the key management disciplines for students specialising in Human Resource Management. The aim of the course is for students to acquire a general understanding of the business and managerial context in which human resource management takes place. Course contents include management theory, business strategy, creativity and innovation management, accounting and finance. Successful students will become intelligent discussion partners on these subjects and critical readers of strategic and financial information and the business press.

Teaching: 20 hours of lectures and 20 hours of seminars in the AT. 2 hours of lectures in the ST.

Students are expected to prepare for, and contribute to, the seminars. Seminars will include group work, preparing and giving presentations, case analyses, small group discussions, and self-assessment exercises. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will complete a formative assessment. Details will be provided in class.

Indicative reading: Grant, R. (2021) Contemporary Strategy Analysis, 11th Edition

Flamholtz, E. (1993) Human Resource Accounting, 3rd Edition

Kaplan, R. & Atkinson, A. (2014) Advanced Management Accounting, 3rd Edition

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Group essay (40%) and class participation (10%).

MG4B1 Half Unit

Corporate Strategy

This information is for the 2024/25 session.

Teacher responsible: Dr Jordi Blanes I Vidal MAR 6.08

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme) and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: Students will need to have some understanding

of microeconomics and knowledge of basic statistical methods would be an advantage

Course content: This course is an introduction to the strategic management of modern diversified firms. It studies how the firm's portfolio of products and its internal organisation can be designed to maximise corporate performance.

The course addresses the following questions facing modern managers: what products and activities should the firm focus on? Which tasks should be subcontracted and which should be carried out inside the firm? How should the firm be organised internally in order to coordinate and motivate employees, managers and other stakeholders? How should the firm's scope and internal organisation adapt to changes in the environment?

Teaching: 30 hours of lectures in the WT. 2 hours of lectures in the ST.

Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be required to undertake the analysis of two Corporate Strategy problems which will be marked and handed back with feedback.

Indicative reading: Corporate Strategy, Tools for Analysis and Decision-Making, Phanish Puranam and Bart Vanneste, First Edition, Cambridge University Press, 2016.

Assessment: Exam (80%, duration: 2 hours) in the spring exam period.

Class participation (20%).

MG4B3 Half Unit

International Marketing: A Strategic Approach

This information is for the 2024/25 session.

Teacher responsible: Prof Amitav Chakravarti MAR 6.31

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Management and Strategy, MSc in Operations Research & Analytics, MSc in Social Innovation and Entrepreneurship and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of a simulated case study to develop participant's skills at analysing and making sense of complex real world business situations.

Teaching: 30 hours of seminars in the AT.

Students on this course will have a reading week in Week 6, in line with Departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in

the classroom.

Indicative reading:

- Baker, M. J. and Saren, M. (eds.) (2014) *Marketing theory: a student text*. SAGE Publications Ltd. (2nd Edition).
- Alex Chernev (2011), *Strategic Marketing Management* (6th edition), Cerebellum Press
- Philip Kotler and Gary Armstrong (2001), *Principles of Marketing* (9th edition), Prentice Hall
- Philip Kotler and Kevin Keller (2011), *Marketing Management* (14th edition), Pearson PrenticeHall
- Homburg, C., Kuester, S. and Krohmer, H. (2009), *Marketing Management: A Contemporary Perspective*, McGrawHill
- Jobber, D. (2010), *Principles and Practice of Marketing* (6th edition), McGrawHill
- Lambin, J-J, Chumpitaz, R. & Schuiling, I. (2007), *Market-driven management: Strategic and operational marketing* (2nd edition). London: Palgrave Macmillan

Further references will be provided at the commencement of the course.

Assessment: Take-home assessment (50%), group project (40%) and class participation (10%) in the AT.

The group project is a non-assessed presentation and an assessed project report of 2,500 word max.

The take-home assessment is an individual assignment.

MG4B6 Half Unit

Design and Management of Organisations

This information is for the 2024/25 session.

Teacher responsible: Prof Yona Rubinstein MAR 6.26

Availability: This course is compulsory on the MSc in Management and Strategy. This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange and MSc in Management (1 Year Programme). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: In this course we investigate aspects of management and the internal organisation of the firm from birth to end.

What makes a successful entrepreneur? Are managers subject to human biases in decision making?

Our starting point is that entrepreneurs and managers are human. We neglect neither general heuristics nor biases exhibited by individuals and groups and their impact on firms' performance.

We further recognise that they make decisions in situations in which information is not perfect and not symmetrically shared, neither internally with their employees nor externally. We also consider the capabilities of organisations to design management strategies to cope with that.

How can firms attract and select the 'right' employees? Can pay and promotions be structured to screen the best workers and extract their efforts? Should firms develop employees' talent and if so, how? Why do firms form teams and how are these used most effectively? Do experts follow the crowd? Why do they turn to be "yes-men"? Can pay incentives be structured to motivate experts to share their private knowledge?

Design and Management of Organisations introduces students to a set of conceptual tools to cope with these key managerial challenges and critically evaluate contemporary management approaches.

The organising principle of much of the content of the course has its conceptual origins in economic strategy and behavioural economics applied to issues that are relevant to management. Additionally we draw upon findings from psychology and sociology.

The course complements MG4A3 (Incentives and Governance in Organisations) but can be taken as a stand-alone course.

Teaching: 33 hours of combined lecture/seminars in the WT and 2 hours of combined/lecture seminars in the ST. Students on this course will have a reading week in Week 6, in line with Departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 problem sets in the WT.

Multiple exercises will be provided throughout the term and will be discussed during lectures and review sessions. In addition a major problem set will be circulated at the end of the week 5. This problem set will be discussed in class for feedback purposes only.

Indicative reading: The first set of slides will be provided during lecture 1 and subsequent sets will be posted online. These slides constitute the backbone of the course. You are expected to flesh out the slides using models, graphs, and examples discussed during the lectures.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG4B7 Half Unit

Leading Organisational Change

This information is for the 2024/25 session.

Teacher responsible: Dr Dorottya Sallai MAR 4.10

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MRes/PhD in Management (Employment Relations and Human Resources), MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Management of Information Systems

and Digital Innovation and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit. Exceptional permission cannot be granted to take this course where it clashes with another course.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>). The course is not open for students to audit.

Course content: The aim of the course is to provide students with different theories to understand the process and consequences of organisational change and in doing so addresses the following issues: type of organisational change, creating readiness for organisational change and leading change, the change agent, strategies for change, resistance to change and evaluation of and institutionalization of organisational change. Models and frameworks for analysing and diagnosing change; the role of the change agent, leading change from the top; strategies of change; understanding key stakeholders to deliver change, reactions to change; theory and methods of evaluation of organisational change and reinforcing change interventions. The course covers contemporary issues in change management.

Teaching: 15 hours of lectures and 9 hours of seminars in the WT. The teaching is highly participative and includes lectures and seminars. Group working is an integral part of the course and students are expected to actively engage throughout the course. Students are expected to prepare for and contribute to each session. Seminar work will include case analyses and small group discussions. This course includes a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework:

- Students will be required to write a 1000-word case analysis and will be provided with feedback
- Mid-term online quiz

Indicative reading: The course relies heavily on journal articles and the use of case studies.

A full reading list will be provided at the beginning of the term.

There is no required text. Indicative readings include: Hayes, John. (2018) *The Theory and Practice of Change Management*. Fifth Edition. Palgrave

Assessment: Exercise (20%) and case analysis (80%) in the WT. Case Analysis (2000 words): Students will receive a case that they need to analyse.

Simulation Exercise: Students participate in a simulation game during the term.

MG4B8 Half Unit Not available in 2024/25 Evolutionary Psychology and Management

This information is for the 2024/25 session.

Teacher responsible: Dr Satoshi Kanazawa MAR 6.15

Availability: This course is available on the MSc in Management and Strategy. This course is available as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: Principles of evolutionary psychology. The nature and limitations of the human brain as an evolved and adapted organ. Evolutionary origins of cognitive biases, and their effects on organisational behaviour. Sex differences in organisational behaviour. The importance of physical attractiveness and general intelligence in organisational behaviour. "Discrimination" in labour market. Evolutionary psychological perspectives on

cooperation, reciprocity, altruism, hierarchy, and leadership in modern corporations. Evolutionary origins of organisationally relevant emotions such as envy, spite, and positional bias. This course introduces the evolutionary psychological perspective on business and management. The emerging science of evolutionary psychology sheds entirely new light on, and offers different solutions to, old problems of management, such as glass ceiling, occupational sex segregation, sexual harassment and suboptimal decision making, and points to new potential problems.

Teaching: 20 hours of lectures and 10 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: One class presentation and one essay based on the class presentation.

Indicative reading: Browne, Kingsley R. 2002. *Biology at Work: Rethinking Sexual Equality*, New Brunswick: Rutgers University Press; Kanazawa, Satoshi. 2012. *The Intelligence Paradox: Why the Intelligent Choice Isn't Always the Smart One*. Pinker, Susan. 2008. *The Sexual Paradox: Troubled Boys, Gifted Girls and the Real Difference Between the Sexes*.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MG4B9 Half Unit Not available in 2024/25 The World Trading System

This information is for the 2024/25 session.

Teacher responsible: Dr Veronica Rappoport

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management, MSc in Finance and Risk and MSc in Management and Strategy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Basic Knowledge of Mathematics and Economics

Course content: The course studies a key component of the "globalization" process: the negotiation, implementation and implications of international trade agreements (ITAs). These include the World Trade Organisation and the fast-growing web of regional trade agreements. We analyse the challenges and opportunities faced by companies engaged in the global economy in this context. The course relies on recent theoretical and empirical research to gain insight into the motivations for ITAs and their consequences for consumers and firms. Globalisation - trends in the international economy and overview of their causes and effects. The sources of international trade. Trade barriers - restrictions to international trade and their consequences. The economics and politics of international trade agreements. The rules, accomplishments and shortcomings of the GATT/WTO system. Regional trade agreements - motivation, implications, and recent trends. The costs and benefits from exporting for individual firms. Challenges and opportunities for national and multinational firms in the global economy.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: In-class exercises.

Indicative reading:

- Robert Feenstra and Alan Taylor, *International Economics*, Worth Publishers, 2008.
- Kyle Bagwell and Robert W. Staiger, "The Economics of the World

Trading System," MIT Press, 2004.

- The World Trade Organisation, "The WTO and preferential trade agreements: From co-existence to coherence," World Trade Report, 2011.
- Bernard M. Hoekman, Aaditya Mattoo, Philip English (editors), "Development, Trade, and the WTO: A Handbook," World Bank, 2002.
- Andrew Bernard, J. Bradford Jensen, Stephen Redding and Peter Schott, Firms in International Trade, Journal of Economic Perspectives 21(3), 105-130, 2007.

Assessment: Class participation (10%), group assignment (40%) and in-class assessment (50%) in the AT.

The assessment consists of Group assignments (40%), class participation (10%) and an in-class exam during the last week of the term (50%).

MG4C2 Half Unit Organisational Behaviour

This information is for the 2024/25 session.

Teacher responsible: Dr. Aurelie Cnop

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available on the CEMS Exchange, MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Organisational Behaviour), MSc in Marketing and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available in the Autumn Term only.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: This course seeks to understand individual attitudes and behaviour in an organisational context. Specifically, we primarily take a psychological perspective to understanding human behaviour at work by reviewing psychological theories as they apply to organisations and critically evaluating the associated empirical evidence.

Key topics include: personality and individual differences, work motivation, decision-making, power, leadership, group processes and organisational culture.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. The teaching is highly participative and includes lectures and seminars. The course is demanding of students and its success depends partly upon student commitment and willingness to participate fully.

Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to participate in a take-home practice exam in the AT.

Indicative reading: The course relies heavily on journal articles. An extensive reading list is provided in the syllabus at the start of the course. No suitable textbook exists but students may wish to consult one of the following:

- Buchanan, D. A. and Huczynski, A. A. (2019). Organizational Behaviour (10th ed.). Pearson
- Porter, L. W., Bigley, G. A., & Steers, R. M. (2002). Motivation and work behavior (7th ed.). McGraw-Hill.

- Staw, B. M (2004). Psychological dimensions of organizational behavior (3rd ed.), Prentice-Hall.

Assessment: Online assessment (100%) in January.

The online assessment will be a 12 hour online exam during the January exam period.

MG4C3 Half Unit Information Technology and Service Innovation

This information is for the 2024/25 session.

Teacher responsible: Dr William Venters MAR 4.33

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: The course aims to give the students theoretical and practical insights into the key issues informing the design of contemporary digital technology (IT) and their commercialisation. The course relates the diversity of the design challenges facing contemporary IT development including the incorporation of Artificial Intelligence within IT innovation projects. It embraces the shifting conditions for small teams of developers to design significant services in the context of technology-based startups, or as part of entrepreneurship within an existing enterprise or public institution. The design challenges relate to constantly shifting possibilities, for example, the use of LLMs as interfaces to digital systems, the use of predictive AI within innovations, the capture and processing of digital data previously beyond reach, the ability to leverage interfaces (APIs, SDKs etc), and the expanding possibilities for reaching end-users in new ways. The course is constructed as the meeting of theory and practice. The former through the presentation and discussion of theoretical themes aimed at sharpening the student's ability to reason about contemporary design challenges and opportunities. This aspect is also examined through an individual essay. The practical design skills are honed through a group design project running throughout the course. Conducting this group design project will engage students in highly detailed and constructive design discussions leading to the submission of a designed IT artifact with a commercialisation plan. The course neither requires, nor teaches detailed software programming techniques, but instead focuses on teaching IT design skills. Topics addressed will be: Agency and Artificial Intelligence, Digital infrastructure innovation; Digital platform strategies; Designing technology affordance; Understanding technology performances; The technological organisation; Commercialising digital innovation, Global crowd innovation; Privacy by design. The weekly seminars will consist of presentations and discussions offering students opportunity to critically reflect on theoretical and pragmatic issues related to the subject matter of the course.

Teaching: 20 hours of lectures and 10 hours of seminars in the WT. A reading week will take place in W6. There will be no teaching during this week.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Classes are based around both the design group projects, as well as reading and discussing selected journal articles. Formative feedback is provided on class participation.

Indicative reading:

- Boden, M. A. (2016). AI: Its nature and future. Oxford University

Press.

- Brown, T., & Katz, B. (2009). *Change by design: how design thinking transforms organizations and inspires innovation*. [New York]: Harper Business.
- Crawford, K. (2021). *The Atlas of AI*, Yale University Press.
- Cusumano, M. A., et al. (2019). *The Business of Platforms: Strategy in the Age of Digital Competition, Innovation, and Power*, HarperBusiness.
- Ekbja, H. R. and B. A. Nardi (2017). *Heteromation, and Other Stories of Computing and Capitalism*, MIT Press.
- Friedman, T. L. (2017). *Thank you for being late: An optimist's guide to thriving in the age of accelerations*. Picador USA.
- Gothelf, J., & In Seiden, J. (2013). *Lean UX: Applying lean principles to improve user experience*. Sebastopol, CA: O'Reilly Media, Inc.
- Herbert, L. (2017): *Digital Transformation: Build Your Organization's Future for the Innovation Age*. Bloomsbury Publishing.
- McAfee, A. & E. Brynjolfsson (2017): *Machine, Platform, Crowd*. WW Norton & Company.
- Norman, D. (1988): *The Psychology of Everyday Things*. USA: Basic Books
- Stickdorn, M., & Schneider, J. (2010). *This is service design thinking: Basics--tools--cases*. Amsterdam: BIS Publishers.
- Susskind, D. (2020). *A World Without Work: Technology, Automation, and How We Should Respond*, Henry Holt and Company.
- Tiwana, A. (2014). *Platform Ecosystems: Aligning Architecture, Governance, and Strategy*, Morgan Kaufmann.
- Wachter-Boettcher, S. (2017). *Technically Wrong: Sexist Apps, Biased Algorithms, and Other Threats of Toxic Tech*. WW Norton & Company.
- Willcocks, L., Venters, W., & Whitley, E. (2014). *Moving To The Cloud Corporation*. Palgrave Macmillan.
- Zuboff, S. (2019): *The age of surveillance capitalism: The fight for a human future at the new frontier of power*.

Assessment: Project (70%) and essay (30%, 1500 words).

The course has two summative elements: an individual theoretical essay (30%), and from the group design project, a technical report (50%) and a separate submission of an individual essay reflecting on the group work and on group participation (20%), which jointly comprise one summative component (70%).

MG4D2 Half Unit International Employment Relations

This information is for the 2024/25 session.

Teacher responsible: Dr Frido Wenten, MAR 5.17

Availability: This course is compulsory on the MSc in Human Resources and Organisations (International Employment Relations/CIPD). This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources) and MSc in Inequalities and Social Science. This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: A general knowledge of the social sciences is required.

Course content: The course introduces students to the comparative analysis of work and employment relations at national, firm and workplace level throughout the world. Students will learn and apply key concepts and theories to analyse dynamics of employment relations across increasingly global markets. The interests, strategies and policies of the main employment relations actors will be introduced and further explored through

cross-national comparative analysis, including the main 'models' of employment relations: the US/British, Japanese and European Social Models, as well as models of employment relations in transitional economies. Core themes to be evaluated in class, through case studies and written assignments include employee voice and labour conflicts; the organisation of work; diversity and pay gaps; global value chains and inclusive development; and technological change and the future of work.

The course ensures that students have both the conceptual and empirical grounding they need to understand, analyse and evaluate social, political and economic complexities and conflicts underpinning contemporary employment relations and HR practices. It also prepares students for optional courses offered in international comparative human resource management; cross-cultural management; or CSR and labour standards.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. The teaching is highly participative and includes lectures and seminars. Group working is an integral part of the course and students are expected to actively contribute to their class groups. The course is demanding of students, and depends for its success partly upon, their commitment and willingness to participate fully. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students are required to submit an essay outline in Week 4, matching the topic of their first summative essay.

Indicative reading: C Frege & J Kelly (Eds) *Comparative Employment Relations in the Global Economy*, Routledge, 2013; G Bamber, R Lansbury & N Wailes (Eds), *International and Comparative Employment Relations*, 5th edn, Sage, 2011; R Hyman, *Understanding European Trade Unionism: Between Market, Class and Society*, Sage, 2001; M J Morley, P Gunnigle & DG Collings (Eds), *Global Industrial Relations*, Routledge, 2006.

Assessment: Essay (40%, 2500 words) in the AT. Essay (50%, 2500 words) in the WT. Class participation (10%).

MG4D3 Half Unit Not available in 2024/25 Dark Side of the Organisation

This information is for the 2024/25 session.

Teacher responsible: Dr Jonathan Booth CKK.4.20

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Introductory OB course required. MG4C2, MG434, MG105, or equivalent course in another institution.

Course content: In this seminar, students will learn about a variety of topics related to the dark side of the organisation, (e.g. workplace aggression, retaliation, discrimination, substance abuse, corporate corruption, extreme stakeholder responses to organisations, and the dark side of impression management/emotional intelligence). In organisational behaviour courses, topics generally cover the 'light side' of the organisation and often explore how employee motivation and behaviour can promote beneficial outcomes for the organisation, as well as investigate the precursors to these more positive behaviours. However, not all

workplace behaviours and outcomes are beneficial and positive for employees and their organisations. Dark side behaviours typically lead to negative outcomes. Those who engage in these negative behaviours generally are aware that their actions can cause harm to others, their employer, and/or to them; hence, the instigator usually has intent. It is imperative that we more fully understand these behaviours and their antecedents and consequences so that we can identify these behaviours, as well as control, prevent, mitigate, or ameliorate their occurrences.

Teaching: 20 hours of seminars in the WT. 2 hours of seminars in the ST.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading:

- Anand, V, Ashforth, B. E., & Joshi, M. 2005. Business as usual: The acceptance and perpetuation of corruption in organizations. *Academy of Management Executive*, 19, 9-23.

Assessment: Essay (40%, 1500 words) and video (20%) in the ST. Class participation (20%) and group presentation (20%) in the WT. The video assessment submitted by students in ST consists of a take-home video presentation.

MG4D4 Half Unit Not available in 2024/25

Cross Cultural Management

This information is for the 2024/25 session.

Teacher responsible: Dr Hyun-Jung Lee MAR 5.34

Availability: This course is available on the MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: Some background in psychology and organisational behaviour, and/or international business is useful, but not required. This is a qualitative course, and the coursework requires a high level of writing skills. Students with purely quantitative skills may struggle.

Course content: The ability to communicate cross-culturally and to understand the diverse perspectives of people from different cultures is a necessity in order to achieve a competitive advantage in the global economy. The aims of the course are to understand the impact of culture on management; to identify the areas in which cultural differences pose challenges as well as opportunities in managing people across cultures; and, to become more self-aware of our cultural conditioning, individual biases and assumptions.

Topics include i) understanding cultures and cultural conditioning, ii) analytical frameworks of cross-cultural comparisons, iii) multicultural teams, iv) managing global organisations, v) ethical dilemmas and global responsibility of multinational corporations, vi) cross-cultural communication, vii) global leadership and cultural intelligence, viii) international assignments and global careers.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

Experiential learning is emphasised and team working is an integral part of the course. The teaching is highly participative. Students will be asked to make presentations and participate in various class exercises including role playing. The course is demanding of students and success depends partly upon student commitment and willingness to participate fully. Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: The following reading list contains some easily accessible introductory discussions. Most of the course reading is taken from journals. A full reading list will be provided in the syllabus at the start of the course.

- Gehrke, B. and Claes, M.-T. (eds.) (2014), *Global leadership practices: A cross cultural management perspective*, Palgrave Macmillan
- Steers, R. and Osland, J., et al. (2019), *Management across cultures* (4th ed.), Cambridge University Press
- Thomas, D. D., and Peterson, M. (2014). *Cross cultural management: Essential concepts*. (3rd edition). London: Sage.

Assessment: Essay (50%), project (40%) and class participation (10%).

The essay is completed individually, and the project is completed as part of a group.

MG4D5 Half Unit Leadership in Organisations: Theory and Practice

This information is for the 2024/25 session.

Teacher responsible: Professor Connson Locke, MAR.4.14

Availability: This course is available on the Global MSc in Management, Global MSc in Management (MBA Exchange), MBA Exchange, MRes/PhD in Management (Employment Relations and Human Resources), MSc in Accounting and Finance, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme), MSc in Marketing and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Priority will be given to Department of Management students. Students who are unable to get a spot on this course are welcome to audit lectures though priority for space will go to registered students.

Course content: This course is designed to provide students with the knowledge, skills and analytical capabilities needed to exercise leadership in organisations. It explores several facets of leadership and considers how leadership develops. The emphasis will be on application of theory and comparing and contrasting different approaches to leadership.

The course examines topics such as: leadership and management; trait, behavioural and contingency theories of leadership; individual differences in leadership; leadership development; transformational and transactional forms of leadership; and issues of gender and culture.

Teaching: 25 hours of seminars in the WT.

Each 2.5 hour session will include a combination of lecture and seminar work. Students are expected to prepare for and contribute to each session. Seminar work will include case analyses and small group discussions.

Students on this course will have a reading week in Week 6, in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will have the opportunity to write a formative case analysis essay during WT and receive feedback. Students will also complete in-class case discussions to prepare them for the case analysis essay.

Indicative reading: A full reading list will be provided at the beginning of the term. There is no required text. Indicative readings include:

Antonakis, J., Cianciolo, A.T., & Sternberg, R.J. (2004) Leadership: Past, Present and Future (Chapter 1). In Antonakis, J., Cianciolo, A.T. & Sternberg, R.J. (Eds.) *The Nature of Leadership*, pp. 3-15. London: Sage Publications. George, J. M. (2000). Judge, T., Bono, J., Ilies, R., & Gerhardt, M. (2002). Personality and leadership: A qualitative and quantitative review. *Journal of Applied Psychology*, 87(4), 765-780.

Assessment: Case analysis (100%) in the ST.

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is not available as an outside option.

Course content: The aim of the dissertation is for students to pursue an independent piece of research within the field of information systems. The dissertation is a quantitative or qualitative, theoretically informed, piece of research of IS-related questions. Students must obtain the approval of their advisor before embarking on any research. The course MY401 on research design and the course MG496 Study Skills and Contemporary Topics in Information Systems and Digital Innovations provide guidance and background material on undertaking dissertation work.

Arrangements for supervision:

Advisors will normally be allocated according to student dissertation proposals. The dissertation advisor will help the student identify an appropriate research question, and to work out a plan for a literature informed empirical study.

Teaching: Two courses prepare students for the dissertation: MY401 Research Design for Studies in Digital Innovation and MG496 Study Skills and Contemporary Topics in Information Systems and Digital Innovations. Students must follow both of these courses.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will use the feedback to the summative essay of the MY401 course as a starting point for the planning of their dissertation research project.

Assessment: Dissertation (100%, 8000 words) in the post-spring term.

An electronic version of the dissertation must be submitted on a specified date in late August (no paper copies are required). Penalties will be applied to any late submission. The word limit for the dissertation is 8000 words. The dissertation is critical to assessment on the programme.

MG4E2 Half Unit Marketing Management

This information is for the 2024/25 session.

Teacher responsible: Dr Haider Ali

Availability: This course is compulsory on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange) and MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential in building an effective marketing strategy. Participants are introduced to the subject at both strategic and operational levels. This course combines LSE's premier standing in the social sciences with cutting-edge management practices. By using a wide range of concepts, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop a widely applicable analytical tool-kit that relies on: (a) anticipating decisions that managers frequently face, (b) bringing to bear a wide range of fundamental, often competing social science theories to inform these decisions, (c) knowledge about empirical generalizations, and (d) knowledge about moderating conditions. Also, emphasis is placed on the use of case studies to develop participant's skills at analysing and making sense of complex real world business situations.

Teaching: 30 hours of seminars in the AT.

Course instruction will be conducted using lectures, case discussions, readings, and analysis of data.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of

MG4D7 Half Unit Dissertation: MSc MISDI

This information is for the 2024/25 session.

Teacher responsible: All members involved with MSc MISDI are involved in dissertation support.

our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: The formative will be undertaken by students in teams. For the formative students will undertake an exercise that will prepare them for the summative coursework which will be undertaken with the same team members.

Assessment: Exam (45%, duration: 3 hours) in the January exam period.

Class participation (10%) and group presentation (45%) in the AT.

MG4E7 Business Fundamentals

This information is for the 2024/25 session.

Teacher responsible: Heather Kappes MAR 6.21

Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.

This is a non-assessed introductory course.

Course content: The aim of the introductory Core is to deliver some critical prerequisites to incoming MSc Marketing students. For instance, a portion of the time is intended to impart basic knowledge in analytics/statistics in preparation for core courses. Other portions of the time will assist in career planning and how to get the most out of the programme.

Teaching: Roughly 12 hours of teaching over one week prior to the Autumn Term. Full details of this will be sent to offer holders as part of their offer pack. The schedule will also include a full programme of activities and talks designed to welcome you to the LSE and the MSc Marketing programme.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: No formal assessment.

Further references, especially for journal articles and HBS case studies, will be provided at the commencement of the course.

Assessment: Project (40%), class participation (10%) and take-home assessment (50%) in the AT.

Group Project (40%) - a non-assessed presentation and an assessed project report 2,500 word max

Individual take home assignment (50%)

Class participation (10%)

MG4E9 Half Unit

Marketing Analytics I: Consumer Analysis Fundamentals

This information is for the 2024/25 session.

Teacher responsible: Dr Yusuf Oc

Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.

Course content: This course lays down the foundations of Marketing Analytics which is an absolute essential in the age of Big Data. The broad objective of this course is to provide a fundamental understanding of marketing analytics and research methods employed by well-managed firms. The course focuses on integrating problem formulation, research design, questionnaire construction, sampling, data collection and data analysis to yield the most valuable information. The course also examines the proper use of statistical applications as well as qualitative methods, with an emphasis on the interpretation and use of results. Since analytics is the discovery and communication of meaningful patterns in data, this course will also provide students with an analytics toolkit, reinforcing basic probability and statistics while throughout emphasizing the value and pitfalls of reasoning with data. Applications will focus on connections among analytical tools, data, and business decision-making. Advanced analytical tools will be discussed in-depth in the follow-up course Marketing Analytics II.

Teaching: 30 hours of lectures in the AT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be engaged in analysing a number of cases, doing numerical problems, as well as analysis data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve numerical problems, case analysis, and analysing data sets).

Indicative reading:

- Dawn Lacobucci and Gilbert A Churchill Jr., Marketing Research: Methodological Foundations. 10th ed. South Western Educational Publication, 2009. ISBN-13: 978-1439081013

- Mercedes Esteban-Bravo and Jose M. Vidal-Sanz, Marketing Research Methods: Quantitative and Qualitative Approaches, Cambridge University Press, 2021

Assessment: Project (40%, 2500 words) and assignment (60%) in the AT.

The Group Project (40%) consists of a non-assessed presentation and an assessed project report 2,500 word max.

MG4F1 Half Unit

Marketing Action Learning Project

This information is for the 2024/25 session.

Teacher responsible: Dr Heather Kappes MAR 6.21

Availability: This course is compulsory on the MSc in Marketing. This course is not available as an outside option.

Pre-requisites: Completion of the MSc in Marketing pre-session course, MG4E7 Business Fundamentals.

Course content: Students are formed into groups and assigned to a company sponsor vetted by Department of Marketing staff. Companies vary from year to year but will range from large consumer goods corporations to midsize arts or telecom or food & beverage companies looking to launch new products or move into new markets, to small digital start-ups. Starting from a company brief, each group will identify core marketing issues where they can add value for their company sponsor, and will use the marketing techniques developed in the course to arrive at recommendations. Each group will produce an in-depth report that provides two critical classes of information: (a) Section 1 tells us how a "live"

business is being run and what makes it tick (or not) from a marketing value-creation point of view, and (b) Section 2 provides data-based, scientific analysis of what the firm could do better for a more sustainable and competitive future.

Teaching: 4 hours of lectures in the AT. 2 hours of lectures in the ST.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Indicative reading:

- Building a Marketing Plan, by Ho Yin Wong; Kylie Radel; Roshnee Ramsaran-Fowda, Harvard Business School Publishing.
- Writing Great Marketing Plans, 2005, by T. Caulkins, Kellogg's/ Northwestern University.
- The Marketing Plan Handbook Paperback – 1 Sep 2011 by Alexander Chernev

Assessment: Group project (90%) and reflective learning report (10%) in August.

Students will be expected to submit a project report in August

MG4F2 Half Unit

Marketing Analytics II: Analytics for Managing Innovations, Products and Brands

This information is for the 2024/25 session.

Teacher responsible: Pavel Kireyev

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Marketing and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: Marketing managers need to make a variety of decisions about, for example, product features, prices, advertising (online and offline), distribution, and sales compensation plans. In making these decisions, managers choose from among alternative courses of action in a complex and uncertain world. Increasingly, in this age of big data, companies that emerge as market leaders tend to be the ones that employ sophisticated marketing analytics. This course in marketing analytics will entail a deep-dive into state-of-the-art marketing analytics models that allow managers to make evidence-based decisions regarding launching new products or innovations and managing more mature products and brands. The course will focus upon the use of cutting-edge data analytic techniques to understand and inform managerial decision making with a primary focus on the formulation of dynamic marketing policies. The course is structured to enable the students to gain familiarity and deepen their knowledge and skills. The course will introduce techniques for advanced data visualisation, multiple regression analysis (including interaction effects), discrete choice modelling, and causal inference through A/B testing. Other topics may include panel data techniques, instrumental variables, difference-in-differences approach, regression discontinuity design, probability models for customer management, and propensity score matching. Applications and case studies will come from recent research in marketing and cover topics from commercial, social, and political marketing.

Teaching: 30 hours of seminars in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be engaged in analysing several data sets using the techniques learned in class. This will

set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve analysing data sets given to them).

Indicative reading:

- Mooi, E., Sarstedt, M., Mooi-Reci, I. *Market Research: The Process, Data, and Methods Using Stata*. Springer, 2017.
- Malhotra, N. *Marketing Research: An Applied Orientation*, Global (7th) Edition. Pearson, 2019.
- Angrist, J., Pischke, J.-S. *Mastering Metrics: The Path from Cause to Effect*. Princeton University Press, 2017

Assessment: Take-home assessment (55%) and group project (45%) in the WT.

MG4F3 Half Unit Digital Marketing

This information is for the 2024/25 session.

Teacher responsible: Dr Nicolette Sullivan MAR 6.22

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation, MSc in Marketing and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Pre-requisites: Students taking this course are expected to be able to demonstrate a strong foundation in quantitative analysis.

Course content: Marketing is evolving from an art to a science and decisions in new media are on the forefront of this transformation. This course is aimed at developing state-of-the-art knowledge in the area of online marketing (e.g., display ads and search ads, SEO, mobile marketing etc.) and social media (e.g., Twitter, Facebook, etc.). Furthermore, important topics of cross-cutting relevance to online marketing and social media will be addressed, including big data, data science, analytics, and integrative marketing. Many firms have extensive information about consumers' choices and how they react to marketing campaigns, but few firms have the expertise to intelligently act on such information. In this course, students will learn the scientific and strategic approach to marketing with hands-on implementation of online marketing and social media strategies (e.g., strategic design and launch of a website, implementation of SEO strategies, design and manage of a corporate social media account). Using simple yet powerful hands-on interactive models and exercises, the course will cover both theory and applications.

Teaching: 30 hours of lectures in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students have the opportunity to submit a formative coursework in the WT. The formative course work might be an in-depth case analysis of a new media company. Students might be requested to use theory and frameworks to make sense of a case. Students might also be requested reflect on analytics and conduct simple data analysis.

Indicative reading:

- Larsen and Draper (2015): *Internet Marketing Essentials*, Digital Textbook.
- Chaffey, D. and Ellis-Chadwick, F. (2019): *Digital Marketing. Strategy, Implementation, and Practice*. 7th Edition. Pearson Education.
- Laudon, K. C. and Traver, C. G. (2015), *E-Commerce 2015: Business. Technology. Society*. Prentice Hall.

More readings in form of academic research papers and media

outlets (e. g., The Economist) will be added for each week.

Assessment: Assignment (60%) and group project (40%) in the WT.

MG4F4 Half Unit Not available in 2024/25 MiM Capstone Course - International Management in Action

This information is for the 2024/25 session.

Teacher responsible: Dr Heather Kappes 6.21 MAR

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This Capstone Course builds connections between management theory and practice and equips students with the skills necessary to succeed in their managerial careers. The overarching teaching objective is to apply material learned in MiM courses to create managerial recommendations that can help a firm improve and defend its competitive advantage both immediately and for its future.

Before, during, and after an international trip, students will work in groups to tackle a client company's business problem(s). Students will need to balance company objectives, available resources, theoretical knowledge, and group members' knowledge and expertise. Success requires analytical techniques and reasoning as well as the ability to switch between considering the big picture and the fine-grained detail.

Teaching: 6 hours of seminars in the ST.

2 x 180 minute seminars plus approximately 40 hours of work during a one-week international trip the period after exams and summer term.

Formative coursework: Formative feedback will be provided through regular meetings with the instructor before and during the trip

Indicative reading: 1) Chernev, Alexander. *The Marketing Plan Handbook*, 2011.

2) Stine, Robert, and Dean Foster. *Statistics for Business: Decision Making and*. Addison-Wesley, 2011.

3) D Besanko, D Dranove & M Shanley, *Economics of Strategy*, John Wiley, 6th Edition.; A Dixit & B Nalebuff, *Thinking Strategically: The Competitive Edge in Business, Politics and Everyday Life*, Norton, 1998.

4) D M Kreps, *Microeconomics for Managers*, W. W. Norton (2004)

5) Block, Peter, and Grover Gardner. *Flawless consulting: A guide to getting your expertise used*. San Francisco, CA: Pfeiffer, 1981.

Assessment: Project (80%, 2000 words), reflective learning report (10%) and other (10%) in the post-spring term.

This course is assessed on a project report, an individual reflection on the project and a peer review from group members. Details will be discussed during seminars.

MG4F5 Half Unit Not available in 2024/25 Business in the Global Environment

This information is for the 2024/25 session.

Teacher responsible: Dr Veronica Rappoport-Redondo

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: In this course we study two key components of the process called 'globalisation'. First, we consider the negotiation, implementation and implications of international trade agreements. These include the World Trade Organisation and the fast-growing web of regional trade agreements. Second, we look at the process of globalisation at the level of industries, firms and nations. We seek a solid understanding of the external, economy-wide factors that affect the performance and management of

firms in today's global economy. The course relies on recent theoretical and empirical research. Topics include the changing structure of industries, the response of companies, both those based in the advanced industrial countries and those based in emerging markets, to increasing international competition; and the differences between countries in their institutions and policies.

Course topics:

- 1) Globalisation: trends in the global economy, overview of their causes and effects
- 2) The workings, accomplishments and shortcomings of the GATT/WTO system
- 3) Trade barriers: causes and consequences of restrictions to international trade
- 4) The economics and politics of international trade agreements
- 5) Implications of trade agreements for national and multinational firms
- 6) Location of Production: Theory of Comparative Advantages
- 7) Location of Production: Factor Endowments across countries
- 8) Location of Production: Testing empirically the predictions of the theory
- 9) Location of Production: Empirical Analysis, institutions as a source of competitive advantage
- 10) Foreign Direct Investment and International Contracts

Teaching: 10 x 180 minute seminars in the period after exams and spring term.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 piece of coursework in July.

Indicative reading: Giorgio Barba Navaretti & Anthony J Venables, *Multinational Firms in the World Economy*, Princeton, 2004
Robert Feenstra and Alan Taylor, *International Economics*, Worth Publishers, 2008

Kyle Bagwell and Robert W. Staiger, "The Economics of the World Trading System," MIT Press, 2004

The World Trade Organisation, "The WTO and preferential trade agreements: From co-existence to coherence," World Trade Report, 2011.

Assessment: Continuous assessment (20%) and group project (80%).

MG4F7 Half Unit Business Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Soner Baskaya

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: The course is designed to achieve an understanding of fundamental notions of data presentation and data analysis and to use statistical thinking in the context of business problems. The course deals with modern methods of data exploration (designed to reveal unusual or problematic aspects of databases), the uses and abuses of the basic techniques of inference, and the use of regression as a tool for management and for financial analysis.

Teaching: 15 hours of lectures and 9 hours of seminars in the AT. In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 project in the AT.

The two formative assessments will be in class exercises with two components. One component will help prepare students for the Project (i.e., an application of a statistical technique to solve a company problem or research question), and the other component

will help prepare students for the Final Exam.

Indicative reading:

• Statistics for Business Decision Making and Analysis, by Robert Stine and Dean Foster (S & F) second edition Pearson.

Assessment: Exam (70%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Project (20%, 3000 words) and continuous assessment (10%) in the AT.

MG4F8 Half Unit Managerial Economics and Quantitative Measurement for Social Entrepreneurs

This information is for the 2024/25 session.

Teacher responsible: Dr Yally Avrahampour MAR 5.24

With guest lecturer, Professor Saul Estrin

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: The course will start with an introduction to economics for social entrepreneurs, with attention focused on markets and market failures, notably externalities and public goods. Questions of social welfare and income inequality will also be discussed. The course introduces social enterprises as hybrid organizations with multiple objectives. We then move to a series of economics topics of particular relevance in analysing the problems of social entrepreneurs, namely the representation and analysis of firm costs; the measurement of costs; analysis of consumer demand; and measurement of performance.

The course continues by introducing techniques used to measure and monetize social impact including Social Return on Investment (SROI). We will critically assess the SROI performance measure by discussing the cost of capital of social enterprises and the determination of the counterfactual for assessing impact. We then consider debates relating to randomized controlled trials and lean data and accounting for environmental impact. The course ends by considering strategy for social enterprises.

Course Objectives

Students should learn:

- Key theoretical approaches in economics and quantitative measurement, which includes related quantitative methods, to understanding social innovation and entrepreneurship;
- Empirical findings - typically from recent economics, accounting and management research;
- The most important economic, accounting and quantitative/statistical insights, concepts, theoretical approaches required to set-up, manage, and scale up social innovation and enterprises;
- To relate theoretical and methodological insights, concepts and frameworks for social innovation and enterprise to real world phenomena and social problems through the use of case studies.

Teaching: 20 hours of lectures and 15 hours of seminars in the AT. Theoretical material and analytical frameworks from accounting and economics respectively of relevance to social entrepreneurs will be taught in the lecture slots, while the seminars will cover a relevant case study each week. Although the course covers two distinct disciplines, there will be an effort, where possible, to treat the issues in an integrated manner.

In addition, students are expected to attend two introductory sessions, each lasting two hours.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework:

- 1 Formative essay in the AT.
- Formative group feedback on other groups' presentations, twice in AT.

Indicative reading: Each week we draw on a variety of required and further readings. We also make suggestions regarding textbooks that provide background for the concepts outlined in the course.

For **Managerial Economics**, students without an economics background might start with the textbook by D.Begg, G. Vernasca, Fischer, Dornbusch (11th Edition) Economics, McGraw Hill. A more advanced treatment is contained in S. Estrin, D. Laidler and M. Dietrich, Microeconomics (6th Edition), Pearson.

Introductory Reading

There are also a number of books that inform the field, that students might wish to read in advance or during the course as background material.

A. Sen, 2009, The Idea of Justice, Harvard University Press

A.V. Banerjee and E. Duflo, 2011, Poor Economics, BBS Publications

R.L. Martin and S.R. Osberg, 2015, Going Beyond Better, Harvard Business Review Press

For **Quantitative Measurement** the textbooks representing these background readings are:

Weetman, P. (2019) Financial Accounting: An Introduction. (Available as an e-book through the LSE library).

Kaplan, R. & Atkinson, A. (2014) Advanced Management Accounting 3rd edition, Pearson

The following readings provide an introduction to accounting for social entrepreneurship:

Barker, R., Eccles, R. & Serafeim, G. (2020) "The Future of ESG is ... Accounting?" Harvard Business Review, December

Cohen, R. (2020) Impact: Reshaping Capitalism to Drive Real Change, Ebury Press

New Economics Foundation (NEF). (2007). Measuring Real Value: A DIY guide to social return on investment, available at https://neweconomics.org/uploads/files/cf0968d3256d6bffc_cim6bsty5.pdf

Assessment: Essay (90%, 3000 words) in the WT.

Class participation (10%) in the AT.

Class participation is based around student group presentations of cases.

MG4F9 Half Unit

Organisational Behaviour and Marketing for Social Entrepreneurs

This information is for the 2024/25 session.

Teacher responsible: Prof Connson Locke and Dr Aurelie Cnop, Organisational Behaviour

Prof Om Narasimhan, Marketing

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: The course is a rigorous examination of key insights, concepts and theoretical frameworks that are essential in understanding social innovation and enterprises from the perspectives of Marketing and Organisational Behaviour (OB). Students learn to understand, synthesise and relate these insights, concepts and theoretical frameworks to real-life phenomena and problems through interactive lectures, cases, and empirical studies. In a very practical sense, students will test this knowledge by application to cases relating to different types of social enterprises as well as by applying to social change in relation to such topics as motivation, team management, and organizational culture, in the Organisational Behaviour portion of the course, and segmentation, positioning and product adoption in the Marketing portion of the course.

More specifically, students learn:

- Key theoretical approaches (through the lenses of Organisational Behaviour and Marketing) to understanding social innovations and entrepreneurship;
- Empirical findings on how Organisational Behaviour and Marketing aspects of social innovations and enterprises are associated with social impact;
- A rigorous synthesis of the most important Organisational Behaviour and Marketing insights, concepts, and theoretical approaches to set-up, manage, and scale up social innovation

and enterprises;

- How to relate theoretical and methodological insights, concepts and frameworks for social innovation and enterprise to real world phenomena and social problems through applied case-based analysis in both Organisational Behaviour and Marketing;
- Essential knowledge and tools for the capstone/dissertation course.

Teaching: 30 hours of seminars in the AT.

Five weeks (15hrs) will focus on Organisational Behaviour and five weeks (15hrs) will focus on Marketing.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: For the Organisational Behaviour portion of the course, students will be expected to provide a written answer (maximum 1000 words) to any one of the cases assigned for class discussion. As the respective cases will be discussed in the class sessions for which they have been assigned, the individual write-up must be submitted at the beginning of the class session. For the Marketing portion of the course, students will be required to answer questions on a specific case.

Indicative reading:

- Madeline Powell, Stephen P. Osborne, "Can Marketing contribute to sustainable social enterprise?", Social Enterprise Journal, (2015) Vol. 11 Iss: 1, pp. 24-46.
- Bargsted, M., Picon, M., Salazar, A., & Rojas, Y. (2013). Psychosocial characterization of social entrepreneurs: A comparative study. Journal of Social Entrepreneurship, 4(3), 331–346.
- Davis, G. & White, C. (2015). How your company can change the world. Harvard Business Review (5), 48-55.

Assessment: Essay (50%, 2000 words) and take-home assessment (50%) in the WT.

Essay (Organisational Behaviour), take-home assessment (Marketing).

MG4G1 Half Unit

Understanding Social Problems for Innovation and Entrepreneurship

This information is for the 2024/25 session.

Teacher responsible: Professor Connson Locke and additional lecturers (TBC)

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: The aim of this course, together with Social Innovation Design (MG4G2), is to help you to better understand, design, lead, and grow a social enterprise. This course – MG4G1 – focuses on the first part of your entrepreneurial journey, starting with the crucial issue of understanding the social problem of your relevant target group. We will also discuss key elements of the entrepreneurial journey, such as Lean Startup, pivots and learning from failure, as well as how to engage with others, such as other entrepreneurs, investors, incubators and accelerators to help you reach your goals better.

At the heart of both MG4G1 and MG4G2 is a real-life, evidence-based design challenge for a social enterprise, in the form of a group project in a low-income neighbourhood in Nairobi or a township in Cape Town. The project starts with building a Theory of Change, based on your understanding of the social problem of your target group, anchored in fieldwork.

Teaching: 30 hours of seminars in the AT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Group project (40%) and learning log (20%) in the AT.

MG4G2 Half Unit

Social Innovation Design

This information is for the 2024/25 session.

Teacher responsible: Dr. Kerry Krige

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: This course builds on – and complements – the AT course MG4G1 'Understanding Social Problems,' and leads to the design of a fully-fledged, evidence-based social enterprise. Through this process you are introduced to the concepts, frameworks, methods, tools and evidence social entrepreneurs use to operationalise and deliver on their social innovation idea. Through interactive lectures, cases, guest speakers, group discussion and rigorous analysis you will identify and then critique the organisational and strategic approaches that apply to the social problem you are seeking to address. We explore as organisational form, the social enterprise and co-operative, as well as other 'invisible' approaches within the informal economy, and the implications this has on achieving goals of profit and purpose. During the module you will develop a proposal that addresses a social problem, analysing and arguing for, the best governance and management structures, and scaling and financing strategies. We engage with the reality of working in contexts of poverty and inequality, particularly with marginalised, isolated and excluded groups. How should you approach aligning with indigenous practice and building trust? Can trust be sustained, if you scale? And what risks should you anticipate as you diversify your funding? Lastly, we explore the implications of the global policy environment, and the growing institutional support for social enterprises as a means of achieving inclusive economies. Student teams will present their final social enterprise design to an external panel of experts, drawn from the field.

Teaching: 30 hours of seminars in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the WT.

MG4G4 Half Unit

Topics in Management Research

This information is for the 2024/25 session.

Teacher responsible: Prof Diane Reyniers MAR 6.07

Availability: This course is available on the CEMS Exchange, Diploma in Accounting and Finance, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Economics and Management and MSc in Management and Strategy. This course is available as an outside option to students on other programmes where regulations permit. This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: This course addresses various interesting topics which will be used to encourage creative and logical thinking, structuring of clear arguments and critical assessment of evidence. The focus is on discussion and interpretation of findings rather than statistical or econometric techniques. The intellectual backbone of the course is applied and empirical economics (including behavioural economics) and finance but wherever appropriate, contributions from the psychology, sociology and management literature will be discussed. We will mainly deal with issues which are amenable to rigorous empirical investigation. The course is designed around a set of empirical research papers. Examples of questions considered are whether pain killers are more effective when they are expensive, whether creative people cheat more, whether people overvalue their own ideas.

The main objective of the course is to enable students to comprehend and critically assess the management literature, to evaluate statements in terms of evidence and to detect false reasoning or logic. Students will gain confidence in expressing their own ideas. Topics vary each year (based on student feedback) but examples are the beauty premium, wages in finance, grit, self-stereotyping, optimism and entrepreneurship.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. Students on this course will have a reading week in Week 6, in line with Departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: One take-home mock exam in the AT.

Bowles, H.R., L. Babcock & L. Lai (2007) Social incentives for gender differences in the propensity to initiate negotiations: Sometimes it does hurt to ask. *Organizational Behavior and Human Decision Processes*, 103, 84-103.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

MG4J1**Introduction to Mathematics and Data Analysis for Managers**

This information is for the 2024/25 session.

Teacher responsible: Professor Connson Locke, MAR.4.14

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: The course is divided into two separate subjects: Data Analysis (Statistics) and Mathematics for Managers. The Data Analysis (Statistics) course is for all students and covers basic probability and statistics; hypothesis testing; analysis of variance; association, correlation and regression. It also includes basic training on data analysis software (STATA). It provides students with the basic analytical tools required in MG4F7 Business Analysis to analyse business data for decision making. The Mathematics for Managers course is an introductory mathematics course which covers the following topics with application reference to economics and business: Functions, Linear Equations, Basic Calculus, and Comparative Statics Analysis. It provides students with the basic analytical tools required in MG465 Managerial Economics to analyse models of product market and factor markets competition.

Teaching: 20 hours of lectures in the two weeks prior to the Autumn Term. Rounding out the schedule is a full programme of talks and activities designed to smooth your transition to postgraduate study at LSE.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Indicative reading: Statistics: Statistics: Anderson, D., Sweeney,

D., Williams, T., Freeman, J., Shoesmith, E. (2009). *Statistics for Business and Economics* (2nd edition), Hampshire: Cengage Learning.

Writing skills: Wallace, M. and Wray, A. (2011). *Critical Reading and Writing for Undergraduates* (2nd edition), London: Sage.

Assessment:

No formal assessment.

MG4J2 Half Unit**Social Business Design: Strategies for Enhancing Sustainable Impact**

This information is for the 2024/25 session.

Teacher responsible: Dr Nadia Millington MAR 5.37

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM) and Global MSc in Management (MBA Exchange). This course is available as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: A growing number of companies worldwide have launched social business subsidiaries as part of their agenda to effect positive change. Consequently, many reputable consulting firms such as BCG and Bain have established specialist departments focused on social business consulting.

A social business is an organization whose primary purpose is to address a social problem, such as homelessness, loneliness, access to education, malnutrition, or sustainability. Unlike a charity, a social business aims to achieve financial self-sustainability by reinvesting profits to further its social mission. The increasing popularity of social businesses and subsidiaries is evident, with more and more large and reputable corporations such as Unilever and Coca-Cola joining this movement. These organisations commit and combine significant resources with their ability to rapidly scale up initiatives in order to enhance people's lives globally.

This course equips students with specialist knowledge to lead or advise on social business projects or subsidiaries within multinational corporations, consulting firms, and startups. Given the dual objectives of social business - impact and profit - there are numerous theories, tools, and methodological approaches unique to this organisational form.

The first half of the course explores three strategies social businesses employ to design profitable solutions to social problems: problem-centric, human-centric, and opportunity-centric approaches. Students will have the opportunity to bring these theoretical streams to life via interactive class exercises and real-world experiments.

The second half of the course delves into theories, strategies and consulting frameworks for scaling or expanding the impact of a social business in a manner that balances both mission and margin.

Students will bring these concepts to life via a consulting project.

Teaching: 40 contact hours in the AT, which include:

30 hours of lectures

In addition, in lieu of 10 hours of seminars, students will also be expected to:

- (i) undertake a 2-hour team building exercise,
- (ii) attend a series of support surgeries (30- minute team meetings to obtain advice from faculty) and
- (iii) attend an extended presentation day at the end of the term where the student teams will exhibit their progress and get

feedback from faculty

Students on this course will have a reading week in Week 6, in line with departmental policy.

Very importantly, while every effort will be made to dedicate some class time to assist teams in progressing their projects, as with any group project, student teams are expected to work independently outside of class times on their projects.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Compulsory: Student groups will be expected to produce a presentation outlining the progress made on their consulting project, at the end of the AT for faculty review and feedback.

Optional: Additionally a formative essay question will be provided for those wishing to practice essay writing.

- Mair, J.; Marti, I. (2004). Social entrepreneurship: What Are We Talking About? A Framework for Future Research. IESE Research Papers D/546, IESE Business School.

Assessment: Essay (40%, 1400 words) in the AT. Project (60%) in the WT.

The project assessment comprises an oral presentation and submission of PowerPoint slides with detailed appendices which provide evidence in support of your oral presentation.

MG4J3 Half Unit Principles of Pricing

This information is for the 2024/25 session.

Teacher responsible: Prof Om Narasimhan MAR.6.32

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The content of the course is organised into two principal modules: (1) pricing strategy and fundamentals and (2) pricing tactics and implementation. The first module of the course covers the fundamental analytical tools, theories, and conceptual frameworks needed for price strategy formulation. Basic principles from marketing, economics, and psychology will be briefly reviewed and extended. The module provides an in-depth treatment of the role of price in the firm's value proposition to the customer and the determination of customer response to price. The second module of the course covers pricing tactics with an emphasis on pricing in the digital domain.

Teaching: 30 hours of lectures in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual

freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be engaged in analysing several cases, doing numerical problems, and analysing data sets using the techniques learned in class. This will set the stage for their group project (gathering and analysing data) as well as the take-home assignment (which will involve numerical problems, case analysis, and analysing data sets). Students will be taking three short quizzes during the course of the term; these are meant to ensure a proper grasp of the concepts and tools covered in the lectures.

Indicative reading:

- The Strategy and Tactics of Pricing: A Guide to Growing More Profitably (2010): Nagle, Hogan, and Zale, Prentice Hall.
- Pricing Information: How to customize both the product and the price (1998): Carl Schapiro and Hal Varian, Harvard Business School Chapters.
- 'Pricing as a Strategic Capability' (2002): Mark Bergen, Shantanu Dutta, Mark Ritson, Sloan Management Review

Assessment: Project (40%), coursework (45%) and quiz (15%) in the WT.

MG4J4 MiM Capstone Course - International Management in Action

This information is for the 2024/25 session.

Teacher responsible: Dr Heather Kappes (6.21 MAR)
Professor Connson Locke (4.14 MAR)

Availability: This course is compulsory on the MSc in Management (1 Year Programme). This course is not available as an outside option.

Course content: This Capstone Course builds connections between management theory and practice and equips students with the skills necessary to succeed in their managerial careers. The first part of the course provides students with skills for leading organisational change and strategy implementation. Building on MiM core courses such as Organisational Behaviour and Business Analysis, students will explore leadership situations that involve organisational or strategic change and address challenging issues such as sustainability and ethics.

The second part of the course gives students the opportunity to apply material learned in MiM courses to create managerial recommendations that can help a firm improve and defend its competitive advantage both immediately and for its future. Before, during, and after an international trip, students will work in groups to tackle a client company's business problem(s). Students will need to balance company objectives, available resources, theoretical knowledge, and group members' knowledge and expertise. Success requires analytical techniques and reasoning as well as the ability to switch between considering the big picture and the fine-grained detail.

Teaching: 27 hours of seminars plus approximately 40 hours of work during a one-week international trip the period after exams and summer term.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: In the first part of the course, in-class case discussions will prepare students for the individual essay.

In the second part of the course, formative feedback will be provided on the basis of preparatory seminar work.

Indicative reading:

- Baaij, M. G. (2022). An Introduction to Management Consultancy (Second Edition). Sage Publications.
- Rasiel, E. M. (1999). The McKinsey Way: Using the Techniques of the World's Top Strategic Consultants to Help You and Your Business. New York: McGraw-Hill.

- Schein, E. H. (2017). *Organizational Culture and Leadership*, 5th edition. New Jersey: John Wiley & Sons.
- Yukl, G. A. (2012) *Leadership in Organizations*.

Assessment: Project (60%, 2000 words), essay (30%, 1500 words) and reflective learning report (10%).

This course is assessed on an individual essay (30%), project report (60%), and a reflective learning report with a peer evaluation component (10%) that makes use of the concepts from the course and their application illustrated in the international trip.

Details will be discussed during lectures.

MG4J5

Dissertation: Social Innovation and Entrepreneurship

This information is for the 2024/25 session.

Teacher responsible: Dr. Yally Avrahampour

Availability: This course is compulsory on the MSc in Social Innovation and Entrepreneurship. This course is not available as an outside option.

Course content: The dissertation gives an opportunity to deepen, apply and/or integrate the knowledge, insights and skills that the students have learned in the master's programme, by selecting one of two dissertation tracks: 1) an academic dissertation in which students develop a novel theoretical contribution to better understand an important empirical phenomenon in the domain of social innovation and enterprise, or 2) an applied capstone project, applying the knowledge, insights and skills students have learned in the programme to analyse – and develop compelling recommendations regarding a real world social problem for an existing organization or enterprise or through the design of a new social enterprise. Each track will be anchored in theory and methodology/evidence to meet academic standards.

Teaching: 6 hours of seminars in the WT. 6 hours of workshops in the ST.

- 3 hours of interactive lecture in the WT: Introduction, the two types of theses/tracks; the role of theory & academic literature in thesis development
- 3 hours of interactive lecture in the WT: Core methodological insights for thesis development

For each of the two tracks: A dissertation workshop (mandatory for all participants of the track,) at the start of the Spring Term; 6 hours (maximum) depending on the number of theses in the track. In total, students will be expected to attend around 12 hrs of classes for the dissertation module.

Projects will be guided by a pool of dedicated supervisors for these dissertations.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce – before the dissertation workshop – a dissertation proposal outlining the core question of the thesis (with sub-questions), a review/synthesis of relevant academic literature, the methodology for the study (qualitative or quantitative, sample selection, type of analysis, etc.). This proposal will be presented and discussed during the workshop. It will also serve as formative course work.

Indicative reading: Core reading: Skovdal, M. & Cornish, F. *Qualitative research for Development* (currently the students already study several chapters of this book as part of MG4G1). Additional readings will be announced before the start of the Winter term.

Assessment: Dissertation (100%, 10000 words) in August.

MG4J6 Half Unit

Brand Strategy

This information is for the 2024/25 session.

Teacher responsible: Dr Hye-Young Kim MAR 6.23

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Management (1 Year Programme), MSc in Management and Strategy and MSc in Marketing. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: The most valuable assets that firms have are the products/services that they offer and the brands that are associated with them. Managing Products & Brands is a rigorous examination of the theory and corporate practices relevant to product and brand management. Its core objectives are to provide an understanding of the important issues in planning and evaluating product/brand strategies, to provide the appropriate theories, models, and analytical tools that enable managers to make well-informed product/brand management decisions, and to provide a platform for students to apply these principles. The critical approach adopted will blend theory and practice so as to promote effective managerial decision making on a short as well as long term basis.

Teaching: 30 hours of lectures in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will present their group work during class and receive feedback from peers and the course leader. Detailed guidelines on the group project will be provided in the course syllabus and sample projects will be available.

Indicative reading:

- Keller, K. (2007) *Strategic Brand Management*, 3rd Edition, Pearson
- Lehmann, D. And Winer, R. (2005) *Product Management*, 4th Edition, Chicago: Irwin.
- Keller, K. (2001) Building Customer-Based Brand Equity. *Marketing Management*. 10(2), 14-19.
- Lilien, Gary L., and Rangaswamy, Arvind, *Marketing Engineering*, 2nd Edition, Prentice Hall
- Lodish, Leonard M., and Carl F. Mela (2007), "If Brands Are Built Over Years, Why Are They Managed Over Quarters?," July/August, *Harvard Business Review*, 85, 7/8 (July-August), 104-112.

Assessment: Coursework (50%), project (40%) and class participation (10%) in the WT.

Coursework will be individual assignments and the Project will be completed in groups.

MG4J7 Half Unit

Consumer Neuroscience

This information is for the 2024/25 session.

Teacher responsible: Dr Nicolette Sullivan MAR 6.22

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Management (1 Year Programme) and MSc in Marketing. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Course content: Our understanding of how consumers make evaluations and decisions has been greatly advanced by the many new theoretical and technological developments in the study of consumer behaviour in the last decade. This course covers the insights gained from this new field often referred to as Consumer Neuroscience or Neuroeconomics, which sits at the intersections of consumer behaviour, psychology, behavioural economics, and neuroscience. We will cover the key findings of this highly productive new field and will introduce the neuroscience and cutting-edge techniques behind these developments including eye tracking, skin conductance, and mouse tracking, and neuroscience methods like fMRI and EEG.

Topics covered include how knowledge and measurement of the visual system inform ad design, how the brain represents the preferences and values that guide decisions and how this leads to biases, how the limbic system helps to encode emotions and how its measurement can predict marketing outcomes, and functional localization of brand preferences and marketing actions and their link to learning and memory systems. The influence of neural changes across the consumer lifespan, from adolescence through to older age, on marketing and management practices will be covered. We will discuss the use of insights gained from this research to nudge human behaviour, and future directions and ethical ramifications will be examined. Finally, the brain's ability to predict not only the individual's future choice but also aggregate market-level behaviours will be discussed.

Students will receive practical hands-on experience with one of these advanced techniques. By the end of the course, students will also be able to sort junk science from good science, making them informed consumers of research in this cutting-edge field. This is a good option for students who enjoyed Consumer Behaviour: Behavioural Fundamentals I (MG404) and would like to extend their knowledge on that topic.

Teaching: This course will have one three-hour Harvard-style session per week for the duration of Winter Term.

There is a Reading Week during Week 6 in line with departmental policy.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Prior to the summative quizzes, participants will be given a formative quiz. Formative work will also be submitted in relation to the students' group projects (Project Outlines, Elevator pitches).

10 Shimojo, S. et al. (2003), Gaze bias both reflects and influences preferences. Nature Neuroscience.

Assessment: Quiz (30%), group project (50%) and class

participation (20%) in the WT.

Two quizzes (30%), weighted equally, will test students' comprehension, retention, and application of course material. Emphasis will be placed on a student's ability to apply of course material to new contexts. Quizzes will take approximately 20 minutes and will be taken through Moodle. Timing: although only two quizzes will be used for the students' marks, there will be four quizzes in total. One will be formative, and of the three summative quizzes only the two best quizzes will be used for the student's mark. Note that the two best quizzes used in the final mark with both be weighted equally (15% each of the final mark).

Group projects (50%) will answer a marketing problem that can be addressed using a cutting edge consumer behaviour technique (eye tracking, mouse tracking, or implicit associations). Groups will work together to 1) present an analytical synthesis of the previous work on their problem using both course theories and external materials, 2) design and run a small pilot study to answer this problem, 3) perform a basic analysis of their data to answer this question, and 4) provide concrete and actionable recommendations to address the problem. Students will receive a group mark for the presentations, which assesses ability to apply course concepts, teamwork (demonstrated by coherence and equality of participation), preparation and presentation, clarity of analysis, and sensibility of recommendations. Timing: The final project output will be due in the final week of the course. Engagement (20%) will be assessed to measure students' participation in the course. This will be done in three ways. First, through attendance. Second, through an assessment of the student's contributions to the discussion board. Posts and responses will be assessed for their depth of analysis, clarity, and accuracy. Although a greater number of high-quality posts will receive higher marks, quality will be counted higher than quantity. Third, through a peer evaluation of participants' engagement and performance in their team projects, as measured by a mean of other team members' evaluations of them at the end of the course projects. Timing: This will be assessed throughout the term.

MG4J8 Half Unit Managing Artificial Intelligence

This information is for the 2024/25 session.

Teacher responsible: Dr Zhi (Aaron) Cheng, MAR.4.25

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Management (1 Year Programme) and MSc in Management of Information Systems and Digital Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course may be capped/subject to controlled access. For further information about the course's availability, please see the MG Elective Course Selection Moodle page (<https://moodle.lse.ac.uk/course/view.php?id=3840>).

Priority will be given to students on the MSc in Management of Information Systems and Digital Innovation programme.

Course content: Why and how should we manage artificial intelligence (AI) and maintain humanity? The course approaches the current and emerging managerial and strategic matters around big data, AI and robotics, covering the development and implementation of AI technologies from organisational, technical, social, economic and political viewpoints.

The concepts and frameworks in the course provide an in-depth understanding of the designing and organising logic for AI. Students will engage in research and practice on AI management, understand the promises and perils of data-driven and algorithmic decision-making, analyse the roles of human judgment, and

critically assess the implications of big data and AI technologies for individuals, organisations and the society at large.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the WT.

A reading week will take place in Week 6. There will be no teaching during this week.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the WT.

The formative assessments (submitted to receive oral feedback) include:

- An initial proposal (500 words) of the individual essay.
- An outline (1-page A4 document) of the team project proposal.

The first formative assessment allows students to propose a research question relevant to AI management, demonstrate knowledge of the background and related literature, and outline the key structure before substantively developing the essay. The second formative assessment allows students to apply their conceptual understanding of AI management and propose AI strategic plans to address real-world challenges.

Indicative reading:

- Zerilli, J. (2021). A Citizen's Guide to Artificial Intelligence. MIT Press.

Assessment: Essay (60%, 2000 words) and project (40%, 3000 words) in the WT.

Students will present their team projects in the seminars and receive developmental feedback. After the final presentation, each student team will submit a 3000-word project report.

MG4J9 Half Unit Not available in 2024/25 Responsible Digital Innovation: Ethics at Work

This information is for the 2024/25 session.

Teacher responsible: Prof Susan Scott MAR 4.30

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD), MSc in Human Resources and Organisations (Organisational Behaviour),

MSc in Management (1 Year Programme), MSc in Management of Information Systems and Digital Innovation, MSc in Media and Communications (Media and Communications Governance) and MSc in Social Innovation and Entrepreneurship. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students on the MSc in Management of Information Systems and Digital Innovation programme.

Course content: This course aims to give students theoretical and practical insights into the ethical implications surrounding the management of digital innovations in business. An area of vibrant scholarship, the issues that we cover are also of growing interest to any employer committed to sustainable innovation who realises that "ESG" (Environment, Society, and Governance) needs to be core to their mission. Students will examine the nature, role, and influence of innovations with a particular interest in the dynamic relationship between digital technologies, organisational practices, and their ethical implications. There are four principles guiding the syllabus for this course:

- The challenges engulfing the world are not just technical questions, they are value-laden and demand a distinctively socio-technical approach.
- Contemporary emerging technologies are redefining where accountability lies, challenging the boundaries of corporate social responsibility and organisational governance structures.
- Going forward ethics will not be a bolted-on topic dealt with in isolation but a living practice; an enactment, that becomes integral to the management of digitalisation.
- Social sciences provide us with the skills needed to identify the discourses defining the emergence of ethics on the ground and equip us with the ability to respond when asked: what is this a case of?

We will consistently take the ethical challenges surrounding contemporary emerging technologies (AI, robotics, remote working arrangements, digital ledger technologies etc.) as our focus although the specific case studies used may vary year to year. Whenever possible, we will invite industry experts to participate on the course to learn from their experience of "ethics at work" in their organisations.

We will learn about the different ways in which ethical challenges are framed and become able to identify streams of discourse in the workplace. Students will deconstruct the rationale (technical, managerial, stakeholder) being used to address ethical challenges, enabling them to work toward more inclusive and reflective approaches to the management of contemporary emerging technologies. Within this, the emphasis will be on identifying the unintended consequences of contemporary emerging technologies in the workplace with a focus on themes of accountability, responsibility, and sustainability.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

Classes are case study focused with discussion of selected journal articles or book chapters. Reading week will take place during Week 6. There will be no teaching during this week.

Additional learning activities: When possible, industry leaders and policy makers will be invited to discuss their encounters with ethical challenges and the management practices that they have developed in response to them. This may take the form of a face-to-face meeting with students, or a video prepared in advance (e.g., Prof Scott interviewing an expert) posted on Moodle.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 case study in the WT.

A formative assignment will be submitted at the end of week 5, Winter Term. Having studied published case studies in Weeks 1-4 in Winter Term, students will be tasked with writing their own mini case study (approx. 1000 words). This formative assignment provides an opportunity for class teachers to discuss the strengths and limitations of different case study options with the

student. These discussions ensure that the students thoroughly understand the kind of ethical issue or challenge that best fits the course criteria. It also motivates them to engage deeper with the foundational principles of the course and appropriate literature.

Indicative reading:

- Stilgoe, J., Owen, R., and P. Macnaghten (2013). Developing a framework for responsible innovation. *Research Policy*, 42(9), 1568–1580.

Assessment: Essay (100%, 3000 words) in the ST.

Research Essay

Marking guidelines will give weight to the process of identifying how, what, where, and when issues have emerged; the different ways in which issues are being or could be framed; and the influence that this has on the management approach(es) in use. Students will be expected to show mastery of the concepts, marshal the literature, and produce a data-informed, well-structured line of argument.

MG4L1

HR and People Management Careers Series

This information is for the 2024/25 session.

Teacher responsible: Dr Bethania Antunes and the MSc HRO Careers Consultant

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD), MSc in Human Resources and Organisations (International Employment Relations/CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

Course content: The course is divided into 10 sessions: five Autumn Term sessions, five Winter Term sessions.

Autumn Term:

- Introduction to HR & People Careers, followed by four sessions each exploring a specific career route in HR and people management via a combination of LSE alumni panels, workshops, and fireside chats (e.g., consulting, organisational design and development, DEI, HR generalist).

Winter Term:

- Five sessions each exploring a specific career route in HR and people management via a combination of LSE alumni panels, workshops, and fireside chats, building on the Autumn Term sessions. E.g., people analytics, learning and development, business partnering, talent acquisition, boutique consulting.

Teaching: 10 hours of lectures in the AT. 10 hours of lectures in the WT.

Students will attend 4-5 sessions in Autumn Term and 4-5 sessions in Winter Term, 1.5 hours – 2 hours per session.

Students can access further careers events and support via CareerHub to complement this course.

In its Ethics Code, LSE upholds a commitment to intellectual

freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Assessment:

This course has no formal assessment

MG4PA Half Unit

People Analytics and Technology

This information is for the 2024/25 session.

Teacher responsible: Dr Francesca Manzi

Availability: This course is compulsory on the MSc in Human Resources and Organisations (Human Resource Management/CIPD). This course is available on the MSc in Human Resources and Organisations (International Employment Relations/CIPD) and MSc in Human Resources and Organisations (Organisational Behaviour). This course is not available as an outside option.

Course content: This course explores the role of data and analytics in human resource management (HRM). The current world of work contains a wide array of information that can be used to make work more engaging to employees and organizations more efficient. Rather than making human resource decisions based on traditions or gut instinct, we can bring science into the way people are managed by leveraging data and empirical evidence. This course combines substantive people management issues such as performance management, recruitment and selection, DEI, engagement, and employee turnover with data-driven decision-making skills. Students will work on multiple sample datasets and real-world cases to identify HRM problems, learn the basics of data analysis, interpret statistical outcomes, and make relevant people decisions. In addition, the course will discuss emerging technologies such as AI and machine learning in HRM and discuss the ethical issues that arise with their use. By the end of the course, students will be prepared to evaluate analytical evidence to make ethical people decisions and become better managers.

The intended learning outcomes are:

- To understand what HR managers need to know about people analytics
- To identify the advantages and limitations of using analytics to solve HR problems
- To recognize, understand, and interpret basic statistical tests (e.g., correlation, regression, t-tests, ANOVA, mediation, etc.)
- To critically evaluate ethical issues with emerging technologies in HRM

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

This course consists of interactive and practical discussions in lectures and hands-on case analysis and data interpretation during seminars. Although directly analysing data is not required, students are encouraged to follow weekly step-by-step tutorials on statistical tests and to attend the relevant Digital Skills Lab workshops.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: A formative case report allows students to practice their analytics skills by identifying key questions and variables, selecting the appropriate statistical test, interpreting statistical output, and providing data driven recommendations. This report is designed to prepare students for their final analytics project report.

Indicative reading:

- Text book: Edwards, Martin and Kirsten Edwards. 2019. *Predictive HR Analytics: Mastering the HR Metric*. Publisher: Kogan Page. ISBN: 9780749484446.
- Davenport, Thomas H., Jeanne Harris, and Jeremy Shapiro. 2010. Competing on talent analytics. *Harvard Business Review*, 88(10): 52-58.

- Tambe, Prasanna, Peter Cappelli, and Valery Yakubovich. 2019. Artificial intelligence in human resources management: challenges and a path forward." California Management Review 61(4): 15-42.
- Case study: Polzer, J.T. & Huall, O. (2020). People Analytics at McKinsey. Harvard Business School Case: 9-418-023.

Assessment: Report (60%) in the ST.

Quiz (30%) and class participation (10%) in the WT.

The course will be assessed via the following methods:

Class Participation assessed on identifying HRM issues and the role of data and analytics in people decisions during seminar discussion (10%)

An individual analytics case report (1500 words) to identify problem(s), select tests, interpret findings, and provide data driven recommendations (60%)

Three quizzes of 10% each testing student skills on identifying variables, appropriate statistical tests, and sound reporting of findings.

MY400 Half Unit Fundamentals of Social Science Research Design

This information is for the 2024/25 session.

Teacher responsible: Prof Jonathan Jackson

Availability: This course is compulsory on the MSc in Applied Social Data Science and MSc in Social Research Methods. This course is available on the MPhil/PhD in Demography/Population Studies, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology, MSc in Applied Social Data Science, MSc in Environmental Policy and Regulation, MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Research students please see MY500.

Course content: Research design necessitates trade-offs between the strengths and weaknesses of different feasible options. This course aims to introduce the broad range of design options and to foster an appreciation of these alternatives for particular research objectives. Drawing on a variety of examples from the social scientific literature, this course will explore design considerations and options across quantitative, qualitative and mixed-methods research. At the end of the course, students will be able to read a wide variety of empirical social science with a critical and balanced perspective and will be better equipped to implement and make arguments defending the methods they use in their dissertations.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Autumn Term.

This course has a Reading Week in Week 6 of AT.

Formative coursework: A project outline (1-2 pages long) that sets up a research question that the students will develop in their summative assignment.

Indicative reading: Robson, Colin and McCartan, Kieran (2015, 4th edition). Real World Research. London: John Wiley.

Assessment: Research proposal (100%) in the WT. Students can base their research proposal (3000 words) on a dimension of their dissertation topic subject to the approval of their home department.

MY401 Half Unit Research Design for Studies in Digital Innovation

This information is for the 2024/25 session.

Teacher responsible: Professor Flora Cornish and Dr Sally Stares

Availability: This course is compulsory on the MSc in Management of Information Systems and Digital Innovation. This course is not available as an outside option.

Course content: This course will deliver the core methodological training for students completing a dissertation for the MSc in Management of Information Systems and Digital Innovation. It covers issues of research design and research methods for information systems studies, including sessions on the collection and analysis of both qualitative and quantitative data. Lectures will introduce the principles of a range of research design issues and methodological approaches, while classes will contextualise this teaching in relation to information systems research. Drawing on a variety of examples in information systems, the course will provide the platform for students to consider a range of design options, as well as methodological techniques. By the end of the course, students will be familiar with a range of research design options and will be better equipped to not only design, but also to collect and analyse data for, their own dissertations. The course is also intended to help students become more informed and critical readers of social scientific, and specifically information systems, research. The course therefore has the dual aim of helping students become both critical "consumers" and "producers" of information systems research. In doing so, it should make positive contributions to students' learning experience both in their dissertation process, and in other courses they take at the LSE. The topics covered will include discussions of the alignment between research question and research design, questions of inference, and the relationship between theory and data, as well as brief introductions to research methods, with a focus on when they will be appropriate to particular questions and projects.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term. This course has a reading week in Week 6 of WT. Lectures for this course will be delivered by staff by the Department of Methodology. To help to contextualise the materials covered in the course for the students, and to ensure a good fit with the requirements of the MISDI dissertation, the seminars will be led by staff from the Department of Management.

Formative coursework: Students will be expected to submit a 1,000 word research proposal.

Indicative reading:

- Agresti, A. and Finlay, B. (2009) Statistical Methods for the Social Sciences [4th edition]. Prentice Hall.
- Bauer, M. and Gaskell, G. (2000) Qualitative Researching with Text, Image and Sound. Sage.
- Flick, U. (2014) An Introduction to Qualitative Research [5th edition]. Sage.
- King, G., Keohane, R. and Verba, S. (1994) Designing Social Inquiry. Princeton University Press.
- Klein, H. K., and Myers, M. D. (1999). A Set of Principles for Conducting and Evaluating Interpretive Field Studies in Information Systems.
- Robson, C. and McCartan, K. (2016) Real World Research [4th edition]. John Wiley.
- Seale, C. [ed.] (2004) Social Research Methods: A Reader. Routledge.
- Van de Ven, A. H. (2007). Engaged Scholarship: A Guide for Organizational and Social Research. Oxford University Press.
- Walsham, G. (2006). Doing Interpretive Research. European Journal of Information Systems 15(3): 320-330.
- Yin, R. K. (2018). Case Study Research and Applications: Design and Methods. Sixth Edition. Los Angeles: SAGE.

Assessment: Essay (70%, 2500 words) in the ST.

Group essay (30%) in the WT.

Group essay (30%) is 3000 - 4200 words depending on group size.

MY405 Half Unit Research Design for Policy and Programme Evaluation

This information is for the 2024/25 session.

Teacher responsible: Professor Flora Cornish

Availability: This course is available on the MPhil/PhD in Health Policy and Health Economics, MSc in Applied Social Data Science, MSc in Gender, Policy and Inequalities, MSc in Global Health Policy, MSc in Health and International Development, MSc in Human Geography and Urban Studies (Research), MSc in Marketing and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place, you are likely to be given a place.

Course content: This course teaches the fundamentals of contemporary evaluation research design, for students interested in pragmatic applications of evaluation methods in real-world settings. Students will be equipped with research design skills to be able to design and critically appraise evaluation research in applied fields such as international development, health, and public policy. Students are taught to develop a clear and coherent Theory of Change as a foundation for an evaluation. Taking a mixed methods approach, the course covers the major quantitative designs, including randomized experiments and observational (i.e. non-randomized) research designs such as instrumental variables, difference-in-differences, regression discontinuity design, matching, and synthetic control. It covers qualitative and participatory research designs and their contribution to formative research, process evaluation, realist evaluation, and theory-based evaluations. Examples from the fields of health, international development and public policy will be used throughout the lectures and seminars. Students learn to apply what they have learned, by working in groups on real research design tasks in seminars. The realities of designing evaluations for government and non-government organisations mean that resources are limited and ideal conditions are rarely met. The course therefore focuses on how to make pragmatic choices and deal with often sub-optimal tradeoffs in real-world contexts.

This course focuses primarily on the fundamental principles of evaluation design rather than the implementation of particular quantitative or qualitative methodologies, there are therefore no prerequisites required to register. It is complementary with most other quantitative and qualitative courses offered by the Department of Methodology. Given some overlaps in content on the quantitative side, it is usually advised not to take this course together with MY457 Causal Inference for Observational and Experimental Studies.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours across Winter Term.

This course has a reading week in Week 6 of Winter Term.

Formative coursework: A Theory of Change in the Winter Term.

Indicative reading: Angrist, J. D. and Pischke, J-S. (2014) *Mastering Metrics: The Path from Cause to Effect*. Princeton University Press

Bell, S. & Aggleton, P. (2016). *Monitoring and Evaluation in Health and Social Development: Interpretive and Ethnographic perspectives*. London: Routledge.

Glennerster, R. and Takaarasha, K. (2013) *Running Randomized Evaluations: A Practical Guide*, Princeton University Press.

Patton, M. Q. (2015). *Qualitative Research and Evaluation Methods*. (4th Edition). London: Sage.

Assessment: Research design (100%) in the ST.

MY421A Half Unit Qualitative Research Methods

This information is for the 2024/25 session.

Teacher responsible: Dr Raphael Susewind

Availability: This course is available on the MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Environmental Policy and Regulation, MSc in Gender (Research), MSc in Global Health Policy, MSc in Human Geography and Urban Studies (Research), MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations (Research), MSc in International Social and Public Policy (Research), MSc in Marketing, MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Course content: This course presents the fundamentals of qualitative research methods. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding qualitative methods, and with practical skills to put those methods into practice. It prepares students to design, carry out, report, read and evaluate qualitative research projects. First, students learn how to collect data using methods including interviews, focus groups, participant observation, and selecting documents and new media data. Second, we cover analysis, using thematic and discourse analysis. Issues of research design, quality indicators and ethics are addressed.

This is a generalist, introductory course and we invite students who have little previous experience of qualitative methods. Students with prior training in qualitative methods might be interested in more specialist alternatives offered by the Department of Methodology, such as MY423 Interview Methods for Social Science Research, MY425 Case Studies and Comparative Methods for Qualitative Research, MY426 Doing Ethnography, or MY428 Qualitative Text Analysis.

Lectures introduce the main conceptual and practical issues.

Seminars provide practical experience with the methods.

Teaching: The course runs twice per year: in AT (MY421A) and again in WT (MY421W). The content of the course, and the method of assessment, is exactly the same in each term.

This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Autumn Term.

This course has a reading week in Week 6 of AT.

Formative coursework: Students submit a portion of their practical work, with some written commentary, for formative assessment in Week 7.

Indicative reading: Textbooks: There is no set text for this course.

The following are useful **general textbooks** for the pragmatic approach taken in MY421:

- Becker, H. S. (199). *Tricks of the trade: How to think about your research while you're doing it*. University of Chicago Press.
- Braun, V. & Clarke, V. (2018). *Successful qualitative research: a practical guide for beginners*, London: SAGE.
- Lareau, A. (2021). *Listening to People: A Practical Guide to Interviewing, Participant Observation, Data Analysis, and Writing it All Up*. University of Chicago Press.
- Mayan, M. J. (2016). *Essentials of qualitative inquiry*. Routledge.

Assessment: Project (100%, 3000 words) in the WT.

The summative assignment is a small project, demonstrating skills in using some of the qualitative methods covered during the course. It takes the form of a project report, with detailed appendices documenting the methods of data collection and analysis used.

MY421W Half Unit

Qualitative Research Methods

This information is for the 2024/25 session.

This course has a reading week in Week 6 of WT.

Formative coursework: Students submit a portion of their practical work, with some written commentary, for formative assessment in Week 7.

Indicative reading: Textbooks: There is no set text for this course. The following are useful **general textbooks** for the pragmatic approach taken in MY421:

- Becker, H. S. (199). *Tricks of the trade: How to think about your research while you're doing it*. University of Chicago Press.
- Braun, V. & Clarke, V. (2018). *Successful qualitative research: a practical guide for beginners*, London: SAGE.
- Lareau, A. (2021). *Listening to People: A Practical Guide to Interviewing, Participant Observation, Data Analysis, and Writing it All Up*. University of Chicago Press.
- Mayan, M. J. (2016). *Essentials of qualitative inquiry*. Routledge.

Assessment: Project (100%, 3000 words) in the ST.

The summative assignment is a small project, demonstrating skills in using some of the qualitative methods covered during the course. It takes the form of a project report, with detailed appendices documenting the methods of data collection and analysis used.

MY423 Half Unit

Interview Methods for Social Science Research

This information is for the 2024/25 session.

Teacher responsible: Dr. Aliya Hamid Rao, Assistant Professor, Department of Methodology.

Availability: This course is available on the Global MSc in Management, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Gender, MSc in Gender (Research), MSc in Gender, Policy and Inequalities, MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in International Development and Humanitarian Emergencies, MSc in Media, Communication and Development, MSc in Political Sociology and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: This course focuses on the practical dimensions of interviews as a data collection method for social science research. In so doing, the course also engages with epistemological concerns, such as what kinds of claims interview data can be used to make. While this course does not require any pre-requisites, it takes a deep and narrow approach in its focus on semi-structured interviews. This course will consider sampling, recruitment, and ethical concerns that arise particular to interviews. Such considerations will be discussed throughout the course through readings, lectures, and seminars. Students seeking an introductory overview of qualitative methods are advised to see MY421/521. This course is designed to be most useful to those with some familiarity with qualitative methods broadly, and for those who come to the course with some sense of an interview study they want to conduct.

Course content: This course will provide students with the skills to:

- Understand and implement the key principles for planning, designing, and executing an interview based study;
- Understand and implement the key principles in how to conduct interviews that yield rich data;
- Understand the key elements in interview data;
- Evaluate published research that draws on interview data.

Students will start off by learning what kinds of research questions can suitably be answered by the data usually collected through interviews. They will learn about the considerations that go into designing a largely interview-based study (including: recruitment, sample parameters, and interview guides). While the focus will generally be on the practical dimensions, students will also learn about some of the epistemological debates pertaining to these considerations.

The type of interviews this course will focus on will be semi-structured one-on-one interviews, which constitute one of the most common data collection methods in qualitative social science research. However, other types of interviews and related methods (such as couple interviews and ethnography) will be referenced typically as a way to highlight how the data collected from one-on-one interview methods differs from these other related, but distinct, methods. The focus on one-on-one interviews is because when it comes to interviewing this is a predominant way of conducting interviews in the social sciences. This course is designed to give students the practical skills and epistemological background to design and complete their own, individual, interview-based studies. This course may be particularly useful for students intending to conduct their own interview-based studies. The course is comprised of 10 lectures (of 90 mins each) which introduce the main conceptual and practical issues. 9 seminars (90 minutes each) provide a space to dive deeper into the debates in each topic as well as gain some practical experience.

The required text for this course is Annette Lareau's book *Listening to People*. Each week will usually have two required readings, typically one "method" and one "example" reading as well as several optional readings. The required readings will be made available through the Reading List in Moodle.

An indicative structure of the course is below. Please note this is subject to being amended.

1 Introduction: What can interviews tell us?

- 2 What kind of a sample do you need?
- 3 Ethics and reflexivity
- 4 What, how, and when should you ask?
- 5 Conducting interviews
- 6 Reading week
- 7 Special groups: Interviewing Elites
- 8 Data Analysis
- 9 Writing up an interview-based study to compellingly answer strong research questions
- 10 Evaluating interview research
- 11 Summing up: Course review and outstanding questions

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the WT.

Formative coursework: The formative assessment consists of the students uploading the following in a single word document to Moodle, in this order:

- 2 Interview memos (each 1.5 pages, single-spaced, max, with a methodological and analytical component. Detailed instructions will be provided to students);
- 2 single-spaced pages of one interview transcript (consecutive pages, and ideally ones on which students want some feedback, single spaced).

Indicative reading: There is required book for the course: *Listening to People*, by Annette Lareau. The remainder of the required readings will be made available to students through Reading List in Moodle.

Assessment: Essay (100%, 3000 words) in the ST.

MY425 Half Unit

Case Studies and Comparative Methods for Qualitative Research

This information is for the 2024/25 session.

Teacher responsible: Dr Eleanor Knott

Availability: This course is available on the MSc in Comparative Politics, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Development Studies, MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in Gender (Rights and Human Rights), MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in International Political Economy (Research), MSc in International Relations (Research), MSc in International Social and Public Policy (Research), MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Sociology and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. This course is freely available to any MSc or MRes students interested in case study research designs. MY525 is available for PhD students interested in case study research designs. The course is most suited to students within macro- or meso-sociological traditions (e.g. political science, IR, sociology, political sociology, policy studies, development studies) than those within a micro-sociological/individualist tradition (e.g. micro-interactionist perspectives, psychology, psychiatry).

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place. There is no need to require authorisation.

Pre-requisites: There are no prerequisites for this course but capacity to work autonomously is expected (including conducting a literature review, finding one's own theoretical literature, creating one's own research question, etc.). Throughout the course, students are expected to make their own decisions and learn how to become autonomous junior researchers by constructing a research project on their own. Students not confident in their capacity to work autonomously are encouraged to familiarise themselves with these skills before the beginning of the course to make the most out of the teaching (see for example LSE

Life services for resources helping you to prepare yourself for autonomous work).

Course content: This course focuses on the approach and practice of designing and conducting case study and comparative research. Thinking outside of the areas of interest and specialisms and topics, students will be encouraged to develop the concepts and comparative frameworks that underpin these phenomena. In other words, students will begin to develop their research topics as cases of something.

The course will cover questions of design and methods of case study research, from single-n to small-n case studies including discussions of process tracing and Mill's methods. The course will address both the theoretical and methodological discussions that underpin research design as well as the practical questions of how to conduct case study research, including gathering, assessing and using evidence. Examples from the fields of comparative politics, IR, development studies, sociology and European studies will be used throughout the lectures and seminars.

More information about MY425 can be found on the Moodle page of the course (e.g., course structure, detailed formative and summative assignment instructions, examples of prior cohorts' summative assignments). Please do not hesitate to self-enrol to the Moodle page of the course to have a better idea of the content of the module and the work required.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Winter Term.

Lectures will provide students with the key concepts, ideas and approaches to case study and comparative research. Seminars will provide students with practical experience of assessing the approaches of case study and comparative research design, as well as opportunities to design and develop their own research projects.

This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the WT.

- 1 formative paper: literature review and project outline (1-2 pages) due in Week 8.160
- 1 peer marking exercise: in-class oral peer feedback session for students to exchange ideas on formative assignment.

Indicative reading: Key texts:

- Beach, D., & Pedersen, R. B. 2019. *Process-tracing methods: Foundations and guidelines*. University of Michigan Press.
- Bennett, A. and Checkel, J.T. eds., 2014. *Process tracing: From metaphor to analytic tool*. Cambridge University Press.
- Della Porta, D. and Keating, M. eds., 2008. *Approaches and methodologies in the social sciences: A pluralist perspective*. Cambridge University Press.
- George, Alexander L. and Andrew Bennett. 2005. *Case Studies and Theory Development in the Social Sciences*.
- Gerring, J. 2017. *Case study research: principles and practices*. Second edition. Cambridge University Press.

Example readings for discussion:

- Briggs, Ryan C. 2017. "Explaining case selection in African politics research", *Journal of Contemporary African Studies*.
- Finkel, E. (2017) *Ordinary Jews: choice and survival during the Holocaust*. Princeton University Press.
- Lund, Christian. 2014. "Of What is This a Case? Analytical Movements in Qualitative Social Science Research." *Human Organization* 73(3): 224–234.
- Simmons, E. (2016) *Meaningful resistance: market reforms and the roots of social protest in Latin America*.: Cambridge University Press.
- Simmons, E. S. and Smith, N. R. (2017) 'Comparison with an Ethnographic Sensibility', *PS: Political Science & Politics*, 50(01), pp. 126–130. doi: 10.1017/S1049096516002286.
- Slater, D. and Wong, J. (2013b) 'The Strength to Concede: Ruling Parties and Democratization in Developmental Asia', *Perspectives on Politics*, 11(03), pp. 717–733. doi: 10.1017/S1537592713002090.

Assessment: Research proposal (100%) in the ST.

It is recommended that students base the research design

proposal (4000 words) on their dissertation topic (or a related topic, e.g. a PhD proposal) subject to approval by students' home department. Where students also take MY400 (which has a similar summative assessment), students will be guided towards a modified version of the research proposal (e.g. a different research question) to avoid self-plagiarism between assignments. Students must consult with their home department regarding overlap between the proposal and their dissertation.

MY426 Half Unit Doing Ethnography

This information is for the 2024/25 session.

Teacher responsible: Dr Chana Teeger

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in Inequalities and Social Science, MSc in International Social and Public Policy (Research), MSc in Marketing, MSc in Political Science (Conflict Studies and Comparative Politics) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected. Please contact the course convenor if unsure.

Course content: Doing ethnography enables us to examine how social order is produced as people go about their everyday interactions. Multiple sources of naturally-occurring data are used to understand how communities, organisations and institutions work, informally as well as formally. This interdisciplinary course equips students with a practical understanding of how to do, and to think about, contemporary ethnography. Core conceptual, ethical and methodological debates are introduced through in-depth engagement with exemplar texts, and through students' experience of fieldwork. Fieldwork is a key component of the course, with students collecting data locally. Methodological concerns regarding case selection, establishing rigour, reflexivity, representing others, and ethical issues are addressed in detail. Practical issues addressed include identifying and accessing study sites, writing field notes, and analysing and writing up ethnographic data. Emphasising that ethnography relies on the researcher-as-research-instrument, the course aims to develop students' sensitivity and rigour as ethnographic researchers.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Winter Term.

This course has a Reading Week in Week 6 of WT.

Formative coursework: An excerpt of field-notes from the field visit undertaken as part of the course (up to 2,500 words) in WT. Field-notes should record rich details of observations (the data), researcher reflections, and brief interpretations of the significance of these observations. Written feedback will be provided.

Indicative reading: DeWalt, K. M.; DeWalt, B. R. (2002). Participant observation: A guide for fieldworkers. AltaMira Press. Emerson, R. M., Fretz, R. I.; Shaw, L. L. (1995). Writing ethnographic fieldnotes. University of Chicago Press. Hammersley, M; Atkinson, P. (2007). Ethnography: Principles in practice. Taylor ; Francis. Wacquant, L. (2004) Body and Soul: Ethnographic Notebooks of an Apprentice Boxer. New York: Oxford University Press. Laureau, Annette. (2011). Unreal Childhoods: Class, Race, and Family Life (2nd Edition). Berkeley: University of California Press

Assessment: Essay (100%, 4000 words) in the ST.

MY428 Half Unit

Qualitative Text and Discourse Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Audrey Alejandro

Availability: This course is available on the MSc in Accounting, Organisations and Institutions, MSc in Applied Social Data Science, MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Culture and Society, MSc in Development Studies, MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in Gender (Research), MSc in Gender (Rights and Human Rights), MSc in Gender, Media and Culture, MSc in Human Geography and Urban Studies (Research), MSc in Inequalities and Social Science, MSc in International Political Economy (Research), MSc in International Relations (Research), MSc in International Social and Public Policy (Research) and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

This course is freely available to any MSc or MRes students interested in text and discourse analysis.

The course is also available to PhD students interested in text and discourse analysis, please see MY528.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place. There is no need to require authorisation.

Pre-requisites: There are no prerequisites for this module but capacity to work autonomously is expected (including conducting a literature review, finding one's own bibliographical resources, creating one's own research question, etc.) Throughout the module, students are expected to make their own research decisions and learn how to become autonomous junior researchers by constructing a research project on their own. Students not confident in their capacity to work autonomously are encouraged to familiarise themselves with these skills prior to the beginning of the module to be able to make the most out of the teaching (see for example LSE Life services for resources helping you to prepare yourself for autonomous work).

Course content: How can we use texts and discourses to create meaning about the social world? The goal of this course is to provide students with the skills to construct and conduct social science research using text and discourse as an entry point. While acquiring these skills, students also learn how to interpret textual data by exploring the concepts and case studies developed across disciplines. The course both establishes a theoretical foundation for text/discourse analysis and takes a practical and applied approach, so that students can acquire greater independence and confidence to conduct their research project autonomously. Discourse Analysis is the overarching method that structures the content of the course. The first part of the course focuses on the application of the most common methods used to analyse texts and discourses (including thematic analysis and content analysis). The second part of the course places the in-depth analysis of texts in the broader context of research design and knowledge production, to ensure students know how to critically self-assess their work and produce research to the highest standards. Beyond learning the skills of qualitative text/discourse analysis, this course is an invitation to produce more structured, analytical and critical research capable of grasping not only the visible but also the invisible and implicit dimensions of politics and society. In that sense, the module also represents a perfect opportunity for students with a quantitative background to harness the strengths of qualitative methods and design strong mixed-methods analysis. Examples from across the social sciences will be used throughout the lectures and seminars. More information about MY428 can be found on the Moodle page of the module (for example course structure, examples of formative and summative assignments from the previous cohorts, and detailed guidelines about the assignments). Please do not hesitate to self-enrol to the Moodle page of the module to have a better idea of the content of the

module and the work required.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Winter Term.

This course has a Reading Week in Week 6 of WT.

Formative coursework: A project proposal (c.1,000 words) focusing on the topic that the student will develop in their summative assignment. The project proposal comprises a blog post and a project outline.

Indicative reading:

- Alejandro, A. (2021). Reflexive discourse analysis: A methodology for the practice of reflexivity, *European Journal of International Relations*, 27, 1, 2021, 150-174.
- Baker, P. and Ellece, S. (2010). *Key Terms in Discourse Analysis*, London: Continuum.
- Gee, JP (2011). *How to do discourse analysis: a toolkit*, New York: Routledge
- Kuckartz U. (2014). *Qualitative text analysis: a guide to methods, practice & using software*. Los Angeles: Sage.
- Scheier, M. (2012). *Qualitative Content Analysis*. Thousand Oaks: Sage.
- Taylor, S (2013). *What is discourse analysis?* London: Bloomsbury Academic.

Assessment: Research project (100%) in the ST.

The summative assignment is an exploratory project of 4000 words. Students can base their research project on a dimension/sub-question of their dissertation topic (or a related topic, e.g. a PhD proposal) subject to the approval of their home department.

MY451A Half Unit Introduction to Quantitative Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Sally Stares

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MPhil/PhD in Demography (Social/Formal), MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Conflict Studies, MSc in Environmental Policy and Regulation, MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in Gender (Research), MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations (Research), MSc in International Social and Public Policy (Research), MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is also available to research students as MY551.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Course content: An intensive introduction to quantitative data analysis in the social sciences. The course is intended for students with no previous experience of quantitative methods or statistics. It covers the foundations of descriptive statistics and statistical estimation and inference. At the end of the course students should be able to carry out and interpret a range of data analysis techniques, from univariate and bivariate descriptives to multiple linear regression and binary logistic regression at an introductory level. The seminars and computer exercises give 'hands-on' training in the application of statistical techniques to real social science research problems using the R computer package (no prior knowledge of R is necessary).

Teaching: This course is delivered through a combination of

lectures and seminars totalling a minimum of 30 hours across Autumn Term.

The course runs twice per year: in AT (MY451A) and again in WT (MY451W). The content of the course, and the method of assessment, is exactly the same in each term.

This course has a Reading Week in Week 6 of AT.

Formative coursework: Self-guided computer exercises to be completed before weekly classes for discussion and a weekly online quiz.

Indicative reading: A course pack will be available for download online. Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*. Pearson Education. Or Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*. Pearson Education (note that the second book is more advanced and is particularly useful if you are planning to take MY451 and MY452).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MY451W Half Unit Introduction to Quantitative Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Michael Schultz

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Environmental Policy and Regulation, MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in Gender (Research), MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations (Research), MSc in International Social and Public Policy (Research), MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is also available to research students as MY551.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Course content: An intensive introduction to quantitative data analysis in the social sciences. The course is intended for students with no previous experience of quantitative methods or statistics. Or Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*. Pearson Education (note that the second book is more advanced and is particularly useful if you are planning to take MY451 and MY452).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MY452A Half Unit Applied Regression Analysis

This information is for the 2024/25 session.

Teacher responsible: Professor Jouni Kuha

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Environmental Policy and Regulation, MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations (Research), MSc in International Social and Public Policy (Research), MSc in Local Economic Development, MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Political Science and Political Economy), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration, MSc in Social Research Methods and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: The course assumes a good working knowledge of basic descriptive statistics and statistical inference, to the level covered on a standard introductory statistics course such as MY451 (Introduction to Quantitative Analysis). Some prior familiarity with linear regression modelling will also be useful.

Course content: The course provides an introduction to statistical regression modelling and different types of regression models that are commonly used in the social sciences. The main topics covered are linear regression models, binary logistics models for dichotomous outcomes, multinomial and ordinal logistic models for polytomous outcomes, and Poisson and negative binomial regression models for counts. Examples are drawn from different social sciences. The course includes computer classes, where the R software is used for computation. Prior knowledge of R is not required.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Autumn Term.

The course runs twice per year: in AT (MY452A) and again in WT (MY452W). The content of the course, and the method of assessment, is exactly the same in each term.

This course has a Reading Week in Week 6 of AT.

Formative coursework: Weekly multiple-choice quizzes on Moodle, with feedback on the answers.

Indicative reading:

- A course pack will be available for download online.
- Gelman, A., Hill, J. & Vehtari, A. (2022). *Regression and Other*

Stories. Cambridge University Press.

- Agresti, A. (2018). *Statistical Methods for the Social Sciences*. Pearson Education Limited.
- James, G., Witten, D., Hastie, T., and Tibshirani, R. (2021). *An Introduction to Statistical Learning with Applications in R*. Springer.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MY452W Half Unit Applied Regression Analysis

This information is for the 2024/25 session.

Teacher responsible: Professor Jouni Kuha

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Comparative Politics, MSc in Environmental Policy and Regulation, MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in European and International Public Policy (LSE and Bocconi), MSc in European and International Public Policy (LSE and Sciences Po), MSc in Gender (Research), MSc in Human Geography and Urban Studies (Research), MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in International Political Economy (Research), MSc in International Relations (Research), MSc in International Social and Public Policy (Research), MSc in Local Economic Development, MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Science (Political Science and Political Economy), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration, MSc in Social Research Methods and MSc in Urban Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: The course assumes a good working knowledge of basic descriptive statistics and statistical inference, to the level covered on a standard introductory statistics course such as MY451 (Introduction to Quantitative Analysis). - James, G., Witten, D., Hastie, T., and Tibshirani, R. (2021). An Introduction to Statistical Learning with Applications in R. Springer.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MY455 Half Unit Multivariate Analysis and Measurement

This information is for the 2024/25 session.

Teacher responsible: Prof Jouni Kuha

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MPhil/PhD in Demography/Population Studies, MSc in Applied Social Data Science, MSc in Human Geography and Urban Studies (Research), MSc in International Social and Public Policy (Research), MSc in Marketing, MSc in Political Science (Political Science and Political Economy) and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

The course is also available to research students as MY555. This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: The course will assume a knowledge of standard linear regression models, to the level covered in MY452 (Applied Regression Analysis).

Course content: An introduction to the application of modern multivariate methods used in the social sciences, with particular focus on latent variable models (including factor analysis, structural equation models, latent class models, latent trait models) and methods of data reduction such as principal components analysis and cluster analysis. The R software will be used to apply and illustrate the methods in data analysis exercises.

Teaching: 20 hours of lectures and 8 hours of computer workshops in the WT. 1 hour of lectures in the ST.

This course has a Reading Week in Week 6 of WT.

Formative coursework: Answers to questions based on data analysis exercises can be submitted for formative feedback.

Indicative reading: D J Bartholomew, F Steele, I Moustaki; J I Galbraith (2008) Analysis of Multivariate Social Science Data (Second Edition).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MY456 Half Unit Survey Methodology

This information is for the 2024/25 session.

Teacher responsible: Dr Sally Stares

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Human Geography and Urban Studies (Research), MSc in Marketing, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: Knowledge of basic descriptive and inferential statistics, to the level of MY451 or equivalent.

Course content: This course provides a broad-based introduction to the design, implementation, and analysis of individual and household surveys. It is intended both for students who plan to design and collect their own surveys, and for those who need

to understand and use data from existing large-scale surveys. Topics covered include defining target and survey populations, inference from sample to population, sampling error and nonsampling error; sample design and sampling theory; modes of data collection; web surveys; survey interviewing; cognitive processes in answering survey questions; design and evaluation of survey questions; deriving and applying survey weights; analysis of data from complex surveys; paradata and responsive designs; comparative and longitudinal surveys. The over-arching theoretical framework used to link the component parts of the course is the Total Survey Error framework. Theoretical concepts are illustrated with examples of diverse surveys from the UK and internationally. The course includes applied classes designing questionnaires using the software Qualtrics, question evaluation and cognitive interviewing and analysis of complex survey data using the statistical package Stata; no previous knowledge of Stata is required.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours across Winter Term.

This course has a reading week in Week 6 of Winter Term.

Formative coursework: Three formative pieces of coursework: Designing and evaluating a questionnaire, using the Total Survey Error Framework, and secondary analysis of complex survey data.

Indicative reading: Groves, R M, Fowler, F J, Couper, M P, Lepkowski, J M, Singer, E, and Tourangeau, R (2009). Survey Methodology (2nd ed.). Wiley. Biemer, P. et al (2017) Total Survey Error in Practice. Wiley. Tourangeau, R, Rips, L J, and Rasinski, K (2000). The Psychology of Survey Response. Cambridge University Press.

Assessment: Project (100%, 3500 words) in the ST.

The project is a report of 3500 words maximum, focusing on concept definition, question design, assessment of the strengths and limitations of an existing survey drawing on the material covered in the course.

MY457 Half Unit Causal Inference for Observational and Experimental Studies

This information is for the 2024/25 session.

Teacher responsible: Dr Daniel De Kadt

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Behavioural Science, MSc in European and International Politics and Policy, MSc in European and International Politics and Policy (LSE and Bocconi), MSc in European and International Politics and Policy (LSE and Sciences Po), MSc in Human Geography and Urban Studies (Research), MSc in International Social and Public Policy (Research), MSc in Political Science (Political Science and Political Economy), MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: Knowledge of multiple linear regression and some familiarity with generalised linear models, to the level of MY452 or equivalent. Familiarity with notions of research design in the social sciences, to the level of MY400 or equivalent. Familiarity with R.

Course content: This course provides an advanced introduction to modern quantitative causal inference in the social sciences. The class covers the canonical approaches to causal inference and includes excursions to the leading edge of the field. We begin with a foundational introduction to both the potential outcomes and graphical frameworks for causality, before considering a range of applied research designs for causal inference. We first discuss identification and estimation for classical randomized experiments,

with brief forays into more complex designs. We then turn to a range of observational designs, which will be the primary focus of the class. The first of these is selection on observables (SOO), and we cover regression, matching, and weighting as estimations strategies, before discussing sensitivity analyses and interval estimation (bounds). We then consider instrumental variables (IV) from both the modern potential outcomes perspective and, briefly, the classical structural approach, before delving into new IV settings like examiner designs, shift-share designs, and recentered instruments. From IV we move to regression discontinuity designs (RDD); we approach identification from the continuity perspective and introduce local polynomial approximation for estimation. Finally, we pivot to causal inference with time-varying data, focusing first on the canonical two-period difference-in-differences (DiD) design. We then consider generalised DiD with many time periods, treatment effect heterogeneity, staggered assignment, and non-absorbing treatments. Throughout the class examples are drawn from different social sciences. The course includes seminars for each of the major methods, which combine the close reading and discussion of an applied paper with a brief session on implementation in R.

Teaching: Combined hours across lectures and classes will be equivalent to a minimum of 30 hours of face-to-face teaching across the WT.

This course has a reading week in Week 6 of WT.

Formative coursework: Problem sets from the computer classes can be submitted for feedback.

Indicative reading:

- Imbens, G. W. and Rubin, D. B. (2015). *Causal Inference for Statistics, Social, and Biomedical Sciences: An Introduction*. Cambridge University Press.
- Angrist, J. D. and Pischke, J.-S. (2009). *Mostly Harmless Econometrics*. Princeton University Press.
- Rosenbaum, P.R. (2010). *Design of Observational Studies*. Springer.

Assessment: Take-home assessment (100%) in the ST.

MY459 Half Unit Quantitative Text Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Ryan Hubert

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Applied Social Data Science, MSc in Data Science, MSc in Econometrics and Mathematical Economics, MSc in Human Geography and Urban Studies (Research), MSc in Political Science (Political Science and Political Economy), MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is also available to research students as MY559. This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: Applied Regression Analysis (MY452) or equivalent is required. Students should understand basic linear algebra and know at least one programming language. If this programming language is not R, students should take the Digital Skills Lab course in R before the start of term.

Course content: The course surveys methods for systematically extracting quantitative information from text for social scientific purposes, starting with classical content analysis and dictionary-based methods, classification methods, and state-of-the-art scaling methods. It continues with probabilistic topic models, word embeddings, and concludes with an outlook on current neural network-based models for texts. The course lays a theoretical foundation for text analysis but mainly takes a very practical and applied approach, so that students learn how to apply these methods in actual research. A common focus across many methods is that they can be reduced to a three-step process: first,

identifying texts and units of texts for analysis; second, extracting from the texts quantitatively measured features - such as coded content categories, word counts, word types, dictionary counts, or parts of speech - and converting these into a quantitative matrix; and third, using quantitative or statistical methods to analyse this matrix in order to generate inferences about the texts or their authors. The course systematically surveys these methods in a logical progression, with a practical, hands-on approach where each technique will be applied using appropriate software to real texts.

Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Winter Term.

This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to submit 1 problem set in the WT.

One structured problem set will be provided in the first weeks of the course. Students will start the problem set in the first computer workshop sessions and complete it outside of class.

Indicative reading: quanteda: An R package for quantitative text analysis. <http://kbenoit.github.io/quanteda/>
Benoit, Kenneth. 2020. "Text as Data: An Overview." In Curini, Luigi and Robert Franzese, eds. *Handbook of Research Methods in Political Science and International Relations*. Thousand Oaks: Sage. pp461-497.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MY461 Half Unit Social Network Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Milena Tsvetkova

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Applied Social Data Science, MSc in Data Science, MSc in Econometrics and Mathematical Economics, MSc in Human Geography and Urban Studies (Research), MSc in Media and Communications (Data and Society), MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Course content: This course focuses on data about connections, forming structures known as networks. Networks and network data describe an increasingly vast part of the modern world, through connections on social media, communications, financial transactions, and other ties. This course covers the fundamentals of network structures, network data structures, and the analysis and presentation of network data. Students will work directly with network data, and structure and analyse these data using R. Social networks have always been at the centre of human interaction, but especially with the explosive growth of the internet, network analysis has become increasingly central to all branches of the social sciences. How do people influence each other, bargain with each other, exchange information (or germs), or interact online? A diverse array of deep questions about human behaviour can only be answered by examining the social networks encompassing and shifting around us. Network analysis has emerged as a cross-disciplinary science in its own right, and has in fact proven to be of even greater generality and broader applicability than just the social, extending to ecology, physics, genetics, computer science, and other domains.

This course will examine the key papers in the development

of social network analysis, and will develop the theory and methodological tools needed to model and predict social networks and use them in social sciences as diverse as sociology, political science, economics, health, psychology, history, or business. The core of the course will comprise the essential tools of network analysis, from centrality, homophily, and community detection, to random graphs, network formation, and information flow. Alongside this we will read a series of substantive and seminal papers, shaped in part by the interests of the students and their various backgrounds, with a particular focus on the difficult task of causal inference in social networks. The course will also provide an introduction to network modelling, analysis and visualisation using R.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours across Winter Term.

This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 problem set in the WT.

Type: Structured formative problem set in one of the weeks will build on what was covered in the staff-led lab session, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.

Indicative reading:

- Newman, M.E.J. (2010). *Networks: An introduction*. Oxford, UK: Oxford University Press.
- Scott, J. (2017). *Social Network Analysis*. Los Angeles: SAGE. 4th edition.
- Easley, D., and Kleinberg, J. (2010). *Networks, Crowds, and Markets: Reasoning about a highly connected world*. New York: Cambridge University Press.

Assessment: Problem sets (45%) and take-home assessment (55%) in the WT.

Three summative problem sets will be marked in the WT. These will constitute 45% of the final overall mark.

MY464

Critical Data Literacy for Media and Communications

This information is for the 2024/25 session.

Teacher responsible: Dr Sally Stares

Availability: This course is available on the MPhil/PhD in Data, Networks and Society, MPhil/PhD in Media and Communications, MSc in Gender, Media and Culture, MSc in Global Media and Communications (LSE and Fudan), MSc in Global Media and Communications (LSE and UCT), MSc in Global Media and Communications (LSE and USC), MSc in Media and Communications, MSc in Media and Communications (Data and Society), MSc in Media and Communications (Media and Communications Governance), MSc in Media and Communications (Research), MSc in Media, Communication and Development, MSc in Politics and Communication and MSc in Strategic Communications. This course is not available as an outside option.

Students on the programmes listed above will be enrolled on this course when you register for MC4M1, MC4M2 or MC5M2. You must not register separately for MY464. It is not possible to take MY464 as a standalone course.

Course content: The course is intended for students with no previous experience of quantitative methods or statistics. It is designed to equip students to understand and critically reflect on reporting of commonly encountered quantitative analyses as presented, for example, in news reports, annual reports, opinion polls and academic articles in the field of Media and Communications. It covers the foundations of descriptive statistics and statistical estimation and inference, including tests of statistical significance, via a range of univariate and bivariate data analyses, and multiple linear regression. The seminars and practical exercises provide introductory skills training, applying

these techniques to real social science data and interpreting their results.

Teaching: This course is delivered through a combination of seminars and lectures totalling 15 hours across the Autumn Term.

This course has a Reading Week in Week 6 of AT.

Formative coursework: Self-guided practical exercises and readings to be completed before seminars for discussion, and Moodle (online) quizzes to support learning.

Indicative reading: A course pack will be available for download online to support the technical content of the course. Many introductory statistics books are also available; we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*, and Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*. Michael Blastland and Andrew Dilnot's (2008) *The Tiger That Isn't: Seeing Through a World of Numbers* provides an indication of 'critical' element of the course content.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

MY465 Half Unit

Intermediate Quantitative Analysis

This information is for the 2024/25 session.

Teacher responsible: Prof Jonathan Jackson

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange) and MSc in Human Geography and Urban Studies (Research). This course is available as an outside option to students on other programmes where regulations permit.

MSc students in the Department of Psychological and Behavioural Science take this course as part of PB411.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: Participants should have studied introductory statistics or quantitative methods before, up to an introduction to descriptive statistics and basic statistical inference. Students with no previous studies in quantitative analysis should take instead *Introduction to Quantitative Analysis* (MY451).

Because of the overlaps between these courses, it is not possible to take both this course and either of *Introduction to Quantitative Analysis* (MY451) or *Applied Regression Analysis* (MY452) as assessed courses.

Course content: The course is intended for students with some (even if limited) previous experience of quantitative methods or statistics. Using examples from psychological research, it covers first a review of the foundations of descriptive statistics and statistical inference, in the context of the analysis of two-way contingency tables and comparisons of means between two groups. The main topic of the course is linear regression modelling and related methods, including scatterplots, correlation, simple and multiple linear regression, and analysis of variance and covariance. An introduction to binary logistic regression modelling is also included.

Teaching: Combined hours across lectures and classes will be equivalent to a minimum of 30 hours of face-to-face teaching across the AT.

This course has a Reading Week in Week 6 of AT.

Formative coursework: Self-guided computer exercises implementing statistics covered in the lectures with weekly online homework on the material covered in the lectures and exercises.

Indicative reading: A course pack will be available for download online.

Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*, and Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

MY470 Half Unit Computer Programming

This information is for the 2024/25 session.

Teacher responsible: Dr Milena Tsvetkova

Availability: This course is compulsory on the MSc in Applied Social Data Science. This course is available on the MSc in Data Science, MSc in Geographic Data Science, MSc in Human Geography and Urban Studies (Research), MSc in Management and Strategy, MSc in Management and Strategy and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Course content: This course introduces students to the fundamentals of computer programming as students design, write, and debug computer programs using the programming language Python. The course will also cover the foundations of computer languages, algorithms, functions, variables, object-orientation, scoping, and assignment. The course will rely on practical examples from computational social science and social data science.

Students will learn how to design algorithms to solve problems and how to translate these algorithms into working computer programs. Students acquire skills and experience as they learn Python, through programming assignments with an approach that integrates project-based learning. This course is an introduction to the fundamental concepts of programming for students who lack a formal background in the field, but will include more advanced problem-solving skills in the later stages of the course. Topics include algorithm design and program development; data types; control structures; functions and parameter passing; recursion; computational complexity; searching and sorting; and an introduction to the principles of object-oriented programming and unit testing. The primary programming languages used in the course will be Python.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours across Autumn Term.

This course has a reading week in Week 6 of AT.

Formative coursework: Students will be expected to produce 1 problem set in the AT.

Students will work on weekly, structured problem sets in the staff-led class sessions. Example solutions will be provided at the end of each week.

Indicative reading:

- Guttag, John V. Introduction to Computation and Programming Using Python: With Application to Understanding Data. MIT Press, 2016.
- Gries, Paul, Jennifer Campbell, and Jason M Montojo. Practical Programming: An Introduction to Computer Science Using Python 3. The Pragmatic Bookshelf, 2013.

- Python, Intermediate and advanced documentation at <https://www.python.org/doc/>

Assessment: Take-home assessment (50%) and problem sets (50%) in the AT.

MY472 Half Unit Data for Data Scientists

This information is for the 2024/25 session.

Teacher responsible: Dr Ryan Hubert

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Applied Social Data Science, MSc in Geographic Data Science, MSc in Human Geography and Urban Studies (Research), MSc in Management and Strategy, MSc in Media and Communications (Data and Society) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place

Course content: This course will cover the principles of digital methods for storing and structuring data, including data types, relational and nonrelational database design, and query languages. Students will learn to build, populate, manipulate and query databases based on datasets relevant to their fields of interest. The course will also cover workflow management for typical data transformation and cleaning projects, frequently the starting point and most time consuming part of any data science project. This course uses a project-based learning approach towards the study of online publishing and group-based collaboration, essential ingredients of modern data science projects. The coverage of data sharing will include key skills in on-line publishing, including the elements of web design, the technical elements of web technologies and web programming, as well as the use of revision-control and group collaboration tools such as GitHub. Each student will build one or more interactive website based on content relevant to his/her domain-related interests, and will use GitHub for accessing and submitting course materials and assignments.

In this course, we introduce principles and applications of the electronic storage, structuring, manipulation, transformation, extraction, and dissemination of data. This includes data types, database design, data base implementation, and data analysis through structured queries. Through joining operations, we will also cover the challenges of data linkage and how to combine datasets from different sources. We begin by discussing concepts in fundamental data types, and how data is stored and recorded electronically. We will cover database design, especially relational databases, using substantive examples across a variety of fields. Students are introduced to SQL through MySQL, and programming assignments in this unit of the course will be designed to insure that students learn to create, populate and query an SQL database. We will introduce NoSQL using MongoDB and the JSON data format for comparison. For both types of database, students will be encouraged to work with data relevant to their own interests as they learn to create, populate and query data. In the final section of the data section of the course, we will step through a complete workflow including data cleaning and transformation, illustrating many of the practical challenges faced at the outset of any data analysis or data science project.

Online publishing and collaboration tools forms the second part of this course, along with the tools and technologies that underlie them. Students will develop interactive, secure and powerful projects for the World Wide Web using both client and server side technologies. Collaboration and the dissemination and submission of course assignments will use GitHub, the popular code repository and version control system. The course begins with an in-depth look at the markup languages that form the foundations of building web sites with a study of HTML and CSS. Students next study basic programming in JavaScript, to provide client and server side tools including the customization of web content using Bootstrap and Jekyll to publish web pages, which will provide the basis for a class project.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Autumn Term.

This course has a reading week in Week 6 of AT.

Formative coursework: Students will be expected to produce 10

problem sets in the AT.

Students will work on weekly, structured problem sets in the staff-led class sessions. Example solutions will be provided at the end of each week.

Assessment: Problem sets (50%) and take-home assessment (50%) in the AT.

MY474 Half Unit

Applied Machine Learning for Social Science

This information is for the 2024/25 session.

Teacher responsible: Dr Thomas Robinson

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Applied Social Data Science, MSc in Econometrics and Mathematical Economics, MSc in Geographic Data Science, MSc in Management and Strategy and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: Applied Regression Analysis (MY452) or equivalent is required. Students should understand basic linear algebra and know at least one programming language. If this programming language is not R, students should take the Digital Skills Lab course in R before the start of term.

Course content: Machine learning uses algorithms to find patterns in large datasets and make predictions based on them. This course will use prominent examples from social science research to cover major machine learning tasks including regression, classification, clustering, and dimensionality reduction. Lectures will use case studies to introduce common machine learning strategies including regularised regression (e.g. LASSO), tree-based methods, distance-based algorithms and neural networks. As part of this course, students will consider ethical issues surrounding machine learning applications, including privacy and algorithm bias. Students will learn to apply algorithms to data and to validate and evaluate models. Students will work directly with social data and analyse these data using Python or R.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Winter Term.

This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to submit 1 problem set in WT and will complete 5 quizzes across the term. The problem set will build on the first weeks of the course.

Assessment: Problem sets (100%) in the WT.

Two summative problem sets (100%) in WT.

MY475 Half Unit

Applied Deep Learning for Social Science

This information is for the 2024/25 session.

Teacher responsible: Dr Thomas Robinson

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Applied Social Data Science and MSc in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. Priority will be given to students on the MSc in Applied Social Data Science programme.

Pre-requisites: Students should have a firm grounding in applied statistics, for example by having completed Applied Regression Analysis (MY452), or similar. It would be helpful, but not essential, to have some prior knowledge of general machine learning concepts (regularisation, cross validation, gradient descent), for example by taking MY474 concurrently.

Course content: Recent years have seen huge advancements in the capability and application of machine learning methods, especially within the areas referred to as "deep" and reinforcement learning. Moreover, the rising prominence of generative artificial intelligence models offers not only promising new methods but also new areas of social scientific study.

This course will introduce students to key concepts within deep learning necessary for understanding how these methods are being applied in social scientific research. We will cover the fundamentals of building and training neural networks, including specific model architectures like autoencoder, adversarial, and convolutional neural networks. We will also introduce general features such as embeddings, dropout, and attention. This course

will place particular emphasis on how deep and reinforcement learning methods can be used to understand social phenomena, including when our data comes from non-quantitative sources like images and text. We will, for example, examine recent efforts to analyse the content of images, consider how to measure concept similarity in text, and explore how insights from reinforcement learning have been deployed in social scientific and industrial contexts. The course ends with a synthesis of these fundamentals to motivate and explain large-language models and their uses, including for zero-and few-shot classification and synthetic sampling.

Lectures will use applied examples to help students build strong intuitions about how these methods can be used in practice. The course will discuss recent examples from across social science disciplines - both for design and analysis purposes. Students will consider practical issues related to the implementation and computation of large networks, as well as the analytic limitations of prediction models. Students will learn to apply important algorithms to data and to validate and evaluate model results. Students will work directly with applied datasets and analyse these data using Python and industry-standard deep learning APIs.

Teaching: 20 hours of lectures and 10 hours of seminars in the WT.

This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term. This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce one structured problem set in the WT.

Indicative reading:

Assessment: Exam (80%, duration: 2 hours) in the spring exam period.

Take-home assessment (20%) in the WT.

MY476 Half Unit Population Analysis: Methods and Models

This information is for the 2024/25 session.

Teacher responsible: Dr Arjan Gjonca, Prof Tiziana Leone, Prof Eric Schneider

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Places will be allocated with priority to ID and joint-degree students. If there are more ID and joint-degree students than MY476 can accommodate, these places will be allocated randomly.

Pre-requisites: Students should have basic numeracy, but the course does not require advanced mathematical knowledge. Some practical sessions will involve use of the spreadsheet EXCEL. IT Training provides numerous self-paced student supervised workshops on EXCEL and downloadable course guides. Students with no prior experience of EXCEL are advised to attend one of these workshops before the course.

Course content: This course provides an introduction to the key concepts and methods required for population analysis and the understanding of population issues. The course will explain the dynamics of population change and enable students to learn basic methods for measuring population structure and the determinants of population size and change (fertility, mortality and migration). The course will also provide an introduction to population projections and describe and evaluate how demographic data are collected and used. Emphasis is placed on the understanding and interpretation of demographic data and demographic indicators, as well as the methods of population analysis required to understand the major population issues the World is facing at present.

Teaching: 11 hours of lectures and 15 hours of seminars in the AT. There will be a revision lecture in week 11.

Students on this course will have a reading week in week 6.

Formative coursework: Students will be expected to complete exercises, write one essay and complete one mock exam during the term

Indicative reading:

- Demography: Measuring and Modeling Population Processes by S H Preston, P Heuveline and M Guillot, 2001. This will be used as a reference text in the course. Students may also find it helpful to consult some of the other standard texts available including:
- Essential Demographic Methods by Kenneth W. Wachter, 2014 (recommended);
- Demographic Methods by Andrew Hinde, 1998;
- Demographic Methods and Concepts by Donald Rowland, 2003 (less advanced);
- Methods and Models in Demography by C Newell, 1988 (less advanced).

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

MY498 Capstone Project

This information is for the 2024/25 session.

Teacher responsible: Dr Daniel De Kadt

Availability: This course is compulsory on the MSc in Applied Social Data Science. This course is not available as an outside option.

Course content: The capstone course is a dissertation project that represents the final element in the construction of a student's data science master's education. The capstone project takes the form of a written thesis of up to 10,000 words that investigates empirically a problem related to some social science field using the tools of data science. The topic will be developed throughout the research design seminar and adjusted and agreed to by the student's supervisor.

Formative coursework: Each student will be required to give a short presentation outlining the subject and proposed research design of the project in a session organised for all students during ST.

Assessment: Dissertation (100%, 10000 words) in the post-spring term.

MY499**Dissertation**

This information is for the 2024/25 session.

Teacher responsible: Dr Sally Stares

Availability: This course is compulsory on the MSc in Social Research Methods. This course is not available as an outside option.

Course content: Students are required to write a 10,000 word dissertation. The dissertation is based on an empirical investigation of an issue relevant to the programme content and on a topic within the field covered by their specialist subject and agreed with their supervisor.

Formative coursework: Each student will be required to give a short presentation outlining the subject of their dissertation and the proposed argument of the dissertation in a session organised for all students during ST.

Assessment: Dissertation (100%, 10000 words) in the post-spring term.

MY4IR Half Unit**Research Design for International Relations**

This information is for the 2024/25 session.

Teacher responsible: Prof Jonathan Jackson

Availability: This course is compulsory on the MSc in International Political Economy (Research) and MSc in International Relations (Research). This course is available on the MSc in International Political Economy, MSc in International Political Economy (LSE and Sciences Po), MSc in International Relations and MSc in International Relations (LSE and Sciences Po). This course is not available as an outside option.

Course content: Research design represents a key dimension of knowledge production in the social sciences. This course aims to explore the challenges of research design and introduce the broad range of design options for students in International Relations. Drawing on a variety of examples putting into perspective the literature focusing on world politics into the broader context of social science research methods, this course will explore design considerations and options across quantitative, qualitative and mixed-methods research. At the end of the course, students will be able to read a wide variety of empirical social science with a critical and balanced perspective, assess trade-offs between the strengths and weaknesses of different feasible options, and be better equipped to implement and make arguments defending the methods they use in their dissertations.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Autumn Term.

The lectures for this course are shared with the course MY400 Fundamentals of Social Science Research Design.

Formative coursework: Students will be expected to produce 1 exercise in the AT.

A project outline (1-2 pages long) that sets up a research question that the student will develop in their summative assignment.

Indicative reading:

Assessment: Research proposal (100%) in the WT.

A research proposal (100%, 3000 words) in the WT. Students can base their research proposal on a dimension of their dissertation topic subject to the approval of their home department.

PB400 Not available in 2024/25**Psychological and Behavioural Science**

This information is for the 2024/25 session.

Teacher responsible: Dr Alex Gillespie

Availability: This course is compulsory on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

PB400 is a compulsory component of courses: PB401 Contemporary Social and Cultural Psychology; PB402 Organisational and Social Psychology; PB403 Psychology of Economic Life; PB404 The Social Psychology of Communication; PB405 Foundations in Behavioural Science.

Course content: The course provides a broad introduction to social, cultural and organisational psychology, and behavioural science, through the lens of cutting-edge research conducted by PBS faculty. Although the topics of research will be diverse, varying year-by-year, the course will draw out the core themes and debates that constitute the current state of the art.

The entry point for each lecture will be ongoing research conducted by faculty within the Department of Psychological and Behavioural Science. Through research on a wide range of phenomena, fundamental and cross-cutting concepts will be introduced, such as: attitudes, beliefs, common sense, communication, context, cultural evolution, embodied cognition, entrepreneurship, group work, inequality & social stratification, leadership, motivation, narratives, organisational culture, power & status, science, social change, social identity, values and wellbeing. The common theme across the course is that the major problems we face today are created by human behaviour. Thus, understanding how people think and act provides our best basis for intervening in those problems. Secondary themes will include: the importance of the micro context in shaping thought and behaviour; the role of institutions, social structures and culture in shaping behaviour more generally; the scope for cultural variation between companies, groups and historical periods; the need for diverse methods and original theory; and, complementarity between lab and field research.

The course will also introduce the debates that are occurring at the forefront of research. Faculty will discuss the pushes and pulls of big data vs. small data and disciplinary vs. inter-disciplinary. The relative merits of psychological vs. behavioural interventions will be debated. And, in the ongoing tension between applied vs. fundamental research, faculty will question whose interests are being served by changing human behaviour.

Teaching: 20 hours of lectures and 9 hours of seminars in the AT.

Formative coursework: A 500 word annotated bibliography for any 2 readings from the first 3 lectures (250 words for each annotated reference). For each reading in the bibliography there should be: 1) the reference in APA style; 2) a concise summary; 3) an evaluation, comment, and/or question that may create links between readings and/or literature in the core course.

Indicative reading: Hogg, M., & Vaughan, G. (2013) *Social Psychology*. Harlow: Pearson.

Assessment: A 1500 word annotated bibliography for any 6 readings from the fourth and subsequent lectures (250 words for each annotated reference). For each reading in the bibliography there should be: 1) the reference in APA style; 2) a concise summary; 3) an evaluation, comment, and/or question that may create links between readings and/or literature in the core course.

PB401**Contemporary Social and Cultural Psychology****This information is for the 2024/25 session.****Teacher responsible:** Prof Sandra Jovchelovitch**Availability:** This course is compulsory on the MSc in Social and Cultural Psychology. This course is not available as an outside option.

Course content: PB401 covers theory, research and applied issues in the field of social and cultural psychology. It critically reviews the interface mind-society-culture, the socio-cultural development of mind and the cultural transmission of social order and institutions, critically examining what distinguishes homo sapiens from its closest relative pan paniscus. Through a comparative approach, students are introduced to concepts and debates addressing 1) the relationship individual-society-culture and 2) culture as a universal condition underpinning human behaviour and the cross-cultural, as a particular context for human behaviour. Students explore current approaches and critiques of selected topics in the field, including the development of human behaviour (ontogenesis, phylogenesis and sociogenesis); intersubjectivity, perspectivity; thought and language; action and joint intentionality; mediation and artefacts; selfhood, community and culture in the 21st century, social identities, intergroup relations and power, political cultures, social representations and collective memory.. Examples are drawn from both Majority world and Western contexts covering theory and research relevant to different fields of application such as communication, conflict and dialogue, racism and discrimination, social exclusion and disadvantage, selfhood, identity, peace and conflict, mental health, and societal beliefs. Topics are explored at different levels of analysis of social and cultural psychology: ontogenetic (individual self); sociogenetic (social interaction, inter-group relations); phylogenetic (evolutionary history of homo sapiens).

Central to the syllabus is to sensitise and train students to reflexively consider the challenge of cultural and societal variation in the study of human behaviour and critically evaluate the theoretical and methodological corpus of social and cultural psychology.

Teaching: 20 hours of lectures and 15 hours of seminars in the AT. Students are also expected to attend a Lecture series focusing on marginalised voices in psychological and behavioural science (total of 15 hours taking place in AT and WT).

Formative coursework: Students are expected to produce one essay plan (750 words) and one annotated bibliography (500 words) in the AT.

Indicative reading: M Billig, *Arguing and Thinking: A Rhetorical Approach to Social Psychology*, CUP, 1987.

M Cole, *Cultural Psychology: A once and future discipline*. Harvard University Press, 1996.

Cambridge University Press, 1985.

Detailed reading lists are distributed at the beginning of the course.

Assessment: Essay (70%, 4000 words) in the WT.

Annotated bibliography (20%) and group presentation (10%) in the AT.

PB402**Organisational Social Psychology****This information is for the 2024/25 session.****Teacher responsible:** Dr Thomas Reader**Availability:** This course is compulsory on the MSc in Organisational and Social Psychology. This course is not available as an outside option.

Course content: PB402 teaches on core theory, research, and practice from the field of organisational and social psychology. It aims to have students reflect on organisations in their entirety, and then analyse how the psychological processes within them determine individual, group, and institutional outcomes. The course has a particular focus on the social psychological processes that occur in organisations (e.g., culture, group dynamics, building identity), and provides multidisciplinary coverage of the organisational contexts in which psychologists work. A basic familiarity with psychological methods is assumed, but their application within organisational processes and contexts will be examined in detail within the course. Issues and techniques in organisational analysis, discourse, identity, culture, groups, decision-making, leadership, and change management are covered.

Lectures will present core material for major concepts and theories in organisational and social psychology, and seminars will provide an interactive space to explore their meaning, significance, and application. The main themes covered will include: 1) Introduction to organisational and social psychology: for example, on culture and decision-making; 2) Groups in organisations: for example on identity and leadership; and 3) Organisational life: for example on well-being and change. The course will draw on core academic theory in organisational and social psychology, and also examples of research and practice by the teachers.

Teaching: 20 hours of lectures and 10 hours of seminars. Additionally, 10 hours of Bridging Theory and Practice in Organisational and Social Psychology seminars/workshops across AT/WT/ST.

Formative coursework: Students will be expected to produce two pieces of written work in AT, which will form the base for their written summative coursework.

Indicative reading: Reading lists on specific topics will be distributed during the course. Texts which are recommended for general use throughout the course are:

S Clegg & C Handy, *Studying Organisations: Theory and Method*, Sage, 1998;

E Schein, *Organizational Psychology Then and Now: Some Observations*, *Annual Review of Organizational Psychology and Organizational Behavior*, 2015 2:1, 1-19

G Morgan, *Images of Organisation* (2nd edn), Sage, 1997; A

Bryman (Ed), *Doing Research in Organisations*, Routledge, 1988;

A Furnham, *The Psychology of Behaviour at Work: The Individual in the Organisation*, Psychology Press, 2005.

S Haslam, *Psychology in Organisations: The Social Identity Approach*, Sage, 2004.

P Spector, *Industrial and Organisational Psychology: Research and Practice*, John Wiley & Sons, 2012.

Assessment:

• 1 x 3500 word written assessment (e.g., case study, report, 75%), submitted in AT

- 1 x 1500 word written assessment (based on two empirical articles, 25%), submitted in AT

PB403

Psychology of Economic Life

This information is for the 2024/25 session.

Teacher responsible: Prof Saadi Lahlou

Dr Frédéric Basso

Availability: This course is compulsory on the MSc in Psychology of Economic Life. This course is not available as an outside option.

Course content: This course explores new ways of crafting sustainable Production-Consumption Systems, and managing the transition from the current state to a more sustainable one, taking into account actual human beings (*Homo Sapiens*) rather than *Homo Economicus*. This endeavour is informed by a realistic psychology, with a critical but practical, societal approach and concrete application to real cases to move from an economic to an eco-systemic perspective.

We consider *Homo Sapiens* with its rationality, but also with its embodied, emotional, social and cultural dimensions as well as the cognitive characteristics and drives inherited from evolution, in order to explain the social-psychological aspects of economic phenomena. Furthermore, our framework recognises the importance of context and socio-technical constraints, as well as societal regulation.

Students are provided with a solid critical history of thought through the analysis of the concepts of great thinkers, updated with recent literature from a multidisciplinary perspective. They will use the content of the course to address a contemporary issue. They will also be provided with a framework, Installation Theory, to analyse and channel actual behaviour to become the changemakers needed to contribute to the societal transformation. Finally, they apply the skills they have learnt in the course, by working in groups, to make real cases of economic life more sustainable.

Framed by our distinctive societal approach to economic and environmental psychology, articulating history of thought and contemporary analyses, this course trains students to enable and support positive behaviour change in settings characterised by cultural diversity, a need for sustainability and alternative models of growth.

Teaching: AT: 20 hours of lectures; 20 hours of seminars. WT: 6 hours of lectures; 12 hours of seminars

Formative coursework: Students will be expected to produce one mini-essay and one oral presentation that precedes each summative.

Indicative reading: There is no single text for PB403 but one may find the following texts useful.

- Basso, F., & Herrmann-Pillath, C. (2024). *Embodiment, Political Economy and Human Flourishing: An Embodied Cognition Approach to Economic Life* (1st ed.). Palgrave Macmillan.

Assessment: Essay (50%, 2000 words) in the AT.

Essay (50%, 5000 words) in the WT.

The 2000-word PB403 essay is an individual essay which will be marked separately. The 5000-word PB403 essay is written in groups, which will be marked collectively, with an individual modulation reflecting respective contribution to the group work.

PB404

The Social Psychology of Communication

This information is for the 2024/25 session.

Teacher responsible: Prof Alex Gillespie

Availability: This course is compulsory on the MSc in Social and Public Communication. This course is not available as an outside option.

Course content: The course examines core theories towards a social psychology of communication, covering what we call the five 'language games' of signal transfer, rhetoric, speech acts and dialogue, systems of discourse, and emergent features of reception and representation. Issues raised will refer to verbal and non-verbal, face-to-face, rumours, gossip and mass mediated, social media, as well as private and public, communal and strategic forms of communication. The course will also provide an overview of communication research in various professional areas of communication such a reputation management, trust building, science and political communication.

Implications will be explored as to the critical analysis and the effective design of communication efforts in professional fields such as business corporations, NGOs, scientific research bodies, health providers, governments and political parties, law enforcement, diplomatic and international organisations.

Teaching: 20 hours of lectures and 15 hours of seminars in the AT.

Formative coursework: 1 x formative essay (800 words) and 1 x annotated bibliography (200 words) to correspond with each summative assessment. Both to be submitted in AT to receive feedback.

Indicative reading: No one book covers the entire syllabus; students will be expected to read widely in appropriate journals,

and a list of references will be provided at the start of the course.

J Habermas, *Theory of Communicative Action*, Vol 1 + 2, Polity Press, 1997.

M Meyer (2017) *What is Rhetoric?*, Oxford, OUP

G Sammut and MW Bauer (2021) *The Psychology of Social Influence – Modes and Modalities of Shifting Common Sense*, Cambridge, CUP

Assessment: Essay (80%, 4000 words) in the WT.

Annotated bibliography (20%) in the AT.

PB405

Foundations in Behavioural Science

This information is for the 2024/25 session.

Teacher responsible: Prof Liam Delaney and Dr Christian Krekel

Availability: This course is compulsory on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: This course aims to introduce students to the main concepts and tools of behavioural science, drawing on the most recent evidence from economics, psychology, and neuroscience to explain what motivates action and human behaviour. To achieve this aim, the course will focus on a variety of topics integral to the discipline, such as: 1) what is behavioural science?; 2) choices under risk and uncertainty; 3) intertemporal decisions and social and moral preferences; 4) biases, heuristics, and rules of thumb; 5) the role of emotions in decision-making; 6) norms in decision-making; 7) dual-process models of behaviour; 8) the power of nudges; 9) compensating behaviours; and 10) ethical considerations.

Teaching: Students will be expected to attend two strands of teaching for PB405:

- PB405 core lecture series with accompanying seminar (15 hours of lecture and 15 hours of seminar during AT)
- Seminar series titled 'Behavioural Science, Applied Psychology and the Wider World', which examines the application of behavioural science concepts and methods across all 160 sectors (government, business, and NGOs) 160 (ten 160 hours of seminar in both AT and WT)

Formative coursework: Students will be expected to complete one formative assignment, to be submitted in AT.

Indicative reading: Books

- Kahneman, D. (2012). *Thinking, Fast and Slow*. Penguin.
- Kahneman, D., O. Sibony, & C. R. Sunstein (2021). *Noise: A Flaw in Human Judgement*. William Collins.

Assessment: Exam (70%, duration: 2 hours) in the January exam period.

Essay (30%, 2000 words) in the AT.

PB410

Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Frederic Basso

Availability: This course is compulsory on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

Course content: The dissertation is an empirical investigation, carried out by the student, under the supervision of a member of staff. Research topics and methodologies vary considerably, but they must relate to the student's MSc Programme. All dissertation topics will need to be approved by a supervisor who is a faculty member of the Department of Psychological and Behavioural Science. The supervisor will advise the student, help provide information and bibliography, and provide feedback on the research.

Teaching: Students will be supervised primarily in group laboratory meetings/seminars; individual support will also be available as appropriate and necessary.

Students should also attend all lectures and workshops timetabled under PB410.

Formative coursework: Students will receive formative feedback from their supervisor on the following coursework (1,000 max words): A Dissertation Progress Report (optional)

Assessment: Dissertation (100%, 10000 words) in August.

PB411**Methods for Social Psychology Research: Qualitative and Quantitative Methods****This information is for the 2024/25 session.****Teacher responsible:** Dr Alex Goddard**Availability:** This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option. All components of this course are compulsory for students taking

- MSc in Organisational Social Psychology
- MSc in Psychology of Economic Life
- MSc in Social and Cultural Psychology
- MSc in Social and Public Communication

Course content: This course is for MSc students in the Department of Psychological and Behavioural Science. It will: 1) provide an overview of methodological issues for psychological research;

2) cover core skills in research design in Psychology; and

3) provide training in core psychological methods of analysing quantitative and qualitative data.

By the end of the course, as a whole, students will be equipped with methodological skills that will enable them to conduct empirical research for their MSc dissertation and research in a variety of real world contexts.

Teaching: Teaching takes place in the AT. The course has two components:

- MY421 Qualitative Research Methods (AT)
- MY465 Intermediate Quantitative Analysis (AT)

Formative coursework: Students will follow the formative work requirements on the MY course(s) that they take under each stream.**Indicative reading:**

- Bauer, M. and Gaskell, G. (2000) Qualitative researching with text, image and sound - a practical handbook London, Sage
- Breakwell, G. Foot, H. and Gilmour. (1988) Doing Social Psychology: Laboratory and Field Exercises. Cambridge: Cambridge University Press.
- Haslam, S.A., & McGarty, C. (2014). Research Methods and Statistics in Psychology. London: Sage.
- Miell, D. and Wetherwell, M. (1998) Doing Social Psychology. Milton Keynes: Open University Press.

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Report (50%) in the WT.

- PB411: Not assessed
- MY421: 50% 3,000 word report (WT)
- MY465: 50% two-hour exam (January Exam Period).

PB413 Half Unit**Experimental Design and Methods for Behavioural Science****This information is for the 2024/25 session.****Teacher responsible:** Dr Matteo Galizzi, Dr Alina Velias and Dr Benjamin Tappin**Availability:** This course is compulsory on the MSc in Behavioural Science. This course is not available as an outside option.**Course content:** Behavioural science is the scientific study of human behaviour, and it combines research techniques from experimental psychology and economics. The course offers an integrated training in advanced behavioural science methods by introducing students to state-of-the-art experimental techniques that stretch across the spectrum of both disciplines.

The course covers the following topics: randomised controlled experiments in behavioural science, causality, selection bias; online, lab, and field experiments in behavioural science; principles of experimental design; transparency and reproducibility of behavioural science research, pre-registration, pre-analysis plan;

best practices in modern behavioural science experiments; tests of hypotheses and sample size calculations for experiments in theory and practice; determining evidential value of behavioural science research, p-curve analysis; measuring attitudes and preferences; behavioural game theory and experimental games of strategic interaction; designing behavioural priming experiments and measures that tap into implicit cognition; state-of-the-art physiological research techniques; regression analysis of experimental data in theory and practice; understanding the mechanisms behind behavioural effects by employing experimental-causal-chain, measurement-of-mediation, and moderation-of-process designs.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT.**Formative coursework:** Students will be expected to produce 1 presentation in the WT.

For the formative assignment, students will work in small groups (3-4 students) to produce a presentation in which they will need to propose a design and implementation of a behavioural science experiment entailing the use of (at least) two different software packages introduced in the course.

Assessment: Report (100%) in the WT.

Students will be expected to write a 3,000 word report. The reports will need to be submitted individually and will require students to elaborate on the group-work undertaken as part of the formative assignment.

PB414**Advanced Methods for Social Psychology Research: Qualitative and Quantitative Methods****This information is for the 2024/25 session.****Teacher responsible:** Dr Alex Goddard**Availability:** This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

Students will have to choose between PB411 and PB414.

Course content: This course is for MSc students in the Department of Psychological and Behavioural Science. It will: 1 provide an overview of methodological issues for psychological research;

2 cover core skills in research design in Psychology; and

3 provide training in core psychological methods of analysing quantitative and qualitative data.

By the end of the course as a whole, students will be equipped with methodological skills that will enable them to conduct empirical research for their MSc dissertation and in a variety of real world contexts.

Teaching: Teaching takes place in the AT. The course has two components:

- MY421 Qualitative Research Methods (AT)
- MY452 Applied Regression Analysis (AT)

Formative coursework: Students will follow the formative work requirements on the MY course(s) that they take under each stream.

Indicative reading:

- Bauer, M. and Gaskell, G. (2000) Qualitative researching with text, image and sound - a practical handbook London, Sage

- Agresti, A and Finlay, B, Statistical Methods for the Social Sciences. A course pack will be available for download online.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Report (50%) in the WT.

PB414: Not assessed

MY421: 50% 3,000 word report (WT)

MY452: 50% exam in the Summer exam period.

PB415 Half Unit Behavioural Science

This information is for the 2024/25 session.

Teacher responsible: Prof Paul Dolan QUE.3.08

Availability: This course is available on the MSc in Environmental Economics and Climate Change, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

This course is available as an outside option to students on other programmes where regulations and room sizes permit.

This is a capped course. In teaching Week 1 places will be allocated to students from the Department of Psychological and Behavioural Science on a first come first served basis. At the start of Week 2 any remaining places will be allocated to students from other departments, again on a first come first served basis.

Course content: This course aims to introduce students to the main concepts and tools of behavioural science. To achieve this aim, the course is based around ten lectures covering: 1) what is behavioural science?; 2) choices under risk and uncertainty; 3) intertemporal decisions; 4) social and moral preferences; 5) biases and heuristics and rules of thumb; 6) the role of emotions in decision making; 7) dual-process models of behaviour; 8) the power of nudges; 9) compensating behaviours; 10) ethical considerations.

Teaching: 10 hours of lectures and 10 hours of seminars in the AT. There are ten topics, and the seminars allow for in depth discussion and analysis of the issues raised in the lectures.

Formative coursework: Students will be expected to produce 1 essay (1000 words) in the MT.

Indicative reading: Rabin, M. (1998). Psychology and Economics. Journal of Economic Literature, 36, 11-46.

Weber, E.U., and Johnson, E.J. (2009). Mindful judgment and decision making. Annual Review of Psychology, 60, 53-85.

Loewenstein, G., Weber, E.U., Hsee, C.K., and Welch, N. (2001). Risk as feelings. Psychological Bulletin, 127, 267-286.

Dolan P, Hallsworth M, Halpern D, King D, Metcalfe R, Vlaev I, Influencing behaviour: the mindspace way, Journal of Economic Psychology, 33, 1, 264-277, 2012.

Thaler, R. and Sunstein, C. (2003) Libertarian paternalism, American Economic Review, 93, 2, 175-179.

Assessment: Essay (100%, 2500 words) in the WT.

PB416 Half Unit Cognition and Culture

This information is for the 2024/25 session.

Teacher responsible: Prof Bradley Franks QUE.3.05

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social Anthropology (Religion in the Contemporary World), MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course examines recent directions in research relating to the relationships between mind and culture. Specific content will include a variety of theoretical issues, for example: relationships between social facts and psychological facts; naturalistic and non-naturalistic concepts of culture; symbolic culture; cultural relativity and universals; evolutionary and developmental constraints on the relations between mind and culture; communication, cultural transmission and change. These issues will be discussed with reference to specific domains of investigation, such as: emotions, representations of religion, race and natural kinds; pragmatics and communication; and social divisions of labour in meaning and representation, including deference and expertise.

Teaching: 15 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 3 presentations, 1 quiz and 1 other piece of coursework in the WT. Will consist of:

- a plan for an answer to an essay or case study question
- group presentations of core readings over the term
- a self-administered multiple choice quiz

Indicative reading: Detailed references and a synopsis of lectures and class topics are distributed in the first lecture of the series, and are available in S315 and in Outlook/Public Folders/Departments/Social Psychology. The following are of general use:

- S Atran, Cognitive Foundations of Natural History, Cambridge University Press, 1990;
- P Boyer, The Naturalness of Religious Ideas, University of California Press, 1996;
- D E Brown, Human Universals, McGraw-Hill, 1991;
- D M Buss & D T Kenrick, Evolutionary Social Psychology, 1998, cited in D T Gilbert, S T Fiske & G Lindzey (Eds), The Handbook of Social Psychology, Vol 2, McGraw-Hill, pps. 982-1026;
- M Cole, Cultural Psychology, Harvard University Press, 1996;
- S T Fiske et al, The Cultural Matrix of Social Psychology, cited in D T Gilbert, S T Fiske & G Lindzey (Eds), The Handbook of Social Psychology, Vol 2, McGraw-Hill;
- B Franks, Culture and Cognition: Evolutionary Perspectives, Palgrave MacMillan, 2011;
- L Hirschfeld, Race in the Making: Cognition, Culture and the Child's Construction of Social Kinds, MIT Press, 1996;
- R Nisbett & D Cohen, The Culture of Honor: The Psychology of Violence in the South, Westview Press, 1995;

- P B Smith & M H Bond, *Social Psychology Across Cultures* (2nd edn), Prentice Hall, 1998;
- D Sperber, *Explaining Culture*, Cambridge University Press, 1996.

Assessment: Coursework (100%, 3000 words) in the WT.

Students may choose to write **either**

- a 3000 word essay **or**
- a 3000 word case study.

PB417 Half Unit Consumer Psychology for Sustainability

This information is for the 2024/25 session.

Teacher responsible: TBC

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The objectives of the course are:

- 1 to provide students with an understanding of the social, psychological and cognitive processes underpinning the consumption of goods and services and their impact;
- 2 to explore alternative ways of relating to users/consumers than those based solely on market and competition and use these understandings to develop/move towards alternative sustainable routes for consumption; and
- 3 to prepare students to build better business models (e.g. social entrepreneurship, more sustainable, and so on) for the provision of goods and services.

The course will address the psychology of consumption at different levels of analysis: individual, group and societal. It will ground this psychology in the relevant literature, and teach students foundational theories, allowing them to develop a mental model of human behaviour as it relates to consumption. This is not a standard marketing or consumer research course. It is not about brand territories and market shares, but about how understanding various psychological processes in conjunction with these forces can provide us with tools to improve the world. How can we leverage consumer psychology to solve our sustainability problem?

Teaching: 15 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: 1 x essay plan submitted in the WT.

Indicative reading:

Assessment: Essay (100%, 3000 words) in the period between WT and ST.

The assignment is part of the learning process: analysing a real case and making sound recommendations will help to provide students with the transferable skills necessary to make the world a better place. In the first part, 'memorandum' (1,000 words), you will be asked to prepare a memorandum or open letter to the head of an organisation of your choice, with recommendations to improve the organisation by making it more sustainable. The recommendations must be realistic – they must be achievable and make business sense. In the second part of the essay, 'justification' (2,000 words), you will justify the specific recommendations presented in the memorandum with reference to theoretical and empirical literature and concepts. We encourage the best essays to be published as open letters.

PB418 Half Unit Corporate Communications

This information is for the 2024/25 session.

Teacher responsible: Dr Ben Shenoy

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Behavioural Science, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology, MSc in Social and Public Communication and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Corporate communications offers a framework for coordinating an enterprise's internal and external communication, with the overall purpose of establishing and maintaining a favourable reputation for that enterprise. As such, corporate communications affects each one of us in various guises: as customers, employees, investors, citizens or, more generally, as members of the public. Establishing and maintaining a favourable reputation turns out to be a considerable challenge in the complex times in which we live.

The focus of this course is corporate communications in 'wicked' times. 'Wicked' refers to the chaotic, ambiguous, polarized and confusing situations in which contemporary organizations find themselves. It aims to provide insights into tackling the challenge of 'wickedness' by adopting both a systemic and a behavioural perspective to corporate communications that examines the interactions between an organisation's work and its stakeholders through the dual lenses of complexity science and behavioural science. This approach will shed light on how key concepts (e.g. identity, trust, reputation and power) can explain how modern corporate communications is evolving. The course aims to bridge theory and practice by analysing contemporary cases of organisations handling communications challenges.

Teaching: 15 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce an outline plan of their summative assessment (see below).

Indicative reading: J Cornelissen, *Corporate Communications: A Guide to Theory and Practice*. Sage, 2020.

J M T Balmer & A Stephen (eds), *Revealing the Corporation: Perspectives on Identity, Image, Reputation and Corporate*

Branding, Routledge, 2002.

Harvard Business Review on Crisis Management, Harvard School Press, 2000.

C B M Van Riel & C J Fombrun, *Essentials of Corporate Communication: Implementing Practices for Effective Reputation Management*, Routledge, 2007.

Ashforth, B.E., & Mael, F. (1989). Social identity theory and the organisation. *Academy of Management Review*, 14, 20-39. Kramer, R.M. (2010).

Collective trust within organisations: conceptual foundation and empirical insights, *Corporate Reputation Review*, 13, 82-97.

Assessment: Essay (100%, 3000 words) in the period between WT and ST.

Case study: memorandum and analysis. The summative assignment is comprised of two parts. The first part (1,000 words) is a memorandum to a senior decision maker of an organization chosen by the student advising her/him about a specific issue relating to the corporate communications of their organization. The second part (2,000 words) is a theoretical justification of the recommendations in the memorandum. The organization chose could be a business corporation, a public sector organization or a third sector enterprise.

PB419 Half Unit Creativity and Innovation

This information is for the 2024/25 session.

Teacher responsible: Prof Alex Gillespie QUE.3.03

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MSc in Behavioural Science, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Marketing, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: An undergraduate degree in a social science related discipline or equivalent.

Course content: This course examines creativity and innovation from a social psychological standpoint. The first lectures of the course examine creativity, focusing on the social conditions which lead to new ideas. Then we will examine the way in which new ideas and technologies are instituted and resisted. The role of play and materiality in creative production are discussed next, followed by creative problem solving and the societal transmission of innovation. The course will end with a focus on societal creativity, utopias and imagining the future. Guiding questions will be: How do new ideas and technologies come about? What social contexts are conducive to creativity and innovation? Can the resistance to innovation lead to innovation? What is the human imagination? Why do humans enjoy play, games and fiction? What leads to insightful problem solving? How does perspective-taking help us understand if something new is creative, productive or useful? The course will cover the social conditions (i.e., face-to-face or online, one-to-one or group, autocratic or democratic, specialisation or integration, etc.) conducive to creativity and innovation, including the social conditions for socialisation creative individuals and the social and institutional factors which enable productive novelty to be recognised and instituted. Specific topics will include: theories of creativity, play & imagination, insight and problem solving, identifying good ideas, materiality, cultural evolution, the resistance to innovation, user innovation, utopias and how people imagine the future.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Indicative reading: Bauer, M. (2014). *Atoms, Bytes and Genes:*

Assessment: Essay (100%, 3000 words) in the WT.

PB420 Half Unit Current Communication Research

This information is for the 2024/25 session.

Teacher responsible: Prof Bradley Franks QUE.3.05

Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on degrees without a psychology or communications component may only attend subject to numbers, their own degree regulations and at the discretion of the teacher responsible.

Pre-requisites: None

Course content: The course content changes every year. It can either be a full thematic course or a collection of current research topics, and will involve contributions of staff members from the Department of Psychological and Behavioural Science and of visiting academics to the Department. The course provides research-led teaching on communication, using a range of theoretical approaches and addressing a wide variety of practical issues.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 3 presentations and 1 other piece of coursework in the WT.

Formative assessment involves:

i. ONE written plan for an answer to an essay question, selected

from a range of topics

ii. THREE group presentations on core readings

Indicative reading: The reading list varies according to the particular contents taught in each year.

Indicative readings will be made available during MT

The reading list varies according to the particular contents taught in each year.

Indicative readings will be made available during MT

Assessment: Essay (100%, 3000 words) in the WT.

Summative assessment for this course comprises a 3000 word essay, submitted at the end of LT

PB421 Half Unit Happiness

This information is for the 2024/25 session.

Teacher responsible: Dr Kate Laffan

Availability: This course is available on the MSc in Behavioural Science, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is compulsory on the Wellbeing Specialism of the MSc in Behavioural Science.

Course content: This course aims to introduce students to the main concepts and tools of the growing science of happiness, with a focus on applicability across all sectors (government, business, and NGOs). To achieve this aim, the course is based on ten lectures covering concepts such as: 1) what is happiness?; 2) evaluations of happiness; 3) experiences of happiness; 4) attention and adaptation; 5) anticipation and mistakes; 6) relative comparisons; 7) happiness across individuals and societies; 8) designing for happiness; 9) a dark side to happiness?; 10) the frontier of happiness research.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce one essay of 1,000 words in LT.

Indicative reading: Books

Dolan, P. (2014). *Happiness by Design: Finding Pleasure and Purpose in Everyday Life*. London: Penguin.

Dolan, P. (2019). *Happy Ever After: Escaping the Myth of the Perfect Life*. London: Allen Lane.

Assessment: Essay (100%, 3000 words) in the period between WT and ST.

PB422 Half Unit Not available in 2024/25 Health Communication

This information is for the 2024/25 session.

Teacher responsible: Prof Martin Bauer

Availability: This course is available on the MSc in Behavioural Science, MSc in Gender, Development and Globalisation, MSc in Gender, Policy and Inequalities, MSc in Health and International Development, MSc in Media, Communication and Development, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course centres on the application of societal psychology to the challenges of health communication in a global context. Considering both health and communication in a wide sense, and health as a 'boundary object', we will focus on public debates and controversies involving 'health issues' in modern society, the delivery of e-medicine, predictive medicine and the overlaps between the fields of health and science communication. 'Health' is a boundary object with many stakeholders: a major news value for science communication (health news); a criterion of societal development (increasing life expectancy); the grievance of social mobilisation (patient groups; AIDS campaign); a matter of risk communication in emergencies (epidemics, pandemics, nuclear accidents); to evaluate new technologies on health risks (GM food, AI); an industrial sector (health business) and the NHS (public health systems); an investment proposition (the health sector); health is a life style (wellness); a consumer issue as in food and service quality; the discussion of 'unhealthy behaviour' carries religious connotations (of 'sinning') in secular society; and health creates voices that enjoy high levels of trust and confidence as communicators in modern society (doctors, nurses, epidemiologists, pharmacists).

Throughout, we will discuss empirical studies of controversies in rapidly changing settings (Thalidomide, smoking & cancer, vaccinations, GM food, epidemics and pandemics, quackery, pseudo-science, alternative medicine etc). Through lectures, readings and seminar discussions with invited guests, we will encounter debates about health-related communication and behaviours, and the processes through which communication impacts on health, not least through the mobilisation of art & design. We will consider the implications of these debates for health promotion, learning about real-world examples through guest lectures, and gaining hands-on experience in appreciating, designing and critically assessing health communication in the 21st century.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 outline essay (1000 words) coursework in the LT and make 1 seminar presentation to receive feedback.

Assessment: Essay (100%, 3000 words) in the WT.

PB424 Half Unit Not available in 2024/25 Organisational Life

This information is for the 2024/25 session.

Teacher responsible: Dr Barry Rogers, Professor in Practice, PBS.

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The aim of PB424 is to equip students with the knowledge, mindset and skills necessary to bridge the gap between theoretical and practical perspectives. The course seeks to achieve this by critically making sense of on a range of emerging issues facing those that work for, and with organisations.

Our world has been turned upside down in recent years. On the one hand, disruptive technologies challenge taken-for-granted assumptions and long-standing business models. At the same time, existential issues such as climate change, sustainability and Covid highlight the fragility of the system, questioning the usefulness of many traditional approaches.

These dynamics beg a simple but fundamental question - how do we make sense of this fast-moving context and equip ourselves to shape, lead and enable change? PB 424 seeks to provide a tool box to answer this question.

The course will address a range of emerging questions including:

- How do we manage and lead organisations in an increasingly volatile and uncertain world?
- Why do we work...let alone engage five generational cohorts at work?
- What does the post pandemic (hybrid) workplace mean for sustainable working lives?
- How do we navigate multiple distractions and interruptions, equipping ourselves for the diminishing gap between stimulus and response?
- Where now for organisational learning, training and coaching?
- How do organisations meaningfully relate to wider societal stakeholders?
- How do we navigate organisational relationships and mobilize

resources to get things done?

- What constitutes 'showing up' as a leader in challenging times?
- How can we move beyond the 'ivory tower' and bridge organisational theory to practice?

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

There will also be 5 hours of 'Theory/Practice' guest sessions in the LT.

Formative coursework: One formative piece of coursework to be submitted in the LT.

Indicative reading: Berg, J. L. (2015). The role of personal purpose and personal goals in symbiotic visions. *Frontiers in Psychology*, 6. Choi, S. (2019). Breaking Through the Glass Ceiling: Social Capital Matters for Women's Career Success? *International Public Management Journal*, 22(2), 295–320.

Hoffman, A. J. (2016). Reflections: Academia's Emerging Crisis of Relevance and the Consequent Role of the Engaged Scholar. *Journal of Change Management*, 16(2), 77–96.

Leroy, S. (2009). Why is it so hard to do my work? The challenge of attention residue when switching between work tasks. *Organizational Behavior and Human Decision Processes*, 109(2), 168–181.

Moran, C. (2015). Time as a social practice. *Time & Society*, 24(3), 283–303.

Paoli, D. D., Sauer, E., & Ropo, A. (2019). The spatial context of organizations: A critique of 'creative workspaces.' *Journal of Management & Organization*, 25(2), 331–352.

Weick, K.E. (2003). 'Theory and Practice in the Real World' In: Tsoukas, H. & Knudsen, C. (eds.) *The Oxford Handbook of Organizational Theory*. London: OUP, pp 453-476.

Wood, M., & Dibben, M. (2015). Leadership as Relational Process. *Process Studies*, 44(1), 24–47.

Assessment: Essay (100%, 3000 words) in the ST.

The essay is structured in three parts. The first part involves the choice of a practical, emerging area of interest by the student. This is followed by a theoretical exploration of that issue and finally, a 'translation' of the theoretical perspective back to a real-world 'solution' setting. The logic of this approach is to equip students with the skills necessary to bridge theoretical and practical perspectives in ways that are rigorous, relevant and connect with real world needs.

PB425 Half Unit Organisations, Groups and Identity

This information is for the 2024/25 session.

Teacher responsible: Dr Ilka Gleibs

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students who come to this course without any background in social psychology are expected to familiarise themselves with the relevant literature. To this end, we strongly suggest that those students read the following books:

Hogg, MA & Vaughan, G. (eds) (2017). *Social Psychology*. 8th edition. Harlow: Pearson

Brown, R. & Peherson, S. (2019). *Group processes: Dynamics within and between groups*. . . Oxford, UK: Blackwell.

https://librarysearch.lse.ac.uk/primo-explore/fulldisplay?docid=TN_cdi_askewsholts_vlebooks_9781118719428&context=P_C&vid=44LSE_VU1&lang=en_US&search_scope=CSCOP_ALL&adaptor=primo_central_multiple_fe&tab=default_tab&query=any,contains,brown%20and%20Peherson&offset=0

Course content: In any society and any successful organisation understanding group dynamics and identity processes and how they are connected to the individual are an essential element and often provide a competitive advantage in managing organisations

of all sorts. Thus, the dynamics within and between groups directly informs the ability of individuals to think, learn, and innovate together. This course provides students with a critical understanding of the different theories and practices associated with identity and group dynamics in organisational settings and beyond. The objectives of the course are two-fold:

1. To introduce past and present theories of identity and group dynamics by introducing concepts used by social and organisational psychologists to understand and improve social and organisational behaviour
2. To apply and critically evaluate how identity and group dynamics theory help us explain and predict real-life experiences in social and organisational settings.

The course aims at highlighting how a better understanding of key social and organisational psychological concepts can contribute to understanding and managing the effectiveness of groups.

Examples of topics that will be covered include: Why group dynamics?; Influence and power; Identity and inclusion; Collective behaviour; Importance of groups on mental and physical health; Performance and decision-making; Diversity management; Organisational change; Group dynamics and the internet.

Teaching: 15 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the WT.

Indicative reading: Brown, R. & Peherson, S. (2019). Group processes. Oxford, UK: Blackwell.

Forsyth, D. (2019). Group dynamics. 7th edition Cengage Learning.

Haslam, S.A., (2004). Psychology in Organisations. A Social Identity Approach. London: Sage.

Levi, D. (2013). Group dynamics for teams. Los Angeles: Sage Publications.

Assessment: Policy memo (100%) in the period between WT and ST.

PB426 Half Unit

Knowledge Processes in Organisations

This information is for the 2024/25 session.

Teacher responsible: Dr Lucia Garcia-Lorenzo QUE.3.23

Availability: This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Behavioural Science, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course explores organisations in the 21st century and the challenges they face. We particularly focus on what we can accomplish through the acquisition and creation of new management and organising knowledge; its sharing and transmission as well as how we can improve its use. We will explore the processes of knowing and learning and the varied ways in which they support people working in a number of contexts, from project teams within single organisations to inter-organisational partnerships, networks and alliances. We will work together in lectures, seminars and workshops to understand both theoretically and practically how we create, disseminate and share knowledge in all types of 21st century organisations and work settings.

Concretely, the course addresses the following questions :

1. What is organisational knowledge? Lectures will explore the differences and overlaps between personal, social/organisational and cultural knowledge and between the processes of learning and knowing.
2. How do we create new knowledge in organisations and work settings? To answer this question we will look into processes of creativity, innovation and entrepreneurship.

3. How can we efficiently share/transmit knowledge in organisations? The course will address the challenges generated through the use of new technologies in the work place, the use of stories and narratives as a mode of knowledge transmission, the development of collaborative practices, and power relations in organisations.

4. How do we 'store' and use current organisational and personal knowledge? To answer this question lectures will address the uses of organisational history and memory as well as look into how we practice knowledge in every day organisational work.

The focus of the course is both theoretical and practical. Students' will be expected to engage with both current theoretical debates and emerging practical issues in organisational life through lectures, seminars and practical workshops.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Students will be expected to make extended use of the course intranet - for on-line discussions and group presentations.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Indicative reading: Reading lists will be provided for each topic, the following are introductory texts of general use: Amabile, T. A., & Khaire, M. (2008). Creativity and the role of the leader. Cambridge, MA: Harvard Business School Publishing; Davenport, T.H. & Prusak, L. (1998). Working knowledge: How organisations manage what they know. Harvard Business Press; Drucker, P. (2014). Innovation and entrepreneurship. Routledge; Gabriel, Y. (Ed.). (2004). Myths, stories, and organizations: Premodern narratives for our times. Oxford University Press on Demand; Huxham, C., & Vangen, S. (2013). Managing to collaborate: The theory and practice of collaborative advantage. Routledge; Weick, K. E. (1995) Sensemaking in organisations. London: Sage.

"I have never let my schooling interfere with my education." Mark Twain. If you like to read/use social media, you might want to look beyond academic materials into these other sources of knowledge that explore topics we will discuss in the course: Bregman, R. (2017). Utopia for realists: And how we can get there. Bloomsbury Publishing; Clay, A., & Phillips, K. M. (2016). The Misfit Economy: Lessons in Creativity from Pirates, Hackers, Gangsters and Other Informal Entrepreneurs. Simon and Schuster; Frayne, D. (2015). The refusal of work: The theory and practice of resistance to work. Zed Books Ltd.; Harari, Y. N. (2018). 21 Lessons for the 21st Century. Random House; How leaders use storytelling to share knowledge and influence followers: e.g. Obama's fire-up-ready-to-go story: <https://www.youtube.com/watch?v=5AhRqg0ADbk>; IDEO CEO Tim Brown talks about the powerful relationship between creative thinking and play: https://www.ted.com/talks/tim_brown_on_creativity_and_play?referrer=playlist-the_creative_spark

Assessment: Essay (100%, 3000 words) in the WT.

PB427 Half Unit Not available in 2024/25

Organisational and Social Decision Making

This information is for the 2024/25 session.

Teacher responsible: Lea Ruesch

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Behavioural Science, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology, MSc in Social and Public Communication and MSc in Strategic Communications and Society. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course teaches theory and engages with research from the field of organisational and social decision-making. It is primarily focused on high-risk organisational settings, and explores contexts where there is uncertainty, high-consequences for failure, and complex social systems. The course provides a historical introduction to decision-

making, and introduces the core concepts used by social psychologists to understand (and improve) decision-making processes in organisations. It draws upon the social, cognitive and organisational psychology literatures, and considers the core concepts and tools used to understand, research, and support decision-making in organisations. These theories and tools are contextualized through empirical and case study examples taken from domains such as finance, healthcare, the energy industry, government, and the military.

Students will be encouraged to take a critical perspective, and to consider how the principles taught on the course can be applied to (and used to improve) a variety of social or organisational scenarios. The course will cover psychology (or 'Human Factors') concepts such as: intuitive and analytical forms of decision-making; individual traits and cognitive factors that influence decision-makers (e.g. biases and emotions); human error and decision-failures; rule breaking; and group decision-making processes (e.g. teamwork, leadership). It will teach methods for analysing decision errors, identifying decision-making competencies, observing decision-making, and supporting group decision processes.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 case study in the WT.

Indicative reading: Brown, R. V. (2005). *Rational choice and judgment: Decision analysis for the decider*. Wiley.

Reason, J. (1990). *Human error*. New York: Cambridge University Press.

Reason, J. (1997). *Managing the risks of organizational accidents*. Aldershot, Ashgate.

Assessment: Essay (100%, 3000 words) in the WT.

PB428 Half Unit

Political Psychology: Inequality & Intergroup Relations

This information is for the 2024/25 session.

Teacher responsible: Dr Edoardo Zulato

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Political psychology is the study both of the workings of psychological processes in contemporary politics, and the impact of political and economic processes on individual and group behaviour. This course introduces the field in the form of a theoretical and empirical toolkit for examining the social psychological underpinnings of contemporary inequality and conflict between groups. We consider three broad approaches to conducting political psychology research, through focusing on individual attitudes, intergroup dynamics, and ideological discourse. We then evaluate how these lenses shed light on

contemporary and enduring issues concerning intergroup inequality.

The course will explore the psychosocial processes underpinning prejudice and discrimination, and consider how they manifest in debates around migration, diversity, social mobility, and intergroup conflict. It will consider political participation in its conventional and non-conventional forms, asking why people vote the way they do, and when they will turn to the streets to protest. Students will be equipped with the conceptual tools to consider the psychological antecedents and consequences of inequality in its various forms: to understand why intergroup hierarchy is so persistent, and how it might change.

Lectures and seminars aim to achieve a balance between theoretical and applied issues, critically investigating the ways in which psychology can enhance our understanding of intergroup relations and inequality, and also contribute to broader social and political debates. Through integrating evolutionary, cognitive, social, ideological, and societal perspectives, students will be in a position to take stock of the field of political psychology and where it might go.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: 500 word essay or report plan outlining the approach to the summative assessment.

Indicative reading: Augoustinos, M. & Reynolds, K. (2001).

Assessment: Essay (100%, 3000 words) in the period between WT and ST.

PB429 Half Unit Not available in 2024/25

Science, Innovations and the Human Future

This information is for the 2024/25 session.

Teacher responsible: Prof Martin Bauer CON.4.04

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is intended for MSc and PhD students in Psychological

and Behavioural Science. But, conditional to availability of space, it will be open to any interested MSc or Research Student from across the school where regulations permit.

Course content: The human future begins with the debate over new technologies and the society we want to live in. Think of search engines (Chat/GPT), artificial intelligence AI, vaccination, climate change, fracking, nuclear energy, CRISPR gene editing or genetically modified crops and foods. On all these frontiers of innovation, science is a cultural authority and historically an arbiter and a voice of reason; but through the progressive commercialisation of research, increasingly also a protagonist. No surprise therefore that these technologies are controversial. The human future needs this debate now and everywhere. In this course we will raise the question: what is the role of public debate, science communication and public attitude formation for innovations?

Through debate and controversy, modern societies develop their inter-subjective common sense and mobilise imaginaries of their future (Weart, 1988; Jasanoff et al.). For a technocratic attitude these debates are but deviations into a path of irrationality. In this context, the 'viral' diffusion model of innovation (Rogers, 1962) remains influential: scientists discover, engineers innovate, and social scientists provide acceptance in the marketplace. This linear model of 'acceptance research' is however wishful thinking (Godin et al.); valid at most for innovations with little resistance and no public debate. We recognise this reality through actor-network theory [ANT, Latour et al.] of inter-objectivity. More commonly, techno-scientific innovations encounter resistance that refocuses attention, evaluates 'innovations' and urges strategic adaptation (Bauer, 1991, 1995, 2002, 2015, and 2017). In this light, we will critically analyse the recurrent 'technocratic temptations' and the formation and impacts of resistance in socio-technological developments. Our focus will be on controversies, mobilising civic participation and the formation of public attitudes, comparing across ecology, nuclear power, IT, and genetic engineering in recent mobilisations over gene editing, AI, autonomous driving and robotic automation.

Students are expected to appreciate theory driven empirical research.

Teaching: 15 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Each session will have its own particular readings, divided into essential texts and additional readings. These readings are revised on an annual basis. No one text covers the entire syllabus; students will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course.

PB430 Half Unit Not available in 2024/25 Social Influence Modes and Modalities

This information is for the 2024/25 session.

Teacher responsible: Dr Gordon Sammut

This course will be offered by Dr Gordon Sammut, Lecturer at University of Malta, and Visiting Fellow to the Department of Psychological and Behavioural Science, and co-author of the key text for this course, Sammut & Bauer (2021).

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Previous exposure to social psychology concepts and research will be an advantage. Otherwise, the course is open to any MSc or Research Student interested in 'soft power' from across the school.

Course content: Starting from the distinction between 'hard' and 'soft' powers, this course covers the options of 'soft power', or the modes and modalities of social influence (Sammut & Bauer, 2021). Over the years, social psychology has developed these options both conceptually and empirically. Modalities of social influence cover processes by which social actors normalise, assimilate and accommodate opinion, attitudes, stereotypes, institute normative expectations and ways of life, and achieve recognition and social change. We will discuss the social psychology of inter-subjectivity and inter-objectivity through rhetoric, crowd behaviour, public opinion, leadership, norm and attitude formation, majority and minority influence, resistance and obedience to and compliance with authority, dual-processes of persuasion, mass media effect models; and the designs of fait-accompli. This discussion will unfold three perspectives: 1) the theoretical and empirical grounding of influence models; 2) the socio-historical context of their formulation (many models came out of WWII and the Cold War efforts); and 3) in current reformulations which often deploy new language without necessarily treading new ground in what is often 'old wine in new bottles'. The course builds up the Periodic Table of Social Influence [PTSI] with the 'cycle of normativity and common sense' and including the normalisation, assimilation and accommodation of social diversity (Sammut & Bauer, 2021). The moral ambiguity of social influence treads a fine line between promoting wellbeing and social recognition, and manipulating beliefs, opinion and attitudes. This raises ethical issues with the exercise of social influence in the modern public spheres.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Teaching arrangement: the course will be taught as a combination of weekly lecture and discussion seminar. Participants are expected to prepare at least one seminar discussion.

Formative coursework: Students will be expected to produce 1 essay and 1 presentation in the WT.

Students will be expected to produce 1 essay outline (max 1000 words) and students are expected to contribute 1 seminar presentation in the LT to receive feedback.

Indicative reading: Some key references:

- Billig M (1987) *Arguing and thinking – a rhetorical approach to social psychology*, Cambridge, CUP;
- Gigerenzer G (2007) *Gut feelings*, New York: Viking;
- Habermas J (1989) *The structural transformation of the public sphere*, Cambridge, Polity Press;
- Kahnemann D (2011) *Thinking, fast and slow*; London: Penguin Books.
- Moscovici, S, G Mugny and E VanAvermaet (1985) *Perspectives on Minority Influence*, Cambridge and Paris, CUP and edition MSH
- Paicheler G (1988) *The psychology of social influence*, Cambridge, CUP;
- Pratkanis AR (2007) *The Science of Social Influence*, NY, Psychology Press;
- Sloane T O (Ed) (2001) *Encyclopedia of Rhetoric*, Oxford, OUP [various entries: logos, pathos, ethos, argumentation, audience, classical rhetoric, persuasion, rhetorical situation];
- Sammut G and MW Bauer (2011) *Social influence: modes and modalities*, in: D W Hook, B Franks & M W Bauer (Eds) *The Social Psychology of Communication*, London, Palgrave, pp87-106.
- G Sammut and MW Bauer (2021) *The Psychology of Social Influence – Modes and Modalities of Shifting Common Sense*, Cambridge, CUP

While the course will take Sammut & Bauer (2021) as a textbook, each session will have its own additional readings. Students' will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course.

Each session will have its own particular readings, separated in essential texts and additional readings. This will be revised on an annual basis. No one book covers the entire syllabus; students' will be expected to read widely in appropriate journals, and a list of references will be provided at the start of the course.

Assessment: Essay (100%, 3000 words) in the ST.

PB431 Half Unit

Social Psychology of Economic Life: Advanced Topics

This information is for the 2024/25 session.

Teacher responsible: Dr Frederic Basso

Availability: This course is available on the MRes/PhD in Management (Organisational Behaviour), MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The idea of a social psychology of economic life is not obvious. From the point of view of mainstream economics, economic life – usually understood as the production, distribution, and consumption of goods and services – is under the scope of economics. As a mathematical science, economics is, to some extent, a rejection of social and psychological dimensions in the analysis of economic life. As the “queen of social sciences”, mainstream economics was even considered by some authors as the framework (the so-called “economic imperialism”) for studying social and psychological processes out of the economic life. Yet, some of the most important advances over the last five decades in the understanding of human economic behaviour (and its link to some of the most pressing societal issues nowadays) are derived from concepts and methods of psychology and other social sciences. The course presents how social psychology (broadly interpreted to include micro-sociology, cultural anthropology and social neuroscience) is the key to understanding real-world economic life by taking into account cognitive, affective and social processes, and also to contributing to better solutions to societal problems.

Main concepts: cognitive dissonance, analytic/experiential systems in decision-making, metaphors and decision-making, narratives and decision-making, self/extended self in consumption, dramaturgy/staging, social roles, face-to-face interactions, emotional labour/dissonance, gift economy, sharing economy, social group (inclusion/exclusion), stigma, social norms, disenchantment of the economic world, post-modern hyper-realities, experience economy, resistance to persuasion (inertia, scepticism, reactance), resistance to consumption (avoidance, minimisation, boycott/active rebellion).

Teaching: 15 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Indicative reading: Reading lists will be provided for each topic, the following references are for general use (though not mandatory readings);

- Akerlof, G. A., & Shiller, R. J. (2010). *Animal spirits: How human psychology drives the economy, and why it matters for global capitalism*. Princeton University Press.
- Nelson, J. A. (2018). *Economics for humans*. University of Chicago Press.
- Stafford, C. (2020). *Economic life in the real world: logic, emotion and ethics*. Cambridge University Press.

Assessment: Essay (100%, 3000 words) in the period between WT and ST.

PB432 Half Unit

Social Representations: Social Knowledge and Contemporary Issues

This information is for the 2024/25 session.

Teacher responsible: Prof Sandra Jovchelovitch and Ms Sandra Obradovic

Availability: This course is available on the MSc in Behavioural Science, MSc in Culture and Society, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course focuses on societal thinking, exploring how knowledge and beliefs develop, circulate, and change in public spheres. The course examines ‘thinking societies’ and how they connect the individual with the world around them. The foundational theoretical concepts introduced in the course are utilized to understand key topics including 1) the role of stories and story-telling in development and sense-making, 2) the politics of knowledge production and cultural thinking, 3) the links between social representations, selfhood, identities and histories, 4) how we make sense of the unfamiliar and the implications of encountering difference, 5) the implications of the digital sphere for ‘thinking societies’, connectedness and cohesion, and 6) how societies establish links between common sense, knowledge and truth. These topics are examined through classical empirical studies and theoretical and applied debates that cover both the Majority world and Western contexts.

Teaching: 15 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: An essay plan of not more than 500 words is required.

Indicative reading: G Sammut, E Andreouli, G Gaskell, and J Valsiner (Eds). *Resistance, stability and social change: A handbook of social representations*. Cambridge University Press, 2015. S Moscovici, *Social Representations: Explorations in social psychology*. Polity Press, 2000; S Moscovici, *Psychoanalysis: its image and its public*. Polity Press, 2008. I. Markova, *The Dialogical Mind: Common Sense and Ethics*. Cambridge University Press, 2016.

D Jodelet, *Madness and Social Representations*, Harvester/Wheatsheaf, 1991;

W Wagner and N Hayes, *Everyday Discourse and Common Sense*, Palgrave, 2005.

K Deaux & G Philogène, *Representations of the Social: Bridging Theoretical Perspectives*, Basil Blackwell, 2001.

A detailed bibliography is provided at the beginning of teaching.

Assessment: Coursework (100%, 3000 words) in the period between WT and ST.

PB433 Half Unit

Theory and Practice of Organisational Development

This information is for the 2024/25 session.

Teacher responsible: Dr Ishan Jalan

Availability: This course is available on the MSc in Behavioural Science, MSc in Human Resources and Organisations (Organisational Behaviour), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: What is Organizational Development? Organizational Development (OD) is a field of study and practice that focuses on facilitating planned change efforts and interventions, with a view to improve an organisation's effectiveness, health, and performance. Drawing from a range of theories, OD adopts a systemic approach to improving its internal processes, structures, and culture. To accomplish this, it undertakes a deep analysis of needs and goals to help organisations understand their current state, and work towards their desired future state.

Why is Organizational Development important? Organisations are now operating in an increasingly complex, dynamic, and ever-changing environment, and to confront these changes, organisations need to be nimble, innovative, and effective if they are to survive and thrive. Considering the overall goal of OD is to help create healthier, more adaptive, and resilient organizations capable of thriving in today's dynamic operational landscape, OD can help organizations navigate this difficult terrain, adapt, learn about new ways of leading and managing, and stay competitive. This course explores organisational development from a theoretical and practical perspective. While the course is strongly informed by key theoretical frameworks such as organisational behaviour, critical theory, system psychodynamics, psychological and management theories, to name a few, OD comes into its own in application. Students will be actively encouraged to relate key OD theoretical perspectives to current organisational challenges using interactive case studies and in-class activities. The aim of the course is, therefore, twofold: first to explore theories and concepts that underpin OD and second, to learn how to apply OD through practical hands-on experience. In seminars and workshops students will gain experience on drafting organizational change interventions, thinking about their implementation, and evaluating their potential impact in organised contexts.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Detailed references and class topics are distributed in the first lecture of the series. The following represents key readings covering some of the topics discussed in the course:

- Alvesson, M., & Sveningsson, S. (2015). *Changing organizational culture: Cultural change work in progress*. Routledge.
 - Antonacopoulou, E.P. and Gabriel, Y., (2001). Emotion, learning and organizational change: Towards an integration of psychoanalytic and other perspectives. *Journal of Organizational Change Management*. Vol. 14 No. 5, pp. 435-451.
 - Beckhard, R. (1969). *Organization development: Strategies and models*.

- Assessment:** Essay (100%, 3000 words) in the period between WT and ST.

PB434 Half Unit

Behavioural Science in an Age of AI and New Technology

This information is for the 2024/25 session.

Teacher responsible: Dr Stuart Mills

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

Course content: When Psychology and Economics got "married", the product was Behavioural Science. Although this discipline has elevated theoretical and practical understanding of human behaviour to previously unseen heights, recent technological developments have produced new insights in understanding and predicting people's actions that not only supplement traditional tools of behavioural science but also go beyond them. The future of the discipline will therefore likely depend on how effectively behavioural scientists can harness new developments in technology to understand and change the way people act. The aim of this course is to a) Introduce major technological advancements that are relevant for predicting, influencing, and understanding human behaviour; b) Outline how they supplement and extend commonly used tools of behavioural change; and c) Examine how they can be used to propel behavioural science into the future. The course will tackle behavioural science in relation to motion tracking, virtual environments, social robotics, social networks, and other relevant developments in information

technology.

Example topics explored on the course:

Understanding minds by reading bodies: Implications of motion tracking for behavioural science; Changing behaviour through gamification; Social robots: Our new friends?; Behavioural science in virtual worlds; Behavioural informatics; Change thyself: Using technology to influence our own behaviour; Digital footprints and human behaviour; Psychological targeting in digital age; The ethics of emerging technologies in the context of behavioural science.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Formative coursework will serve as your preparation for the summative assignment. You will need to create a 5-minute presentation on the topic of the summative assignment: Propose an intervention that relies on technological tools that were either covered throughout the course or that you identified through personal search to create behavioural change in an applied setting of your choice (e.g. your organisation, personal life; you can select any setting you desire). In the presentation, you will need to a) Introduce the behaviour you want to tackle and argue why changing this behaviour would be important; b) Present your intervention that uses technological tools to change the behaviour and c) argue why this intervention would be effective based on your knowledge of behavioural science gained through the class material and personal literature search.

Similar to the summative assignment, the presentation will be delivered in a video format: you will be given a clear step-by-step guide describing how to produce the presentation in a video format (we will go through this guide during a seminar to make sure it is clear to everyone how the summative assignment should be produced). The main aim of the formative assignment is for me to evaluate your approach to tackling points a), b), and c) mentioned above so I can give you relevant feedback that will help you when preparing the summative presentation, and also for you to get comfortable with producing the video presentation.

Indicative reading:

- Krpan, D., & Urbanik, M. (2020). From libertarian paternalism to liberalism: behavioural science and policy in an age of new technology. *Behavioural Public Policy*, 1-27.
- Kersten-van Dijk, E. T., Westerink, J. H., Beute, F., & IJsselstein, W. A. (2017). Personal informatics, self-insight, and behavior change: A critical review of current literature. *Human-Computer Interaction*, 32(5-6), 268-296.
- Zarouali, B., Dobber, T., De Pauw, G., & de Vreese, C. (2022). Using a personality-profiling algorithm to investigate political microtargeting: assessing the persuasion effects of personality-tailored ads on social media. *Communication Research*, 49, 1066-1091.
- Sailer, M., Hense, J. U., Mayr, S. K., & Mandl, H. (2017). How gamification motivates: An experimental study of the effects of specific game design elements on psychological need satisfaction. *Computers in Human Behavior*, 69, 371-380.
- Broadbent, E. (2017). Interactions with robots: The truths we reveal about ourselves. *Annual Review of Psychology*, 68, 627-652.

Assessment: Presentation (100%) in the period between WT and ST.

The aim of the summative assessment will be to propose an intervention that relies on technological tools that were either covered throughout the course or that you identified through personal search to produce behavioural change in an applied setting of your choice (e.g. your organisation, personal life; you can select any setting you desire). This intervention will be conveyed in the form of a 15 minute presentation that will count as your summative assignment. More precisely, in the presentation, you will need to a) Introduce the behaviour you want to tackle and argue why changing this behaviour would be important; b) Present your intervention that uses technological tools to change the behaviour and c) argue why this intervention would be effective based on your knowledge of behavioural science gained through

the class material and personal literature search.

The presentation will be delivered in a video format: you will be given a clear step-by-step guide describing how to produce the presentation in a video format (we will go through this guide during a seminar to make sure it is clear to everyone how the summative assignment should be produced). Together with the video presentation, you will need to submit an annotated bibliography that contains a) a list of scientific references you used for the presentation; and b) a short text below each reference (1-2 sentences) describing why exactly the reference is important in the context of your presentation. The main purposes of the annotated bibliography will be to demonstrate the academic background upon which your presentation was built.

PB435 Half Unit Not available in 2024/25 Behavioural Science for Planetary Wellbeing

This information is for the 2024/25 session.

Teacher responsible: Dr Ganga Shreedhar

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: We live on a changing planet and need to confront multiple planetary problems like climate change and mass extinction. Debates about understanding and changing human behaviour are at the centre of solutions to these problems. This course seeks to impart knowledge of, and critical thinking about, the interconnections between human behaviour and planetary change. Modules will approach environmental and ecological or "eco-behaviour" change, starting at the individual-level and moving onto to collective and societal levels. The course will discuss behavioural theories and frameworks to understand individual and structural antecedents and consequences of eco-behaviours, and how such factors can be incorporated into the design behavioural interventions and solutions. The course is interdisciplinary and draws on frameworks, concepts and tools from Behavioural Environmental and Ecological Economics, and Environmental and Social Psychology, amongst other fields.

Aims: This course aims to:

- Introduce key complex planetary problems including the idea of coupled human- environmental systems.
- Critically consider how we perceive and understand planetary problems and non-human nature, and how such factors impact behaviour.
- Investigate debates about pro-environmental and ecological behaviours or eco-behaviours including the main models, measures and applications.
- Outline the framework of social and socio-ecological dilemmas and discuss human motivations and behaviour within this framework.
- Examine eco-behaviours in social and societal group contexts and processes.
- Critically compare and contrast range of behavioural interventions targeting eco-behaviours.
- Locate debates about eco-behaviour change within larger debates about planetary health and systems transformations.

Learning outcomes: By the end of the course, students will be able to:

- Interpret and critically appraise planetary problems from a behavioural perspective.
- Interpret and critically appraise the models and concepts used to understand eco-behaviour and motivations
- Understand eco-behaviour dynamics within the individual and across social and societal groups.
- Evaluate the potential of different interventions to change eco-behaviour in the context of the need for systems transformations.
- Work cooperatively with peers to carry out a collaborative group

project.

- Work independently and creatively by proposing and designing a novel behaviour change intervention.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

The course will be delivered through a combination of interactive classes/seminars and lectures and supplementary interactive live activities. There will be structured learning activities throughout the course, especially in the seminars, including student presentations and group work.

There will be no teaching during reading week (Week 6).

Formative coursework: Preparing a research proposal for an intervention to change an eco-behaviour (500 words) based on a real-life case study.

Indicative reading:

- Clayton, S., Devine-Wright, P., Stern, P.C., Whitmarsh, L., Carrico, A., Steg, L., Swim, J. and Bonnes, M., 2015. Psychological research and global climate change. *Nature Climate Change*, 5(7), pp.640-646.
- Weber, E.U., 2020. Heads in the Sand: Why We Fail to Foresee and Contain Catastrophe. *Foreign Aff.*, 99, p.20.
- Yoeli, E., Budescu, D.V., Carrico, A.R., Delmas, M.A., DeShazo, J.R., Ferraro, P.J., Forster, H.A., Kunreuther, H., Larrick, R.P., Lubell, M. and Markowitz, E.M., 2017. Behavioral science tools to strengthen energy & environmental policy. *Behavioral Science & Policy*, 3(1), pp.68-79.

- Ostrom, E., 2010. Polycentric systems for coping with collective action and global environmental change. *Global environmental change*, 20(4), pp.550-557.
- Adams, M., 2021. Critical psychologies and climate change. *Current Opinion in Psychology*.
- Horton, R., Beaglehole, R., Bonita, R., Raeburn, J., McKee, M. and Wall, S., 2014. From public to planetary health: a manifesto. *The Lancet*, 383(9920), p.847.
- Steffen, Will, Katherine Richardson, Johan Rockström, Sarah E. Cornell, Ingo Fetzer, Elena M. Bennett, Reinette Biggs et al. "Planetary boundaries: Guiding human development on a changing planet." *Science* 347, no. 6223 (2015): 1259855.

Assessment: Research proposal (50%), reflective learning report (25%) and presentation (25%) in the ST.

The summative assignment is based on four components:

- Symposium and Group presentation [Attendance, Participation & Group presentation] (25%)
- Reflective report on symposium (25%)
- Research proposal (50%)

Please note: Students on MSc Behavioural Science taking this course as a dissertation option (PB4D7) must attend the symposium and group presentation.

PB436 Half Unit Not available in 2024/25 The Science of Time at Work

This information is for the 2024/25 session.

Teacher responsible: Dr. Laura M Gurge

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit. Auditing is not advised due to the participatory nature of lectures - please ask for permission from the course lead if you would like to audit.

Course content: Time is arguably the fabric of our lives, but its value often goes unnoticed. Every day we make decisions (or decisions are made for us) about how and with whom to spend our finite temporal resources. But what is time? How should we think

about the value of an hour, or a decade? What does it mean to optimally allocate our time? How does time affect our motivation, productivity, and well-being? Why is it so difficult to eradicate inequality in time-use at work and at home? What can leaders and employees do to protect desired work-life boundaries? And if time is our most precious resource, why is time theft not a crime?

This course seeks to address such questions by drawing primarily from the management literature and featuring real-life examples across industries and cultures. Students taking this course will gain a multidisciplinary perspective on managing time at work and in life; will learn to think critically about their own experiences and uses of time, and how this shapes their expectations and behaviours in their personal life, at work, and in society; they will be able to recognize the barriers that prevent them from pursuing activities that are beneficial for them and their community; will gain knowledge about how innovations and work has changed the way we think about time; and will learn how to integrate time across all aspects of their lives so they can enact positive change for themselves and their community.

Given that how we spend our time is how we live our life, this course is set up to be highly interactive and experiential. Students taking this course will not only learn about the theoretical insights on time but will also get to apply the science on time by engaging in various evidence-based exercises.

Below is an indicative schedule of the topics you can expect in this course. All changes to the content will be announced in class and/or on Moodle.

- **Time and the Individual:** Sessions 1-4 focus on time at the individual level and cover topics such as, subjective time, clock time, and the psychological and societal biases that perpetuate inequality and time poverty.
- **Time and Work:** Sessions 5-8 focus on time at work and cover topics such as, the various ways organizations (un)intentionally misuse temporal structures and push work-life boundaries, how to successfully lead temporally diverse teams, and the foundational role of time in work motivation.
- **Time and Legacy** – Sessions 9-10 focus on the legacy of time and cover topics such as, the impact of temporal footprints and the hidden potential of legacy.

Course Objectives

- To discover time research and why it matters for productivity and well-being.
- To get insights into one's own perceptions and (mis)uses of time.
- To explore new team dynamics and leadership that centre around time.
- To gain a better understanding of the role of work and motivation in our lives.
- To identify solutions that turn innovations from threats to opportunities

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Both lectures and seminars are highly interactive and involve class discussion.

Formative coursework: 1) Individual review of two anonymous op-ed essays. You will play the role of the "examiner" and review two anonymous essays (submitted by students from a previous year) by implementing the marking criteria used in this course. You will submit your feedback via an online survey. We will discuss your evaluations in class.

2) Individual 250-word pitch for your summative op-ed. For your summative, you will write an op-ed essay on an academic article (you will get to choose one of three articles that will be provided to you). To prepare you for your summative, part of your formative work will be to write a pitch on the article you choose to write an op-ed on. In your pitch, you should describe which article you plan to focus on, why you chose that article, and how you plan to approach your op-ed.

Indicative reading:

- Blagoev, B., & Schreyögg, G. (2019). Why do extreme work hours persist? Temporal uncoupling as a new way of seeing. *Academy of Management Journal*, 62(6), 1818-1847.

- Feldman, E., Reid, E. M., & Mazmanian, M. (2020). Signs of our time: Time-use as dedication, performance, identity, and power in contemporary workplaces. *Academy of Management Annals*, 14(2), 598–626.
- Giurge, L. M., Whillans, A. V., & West, C. (2020). Why time poverty matters for individuals, organisations and nations. *Nature Human Behaviour*, 4(10), 993–1003.
- Gonsalves, L. (2020). From face time to flex time: The role of physical space in worker temporal flexibility. *Administrative Science Quarterly*, 65(4), 1058–1091.
- Pai, J., DeVoe, S. E., & Pfeffer, J. (2020). How income and the economic evaluation of time affect who we socialize with outside of work. *Organizational Behavior and Human Decision Processes*, 161, 158–175.
- Shipp, A. J. (2021). My fixation on time management almost broke me. *Harvard Business Review*.
- Templeton, E. M., Chang, L. J., Reynolds, E. A., LeBeaumont, M. D. C., & Wheatley, T. (2022). Fast response times signal social connection in conversation. *Proceedings of the National Academy of Sciences*, 119(4).
- Young, C., & Melin, J. L. (2019). Time is a network good. *Current Opinion in Psychology*, 26, 23–27.

Assessment: Essay (80%, 2000 words) in the period between WT and ST.

Research proposal (20%) in the WT.

1) Essay + Annotated bibliography (80%): You will write an essay (max 1,500 words, excluding the bibliography) that follows the structure of an op-ed article (e.g., Harvard Business Review style). You will be provided with three academic articles, and you will have to choose which article you want to write an op-ed on. Like op-ed articles, you will use hyperlinked citations.

Along the op-ed, you will need to submit a 500-word annotated bibliography that contains a) a list of scientific references that you used for the op-ed (you can include references beyond those used in the academic article you chose to write the op-ed on), and b) a short text below your key references (1–2 sentences only) describing why the reference is important in the context of your op-ed. You should format your reference list using the APA reference style. A successful annotated bibliography should show understanding of the sources included and not be a mere description of the sources. The reference text itself does not count towards the word limit.

2) Research Proposal (20%): Along learning to translate academic knowledge to the public, it is also important to know how to identify a meaningful gap in the academic knowledge. To that end, one part of the summative requires you to write a brief (1000-word max) research proposal that identifies a meaningful gap in the academic research on time (specifically within the article you will write an op-ed on) and describes a viable way to address this gap. Unlike the op-ed, the research proposal should be written in academic language.

PB437 Half Unit Not available in 2024/25 Conversation Analysis and the Science of Social Interaction

This information is for the 2024/25 session.

Teacher responsible: Prof Elizabeth Stokoe CON 3.05

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is not available as an outside option.

Course content: We spend much of our days talking, at work and in our private lives, yet we know little about the conversational engine that drives these social interactions. We are pushed and pulled around by language far more than we realize yet are

seduced by stereotypes and myths about human communication. The aim of this course is to develop students' understanding of conversation analysis as an approach to studying social life and conversation itself as a tool for personal and professional practice. The course will consider how such understandings can challenge existing theories of human communication as well as underpin interventions, applications, and policy impacts across the third, public, commercial, and technology sectors.

The course will introduce students to the field of conversation analysis (CA) across ten lectures and seminars. It seeks to develop students' knowledge of, and critical thinking about, how human communication is understood and misunderstood across social science disciplines. It will also develop students' awareness of the importance of CA as an epistemic tool for challenging popular conceptions of conversational practice, and as an ethical tool for identifying and describing the communicative practices that comprise 'isms' (e.g., racism, ageism, classism, cisgenderism) and support or undermine social justice.

Each lecture will cover theoretical and empirical aspects of conversation analysis. Indicative topics include why and how conversation analysts study social interaction; the relationship between CA and other approaches to human communication; the CA transcription system and why it matters; social categories and identities; simulated interactions; high stakes encounters; conversation design and technology; impact and policy. Each seminar will enable students to work directly with audio or video recordings and transcripts of real conversations, choosing from a range of settings (e.g., dating, political interviews, protests, encounters involving 'isms') in which human sociality is laid bare.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

The course will be delivered through a combination of lectures and seminars, the latter involving discussing foundational papers as well as practical 'data sessions' in which students will be introduced to social interactional materials (transcripts and recordings, provided as part of the course). These will be structured learning activities and will include group work and student presentations of their observations and insights. There will be no teaching during reading week.

Indicative reading:

The conversation analysis community resource page:

http://emcawiki.net/Main_Page

Ethnomethodology and Conversation Analysis for Racial Justice

<https://emca4rj.conversationanalysis.org/>

Assessment: Assignment (15%) and report (85%) in the WT.

The assignment (15%) will enable students to select from a choice of short (1–2 minutes) videos/audio recordings of real social interaction and produce a transcript using the system developed for conversation analysis. The transcript, and feedback on it, can be used in the report.

A report (3000 words) (85%) will enable students to work independently on one piece of conversation analysis that builds on the transcript produced for the assignment.

PB438 Half Unit**Crossing Borders: The Moral Psychology of Intergroup Cooperation and Conflict**

This information is for the 2024/25 session.

Teacher responsible: Prof Jeremy Ginges (CON 3.04)

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life and MSc in Social and Cultural Psychology. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Humans are a parochial species. We frequently engage in deadly intergroup conflict in the name of imaginary communities like nation, religion or ethnicity. We are also a cooperative species, defined by our ability to cooperate across cultural, political and other group divides. Better understanding of this paradox is critical. Most of us live in culturally diverse societies, we travel and do business across borders. As a species we have to work together across cultural and political boundaries to solve collective problems such as climate change. This course will investigate the psychology of cross cultural cooperation and conflict. We will ask what particular difficulties face us when we attempt to cooperate across cultural boundaries, how we overcome those difficulties, as well as why cultural conflicts are often associated with violence. We will approach this problem via the lens of moral psychology. We will explore different aspects of moral reasoning, and the way such reasoning can sometimes promote the worst of humanity (war, genocide), and sometimes promote intergroup tolerance and cooperation. In investigating how to foster individual and collective cooperation across cultural divides we will explore contemporary issues around war, migration and climate change.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

The course will be delivered through a combination of interactive classes/seminars and lectures. There will be structured learning activities throughout the course, especially in the seminars, including student presentations and group work.

There will be no teaching during reading week (Week 6).

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will write a 1,000-word popular press article identifying and evaluating a real world issue involving intergroup relations; they will then propose either research to better understand it, or an intervention to solve it.

Assessment: Essay (75%, 2500 words) in the WT and ST. Group presentation (25%) in the WT.

PB441 Half Unit**Wellbeing for Policy**

This information is for the 2024/25 session.

Teacher responsible: Dr Christian Krekel

Availability: This course is available on the MSc in Behavioural Science, MSc in Environmental Policy, Technology and Health (Environmental Economics and Climate Change) (LSE and Peking University), MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is compulsory in the Wellbeing Specialism of the MSc in Behavioural Science.

Course content: This course introduces students to the main concepts and tools of wellbeing for policy-making, with a focus on applicability in policies across all sectors (government, business, and NGOs). It will enable students to conduct cutting-edge policy analysis using wellbeing data, to qualify them to take up analytical positions involving wellbeing and other social impacts data. To achieve this aim, the course is based on ten lectures covering: 1) wellbeing in theory; 2) evidence on the causes and consequences of wellbeing (including behavioural scientific phenomena uniquely captured by wellbeing); 3) data, measurement, and survey design; 4) wellbeing policy appraisal i: cost-benefit analysis; 5) wellbeing policy appraisal ii: cost-effectiveness analysis; 6) wellbeing policy evaluation; 7) social welfare; 8) wellbeing interventions; 9) embedding wellbeing into the policy-making process; 10) wellbeing as the ultimate goal?

Teaching: 15 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will participate in a test run of the presentation that will be Summative Assignment 1, to be held in the WT.

Indicative reading: Books

Policy papers

- HM Treasury (2021). Green Book Supplementary Guidance: Wellbeing. Wellbeing Guidance for Appraisal.
- HM Treasury (2021). Green Book Supplementary Guidance: Wellbeing. Monetisation of Life Satisfaction Effect Sizes.

We encourage students to read Volume 4, Special Issue 2, "On Happiness Being the Goal of Government" in *Behavioural Public Policy*, July 2020.

Assessment: Presentation (70%) in the WT.

Essay (30%, 1000 words) in the period between WT and ST.

The assessment will be a field simulation. At the start of the WT, students will be randomly allocated to fictitious wellbeing policy consulting companies, and within these companies, randomly to different roles. These fictitious companies will then be given a real policy issue from a UK Government department or agency (previous years: Department for Transport; Department for Levelling Up, Housing and Communities), to work on together as a team during the WT. The assessment itself consists of two elements:

Summative Assignment 1: a presentation on the given policy issue at the client (i.e. the UK Government department or agency that participates in the respective academic year), to be held in the WT (joint evaluation of students, by lecturer with input from client, 70% of grade).

Summative Assignment 2: an individual essay of 1,000 words reflecting on the presentation, to be submitted between WT and ST (individual evaluation, by lecturer, 30% of grade).

PB452 Half Unit Not available in 2024/25 Behavioural Science for Health and Pandemic Responses

This information is for the 2024/25 session.

Teacher responsible: Dr Matteo Galizzi

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: No pre-requisites required.

Course content: Using responses to the recent Covid-19 pandemic as a starting point, the course aims at introducing students to the main state-of-the-art applications of behavioural science to health policy, practice, economics and management. The course is designed to enhance students' abilities to apply behavioural science tools in a critical and rigorous way to concrete public health challenges related to Covid-19 and other pandemics, as well as to many other health- and healthcare-related areas, such as: infectious diseases; vaccinations; patients' and healthcare professionals' decisions and behaviours; doctor-patient interaction and shared decision-making; money, time, blood and organ donations; end-of-life decisions; mental health and wellbeing; diet and nutrition; physical exercise; alcohol abuse; tobacco and drug use; medication adherence; compliance; prevention and screening. The course hosts specialist lectures by PBS faculty members who will apply research-led teaching to address the different

perspectives and challenges in this area.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to work in small groups to produce a presentation in the LT, in which they will discuss a health-related area where principles, measures, and insights of behavioural science have been applied - or where they could be potentially applied in the future.

Assessment: Coursework (100%, 3000 words) in the ST.

PB453 Half Unit Not available in 2024/25 Corporate Behaviour and Decision Making

This information is for the 2024/25 session.

Teacher responsible: TBC

Availability: This course is available on the MSc in Behavioural Science. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course provides the opportunity for students to learn how the tools of behavioural science can help to improve the outcomes of the firm. Specifically, behavioural science lessons for search and hiring, diversity and inclusion, firm culture, conduct, and high stakes decision making are covered.

Each topic starts with equipping students with the predictions from traditional economic models. We then proceed to consider the individual biases which distort the decision making process, and how this distorts outcomes. We consider interventions and solutions to these problems with a specific emphasis on : 1. is there a problem, 2. menu of solutions for the problem 3. quantifying if the solutions worked.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 case study in the WT.

Case study with short questions that matches the style of the summative assessment

Assessment: Coursework (100%, 4000 words) in the ST. Two case studies with short questions

PB457 Half Unit Organisational Culture

This information is for the 2024/25 session.

Teacher responsible: Dr Thomas Reader

Availability: This course is available on the MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public

Communication. This course is available as an outside option to students on other programmes where regulations permit.

It is also, subject to availability, available to students on the MSc in Human Resources and Organisations (Organisational Behaviour). Students from the MSc in Organisational and Social Psychology will be prioritised for the course, because the half-unit is associated with this MSc.

Course content: The course teaches students on the concept of Organisational Culture, its relationship with success and failure in institutional settings, the factors that shape organisational culture, and methodologies for studying and changing it. The course has a particular focus on risk and resilience, and examines culture at the level of teams and institutions. A key objective of PB457 is that, once completed, students have developed knowledge and expertise on organisational culture that they can use in academic (e.g., research) or practical work (e.g., running a culture assessment programme in a company). Course content will include the following:

Part 1: Organisational culture: what is it, and why does it matter?

In this first phase of the course, the concept of organisational culture will be introduced. We will explore and familiarise key models on organisational culture and methodologies for culture assessment. We will explore how a strong organisational culture is often a decisive factor in determining whether an organisation has capacity to succeed and adapt.

Part 2: What creates an organisational culture, and how is it experienced? Here, the course will examine more precisely how organisational culture influences behaviour and performance.

In particular, we will examine how 'cultures' of decision-making, risk-taking, ethical practices, teamwork, and citizenship activities emerge within organisations. We will consider how these cultural properties shape outcomes at the group and institutional level.

Part 3: Changing organisational culture. Here, we consider how culture change emerges. Specifically, we will focus on the role of leadership, regulation and policy, and collaborative activity as a catalyst to culture change. We will consider how to design a culture measurement and change strategy for an organisation.

The course primarily draws on research on organisational risk and resilience (e.g., in aviation, heavy industries, finance, healthcare), but also considers broader topics (e.g., innovation, well-being). It combines classic and state-of-the-art academic material, case study analysis, and research and practice by the course leader at LSE.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will prepare for the summative assignment through a formative essay, which is a plan of the larger essay. This involves: i) considering the relevance of organisational culture to their own (or a relevant) intuition, ii) designing a culture measurement battery, and iii) outlining a culture change strategy. Students will also engage in seminar tasks (e.g. producing culture change strategies), that will contribute to their formative learning.

Assessment: Essay (100%, 3000 words) in the period between WT and ST.

The course will be assessed through a 3000 word case study essay. Submission of the summative assessment will be in break between Winter and Spring Term. Students will be asked to i) identify a real-life institution where organisational culture is the 'ingredient' for success or failure, ii) to explain - using the concepts taught on the course - why this is the case (with a particular focus on behaviour), and iii) to identify a strategy for measuring (and improving) culture within that organisation.

PB458 Half Unit Dialogue: Conflict & Negotiation

This information is for the 2024/25 session.

Teacher responsible: Prof Alex Gillespie CON.4.16

Availability: This course is available on the MSc in Behavioural Science, MSc in Organisational and Social Psychology, MSc in Psychology of Economic Life, MSc in Social and Cultural Psychology and MSc in Social and Public Communication. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Dialogue is central to interpersonal conflicts, societal debates, and corporate negotiations. While dialogue is popularly construed in terms of reaching consensus, the reality entails rhetoric, manipulation, and deception. This course takes the view that conflict is necessary, and it examines how dialogue can make a clash of difference productive and creative. Topics covered will include: theory and science of dialogue; misunderstandings (when you see it, it is gone); reading verbal and non-verbal cues (listening beyond the words); negotiation and bargaining (creating wins, and win-wins); conflict mediation (when negotiation didn't work); the dark arts and their detection (persuasion, framing, deception); crisis dialogue & speaking up (power and dissent); the defences and their detection (denial, dismissing, rationalizing); creativity & dialogue (the emergence of something new); artificial and authentic dialogue (the role of AI in dialogue); and digital dialogues (silos and improving the 'quality' of online dialogue).

The course includes practical hands-on experience. In workshops students will gain experience intervening in dialogue, analysing dialogue (transcripts, videos), and trying out cutting edge methods for the automated analysis of dialogue.

Teaching: 15 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: A 500-word plan outlining the approach to the summative assessment.

Indicative reading: Bail, C. A., et al. (2018). Exposure to opposing views on social media can increase political polarization. *Proceedings of the National Academy of Sciences*, 115(37), 9216-9221.

Assessment: Essay (100%, 3000 words) in the period between WT and ST.

PB4A7 Half Unit Quantitative Applications for Behavioural Science

This information is for the 2024/25 session.

Teacher responsible: Dr Georgios Melios

Availability: This course is compulsory on the MSc in Behavioural Science. This course is not available as an outside option.

Course content: The main aim is to familiarize students with the main statistical tools required to understand the myriad contextual and individual-level causes of human behaviour and to put students in a position to do their own research. The course will cover leading methods used by psychologists and economists to test behavioural science hypotheses about cause-effect questions. It will first introduce students to null hypothesis testing and regression analysis. It will then delve into quasi-experimental methods like differences-in-differences, regression discontinuity design and instrumental variables regression. Students will learn how to identify, interpret, and critically evaluate different research designs, to eventually conducting their own data

analysis and writing a report of the same. They will keep abreast of contemporary methodological debates and best practices in data analysis in psychology and economics, apart from learning to critically appraise and navigate behavioural science studies from a methodological perspective. To this end, there will also be an emphasis on teaching students how the same analyses are presented in psychology and economics so students can understand how to integrate research from these two fields that constitute behavioural science. This course complements 'Experimental Design and Methods for Behavioural Science' (PB413), which covers experimental design and research for MSc Behavioural Science students.

Teaching:

- Ten weekly lectures of 1 hour during the AT.
- Ten weekly seminars of 1 hour during the AT.
- Weekly help sessions.

Formative coursework: Students will complete weekly multiple choice problem sets.

Indicative reading: Textbooks:

- Huntington-Klein, N., 2021. *The Effect: An Introduction to Research Design and Causality*. CRC Press.
- Cunningham, S., 2021. *Causal Inference: The Mixtape*. Yale University Press.
- Angrist, Joshua D., and Jörn-Steffen Pischke. 2009. *Mostly Harmless Econometrics: An Empiricist's Companion*. Princeton University Press.
- Firebaugh, G., 2018. *Seven Rules for Social Research*. Princeton University Press.

Indicative reading:

- Marinescu, I.E., Lawlor, P.N. and Kording, K.P., 2018. Quasi-experimental causality in neuroscience and behavioural research. *Nature Human Behaviour*, p.1.
- Varian, H.R., 2016. Causal inference in economics and marketing. *Proceedings of the National Academy of Sciences*, 113(27), pp.7310-7315.
- Angrist, J.D. and Pischke, J.S., 2010. The credibility revolution in empirical economics: How better research design is taking the con out of econometrics. *Journal of Economic Perspectives*, 24(2), pp.3-30.
- Deaton, A., 2020. Randomization in the tropics revisited: a theme and eleven variations (No. w27600). National Bureau of Economic Research.

Assessment: Report (70%) and poster (30%) in the WT.

PH400 Philosophy of Science

This information is for the 2024/25 session.

Teacher responsible: Professor Miklos Redei

Availability: This course is compulsory on the MSc in Philosophy of Science. This course is available on the MSc in Philosophy and Public Policy and MSc in Philosophy of Economics and the Social Sciences. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Science is chock full of miraculous predictions, shocking revolutions, and unexpected results that few science fiction writers could have ever dreamed of. What makes science so special? This course is a tour of the philosophical underpinnings of modern science. No background in any science is needed for this course; everything you need to know will be covered.

Indicative topics include: The logical positivist demarcation of science from non-science, Popper's falsificationism, Lakatos' Methodology of Scientific Research Programmes, Kuhn's concept of science. Explanation: the deductive nomological explanation, statistical explanation. The positive instance account of confirmation. Foundations of probability and Bayesian confirmation. Laws of Nature: the regularity view of laws, the best systems account. Intertheory relations: reductionism and pluralism. Realism versus Antirealism: Scientific realism

and antirealism, the no miracles argument, inference to the best explanation, the pessimistic meta-induction, constructive empiricism, entity realism, structural realism. Models: scientific modelling and scientific representation. Recent trends in operating modes of science.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. 10 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: Students will be expected to write two essays (one in AT and one in WT), and participate in seminar discussion.

Indicative reading: T S Kuhn, *The Structure of Scientific Revolutions*; K R Popper, *Conjectures and Refutations*; B van Fraassen, *The Scientific Image*; N Cartwright, *How the Laws of Physics Lie*.

Assessment: Essay (50%, 2000 words) in the AT.

Essay (50%, 2000 words) in the WT.

Students are expected to produce 1 summative essay in AT and 1 summative essay in WT.

PH415 Philosophy and Public Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Kieran Oberman

Availability: This course is compulsory on the MSc in Philosophy and Public Policy. This course is available on the MSc in Public Administration and Government (LSE and Peking University) and MSc in Public Policy and Administration. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course offers critical reflection on the design and evaluation of public policies from the perspective of moral and political philosophy. To this end, we study a range of theories and concepts that are used in policy evaluation. We often discuss and evaluate them by focusing on specific policy proposals. The course addresses questions such as the following.

- What is a correct public measure of well-being?
- Should people be left to bear the consequences of their free choices?
- May the government force you to buy health insurance?
- Is torture ever justified?
- Do prosperous countries have a right to close their borders to immigrants from poor countries?
- Should hate speech be protected by freedom of speech?
- Should the development of new drugs be left to private companies rewarded by patent protection?
- What is the optimal population size and what policies may the state pursue in order to achieve it?
- Should higher education be financed by student loans or general taxation?
- Should we be free to act as we choose so long as we do not harm others?
- How should we distribute the burdens of military service?
- Should children be given the vote?

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. 10 hours of lectures and 15 hours of seminars in the WT.

This course has a reading week in Week 6 of both AT and WT.

Formative coursework: Students will be expected to produce 1 essay in the WT and 2 essays in the ST.

Indicative reading: A detailed list of readings will be available on moodle. The following is an indicative sample of readings that may be discussed in the course.

- Greg Bogner and Iwao Hirose (2014). *The Ethics of Health Care Rationing*.
- A. Voorhoeve (2018) 'May a Government Mandate More Comprehensive Insurance than People Want for Themselves?' *Oxford Studies in Political Philosophy*.
- Michael Rustin (2016), 'The neoliberal university and its alternatives', *Soundings*
- Ronald Dworkin et al (1997) 'Assisted Suicide: The Philosophers'

Brief

- Carol Kates (2004). 'Reproductive Liberty and Overpopulation' 160 *Environmental Ethic*
- Jonathan Wolff (2011), *Ethics and Public Policy: A Philosophical Inquiry*
- Joseph Carens (1987), 'Aliens and Citizens: The Case for Open Borders', *The Review of Politics*
- Jeff McMahan (2008), 'Torture in Theory and Practice', *Public Affairs Quarterly*
- Michael J. Robillard and Bradley J. Strawser (2016), 'The Moral Exploitation of Soldiers', *Public Affairs Quarterly*
- Annabelle Lever (2014), 'When the Philosopher Enters the Room', *Philosophy and Public Issues*

Additional readings will be available on Moodle.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (50%, 2000 words) in the WT.

PH416

Philosophy, Morals and Politics

This information is for the 2024/25 session.

Teacher responsible: Dr Daniel Guillery

Availability: This course is available on the MA in Modern History, MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences, MSc in Philosophy of Science and MSc in Political Theory. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The course will cover key topics in moral and political philosophy.

The course addresses questions such as the following (indicative examples only; precise content varies from year to year): What sacrifices are we required to make for the sake of others? Does it make a moral difference that a person is less well off than she could have been? Is it permissible to cause harm to others in order to prevent greater harm? Can it benefit or harm people to bring them into existence? Do individual actions make a difference to large-scale problems such as climate change and global inequality? What moral obligations do we have to obey the law? When, and how, can we be justified in resisting injustice? When we tax the rich to give to the poor are we restricting freedom, enhancing it or redistributing it? Can the cultural circumstances in which we grow up absolve us of blame for bad beliefs? Is private property in land justified? Do moral questions have objectively correct answers? Can the members of one culture legitimately criticise the moral norms of another culture? Do states act morally permissibly in excluding would-be immigrants from their territory? What kind of rights, if any, are grounded in the value of culture? How should we rectify historical wrongs?

Topics in other areas of moral and political philosophy may also be covered.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. 10 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 2 essays in the AT and WT.

Indicative reading: Thomson, J.J. 'Self-Defense', *Philosophy and Public Affairs* 20 (1991)

Otsuka, M. 'Killing the Innocent in Self-Defense', *Philosophy and Public Affairs* 23 (1994)

Quinn, W. 'Actions, Intentions and Consequences: The Doctrine of Doing and Allowing', *The Philosophical Review* 98 (1989)

Øverland, G. 'Moral Obstacles: An Alternative to the Doctrine of Double Effect', *Ethics* 124 (2014)

Parry, J. 'Defensive Harm, Consent, and Intervention', *Philosophy and Public Affairs* 43 (2017)

Geoff Sayre-McCord, 'Metaethics', *The Stanford Encyclopedia of Philosophy* <<http://plato.stanford.edu/archives/sum2014/entries/metaethics/>>

Matthew Chrisman, What is this thing called Metaethics?

Michael Smith, The Moral Problem;

J.L. Mackie, *Ethics: Inventing Right and Wrong*

Nozick, R. *Anarchy, State and Utopia*

Locke, J. *Second Treatise of Government*

Cohen, G. A., 'Nozick on Appropriation', *New Left Review*, no. 150 (1985)

Jefferson, T., Letter to James Madison (1789)

Boxill, B., 'Black Reparations', *Stanford Encyclopedia of Philosophy* (2015)

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (50%, 2000 words) in the WT.

PH421

Dissertation Seminar - Philosophy and Public Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Kieran Oberman

Availability: This course is compulsory on the MSc in Philosophy and Public Policy. This course is not available as an outside option.

Course content: Aim: This course helps students on the MSc in Philosophy and Public Policy develop their philosophical research and writing skills. It clarifies expectations surrounding the MSc dissertation, which is an extended piece of writing that students are expected to complete over the summer. One of the course's main aims is to help student settle for a relevant dissertation topic that they feel comfortable with.

Teaching: 10 hours of seminars in the AT. 14 hours of seminars in the ST.

Seminars will cover key research and writing skills, as well as provide opportunities to discuss potential research topics. Students are required to present their MSc dissertations as work in progress (the precise format of these sessions will be organised in-year).

Formative coursework: Presentation of own dissertation as work in progress.

Some very short homework tasks may also be assigned throughout the year.

Indicative reading: None.

Assessment: This course is not assessed.

PH422

Dissertation Seminar - Philosophy of Economics and the Social Sciences

This information is for the 2024/25 session.

Teacher responsible: Dr Jingyi Wu

Availability: This course is compulsory on the MSc in Philosophy of Economics and the Social Sciences. This course is not available as an outside option.

Course content: The course is intended to develop the ability to make philosophical arguments and to write structured philosophical essays. It will serve to prepare students for research and writing their dissertation. In Autumn term, we will cover philosophical and argumentative writing, with a number of in-class exercises, and we will discuss the structure and content of an MSc dissertation in Philosophy. In Spring Term, students will present their dissertation as a work in progress.

Teaching: 10 hours of seminars in the AT. 14 hours of seminars in the ST.

In Autumn Term, seminars will cover key research and writing skills, as well as provide students the opportunity to discuss potential research topics. In Spring Term, students are required to present their dissertations as work in progress (the precise format of these seminars will be organized in year). The number of taught hours in ST will depend on student numbers and required presentation time. Generally, it will be carried out over two days.

Formative coursework: A number of short assignments and

reading whose completion will aid the writing of the dissertation may be set over the course of the year.

Assessment: This course is not assessed.

PH425 Half Unit Business and Organisational Ethics

This information is for the 2024/25 session.

Teacher responsible: Dr Charles Sherwood

Availability: This course is available on the CEMS Exchange, MBA Exchange, MSc in Management of Information Systems and Digital Innovation, MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course is about the ethical issues arising in the conduct of business and public administration. The first few weeks of the course will introduce you to some fundamental ideas in moral and political philosophy. Then, we will apply these ideas to a variety of problems that you may face during a career in business or government.

What responsibility do businesses have to society? Is it okay to lie, bribe, or exploit others if it's good for your business? How should civil servants weigh the interests of different citizens? Is there anything that should never be sold?

This course will not present you with a code of conduct, ready-made solutions or dogmatic answers. Instead, you will practice logical reasoning, careful analysis and critical thinking to enable you to develop your own understanding of ethical problems, with the help of philosophy. Through discussions and essays you will also develop skills in argument and writing that will help you express your thoughts in a rigorous and convincing way.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT. This course has a reading week in Week 6.

Formative coursework: Students will be expected to produce one formative essay (word limit 1500 words), which will then be revised, following feedback, into a summative essay (2000 words).

Indicative reading: Milton Friedman (1970) "The Social Responsibility of Business is to Increase its Profits", *The New York Times Magazine*.

Joseph Heath (2014) *Morality, Competition, and the Firm: The Market Failures Approach to Business Ethics*, Oxford: Oxford University Press.

Sissela Bok (1999) *Lying: Moral Choice in Public and Private Life*. New York: Vintage Books.

Janet Radcliffe Richards (1996) "Nephrological Goings On: Kidney Sales and Moral Arguments", *Journal of Medicine and Philosophy*, 21:375-416.

Joseph Heath (2020) *The Machinery of Government: Public Administration and the Liberal State*, Oxford: Oxford University Press.

Julia Driver (2009) "Normative Ethics", in *The Oxford Handbook of Contemporary Philosophy*, Oxford: Oxford University Press.

Christopher McMahon (1981) "Morality and the Invisible Hand", *Philosophy & Public Affairs*, 10(3):247-277.

Benjamin Powell & Matt Zwolinski (2012) "The Ethical and Economic Case Against Sweatshop Labor: A Critical Assessment", *Journal of Business Ethics*, 107(4):449-472.

Fared Zakaria & Lee Kuan Yew (1994) "Culture Is Destiny: A Conversation with Lee Kuan Yew", *Foreign Affairs*, 73(2):109-126.

Charles Sherwood (2022) "A Lie Is a Lie: The Ethics of Lying in Business Negotiations", *Business Ethics Quarterly*, 32(4):604-634.

Nikhil Venkatesh (2021) "Surveillance Capitalism: a Marx-inspired Account", *Philosophy* 96(3):359-385.

Required readings amount to about two papers per week.

Assessment: Essay (80%, 2000 words) in the WT.

Class participation (20%) in the AT.

The summative essay will be a revised version of the formative essay, submitted with a commentary on how it has been changed in the light of feedback.

The class participation grade will be based on teacher assessment of student contributions to class each week. Where students have missed classes with good reason, this will not adversely affect their grade.

PH426 Half Unit Philosophy of Society

This information is for the 2024/25 session.

Teacher responsible: Prof. J. McKenzie Alexander

Availability: This course is available on the MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines how a number of traditional philosophical questions take on an interesting new character when we consider our existence as socially embedded entities. The course will investigate the nature of personal identity, the possibility of understanding others, social structures, the philosophical theory of action, the situationist critique of virtue ethics, the nature of social norms, and other topics. The kinds of questions considered will span epistemology, moral and political philosophy, scientific modelling, and metaphysics. The primary aim will not be to reach an agreed view on any of the issues discussed, but to develop an understanding of the concepts and theoretical frameworks which can be used to construct arguments for a particular position.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT.

Formative coursework: Students will be expected to write one formative essay in the Autumn Term which they will develop into a summative essay based on the feedback received. Other formative activities will depend on the approach of the seminar leader, e.g., presentations.

Indicative reading: A detailed reading list will be provided at the beginning of the course. Indicative readings include:

- Nancy Cartwright and Eleanor Montuschi (eds.), *Philosophy of the Social Sciences: a new introduction*;
- Harold Kincard, John Dupré, and Alison Wylie (eds.), *Value-Free Science: Ideals and Illusions*;
- Jon Elster, *Explaining Social Behaviour*;
- John H. Miller and Scott Page, *Complex Adaptive Systems*;
- Dawn Langan Teele, *Field Experiments and Their Critics: Essays on the Uses and Abuses of Experimentation in the Social Sciences*;
- Alex Rosenberg, *Philosophy of Social Science* (Fifth edition);
- Harold Kincaid, *Philosophical Foundations of the Social Sciences*;
- J. McKenzie Alexander, *The Open Society as an Enemy*
- Daniel Steel and Francesco Guala (eds.), *The Philosophy of Social Science Reader*;
- Michael Martin and Lee McIntyre (eds.), *Readings in the Philosophy of Social Science*.

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Essay (50%, 2000 words) in the WT.

The summative assessment for this course will consist of one essay and one exam. The summative essay can be a revised and expanded version of the formative essay, taking into account the feedback received. If this is done, an additional 500-word supplementary response needs to be submitted, explaining how the essay was revised in light of the feedback received, detailing the changes made along with the reasons why.

PH430 Half Unit

Einstein for Everyone: From time travel to the edge of the universe

This information is for the 2024/25 session.

Teacher responsible: Dr Nadia Blackshaw

Availability: This course is available on the MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: Does the universe have an edge? Is time travel possible? What is a black hole, and in what sense are space, time and gravity a matter of "geometry"? The modern theory of spacetime introduced by Einstein provides a precise framework in which to ask these questions. This course makes their analysis accessible to everyone.

Students will have the opportunity to engage with Einstein's theories of relativity, to use them to analyse philosophical problems, and to examine their philosophical and practical implications. Students will learn to apply these conceptual tools to the analysis of space, time and gravity, as well as to formulate and argue for their own perspectives on the philosophical implications of relativity theory.

One is often faced with unsubstantiated declarations about the implications of Einstein's theories, by both scientists and non-scientists. This course will equip non-scientists with the conceptual tools needed to critically analyse these claims for themselves. It will also provide students with the tools needed to discuss the philosophy of space and time from a modern perspective.

Einstein for Everyone requires absolutely no background in physics or maths.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT.

Formative coursework: Students will be expected to produce 1 problem sets and 1 other piece of coursework in the AT.

Indicative reading: All weekly readings will all be made available to students on Moodle. As an indicative reading, see Norton, John D. (2017) *Einstein for Everyone*, Free Online, and Nick Huggett (2010) *Everywhere and Everywhen*, OUP.

Assessment: Exam (45%, duration: 1 hour and 30 minutes, reading time: 5 minutes) in the spring exam period.

Essay (45%, 2000 words) in the AT.

Class participation (10%).

The exam for this course is an e-Exam, an invigilated in-person exam on the LSE campus in which, instead of completing your answers on a paper script, you use your own personal laptop to type your answers and submit electronically.

discovery of quantum mechanics, our best theory of matter and energy. These techniques even spilled outside of physics, into places like the social and financial world, where similar techniques were applied.

This course is about some of the philosophical issues underlying the physics of uncertainty, and the kinds of issues they raise for the natural and social sciences.

Students in this course will explore some of the important conceptual and philosophical questions underlying physics and finance, like: How are assumptions about randomness compatible with observed forms of determinism? How is it possible to seek truth using statistical theories? What does it mean to be an atom? How does the quantum world differ from the everyday world? What explains why physical models have unexpected applications in finance? To what extent do such applications help to underpin how the prices of financial instruments are set?

This course will proceed at a conceptual level that is suitable for students of all backgrounds: no background in physics is needed, and there is no advantage to having one.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 problem sets and 1 other piece of coursework in the WT.

Indicative reading: Weekly essential readings will be provided on Moodle, selected individually from various book chapters and journal articles. Some indicative readings include:

- Malkin, Burton G. A random walk down Wallstreet, excerpts.
- Norton, John D. *Einstein for Everyone*, Chapters 34-37 on Brownian motion and the origins of quantum theory.
- Weatherall, James O. *The Physics of Wallstreet*.
- Derman, E. *My Life as a Quant*. Excerpts.

Assessment: Exam (45%, duration: 1 hour and 30 minutes, reading time: 5 minutes) in the spring exam period.

Essay (45%, 2000 words) in the WT.

Class participation (10%).

The exam for this course is an e-Exam, an invigilated in-person exam on the LSE campus in which, instead of completing your answers on a paper script, you use your own personal laptop to type your answers and submit electronically.

PH433 Half Unit

Philosophy of Gender and Race

This information is for the 2024/25 session.

Teacher responsible: Dr Jingyi Wu

Availability: This course is available on the MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available as an outside option to students on other programmes where regulations permit.

Course content: Gender, race, class, sexualities, etc. are messy and difficult concepts. They are part of the fabric against which we come to form beliefs, attitudes, dispositions, and feelings about the world. They matter in our lives, even when we do not want or expect them to be. In this half-unit, we will utilize philosophical tools to analyze how gender, race, and other social categories have shaped our lives, and how they can shape our future. We will also think about how gender and race have shaped philosophy as a discipline, and how they can shape the future of philosophy. Topics covered may include:

Gender and Biology: How does "gender" relate to "sex"? Is our concept of biological "sex" objective, and free from gender stereotypes and norms? Is our sex fixed or changeable?

Gender and Society: Is gender a matter of internal identity, or is it an externally-imposed social class? How does sexism intersect with other oppressions, like racism and transphobia?

Race and Society: How does the social meaning of "race" vary around the world? Should we try to reconcile "ordinary" conceptions of "race" with technical conceptions of "race"?

How should we understand the directionality and limits of racial

PH431 Half Unit

Physics and Uncertainty: From Quantum Jumps to Stock Market Crashes

This information is for the 2024/25 session.

Teacher responsible: Dr Nadia Blackshaw

Availability: This course is available on the MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: There are no prerequisites for this course; it is accessible to students of all backgrounds.

Course content: One of the most surprising discoveries of 20th century physics is that enormous progress can be made by embracing our uncertainty, and modelling it using probabilistic techniques. This powerful thinking led to discoveries like the first evidence of the atomic hypothesis, that the matter is made of tiny atoms moving randomly about. It also paved the way for the

classification?

The Future of Gender and Race: Will race and gender still exist in the future? Should we try to work for a race-free and gender-free world, or should these ways of classifying people be preserved? We will focus on approaches to these questions from "analytic" philosophy, including feminist and race-critical approaches and approaches from the philosophy of science. The aim is to confront the big questions of gender and race by analysing and constructing careful and precise philosophical arguments.

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Students on this course will have a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 2 pieces of coursework in the WT.

Students will be expected to present and/or lead at least one seminar discussion in the Winter Term.

Students will have the opportunity to receive feedback on their summative essay plan.

Other formative activities may be introduced.

Indicative reading: Suggested introductory reading:

- Fausto-Sterling, 2000 [2020 New Edition]. Sexing the Body: Gender Politics and the Construction of Sexuality.
- Crenshaw, K., 1989. Demarginalizing the Intersection of Race and Sex: A Black Feminist Critique of Antidiscrimination Doctrine, Feminist Theory and Antiracist Politics.
- Haslanger [2000] "Gender and Race, (What) Are They? (What) Do We Want Them To Be."
- Appiah, Kwame Anthony, 2005. The Ethics of Identity.
- Mills, Charles, 2007. "White ignorance"
- Glasgow, J., Haslanger, S., Jeffers, C. and Spencer, Q., 2019. What is Race?
- Zack, Naomi, 1993. Race and Mixed-Race. Morality of Race.

Assessment: Project (85%, 2000 words) in the ST.

Class participation (10%) and other (5%) in the WT.

Details of Summative Assessment:

Essay (2000 words), or instructor-approved final project of comparable length and effort (85%) in the Spring Term.

Self-evaluated participation (10%) in the Winter Term.

Weekly discussion forum postings (5%) in the Winter Term.

There is no exam for this half-unit.

PH434 Half Unit

Philosophy of Economics: Methodology and Foundations of Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Remco Heesen

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed a university-level introductory course in economics, such as EC1A3 and EC1B3.

Course content: The course will provide philosophical discussion of economic methodology and the foundations of utility theory, with an eye to important current debates in economics. We will discuss questions such as the following. What is utility, and how do economists measure it? Does evidence of widespread "irrationality" from behavioural economics undermine standard microeconomic theory? Can idealised models teach us anything about real-world phenomena, and if so, how? How should we measure important economic variables, such as inflation? How do we best find out what interventions work in development? Does macroeconomics need microfoundations? Is the economics profession to blame for its failure to predict the financial crisis?

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce a formative essay of 1500 words, which is due in the Autumn term.

Indicative reading:

- Diane Coyle (2010), The Soulful Science: What Economists Really Do and Why It Matters.
- Dan Hausman (2008), The Philosophy of Economics: An Anthology, 3rd edition.
- José Bermudez (2009), Decision Theory and Rationality.
- Andrew Caplin and Andrew Schotter (2010), The Foundations of Positive and Normative Economics.
- Kevin Hoover (2001), The Methodology of Empirical Macroeconomics.

Assessment: Essay (70%, 2000 words) in the WT.

Multiple choice quiz (30%) in the AT.

Weekly multiple-choice quizzes testing reading comprehension count for 30% of the course grade.

PH435 Half Unit

Philosophy of Economics: Ethics and Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Lukas Beck

Availability: This course is available on the MSc in Economics and Philosophy, MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed a university-level introductory course in economics, such as EC1A3 and EC1B3.

Course content: This course will investigate various normative issues lying in the intersection of philosophy and economics. It will critically examine methods used by economists for policy evaluation, such as social welfare functions and cost-benefit analysis. And it will consider ethical questions related to economic institutions, such as taxation, property, and use of markets. Questions to be addressed may include the following. What is "well-being" and to what extent can it be measured and compared between individuals? Are inequalities in the distribution of well-being necessarily undesirable or unjust? Can it ever be preferable to prevent a very large number of headaches rather than saving a single life? Should the interests of future generations be given equal weight with those of the current generation? What sorts of goods and services are appropriately exchanged in markets.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across Winter Term. This course includes a reading week in Week 6 of Winter term.

Formative coursework: Students will be expected to produce a formative essay of 1500 words, which is due in the Winter term.

Indicative reading:

- Dan Hausman, Michael MacPherson, and Debra Satz (2016), Economic Analysis, Moral Philosophy, Public Policy, 3rd edition.
- Matthew Adler (2019), Measuring Social Welfare: An Introduction.
- John Broome (2009), Ethics out of Economics.
- Amartya Sen (1999), Development as Freedom.
- Elizabeth Anderson (1995), Value in Ethics and Economics.

Assessment: Essay (70%, 2000 words) in the ST.

Multiple choice quiz (30%) in the WT.

PH436 Half Unit Not available in 2024/25 Set Theory

This information is for the 2024/25 session.

Teacher responsible: Prof Miklos Redei and Dr Wesley Wrigley

Availability: This course is available on the MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: MSc students taking this course should already have taken a year-long introductory course in logic in a philosophy department, or a mathematical course that covers the basics of set theory or logic.

Course content: The aim of the course is to make students of philosophy familiar with the elements of naive set theory. Two types of concepts and theorems are covered: (i) the ones needed to understand the basic notions, constructions and mode of thinking in modern mathematical logic (ii) those that have philosophical-conceptual significance in themselves (elementary theory of ordinals and cardinals, transfinite induction, Axiom of Choice, its equivalents and their non-constructive character, Continuum Hypothesis, set theoretical paradoxes such as Russell paradox). The emphasis is on the conceptual-structural elements rather than on technical-computational details. Not all theorems that are stated and discussed are proven and not all proofs are complete. Students taking this course should tolerate abstract mathematics well but it is not assumed that they know higher mathematics (such as linear algebra or calculus).

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. 10 x 1.5 hours of lectures and 10 x 1.5 hours of seminars in the Autumn Term.

Formative coursework: Students are required to submit solutions to two problem-sets, and write one essay (word limit 1500 words) on a topic selected from a list or proposed by the student and approved by the instructor in the AT.

Indicative reading:

- Cameron, Peter J. 1999. Sets, Logic and Categories. Springer undergraduate mathematics series. London, Berlin, Heidelberg: Springer. 160
- Halmos, Paul: Naive Set Theory (Springer reprint 2011)

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

The exam questions are chosen from a list of questions that are made available at the beginning of the academic year ("seen exam").

PH437 Half Unit Advanced Logic

This information is for the 2024/25 session.

Teacher responsible: Dr. Wesley Wrigley

Availability: This course is available on the MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students taking this course should already have taken a year-long introductory course in logic in a Philosophy Department, or a mathematical course that covers the basics of logic. If in doubt whether you satisfy this prerequisite, consult the Teacher Responsible.

Course content: The course begins with taking a look at the big picture: the main problems and milestones of modern logic. Then, after a quick review of classical propositional and first-order predicate logic, the course delves into the central meta-theorems about classical logic (such as the soundness and completeness theorems). This will lead the way to an outline of the famous limitative results that have philosophical ramifications: Gödel's incompleteness theorems and Tarski's undefinability theorem. The course also covers extensions of and alternatives to classical logic, namely modal logic, provability logic, and intuitionistic logic.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

10 x 1.5 hours of lectures and 10 x 1.5 hours of seminars in the Winter Term.

Formative coursework: Students are required to submit solutions to two problem-sets, and write one essay on a topic selected from a list or proposed by the student and approved by the instructor in the Winter Term.

Indicative reading:

- Sider, Theodore (2010): Logic for Philosophy (Oxford University Press).
- Cameron, Peter J. (1999): Sets, Logic and Categories (Springer).
- Curry, H.B. (1963): Foundations of Mathematical Logic (McGraw-Hill).
- Smith, P. (2016). Gödel without (too many) tears. 2016. Available online.

Assessment: Exam (100%, duration: 2 hours).

The exam questions are chosen from a list of questions that are made available at the beginning of the academic year ("seen exam").

PH439 Half Unit Anarchy, Authority and Evidence: Topics in Philosophy of Law

This information is for the 2024/25 session.

Teacher responsible: Dr Lewis Ross LAK 401

Availability: This course is available on the MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This half-unit course tackles philosophical issues raised by the law and criminal justice. No prior legal knowledge is required. The first half of the course discusses big picture questions about the purpose and defensibility of law—for example, scrutinising the obligation to obey the law, the justification of punishment, and the circumstances in which we can engage in civil disobedience. The second half of the course will examine a variety of philosophically interesting legal questions. An indicative list includes: When should a court consider something proven? How should the law use algorithms? Should we defer to juries or professional judges? Does it make sense to treat a corporation as morally responsible? Throughout the course, we explore the connection between legal philosophy and other areas of philosophy—especially moral philosophy, political philosophy, and epistemology.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT.

Formative coursework: There will be a student-led group debate for which feedback will be provided.

Formative feedback will be given on a paper that will then be 'expanded and resubmitted' for the summative assessment.

Indicative reading: The following are readings that discuss representative issues covered in this course:

- Delmas, Candice (2018). A Duty to Resist: When Disobedience Should Be Uncivil. New York, USA: Oxford University Press.
- Kropotkin, Petr (2015). The Conquest of Bread. Penguin.
- Huemer, Michael (2012). The Problem of Political Authority: An Examination of the Right to
- Coerce and the Duty to Obey. Basingstoke: Palgrave Macmillan.
- Nagel, Thomas (1976) Moral Luck. Proceedings of the Aristotelian Society, Supplementary Volumes. Vol. 50
- Jorgensen, Renée (2020). The rational impermissibility of accepting (some) racial generalizations. Synthese 197 (6):2415–2431.
- Hoskins, Zachary (2017). Punishment. Analysis 77 (3): 619–632.
- King, 'Letter from Birmingham Jail'

Assessment: Essay (100%, 3500 words) in the WT.

The summative essay will be constructed using the shorter (compulsory) formative essay as the basis. This shorter paper will

be 'expanded and resubmitted' for summative assessment, making use of the feedback provided by the lecturers.

PH440 Half Unit The Ethics of Data and AI

This information is for the 2024/25 session.

Teacher responsible: Dr Alessandra Basso

Availability: This course is available on the MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course introduces you to the core philosophy of science, philosophy of mind, and ethics concepts needed to build better technology and reason about its impact on the economy, civil society, and government.

Some questions that the course might consider include:

- What is intelligence, and how does it vary between types of agents (human, animal, artificial)? What are the normative assumptions behind research in intelligence?
- What is data, and how can we design more ethical data governance regimes?
- Can technology be racist? If so, what are promising strategies for promoting fairness mitigating algorithmic bias?
- Can we understand black box AI and explain its outputs? Why is it morally important that we do so?
- How can we embed human values into AI systems?

Teaching: 10 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: Students will write a 1,000 word essay outline. Students will also engage in a variety of formative activities in seminars to build skills for summatives.

Indicative reading:

- Gabriel, "Towards a Theory of Justice for Artificial Intelligence", Daedalus
- Friedman, Kahn, and Borning, "Value Sensitive Design and Information Systems"
- Serpico "What kind of kind is intelligence?"
- Henry Shevlin, Karina Vold, Matthew Crosby & Marta Halina, "The limits of machine intelligence"
- Halina, "Insightful artificial intelligence"
- Alexandrova and Fabian, "Democratizing Measurement: Or Why Thick Concepts Call for Coproduction"
- Northcott, "Big Data and Prediction: Four Case Studies"
- Simons and Alvarado, "Can we trust Big Data? Applying philosophy of science to software"
- Viljoen, "A Relational Theory of Data Governance"
- Johnson, "Are Algorithms Value Free?"
- Munton, "Beyond accuracy: Epistemic flaws with statistical generalizations."
- Barocas, Hardt, and Narayanan, Fairness and Machine Learning: Limitations and Opportunities
- [selections]

Assessment: Project (50%, 1500 words) in the WT.

Essay (50%, 2000 words) in the ST.

For the group project, students will be assessed individually on their presentation (20%) and on an individual write-up of the group activity (30%). For students who are not able to do a class presentation on Disability and Wellbeing grounds, their entire group project mark will be determined by the individual write-up (50%). The essay is a re-write of a shorter formative outline on the basis of feedback from the class or seminar teacher and peers.

PH441 Half Unit Animal Minds and Animal Ethics

This information is for the 2024/25 session.

Teacher responsible: Jonathan Birch and Ali Boyle

Availability: This course is available on the MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course examines, from a philosophical perspective, what we know about the minds of other animals - and what this means for the ethics of how we treat them.

Topics covered are likely to include:

- **Understanding other animals:** We will explore theoretical and methodological challenges affecting the science of animal minds, including how biases affect our interpretation of animal behaviour, and which methods can tell us most about animals' minds.
- **Thought and reasoning:** Humans are sometimes described as the only 'rational animal'; some philosophers have even argued that animals don't think. We will examine arguments and evidence for and against ascribing thought and rationality to animals.
- **Sentience and consciousness:** Different theories of consciousness yield different verdicts about which other animals are sentient. How should we evaluate the case for animal sentience in the face of this uncertainty? Will we ever know which animals are sentient?
- **Memory, planning and time:** Some psychologists argue that animals are 'cognitively stuck in time', with no awareness of the past or future. We will critically examine the case for this claim, and the ethical questions it raises.
- **Thought in a social world:** Many animals must navigate complex social dynamics. We will consider how animals understand their social worlds. Do they recognise others as agents with minds? Do they have normative concepts, like fairness or harm? Do they understand death?
- **Excluding other animals:** Western philosophy has a long tradition of ethical theories that give either zero or very little moral consideration to other animals. We will examine (with a critical eye) how people ended up with such views, zooming in on key figures such as Aristotle, Aquinas, Descartes and Kant.
- **Including other animals:** We will compare different ways of bringing other animals within the scope of our ethical thinking, including utilitarianism, the animal rights tradition, and the idea of ahimsa in Indian animal ethics.
- **Animals as food:** We will consider specific ethical issues raised by the use of animals as food. What are our obligations as consumers? Do we have an ethical obligation to be vegan or vegetarian?
- **Animals in science:** Animals, especially mice and rats, are routinely used for research purposes around the world. What are the ethical limits on animal experimentation? What does it mean to "replace, reduce and refine"?

Teaching: 10 hours of lectures and 15 hours of seminars in the AT.

Lectures: Weeks 1-5 and 7-11

Seminars: Weeks 1-5 and 7-11

Formative coursework: Students will be expected to produce 1 draft of the essay or essay plan (up to 1000 words) in the AT.

Indicative reading:

- Andrews, Kristin (2020) *The Animal Mind: An Introduction to the Philosophy of Animal Minds*. Routledge.
- Andrews, Kristin (2020) *How to Study Animal Minds*. Cambridge University Press.
- Beauchamp, Tom and Frey, R. G. (eds.) (2011) *The Oxford Handbook of Animal Ethics*. Oxford University Press.
- Birch, Jonathan (2024) *The Edge of Sentience: Risk and Precaution in Humans, Other Animals, and AI*. Oxford University Press.
- Boyle, Alexandria (2023) *Disagreement & classification in comparative cognitive science*. Nous.

Assessment: Essay (50%, 1500 words) in the WT.

Group project (50%) in the AT.

Summative assessment will be by a collaborative project (50%), and by a 1500 word essay (50%). The precise collaborative project is likely to vary from one year to the next. Most likely, students will be invited (in small groups) to produce a report for a non-specialist audience (e.g. a policy/legal brief or encyclopedia entry) about a practice involving humans' use or treatment of animals.

In the essay, students will be expected to engage in an in-depth reflection on their personal contributions to the collaborative project and on the project's successes and failures more broadly.

PH445

Dissertation Seminar - Philosophy of Science

This information is for the 2024/25 session.

Teacher responsible: Prof Miklos Redei LAK.4.03

Availability: This course is compulsory on the MSc in Philosophy of Science. This course is not available as an outside option.

Pre-requisites: None

Course content: The course teaches students to develop the ability to construct sharp analytic arguments and to write structured philosophical essays. It will help students to choose the topic of their dissertation and with how to go about researching the topic and how to write the dissertation. The course starts with reviewing the structure and content of an MSc dissertation in Philosophy, and the grading scheme used for marking dissertations. Students will then first analyse several published papers to understand their structure, and then critically engage with dissertations from past years focussing on the merits and weaknesses of the selected works and trying to understand why the chosen dissertations received the marks they did. In the final part of the seminar in ST students will give presentations on the progress of their research.

Teaching: 10 hours of seminars in the AT. 14 hours of seminars in the ST.

Formative coursework: A number of assignments whose completion will aid the research into and writing of the dissertation will be set.

Assessment:

The course is not assessed.

PH456

Rationality and Choice

This information is for the 2024/25 session.

Teacher responsible: Prof Jason Alexander

Availability: This course is available on the MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students taking this course should have familiarity with basic propositional logic and some previous exposure to rational choice theory.

Course content: The course examines the theory of rationality and rational decision making. It is in two parts (i) Probability and Decision: Probabilistic thinking, different interpretations of probability, decision making under risk, ignorance and uncertainty, the measurement of belief and desire, paradoxes of expected utility theory. (ii) Game Theory and Social Choice: Non-cooperative game theory; Solution concepts; evolutionary game theory; May's theorem and arguments for majority rule; Arrow's Theorem; the Gibbard-Satterthwaite theorem; interpersonal comparability and Utilitarianism; the theory of judgement aggregation.

Teaching: 15 hours of lectures and 10 hours of seminars in the AT. 15 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will submit coursework each term, consisting of both short essays and exercises.

Indicative reading: Richard Jeffrey, *The Logic of Decision*, Michael Resnik, *Choices: an introduction to decision theory*, Martin Peterson *An Introduction to Decision Theory*, Amartya Sen *Collective Choice and Social Welfare*, Duncan Luce and Howard Raiffa *Games and Decisions*, Wulf Gaertner *A Primer in Social Choice Theory*, K. Binmore, *Game Theory: A Very Short Introduction*

Assessment: Exam (40%, duration: 2 hours) in the spring exam period.

Essay (30%) in the AT.

Essay (30%) in the WT.

The final 2 hour exam will consist of short questions, mainly of a technical nature but including short 'define and explain' ones.

PH458 Half Unit

Evidence and Policy

This information is for the 2024/25 session.

Teacher responsible: Dr. Liam Kofi Bright

Availability: This course is available on the MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will explore how scientific reasoning does and should inform policy making in a democracy. In the first part of the course we will examine how it is that ethical or political preferences come to influence scientific reasoning in light of its democratic role. In the second part of the course we will explore the sort of evidence policy makers might be especially interested in acquiring and the difficulties involved in producing such.

Teaching: 10 hours of lectures and 15 hours of seminars in the AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: Christensen, D. (2014). "Disagreement and Public Controversy" in Lackey, J. (ed.) *Essays in Collective Epistemology*. Oxford University Press.

Douglas, H. (2009). *Science, Policy, and the Value Free Ideal*. University of Pittsburgh Press.

Hardwig, J. (1985). *Epistemic Dependence*. *The Journal of Philosophy*.

Schenwar, M. & Law, V. (2021). *Prison by Any Other Name: The Harmful Consequences of Popular Reforms*. New Press.

Thoma, J. (2022). *Weighing the Costs and Benefits of Public Policy: On the Dangers of Single Metric Accounting*. LSE Public Policy Review.

Assessment: Essay (100%, 2000 words) in January.

Part of the assessment of the final essay will be discussing how they have responded to feedback on the formative.

PH499

Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Jingyi Wu, Dr Kieran Oberman and Prof Miklos Redei

Availability: This course is compulsory on the MSc in Philosophy and Public Policy, MSc in Philosophy of Economics and the Social Sciences and MSc in Philosophy of Science. This course is not available as an outside option.

Course content: Students are required to write a 10,000-word dissertation on a topic within the field covered by their course of study and approved by the Department of Philosophy, Logic and Scientific Method.

Assessment: Dissertation (100%, 10000 words) in the post-spring term.

The course is assessed 100% by Dissertation. Dissertations must be submitted on a specified date in August in the academic year registered. (Part-time students are required to submit their dissertations in the August of their second year of part-time registration). All details are given in the Departmental Programme Handbook.

PP401 Half Unit

Political Science for Public Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Alexandra Cirone

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Course content: The course will introduce students to how to understand the political context of policymaking, using the latest theoretical and empirical knowledge in modern political science. The course will cover, among other things, political behaviour (such as voting behaviour, elections and lobbying), political institutions (such as electoral systems, parliamentary and presidential government, and central banks) and political outcomes (such as economic policies and public services). The course will combine a review of the main empirical regularities across time and across country in each of these areas, with an introduction to key theoretical arguments about how actors interact and how institutions shape strategic behaviour, and an introduction to the latest empirical (and causal) estimation techniques for testing theoretical propositions.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 35 hours across Autumn Term.

Formative coursework: Students will be expected to produce one formative assignment in the AT.

Indicative reading: W. R. Clark, M. Golder, & S. N. Golder (2018). *Principles of Comparative Politics*. Third Edition. CQ Press. E. Bueno de Mesquita (2016), *Political Economy for Public Policy*, Princeton University Press.

These books provide excellent starting points and can be used as references for many topics. A full reading list will be distributed at the beginning of the course.

Assessment: Exam (70%, duration: 2 hours, reading time: 15 minutes) in the January exam period. Presentation (30%) in the AT.

PP402 Half Unit

Quantitative Methods for Public Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Mark Schankerman

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Course content: The course introduces several econometric approaches that are widely used for quantitative and empirical evaluation which can be applied to policy-making. We will develop the basic methodology and assumptions underlying each approach, which is essential to understand when each tool can be applied, and when not. The emphasis is on the practical application of these skills and tools to real-life situations and policy-making interventions. Topics covered include regression analysis, hypothesis testing, randomised control experiments, difference-in-differences regressions, instrumental variables, and regression discontinuity design.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 37 hours across Autumn Term.

Formative coursework: Each week students will complete problem sets that will give the opportunity to develop fluency with the tools

covered in the course. These will be reviewed in class seminars.

Indicative reading: Joshua D. Angrist and Jom-Steffen Pischke, "Mastering Metrics";

James Stock & Mark Watson, "Introduction to Econometrics"

Scott Cunningham, "Casual inference: the Mixtape"

Jeffrey Wooldridge, "Introductory Econometrics".

The given texts are preparatory reading only. A full reading list will be provided at the start of the course.

Assessment: Exam (65%, duration: 3 hours and 15 minutes) in the January exam period.

Problem sets (10%), policy memo (15%) and group assignment (10%) in the AT.

The exam will take place in January and will be in-person and invigilated.

PP403 Half Unit

Public Management

This information is for the 2024/25 session.

Teacher responsible: Prof Martin Lodge and Prof Geoffrey Myers

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Course content: This course will offer an intensive introduction into key literatures and themes in the study of public management. The emphasis will be on the trans-disciplinary literature dealing with public management in the context of developed and lesser developed world contexts. The course will cover, among other things, questions such as public sector reform, coordination and collaboration, control over bureaucracy, professionalism and public service motivation, performance management, crisis management, leadership, institutional capacity building, and organizational learning. The course will emphasise the key theoretical contributions and relate these to empirical contexts.

Teaching: This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 40 hours across Autumn Term.

Formative coursework: Students will be expected to produce one short essay (1200 words) around the middle of term, based on a choice of questions, providing an opportunity to practise for the assessed essay and the exam. Essay feedback will be provided in sufficient time for students to take it into account for their assessed essay.

Indicative reading:

- Barber, M (2015) *How to Run a Government*, London, Penguin.
- Emerson, K and Nabatchi, T (2015) *Collaborative Governance Regimes*, Georgetown University Press.
- Hood, C (1998) *Art of the State*, Oxford, Oxford University Press.
- Ingrams, A, Piotrowski, S and Berliner, D (2020) 'Learning from Our Mistakes: Public Management Reform and the Hope of Open Government' *Perspectives on Public Management and Governance*, 3(4): 257–272, <https://eprints.lse.ac.uk/115178/>
- Myers, G (2023) *Spectrum Auctions: Designing markets to benefit the public, industry and the economy*, London: LSE Press, pp. 53–67, <https://doi.org/10.31389/lsepress.spa>
- Perrow, C (1984) *Normal Accidents: Living with High Risk Technology*, (New York, Basic Books)
- Simon, H (1947/2013) *Administrative Behavior*, Simon & Schuster.

The given texts are preparatory reading only. A full reading list will be provided at the start of the course.

Assessment: Exam (50%, duration: 2 hours) in the January exam period.

Essay (50%, 2500 words) in the AT.

PP404 Half Unit Economics for Public Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Richard Davies

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Course content: This is graduate level course for mid-career policy-makers to develop their knowledge and understanding of key principles of economics as applicable to policy-making. The emphasis is on developing an understanding of analytical frameworks and models that can be applied to a wide variety of contexts. Both micro- and macro-economics will be covered.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 35.5 hours across Winter Term.

Formative coursework: Students will be expected to produce 4 problem sets in the WT. Students will be expected to submit a policy memo in WT on which they will receive formative feedback.

There will be weekly formative course work to give students the opportunity to develop fluency with the tools covered in the course.

Indicative reading: The Economy 2.0 – microeconomics. Open-Access available here: <https://www.core-econ.org/> Moss, David A. A Concise Guide to Macroeconomics. Reinventing the Bazaar: A Natural History of Markets - McMillan, John 2002

Davies, Richard (2020), Extreme Economies, Penguin.

A full reading list will be provided at the start of the course.

Assessment: Exam (40%, duration: 2 hours, reading time: 10 minutes) in the spring exam period.

Memo (50%) and continuous assessment (10%) in the WT.

PP405 Half Unit Public Policy Applications

This information is for the 2024/25 session.

Teacher responsible: Dr Simon Bastow and Prof Nicholas Barr

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Course content: This course will introduce students to the application of social science literatures to concrete policy issues with significance for developed and developing countries. The course is structured around two complementary Parts:

a) Eleven weeks of 'taught curriculum' through the Winter Term (Part A)

b) Supervised small-group policy projects through the Winter and Spring Terms (Part B)

The taught curriculum (Part A) will be organised around 'big topics' which are both actively discussed and 'current' in the policy world and researched in the academic world. The emphasis will be on applying different theoretical and disciplinary approaches to analyse a particular policy topic and problem. The precise topics will be decided each year, depending on academic and practitioner availability. We aim to attract speakers who are working at the highest levels of research and practice. The course explores these big topics specifically as 'craft of government' challenges, with emphasis on the integration of economics, political science, public management, philosophy and the practicalities of implementation. It offers MPP students an opportunity to enrich and integrate their learning from the core disciplines of the programme.

The course also includes supervised small-group projects (Part B) that challenge students to work collaboratively on a current policy problem. Each project has a supervisor and is curated in advance with the support of an external sponsor organisation, and students are able to select a project of interest and relevance to them. These topics are varied and complement some of the key policy issues and problems covered in the taught curriculum part of the course.

Teaching: Part A is delivered through a combination of pre-recorded lectures, flipped lectures, and interactive seminars

, - totalling a minimum of 35 hours in Winter Term -. There are 11 weeks of teaching in the Winter Term and no Reading Week. Part B is delivered through regular project tutorials with faculty, and ongoing support and supervision through the Winter and Spring Terms. Office hours will be available for students who would like to discuss the content of the course or their group projects in more detail.

Formative coursework: Formative coursework will include:

- For Part A: feedback on student presentations in class, in preparation for the written policy memo.
- For Part B: ongoing support and tutorials for group policy projects, from setting them up at the beginning of the Winter Term through until the submission of final project deliverables in the Spring Term. Students will work in project groups of no more than 5 people and will meet with course faculty to develop (a) the proposed focus of the project, (b) the proposed research method and approach, (c) identification of relevant existing research and literature, and (d) an outline of the structure of the project. Groups will submit a 2 -page outline and received detailed comments on the outline in the Winter Term.

Indicative reading: This will depend on the topics covered week by week. A full reading list for each week will be provided at the start of the course.

Assessment: Report (40%), group presentation (20%) and policy memo (40%) in the ST.

- 40% final report
- 20% group project presentation
- 40% written memo based on individual presentations, due in Spring Term

PP406 Half Unit Philosophy for Public Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Lewis Ross

Availability: This course is compulsory on the Master of Public Policy. This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority for this course is given to students on the Master of Public Policy. Second priority is given to other SPP students. Any remaining places may be taken by students outside of the School of Public Policy.

Course content: The course reflects on the design and evaluation of public policies from a philosophical perspective. To this end, we study a range of theories and concepts that are used by philosophers in policy evaluation. Each week focuses on specific policy issues of wide social importance. The course addresses questions such as the following.

- What is a good public measure of well-being and how should we assess the distribution of well-being across individuals in society?
- Why do inequalities in wealth and income matter (if they do), and which policies, if any, should states adopt to reduce inequalities in wealth and income?
- What, if anything, justifies the use of force by the state in policing and war, and how should institutions governing the use of force be designed?
- Should the state be neutral in relation to citizens' differing conceptions of the good life, and if so, what does such neutrality entail in different areas, including, for example, its regulation of personal relationships such as marriage?
- Should the state engage in paternalistic regulation of self-harming activities, such a drug use?
- What role, if any, should the state take in regulating the provision

of and subsidizing access to higher education?

Teaching: 20 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: Students will have the chance to submit 2 formative essays in the WT.

Indicative reading:

Assessment: Exam (80%, duration: 2 hours, reading time: 10 minutes) in the spring exam period.

Class participation (10%) and group presentation (10%) in the WT. Participation Grade (10%). This will be based on contribution to the class forum and class discussion.

Team presentation (10%) in the WT.

Exam (80%) in the Spring term.

PP407

Pre-Sessional Coding and Mathematics Bootcamp

This information is for the 2024/25 session.

Teacher responsible: Dr Casey Kearney

Availability: This course is compulsory on the MPA in Data Science for Public Policy. This course is not available as an outside option.

Course content: The bootcamp introduces students to coding and Data Science in Python and reviews key Math and Statistics topics for policy. It first introduces the building blocks of programming (variables, objects, conditions, loops, functions, etc) and some foundational libraries in Python (NumPy, Pandas, Matplotlib, plotnine). It then covers basic data sourcing, data manipulation and (very) basic regression analysis in the contexts of simple applied policy exercises. It then refreshes key concepts in probability, maths and statistics. The final week focuses on moving from coding notebooks to packaged code and works on debugging.

Teaching: Approximately 30 hours of lectures.

Exact hours of teaching will be confirmed when the programme Welcome schedules are prepared.

Students will attend lectures in the morning and then complete coding challenges and problem sets throughout the day.

Formative coursework: Students will be expected to produce coursework in August.

Students will complete daily coding challenges to apply new tools and concepts taught in the bootcamp. Most of these challenges will be on Jupyter notebooks.

Indicative reading: Prior to the start of the programming and mathematics bootcamp, students will receive a list of online resources to start learning basic computer programming on Python. These materials will emphasize basic syntax and programming logic.

Some particularly useful texts include:

1 McKinney, Wes. *Python for data analysis*. " O'Reilly Media, Inc.", 2022.

2 Downey, Allen. *Think python*. " O'Reilly Media, Inc.", 2012.

3 Sweigart, Al. *Automate the boring stuff with Python: practical programming for total beginners*. no starch press, 2019.

4 Müller, Andreas C., and Sarah Guido. *Introduction to machine learning with Python: a guide for data scientists*. " O'Reilly Media, Inc.", 2016.

PP408

MPA Introductory Course

This information is for the 2024/25 session.

Teacher responsible: The teacher will be announced at the start of the course.

Availability: This course is compulsory on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-University of Toronto) and Master of Public Administration. This course is not available as an outside option.

Course content: This course provides an introduction to a range of essential skills and basic concepts required for the MPA programmes. The course incorporates a number of sessions delivered during Welcome to give students of all abilities a general introduction to key areas of the programme.

This includes an introduction to basic mathematical and statistical concepts for use in core courses in economics and quantitative approaches.

The course also includes sessions on academic writing and presentation skills.

Teaching: The course runs during the two weeks prior to the start of the Autumn Term.

Indicative reading: Students will be advised of readings and other course materials at the beginning of the course.

Assessment: There is no formal assessment for this course.

PP409

Introductory Teaching for the Master of Public Policy (MPP)

This information is for the 2024/25 session.

Teacher responsible: The teacher will be announced at the start of the course.

Availability: This course is compulsory on the Master of Public Policy. This course is not available as an outside option.

Course content: An introduction to basic concepts for use and awareness on MPP core courses. The course incorporates a number of sessions delivered prior to the programme, and during Welcome, to give students of all abilities a general introduction key areas of the programme. This includes the principles and reasoning underlying quantitative methods for public policy analysis as well as an introduction to the topic of public policy.

Teaching: Exact hours of teaching will be confirmed when the programme Welcome schedules are prepared.

Formative coursework: There will be some informal opportunity to assess progress during this introductory (pre-sessional) course but the nature of this course means that there is no formal formative work.

Indicative reading: Notes covering the course material will be made available at the beginning of the course.

For a basic and accessible introduction to quantitative methods for public policy, students are encouraged to read Charles Whelan's 'Naked Statistics' prior to the start of the course.

Students may refer to other introductory books for further background reading. For the statistics part, please see Newbold, Carlson and Thorne 'Statistics for Business and Economics' (6th edition), or Wonnacott and Wonnacott 'Introductory Statistics for Business and Economics' (4th edition). For the maths part, please see Ian Jacques' 'Mathematics for Economics and Business' (5th edition), or Wisniewski's 'Introductory Mathematical Methods in Economics' (2nd edition). It is not necessary to purchase these books however for this course.

Assessment: There is no formal assessment attached to this course.

PP410 Half Unit Public Economics for Public Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Johannes Spinnewijn

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Preference will be given to students in the School of Public Policy. Students from other LSE departments and schools can seek permission to be accepted on the course.

Pre-requisites: Students must have taken PP440 Macro and Microeconomics (for Public Policy) or an equivalent course.

MPA Dual Degree students spending Year 2 at LSE will require permission from the course lecturer to attend the course.

Course content: This is a course in theoretical and applied public economics using intermediate economic theory. Topics include: issues of equity and efficiency; models of public goods and externalities, including environmental policy; income inequality, poverty alleviation and the role of welfare programmes in theory and in practice; social insurance and social security; health and education policy; the effects of taxes and transfers on labour supply and government budgets; optimal taxation, tax evasion, and taxation in developing countries; and current topics in public finance. The main institutional references will be to the UK and the US, but some attention will also be given to broader international experience.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 29 hours in the Autumn Term.

Formative coursework: Students will complete and be given feedback on two sets of practice questions, which are similar in style and format to the final examination. Students will also be given feedback on a draft introduction and outline of their policy essay.

Indicative reading:

- J Gruber (2011) *Public Finance and Public Policy*, 3rd edition, Worth Publishers. [CC HJ141 G88] [or Gruber (2007), 2nd edition].
- N Barr (2012), *The Economics of the Welfare State*, 5th ed., OUP [CC HB99.3 B26]. 160 Institute for Fiscal Studies (2010-2011), *Mirrlees Review: Reforming the Tax System for the 21st Century*, Volume 1 (2010): *Dimensions of Tax Design*, Volume 2 (2011): *Tax by Design*. Oxford University Press, Oxford. Available online at: <http://www.ifs.org.uk/mirrleesReview>
- On developments in public spending in the UK, see H Glennerster (2003), *Understanding the finance of welfare* (Policy Press); or H Glennerster and J Hills (eds) (1998), *The State of Welfare: The economics of social spending* (Oxford) [CC HV245 S79].
- Students wishing to review their microeconomic theory should consult a textbook on intermediate microeconomic theory, such as Morgan, Katz and Rosen (2006) *Microeconomics*, McGraw Hill (CC HB172 M84) or J Perloff (2008) *Microeconomics: Theory & applications with calculus*, Pearson (CC HB172 P45).
- On the structure of taxation in the UK, see IFS (2011) *A Survey of the UK Tax System*, Briefing Note no. 9 (<http://www.ifs.org.uk/bns/bn09.pdf>) and the HM Revenue and Customs website, (<http://www.hmrc.gov.uk>). 160 The Institute for Fiscal Studies is an independent policy research institute and its website (<http://www.ifs.org.uk>) has a wide range of useful publications. The HMRC website includes information on the tax structure and statistics on tax payments (by income group, by type of tax, etc.)

and overall revenues raised.

- The UK Treasury website (<http://www.hm-treasury.gov.uk/>) provides a range of documents on economic policies and the public finances, including the annual publication, *Financial Statement and Budget Report* (the 'Red Book'), published each year on Budget Day.
- For comparative international fiscal data, information and analysis, useful sources include the International Monetary Fund, IMF (<http://www.imf.org/>), the World Bank (<http://www.worldbank.org/>) and the Organisation for Economic Cooperation and Development, OECD160 (<http://www.oecd.org>).

Assessment: Exam (60%, duration: 3 hours, reading time: 15 minutes) in the January exam period.

Essay (40%, 2000 words) in the WT.

The essay, of up to 2,000 words, will be on a policy question related to the course material.

PP411A Half Unit Not available in 2024/25 Political Entrepreneurship

This information is for the 2024/25 session.

Teacher responsible: Valerio Riavez

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

Course content: This course will offer a unique opportunity to students who have a passion for politics and don't know where to direct it. In the last decade electoral start-ups, new forms of activism, and disruptive political technologies have completely reshaped the international political landscape. Having an impact through politics today requires an understanding of entrepreneurship and of digital technologies, and the mastery of the basic unit of politics: electoral campaigning.

Throughout the course, students will be introduced to frameworks drawn from multiple disciplines ranging from management to political science, from communication to grassroots organizing, from data analytics to leadership, enabling them to understand how modern politics works and what it takes to enter the political arena. The students will draw from first-hand examples of the most disruptive political endeavours of the decade, and will readily apply their learnings to a campaign of their choosing, for which they will be asked to craft a strategy memo and an action plan, dedicating a special focus on the use of data and new technologies.

Teaching: This course is delivered through a combined lecture-seminar format totalling a minimum of 30 hours across Autumn Term.

Formative coursework: Students will be expected to produce a short, 2-page business memo to present the campaign they chose, and to flag any potential barriers to the delivery of their final campaign strategy memo.

Indicative reading:

- McNamara, M - The political campaign desk reference.
- Haidt, J - The righteous mind
- Westen, D - The political brain
- Cialdini, R.B. - Influence: the psychology of persuasion
- Issenberg, S - The victory lab
- Ignatieff, M - Fire and ashes
- Mayer-Schöneberger, V. and Cukier, K. - Big Data
- Lindstrom, M - Small Data
- Ganz, M - Leading change
- McAlevey, J - No shortcuts

Assessment: Project (30%) and memo (60%) in the AT. Class participation (10%).

Project (30%): a short memo highlighting early elements of

campaign strategy, including targeting, staffing and tasks timeline. Memo (60%): a strategy memo of approximately 5,000 words, where students outline the main features of their campaign strategy, expanding on the first memo and including messaging, field, and digital

These two assessments and the formative assessment will revolve around a political campaign of the student's choosing.

PP411W Half Unit

Political Economy Applications for Public Policy

This information is for the 2024/25 session.

Teacher responsible:

- Professor Andrés Velasco160
- Professor Vanessa Rubio-Márquez
- TBC

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students are expected to have done basic courses in economics.

Course content: This course is designed to build an understanding of the nature and drivers of change in public policy and prepare students to develop persuasive policy recommendations. It will use political economy analysis and illustrate the use of the range of concepts and techniques from other courses in economics and political science in the diagnosis of policy change.

During this course, students will deepen understanding of the concepts and techniques presented in other courses and introduce additional concepts from political economy to augment the tools being taught in the core economics courses. In other words, this course will integrate powerful instruments from economics with the drivers of political decision-making to understand and interpret real policy cases and to explore avenues for policy change. A detailed reading guide will be provided before the first class. The structure of the course revolves around comprehensive discussions on two major themes. These themes will be picked from topics including economic growth and development; poverty and inequality; the theory and practice of public policy. The faculty will discuss the theme from different perspectives in four weeks, and the fifth week will involve a panel discussion among the faculty with active student participation. Students will then write an essay on the theme for a particular context.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 35 hours across Winter Term.

Formative coursework: Students will be expected to produce a one-page proposal for summative essay 1 in the WT.

Indicative reading:

- Acemoglu, Daron and James A. Robinson. 2013. "Economics versus Politics: Pitfalls of Policy Advice". *Journal of Economic Perspectives*. Vol. 27, No. 2, pp. 173-92.
- Besley, Timothy and Torsten Persson. 2014. "The Causes and Consequences of Development Clusters: State Capacity, Peace and Income". *Annual Review of Economics*. Volume 6:927-949.
- Andrews, M., L. Pritchett & M Woolcock. (2017). *Building State Capability: Evidence, Analysis, Action*. Oxford University Press.
- Cristina Corduneanu-Huc, Alexander Hamilton and Issel Masses Ferrer. 2012. "Understanding Policy Change: How to Apply Political Economy Concepts in Practice." Washington D.C.: World Bank Publications.
- Andrews Matt, Lant Pritchett, Michael Woolcock. 2010. "Capability Traps? The Mechanisms of Persistent Implementation Failure"

- Hausmann, R., Rodrik, D, and Velasco, A. (2008). *Growth diagnostics*, in Stiglitz, J. and Serra, N. *The Washington Consensus Reconsidered: Towards a new global governance*. Oxford University Press.
- Timothy Besley, Robin Burgess, Adnan Khan and Guo Xu. (2021). *Bureaucracy and Development*. *Annual Review of Economics*. Forthcoming.
- Parkhurst, Justin. 2017. "The politics of evidence: from evidence-based policy to the good governance of evidence". *Routledge Studies in Governance and Public Policy*.

Assessment: Essay (40%, 2500 words) in the period between WT and ST.

Problem sets (60%) in the WT.

Problem sets (60%) consist of two problem set assignments due in the WT.

PP412 Half Unit Not available in 2024/25

Cold War II? Public Policy Implications of US-China Relations in the 2020s

This information is for the 2024/25 session.

Teacher responsible: Professor Niall Ferguson

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Priority is given to students from the School of Public Policy, students from other programmes will be considered if places remain.

Course content: Relations between the United States of America and the People's Republic of China have been deteriorating since at least 2017. This course will consider how far this deterioration should be characterized as a new cold war ("Cold War II"), and what it means for policymaking in the U.S., China and the rest of the world. It will take as its starting point a comparison of the current character of the Sino-American relationship with the superpower rivalry between the United States and the Soviet Union from the late 1940s until the Soviet collapse. Key areas covered include: ideological differences, trade policy and tariffs, technological competition, export controls, limits on technology transfer, overseas aid and capital flows, infrastructure and energy investment, arms races, and diplomacy.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Winter Term. There will be no lectures or seminars in Reading Week.

Formative coursework: Two graded essays (2000 words), one to be submitted halfway through Winter Term and one at the end.

Indicative reading: There is no single textbook that includes all the material covered in this course. Lectures and readings will primarily draw from journal articles. Six books that will be used during the course are:

- Graham Allison, *Destined for War: Can America and China Escape Thucydides's Trap?* (New York: HarperCollins, 2017)
- Rush Doshi, *The Long Game: China's Grand Strategy to Displace American Order* (Oxford: OUP, 2021)
- Eyck Freymann, *One Belt, One Road: Chinese Power Meets the World* (Cambridge, Harvard University Press, 2020)
- Keyu Jin, *The New China Playbook: Beyond Socialism and Capitalism* (New York: Viking, 2023)
- Henry Kissinger, *On China* (New York: Penguin, 2011)
- Michael Pillsbury, *The Hundred-Year Marathon: China's Secret Strategy to Replace America as the Global Superpower* (New

York: St Martin's Griffin, 2015)

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

In-class assessment (30%) in the WT.

- A timed 1 hour essay (30%), which students complete in class.
- A 2 hour in-person exam (70%).

PP413 Half Unit

Growth Diagnostics in Development: Theory and Practice

This information is for the 2024/25 session.

Teacher responsible: Frank Muci Lander

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the School of Public Policy, students from other programmes will be considered if places remain.

Pre-requisites: Introductory Microeconomics

Introduction to Econometrics (experience in STATA, R or Python)

Course content: The course enables students to deploy a variety of analytical tools to process and interpret the data and formulate a coherent diagnostic narrative that can make sense of simultaneous observations about growth and social outcomes within a particular context. It covers the theory and practice of the Economic Complexity and Growth Diagnostics frameworks, drawing on empirical research, case studies, and real world-data to a) map place-specific opportunities for productive diversification, b) identify the most binding constraints preventing them from materializing, and c) formulating data-driven policy strategies to overcome them.

The course covers a range of topics in development economics. It begins with an overview of Malthusian dynamics, the Great Acceleration and modern growth models, emphasizing the role of productivity and technology. The course then explores Hidalgo and Hausmann's (2009) Economic Complexity framework, which takes stock of place-specific productive capabilities and defines a roadmap to potential diversification opportunities that can be tapped by redeploying them, thereby reducing coordination problems that surround the process of self-discovery and structural transformation. The course also reviews Hausmann, Rodrik and Velasco's (2008) Growth Diagnostic framework, a methodology for identifying the most binding constraints to an objective function (i.e. growth, diversification, private investment). Taken together, Economic Complexity and Growth Diagnostics form an innovative conceptual framework that allows policymakers and policy practitioners to focus limited resources on the most impactful issues.

Students will learn to use data-driven tools such as the Atlas of Economic Complexity to map potential avenues for productive diversification and deploy the four diagnostic principles of Growth Diagnostics to identify the most significant constraints preventing them from materializing. The principles of differential diagnostics are illustrated with practical examples that showcase their deployment to test for binding constraints across relevant production factors, such as finance, human capital, infrastructure, market failures (coordination and information externalities), government failures (taxation, regulations, property rights, and corruption) and macroeconomic risks.

The course concludes with several lectures on policy formulation and implementation. There will be a session on building the state capability needed to mobilise and implement reforms using

Andres, Pritchett and Woolcock's (2012) Problem-Driven Iterative Adaptation approach. Students are expected to implement class concepts, methodologies and frameworks on a country of their choosing through a series of hands-on problem sets that develop incremental research outputs that are then used for the final Growth Diagnostics country report and presentation.

Teaching: 30 hours of lectures and 10 hours of seminars in the WT.

The course will have two x 90 minute 'Harvard' style lectures plus a one-hour seminar per week.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Short pre-class assignments

Indicative reading:

- Collier, P. (2018). *The future of capitalism: Facing the new anxieties*. Harper Collins Publishers, New York. Chapter 7: The geographic divide: Booming metropolis, broken cities.

Assessment: Group project (50%) in the WT and ST.

Problem sets (25%) and problem sets (25%) in the WT.

There will be one individual problem set and one group problem set assigned during Winter Term.

PP414 Half Unit

Policy-Making: Process, Challenges and Outcomes

This information is for the 2024/25 session.

Teacher responsible: Professor Vanessa Rubio Márquez

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

This course has a limited number of places (it is controlled access) and demand is typically very high.

Course content: This course shall help students construct an analytical mindset to policymaking, through the application of a bespoke policy-making toolbox developed by the professor. The course offers an end-to-end guide of key elements that affect decision-making and decision-maker through the policy process, to offer a geography- and sector-agnostic toolbox that students can

apply during their future professional journeys. It shall encompass aspects such as developing a multi-disciplinary and nuanced approach to analysing and defining a policy problem, consideration of policy options, stakeholder engagement, and monitoring and evaluation. It offers a practitioner's perspective on decision-making within the policy process, to complement the theoretical perspective offered by other courses.

In developing a practical intuition to policymaking, it will also emphasise the unique challenges faced by policy-makers in addressing and managing information, communication, negotiation, implementation and dealing with the politics of policies.

The course has three components to maximise student engagement and participation - lectures, seminars, and a policy laboratory. During the lectures, the professor will present an array of concepts and practical policy-making cases at the local, national, and international levels. The aim of the course is not to study specific decision-making cases, but rather to use the case-studies as examples and models of generalisable insights to understand the way decision-making processes operate in the policy world. A discussion of the lecture content and Q&As will take place in a distinct seminar at the end of each lecture.

During the policy lab, students will be organised into groups that are tasked with presenting and enacting specific decision-making cases (simulations) previously provided to them. They will receive questions and comments from the rest of the class and permanent feedback from the professor and the teaching assistant. The simulation exercises used in the lab will enable students to experience all the major steps in the decision-making process.

They will equip students with the ability to: define a problem, craft a solution, propose a public policy in concept, draft a public policy proposal in detail while thinking through the different aspects and challenges in the implementation of the policy. Students will be required to consider and map constraints and challenges such as timing, imperfect information, stakeholders' interests, sequencing and prioritisation. They will learn the importance of emotions, interests and institutional factors in policy-making and the ways they can be used to understand contexts and improve outcomes.

The course has also been designed to help the students understand the relevance of developing a stakeholder map that can be used when designing and implementing policies, while analysing and factoring in various legal and practical implications for the different stakeholders who are involved in the decision-making process. Students will also learn about the communication of policy choices, the relevance of the media in creating a positive (or negative) environment for policy implementation, and the way policies are determined or constrained by factors such as economic, financial, cultural and environmental considerations.

Teaching: 31 hours and 30 minutes of seminars in the AT.

Weekly teaching structure:

Harvard-style lecture one – 90 minutes lecture and seminar
Live 40-minute lectures will take place on a weekly basis, followed by a 40-minute seminar for Q&As and interactive discussions on the themes covered in the lecture. At the end, 10 minutes will be dedicated to the preparation of that week's presentation and simulation exercise by the relevant student group.

Harvard-style lecture two - 90 minutes: Public Policy Laboratory
Student groups will present and simulate a decision-making case (parameters given by the Professor). Presentations will take 30 minutes and will be followed by feedback/discussion with the Professor and the rest of the group that will take an hour.

Formative coursework: Students are required to attend lectures, seminars and policy labs. An attendance record will be kept by the professor.

For the policy laboratory exercise, students will make three formative presentations/simulations on their assigned case to prepare for the final summative presentation. The professor will provide advice and feedback to students on a group and individual basis.

Assessment: Coursework (60%, 1000 words) in the AT. Presentation (40%).

- Coursework - Policy Memo (60%): An individual policy project based on the specific policy-making case assigned to each working group is due in Week 9.160 An outline of the policy memo may be presented by the end of Week 6 in order to receive feedback by the end of Week 7 (1,000 words, worth 60%).
- War room presentations (40%): The final presentations and simulation exercises delivered by the working groups in the policy lab will be assessed individually during Weeks 10 and 11 of Autumn Term.

Feedback will be provided on all elements of the formative and summative coursework, both in class and during office hours with the professor and TA, on a group and individual basis. Further details on the formative and summative assessments will be provided during the course.

The professor will dedicate additional time with each of the groups to guide them in the preparation of their lab project (presentation-simulation).

PP414W Half Unit Not available in 2024/25 Policy-Making: Process, Challenges and Outcomes

This information is for the 2024/25 session.

Teacher responsible: Professor Vanessa Rubio Marquez

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

This course has a limited number of places (it is controlled access) and demand is typically very high.

Course content: This course shall help students construct an analytical mindset to policymaking, through the application of a bespoke policy-making toolbox developed by the professor. The course offers an end-to-end guide of key elements that affect decision-making and decision-maker through the policy process, to offer a geography- and sector-agnostic toolbox that students can apply during their future professional journeys. It shall encompass aspects such as developing a multi-disciplinary and nuanced approach to analysing and defining a policy problem, consideration of policy options, stakeholder engagement, and monitoring and evaluation. It offers a practitioner's perspective on decision-making within the policy process, to complement the theoretical perspective offered by other courses.

In developing a practical intuition to policymaking, it will also emphasise the unique challenges faced by policy-makers in addressing and managing information, communication, negotiation, implementation and dealing with the politics of policies.

The course has three components to maximise student engagement and participation - lectures, seminars, and a policy laboratory. During the lectures, the professor will present an array of concepts and practical policy-making cases at the local, national, and international levels. The aim of the course is not to study specific decision-making cases, but rather to use the case-studies as examples and models of generalisable insights to understand the way decision-making processes operate in the policy world. A discussion of the lecture content and Q&As will take place in a distinct seminar at the end of each lecture.

During the policy lab, students will be organised into groups that are tasked with presenting and enacting specific decision-making cases (simulations) previously provided to them. They will receive questions and comments from the rest of the class and permanent feedback from the professor and the teaching assistant. The simulation exercises used in the lab will enable students to experience all the major steps in the decision-making process.

They will equip students with the ability to: define a problem, craft a solution, propose a public policy in concept, draft a public policy proposal in detail while thinking through the different aspects and challenges in the implementation of the policy. Students will be required to consider and map constraints and challenges such as timing, imperfect information, stakeholders' interests, sequencing and prioritisation. They will learn the importance of emotions, interests and institutional factors in policy-making and the ways they can be used to understand contexts and improve outcomes. The course has also been designed to help the students understand the relevance of developing a stakeholder map that can be used when designing and implementing policies, while analysing and factoring in various legal and practical implications for the different stakeholders who are involved in the decision-making process. Students will also learn about the communication of policy choices, the relevance of the media in creating a positive (or negative) environment for policy implementation, and the way policies are determined or constrained by factors such as economic, financial, cultural and environmental considerations.

Teaching: 30 hours of seminars in the WT.

Weekly teaching structure:

Harvard-style lecture one – 90 minutes lecture and seminar
Live 40-minute lectures will take place on a weekly basis, followed by a 40-minute seminar for Q&As and interactive discussions on the themes covered in the lecture. At the end, 10 minutes will be dedicated to the preparation of that week's presentation and simulation exercise by the relevant student group.

Harvard-style lecture two - 90 minutes: Public Policy Laboratory
Student groups will present and simulate a decision-making case (previously prepared by the Professor). Presentations will take 30 minutes and will be followed by feedback/discussion with the Professor and the rest of the group that will take an hour.

Formative coursework: Students are required to attend lectures, seminars and policy labs. An attendance record will be kept by the professor.

For the policy laboratory exercise, students will make three formative presentations/simulations on their assigned case to prepare for the final summative presentation. The professor will provide advice and feedback to students on a group and individual basis.

- World Bank, Reversals of Fortune, World Bank Group, 2020. (openknowledge.worldbank.org)

Assessment: Presentation (40%) and coursework (60%, 1000

words) in the WT.

Coursework - Policy Memo (60%): An individual policy project based on the specific policy-making case assigned to each working group is due in Week 9. An outline of the policy memo may be presented by the end of Week 6 in order to receive feedback by the end of Week 7 (1,000 words, worth 60%).

Submission deadline: Tuesday of Week 9 by 12.00noon

War room presentations (40%): The final presentations and simulation exercises delivered by the working groups in the policy lab will be assessed individually during Weeks 10 and 11 of Winter Term.

Feedback will be provided on all elements of the formative and summative coursework, both in class and during office hours with the professor and TA, on a group and individual basis. Further details on the formative and summative assessments will be provided during the course.

The professor will dedicate additional time with each of the groups to guide them in the preparation of their lab project (presentation-simulation).

PP415 Half Unit Technology, Data Science and Policy

This information is for the 2024/25 session.

Teacher responsible: Professor Alexander Evans (School of Public Policy)

Availability: This course is compulsory on the MPA in Data Science for Public Policy. This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Basic familiarity with technology issues, machine learning and artificial intelligence is helpful. The course does not require any computer programming.

Course content: Technology and Data Science are now a major driver of many areas of public policy. This course will present a globally comparative, integrated and historically informed perspective on key policy issues in technology, data science, and emerging technologies such as AI. The course will have an inter-disciplinary approach that will consider policy issues from the point of view of governance, security, ethics, and the law. The course will present a brief history of technology and technology policy, consider the role of technology in government, cover main areas of 21st century technology policy, with a focus on competition and regulatory diplomacy and national strategies. The course will then cover key concepts in data science ethics broadly and discuss emerging issues with artificial intelligence. Students will emerge with a holistic view of the role of technology and data science in society and government.

Teaching: 22 hours of lectures and 16 hours and 30 minutes of seminars in the WT.

Formative coursework: Students will submit the outlines of their essays and policy memos (in bullet point format) for formative feedback prior to submitting the final written versions for summative assessment. There will also be a formative presentation, with feedback, to develop policy presentation skills.

Indicative reading:

- David Edgerton, The shock of the old (2019)
- Chris Miller, Chip War: the fight for the world's most critical technology (2022)
- Nigel Inkster, The Great Uncoupling (2020)
- Nicole Perluth, This is how they tell me the world ends (2021)
- Caroline Perez, Invisible Women (2019)
- Henry Farrell, Abraham Newman and Jeremy Wallace, 'Spirals of Delusion: How AI Distorts Decision-Making and Makes Dictators

More Dangerous' Foreign Affairs (Sep/Oct 2022)

Assessment: Essay (60%, 3000 words) and policy memo (40%) in the WT.

PP416 Half Unit Not available in 2024/25

Beyond the policy cycle: how theory explains practice

This information is for the 2024/25 session.

Teacher responsible: Mr Nicholas Rowley

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Preference will be given to students in the School of Public Policy. Students from other LSE departments and schools can seek permission to be accepted on the course.

Course content: This course will introduce students to the core public policy theories which help reveal how and why challenges and problems become amenable to policy. By first presenting Harold Lasswell's seminal work on the 'policy cycle', the course explores those theories that have countered and gone beyond it. The course will present theories including social construction; 'multiple streams'; behavioural theory; the idea of the 'policy entrepreneur', advocacy coalitions as well as different notions of power to help explain various examples and case studies presented each week. The course will also examine how (individual, general and institutional) trust is critical to effective policy deliberation, decision and implementation. And how understanding executive decision making: who can take which decisions based on what evidence and to what effect, is critical to any public policy professional seeking to make a difference. The course will be structured around topics which are both relevant to political and policy deliberation and being researched in the academy. The emphasis will be on revealing how a deep and broad understanding of public policy theory can help illuminate an understanding of:

- why certain problems are not deemed amenable to policy;
- how and why certain problems are, and
- how policy might be considered, developed, and effectively implemented.

The course will be of use to students considering a career in government, a not-for-profit, an international organisation, the private sector or in advocacy. Forming half of their assessed work, students will be encouraged to concentrate on and master a policy problem or challenge which they find particularly interesting or important.

Teaching: 20 hours of lectures and 10 hours of workshops in the AT.

Teaching will involve ten two hour 'Harvard style' combined lectures / seminars, together with an additional one hour intensive policy workshop.

Formative coursework:

- Group presentation plan
- Short (2,000 word) essay
- One page (500 word) policy memo

Indicative reading:

- In Defence of Politics by Bernard Crick
- The Decision Process - Seven Categories of Functional Analysis by Harold Lasswell
- Power – a radical view by Steven Lukes
- Causal Stories and the Formation of Policy Agendas," Political Science Quarterly, vol. 104, no. 2, 1989 by Deborah Stone
- Agendas, Alternatives, and Public Policies by John Kingdon
- The Politics of Attention by Bryan Jones and Frank Baumgartner

- Administrative Behaviour – a Study of Decision-Making Processes in Administrative Organisations by Herbert Simon
- The Art of Public Strategy by Geoff Mulgan
- A Practical Guide for Policy Analysis – the Eightfold Path to More Effective Problem Solving by Eugene Bardach
- The Tools of Government in the Information Age by Christopher Hood in The Oxford Handbook of Public Policy

Assessment: Presentation (40%) in the AT.

Essay (60%, 3000 words) in December.

40% Class presentations (in classes 2-8 through the term)

PP417A Half Unit

The Practice of Effective Climate Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Marion Dumas

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Preference will be given to students in the School of Public Policy. Students from other LSE departments and schools can seek permission to be accepted on the course. Please note it is not possible to take both PP417A and PP417W.

Course content: This course will introduce students to the climate problem and the ways in which policy might be effectively used to address it with a particular emphasis on the economics of climate change mitigation and adaptation. It will provide:

- the basic science of climate change
- an overview of the mechanisms linking economic activity and anthropogenic greenhouse gas emissions, how to assess the cost of climate change to society
- the political economy and governance of climate change mitigation
- how policymakers can use economic instruments to help decarbonize our economies and prepare for the adaptation to climate change impacts.

The course will be grounded in cutting-edge academic research and structured around topics which are relevant to current climate policy debates. The emphasis will be on giving students the necessary knowledge and skills to achieve a deep and broad understanding of climate policy and the ability to mobilise the recent academic research - whether working in government, the private sector or advocacy. The course content will be complemented by up to three seminars dedicated to guest lectures by practitioners active in the climate policymaking space.

The assessments will build on the foundational information disseminated through the 10 lectures. Students will deliver a policy essay on a climate-related policy question of their choice, designed under the supervision of the course convener. This main summative will be completed by a quantitative exercise designed to familiarize students with the basics of quantitative climate policy design and analysis. Finally students will also deliver 10-min individual presentations during lectures and seminars on an article provided by the course convener.

Teaching: 20 hours of lectures and 10 hours of workshops in the AT.

Formative coursework:

- One page outline of the summative policy essay.

Indicative reading:

- IPCC (2022) Sixth Assessment Report (AR6) Synthesis Report (SYR)
- Baede, A. P. M. (2001) "The climate system: an overview." Climate change 2001: the scientific basis: 38-47.
- Nordhaus, W. D. (2017). Revisiting the social cost of carbon.

Proceedings of the National Academy of Sciences, 114(7), 1518-1523.

- Merchants of Doubt by Naomi Oreskes
- Governing the Commons by Elinor Ostrom

Assessment: Essay (60%, 3000 words) and presentation (20%) in the AT.

Exercise (20%).

Presentation (20%) consists of a 10-minute individual presentation

Exercise (20%) consists of a quantitative exercise

PP417W Half Unit

The Practice of Effective Climate Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Aurelien Saussay

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Preference will be given to students in the School of Public Policy. Students from other LSE departments and schools can seek permission to be accepted on the course. Please note it is not possible to take both PP417A and PP417W.

Course content: This course will introduce students to the climate problem and the ways in which policy might be effectively used to address it, with a particular emphasis on the economics of climate change mitigation and adaptation. It will provide:

- the basic science of climate change
- an overview of the mechanisms linking economic activity and anthropogenic greenhouse gas emissions, how to assess the cost of climate change to society
- the political economy and governance of climate change mitigation
- how policymakers can use economic instruments to help decarbonize our economies and prepare for the adaptation to climate change impacts.

The course will be grounded in cutting-edge academic research and structured around topics which are relevant to current climate policy debates. The emphasis will be on giving students the necessary knowledge and skills to achieve a deep and broad understanding of climate policy and the ability to mobilize the most recent academic research to make a difference on the climate front – whether working in government, the private sector or advocacy. The course content will be complemented by up to three seminars dedicated to guest lectures by practitioners active in the climate policymaking space.

The assessments will build on the foundational information disseminated through the 10 lectures. Students will deliver a policy essay on a climate-related policy question of their choice, designed under the supervision of the course convener. This main summative will be completed by a quantitative exercise designed to familiarize students with the basics of quantitative climate policy design and analysis. Finally students will also deliver 10-min individual presentations during lectures and seminars on an article provided by the course convener.

Teaching: 20 hours of lectures and 10 hours of workshops in the WT.

Formative coursework:

- One page outline of the summative policy essay

Indicative reading:

- IPCC (2022) Sixth Assessment Report (AR6) Synthesis Report (SYR)
- Baede, A. P. M. (2001) "The climate system: an overview." Climate change 2001: the scientific basis: 38-47
- Nordhaus, W. D. (2017). Revisiting the social cost of carbon.

Proceedings of the National Academy of Sciences, 114(7), 1518-1523.

- Merchants of Doubt by Naomi Oreskes
- Governing the Commons by Elinor Ostrom

Assessment: Presentation (20%), essay (60%, 3000 words) and exercise (20%) in the WT.

Presentation (20%) will consist of a 10-minute individual presentation.

The exercise (20%) will consist of a quantitative exercise.

PP418 Half Unit

Globalisation and Economic Policy

This information is for the 2024/25 session.

Teacher responsible: Professor Andrés Velasco

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the School of Public Policy. Students from other programmes will be considered if places remain.

Pre-requisites: The expectation is that students will have previously taken PP440 and PP455 or equivalent courses. Students who have not taken PP440 and PP455 (including MPA Dual and Double Degree students spending Year 2 at LSE) will require permission from the course lecturer to attend the course.

Course content: Over the past two centuries, the global economy has become increasingly interconnected. This course studies the policy implications of this globalization. It considers the causes and consequences of increasing international economic integration, focusing particularly on the challenges and opportunities that globalization creates for policy makers. Key areas covered include: international trade, innovation and growth, migration and wages, international capital flows, borrowing and adjustment in the world economy, monetary and exchange rate policy, and financial crises. The course builds on the knowledge developed in PP440 and PP455.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Winter Term.

Formative coursework: The formative coursework will comprise two graded problem sets. The formative coursework will take place throughout the term.

Indicative reading: There is no single textbook that includes all the material covered in this course. Lectures and readings will primarily draw from journal articles. Five books that will be used during the course are:

- Krugman, P.R., Obstfeld, M and Melitz, M.J. International economics: theory and policy 11th edition (Boston: Pearson, 2018)
- Rodrik, D., The globalization paradox: why global markets, states and democracy can't coexist (Oxford: Oxford University Press, 2011)
- Irwin, D., Free Trade Under Fire (Princeton: Princeton University Press, 2015)
- Catao, Luis and M.Obstfeld (eds.) Meeting Globalization's Challenges: Policies to Make Trade Work for All. (Princeton: Princeton University Press, 2019)
- Markus K. Brunnermeier and Ricardo Reis, A Crash Course on Crises: Macroeconomic Concepts for Run-Ups, Collapses and Recoveries (Princeton: Princeton University Press, 2023)

Assessment: In-class assessment (50%) in the ST.

Problem sets (25%) and problem sets (25%) in the WT.

The in-class assessment will take place in week 1 of Spring Term.

PP419 Half Unit Advanced Empirical Methods for Policy Analysis

This information is for the 2024/25 session.

Teacher responsible: Professor Daniel Sturm

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the School of Public Policy, students from other programmes will be considered if places remain

Pre-requisites: The expectation is that MPA students taking PP419 will have previously passed PP455 and will have also taken PP440 or more advanced economics courses. Students who have not taken and passed PP455 (including MPA Dual and Double Degree students spending Year 2 at LSE) will have to demonstrate a background in empirical methods that is similar to PP455 and will require permission from the course lecturer to attend the course.

Course content: This course provides an advanced treatment of the empirical methods that are used to evaluate the effectiveness of public policies. The course builds closely on the course Quantitative Approaches and Policy Analysis (PP455) and also Micro and Macroeconomics for Public Policy (PP440). Topics covered include the problem of causality, the theory and practice of randomised experiments, difference-in-differences, synthetic controls, regression discontinuity, robust and clustered standard errors, and calibration.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 29 hours across Autumn Term.

Formative coursework: The formative coursework will comprise a graded problem set.

Indicative reading: There is no single textbook for the course and many of the key readings are journal articles. James Stock and Mark Watson "Introduction to Econometrics" remains a useful reference particularly for the material at the beginning of the course. A very good source for background reading is Joshua Angrist and Jörn-Steffen Pischke "Mastering 'Metrics: The Path from Cause to Effect". A full reading list will be available at the beginning of the course.

Assessment: Exam (75%, duration: 2 hours, reading time: 10 minutes) in the January exam period.
Project (25%, 2000 words) in the AT.

The project will be due shortly after the end of Autumn Term.

PP422 Data Science for Public Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Casey Kearney

Availability: This course is compulsory on the MPA in Data Science for Public Policy. This course is not available as an outside option.

Pre-requisites: Students must have completed Pre-Sessional Coding and Mathematics Bootcamp (PP407).

This will ensure that students have basic fluency in Maths and Statistics along with Python and its main Data Science libraries.

Course content: This course covers the theory and practice of the Data Science project lifecycle in Python for Public Policy, from problem definition and data sourcing/cleaning to exploration, visualization, and modelling. Emphasis will be placed on identifying problems that are suitable for different Data Science techniques and on good practices for managing data. Linear and logistic models and regularization techniques will be covered in the AT and Machine Learning, Clustering and introductory text analysis models will be left for the WT. Key concepts and ideas underlying modelling (bias vs. variance, types of error, training vs. test data) and data ethics and data science ethics will be illustrated and implemented with examples from healthcare, education, urban policy, international development, and other policy areas. By the end of the course, students will have a strong coding workflow and will be able to source and experiment with data for analysis and research, both individually and in a collaborative environment.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. 15 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: Students will be expected to produce weekly problem sets throughout the AT and WT.

Indicative reading: These books provide an excellent starting point and can be used as the main reference for many topics. A full reading list will be provided at the beginning of the course.

1 James, Gareth, et al. An introduction to statistical learning: With applications in python. Springer Nature, 2023.

2 Chen, Jeffrey C., Edward A. Rubin, and Gary J. Cornwall. Data science for public policy. Springer, 2021.

3 Géron, Aurélien. Hands-on machine learning with Scikit-Learn, Keras, and TensorFlow. " O'Reilly Media, Inc.", 2022.

4 Müller, Andreas C., and Sarah Guido. Introduction to machine learning with Python: a guide for data scientists. " O'Reilly Media, Inc.", 2016.

5 Wilke, Claus O. Fundamentals of data visualization: a primer on making informative and compelling figures. O'Reilly Media, 2019.

Assessment: Exam (40%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

Coursework (30%) in the AT and WT.

Group presentation (30%) in the WT.

Coursework is comprised of weekly coding notebooks to be completed by the student and in-class participation. Students will also prepare a group presentation and take a final exam for the course.

PP423 Half Unit Anticipatory Policymaking

This information is for the 2024/25 session.

Teacher responsible: Prof Alexander Evans

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Policymaking in time (historical knowledge and long-range strategy in the public sector); behavioural bias, group dynamics and decision-making; seven case-study sessions on long-range policymaking challenges (including pensions, climate policy, counter-terrorism, gender equality and rights, health insurance, defence planning, resilience and crisis preparedness); a comparative assessment of the 'official mind' (what is the cultural and professional identity of public servants - and how might that shape the advice and policies they develop); an assessment of different comparative international public service systems, and how these may influence long-range policymaking; and finally different methods of mitigating short-termism and error in policymaking (including policy planning, red-teaming, internal and

external inquiries, training, drawing on or commissioning external challenge etc.).

Teaching: 22 hours of lectures and 16 hours and 30 minutes of seminars in the AT.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the AT. Students will submit the outlines of their essays and policy memos (in bullet point format) for formative feedback prior to submitting the final written versions for summative assessment. There will also be a formative presentation during the AT, with feedback, to develop policy presentation skills.

Indicative reading:

- Richard Neustadt, 160 Thinking in Time: The Uses of History for Decision-making (1988)
- Ivor Crewe and Antony King, The Blunders of our Governments (2013)
- Suzanne Heywood, 160 What does Jeremy think? (2022)
- Richard Haas, 160 The Bureaucratic Entrepreneur 160 (1999)
- George Orwell, 160 Politics and the English Language 160 (1946)

Assessment: Essay (60%, 3000 words) and policy memo (40%) in the AT.

PP424 Half Unit Happiness and Public Policy

This information is for the 2024/25 session.

Teacher responsible: Lectures will be delivered by Prof Richard Layard. Advice on teaching and content from Dr Christian Krekel. Seminars will be led by Dr Ekaterina Oparina.

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: Worldwide, more and more policy-makers believe that the goal of public policy should be the wellbeing of the people. This course will show how, with the new science of wellbeing, it is increasingly possible to make this an operational objective. Targeted at future policy-makers, this course will show how making wellbeing an operational objective of policy making is in the political interest of policy-makers and how government policies would be likely to change if they were chosen according to their cost-effectiveness in generating wellbeing.

The lectures for this course will run as follows:

- 1 The concept and measurement of wellbeing
- 2 The philosophy of wellbeing (and objections to it)
- 3 The role of the state in the presence of irrational behaviour and human interdependence.
- 4 The worldwide inequality of wellbeing and its causes (including genes)
- 5 Developing policies to improve wellbeing using cost-effectiveness analysis (with wellbeing as the measure of benefit.
- 6 Mental health and the role of parents, schools, and social media
- 7 Income and wellbeing: the Easterlin paradox
- 8 Work, unemployment, and wellbeing
- 9 Community life, the environment, the planet and wellbeing
- 10 Government, voting and wellbeing.

The lectures will be by Professor Richard Layard. Advice on teaching arrangements will come from Dr Christian Krekel. Classes will be taught by an experienced post-doc. The course will be based on Wellbeing: Science and Policy by Richard Layard and Jan-Emmanuel De Neve (Cambridge University Press, 2022).

Teaching: 15 hours of lectures and 15 hours of seminars in the WT.

Formative coursework: In-class presentations that students will deliver in small groups throughout the course as preparation for

the written assignments.

Indicative reading:

- Layard, R. and De Neve, J-E. (2022) Wellbeing: Science and Policy. Cambridge University Press.

- Luechinger, S. (2009). Valuing Air Quality Using the Life Satisfaction Approach. *Economic Journal*, 119, 482-515.

Assessment: Coursework (35%, 1000 words) in the WT Week 9. Report (65%) in the ST Week 1.

The coursework worth 35% will take the form of a cost effectiveness exercise.

The 3000 word report worth 65% will be assigned in week 10 and submitted at the start of Spring Term.

PP425 Half Unit Not available in 2024/25 Strategic Policymaking: Economic Analysis, Narrative Development, Political Feasibility, and Implementation

This information is for the 2024/25 session.

Teacher responsible: Professor Luis Garicano

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

Pre-requisites: Students should submit evidence of having taken a Microeconomics course before.

Course content: This course examines, using primarily an economics lens, the challenges and opportunities for designing

and implementing effective policies in developed and developing countries. It explores the obstacles to the implementation of good policy and how to overcome them, relying on theory and evidence mostly from the economics and political economy literatures, relating to evidence-based policy design, to communication, political economy, media, parties, state capacity, and public opinion. The course aims to equip students with the skills and knowledge to critically evaluate policy proposals and outcomes, and to propose solutions for overcoming the obstacles to good policy making.

It proceeds in five sections:

1 Policy: Figuring out the solution. The role of economic theory and evidence in policy design and evaluation. (Tools from Microeconomics.)

2 Political Economy: Identifying a winning coalition. Impact of political institutions, media, parties, and interest groups on policy choices and implementation. (Tools from Political Economy.)

3 Communication: Building a winning coalition. Identify and overcome the cognitive biases and heuristics that limit communication. (Tools from behavioural economics and political science.)

4 Implementation: Making it work. Often, the main barrier to success is the lack of capacity to put it in place. (Tools from organizational economics and development.)

5 Solutions: Making reform work. Student presentations taking all the above into account.

Teaching: 22 hours of lectures and 16 hours and 30 minutes of seminars in the AT.

The course will teach as usual in week 6

Formative coursework: Students will be expected to produce four intermediate deliverables on the project at the end of each phase.

Indicative reading: There is no set text book for this course but many readings that offer insight into the politics of policy-making, including

- Growth Diagnostic Framework (Hausman, Rodrik and Velasco)
- Rodrik, D. (2008). Second-best institutions. *American Economic Review*, 98(2), 100-104.
- Acemoglu, D., & Robinson, J. A. (2012). *Why nations fail: The origins of power, prosperity and poverty* (Vol. 4). London: Profile books.
- Thaler, R. H., & Sunstein, C. R. (2009). *Nudge: Improving decisions about health, wealth, and happiness*. Penguin.
- Jonathan Haidt. *The Righteous Mind: Why Good People Are Divided by Politics and Religion*, Penguin. 2012.
- Ezra Klein. "Why we are polarized". Simon and Shuster 2022
- Narrative Economics: How Stories Go Viral and Drive Major Economic Events by Robert J. Shiller, Princeton University Press. (2019).
- Garicano, Luis, and Luis Rayo. "Why organizations fail: models and cases." *Journal of Economic Literature* 54.1 (2016): Read careful section 5.1

Assessment: Paper (50%) and group presentation (50%).

The course will be assessed through a policy project, developed over the entire duration of the course, that will require working together in a team. This will test the skills required of policy makers in the real world environment of policy formulation. In particular, the focus is on analysis, communication, argumentation, group/team working and policy design. This will involve two deliverables:

- 1 An individual paper written separately by each student, including the literature references motivating the key choices (50% of grade).
- 2 A group presentation in week 11 of the class in front of all the rest of the class involving also a Q&A (50% of the grade).

Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is designed for graduate students at the School of Public Policy but is open to students outside the school, subject to availability and instructor permission.

Pre-requisites: The course has no formal prerequisites, though previous coursework or experience in economics, finance, business, computer science, law or other related fields will be beneficial.

Course content: Public permissionless blockchains and "crypto" assets have attracted massive attention, investment and talent, peaking at US\$ 3 trillion of apparent market value in late 2021 and nearing those levels in 2024. But what do distributed ledger technologies and the socioeconomic systems that are built on them amount to? What economic or social purpose, if any, do they serve? What are the costs, risks and opportunities associated with this technology, financial infrastructure and purported asset class? Most importantly, how should it be understood and addressed by policymakers?

This course is designed to (1) equip students with a technical, economic, social, legal and historical understanding of the "crypto" phenomenon and (2) develop student understanding of the theoretical frameworks, analytical tools and perspectives necessary to have informed views about how various aspects of this sector can and should be regulated. The course will draw on a variety of sources including academic research, case studies, whitepapers, news reporting, opinion pieces, and online media. The course is interdisciplinary but emphasizes economic concepts and ideas. It will also have a comparative and international focus. The course will also cover permissioned DLTs and other emerging financial technologies, but the emphasis will be on the permissionless blockchains, the technological underpinning of "crypto." Students may be interested in the course for a variety of reasons, including general education, as preparation for roles in regulatory bodies, government, finance, or advocacy organizations.

Teaching: 33 hours of lectures in the AT.

The course will have two 90 minute 'Harvard style' lecture/seminars per week. These are interactive sessions where student participation is expected.

Formative coursework: Students will be expected to produce formative outlines for their essay and policy memo in the Autumn Term.

Indicative reading: The course will feature materials from a wide variety of sources, including journal articles, newsletters, blogs, and other online media. Below is a list of key reference materials for the course:

- Arvind Narayanan, Joseph Bonneau, Edward Felten, Andrew Miller, and Steven Goldfeder. 2016. *Bitcoin and Cryptocurrency Technologies: A Comprehensive Introduction*. Princeton University Press, USA.
- Robert J. Shiller, 2015. "Irrational Exuberance," Economics Books, Princeton University Press, edition 3, number 10421.
- Levine, Mathew. "The Crypto Story: Where it came from, what it all means, and why it still matters." *Bloomberg Businessweek*. October 31st 2022.
- Nakamoto, Satoshi: A Peer-to-Peer Electronic Cash System (August 21, 2008)
- Buterin, Vitalik: "Ethereum: A Next-Generation Smart Contract and Decentralized Application Platform." (January 2014).

Assessment: Essay (40%, 1500 words) in the AT.

Policy memo (60%) in the period between AT and WT.

The length of the policy memo will be 2,500 words.

PP426 Half Unit

Public Policy for Blockchains and Digital Assets

This information is for the 2024/25 session.

Teacher responsible: Frank Muci

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public

PP431 Half Unit Reimagining Capitalism

This information is for the 2024/25 session.

Teacher responsible: Prof Luis Garicano will be the Course Leader and Dr. Bryan Cheang is the Teaching Fellow who will run the seminars.

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

Course content: "Reimagining Capitalism" is a pioneering 10-week course that offers a reflection on the future of capitalism, envisioned as a more cohesive, sustainable, and equitable system. This course engages students in a critical examination of capitalism through various lenses-economic, social, and ethical-challenging them to envision a system that balances innovation and growth with inclusivity, sustainability, and social responsibility.

Each week, participants will hear from a different lecturer, be exposed to readings from different perspectives and discuss them in seminars. The course will first explore the nature and historical evolution of capitalism as a mode of socio-economic organisation, as compared with rival systems. After which, specific problems in capitalist economies will be explored, together with potential policy reforms.

The curriculum is designed to encourage rigorous analysis, dialogue, and the exploration of innovative solutions that address the challenges of our time. Key topics include an analysis of stakeholder capitalism, exploring how businesses can be oriented to serve broader societal interests beyond shareholder profits; the role of the state in contemporary capitalism, examining government's capacity to regulate, support, and sometimes even distort market mechanisms; and critical debates on the penetration of market values into civic life, probing the deeper question of what it means to live a good life in the 21st century. This course is not just for economists but for anyone aspiring to navigate and shape the intersection of business, policy, and society in an ethical and effective manner. "Reimagining Capitalism" invites students to critically engage with and contribute to the reimagining of capitalism as a force for good in the 21st century, offering insights into how it can be transformed to meet the needs of a rapidly changing world.

The course will be structured as follows. Each week will be taught by the same teaching fellow but a different lecturer with expertise in that specific area. The theme of each week covers a major area of debate concerning the nature of capitalism, its problems and how it might be potentially reformed.

- What is Capitalism?
- Workers and Labor in Capitalism
- Social Justice and Inequality
- Varieties of Capitalism
- Capitalism and Populism
- Cohesive Criminal Justice
- Corporations and their dominance
- ESG and Stakeholder Capitalism
- Social enterprises
- State regulation and innovation

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. Lectures are open to all students of LSE but seminars are only for students enrolled on the course.

Formative coursework: Two book reviews written without help from LLMs of 1200 words will be submitted as part of formative coursework. There will be no authorised use of generative AI for this course. Expectations and guidelines on plagiarism will be clearly communicated to students before the class to align expectations. We expect that any instances of breach of such rules will be detected through Turnitin.

Indicative reading:

- The Wealth of Nations, Adam Smith (1776)
- The Communist Manifesto, Engels & Marx (1848)
- Free: A Child and a Country at the End of History, Lea Ypi (2022)
- Why not socialism?, G.A. Cohen
- Why not capitalism?, Jason Brennan
- Deaths of Despair and the Future of Capitalism, Case & Deaton (2017)
- A Capitalism for the People: Recapturing the Lost Genius of American Prosperity, Zingales (2012)
- Reimagining Capitalism in a World on Fire, Henderson (2020)
- Private Government: How Employers Rule Our Lives (and Why We Don't Talk about It), Elizabeth Anderson (2017)
- Stakeholder capitalism: A global economy that works for progress, people and planet, Schwab, 2021
- The Case for Shareholder Capitalism, McLean (2023)
- "Climate change has made ESG a force in investing" (<https://www.economist.com/finance-and-economics/2019/12/07/climate-change-has-made-esg-a-force-in-investing>) The Economist (2019)
- "Inside the Revolution at Etsy," (<https://www.nytimes.com/2017/11/25/business/etsy-josh-silverman.html?searchResultPosition=3>) Gelles, The New York Times (2017)
- Fighting power with power: The administrative state as a weapon against concentrated private power, Bagg (2021)
- Efficiency, Legitimacy, and the Administrative State, DeCanio (2021)
- "Development as Capability Expansion", Sen (1989)
- Creating Capabilities, Nussbaum (2011)

Assessment: Essay (45%, 3000 words) in the period between AT and WT.

Class participation (15%).

Group presentation (40%) in the AT Week 10.

1 A country study elaborated by a group of 3 students and presented orally in class in week 10 of the class session in front of all the rest of the class involving also a Q&A (40% of the grade).

To prevent free-riding, each of the 3 students are to speak in the presentation. Their responses to the Q&A may also further influence their individual scores.

2 3000-word essay of 45% of the overall grade.

3 Class participation and discussion comprising 15% of the overall grade. Attendance will be marked and will comprise half of class participation. The remaining will be judged according to how regularly the student speaks during discussion and the support of those interventions in class readings.

A group of students will study a specific (not generic) aspect of the approach of one country (or the EU as relevant) to capitalism-health care in Singapore, Industrial Policy in Brasil, Pensions in Chile, merger policy in the EU, and aim to connect it to the problems and solutions discussed in the course.

PP432 Half Unit International Organisations, Policymaking and Diplomacy in a contested world

This information is for the 2024/25 session.

Teacher responsible: Professor Alexander Evans (CBG.5.29)

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The evolution of international policymaking within governments; the role of diplomatic services and Foreign Ministries; national security and intelligence services; the role of Presidential/Prime Minister's offices; the evolution of international organisations; regional and functional organisations; decision-making and governance in international organisations; the

interface between international and domestic policymaking; crisis management and response; international security architecture; delivering effect in international policy. The course will include guest speakers from practice (from the United Nations and national diplomats) and include worked case-studies of how international policymaking is applied in practice in different national and international contexts.

The course would be deliberately international and comparative in nature, drawing on different perspectives, traditions and cultural practices around international policy.

Teaching: 15 hours of lectures, 16 hours and 30 minutes of seminars and 3 hours of workshops in the WT.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the WT.

Students will submit very short outlines (bullet-points, limited to one page) for both the policy memo and essay for formative feedback prior to submitting the final written versions for summative assessment.

Indicative reading:

- Nicole Pelruth, *This Is How They Tell Me the World Ends* (2021)
- Kishen Rana, *160 Asian Diplomacy: The Foreign Ministries of China, India, Japan, Singapore, and Thailand* (2009)
- Paul Kennedy, *160 The Parliament of Man: The Past, Present, and Future of the United Nations* (2007)
- Sylvia Bashevkin, *Women as Foreign Policy Leaders* (2018)
- Ivor Roberts, *Satow's Diplomatic Practice* (2017)
- William Burns, *The Back Channel: 160 American Diplomacy in a Disordered World* (2017)

A detailed reading list will be developed for the course.

Assessment: Essay (60%, 3000 words) in the WT Week 10.

Policy memo (40%) in the WT Week 7.

PP433 Half Unit

Topics in Model Based Quantitative Analysis for Public Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Casey Kearney

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

Pre-requisites: Students must have completed Quantitative Approaches and Policy Analysis (PP455).

Requires successful completion or exemption from PP455 or an equivalent course.

Basic knowledge in R or an equivalent programming language is required. Students who do not have prior knowledge of R will be required to take an R module with the Digital Skills Lab.

Course content: This course provides a hands-on introduction to model-based inference strategies including prediction, forecasting models and applications of simulation analysis and Bayesian models. The course begins by distinguishing forecasting and prediction accuracy as distinct goals in statistical learning and the core ideas of training / testing splits, the bias-variance trade-off and measuring model accuracy. Initial weeks of the course will then focus on time series applications and survival models and censored data. Later lectures will then introduce simulation analysis as a tool and its applications in Bayesian data analysis and hierarchical models. Final weeks will cover MCMC techniques and their application to both time series switching models and Bayesian analysis. Basic models in text analysis will also be discussed if time permits. Lessons will include analysis of data sets from healthcare, education, and international finance applications.

Teaching: 20 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: Students will be expected to produce 1 problem sets in the WT.

The formative coursework will comprise a graded problem set.

Indicative reading:

- Gelman, Andrew, Jennifer Hill, and Aki Vehtari. *Regression and other stories*. Cambridge University Press, 2021.
- Gelman, Andrew, et al. *Bayesian data analysis*. Chapman and Hall/CRC, 1995.
- Kruschke, John. "Doing Bayesian data analysis: A tutorial with R, JAGS, and Stan." (2014).
- Cryer, Jonathan D., Kung-Sik Chan, and Kung-Sik. Chan. *Time series analysis: with applications in R*. Vol. 2. New York: Springer, 2008.
- James, Gareth, et al. *An introduction to statistical learning*. Vol. 112. New York: springer, 2013.
- Hyndman, Rob J., and George Athanasopoulos. *Forecasting: principles and practice*. OTexts, 2018.

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Project (30%, 2000 words) in the WT.

PP434 Half Unit

Automated Data Visualisation for Policymaking

This information is for the 2024/25 session.

Teacher responsible: Professor Richard Davies

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course explores ways of accessing large data sets to better understand the societies in which we live and ultimately to help guide policy decisions. The data we will encounter ranges from real-time measures of economic activity to micro data on local prices, to voting patterns and measures of pollution. We will use methods from programming and economics to work on real-world problems. Students will learn the theory and policy history that lies behind data types, visualisation methods, data mapping and machine learning. With these tools in place, we will use APIs to access data programmatically, build scrapers and batch downloaders using Python. Cleaned and verified data are stored on GitHub, with students' work visualised using live and interactive web pages.

Topics include empirical strategy design, fetching and scraping data, data cleaning and storage, visualisation and interactivity.

There is a focus on clear, replicable code that allows the automation of all these tasks in a policy setting. Students apply concepts of descriptive data analysis and may also use econometric techniques learned in parallel compulsory econometrics courses.

Teaching: 20 hours of lectures and 15 hours of seminars in the AT.

Formative coursework: Each week students have an opportunity to present workbooks and visualisations from their portfolio to their peers. This provides the opportunity both to present to peers and gain their feedback, and for each student to present their skills for formative assessment and feedback from the course instructors" as well as an opportunity to iron out bugs and learn coding best practices. This work is not graded.

Indicative reading:

- Tufte, E., 2007; *The Visual Display of Quantitative Information*, 2nd ed., Chapter 1 Graphical Excellence and Chapter 5: Chartjunk, Graphics Press LLC

- Mattmann, C.; A vision for data science. *Nature* 493, 473–475 (2013). <https://doi.org/10.1038/493473a>
- Heer, Jeffrey, Michael Bostock, and Vadim Ogievetsky. "A tour through the visualization zoo." *Communications of the ACM* 53.6 (2010): 59-67.
- Ferguson, A.; A History of Computer Programming Languages, Brown University, 2000, https://cs.brown.edu/~adf/programming_languages.html

Assessment: Project (80%) and portfolio (20%) in the AT Week 10. The course is graded via the production of a professional-grade Data Science website. The website may consist of as many pages as students choose. The grades are given based on two pages: a portfolio, and a project. All graded work must be embedded in the website, hosted by GitHub pages. Students are given detailed lessons on how to do this.

- Portfolio (20%). This page demonstrates the tools that students learn in a practical setting, by using them to embed charts and diagrams of various types. There are 10 challenges, each of them demonstrating 1-2 skills and resulting in embedding 1-2 charts. The total score for this work is 20%, split evenly across each of these challenges.

Portfolio skills include: Building a web site, Embedding a live visualisation in a web site, Hosting data in the cloud, Editing and cleaning data, API-driven charts, Loops and APIs, Scrapers, Critical commentary on data, Advanced analytics, Interactivity.

- Project (80%). This page sets out the student's data science project. There are weekly on-line sessions in which students can discuss ideas with the teaching team. The project consists of between 5 and 8 charts, tables or visualisations. Students briefly discuss four topics: the aims, the data, analytical challenges, conclusions. Key marking criteria include: accessibility, empirical design, data approach, automation, interactivity, clarity of writing. The group sizes for seminars will be a maximum of 30 students. The course portfolio and project are handed in together, at the end of week 10.

PP435 Half Unit Trade Policy and Development

This information is for the 2024/25 session.

Teacher responsible: Dr David Luke (Firoz Lalji Institute for Africa, 8th Floor Pethick-Lawrence House)

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit.

Priority will be given to SPP students.

Pre-requisites: This is a course in trade policy from a development perspective rather than a course in international economics or trade economics. The course offers insights into trade theory but use of or familiarity with mathematical models related to trade theory is not required.

Course content: This course examines the role of trade policy in shaping development outcomes. Trade policy is understood to be the set of practices, strategies, laws, regulations, agreements and institutions that govern international trade or imports and exports of goods and services between countries. The course applies a political economy approach to trade policymaking and analysis at the country level. This takes into consideration the interests, ideologies and values underlying agenda-setting, implementation and the results of trade policy. These are key factors against which trade policy can be assessed in relation to sustainable and inclusive development.

The course begins with an overview of the theoretical foundations of comparative advantage, specialization, and new trade theory.

The gains (and losses) that can be derived from trade form part of this overview to explain why trade matters for development, the thematic emphasis of the course. This is followed by an assessment of the structure of global trade flows over the last eight decades to uncover changing and enduring patterns of specialization in international trade and their relationship to development outcomes. Case studies drawn from the Global South are utilized to illustrate this relationship. An aspect of specialization that is brought into focus for its broad development implications is the so-called 'natural resource curse'. Data sources and their limitations and how to use the main databases on trade flows is explained. The role of bilateral, regional, and global trade agreements in changing and shaping specialization is assessed. Emerging trends including embedding normative concerns such as labour standards, gender equality, climate and environmental sustainability in trade agreements are explored. Key principles for negotiating trade agreements are reviewed and a trade negotiation simulation exercise is carried out for which marks are awarded. In concluding the term, the material covered during the lectures and seminars will be synthesized with emphasis on agency and the interactive dynamic of actors such as governments, business, and civil society and the coalitions and factions within and between them, in shaping and reshaping comparative advantage and specialization.

Teaching: 15 hours of lectures and 18 hours of seminars in the AT. 2 hours of seminars in the ST.

- The workshop will be devoted to a trade negotiation simulation exercise.
- A reading week will be observed during the sixth week.
- One seminar will be devoted to revision of course material and held towards the end of the spring term in preparation for the spring exam.

Formative coursework: 1000 words formative essay on the political economy of trade policymaking at country level and taking insights from new trade theory into account. No marks are awarded for this essay but detailed feedback will be provided.

- Jones, E. *Negotiating against the Odds: A Guide for Trade Negotiators from Developing Countries*. Palgrave Macmillan. 2013.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Report (35%) and group exercise (15%) in the AT.

- 2-hour exam during the spring exam period exam requiring two essay-type questions to be answered from a choice of five questions. This is worth 50%.
- 3,000 words report outlining the trade policy of a developing country drawn from research on the political economy and related information about the country and explaining the strategy for implementation and monitoring the expected outcomes. 160 This is worth 35%.
- Group work on a practical trade negotiation simulation exercise

and an individual report on lessons learned from the exercise.160
The individual report is worth 15%.160

PP440

Micro and Macro Economics (for Public Policy)

This information is for the 2024/25 session.

Teacher responsible: Professor Luis Garicano and Dr Ethan Ilzetzki

Availability: This course is compulsory on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-University of Toronto), MPA in Data Science for Public Policy and Master of Public Administration. This course is available on the MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo) and MSc in Political Science (Political Science and Political Economy). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places after students for whom it is compulsory have been accommodated (it is controlled access). Priority is given to students from the School of Public Policy, students from other programmes will be considered if places remain.

Course content: This course is an introductory graduate course providing an economics background suitable for high-level public policy-making. The emphasis is on acquiring sound models and methods suitable for appraising policy-making issues in a wide variety of contexts. The first term covers microeconomics and the second term covers macroeconomics.

Autumn Term (Microeconomics): competitive markets and economic efficiency; consumer optimisation and the demand for goods; firm optimisation and the supply of goods; market power; externalities in consumption and production; optimal provision of public goods; and asymmetric information

Winter Term (Macroeconomics): understanding macroeconomic data; long-run economic growth; business cycles; aggregate demand; money, inflation and monetary policy; stabilization policy; fiscal policy and government debt; the labour market and unemployment; exchange rates and international economic policy; the financial system and the macroeconomy.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 60 hours across Autumn Term and Winter Term and week 1 of Spring Term.

Formative coursework: Students will complete weekly problem sets. Some of these will be marked to provide indicative assessment.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Exam (70%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

Policy memo (10%) in the AT.

Policy memo (10%) in the WT.

Continuous assessment (10%) in the AT and WT.

PP448 Half Unit

International Political Economy and Development

This information is for the 2024/25 session.

Teacher responsible: Dr Lloyd Gruber

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is

available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the School of Public Policy, students from other programmes will be considered if places remain.

Course content: Whenever experts get together to debate development policy, the questions that get them most excited – the questions we are used to hearing them argue about – are ‘should’ questions. What policies should a country’s government be adopting (or discarding) to stimulate growth and reduce poverty? Which new trading arrangements or foreign aid strategies should policymakers in the industrialised world be pursuing to help poorer countries succeed? What new policy measures should world leaders be implementing today to address climate change in the future? Yet even when the answers offered by the experts align and it’s clear to everyone, not just the experts, what new policies are urgently required, the relevant political players – the people who hold positions of power – just keep doing what they have always done, which is the very thing the experts tell them they should not be doing. The problems get worse. The crises deepen. And still, year after year, election cycle after election cycle, the ‘necessary’ evidence-based reforms being urged on politicians get nowhere. All these experts may be well intentioned. The experts may also be right. The policy proposals they’re advocating may be every bit as urgent and necessary as the experts say they are. If implemented effectively, these measures really would improve the living standards of poor families. Or they would reduce greenhouse gas emissions. Or they would incentivise underperforming schools and universities to lift their games. Or they would spare civilians caught up in a bloody war of attrition. All of this may be true, but that doesn’t mean any of these proposals will get adopted in time to make a difference. Most will never make it onto the political agenda, let alone into legislation that endures for long enough to improve people’s lives.

Rather than let this reality be a source of frustration, students who take this course will come away with a deeper understanding of the political incentives that drive the process of development forward, or sometimes backwards, in the real world. Although evidence-based policy reforms may not get adopted as often as we might like, positive changes do happen occasionally. We need to understand the political roadblocks and minefields that keep those reforms from getting through the system most of the time, but also why, every now and then, good development policies do burst through – and we are all the better for it.

PP448 students will be exposed to a wide variety of political economy concepts along the way, a theoretical toolkit we’ll use to understand several concrete cases of development management and mis-management. If you are ever in a position to improve the way developing countries deliver public services, these theories can tell you how to go about it, or (to back up a step) they can tell you what you’d need to do to put yourself in that position, to make yourself an important development policymaker. Do good development outcomes require democratic institutions, or can autocratic regimes deliver similar results? And what about international regimes? Do supranational entities like the World Bank, the United Nations and the World Trade Organization really benefit all nations, or just rich ones? Some would argue that geopolitics is the real driver of development. If so, what does that mean for the world’s poor? Are they trapped in a global balance of power that favours wealthier nations, or is China’s rise a global game-changer?

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Autumn Term.

Formative coursework: Every student will deliver one practice presentation during the first several weeks of the course. Students will receive feedback on the substance of these presentations as well as their delivery (presentations will be videoed where possible). Each student will also be invited to submit an individually-authored ‘practice’ policy memo.

7. Elize Massard da Fonseca, Kenneth C. Shadlen, and Helena de Moraes Achcar, 'Vaccine Technology Transfer in a Global Health Crisis: Actors, Capabilities, and Institutions', *Research Policy*, vol. 52, no. 4 (2023).

Assessment: Presentation (20%) and policy memo (20%) in the AT. Take-home assessment (60%) in the WT.

PP449 Half Unit Comparative Political Economy and Development

This information is for the 2024/25 session.

Teacher responsible: Dr Tasha Fairfield

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in Economic Policy for International Development, MSc in Health and International Development, MSc in International Development and Humanitarian Emergencies, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the School of Public Policy, students from other programmes will be considered if places remain.

Course content: This course examines key issues in comparative political economy, with an emphasis on developing countries and the politics of policymaking. Who get the policies they want, when, and how? Throughout, we will pay close attention to actors, interests, institutions, and power. Understanding the politics of policymaking is critical for development specialists and policy practitioners. Policies recommended by technical experts are not always politically feasible, and progress may require implementing second-best solutions. Moreover, approaches that work in one case may not work in another. Drawing on real-world examples from a range of policy domains including taxation and social spending, we will discuss strategies for enacting pro-development reforms that might otherwise be politically infeasible. The course will also introduce students to key issues in conceptualization and measurement by examining indices and indicators of governance and democracy that are widely used by development practitioners. Note: the subject matter complements material covered in PP448 and can be taken either in conjunction with, or separately from that course.

Upon completing the course, students can expect to (1) be able to critically engage with the key debates in comparative politics and development, (2) be able to identify political constraints that may impede implementation of pro-development policies, (3) apply political economy theories to explain 'real world' cases of development policy successes and failures, and (4) design strategies that can help make pro-development policies more

politically feasible in a given country context.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 38 hours across Winter Term.

Formative coursework: Students will receive feedback on formative assignments in seminars that will prepare them for the assessed DPA at the end of the term.

The revision session in Winter Term will prepare students for the take-home assessment.

Indicative reading: 1 Jeffrey Winters, 2013, 'Oligarchy and Democracy in Indonesia', *Indonesia* 96, pp.11-33

2 Thachil, Tariq, 2011, 'Embedded Mobilization: Non-State Service Provision as Electoral Strategy in India', *World Politics* 62 (3): 434-469

3 Andrei Shleifer and Daniel Treisman, 2000, 'Without a Map: Political Tactics and Economic Reform in Russia', Cambridge: MIT Press

4 Tasha Fairfield, 2013, 'Going Where the Money Is: Strategies for Taxing Economic Elites in Unequal Democracies', *World Development* 47 (July), pp.42-57

Assessment: Project (40%) in the WT.

Take-home assessment (60%) in the ST.

All students will be required to take part in a Development Policy Application (DPA) project stretching over several weeks of the course. An issue of major importance to developing countries will be introduced early in the term. Students will be assigned into small groups, and each group will pick a country of its choice for the project. The DPA will count for 40% of the course mark. A take-home assessment will be given in the Spring Term. This will count for 60% of the course mark.

PP450 Half Unit Not available in 2024/25 Public Organisations: Theory and Practice

This information is for the 2024/25 session.

Teacher responsible: Prof Adnan Khan and Prof Timothy Besley

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, MSc in Economic Policy for International Development, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the School of Public Policy, students from other programmes will be considered if places remain.

Pre-requisites: Some understanding of economics and quantitative methods is desirable.

Course content: The course will offer students the analytical frameworks and practitioners' knowhow for understanding public organisations and the challenges in design and implementation of public policies. Public organisations are key determinants of state capacity and this course will draw primarily on social science, primarily economics and political economy to understand these.

The lectures will take different views of public organisations: a micro, personnel-economics view; an organizational level perspective; and a heterodox approach drawing on the recent literature from several disciplines on identity, values and norms.

The seminars will have an applied focus and will deal with intractable public policy problems and unpack reasons why it is so difficult to design and implement effective public policies. The group work during seminars will use a systematic and structured framework to identify pressing policy problems, diagnose the underlying causes of these problems using evidence, and design, test, implement and refine policy innovations. There will be a lot of emphasis on learning-centric approaches to transforming public

organisations and to diagnosing and dealing with the challenges of policy implementation and political authorisation and the skill sets needed to address these challenges.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 35 hours across Winter Term.

Formative coursework: Students will be provided regular and weekly feedback on their group work during WT.

Indicative reading: Key readings:

- Timothy Besley, Robin Burgess, Adnan Khan and Guo Xu. (2021). *Bureaucracy and Development*. Annual Review of Economics. Forthcoming.
- Besley, Timothy and Torsten Persson. 2014. "The Causes and Consequences of Development Clusters: State Capacity, Peace and Income". Annual Review of Economics. Volume 6:927-949.
- Finan, Frederico, Benjamin Olken, and Rohini Pande. 2015. "The Personnel Economics of the State", *The Handbook of Field Experiments*.
- IGC Evidence Paper. 2019. "State Effectiveness"
- Cristina Corduneanu-Huc, Alexander Hamilton and Issel Masses Ferrer. 2012. "Understanding Policy Change: How to Apply Political Economy Concepts in Practice." Washington D.C.: World Bank Publications.
- Andrews, M., L. Pritchett & M Woolcock. (2017). *Building State Capability: Evidence, Analysis, Action*. Oxford University Press.
- Parkhurst, Justin. 2017. "The politics of evidence: from evidence-based policy to the good governance of evidence". Routledge Studies in Governance and Public Policy.

Assessment: Essay (60%) in the period between WT and ST.

Group assignment (40%) in the WT.

The group assignment (40%) will consist of a presentation and policy brief.

PP452 Half Unit

Applying Behavioural Economics for Social Impact: Design, Delivery, Evaluation and Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Nava Ashraf

Availability: This course is available on the Double Master of Public Administration (LSE-Sciences Po), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy and Master of Public Administration. This course is not available as an outside option.

This course is only available to students in the second year of the MPA programme. This course has a limited number of places (it is controlled access) and demand is typically very high.

Pre-requisites: A rigorous understanding of statistics, economics and econometrics is important for this course, in order to be able to absorb the economics journal articles and methods covered. Students will be required to have achieved marks of 55 or higher in PP440 and PP455 to be eligible for the course. Students with marks of 50-54 in PP440 and PP455 will be considered on a case by case basis.

Course content: This course delivers insights from cutting edge research in psychology and economics, and asks students to use these insights to design solutions to significant social challenges. Students learn how to diagnose, design, deliver, and rigorously test products and services using the principles of behavioural economics and the methods of field experimentation.

The course begins by describing the principle of coproduction: outcomes in health, education and similar fields are not simply given to end-users, but are produced by end-users themselves, interacting with supply-side factors. Drawing on the insights from behavioural economics and using qualitative methods, students learn how to diagnose end-user needs, preferences and behaviour. The course then explores how the psychological aspects of behaviour can be combined with the tools and structure of economics to induce behaviour change and improve

outcomes, including the challenge of setting prices and designing incentives. Throughout the course there is emphasis upon the critical importance of effective measurement in the context of the social sector, where traditional market feedback mechanisms are typically absent and where mission-driven leaders' evaluation of organisational impact can itself be subject to cognitive bias and distortion. Appropriate measurement in turn informs improvements in diagnosis and design. The course concludes by exploring policy impact and how research can be translated into policy action. Real world case studies are used at every stage of the course.

This course is relevant to all those who wish to improve the effectiveness of social interventions and programmes across a range of diverse fields, whether such interventions are administered through the state or, increasingly, through private philanthropy and social entrepreneurship.

Teaching: This course is delivered through a combined lecture-seminar format totalling a minimum of 30 hours in Autumn Term. There will also be a drop-in weekly technical support session.

Formative coursework: Additional exercises which will include preparation of an essay of the discussion questions for HBS-style case discussion.

Indicative reading: There is no single textbook for the course. For an introduction to the field of behavioural economics, students should consult *Nudge: Improving Decisions About Health, Wealth, and Happiness*, by Richard Thaler and Cass Sunstein (2009, Penguin) and *Thinking, Fast and Slow*, by Daniel Kahneman (2012, Penguin). We will also be reading several scientific articles from top-tier economics journals. A full reading list with the readings for each topic will be made available at the beginning of the course.

Assessment: Project (70%), presentation (10%) and class participation (20%) in the AT.

The project (worth 70%) will consist of a group exercise developed over the duration of the term addressing a real world problem using tools from the course.

20% will be based on in-class participation and 10% for a presentation.

PP454

Development Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Gharad Bryan SAL.3.10

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

Students may not take both this course and EC428 Development and Growth. This course has a limited number of places (it is controlled access) and demand is typically very high.

Pre-requisites: The expectation is that students will have previously taken PP440 and PP455 or other equivalent courses. Students who have not taken PP440 and PP455 (including MPA Dual and Double Degree students spending Year 2 at LSE) will require permission from the course lecturer to attend the course.

Course content: In this course, students will apply their understanding of economics and econometrics to the task of policy making in developing countries. The focus is on acquiring the necessary theoretical and empirical skills to engage in the rigorous analysis of public policies in developing countries. Topics at the forefront of development economics will be covered. These include political economy, trade liberalization, growth, access to finance, technology adoption, education, health, infrastructure, property rights, land reform, gender, environment, mass media and political accountability. The emphasis will be on combining theory and data to evaluate the effectiveness of policies in these different areas.

Teaching: This course is delivered through a combination of lectures and classes totalling 40 hours of lectures and 20 hours of classes in the Autumn Term, Winter Term and week 1 of Spring Term.

Formative coursework: Students to complete weekly exercises based on course readings with one of these exercises being marked in a given term.

Indicative reading: A reading list will be distributed at the start of the course.

Assessment: Exam (60%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

Essay (40%, 2000 words).

PP455

Quantitative Approaches and Policy Analysis

This information is for the 2024/25 session.

Teacher responsible: Prof Mark Schankerman and Dr Jeremiah Dittmar

Availability: This course is compulsory on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-University of Toronto), MPA in Data Science for Public Policy and Master of Public Administration. This course is available on the MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS) and MPA Dual Degree (LSE and Tokyo). This course is not available as an outside option.

Course content: The course introduces students to regression-based methods used for the quantitative evaluation of public policies. The course introduces students to basic multiple regression analysis including hypothesis testing, modelling of non-linear relationships, and dummy variables. From there, the course covers a number of regression based evaluation methods to assess the causal effectiveness of policy interventions. These include the use of randomized experiments, natural or quasi-experiments, panel data, difference-in-differences estimation, instrumental variables, matching and regression discontinuity design.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 60 hours across Autumn Term and Winter Term.

Formative coursework: Formative coursework will include weekly problem sets

Indicative reading: Particularly useful textbooks are Joshua D. Angrist and Jom-Steffen Pischke, "Mastering Metrics"; James Stock & Mark Watson, "Introduction to Econometrics"; and Jeffrey Wooldridge, "Introductory Econometrics". The material in the textbooks will be complemented with recent research papers and chapters from other books. A complementary text, which is also available in an online version, is Scott Cunningham's "Casual Inference: The Mixtape" which is a good reference to gain intuition about some of the core causal methods we will study. A full reading list will be distributed at the beginning of the course.

Assessment: Exam (70%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

Presentation (10%), policy memo (10%) and continuous assessment (10%) in the WT.

PP456 Half Unit

Quantitative Approaches and Policy Analysis

This information is for the 2024/25 session.

Teacher responsible: Prof Mark Schankerman

Availability: This course is compulsory on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-University of Toronto), MPA in Data Science for Public Policy and Master of Public Administration. This course is available on the MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS) and MPA Dual Degree (LSE and Tokyo). This

course is not available as an outside option.

This course is only compulsory for students who demonstrate sufficient prior knowledge of Econometrics to be exempt from the first half of PP455 in Autumn Term.

Course content: The course introduces students to a number of regression-based, quantitative evaluation methods to assess the causal effectiveness of policy interventions. These include randomized control trials, both natural or quasi-experiments, panel data, matching methods, difference-in-differences estimation, instrumental variables, and regression discontinuity design.

Teaching: This course is delivered through a combination of lectures and classes totalling a minimum of 30 hours across the Winter Term.

Formative coursework: Formative coursework will include weekly problem sets

Indicative reading: Particularly useful textbooks are Joshua D. Angrist and Jom-Steffen Pischke, "Mastering Metrics"; James Stock & Mark Watson, "Introduction to Econometrics"; and Jeffrey Wooldridge, "Introductory Econometrics". The material in the textbooks will be complemented with some recent published articles. A complementary text, also available in an online version, is Scott Cunningham's "Casual Inference: The Mixtape." This is a good reference to gain intuition about some of the core causal methods we will study. A full reading list will be distributed at the beginning of the course.

Assessment: Exam (70%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.

Presentation (10%), policy memo (10%) and continuous assessment (10%) in the WT.

PP465 Half Unit

City-Making: the Politics of Urban Form

This information is for the 2024/25 session.

Teacher responsible: Dr Philipp Rode FAW.8.01i and Dr Savvas Verdis PEL.8.02B

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MSc in City Design and Social Science, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po), Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Priority will be given to students on the MSc in City Design and Social Science for whom the course is an 'optional core course' and School of Public Policy students. Places will be allocated based on a written statement. This may mean that not all students who apply will be able to get a place on this course.

Course content: This case study-led course provides a critical understanding of major urban development initiatives and programmes in international city contexts. It is designed for students with a particular interest in urban development practices and how these connect with broader political debates. It will introduce students to the following knowledge and skills

- general understanding of political theories underlying urban development models
- ability to situate major urban development initiatives within different development cultures and socio-economic policy agendas
- understanding the role of public, private and third party actors and formal and informal urban development processes
- perspectives on decision making at the strategic, pre-design stage for urban development initiatives and ability to relate urban policy to spatial outcomes, operating at different scales
- knowledge of key evaluation approaches and analytic frameworks used in the analysis of proposed and existing urban

developments

- understanding of how urban development objectives, phases and processes can be integrated and how policy making, economic development, urban planning, city design, architecture, and engineering are related.

The course content is based on contemporary projects and urban trends examined in the context of cities throughout the world. These range from policies such as congestion charging (London) and Progressive City Development (Medellin) to urban development trends such as extreme urbanism in Mumbai and privatist planning (Canary Wharf, London and Santa Fe, Mexico City). Such projects will be examined through critical frameworks that include utilitarianism, cost benefit analysis, social and environmental justice, citizenship theory and the capabilities approach. The course will focus on negotiation, politics, financing, appraisals and decision-making for cities. Seminars and assessed project work for the course will be based on the analysis of Development Strategies and City Design briefs.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in WT.

Formative coursework: 1 x contribution to student debate OR 1 x critical statement following a guest lecture AND submission of a 1,000 word position statement.

Indicative reading:

- Fainstein, Susan S. (1999). Can we make Cities we want? In *The Urban Moment*, ed. Sophie Body-Gendrot and Robert Beauregard. Thousand Oaks: Sage.

Assessment: Project (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Spring Term.

Attendance at all classes and submission of all set coursework is required.

PP478

Political Science for Public Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Lloyd Gruber

Dr Alexandra Cirone

Availability: This course is compulsory on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-University of Toronto), MPA in Data Science for Public Policy and Master of Public Administration. This course is available on the MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS) and MPA Dual Degree (LSE and Tokyo). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places after students for whom it is compulsory have been accommodated (it is controlled access). Priority is given to students from the School of Public Policy, students from other programmes will be considered if places remain.

Course content: This course develops tools to help students understand, negotiate, and (where possible) improve the political context of policymaking. Harnessing the power of modern political science, the course examines a wide range of political phenomena, everything from voting behaviour and political mobilisation in democratic elections to authoritarian politics, ethnic conflict, decentralised governance, and the politics of climate change. The course combines a review of the main empirical regularities in each of these areas with an introduction to key theoretical arguments about the political institutions 'in play' and how they shape strategic behaviour. The course also surveys a selection of current policy challenges and considers how our new theoretical and empirical tools can help students analyse and address them.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 60 hours across Autumn Term and Winter Term.

Formative coursework: Every student will deliver one practice presentation during Autumn Term.

Indicative reading:

- W.R.Clark, M. Golder and S.N.Golder (2018), *Principles of Comparative Politics*, 3rd Edition, CQ Press.
 - E. Bueno de Mesquita (2016), *Political Economy for Public Policy*, Princeton University Press
- These books provide excellent starting points and can be used as references for many topics. A full reading list will be provided at the beginning of the course
- Assessment:** Exam (60%, duration: 3 hours, reading time: 15 minutes) in the spring exam period.
Essay (20%) in the AT.
Presentation (20%) in the WT.

PP4B3

MPA Capstone Project

This information is for the 2024/25 session.

Teacher responsible: Professor Richard Davies

Availability: This course is compulsory on the Double Master of Public Administration (LSE-Sciences Po), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo) and Master of Public Administration. This course is not available as an outside option.

Course content: Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation. Typical clients include public sector bodies, private sector companies, international organisations, think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem. The Capstone will enable students to develop and strengthen organisational, analytical report writing, and group working skills.

Teaching: This course is delivered through help sessions totalling a minimum of 5 hours during the year.

These sessions provide guidance and advice on planning and managing the Capstone process and maintaining effective and fair group work. Each Capstone group will be allocated a supervisor, who will provide guidance on the project's development and assistance with client liaison. Other members of staff may also advise as required.

Formative coursework: Feedback will be provided on work-in-progress during Capstone group meetings in Autumn and Winter Terms.

Indicative reading:

- Policy analysis: William N. Dunn, *Public Policy Analysis: An Integrated Approach* (Routledge, 2018); Eugene Bardach and Eric M. Patashnik, *A Practical Guide for Policy Analysis* (Sage Publications, 2016); David L. Weimer and Aidan R. Vining, *Policy Analysis: Concepts and Practice* (Routledge, 6th edition, 2017); Sue C. Funnell and Patricia J. Rogers, *Purposeful Program Theory* (Jossey-Bass, 2011); Philip H. Pollock, *The Essentials of Political Analysis* (CQ Press, 2016)
- Report writing: John Bowden, *Writing a Report* 9th edition (How to Books, 2011); Stella Cottrell, *Dissertations and Project Reports: A Step by Step Guide* (Palgrave Study Skills, 2014).
- Group working: Laura Lipton, *Groups at Work: Strategies and Structures for Professional Learning* (Miravia, 2011); Brian A. Griffith and Ethan B. Dunham, *Working in Teams: Moving from High Potential to High Performance* (Sage, 1st edition, 2015).

Assessment: Project (100%, 15000 words) in the WT.

The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.

The group mark has three components:

- 1) 20% of the overall mark is assigned by the client organisation based on a group presentation and a submission of the project report.
 - 2) 50% of the overall mark is given by two academic readers upon submission of the project report; and
 - 3) the final 30% of the overall mark is allocated by the Capstone supervisor on the basis of the group's performance in terms of (i) scoping and project development (including coping with difficulties), (ii) group working and self-management as a team, and (iii) the overall output of the project (10% for each item).
- Additionally, each group member must complete the Capstone evaluation and feedback exercise. This will be submitted individually and separately from the report.

PP4B4 Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Alexandra Cirone and Dr Simon Bastow

Availability: This course is compulsory on the MPA Dual Degree (LSE and Hertie). This course is available on the Double Master of Public Administration (LSE-Sciences Po), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

Students may not take this course and PP4V8 Policy Paper.

This course is only available to MPA students in Year 2 of their programme.

Course content: The aim of this course is to enable students to plan, design and conduct independent substantial research in an area of public policy. Students will write a dissertation of no more than 10,000 words on a topic of their choice to be agreed with their supervisor. The dissertation involves an evidence-based assessment of a concrete policy issue or problem in a specific setting. It must be concerned with the goal of policy improvement and, at the same time, it must contribute to a broader objective of knowledge-building. The main body of the dissertation should include literature review, methodology, results of the

analysis, discussion of findings, conclusions and implications for knowledge. Dissertations can utilise quantitative and/or qualitative data and information and draw on primary and/or secondary sources.

Teaching: This course is delivered through help sessions totalling a minimum of 3 hours in Autumn Term and 2 hours in Winter Term. These sessions provide academic and practical guidance on planning and writing the dissertation and offer an opportunity to ask questions. The student's supervisor will provide advice and guidance on this piece of work.

Indicative reading: Writing guidance:

- Inger Furseth, Euris Everett and Larry Everett, *Doing Your Master's Dissertation: From Start to Finish* (Sage Study Skills Series, 2013);
- Stella Cottrell, *Dissertations and Project Reports: A Step by Step Guide* (Palgrave Study Skills, 2014);
- Diana Ridley, *The Literature Review: A Step-by-Step Guide for Students* (SAGE Study Skills Series, 2008);
- Christopher Hart, *Doing a Literature Review* (SAGE Study Skills Series, 2018);
- Sharon M. Ravitch and J. Matthew Riggan, *Reason and Rigor: How Conceptual Frameworks Guide Research* (2nd edition, Sage Publications, 2016).

Research methods:

- Catherine Hakim, *Research Design: Successful Designs for Social Economics Research*, 2nd ed. (Routledge, 2000);
- Joseph A. Maxwell, *Qualitative Research Design* (3rd edition, Sage, 2013);
- Alan Bryman, *Social Research Methods*, 5th ed. (Oxford University Press, 2015);
- David Partington, *Essential Skills for Management Research* (Sage Publications, 2002).

Assessment: Dissertation (90%, 10000 words) in the ST.

Dissertation proposal (10%) in the AT.

- A 1,500 word dissertation proposal consisting of the title, abstract, research question, research justification, feasibility of the dissertation topic, choice of literature and an explanation of sources, proposed research design and methods, and provisional structure will count for 10% of the overall dissertation mark. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.
- The full dissertation of no more than 10,000 words will account for the remaining 90% of the overall mark.

PP4B5 Capstone Project: MPA - Data Science for Public Policy

This information is for the 2024/25 session.

Teacher responsible: Professor Alexander Evans

Availability: This course is compulsory on the MPA in Data Science for Public Policy. This course is not available as an outside option.

Course content: Students will undertake a group project (in teams usually of 3 to 6 people) relating to a public policy problem faced by an external organisation that can be meaningfully tackled with quantitative and data science tools. Typical clients include public sector bodies, private sector companies, international organisations, think tanks and NGOs. The group will have from October to March to work on an issue defined by the client organisation, investigating and developing a workable solution to the problem. The Capstone will enable students to develop and strengthen organisational, analytical report writing, and group working skills.

Teaching: This course is delivered through help sessions totalling a minimum of 5 hours across Autumn Term.

These sessions provide guidance and advice on planning and managing the Capstone process and maintaining effective and fair group work.

Each Capstone group will be allocated a supervisor, who will provide guidance on the project's development and assistance with

client liaison. Other members of staff may also advise as required.

Formative coursework: Feedback will be provided on work-in-progress during Capstone group meetings in Autumn and Winter Terms.

Indicative reading: A detailed list of learning resources will be provided by the instructor prior to the start of the AT. Helpful readings include:

- Policy analysis: William N. Dunn, *Public Policy Analysis: An Integrated Approach* (Routledge, 2018); Eugene Bardach and Eric M. Patashnik, *A Practical Guide for Policy Analysis* (Sage Publications, 2016); David L. Weimer and Aidan R. Vining, *Policy Analysis: Concepts and Practice* (Routledge, 6th edition, 2017); Sue C. Funnell and Patricia J. Rogers, *Purposeful Program Theory* (Jossey-Bass, 2011); Philip H. Pollock, *The Essentials of Political Analysis* (CQ Press, 2016)
- Report writing: John Bowden, *Writing a Report* 9th edition (How to Books, 2011); Stella Cottrell, *Dissertations and Project Reports: A Step by Step Guide* (Palgrave Study Skills, 2014).
- Group working: Laura Lipton, *Groups at Work: Strategies and Structures for Professional Learning* (Miravia, 2011); Brian A. Griffith and Ethan B. Dunham, *Working in Teams: Moving from High Potential to High Performance* (Sage, 1st edition, 2015).

Assessment: Project (100%, 15000 words) in the WT.

The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances. The group mark has three components:

- 1 20% of the overall mark is assigned by the client organisation based on a group presentation and a submission of the project report.
- 2 50% of the overall mark is given by two academic readers upon submission of the project report; and
- 3 the final 30% of the overall mark is allocated by the Capstone supervisor on the basis of the group's performance in terms of (i) scoping and project development (including coping with difficulties), (ii) group working and self-management as a team, and (iii) the overall output of the project (10% for each item). Additionally, each group member must complete the Capstone evaluation and feedback exercise. This will be submitted individually and separately from the report.

PP4E4 Half Unit Not available in 2024/25

Analytic frameworks for policy evaluation

This information is for the 2024/25 session.

Teacher responsible: Dr Christine Cote and Prof Richard Bevan

Availability: This course is available on the CEMS Exchange, Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo) and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority will be given to students from the Department of Management's MSc programmes for any outside option spaces.

Pre-requisites: Students must have previously studied microeconomics.

Course content: The course will focus on concepts and cases relevant to understanding how to assess costs and benefits of policy options to enable governments to make hard choices. This entails accounting for: costs and benefits across different criteria and at different times, risk and uncertainty, and distributional effects; and designing evaluation to relate to the political process of making decisions.

The course examines three methods of evaluation: cost benefit analysis (CBA), cost effectiveness analysis (CEA), multicriteria decision analysis (MCDA). It explains the principles of each

method and examines case studies to show their strengths and weaknesses. The aim is for students to learn that, for policy analysis, that the concepts of micro-economics are necessary but not sufficient by relating the issues that emerge from the case studies to major intellectual arguments of the 20th Century. These are arguments over the nature of science, positivism, power, efficiency, equity, and justice. The objective is for students to learn what characterises policy analysis that is likely to succeed or fail in enabling governments to make hard choices.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT.

Formative coursework: Students will be expected to produce 2 pieces of coursework in the AT.

A presentation as a member of a seminar group in the second week of term.

A detailed essay plan on two pages with introduction, one key paragraph and conclusion written in full on the principle of using markets to assess costs and benefits and problems with this approach.

Indicative reading: The course text is D M Hausman and M S McPherson, *Economic Analysis, Moral Philosophy and Public Policy*, Cambridge University Press, 2006.

Extracts from standard texts on methods of economic appraisal:

- HM Treasury, *The Green Book. Appraisal and Evaluation in Central Government*, TSO, 2011
 - A Boardman, D Greenberg, A Vining, D Weimer, *Cost-Benefit Analysis: concepts and practice*, (4th Edition) Harlow: Pearson Education, 2014
 - P Goodwin, G Wright, *Decision Analysis for Management Judgment* (5th edition) Chichester: John Wiley and Sons, 2014
- Material on cases studies including:
- N Stern, *Why are we waiting?: The logic, urgency, and promise of tackling climate change*, MIT Press, 2015.
- Extracts from classic works of leading scholars including:
- J Rawls, *A Theory of Justice*, Oxford University Press, 1971
 - T S Kuhn, *The Structure of Scientific Revolutions* (2nd edn), University of Chicago Press, 1972
 - IMD Little, *A Critique of Welfare Economics*, Oxford University Press, 1973
 - T C Schelling, *The Strategy of Conflict*, Oxford University Press, 1973
 - KR Popper, *Conjectures and Refutations*, Routledge and Kegan Paul (fourth edition), 1973
 - R Nozick, *Anarchy, State and Utopia*, Blackwell, 1974
 - N Daniels, *Just health care*. Cambridge: Cambridge University Press, 1990
 - D W Hands, *Reflection without Rules*, Cambridge: Cambridge University Press, 2001
 - S Lukes, *Power: A Radical View*, 2nd edn, Palgrave, 2005.

Extracts from official reports and published papers.

Assessment: Essay (50%, 3000 words) in the WT.

Group presentation (20%) and policy brief (30%) in the AT.

The essay will be a critique of the methods used in a case study relevant to an issue in the student's country.

There will be four group presentations as a member of a seminar group in the weekly seminars.

There will be a policy brief for a minister on a hard choice.

PP4E5 Half Unit

Innovations in the governance of public services delivery

This information is for the 2024/25 session.

Teacher responsible: Dr Simon Bastow and Professor Gwyn Bevan

Availability: This course is available on the CEMS Exchange, Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual

Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, MSc in Management (1 Year Programme), MSc in Social Innovation and Entrepreneurship, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines innovations in different models of governance (defined broadly as the overarching mechanisms) that organise the delivery of public services. We look at variations across three key governance models in particular, 'hierarchy, markets and networks' in recent decades, and assess their strengths and limitations. We examine their application in both developed and developing countries, to a wide range of core public services, including healthcare, education, criminal justice, transport, public utilities, urban regeneration, reducing carbon emissions to 'net-zero', and others.

Many public services have seen a broad global shift from traditional hierarchical bureaucracies towards markets and networks. Many countries have experienced, and will continue to experience, extensive marketisation of public services and we cover key innovations and their impacts. Markets, in particular privatisation, create high-powered incentives to challenge inertia that can beset the public sector, however marketisation is no panacea: indeed the characteristics of some public services mean that this brings new risks and problems and governments have often struggled in recent decades with managing the consequent market failure. We look at the use of 'quasi-markets', voucher systems, full-scale privatisations, Private Finance Initiatives (PFIs) and Public-Private Partnerships (PPPs), Payment by Results (PBR) and Social Impact Bonds (SIBs), 'blended' models, and assess their impact on public services. We also look at innovations in networked, polycentric or collaborative forms of governance. A central theme of the course is the relationship between institutions and innovative mechanisms for change. Markets and networks offer a wide range of innovative mechanisms, but their success or failure is often determined by the institutional context in which they are implemented. History matters and outcomes are path dependent with radical changes possible in 'windows of opportunity'. Looking across different models of governance, the course will consider issues around optimisation of design and integration of models, and the impact of institutional path dependence on success and failure. We explore how to align new mechanisms for change with existing institutions in complementary ways.

The course draws on a range of disciplines and analytical approaches, including transaction cost economics, political science, institutional economics, and developments in behavioural economics. These include the economics of identity, 'reciprocal altruism' and the power of reputational mechanisms of 'naming and shaming' and 'naming and faming'. The lectures and seminars are organised to enable you to understand key theory/concepts through illustrative cases and discussion. The seminars are organised around group-based presentations.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 35 hours across Winter Term.

Formative coursework: Students will be expected to produce 1 piece of formative coursework in Winter Term - a 750-word essay plan.

Indicative reading: Students will be directed to key texts throughout the term. Course literature draws from public policy and governance, the economics of transaction costs and behavioural economics among other disciplines. Some indicative readings throughout the course include:

- Hirschman, AO. (1970) Exit, voice, and loyalty: Responses to decline in firms, organizations, and states. London: Harvard University press.
- M Barber. (2015) How to run a government so that citizens benefit and taxpayers don't go crazy, Allen Lane.
- Le Grand, J. (2007) The Other Invisible Hand: Delivering Public Services Through Choice and Competition, Princeton University Press.
- Williamson, OE (1975) Markets and Hierarchies, The Free Press.

- Williamson, OE (1985) The Economic Institutions of Capitalism: Firms, Markets and Relational Contracting, New York, The Free Press.
- North, D. (1990) Institutions, Institutional Change, and Economic Performance. Cambridge, Cambridge University Press.
- G A Akerlof, RE Kranton, (2010) Identity Economics: How Identities Shape Our Work, Wages, and Well Being. Woodstock: Princeton University Press.
- Oliver, A (ed.) (2013) Behavioural Public Policy, Cambridge: Cambridge University Press.
- Katz, B. & J. Bradley (2013), The Metropolitan Revolution: How Cities and Metros are Fixing our Broken Politics and Fragile Economy (Brookings Institution Press).
- Bowles, S. (2016) The Moral Economy: Why Good Incentives Are No Substitute for Good Citizens. Yale University Press.
- Bevan, G. (2023) How did Britain come to this? A century of systemic failures of governance. LSE Press.

Assessment: Essay (50%, 3000 words) in the ST. Presentation (20%) and policy brief (30%) in the WT. Presentations as a member of a seminar group in the weekly seminars (20%).

A policy brief about a proposed innovation in government, directed at the head of an organisation able to implement or influence government policy. (30%).

A research essay of 3,000 words critically examining governance and innovation in delivery of public services (50%).

PP4G3 Half Unit

Designing and Managing Change in the Public Sector

This information is for the 2024/25 session.

Teacher responsible: Dr Simon Bastow

Availability: This course is available on the CEMS Exchange, Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MBA Exchange, MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, MSc in Social Innovation and Entrepreneurship, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course examines important challenges for governments and public sector organisations in being able to design and manage transformative change in public services. Two key aspects of change are fundamental:

- the **instrumental** capacity of government to design and implement policy and programme change in coherent, sustainable and successful ways, and
 - the **adaptive** capacity of government to respond effectively to change in the external environment - e.g. global crisis, demographic shifts, digitisation, or changes in public opinion - and avoid problems of obsolescence or 'out-of-touch' policies.
- We look at this dual challenge across developed and developing country contexts, and across core areas of government policy and public services. The course is primarily about government and public sector, however an important element is looking at the capacity of governments to coordinate with private and third sectors in designing and managing transformative change. From the outset we discuss how governments can develop coherent responses to so-called 'wicked' public policy and management problems. These are often complex, multi-faceted and intractable problems that require well-designed and complementary measures. We look at the interplay of different governance factors such as the impact of politics, bureaucracy, culture, incentives and motivations, administrative capacity, amongst others, and explore the potential for and limitations on

transformative change. The course works through key aspects of holistic design: including strategy, culture, motivation and coordination, leadership, social-technical systems, resilience, and policy and organizational learning. There is strong emphasis on transformation through digital change.

The course aims to provide students with practical theory and concepts for designing coherent action in public services and the public sector. We look at these challenges primarily from the perspective of the senior government or public sector official, working at the interface of high politics, policy making, and operational delivery. The course will be useful for students who are interested in working **in** government, or for those who work in other 'social impact' roles that involve working closely **with** government and public authorities.

The syllabus draws on concepts from public policy, political science, institutional economics, and organizational and system design, and organizational behaviour. We cover a wide range of sectors and policy areas, particularly core areas of public sector services such as criminal justice, health, welfare, education and defence. The course emphasises dialogue between concepts and cases, and offers strong applied and practical relevance with experienced public sector practitioners involved in lecture slots.

Teaching: This course is delivered through a combination of pre-recorded video material, interactive lectures and seminars, totalling a minimum of 35 hours across Autumn Term.

Formative coursework: Students will receive feedback on group presentations in seminars in the AT.

Students will have the option to submit formative plans for both elements of the written summative assignments during the AT.

Indicative reading: There is no one set text for this course.

Students will be directed to key readings throughout the term. Some indicative readings include:

- Bason, Christian (2017), *Leading Public Design: Discovering Human-centred Governance*, (Policy Press: Bristol) Forthcoming in LSE Library
- H. Simon (1996), *Sciences of the Artificial*, 3rd ed. (Cambridge, MA: MIT Press)
- J. Roberts (2004), *The Modern Firm* (Oxford, Oxford University Press)
- P. Dunleavy, H. Margetts, S. Bastow and J. Tinkler (2006) *New Public Management is Dead: Long live digital-era governance*, *Journal of Public Administration Research and Theory*, 16, pp 467-494
- H. Mintzberg (1994), *The Fall and Rise of Strategic Planning*, *Harvard Business Review*, 72(1), Jan-Feb 1994 pp107-114
- Hood, Christopher (1998), *The Art of the State: Culture, Rhetoric and Public Management* (Oxford, Oxford University Press)
- Schein, Edgar H. (2010), *Organizational culture and leadership* (San Francisco, John Wiley & Sons Inc.)
- Brehm, J. and S. Gates (1999), *Working, Shirking and Sabotage: Bureaucratic Response to a Democratic Public* (Michigan, The University of Michigan Press)
- Heath, C. and N. Staudenmayer (2000), *Coordination Neglect: How Lay Theories of Organizing Complicate Coordination in Organizations*, *Research in Organizational Behaviour* 22: 155-193
- Hood, C. and Margetts, H. (2007), *The Tools of Government in the Digital Age* (Basingstoke, Palgrave MacMillan)
- G. Morgan (2006), *Images of Organization* (Sage)
- Weick, Karl. E. (1995) *Sensemaking in Organizations* (London, Sage)

Assessment: Project (40%) in the WT.

Presentation (20%) and case analysis (40%) in the AT.

Case analysis of 2,500 words by week 11 in the AT (40%).

Transformation design project (TDP) of 2,500 words by Week 3 in the Winter Term (40%).

Group presentation in seminars throughout the AT (20%).

PP4J2 Half Unit

New Institutions of Public Policy: Strategic Philanthropy, Impact Investment and Social Enterprise

This information is for the 2024/25 session.

Teacher responsible: Professor Jonathan Roberts, Marshall Institute, 9th Floor, Marshall Building (MAR.9.05)

Other teachers: Professor Sir Julian Le Grand and Professor Stephan Chambers, Marshall Institute

Availability: This course is available on the Double Master of Public Administration (LSE-Sciences Po), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

This course is only available to MPA students in Year 2 of their programme. This course has a limited number of places (it is controlled access) and demand is typically very high.

The course is a collaboration between the Marshall Institute and the School of Public Policy.

Course content: Private actions for public benefit - whether called philanthropy, charity, associationalism, social entrepreneurship or social business - have long been significant within societies. This arena of private action is currently experiencing both resurgence and disruption. This course takes a policy-oriented approach towards these new dynamics of private social action. It explores innovative mechanisms of financing, organisation and delivery, including impact investing, new coalitions for social impact (for instance, social impact bonds), venture philanthropy, social enterprise and the purpose-driven corporation. A central focus is the opportunity created by bringing together market and business mechanisms and the social – but also the consequent challenge and complexity of achieving social impact through hybrid organisations, hybrid funding streams and hybrid mechanisms of coordination. Cross-cutting themes are how to design incentive structures which respond to the complex web of motivations of actors in this field, and the organisational tension inherent in responding to double or triple bottom lines.

Using analytical frameworks drawn from economics, sociology and political economy, the course will critically evaluate the challenges and advantages of these emerging institutions and mechanisms. Examples of the types of question that we will investigate include: what is social enterprise? How can social enterprises support social innovation and impact? Can we combine financial return, social impact and environmental sustainability? Why should an organisation be a non-profit, for-profit or other ownership form? How can the state, market and private altruistic action combine to achieve social impact? How can we design organisations and structures which nurture and capitalise on values and altruism? What are the differences between the culture, practice and motivations of state, commercial and charitable organisations, and what are the consequent challenges of implementation and management in hybrid organisations? The answers to these questions are contested and the course seeks to give participants the critical skills to make their own determination.

Teaching: This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 34 hours across the Winter Term. Some asynchronous activities including short online videos and recorded interviews with expert practitioners may also be used.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Formative assessment will consist of a draft composition of 1,500 words to prepare for the summative coursework.

Assessment: Coursework (50%, 2500 words) in May.

Other (50%) in April.

The 'other' assessment is a social enterprise proposal of 2,000 words.

PP4J4 Half Unit Not available in 2024/25 Designing and Implementing Evidence-Informed Policies and Programmes

This information is for the 2024/25 session.

Teacher responsible: Dr Babken Babajanian

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is capped at 30 students. This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students from the School of Public Policy, students from other programmes will be considered if places remain.

Students from outside the School of Public Policy will need to have some previous policy experience.

Course content: The aim of this half-unit course is to help students develop knowledge, critical analysis and skills necessary for evidence-informed policy making. It will enable students to assess, analyse, interpret and use evidence to design relevant and effective interventions. The course particularly emphasises design and implementation arrangements that recognise the complexity of economic, social, institutional and political contexts and allow the promotion of social inclusion, diversity and gender equality in public policies. The course will equip students with the knowledge and skills to critically appraise how government agencies, international organisations and other actors generate and utilise evidence to design and implement policies and programmes. The course covers evidence generation and use during three main

stages of the policy cycle: policy design, implementation, and monitoring and evaluation. It introduces theory-based approaches and examines the use of social, gender, governance and political-economy analysis to inform policy design and implementation. It discusses the role of monitoring and evaluation in producing nuanced policy-relevant evidence.

The course draws on policies and programmes in the field of social policy and social development in a global context. In seminars, students will review and critically assess policy reports and research studies of actual policies and programmes. They will scrutinise different assessment tools developed and used by government agencies and international organisations (e.g. World Bank, ADB, Inter-American Development Bank) for gathering policy relevant evidence.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 27 hours across Michaelmas Term.

Formative coursework: 1. Seminar presentations on assigned topics and contribution to seminar discussions. Each student is expected to do at least one presentation.

2. An essay answering a pre-assigned question (800 words)

3. A short individually-authored policy report (1,000 words)

Indicative reading: Parkhurst, J. (2017) *The Politics of Evidence, From Evidence-based Policy to the Good Governance of Evidence*, Routledge: London and New York

Cartwright, N and J. Hardie (2012) *Evidence-Based Policy: A Practical Guide to Doing It Better*, Oxford University Press

Chaplin, D., Twigg, J. and E. Lovell (2019), *Intersectional approaches to vulnerability reduction and resilience-building*, ODI, London

Holmes, R. and N. Jones (2013) *Gender and Social Protection in the Developing World: Beyond Mothers and Safety Nets*, Zed Books: London and New York.

Fritz, V., Levy, B. and R. Ort (2014) *Problem-driven Political Economy Analysis: The World Bank's Experience*, *Directions in Development - Public Sector Governance*, World Bank: Washington, DC.

Assessment: Essay (30%) in the AT.

Policy report (70%) in the WT.

Students will be required to complete two assignments designed to support the main learning outcomes of the course:

1 An essay (30%), in which students answer a pre-assigned question, drawing on literature and course material (max 1,000 words). This assessment will support student learning of the main debates, issues and critiques and will help consolidate their disciplinary and methodological knowledge.

2 An individually-authored policy report (70%) drawing on relevant literature and course material (max 3,000 words).

This assessment will support students' ability to appraise policies and programmes; evaluate, analyse, interpret and use evidence; design analytical frameworks; prepare and present written critiques; and write policy reports.

PP4J5 Half Unit Not available in 2024/25 Fiscal Governance and Budgeting

This information is for the 2024/25 session.

Teacher responsible: Dr Joachim Weher

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, MSc in Political Science (Political Science and Political Economy), MSc in Public Policy and Administration, Master of Public Administration and Master of Public Policy. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course examines contemporary issues in

fiscal governance and public budgeting in OECD countries and elsewhere. The focus is on executive and legislative actors and the institutional structures within which they make budgetary choices. Following an introduction to theoretical approaches to the study of budgeting, topics include medium-term frameworks, top-down budgeting, fiscal rules and fiscal councils, performance budgeting, legislative budgeting, fiscal decentralisation, budget transparency, audit and accountability.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Autumn Term. This year teaching will be delivered in person where possible and where conditions allow.

Formative coursework: Students are expected to produce one formative essay in Autumn Term as practice for the exam.

Indicative reading:

- Alesina, A, C Favero and F Giavazzi (2019). *Austerity: When It Works and When It Does Not* (Princeton, NJ, Princeton University Press).
- Blyth, M (2013). *Austerity: The History of a Dangerous Idea* (Oxford, Oxford University Press).
- Hallerberg, M, R Strauch, and J von Hagen, (2009). *Fiscal Governance in Europe* (Cambridge, Cambridge University Press)
- Allen, R, R Hemming, and B Potter, eds (2013). *The International Handbook of Public Financial Management* (New York, NY, Palgrave Macmillan)
- Cangiano, M, T Curristine, and M Lazare, eds (2013). *Public Financial Management and Its Emerging Architecture* (Washington DC, International Monetary Fund).

Assessment: Exam (75%, duration: 3 hours) in the January exam period.

Coursework (25%) in the AT.

The coursework (worth 25%) will consist of a Policy Exercise where students will prepare and deliver a presentation which will be carried out in groups.

The e-exam (75%) will be held in the January exam period.

PP4V8 Half Unit Policy Paper

This information is for the 2024/25 session.

Teacher responsible: Dr Simon Bastow and Dr Alexandra Cirone

Availability: This course is available on the Double Master of Public Administration (LSE-Sciences Po), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), Master of Public Administration and Master of Public Policy. This course is not available as an outside option.

MPA students may not take both this course and an MPA Dissertation. This course is only available to MPA students during the second year of their programme.

Course content: The aim of the course is to enable students to plan, design and conduct independent research in an area of public policy. Students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with their supervisor. The policy paper will carry out an evidence-based assessment of a concrete policy issue or problem in a specific setting and provide a practical contribution to policy and practice. The main body of the policy paper should include methodology, results of the analysis, discussion of findings, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and information and draw on secondary and/or primary sources.

Teaching: This course is delivered through help sessions totalling a minimum of 3 hours in Autumn Term and 2 hours in Winter Term. These sessions provide academic and practical guidance on planning and writing the policy paper and offer an opportunity to ask questions. The student's supervisor will provide advice and guidance on this piece of work.

Formative coursework: A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research

question, research justification, feasibility of the topic, an explanation of sources, proposed research design and methods, and provisional structure must be submitted in the Autumn Term. Students may only change their topic thereafter with the agreement of their supervisor. Students will be given feedback on their proposal.

Indicative reading: Writing guidance:

- Stella Cottrell, *Dissertations and Project Reports: A Step by Step Guide* (Palgrave Study Skills, 2014);
- Diana Ridley, *The Literature Review: A Step-by-Step Guide for Students* (SAGE Study Skills Series, 2008);
- Christopher Hart, *Doing a Literature Review* (SAGE Study Skills Series, 2018);
- Sharon M. Ravitch and J. Matthew Riggan, *Reason and Rigor: How Conceptual Frameworks Guide Research*, 2nd edition (Sage Publications, 2016)

Research methods:

- Catherine Hakim, *Research Design: Successful Designs for Social Economics Research*, 2nd ed. (Routledge, 2000);
- Joseph A. Maxwell, *Qualitative Research Design* (3rd edition, Sage, 2013);
- Alan Bryman, *Social Research Methods*, 5th ed. (Oxford University Press, 2015);
- David Partington, *Essential Skills for Management Research* (Sage Publications, 2002).

Assessment: Policy paper (100%) in the ST.

- 6,000 word policy paper.

PP4X6 Not available in 2024/25 Welfare Analysis and Measurement

This information is for the 2024/25 session.

Teacher responsible: Dr Berkay Ozcan (OLD.2.32) and Prof Stephen Jenkins (OLD.2.29)

Availability: This course is available on the Double Master of Public Administration (LSE-Columbia), Double Master of Public Administration (LSE-Sciences Po), Double Master of Public Administration (LSE-University of Toronto), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Tokyo), MPA in Data Science for Public Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research), Master of Public Administration and Master of Public Policy. This course is available as an outside option to students on other programmes where regulations permit. This course has no formal pre-requisites. The course focuses on quantitative approaches to assessment of social progress. A strong background in maths and stats is not required but you need to be willing to engage with tables and graphs and basic formulae. The course is challenging but not intrinsically difficult; most important is a willingness to engage with the issues in depth.

Course content: This course provides an introduction to the analysis and measurement of the welfare of individuals and societies, examining concepts, measurement and data, as well as providing illustrations. The aims are to provide an understanding of the main tools used to measure and monitor individuals' and social welfare, and to develop skills for assessing academic research and official statistics (as produced by national or international agencies) and for undertaking one's own analysis. The first half of the course focuses on univariate monetary measures of economic wellbeing notably 'income', and on the experience of OECD countries (especially the UK, EU, and USA), but the aim is also to place these in the context of developments based on other approaches and in other countries including middle- and low-income nations. The topics covered include measurement of inequality, poverty, and mobility; setting poverty thresholds

and equivalence scales; data sources and their quality; empirical illustrations considering assessments of trends within countries, cross-national differences, and global poverty and inequality. The second half of the course broadens the perspective to consider a range of non-monetary, multidimensional, and subjective measures of welfare for individuals and societies. Examples include occupational and socio-economic status (SES), anthropometric measures, the Human Development Index and related indices of development, and measures of happiness and life satisfaction. The second half of the course draws on the measurement approaches and data issues covered in the first half of the course, developing them as appropriate to the new settings.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 60 hours across Autumn Term and Winter Term.

Indicative reading: Most of the course reading is in journal articles. Books providing overviews include:

- Foster, J, Seth, S, Lokshin M and Saiara, Z, A Unified Approach to Measuring Poverty and Inequality (2013; free e-book available); and
- Atkinson A and Bourguignon F (eds) Handbook of Income Distribution Volume 2 (2015) and their earlier Volume 1 (2000) (available online via LSE Library).

A full reading list is distributed at the beginning of the course.

Assessment: Coursework (25%, 2000 words) in the WT.

Take-home assessment (75%) in the ST.

SO407

Politics and Society

This information is for the 2024/25 session.

Teacher responsible: Dr Kristin Surak

Availability: This course is compulsory on the MSc in Political Sociology. This course is available on the MA in Modern History, MSc in Social Research Methods and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Students who have this course as a core course are guaranteed a place. Other than for students for whom the course is a core course, places are allocated based on a written statement, with priority given to students on the MSc in Sociology, MSc in Social Research Methods and MA in Modern History. This may mean that not all students who apply will be able to get a place on this course.

Course content: This course aims to explore some of the great debates about the relationship between politics and society. It will examine the interaction between political institutions, economic interests and cultural ideas, especially in societies that are both democratic and capitalist. The course will explore some of the classic empirical and historical controversies that have animated political sociologists. Each week, we will discuss questions like: What gave rise to states and nations? Why are some social movements more successful than others? How does social change shape parties and elections? Do repressive states give rise to radicalism? Why are welfare states more developed in some countries than others? Why is there no Labor Party in the United States? Under what conditions does democracy develop? What are the legacies of imperialism? What explains the growth of populism? And has neo-liberalism become hegemonic? The course will also look at the canonical writings of authors like Marx and Weber, as well as critically explore the use of some political concepts. In addition, it will enable you to build up your knowledge of a number of countries and to assess the strengths and weaknesses of some of the main theories and approaches that have dominated the study of political sociology. These include functionalist, rational choice, and institutionalist theories, as well as historical and comparative approaches.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 40 hours across AT

and WT, with 4 hours of seminars in the ST.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Seminars: Papers will be presented by participants and, on occasion, by guest speakers.

Formative coursework: Members of the seminar will be required to present a number of papers during the course of the seminar.

There will also be a written assignment in AT and WT.

Indicative reading:

- B. Anderson. Imagined Communities;
- R. Archer, Why is There No Labor Party in the United States?;
- K. Surak, The Golden Passport: Global Mobility for Millionaires;
- P Evans et al, Bringing the State Back In;
- S M Lipset, 'The Social Requisites of Democracy Revisited', American Sociological Review, vol 59;
- S Lukes, Power: A Radical View;
- D McAdam, Comparative Perspectives on Social Movements;
- M Mann, The Sources of Social Power;
- M Olson, The Logic of Collective Action;
- T Skocpol, Protecting Soldiers and Mothers;
- C. Tilly, Coercion, Capital and European States;
- L. Weiss, The Myth of the Powerless State.

Assessment: Exam (70%, duration: 3 hours) in the spring exam period.

Essay (30%, 3000 words) in the ST.

Attendance at all seminars and submission of all set coursework is required.

SO424

Approaches to Human Rights

This information is for the 2024/25 session.

Teacher responsible: Dr Mai Taha

Availability: This course is compulsory on the MSc in Human Rights. This course is available on the MSc in Gender, Peace and Security, MSc in International Migration and Public Policy and MSc in International Migration and Public Policy (LSE and Sciences Po). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Students who have this course as a core course are guaranteed a place. Other than for students for whom the course is a core course, places are allocated based on a written statement. As demand is typically high, this may mean that not all students who apply will be able to get a place on this course.

Course content: This is a multi-disciplinary course that provides students with a rigorous and focused engagement with different disciplinary perspectives on the subject of human rights including philosophy, sociology and international law. It provides students with contending interpretations of human rights as an idea and practice from the different standpoints that the disciplines present and investigates the particular knowledge claims and modes of reasoning that the respective disciplines engage. The course applies the insights of international law, philosophy and sociology to understand key human rights issues such as universality, international institutions, genocide, non-discrimination, economic and social rights and citizenship.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 40 hours across AT and WT, with 1 hour in ST.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: Active participation in the workshops is expected and students will be asked to make a presentation to their group.

Students will have an opportunity to submit a formative essay in the AT.

Indicative reading: No one book covers the entire syllabus and students are expected to read widely from more general texts on human rights, to more specific texts outlining the debates on

human rights from a particular disciplinary perspective.

Philosophy:

- Locke, J., 2018. Two Treatises of Government-Locke. Lebooks Editora.

Assessment: Exam (70%, duration: 3 hours) in the spring exam period.

Essay (30%, 3000 words) in the ST.

Attendance at all classes and submission of all set coursework is required.

S0426 Half Unit Classical Social Thought

This information is for the 2024/25 session.

Teacher responsible: Prof Monika Krause

Availability: This course is available on the MA in Modern History, MSc in Culture and Society, MSc in Political Sociology and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students who have this course listed in their programme regulations. This may mean that not all students who apply will be able to get a place on this course.

Course content: The course provides a critical review of classical social theory. We explore the origins and development of classical social theory through a close reading of primary texts by authors such as Marx, Weber, DuBois, Simmel, Toqueville, Martineau and Durkheim. This course will consider texts in their historical contexts and discuss subsequent developments within the theoretical traditions associated with the authors studied. We will also consider implications for sociological research. It is not assumed that students have a basic grounding in classical social theory, although it is expected that students who register for this course will be prepared to develop their understanding through primary readings, and not rely on textbooks.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the AT.

Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: A 5 min class presentation and a formative essay.

Indicative reading: The reading list for each seminar will be divided up into essential and additional reading. Students will be asked to read between 50 and 100 pages of primary text per week.

The following is a sample list of readings:

- Marx, K: The Communist Manifesto & Grundrisse & Capital (sections of vols 1 & 3);
 - Weber, M: The Protestant Ethic and the Spirit of Capitalism & 'Science as a Vocation';
 - Simmel, G: The Philosophy of Money (various sections)
- And various essays such as:
- Simmel, G: 'The Metropolis and Mental Life', 'The Stranger', etc.;
 - Du Bois: Souls of Black Folk

Assessment: Essay (100%, 5000 words) in the WT.

Attendance at all seminars and submission of all set coursework is required.

S0427 Half Unit Modern Social Thought

This information is for the 2024/25 session.

Teacher responsible: Prof Monika Krause

Availability: This course is available on the MA in Modern History, MSc in Culture and Society, MSc in Political Sociology, MSc in Political Theory and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students who have this course listed in their programme regulations. This may mean that not all students who apply will be able to get a place on this course.

Course content: The course examines a range of key traditions and issues in contemporary social theory. Based on the study of texts and debates, students have an opportunity to consider and discover the stakes and choices involved in adopting different theoretical perspectives and their application in social research.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the AT.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: A 5 min class presentation and a formative essay.

Indicative reading: Bourdieu, P. (1996) The Rules of Art. The Genesis and Structure of the Literary Field. Stanford University Press.

Haraway, D. (2016) Staying with the Trouble: Making Kin in the Chthulucene. Duke University Press.

Negt, O. and Kluge, A. (1988) Public Sphere and Experience. Verso.

Said, E. (1978) Orientalism. Pantheon Books.

Benzecry, C., Krause, M. and Reed, I. (2019) Social Theory Now. Chicago University Press.

Assessment: Essay (100%, 5000 words) in the WT.

Attendance at all classes and submission of all set coursework is required.

S0434 Cultural Theory and Cultural Forms

This information is for the 2024/25 session.

Teacher responsible: Dr Jana Melkumova-Reynolds

Availability: This course is compulsory on the MSc in Culture and Society. This course is available on the MA in Modern History.

This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled

access). Students who have this course as a core course are guaranteed a place. Other than for students for whom the course is a core course, places are allocated based on a written statement. This may mean that not all students who apply will be able to get a place on this course.

Course content: Cultural Theory and Cultural Forms is the core course for the MSc Culture and Society. The aim is to introduce you to a wide range of approaches, debates and issues that loom large in the study of cultural processes. By the end of this course you should have a reasonable map of different aspects and approaches to researching cultural processes; and you should feel able to formulate your own research questions and strategies within the diverse traditions of culture theory and cultural research. In Term 1 we introduce the diverse approaches to cultural theory and the central debates that have structured the field, with particular attention to the ways in which these link to central sociological themes. The second term brings in recent developments in cultural analysis beyond sociology and considers cultural processes through queer, crip and more-than-human lenses.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 40 hours across AT and WT.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: All students are expected to submit one piece of non-assessed written work per term and prepare seminar presentations.

S0448

City Design: Research Studio

This information is for the 2024/25 session.

Teacher responsible: Dr David Madden and Dr Dena Qaddumi

Availability: This course is compulsory on the MSc in City Design and Social Science. This course is not available as an outside option.

Course content: The City Design: Research Studio is the central unit of the MSc programme, linking the critical issues raised in the core and optional lecture courses, including questions of power and social justice, with the practical analysis of issues of city design and proposals for urban intervention. This course examines the interconnections between the social and the spatial dimensions of city life. Through a mixed-methods engagement with site-based issues, the research studio explores the different ways city design relates to policy formation, planning processes, legal frameworks, local forms of organisation, political projects, and the emerging needs of complex urban societies in everyday life. It will provide students with an appreciation of the complexities of urban design and development processes, and with interdisciplinary tools for addressing specific urban challenges. The course approaches design as a practice for shaping urban environments and responding to urban problems as well as an imaginative form of research that can shed light on the social, political and material dimensions of the city. It aims to integrate the physical, economic, social and political aspects of urban contexts, and develop ways to analyse these visually, textually and verbally. The studio-based approach to learning is an immersion in site-based research and experimental, strategic and pragmatic forms of design intervention. The course comprises an analysis of key examples of transformational urban design in London and beyond, and group-based fieldwork in a London site.

Teaching: In most weeks the Studio course runs for one full day each teaching week in AT and WT through lectures, workshops, small-group tutorials and independent groupwork. Studio groups are expected to work together during the scheduled Studio hours and prepare collectively for regular workshops and tutorials.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: One group presentation on site analysis and research. (AT)

Assessment: Group exercise (50%), group exercise (25%) and assignment (25%) in the WT.

The assessment consists of:

- One group submission (6,000 words, 50%)
- Individual tutor assessment based on contribution to 160group work (25%)
- Individual 160assignment (3,000 words, 25%)

An electronic copy of the individual assignment, to be uploaded to Moodle, is due in WT.

An electronic copy of the group submission, to be uploaded to Moodle, is due in WT.

Attendance at all classes and submission of all set coursework is required.

S0449

Independent Project

This information is for the 2024/25 session.

Teacher responsible: Dr David Madden and Dr Dena Qaddumi

Availability: This course is compulsory on the MSc in City Design and Social Science. This course is not available as an outside option.

Course content: The independent project enables students to develop an original and extended piece of work on any approved topic within the field of the MSc programme. Students may develop work on themes or sites introduced in their Studio or core courses, or on other relevant topics. The project may focus on an analysis of an urban issue or on a practical proposal for urban intervention. Projects may be oriented towards urban design, urban policy, urban social science, or some combination thereof. Approval for the topic must be obtained from your academic advisor.

Teaching: In WT students attend project workshops and submit a provisional project abstract; academic advisors for the independent project are assigned on the basis of the abstract. In ST, each student has regular supervisory meetings with their academic mentor, and final reviews with members of faculty. Students are also encouraged to consult with other members of faculty during regular office hours.

There will be two sessions during AT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and provide basic guidance about planning your dissertation, such as selecting a suitable topic, designing the research and reviewing the existing literature.

Formative coursework: Students are required to submit a project outline in Winter Term.

Assessment: Project (100%, 10000 words) in August.

An electronic copy of the dissertation, to be uploaded to Moodle, no later than 4.00pm on Thursday 14th of August 2025.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

theory and practices of design, drawing on examples of different cities and varied ways of knowing the urban from across the world. We analyse processes of inequality, marginalisation and resistance alongside design methods of observation, visualisation and evidencing. Our weekly seminars incorporate both the analysis of case studies and readings.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in AT.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Written feedback is given within two weeks of the essay submission, and in addition a writing seminar is incorporated in the course in preparation for the summative assessed essay.

Assessment: Essay (75%, 5000 words) in the WT.

Group presentation (25%) in the AT.

Attendance at seminars and submission of all set coursework is required.

S0451 Half Unit

Cities by Design

This information is for the 2024/25 session.

Teacher responsible: Dr Dena Qaddumi

Availability: This course is available on the MSc in City Design and Social Science and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). For students who are not registered on the MSc City Design and Social Design programme, places will be allocated based on a written statement. Priority will be given to students on the MSc in City Design and Social Science and MSc in Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: Cities by Design examines the relationship between built form and practices of city design, through situating it in its political, cultural, economic and social contexts. By introducing students to key concepts, sites and practices in spatial analysis and city-making, the course investigates the production of urban space and how the design of our complex urban environments affects the different people who live in them. We engage in the spatial shaping of intersectional social identities - including gender, 'race' and class - and position modernisation, capitalisation and colonisation as ongoing spatial processes to understand the material, symbolic and experienced conditions of power. Drawing on architecture and the designed world as key reference points, we explore interconnections between urban

S0454 Half Unit Not available in 2024/25

Families and Inequalities

This information is for the 2024/25 session.

Teacher responsible: Dr Ursula Henz STC S100B

Availability: This course is available on the MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students on the MSc in Inequalities and Social Science, the MSc in International Migration and Public Policy and MSc in Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: The course provides an introduction into selected issues of family sociology, focusing on families in contemporary Western societies. It addresses inequalities within and between families and the role of families in reproducing social inequality. Major themes include: childhood; transition to adulthood; partner selection; marriage, divorce and post-divorce families; parenting; gender roles and the division of paid and unpaid work; intergenerational ties.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the AT.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: Essay (1,500 words) in the AT.

Indicative reading: A detailed reading list will be provided at the beginning of the course. General reading: J Treas, J Scott, M Richards (eds.) (2014) *The Wiley Blackwell Companion to The Sociology of Families*, Chichester, West Sussex: Wiley Blackwell. Selected recommended books: S Arber & C Attias-Donfut (2000) *The Myth of Generational Conflict. The Family and State in Ageing Societies*. London and New York: Routledge; A Hochschild, Arlie (2012) *The Second Shift. Working Parents and the Revolution at Home*. New York: Penguin; A Lareau (2011) *Unequal Childhoods. Class, Race and Family Life*. University of California Press: Berkeley, Los Angeles, London.

Assessment: Online assessment (90%) in January.

Class participation (10%) in the AT.

The online assessment will be a take home exam (2 questions, 90%) to be taken in an 8-hour window in the January exam period. Attendance at all seminars and submission of all set coursework is required.

SO457 Half Unit Political Reconciliation

This information is for the 2024/25 session.

Teacher responsible: Dr Claire Moon

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in Human Rights, MSc in Human Rights and Politics, MSc in Political Sociology and MSc in Sociology. As demand is typically high, this may mean that not all students who apply will be able to get a place on this course.

Course content: The course introduces students to current issues in the field of transitional justice and historical injustice, and draws upon a range of examples from Africa, Latin America, post-communist Europe, Australia and the US. Topics include transitional justice as a field of practice and a field of knowledge; the perpetrators of atrocity; denial; retributive and restorative justice; forensic engagements with mass graves and the dead body; theology and therapy in reconciliation; historic injustices in settler states (Australia, Canada and the US) and the politics of apology and reparation; memory and atrocity. The course explores the politics of reconciliation by identifying and examining its key themes, the practices and institutions in which it is embedded and its key political subjects. SO457 is an interdisciplinary course that draws upon literature from sociology, law, political theory, anthropology and philosophy amongst others, in order to understand and interpret the wide social and political reach of reconciliation, as well as its limitations.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the WT.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: 1 x formative essay of 1500 words.

Indicative reading: Hannah Arendt, *Eichmann in Jerusalem: A Report on the Banality of Evil* (Penguin Books, 1977); Glen Coulthard, *Red Skin White Masks: Rejecting the Colonial Politics of Recognition* (University of Minnesota Press, 2014); Priscilla Hayner, *Unspeakable Truths: Confronting State Terror and Atrocity* (Routledge, 2001); Michael Humphrey, *The Politics of Atrocity and Reconciliation: From Terror to Trauma* (Routledge, 2002); Karl Jaspers, *The Question of German Guilt* (Capricorn Books, 1961); Keenan, Thomas and Eyal Weizman (2012) *Mengele's*

Skull: The Advent of Forensic Aesthetics (Frankfurt: Sternberg Press); Neil Kritz, *Transitional Justice: How Emerging Democracies Reckon with Former Regimes* (US Institute of Peace, 1995); Claire Moon, *Narrating Political Reconciliation: South Africa's Truth and Reconciliation Commission* (Lexington, 2009); Nicholas Tavuchis & Mea Culpia, *A Sociology of Apology and Reconciliation* (Stanford University Press, 1991); Richard Wilson, *The Politics of Truth and Reconciliation in South Africa: Legitimizing the Post-Apartheid State* (Cambridge University Press, 2001).

Assessment: Essay (100%, 4000 words) in the ST.

Attendance at all seminars, completion of set readings and submission of set coursework is required.

SO458 Half Unit Gendering, Identities, Difference

This information is for the 2024/25 session.

Teacher responsible: Prof Suki Ali

Availability: This course is available on the MSc in Culture and Society, MSc in Inequalities and Social Science, MSc in Political Sociology and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students who have this course listed in their programme regulations. This may mean that not all students who apply will be able to get a place on this course.

Course content: The course introduces theoretical debates and contemporary issues in the study of identity, identification and subjectivity. Using a range of analytical approaches which draw on, but are not limited to, decolonial, psychoanalytic, feminist, queer and queer of colour theoretical interventions, the course will explore how social differences are produced, maintained and challenged within and through formations of identity. The course will consider the ways in which allegiances to particular identities can be a site for dismantling or entrenching social and political divisions, violences and inequalities within contemporary societies. The course is transdisciplinary and will use a range of materials such as academic, fictional and visual texts. Indicative topics include femininities/masculinities; sexualities; post and anticoloniality, racialisation, performativity, affect, memory, melancholia, trauma, autobiography/autoethnography, alterity, positionality, politics, representation. NB while core themes will remain the same, topics may change slightly from year to year.

Teaching: 30 hours of teaching/seminars in the AT.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 in class presentation with submission of slides in the AT.

Indicative reading: Fanon, Frantz, 1967 *Black Skin/White Masks*, New York: Grove Press, Treacher, A 2007 'Postcolonial Subjectivity: Egyptian Men, Shame, Memory and Forgetting' Special Issue of *Ethnic and Racial Studies* Feminism/Postcolonialism: Knowledge Politics 30/2, Tummala-Narra, P (2022) 'Can We Decolonize Psychoanalytic Theory and Practice?', *Psychoanalytic Dialogues*, 32:3, 217-234, Ahmed, S. 2014 (2nd Edition) *The Cultural Politics of Emotion*, University of Edinburgh Press, 'Queering Memory' 2023 Special Issue: *Memory Studies* 16 (1) Narayan, U and Harding, S 2000 *Decentering the centre: philosophy for a multicultural, postcolonial and feminist world* Bloomington: Indiana University Press 2000; Hall, S and du Gay, P (eds.) and Society 46:4, Haraway, D.J., & Goodeve, T. (2018) *Modest_Witness@Second_Millennium. FemaleMan_Meets_OncoMouse: Feminism and Technoscience* (2nd ed.). Routledge. Tamale, S (2022) *Decolonization and Afro-Feminism* Daraja Press, Anderson, D. Jenson, & R. C. Keller (Eds.), 2011 *Unconscious Dominions: Psychoanalysis, Colonial Trauma, and Global Sovereignties* Duke University Press. Denzin, N. K., Lincoln, Y. S., & Smith, L. T. (2008). *Handbook of critical and indigenous methodologies*. SAGE Publications, Inc.

Assessment: Essay (90%, 4000 words) in the WT.

Essay plan (10%) in the AT.

Attendance at all seminars and submission of all set coursework is required.

S0468 Half Unit

International Migration and Migrant Integration

This information is for the 2024/25 session.

Teacher responsible: Dr Patrick McGovern

Availability: This course is available on the MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Priority will be given to students on the MSc in International Migration and Public Policy for whom the course is an 'optional core course'.

Places are allocated based on a written statement. As demand is typically high, this may mean that not all students who apply will be able to get a place on this course.

Course content: Coverage of contemporary sociological perspectives on migrant integration including labour market incorporation; the 'straight line' model of assimilation; national models of integration; multiculturalism; social conflict; racism, religion and migration; segmented assimilation.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in WT, with a revision session in ST.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: All students are expected to write two non-assessed pieces of work during the term.

Indicative reading: There is no recommended textbook. Books of a general nature that cover substantial parts of the syllabus are: D. Bartram et al. (2014) *Key Concepts in Migration*; H. de Haas, et al. (2019); *The Age of Migration* (6th edn); P. Kvisto and T. Faist (2010) *Beyond A Border*. A more comprehensive bibliography will be available to students taking this course.

Assessment: Exam (90%, duration: 2 hours) in the spring exam period.

Class participation (10%) in the WT.

The summative assessment will take the form of an e-exam in the Spring Term. E-exams are assessments run under invigilated exam conditions on campus. Students will complete the assessment using software downloaded to their personal laptops.

S0470 Half Unit Not available in 2024/25

The Sociology of Markets

This information is for the 2024/25 session.

Teacher responsible: Dr David Pinzur STC S217A

Availability: This course is available on the MSc in Economy and Society, MSc in Political Sociology and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places will be allocated based on a written statement. Priority will be given to students on the MSc in Economy and Society, MSc in Political Sociology and MSc in Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: This course will investigate some of the key concepts and methods by which sociologists study markets, as well as the unique ways of understanding that this perspective makes possible. We will explore this topic through empirical studies that span a wide range of markets for goods ranging from art to financial derivatives to data and beyond. Over the course of the term, we will see how different approaches work (or don't) when applied to markets that differ (in some ways) quite widely. The course aims to give students the tools to make critical analyses of how markets operate, who exerts power in these processes, and what consequences follow both inside and outside the market.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling 25 hours in MT. Reading Weeks: Students on this course will have a reading week in MT Week 6, in line with departmental policy.

Formative coursework: A 1500 word essay is required.

Indicative reading: Recommended texts:

- Callon, Michel. 1998. *The laws of the markets*. Blackwell Publishers: Oxford;
- Fligstein, Neil. 2001. *The Architecture of Markets. An Economic Sociology of Twenty-First-Century Capitalist Societies*. Princeton, NJ a.o.: Princeton University Press;
- Granovetter, Mark. 1995[1974]. *Getting a Job: a Study of Contacts and Careers*. Chicago; London: Chicago University Press;
- Krippner, Greta R. 2002. "The elusive market: Embeddedness and the paradigm of economic sociology." *Theory and Society* 30:775-810;
- Swedberg, Richard. 2003. *Principles of Economic Sociology*. Princeton, N.J.: Princeton University Press.

Assessment: Essay (100%, 4000 words) in the WT.

The course is assessed by a 4000 word essay due in LT week 2.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Wednesday of Lent Term.

Attendance at all workshop sessions and submission of all set coursework is required.

S0471 Half Unit Not available in 2024/25

Technology, Power and Culture

This information is for the 2024/25 session.

Teacher responsible: Dr Carrie Friesen STC S213

Availability: This course is available on the MSc in Culture and Society, MSc in Political Sociology and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in Culture and Society, MSc in Political Sociology and MSc in Sociology. As demand is typically high, this may mean that not all students who apply will be able to get a place on this course.

Course content: This course aims to give students a detailed understanding of sociologically informed approaches to social studies of science, technology and medicine (STMS). It will consider how and why STMS shifted and critiqued macro-level theories of technology in post-industrial society to explore the constitutive role of objects and artefacts in social relations. In other words, we will start the course by reflecting upon sociology's traditional neglect of the social life of things or materiality. We will then explore varying conceptual developments within the fields through varying substantive case studies. These may include: power relations and social inequalities embedded in

and reproduced by digital technologies; technology as a culture that shapes gendered and racialised discourses and economies, such as in robotics; practices that reproduce the status quo but also become sites of resistance and social changes, such as in medicine; the ways in which politics become embodied, as with surveillance technologies. In the process we will explore the ways in which technologies instantiate power relations and hegemonic cultures, as seen with visualizing technologies and colonisation for example, all the while also being sites where politics can be reworked, resisted and changed.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours in the AT.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: 7 minute presentation given during seminar in the AT.

Indicative reading: Benjamin, Ruha. (2019) *Race After Technology*. London: Polity Press

Wajcman, Judy (2004) *Technofeminism*. London: Polity.

Assessment: Essay (60%, 4000 words) in January. Portfolio (40%) in the AT.

Attendance at all classes and submission of all set coursework is required.

SO473 Half Unit Not available in 2024/25 Crime, Control and the City

This information is for the 2024/25 session.

Teacher responsible: Dr Janet Foster

Availability: This course is available on the MSc in City Design and Social Science, MSc in Criminal Justice Policy, MSc in Regional And Urban Planning Studies and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in City Design and Social Science, MSc in Criminal Justice Policy, MSc in Regional And Urban Planning Studies and MSc in Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: This half unit course examines crime and disorder in city landscapes, the relationship between crime, space and place, and the complex mix of informal and formal social controls that influence different types and levels of crime. Drawing on a range of comparative literature from different cities, and using a mixture of classic and contemporary texts, we examine the

importance of informal social control in maintaining social order in cities, the role of policing, and what happens when formal and informal social controls fail. We also explore the principles of crime prevention – both physical and social, critically examining the relationship between crime and design.

Teaching: This course is delivered through workshops totalling 30 hours in the WT.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Indicative reading: Body-Gendrot (2012) *Globalization, Fear and Insecurity* (Palgrave Macmillan); Bottoms, A (2012) 'Developing socio-spatial criminology' in Maguire M et al (eds.) *The Oxford Handbook of Criminology* (5th edn.); Cochrane, A and Talbot, D (eds.) (2008) *Security: Welfare, Crime and Society* (Open University Press); Evans, K (2011) *Crime Prevention: a critical introduction* (Sage); Felson, M and Eckert, M (2016) *Crime and Everyday Life* (Sage); Graham, P. & Clarke, J. (2001) 'Dangerous Places: Crime and the City' in Muncie, J. & McLaughlin, E. (eds.) *The Problem of Crime* 2nd ed. (Sage); Le Gates R & Stout F (2015) *The City Reader* (Routledge); Monti et al (2014) *Urban People and Urban Places*; Mooney, G and Neal, S (eds.) (2009) *Community: Welfare, Crime and Society* (Open University Press); Pile, S. et al. (eds.) (1999) *Unruly Cities* (Routledge); Pitts, J (2008) *Reluctant Gangsters: the changing face of youth crime* (Willan); Wacquant, L (2008) *Urban Outcasts: A Comparative Sociology of Advanced Marginality* (Polity Press); Zukin, S (2010) *Naked City: The Death and Life of Authentic Urban Places* (Oxford University Press)

Assessment: Essay (100%, 4000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Spring Term.

Attendance at all classes and submission of all set coursework is required.

SO475 Half Unit Not available in 2024/25 Material Culture and Design

This information is for the 2024/25 session.

Teacher responsible: Dr Don Slater STC S310

Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Economy and Society and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Economy and Society and MSc in Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: This course focuses on designed entities in everyday life, looking at the ways in which materials are configured into things, practices, spaces and forms, and at the assemblage of objects across production, design, consumption and use. Though aiming to produce expertise in specifically social science research, the course will bring together literatures and debates that cross the social sciences, humanities and science/technology, drawing particularly on actor-network theory, material culture studies, sociology of consumption, practice theory, urban and architectural studies, cultural theory and design studies. There will also be a strong emphasis on methodology: what tools are available to social scientists to investigate the emergent properties and impacts of designed objects. Case studies will be central to the teaching, developing theoretical and methodological strategies through a (changing) set of empirical cases that are likely to include: digital objects (software, games); media objects; lights and lighting; fashion; domestic interiors.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the AT.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: One 2,500 essay applying a theoretical approach to a specific case study.

Indicative reading: Bijker, W. E. and J. Law (eds.) (1992) *Shaping technology/building society: Studies in Sociotechnical change*. Cambridge, MA: MIT Press.

Frayling, C., E. King and H. Atkinson (2009) *Design and popular entertainment*. Manchester ; New York

Lash, S. and C. Lury (2007) *Global Culture Industry: the mediation of things*. Cambridge: Polity Press.

Latour, B. (2005) *Reassembling the Social: An Introduction to Actor-Network-Theory*. Oxford: Oxford University Press.

Manovich, L. (2002) *The language of new media*. Cambridge, Mass. London: MIT.

Miller, D. (2008) *The Comfort of Things*. Cambridge: Polity.

Assessment: Essay (100%, 5000 words) in the WT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the second Thursday of Winter Term.

Attendance at all classes and submission of all set coursework is required.

S0476 Not available in 2024/25

Researching Migration: research questions and research methods

This information is for the 2024/25 session.

Teacher responsible: Dr Patrick McGovern STC.S110

Availability: This course is compulsory on the MSc in International Migration and Public Policy and MSc in International Migration and Public Policy (LSE and Sciences Po). This course is not available as an outside option.

Course content: Having introduced the students to a range of possible research strategies, the students will identify appropriate research methods training for their proposed thesis and undertake a number of practical exercises to help develop their ideas. They will also prepare informal seminar presentations on their proposed topic during AT and WT. Early in the ST, they will present their proposal in a 'Three-Minute-Thesis' workshop. A final proposal will be submitted after this workshop having completed a 2000 word prospectus on some aspect of the proposed dissertation. At each stage, participants will be encouraged to use feedback from the course convenors and fellow students to help develop their research.

Teaching: Lectures 3 x 2 hours (6); Seminars 2 x 2 hours (4); Workshop 5 hours (5). Total 15 hours

Teaching arrangements may be adjusted if online teaching is required at any point.

Formative coursework: Students will be expected to produce 3 presentations across the AT, WT and ST.

Indicative reading: Bryman, A. (2008) *Social Research Methods*, H62 B91; Gilbert, N. (ed.) (2008) *Researching Social Life* H62 R 43; Hancke, R. Assessment:

This course is not assessed.

S0477 Half Unit Urban Social Theory

This information is for the 2024/25 session.

Teacher responsible: Dr David Madden

Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Priority will be given to students on the MSc in City Design and Social Science, for whom the course is an 'optional core course'. Places will be allocated based on a written statement. This may mean that not all students who apply will be able to get a place on this course.

Course content: This course is an introduction to urban social theory. The class will focus on major concepts, paradigms, texts and thinkers in order to critically assess different ways of theorising the urban. It will analyse various forms of urban theory including political economy, human ecology, feminism and postcolonialism, which are used as lenses through which to understand a variety of topics, such as socio-spatial restructuring, neoliberalisation, the politics of public space, globalisation, cosmopolitanism, the urbanisation of patriarchy, the racialisation of urban space, the right to the city and planetary urbanisation.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours in the WT.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Engels, Friedrich. 1887 [1872]. *The Housing Question*. London: Cooperative Publishing Society of Foreign Workers.

Assessment: Essay (90%, 5000 words) in the ST.

Memo (10%) in the WT.

There will be weekly memos submitted via Moodle the evening before each class session during the WT.

Attendance at all classes and submission of all set coursework is required.

SO478 Not available in 2024/25 Social Scientific Analysis of Inequalities

This information is for the 2024/25 session.

Teacher responsible: Prof Sam Friedman STC S102

Availability: This course is compulsory on the MSc in Inequalities and Social Science. This course is not available as an outside option.

Course content: The course will consider interdisciplinary approaches to inequality, focusing on (a) how inequality can be conceptualised and explained, (b) how it can be measured and (c) ethical and political issues. Topics to be covered include patterns and trends in economic inequalities; gender, ethnicity, class and age; cultural aspects of inequality; social and intergenerational mobility; global and comparative perspectives; media representation of inequalities; ethical and philosophical approaches; the impact of government, law and social policy.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 40 hours across AT and WT.

It is divided into blocks of related lectures and linked seminars.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the AT and 1 presentation in the WT.

Indicative reading: Branko Milanovic, *Global Inequality: A New Approach for the Age of Globalization* (Harvard University Press, 2016)

Piketty, T. *A Short History of Equality* (Harvard University Press, 2022)

Hartley Dean and Lucinda Platt, *Social Advantage and Disadvantage* (Oxford, 2016)

O'Neil, C. 2016 *Weapons of Math Destruction*. London: Allen Lane
Hickel, J. (2017) *The Divide: A Brief Guide to Global Inequality and its Solutions*. William Heinemann. London.

Federici, S. (2004) *Caliban and the Witch: Women: The Body and Primitive Accumulation*. New York. Autonomedia.

Savage, M., (2021) *The Return of Inequality: Social Change and the Weight of the Past* (Harvard UP).

Assessment: Essay (50%, 3000 words) in the WT.

Policy brief (50%) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the submission day. The essay is due by the first day of Winter Term.

An electronic copy of the assessed policy brief, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Spring Term.

Attendance at all classes and submission of all set coursework is required.

SO479 Half Unit Human Rights and Postcolonial Theory

This information is for the 2024/25 session.

Teacher responsible: TBC

Availability: This course is available on the MSc in Culture and Conflict in a Global Europe, MSc in Culture and Conflict in a Global Europe (LSE & Sciences Po), MSc in Culture and Society, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in Human Rights, MSc in Human Rights and Politics, MSc Culture and Society, MSc in International Migration and Public Policy, MSc in Political Sociology, MSc in Culture and Conflict in a Global Europe, and MSc

in Culture and Conflict in a Global Europe (LSE & Sciences Po). As demand is typically high, this may mean that not all students who apply will be able to get a place on this course.

Course content: This course critically addresses the allure of human rights and international law as political projects. While drawing primarily on postcolonial theory, it will also employ socio-legal studies, intellectual history, political philosophy and social theory to address the colonial context in which human rights and international law came to be universalized and institutionalized, as well as the way they tend to monopolize the political language through which many social movements throughout the world articulate their particular desires for justice. Exploring the history, philosophy, and politics of human rights and international law in conjunction with imperial practices, the course will also examine how facts of socio-cultural difference and political resistance have been managed—if necessary by violence—by a liberalism that is dedicated to the idea of peace.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours in the WT.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Indicative reading: Antony Anghie, *Imperialism, Sovereignty, and the Making of International Law* (Cambridge: Cambridge University Press, 2005).

Talal Asad, *On Suicide Bombing* (New York: Columbia University Press, 2007).

Karuna Mantena, *Alibis of Empire: Henry Maine and the Ends of Liberal Imperialism* (Princeton: Princeton University Press, 2010).

Joseph Massad, *Desiring Arabs* (Chicago: University of Chicago Press, 2007).

Mark Mazower, *No Enchanted Palace: The End of Empire and the Ideological Origins of the United Nations* (Princeton: Princeton University Press, 2009).

Assessment: Essay (90%, 5000 words) in the ST.

Class participation (10%) in the WT.

Attendance at all classes and submission of all set coursework is required.

SO480 Half Unit Not available in 2024/25 Urban Inequalities

This information is for the 2024/25 session.

Teacher responsible: Prof Fran Tonkiss STC.S205

Availability: This course is available on the MSc in City Design and Social Science, MSc in Inequalities and Social Science, MSc in Regional And Urban Planning Studies, MSc in Urban Policy (LSE and Sciences Po) and MSc in Urbanisation and Development.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Priority will be given to students on the MSc in City Design and Social Science, for whom the course is an 'optional core course'. Places are allocated based on a written statement. This may mean that not all students who apply will be able to get a place on this course.

Course content: This course offers a critical introduction to key issues and processes in the study of contemporary urban inequalities. This course puts contemporary processes of urban growth in the context of another major urban trend: deepening patterns of inequality in many cities across the world. It examines the continuing role of 'older' bases of urban inequality - access to

land and property, gender inequity, ethnic and racial discrimination, legal exclusion and informality – as well as significant emerging patterns, including extreme concentrations of wealth at the top, middle-class stagnation, privatisation and spatial secession, forced migration and insecurity. It also examines the complex of ways in which urban inequality is experienced, not only in terms of income or property wealth, but also in consumption inequalities, inequities in access to housing, transport, urban services and legal protections, spatial disparities and environmental risks and injustices. The course considers the range of social, economic, environmental and political factors that shape, and also might help to address, urban inequality in these different contexts.

The course will:

- provide a critical introduction to current and emerging patterns of urban inequality
- consider the production of urban inequalities through social, economic, political and spatial processes
- explore common themes and critical differences across cities in developed and developing economies
- address key debates in a range of urban disciplines, and situate these in specific urban contexts and examples

Key themes

- Urban growth and the growth of inequality
- Wealth, income and inequality
- Spatial injustice: segregation and access
- Environment and inequities
- Informality and insecurity
- Social inequality in the city: gender, race and legal exclusions
- Governing inequality

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the AT.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the AT.

1 x 2000-word essay

Assessment: Essay (100%, 5000 words) in the WT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Winter Term.

Attendance at all classes and submission of all set coursework is required.

S0481 Half Unit Class, Politics and Culture

This information is for the 2024/25 session.

Teacher responsible: Prof Sam Friedman

Availability: This course is available on the MSc in Culture and Society, MSc in Inequalities and Social Science, MSc in Political Sociology and MSc in Sociology. This course is not available as an outside option.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students who have this course listed in their programme regulations. This may mean that not all students who apply will be able to get a place on this course.

Course content: The course will begin by introducing traditional theories of social class and stratification before going on to examine the history and political significance of class in Britain, and how this compares with other countries throughout the world. It will then look at the place of class in a contemporary political context, critically examining the claim made by some 'postmodern' writers, and prominent politicians, that class boundaries have been irrevocably eroded. The course will then move on to look at the seminal work of French sociologist Pierre Bourdieu and his supposition that class boundaries are most clearly discernible from examining people's cultural taste, with the privileged using their preferences for 'highbrow' culture as a means of expressing their superiority over the working classes, who tend to prefer more 'lowbrow' culture. We interrogate how these arguments relate today, where the lines between high and low culture are increasingly blurred, where strong cross-cultural differences persist between Europe and the U.S, and where new taste distinctions exist even in traditionally lowbrow art forms, such as comedy and pop music. We then take a more detailed look at class-based boundaries in taste and lifestyle. In particular, we focus on the way in which the middle classes demonise sections of the working class based on what they consider to be 'pathological' consumption choices – focusing in particular on the 'Chav' phenomenon in Britain. We go on to explore both the meaning and consequences of such overt class prejudice, both in Britain but also using research from the U.S, the Netherlands and other international contexts. Finally, the module will ask to what extent class boundaries are malleable? How easy is it for people to escape their backgrounds and move upward or downward in social space? This final section of the course thus looks at contemporary patterns of social mobility, examining the social benefits and challenges that mobility implies, increasing closure within global elites, and the rise of the middle classes in developing countries like China, Brazil and South Africa.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in WT.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Attendance at all classes and submission of all set coursework is required.

SO489 Half Unit Not available in 2024/25

Family and International Migration

This information is for the 2024/25 session.

Teacher responsible: Dr Ursula Henz STC.S100B

Availability: This course is available on the MSc in International Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po) and MSc in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in International Migration and

Public Policy and MSc in Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: The course examines the family life and family relationships of families with experience of international migration in Great Britain and other societies. It applies three perspectives to migrant families: diversity, integration and transnationality. It examines variations in family life and relationships in migrant families; particular challenges that are associated with the migration of a family to a new country as well as transformations of family roles and intimacy in transnational families. After introducing the main concepts in the first half of the course, we explore selected substantive topics. Indicative topics are: migrant children and children staying behind; marriage migration, transnational marriages, and intermarriage; the roles of mother and father in immigrant and transnational families; ageing migrant families.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the WT.

Reading Weeks: Students on this course will have a reading week in WT Week 6.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: Kraler, Kofman, Kohli & Schmoll (eds.) (2011) *Gender, Generations and the Family in International Migration*; Baldassar & Baldock (2007) *Families Caring Across Borders: Migration, Ageing and Transnational Caregiving*; Beck & Beck-Gernsheim (2014): *Distant Love*; Ehrenreich & Hochschild (2004): *Global Woman: Nannies, Maids, and Sex Workers in the New Economy*; Dreby (2010): *Divided by Borders. Mexican Migrants and Their Children*; Foner (2009) *Across Generations: Immigrant Families in America*; Madianou & Miller (2011): *Migration and New Media: Transnational Families and Polymedia*; Parreñas (2005): *Children of Global Migration*; Portes & Rumbaut (2001) *Legacies: The Story of the Immigrant Second Generation*.

Assessment: Online assessment (90%) in the ST.

Class participation (10%) in the WT.

The online assessment will be a take home exam (2 questions, 90%), to be taken in an 8-hour window in the spring exam period. Class participation (10%) in the WT.

Attendance at all seminars and submission of all set coursework is required.

SO490 Half Unit

Contemporary Social Thought

This information is for the 2024/25 session.

Teacher responsible: Prof Chetan Bhatt

Availability: This course is available on the MSc in Culture and Society, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is not an introductory course in social theory. It is ideally suited to students familiar and comfortable with advanced modern social and political thought, philosophy, and political philosophy, including complex, advanced, and challenging readings in these areas.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in Culture and Society, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Political Sociology and MSc in Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: Contemporary Social Thought covers several areas in contemporary social theory and links these areas to several traditions of Enlightenment and post-Enlightenment thinking. This includes critical assessment of Enlightenment

philosophers such as Kant and Hegel, and also more recent thinkers, including Michel Foucault, Gayatri Spivak, Jacques Derrida, Achille Mbembe, Donna Haraway, Jean-Francois Lyotard, Stuart Hall, and Walter Dignolo. The course also aims to link theoretical areas with new and emerging social and political issues – for example, how theoretical approaches can be used to analyse a contemporary phenomenon. The substantive topics covered in the course vary by year, but may include: technology and transhumanism, politics and violence, the new identity politics, transformations in the far-right, authoritarian populism, decoloniality, global or world sociology, wars and technology; and violent religious movements.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the AT.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: An essay outline of 1,000 words to be submitted in Autumn Term.

Indicative reading: A. Loomba (2015), *Colonialism/Postcolonialism* [Third Edition], Routledge.

A. Elliott (2014), *Contemporary Social Theory: an introduction* [Second Edition], Routledge.

J. Wolff (2015), *An Introduction to Political Philosophy* [Third Edition], Oxford University Press.

Assessment: Essay (100%, 4000 words) in the WT.

Attendance at all classes and submission of all set coursework is required.

S0491 Half Unit Quantitative Social Research Methods

This information is for the 2024/25 session.

Teacher responsible: Dr Qilyu Hong

Availability: This course is available on the MPhil/PhD in Sociology, MSc in Economy and Society, MSc in Inequalities and Social Science, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in Economy and Society, MSc in Political Sociology, MSc in Sociology and MPhil/PhD in Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: The main aim, and in line with a later part of the outline of this course, is to become comfortable with quantitative research design whilst identifying the main quantitative methods used in sociological research. It is an introductory course to quantitative methods. The course will allow you to acquire skills in quantitative research design and data analysis, which is a requirement for sociologists and the field's labour market. The course also explores important debates and approaches in quantitative sociology using a case study approach. For every method we cover, we will read a selection of articles taken from major journals in the discipline. By analysing and criticising the operationalisation of quantitative methods in these articles, we will cover issues of research design and get a sense of what each method does (and does not do), and of the type of research questions to which it can be applied.

Aims of the course include:

- Introducing quantitative data collection techniques
- Expose key conceptualisations in quantitative research and correctly employing statistical concepts.
- Present the overviews of common quantitative methods and techniques in contemporary sociological research (ranging from quantitative data collection, linear regression, logistic regression, experimental design, multilevel models and structural equation models).
- Evaluating challenges and benefits of employing quantitative

research methods.

- Have a basic knowledge of STATA to be able to carry out basic statistical analyses.

By the end of the course, students will be able to:

- Recognise quantitative sociological data collection techniques and employ quantitative sociological concepts correctly.
- Critically evaluate quantitative methodologies and differentiate between them whilst considering the ethical implications of quantitative research.
- Design sociological quantitative research while formulating quantitative research questions, generating quantitative measurable concepts and identifying between a descriptive argument and a casual inference.
- Develop a degree of familiarisation with the STATA interface.

NOTE: Detailed quantitative methods are provided in courses: such as MY451 (Introduction to Quantitative Analysis), MY465 (Intermediate Quantitative Analysis) and MY452 (Applied Regression Analysis), and other specialist courses of the LSE Department of Methodology. Also, MY451 and MY452 are recommended to MSc Sociology students interested in using quantitative analysis to develop the dissertation.

Teaching: This course is delivered through a combination of lectures, online materials and workshops (seminars) totalling a minimum of 20 hours in the AT.

Seminars will allow students to reflect on quantitative methodologies, critically evaluate them, and design quantitative sociological research (formulating research questions and generating quantitative, measurable concepts).

The seminars are organised around small group discussions to facilitate active peer learning in which students are intended to communicate, collaborate and discuss quantitative research with each other.

Reading Week: Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: Students will write one formative memo based on course readings and class activities.

Indicative reading:

Assessment: Memo (25%) in the AT.

Research proposal (75%) in the WT.

The first assessment is a 1500-word memo (25%). The second assessment is a 3500-word research proposal (75%). The proposal should outline your own research question utilising one data collection technique and one of the quantitative methods seen in class.

Attendance at all classes and submission of all set coursework is required.

SO492 Half Unit Qualitative Social Research Methods

This information is for the 2024/25 session.

Teacher responsible: Dr Jana Melkumova-Reynolds

Availability: This course is compulsory on the MSc in Culture and Society. This course is available on the MPhil/PhD in Sociology, MSc in City Design and Social Science, MSc in Economy and Society, MSc in Inequalities and Social Science, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Students who have this course as a core course are guaranteed a place. Other than for students for whom the course is a core course, places are allocated based on a written statement, with priority given to students on the MSc in City Design and Social Science, MSc in Economy and Society, MSc in Political Sociology, MSc in Sociology MPhil/PhD in Sociology. As demand is typically high, this may mean that not all students who apply will be able to get a place on this course.

Course content: The course introduces students to the theory and practice of qualitative research methods in sociology. The seminars address issues of research design, data collection and analysis in relation to qualitative research methods, including ethnography, in-depth interviewing, and textual analysis. Taking these methods together, we will build toward an understanding of best practice in qualitative inquiry. Based on the principle that doing is one of the best means of learning, this course is highly interactive and requires 'hands-on' participation in a series of practical exercises and project work throughout the term. A syllabus detailing course objectives, course style, readings, teaching arrangements and student assessment will be distributed at the beginning of the term.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the AT.

Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: Students must write a 1,000 word book review of a qualitative research study.

Indicative reading:

Assessment: Research report (100%) in the WT.

The assessment consists of an individual qualitative research report in the WT.

Attendance at all classes and submission of all set coursework is required.

SO493 MSc in Culture and Society Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Jana Melkumova-Reynolds

Availability: This course is compulsory on the MSc in Culture and Society. This course is not available as an outside option.

Course content: This workshop will guide students through the process of conducting an independent dissertation project in the MSc Culture & Society.

Teaching: A minimum of 6 hours of seminars in the WT.

There will be two sessions during AT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and provide basic guidance about planning your dissertation, such as selecting a suitable topic, designing the research and reviewing the existing literature.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Students are required to submit a research outline and a research proposal in WT.

Indicative reading: This is a workshop and has no specific reading list.

Assessment: Dissertation (100%, 10000 words) in August.

An electronic copy of the dissertation, to be uploaded to Moodle, no later than 4.00pm on Thursday 14th of August 2025.

Dissertations may be up to and no more than 10,000 words, must be Word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

SO494 MSc in Political Sociology Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Kristin Surak

Availability: This course is compulsory on the MSc in Political Sociology. This course is not available as an outside option.

Course content: These seminars aim to help you to begin the process of writing your dissertation. At the end of AT we will have a few seminars that aim to get students thinking at a meta-level about research in political sociology. The seminars can, of course, only address a small selection of approaches. Examples might include rational choice and institutionalist theories, or comparative and case study methods. But please note that the MSc in Political Sociology takes a pluralist approach and does not seek to prescribe these or any other particular theories or methods. In WT we will hold dissertation workshop seminars that aim to give individually tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics or using similar methods. Every student is required to make a formal presentation once during the term.

Teaching: In AT there will be 2 x 1.5 hour seminars for all students. In WT students will be expected to attend at least one of the 6 x 1.5 hour workshops.

There will be two sessions during AT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and provide basic guidance about planning your dissertation, such as selecting a suitable topic, designing the research and reviewing the existing literature.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: Students are expected to participate in seminars beginning in AT and produce a research statement and presentation in the WT.

Students will: (1) assess the strengths and weakness of selected theories and methods; (2) formulate a clearly specified research question and set out the rationale for researching this question and a proposed approach; and (3) give a presentation which develops one or two of the main arguments they anticipate will be important

to their project.

Indicative reading: Donatella Della Porta and Michael Keating (2008), *Approaches and Methods in the Social Sciences: a Pluralist Approach*, Thomas Janoski et al, (2005), *The Handbook of Political Sociology*, James Mahoney and Dietrich Rueschemeyer (2003), *Comparative Historical Analysis in the Social Sciences*.

Assessment: Dissertation (100%, 10000 words) in August.

An electronic copy of the dissertation, to be uploaded to Moodle, no later than 4.00pm on Thursday 14th of August 2025.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S0495

MSc in Economy and Society Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr David Pinzur and Dr Rebecca Elliott

Availability: This course is compulsory on the MSc in Economy and Society. This course is not available as an outside option.

Pre-requisites: Students must have completed Economic Sociology (S04D1).

Course content: The dissertation is an extended piece of written work that is your own independent research investigation of a social issue or problem, undertaken with the guidance of your dissertation supervisor. These workshops are meant to prepare you to produce an original piece of research. We will cover the expectations for the dissertation, as well as provide general guidance for deriving a research question that is appropriately situated in the themes of the programme; for developing an empirical strategy to study topics relevant to the programme; and for writing up conclusions that can speak to enduring questions in our area. In addition to consultation with faculty, in these sessions students will work in smaller groups to peer review their work-in-progress.

Teaching: 2 hours of seminars in the AT. 2 hours of seminars in the WT. 2 hours of seminars in the ST.

There will be two sessions during AT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and provide basic guidance about planning your dissertation, such as selecting a suitable topic, designing the research and reviewing the existing literature.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: Students are required to submit a project outline in WT.

Indicative reading:

- Alan Bryman, *Social Research Methods* (Oxford: Oxford University Press, 2004)
- Clive Seale, *The Quality of Qualitative Research* (London: Sage, 1999)
- Clive Seale (ed), *Researching Society and Culture* (London: Sage, 2012)
- Howard Becker, *Writing for Social Scientists* (Chicago: University of Chicago, 1986)

Assessment: Dissertation (100%, 10000 words) in August.

An electronic copy of the dissertation, to be uploaded to Moodle, no later than 4.00pm on Thursday 14th of August 2025.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S0496

MSc in Human Rights Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Mai Taha and Dr Ayça Çubukçu

The Programme Convenor is responsible for overseeing the Dissertation.

Availability: This course is compulsory on the MSc in Human Rights. This course is not available as an outside option.

Course content: The dissertation is an extended piece of written work that is your own independent research investigation of a human rights issue or problem, undertaken with the guidance of your dissertation supervisor. In the dissertation, you will critically appraise evidence, arguments and debates to reach a conclusion your research question. The key requirement is that the dissertation should demonstrate a high level of independent critical ability. You must show your ability to organise your material clearly and logically and to sustain a reasoned and cogent argument from beginning to end. Where appropriate you should explain clearly the research method(s) that you have applied and the reasons for your choice of approach. You should show awareness of any shortcomings of your study in relation to methods employed and where relevant, quality or quantity of the data, and disciplinary approach.

Teaching: 2 hours of lectures in the AT. 3 hours of seminars in the WT. 2 hour of seminars in the ST.

There will be one Introductory lecture in AT for all MSc Human Rights students, on the challenges and requirements of doing independent research for dissertation purposes, and different methodologies available for an inter-disciplinary programme. The Introductory session will also cover fieldwork and research ethics. This will be followed by 5 seminars/workshops in smaller groups, in which students present and discuss possible research questions and strategies, along with preparing dissertation proposal and timeline. There will be two sessions during AT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and provide basic guidance about planning your dissertation, such as selecting a suitable topic, designing the research and reviewing the existing literature.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: Students are required to submit an annotated bibliography in WT.

Indicative reading: Alan Bryman, *Social Research Methods* (Oxford: Oxford University Press, 2004)

Clive Seale, *The Quality of Qualitative Research* (London: Sage, 1999)

Clive Seale (ed), *Researching Society and Culture* (London: Sage, 2012)

Howard Becker, *Writing for Social Scientists* (Chicago: University of Chicago, 1986)

Assessment: Dissertation (100%, 10000 words) in August.

An electronic copy of the dissertation, to be uploaded to Moodle, no later than 4.00pm on Thursday 14th of August 2025.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

S0497

MSc in Inequalities and Social Science Dissertation

This information is for the 2024/25 session.

Teacher responsible: Prof Sam Friedman

Availability: This course is compulsory on the MSc in Inequalities and Social Science. This course is not available as an outside option.

Course content: These seminars aim to help you to begin the

process of writing your dissertation. At the end of AT we will have seminars that aim to get students thinking at a meta-level about research on inequalities and how to identify a good topic, including issues of theory, measurement and methods. Please note that the MSc in Inequalities and Social Science takes a pluralist approach and does not seek to prescribe these or any other particular theories or methods. In WT we will hold dissertation workshop seminars that aim to give individually tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics or using similar methods.

Teaching: 2 hours of seminars in the AT. 4 hours of seminars in the WT. 2 hours of seminars in the ST.

There will be two sessions during AT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and provide basic guidance about planning your dissertation, such as selecting a suitable topic, designing the research and reviewing the existing literature.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: A title, research proposal and annotated bibliography by the end of AT plus a presentation during the ST.

Indicative reading: Anand, S. (Ed) (2010) *Debates on the Measurement of Global Poverty*, Oxford: Oxford University Press
 Atkinson, A. (2015), *Inequality: what can be done?*, Harvard UP.

 Piketty, Thomas (2014), *Capital in the 21st century*, Harvard UP
 Wright, Erik O. (2005) *Approaches to Class Analysis*, Cambridge UP
Assessment: Dissertation (100%, 10000 words) in August.
 An electronic copy of the dissertation, to be uploaded to Moodle, no later than 4.00pm on Thursday 14th of August 2025.
 Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.
 Attendance at all classes and submission of all set coursework is required.

SO499

MSc in Sociology Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Ursula Henz

Availability: This course is compulsory on the MSc in Sociology. This course is not available as an outside option.

Course content: These workshops will guide students through the process of conducting an independent dissertation project on the MSc Sociology.

Dissertation Particulars

The dissertation is a report on an independent research project, based on primary empirical material, secondary empirical material or theoretical work on a body of social thought: i.e. there must be an identifiable and clear research question governing the research project; there must be critical reflection on the methods used (including their limits and the reasons why they warrant the kinds of claims made); and substantive analysis of empirical or analytical material. Even where the topic is substantively a documentary or policy-review exercise, candidates are expected to offer original reasoned argument and interpretation and to show evidence of a competence in research methods. Guidance on topic selection and methods will be provided by the candidate's Academic Mentor

and students are also encouraged to use the office hour system to consult more broadly with academic experts in their research area within the Department or across the LSE.

Teaching: There will be 4 hours of seminars in the WT, 2 hours of seminars in the ST.

There will be two sessions during AT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and provide basic guidance about planning your dissertation, such as selecting a suitable topic, designing the research and reviewing the existing literature.

Formative coursework: Students are required to submit one project abstract, and one piece of formative coursework; students are also required to submit a Research Ethics Review before undertaking empirical research.

1 x abstract

1 x project outline

Assessment: Dissertation (100%, 10000 words) in August.

An electronic copy of the dissertation, to be uploaded to Moodle, no later than 4.00pm on Thursday 14th of August 2025.

Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all classes and submission of all set coursework is required.

SO4A8 Half Unit

Leadership and Social Change

This information is for the 2024/25 session.

Teacher responsible: Dr Sara Camacho Felix CBG 12.04

Availability: This course is available on the MSc in Inequalities and Social Science. This course is not available as an outside option. This course is available only to Atlantic Fellows for Social and Economic Equity MSc students. This is a compulsory course for these students and non-AFSEE Fellows will not be permitted to take this course.

Course content: The course responds to the needs of the AFSEE Fellows to develop critical skills and understandings of leadership within various contexts and themes indexed to transforming global inequality. This approach marries a structural analysis of global inequality and its manifestations with critical analysis, reflexive thinking, as well as practical skills that will provide students with the tools to bring systemic change into being. Crucially, the course is heavily rooted in theories of practice, in which Fellows are introduced to and demonstrate a sound knowledge and critical appreciation of their field and its associated practice and research techniques, and show that these techniques can be successfully applied in revealing or challenging injustice and inequality. The course will consist of lectures, presentations, seminars and workshops. Lectures will introduce Fellows to key concepts, approaches and techniques for understanding and challenging inequality. Workshops and seminars will help Fellows clarify and deepen their understanding of points and issues raised in the lectures, through practical work carried out individually and in groups.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across WT and ST.

Week 1 – Reading Week of Winter Term - Leadership and Social Change

Week 2 – First Week after Spring Term - Leadership and Social Change

Teaching arrangements may be adjusted if online teaching is required at any point.

Formative coursework: There will be one piece of formative coursework, a 750 word essay outline for their policy report in response to a set question. The formative outline will be due in week 10 of Winter Term. Fellows will receive written feedback on the essay outline and will have the opportunity to discuss the written feedback with the Course Convenor. This formative

coursework is directly related to the summative essay which will be due in Spring Term.

Assessment: Presentation (30%) in the post-spring term.

Policy report (70%) in the ST.

70% Policy Report 2500 words.

S04B1

Contemporary Politics of Human Rights

This information is for the 2024/25 session.

Teacher responsible: Dr Mahvish Ahmad

Availability: This course is compulsory on the MSc in Human Rights and Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Students who have this course as a core course are guaranteed a place. Other than for students for whom the course is a core course, places are allocated based on a written statement, with priority given to taught postgraduate students in the Sociology Department. As demand is typically high, this may mean that not all students who apply will be able to get a place on this course.

Course content: During a period of unprecedented changes in social, political, technological, ecological, and cultural spheres key human rights ideas and institutions are being revisited, criticised, or attacked. The story of human rights as the product of a western enlightenment solidified via an international consensus that emerged after the Second World War is being rewritten, bringing attention to competing ideas of rights and justice proposed for instance by anti-colonial figures and movements. Meanwhile, human rights as a powerful exemplar of political liberalism has come under sustained criticism for their institutionalised, procedural, and legalistic nature. Critics say this formalistic approach has obscured relations of power, including racial, classed, gendered, and human-nature inequalities allowing the defence of human rights to be used as a justification for domination and hierarchy, for instance via the deployment of imperial war to protect women and minorities. Finally, liberal human rights face an unprecedented attack by authoritarian, populist, and fascist states and movements. We are today witnessing a roll-back of legal protections for migrants and refugees; indigenous communities; women, trans and non-binary

peoples; racial, ethnic, and religious minorities; the environment; the poor and working classes, and others. All this is happening at a time of major social upheaval that bring attention to the limits of the human rights framework including migrant crises, the rapid development of artificial intelligence, a global pandemic, and climate disaster. The multiple and contradictory crises facing human rights raises difficult questions for those committed to social, political, economic, and ecological justice: Do we retain and protect human rights in its current, liberal form—or does it need to be fundamentally revised, perhaps even rejected and replaced with another kind of political project? Those asking such questions find themselves turning to ideas and movements not captured by the languages of human rights and their institutional and legal framing, including the politics of antifascism, abolition, antiracism, feminism, anticolonialism, reparations, and more.

This interdisciplinary course examines many of the sharp tensions and contradictions in the contemporary politics of human rights—bringing particular attention to alternative ideas that seek to expand, reconfigure, or replace human rights as a politics for justice. The course provides students with conceptual tools through which to tackle unsettled issues, rather than clear and definitive answers to difficult questions around the future of human rights. It considers the entanglements between human rights, empire, and anti-imperialism; its universalist claims; its relation to capitalist and neoliberal economic orders; and its understanding of what constitutes the human. And, it critically examines the external and internal pressures on the human rights project; mainstream human rights practices like the documentation of “wrongs” and the mobilization of feelings; and the alternative shapes that struggles for social, economic, political, and ecological justice can take at a time of global crisis.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 40 hours across AT and WT.

There will be a Reading Week in Week 6 of both Autumn Term and Winter Term.

Formative coursework: Students should submit two formative essays, 1,000 words each, one in Week 6 of Autumn Term and one in Week 6 of Winter Term.

Assessment: Essay (50%, 3500 words) in the WT.
Essay (50%, 3500 words) in the ST.

Attendance at all classes and submission of all set coursework is required.

SO4B2

MSc in Human Rights and Politics Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Mahvish Ahmad

Availability: This course is compulsory on the MSc in Human Rights and Politics. This course is not available as an outside option.

Course content: The dissertation provides you with an opportunity to develop an independent research question tackling a conceptual or empirical predicament that you are grappling with within the broad field of human rights and politics. Dissertation workshops aim to support your development as a thinker and researcher who produces an independent piece of writing. Workshops will help you to begin the process of writing your dissertation, develop your ideas further, and learn about a range of research methods and techniques. They will run alongside individual meetings with your dissertation supervisor.

During Autumn Term, a set of extended lectures aim to get students thinking about research on human rights and politics, starting with how to identify a strong research problem. In Winter Term and Spring Term, dissertation workshops will cover a range of topics, including the structure of a dissertation, ethical and practical challenges in research, refining your research problem, deciding on research methods, analysing data, and writing the dissertation. The workshops aim to give tailored guidance on proposed research questions in small groups with fellow students who are working on similar topics. The MSc in Human Rights and Politics takes a pluralist approach towards topics, concepts and research methods and does not seek to prescribe any particular areas of research, theories or methods.

Teaching: 2 hours of lectures in the AT. 3 hours of seminars in the WT. 2 hours of seminars in the ST.

These seminars are for students on the MSc Human Rights and Politics only.

In addition to the above teaching, there will be two sessions during AT for ALL MSc students based in the Sociology department. These will be offered in conjunction with LSE Life and LSE Library and provide basic guidance about planning your dissertation, such as selecting a suitable topic, designing the research, and reviewing the existing literature.

Formative coursework: Students will be required to submit a provisional dissertation title in AT, plus an extended dissertation statement in WT.

Indicative reading: Seale, C. (2018), *Researching Society and Culture* (Fourth Edition), Sage.

Cerwonka, Allaine & Liisa H. Malkki. 2007. *Improvising Theory: Process and Temporality in Ethnographic Fieldwork*. Chicago University Press.

Small, Mario Luis & Jessica McCrory Calarco. 2022. *Qualitative Literacy: A Guide to Evaluating Ethnographic and Interview Research*. University of California Press.

Smith, Linda Tuhiwai. 1999. *Decolonizing Methodologies*. Zed Books.

Assessment: Dissertation (100%, 10000 words) in August. An electronic copy of the dissertation, to be uploaded to Moodle, no later than 4.00pm on Thursday 14th of August 2025. Dissertations may be up to and no more than 10,000 words, must be word-processed and be fully referenced using a recognised citation system.

Attendance at all workshops and submission of all set coursework is required.

SO4B3 Half Unit Not available in 2024/25

Seeing like an NGO: Human Rights in Practice

This information is for the 2024/25 session.

Teacher responsible: Prof Monika Krause STC.S207

Availability: This course is available on the MSc in Human Rights and MSc in Human Rights and Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in Human Rights and MSc in Human Rights and Politics. This may mean that not all students who apply will be able to get a place on this course.

Course content: This module invites students to examine practices in human rights NGOs as a case for the sociology of knowledge and expertise. The course will familiarise students with theoretical and analytical tools, which sociologists use to understand expert practices and practices in organizations, as well as with current sociological research on international NGOs. Students will be asked to participate in two simulation activities as part of this module: In one session, students will work in teams to develop advocacy projects. In a separate, day-long activity, we will study professional standards in human rights and related fields and then meet to review evidence on a specific setting – the ongoing crisis in the fictional context of Ruritania. Working in different teams, students will develop proposals for concrete interventions that might further human rights in Ruritania. We will reflect on the simulation in terms of the assumptions and knowledge-claims we have made and encountered and their implications for broader sociological questions. We will discuss conclusions in three areas: First, we can discuss conclusions in terms of questions in the sociology of expert practice; second, we will discuss conclusions in terms of skills students have used, and might need to develop; thirdly, we will discuss what our observations mean for how we can best pursue practical goals relating to social change and human rights.

Teaching: This course is delivered through a combination of lectures, online materials, seminars and simulations totalling a minimum of 20 hours in the LT.

This course includes a day-long session on the Saturday of week 7 or week 8. Please make sure to check your calendar before enrolling on this course.

These teaching arrangements may change if online teaching is required at any point during the Lent Term.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: Students have the option of handing in a formative essay of 1,500 words addressing knowledge practice in a field other than human rights in week 6. If completed by the deadline, students will receive feedback within two weeks.

Indicative reading:

 - Weber, Max. 1996. *Bureaucracy*, in: *Essays in Sociology*. London: Routledge, pp. 196-216.
 - Wong, Wendy. 2012. *Internal Affairs: How the Structure of NGOs Transforms Human Rights*. Ithaca Cornell University Press.

Assessment: Essay (100%, 5000 words) in the ST.

For their assessment students will complete an essay that does not exceed 5000 words in length. The essay will respond to an analytical provocation by drawing on observations from the simulation activities.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Wednesday of Summer Term.

SO4B5 Half Unit The Anticolonial Archive

This information is for the 2024/25 session.

Teacher responsible: Dr Sara Salem

Availability: This course is available on the MSc in Gender (Rights and Human Rights), MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Sociology. As demand is typically high, this may mean that not all students who apply will be able to get a place on this course.

Course content: This course focuses on anti-colonial movements to explore the postcolonial moment that emerged after the end of European empire. It addresses debates within postcolonial studies and political sociology, looking at the legacies and afterlives of empire and what these mean for our current moment. We trace conversations anti-colonial movements had around nationalism; capitalism and geopolitics; resistance, subjectivity and modernity; and global patterns of inequality. The course investigates these topics through various "anticolonial archives," including theoretical texts by major anticolonial and postcolonial theorists, literature, archival data, posters, images, speeches, films, memoirs and private correspondence.

The course addresses the following themes: we explore how we might think of anticolonial archives as sources of anticolonial history, and how this changes the way we look back at historical events; we explore anticolonial movements through some of the major theoretical texts that emerged during this moment by thinkers such as Frantz Fanon, B.R. Ambedkar, Kwame Nkrumah, Claudia Jones, Aimé Césaire, Chandra Mohanty, and Edward Said, among others, in order to sketch out the theoretical stakes of decolonisation and in particular the multiple alternative postcolonial projects that were proposed; we focus on two particular features of anticolonial movements and the postcolonial states they produced: their internationalism on the one hand and their focus on nationalism on the other; and we look

at internationalist and third worldist movements such as pan-Africanism, pan-Arabism, transnational feminism and Third World Marxism—particularly through the lens of international spaces such as the Marxist 'internationals,' the Afro-Asian Conference at Bandung and the Pan-African Congresses—before delving more deeply into particular national contexts (cases include South Africa, Algeria, Egypt, India and Cuba). The course ends by addressing the afterlives of empire, assessing the emergence of postcolonial states; global migration and the end of empire; the effects of the global neoliberal project on the postcolonial world; and contemporary debates around postcolonial/decolonial theory.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the AT.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy

Formative coursework: Students will be expected to produce 1 essay in the AT.

A 1,500 word reflective essay to be handed in during Week 7 of AT that takes a particular object or material from an "anticolonial archive" and discusses it in relation to the course themes, readings, and questions. This may be used to build an online "anticolonial archive" based on the course as a whole, on the LSE Sociology website. This should lay the basis for a topic or set of questions which you will explore in your summative essay. The formative is intended as an opportunity to begin to explore the various anticolonial archives and how to approach materials within them in relation to theoretical questions.

Indicative reading: Indicative readings:

Chatterjee, P., 2012. *The black hole of empire: History of a global practice of power*. Princeton University Press.

Fanon, F., 1963. *The wretched of the earth*. New York: Grove Press.

Gordon, A.F., 2008. *Ghostly matters: Haunting and the sociological imagination*. University of Minnesota Press.

Kelley, R.D., 2002. *Freedom dreams: The black radical imagination*. Beacon Press.

Krug, Jessica. 2019. *Fugitive Modernities: Kisama and the Politics of Freedom*. Duke University Press.

Mahler, A.G., 2018. *From the Tricontinental to the global South: race, radicalism, and transnational solidarity*. Duke University Press.

Said, E.W., 1983. *The world, the text, and the critic*. Harvard University Press.

Scott, D., 2004. *Conscripts of modernity*. Duke University Press.

Singh, J., 2017. *Unthinking mastery: Dehumanism and decolonial entanglements*. Duke University Press.

Steinmetz, G. ed., 2013. *Sociology and empire: the imperial entanglements of a discipline*. Duke University Press.

Assessment: Essay (85%, 4000 words) in the WT.

In-class assessment (15%) in the AT.

15% of the final mark will be given for a presentation during one seminar and participation throughout.

The in-class presentation is a way to ensure participation and a deeper engagement with the material. It also allows students to respond to material in creative ways. This presentation will be collaborative and will explore a particular knowledge object.

We will complete a reading round at the start of each class, during which students will spend a few minutes reflecting on the readings and pointing to any questions they may have raised. Students are expected to participate in this every week, and this is what counts towards participation throughout, which together with an in-class presentation adds to the 15%.

SO4B6 Half Unit Not available in 2024/25 Nature and Technology: More than Human Sociology

This information is for the 2024/25 session.

Teacher responsible: Dr Carrie Friese STC.S213

Availability: This course is available on the MSc in Culture and Society, MSc in Economy and Society and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in Culture and Society, MSc in Economy and Society and MSc Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: The premise of this course is that, to understand social life, we need to go beyond human subjects to also consider our relations with other living species and inanimate things. In this course we will explore how the more than human social world can be theorised, thus providing an alternative to the twin modernist notions of nature as the grounds for society as well as technology as the human construction of the material world. The theorists we will read in this course are largely located within Science and Technology Studies, and may include: Karen Barad, Vinciane Despret, Donna Haraway, Bruno Latour, Maria Puig de la Bellacasa and/or Isabelle Stengers. Drawing on these theorists, we will ask how entities like cells and microbes or plants and animals or digital and mechanical technologies shape human social life. Examples may be in the fields of: (re) production, infectious diseases, weather and climate, health care provision and/or commodity supply chains. We will explore how more than human perspectives on these processes reshapes sociological understandings of capitalism/post-capitalism, power and biopolitics, humanitarianism and rights, and/or inequalities. Through these theories and empirical case studies, across the course we will ask what it means to be human today, and we will probe the ethics involved in living together in power laden, affective relations with other species and things in remaking the planet.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 20 hours in the LT.

Reading Weeks: Students on this course will have a reading week in LT Week 6, in line with departmental policy.

Formative coursework: Essay plan of 1,500 words.

Indicative reading:

- Barad, Karen. (2007) *Meeting the Universe Halfway: Quantum Physics and the Entanglement of Matter and Meaning*. Durham: Duke University Press.
- Chakrabarti, Pratik. (2012) *Bacteriology in British India: Laboratory Medicine and the Tropics*. Rochester: University of Rochester Press.
- Elias, Ann. (2019) *Coral Empire: Underwater Oceans, Colonial Tropics, Visual Modernity*. Durham: Duke University Press.
- Haraway, Donna J. (2016) *Staying with the Trouble: Making Kin in the Chthulucene*. Minneapolis: University of Minneapolis Press.
- Kohn, Eduardo. (2013) *How Forests Think: Toward an Anthropology Beyond the Human*. Berkeley: UC Press.
- Latour, Bruno. (2018) *Down to Earth: Politics in the New Climatic Regime*. Cambridge: Polity.
- Snaza, Nathan. (2019) *Animate Literacies: Literature, Affect, and the Politics of Humanism*. Durham: Duke University Press.
- Puig de la Bellacasa, Maria. (2017) *Matters of Care: Speculative Ethics in the More than Human Worlds*. Minneapolis: University of Minneapolis Press.
- Tsing, Anna. (2017) *The Mushroom at the End of the World: On the Possibility of Life in Capitalist Ruins*. Princeton: Princeton University Press.
- Vora, Kalindi and Neda Atanasoski. (2019) *Surrogate Humanity: Race, Robots, and the Politics of Technological Futures*. Durham: Duke University Press.

Assessment: Essay (90%, 4000 words) in the ST. Class participation (10%) in the WT.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the third Wednesday of Summer Term.

Attendance at all seminars and submission of all set coursework is required.

SO4B7 Half Unit Lawful Violence

This information is for the 2024/25 session.

Teacher responsible: Dr Mahvish Ahmad

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Sociology. As demand is typically high, this may mean that not all students who apply will be able to get a place on this course.

Course content: This course investigates lawful violence sanctioned and deployed by modern nation states. We pay particular attention to philosophical legitimations, institutional formations, and circulating techniques of state-sanctioned violence. Through an expansive corpus of intellectual work – including journal articles and books, abolitionist manifestoes, prison writings, anti-militarist films, testimonials from sites of war, and political poetry – we analyse police, prisons, armies, border regimes, surveillance technologies, legalised weaponry, paramilitary outfits, private security, militarised occupation, detention centres and more. The relationship between state violence and racial, colonial, imperial hierarchies; gendered and patriarchal orders; and the management of class, capitalism, and late neoliberalism will structure our conversations throughout the term.

The course begins by conceptualising the relationship between state, law, and violence, paying particular attention to a classic definition of the state as an entity that holds the legitimate monopoly over violence within a defined territory. In this first part of the course, we revisit the philosophical and historical underpinnings that led to the emergence and solidification of the violence-making institutions of the state. This includes a critical interrogation of the figure of the 'terrorist', 'criminal', 'traitor', and others considered legitimate targets of state violence. We also focus on technologies of violence, including prisons, immigrant detention, counterterror confinement, drone warfare, privatised security and surveillance. Finally, we look at grassroots movements including abolitionist, anti-war, anti-racist, and anti-colonial movements in places like Kashmir, the US, Iran, Egypt, Balochistan, South Africa, Hong Kong, Brazil, and elsewhere. Throughout this course, students will gain a solid understanding of state violence—and alternative imaginations of political community and justice that fundamentally refigure the place of violence and its relationship to collective life.

Teaching: This course is delivered through a combination of short lectures, student interventions on select research projects, and discussion-based seminars totalling a minimum of 20 hours in WT. The student interventions are an especially key pedagogical tool within this course. All students will present an independent research project via short oral interventions in class on which they will receive detailed feedback from the instructor. This will form the basis of formative and summative assignments (see below). Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

The formative assessment will consist of one 800-word abstract which will form the basis for a summative essay.

Indicative reading:

- Stuart Hall, *Policing the Crisis: Mugging, the State and Law & Order*, (Red Globe Press, 2013).

Assessment: Essay (85%, 4000 words) in the ST.

Group presentation (15%) in the WT.

15% will be given for a student intervention. Students will present via a short student intervention delivered verbally in class on a chosen, original research topic that will also form a final, summative essay. This encourages students to take active part in the seminar throughout the Winter Term, discuss their ideas intensely with their presentation group, and gain feedback on original research and ideas from the rest of the class.

85% of the final mark will be given for a 4000-word essay on an original research topic to be prepared in Spring Term. The original research topic will draw from the student presentations and will be based on a formative abstract submitted in Winter Term. This mark

ensures that students will develop independent intellectual work in relation to the topics covered in class.

Attendance at all seminars and submission of all set coursework is required.

SO4B8 Half Unit

Internationalism and Solidarity

This information is for the 2024/25 session.

Teacher responsible: Dr Ayça Çubukçu

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Sociology.

This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Political Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: Given the frequent overlap, in theory and practice, between visions of internationalism and cosmopolitanism on the one hand, and the remarkable internal variation—to the extent that two different and coherent bodies of thought can be said to exist in the first place—within internationalism and cosmopolitanism on the other, how should we think about the divergences and convergences between these two visions? When different versions of internationalism and cosmopolitanism as expounded and practiced by various theological traditions are added to the matrix along with their feminist, anarchist, regionalist, Third-Worldist, nationalist and militarist articulations, the nature of these phenomena proves too complicated to grasp in a single breath. This course aims to examine this problem by addressing the complications that arise in attempts to define, critique, and practice various strands of internationalism and cosmopolitanism. Cases considered will include communist internationalism, feminist internationalism, anarchist internationalism, Third-Worldism, human rights and liberal internationalism, and Black internationalism.

Teaching: This course is delivered through seminars totalling a minimum of 20 hours in the WT.

Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Abstract (700 words) and bibliography of the summative essay to be submitted in week 8.

Indicative reading: This is an indicative list. Titles may vary year to year.

- Kant, *Perpetual Peace and Other Essays*;
- Marx and Engels, *Communist Manifesto*;
- Lenin, *Right of Nations to Self-Determination*;
- Hallas, *The Comintern*;
- CLR James, *World Revolution*;
- Mohanty, *Feminism Without Borders*;
- Anderson, *Under Three Flags: Anarchism and the Anti-Colonial Imagination*;
- Hemmings, *Considering Emma Goldman*;
- Prashad, *Darker Nations*;
- Gilroy, *Postcolonial Melancholia*;
- Hopgood, *Keepers of the Flame*;
- Moyn, *Last Utopia*;
- Chun-Mu, *Radicals on the Road: Internationalism, Orientalism, and Feminism during the Vietnam Era*
- Makalani, *In the Cause of Freedom: Radical Black Internationalism from Harlem to London, 1917-1939*;
- Wilder, *Freedom Time: Negritude, Decolonization and the Future of the World*;
- Mahler, *From the Tricontinental to the Global South: Race, Radicalism, and Transnational Solidarity*;

- Boaventura de Sousa Santos, *The Rise of the Global Left: The World Social Forum and Beyond*

Assessment: Research paper (90%) in the ST.
Class participation (10%) in the WT.

SO4B9 Half Unit The Sociology of Consumption

This information is for the 2024/25 session.

Teacher responsible: Dr Rebecca Elliott

Availability: This course is available on the MSc in Culture and Society, MSc in Economy and Society and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students on the MSc in Culture and Society, MSc in Economy and Society and MSc in Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: Why do we want the things we want and what do those things say about us? How does consumption reflect and reproduce differences and inequalities of various kinds? What are the social origins of market demand? How did consumption-centred cultures develop and what are their ecological consequences? What does it mean for consumption to be 'sustainable' or 'ethical'?

This course offers a sociological engagement with consumption. It begins from the premise that while we may think of ourselves as individual consumers, how we use resources, our taste for particular goods, and our everyday consumption habits and practices are socially derived and socially structured in profound ways. Issues related to consumption are situated at the intersections of economic, cultural, and environmental sociology and the course will draw on theory and empirical research from all three subfields.

Topics covered in the course include: the social origins of taste; the rise of consumerism; collective consumption and energy use; fashion; the social organization of waste; shopping as social practice; and ethical/sustainable consumption.

LSE offers three courses addressing consumption: MG404 Consumer Insights: Behavioural Fundamentals and PB417 Consumer Psychology address consumer behaviour. SO4B9 Sociology of Consumption takes a more macro level and examines consumption at society level. MG404 is designed for the students of Management to complement their curriculum, and PB417 targets the (future) decision-makers and advisers in business and organisations dealing with consumers, including non-commercial. SO4B9 is primarily intended for students on Sociology programmes with interests in culture, inequality, and the relations between the economy, the environment and society.

There are some similarities in the content of MG404, PB417 and SO4B9. Broadly, PB417 and MG404 courses introduce the psychological foundations of consumer behaviour, and are intended to equip students to apply psychological theories to business situations. There are, however, important differences in the orientations of the two courses.

MG404 is intended for students studying management and related disciplines who want to learn how to influence consumer behaviour (e.g., how to construct persuasive advertising or sway purchase decisions). MG404 introduces the principles of consumer behaviour that firms need to recognize in order to successfully market their products and services, and which consumers themselves can use to make optimal decisions.

PB417 provides a skillset and a toolbox of theories and methods for analysing consumer demand, finding the levers for change and building sustainable business models. For assessment, students choose a real case and write a set of (justified) recommendations to the CEO. PB417 may especially be of interest to students across a broad range of programmes who are interested in developing

new modes of relationship with consumers or building sustainable business models as an alternative to the current consumer society. The courses share some content where appropriate; other content differs in accordance with the different goals of the two courses. SO4B9 critically examines consumption patterns and practices as rooted in culture, political economies, material infrastructures, and social structures. The course introduces a range of social theory engagements with the question of consumption, which provide diverse ways of thinking about the relations between individuals, societies, and the planet. For assessment, students will develop sociological analyses of their consumption practices in relation to the social theory introduced on the course.

Teaching: 30 hours of seminars in the WT.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce one 1500-word essay in the WT.

Indicative reading:

- Banks, Patricia A. 2021. Race, Ethnicity, and Consumption: A Sociological View.
- Bourdieu, Pierre. 1984. Distinction.
- Cairns, Karen, Josee Johnston and Nora MacKendrick. 2013. "Feeding the 'Organic Child': Mothering through Ethical Consumption." *Journal of Consumer Culture* 13(2): 97–118.

- Warde, Alan. 2005. "Consumption and Theories of Practice." *Journal of Consumer Culture* 5(2): 131–53.

Assessment: Essay (90%, 3000 words) in the ST.

Group presentation (10%) in the WT.

Attendance at all seminars, completion of set readings and submission of set coursework is required.

SO4C1 Half Unit Fascism, Authoritarianism, Populism

This information is for the 2024/25 session.

Teacher responsible: Prof Chetan Bhatt

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students on the MSc in Human Rights, MSc in Human Rights and Politics, MSc in Political Sociology and MSc in Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: In this course, we examine the global rise over the last decade of authoritarian populist, neo-fascist, neo-Nazi and ethno-supremacist movements, leaders and states, and we consider the threats they pose for international human rights. The course is international in scope and subject matter. Its approach is interdisciplinary, and we will be drawing on political, sociological and philosophical disciplines during the course. We will cover key developments in Eastern and Western Europe, North and South America, India, the Philippines and other regions. We will look at older and contemporary academic debates about the nature of populism and fascism. The course aims to move beyond the conceptual limitations of many recent academic debates, and you will have an opportunity to apply new and developing conceptual

frameworks to understand particular far-right phenomenon. In addition to country and regional case studies, we will cover a range of themes, including: the nature of authoritarian populism in the West and the Global South; the international organization of neo-Nazism and neo-Fascism (including the 'alt right', the 'alt lite', QAnon, the European New Right and the counterjihad movement); authoritarian populist governance in Brazil, India, Argentina and the Philippines; new media and the transformation of political communication; knowledge and truth in authoritarian populist discourse; the assaults on minorities; and the consequences for political liberalism, democracy and international human rights.

Teaching: This course is delivered through a combination of lectures, seminars, workshops and online materials, totalling a minimum of 20 hours in the AT.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: One 1,000 word essay outline chosen from a set list of questions, and which is to be handed in during the middle of the term in which the course is taught. Feedback on formative work will be provided in individual face to face meetings in written and verbal form; general formative feedback will also be provided during seminars.

Indicative reading:

Assessment: Project (100%, 4000 words) in the WT.

A 4,000 word project that you will undertake independently. The project can be a conceptual or theoretical essay or it can be an application of ideas, concepts and content from across the course to an analysis of a specific contemporary or historical case, event, theme or visual material. The project will be based on a question or title that you will agree with the course convenor. The project must be based directly on themes and topics covered in this course. Detailed guidance on what makes for a strong project and the main criteria for its assessment will be provided to you during the course.

Attendance at all seminars and submission of all set coursework is required.

S04C2 Half Unit Not available in 2024/25 Racial Capitalism

This information is for the 2024/25 session.

Teacher responsible: Dr Sara Camacho Felix CBG 4.07

Availability: This course is available on the MSc in Inequalities and Social Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students on the MSc in Inequalities and Social Science. This may mean that not all students who apply will be able to get a place on this course.

Course content: This course analyses the historical and structural mechanisms that connect modern capitalism to forms of racial domination and exclusion. It begins with a historical account, analysing the centrality of the expropriation of indigenous land, labour and resources and traces the rise and development of plantation slavery. The course also explores the late colonial period, examining the creation of global labour chains through indenture, factory organisation and new forms of debt and extraction. Finally, the course examines processes of decolonisation as well as the creation of a globalised economic order from the 1980s to the 2000s.

Key topics include slave economies, resource extraction, land rights, debt, global indenture, colonial economies, industrial labour, political rights, economic redistribution, welfare, immigration, decolonisation, and globalisation. Each of these will be analysed not only in their historical and economic contexts, but as concepts that have racial, social, moral and political functions, and that profoundly help to reshape social and racial boundaries. The course also explores sites of resistance to racial capitalism. This includes international solidarity movements, interracial unionism, anticolonial socialisms, the rise of more radical international structures and the possibility of reparations.

The course draws on the traditions of Black Marxist and Radical thought, Critical Race Theory, De/Coloniality, and Black Feminist traditions, and will include work by Eric Williams, Walter Rodney, Cedric Robinson, Angela Davis and Ruth Gilmore Wilson.

Teaching: 20 hours of seminars in the WT.

The course will be team-taught. We will use a mixture of lecture, discussion and group seminar activities. During week 6, students will receive additional training in producing podcasts.

Teaching arrangements may be adjusted if online teaching is required at any point.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce a 1,500 written introduction, literature review and outline of their final essay project, due in Week 7 of Winter Term.

Indicative reading: 1 Prathama Banerjee (2020), 'Labour, Hunger and Struggle' and 'Equality and Economic Reason', in *Elementary Aspects of the Political: Histories from the Global South*, Duke University Press.

7 Eric Williams, (1943), 'Chapter One: The Origin of the Negro Slavery' and 'Chapter 5: British Industry and the Triangular Trade', in *Capitalism and Slavery*, University of North Carolina Press.

8 Cedric J. Robinson (2000), 'Chapter One: Racial Capitalism', in *Black Marxism: The Making of the Black Radical Tradition*, 2nd Edition, University of North Carolina Press.

9 Walter Rodney (2018), 'Chapter Five: Africa's Contribution to the Capitalist Development of Europe' and 'Chapter Six: Colonialism as System for Underdeveloping Africa', in *How Europe Underdeveloped Africa*, Verso, London.

Assessment: Essay (80%, 3500 words) in the ST.

Presentation (20%) in the WT.

The presentation will be a 10-15 minute case study presentation (podcast).

Attendance at all seminars and submission of all set coursework is required.

SO4C3 Half Unit Not available in 2024/25 Social Mobility, Politics and Meritocracy

This information is for the 2024/25 session.

Teacher responsible: Prof Mike Savage STC S210

Availability: This course is available on the MSc in Inequalities and Social Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students on the MSc in Inequalities and Social Science. This may mean that not all students who apply will be able to get a place on this course.

Course content: The analysis of social mobility has been one of the strongest specialisms in sociology since the 1950s. It addresses how far inequality of outcomes may be related to inequality of opportunity, by considering the prospects of upward and downward mobility from different social positions. It raises fundamental questions about how inequalities of class, gender, race & ethnicity, nationality (and other axes) shape people's social trajectories. This course will introduce students to theoretical and methodological issues in the study of social mobility, including structural analyses of frequency and propensity along with qualitative studies of the experience of mobility and immobility. The course will consider exemplars of cutting-edge studies across the globe. Students will be introduced to the best contemporary exemplars of social mobility research to inform them in their own studies.

Teaching: This course is delivered through a combination of lectures, seminars and online materials totalling a minimum of 20 hours in the WT.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce a 1000 word book review in week 6 of WT.

Students will sit a test on interpretation of quantitative analyses of social mobility in week 4 of WT.

Indicative reading: Mike Savage, *The Return of Inequality: Social Change and the Weight of History*, Harvard University Press, 2021. Shamus Khan, *Privilege*, Princeton UP, 2010

Sam Friedman and Daniel Laurison, *The Class Ceiling: why it pays to be privileged*, Bristol University Press, 2019

Lee Eliot Major and Stephen Machin, *Social Mobility and its Enemies*, Penguin, 2019

Khan, S.R., 2012. *Privilege: The making of an adolescent elite at St. Paul's School* (Vol. 56). Princeton University Press.

Rivera, L.A., 2015. *Pedigree: How elite students get elite jobs*. Princeton University Press.

Reay, Diane, 2018, *Miseducation: Inequality, Education and the Working Classes*, Polity

Assessment: Essay (100%, 5000 words) in the ST.

An electronic copy of the assessed essay, to be uploaded to Moodle, no later than 4.00pm on the first Thursday of Spring Term. Attendance at all seminars and submission of all set coursework is required.

SO4C4 Half Unit Global Mobilities: International Migration

This information is for the 2024/25 session.

Teacher responsible: Dr Kristin Surak

Availability: This course is available on the MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students who have this course listed in their

programme regulations. This may mean that not all students who apply will be able to get a place on this course.

Course content: International migration is one of the fastest growing subfields of the social sciences. If phenomenon is hardly new (and indeed not as common as many assume - only 3% of the world's population falls under the UN's definition of international migrant), it nonetheless grabs newspaper headlines, impacts political outcomes, transforms economies, and has profound consequences for many people. To unpack these complexities and the stakes at play, this class will cover key facets of international migration, addressing a different angle every week. To narrow this wide field, we will focus on macropolitical aspects of international migration: specifically why, when, how crossing a nation-state border matters and the role of states in producing international migration. It's the politics of borders that make it a very different wager to move 5000 kilometers between New York and Los Angeles, that then the mere 50 kilometers between San Diego in the US and Tijuana in Mexico, one of the busiest border-crossings in the world. In unpacking these cross-border dynamics, we will examine international migration processes in different parts of the world, such as the Gulf, East Asia, and Southeast Asia.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Indicative reading:

Assessment: Essay (100%, 4000 words) in the ST.

SO4C5 Half Unit The Social Life of Infrastructure

This information is for the 2024/25 session.

Teacher responsible: Dr David Pinzur

Availability: This course is available on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Economy and Society and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students on the MSc in City Design and Social Science, MSc in Culture and Society, MSc in Economy and Society and MSc in Sociology. This may mean that not all students

who apply will be able to get a place on this course.

Course content: We are all at least vaguely aware of the multitude of infrastructures that undergird our everyday lives: the global shipping and storage services that bring goods to our homes, the electronic networks that move our money from one account to another, the digital protocols that shape our experiences online. This course treats these infrastructures not as purely material objects (the province of engineers or computer scientists), but rather as densely social phenomena. Drawing on an interdisciplinary, social scientific literature on topics ranging from sewers to SWIFT, the course examines the complex, materially mediated webs of relations and practices that make infrastructures work. This approach highlights a distinct set of concerns. We will examine not only how infrastructures function, but how they produce distributive consequences, alter the nature of politics, articulate with legal and organisational arrangements, and embed beliefs, values, and ways of understanding the world. This situates our analysis of infrastructure as part of a broader concern with the nature of power in hybrid, socio-material environments. The course will provide a set of theoretical and methodological tools for analysing how infrastructures entrench inequalities and expand methods of dominance and control on the one hand, while generating new strategies and means for contesting orders of rule on the other.

Teaching: 25 hours of seminars in the AT.

Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT.

In Week 9, students will turn in and post to a dedicated Moodle forum, a 1000-word extended abstract that provides a preliminary description and justification of the case that will feature in their summative research prospectus. This will also include an indicative bibliography (not included in word count).

Indicative reading:

- David Pinzur. 2021. "Infrastructural power: Discretion and the dynamics of infrastructure in action." *Journal of Cultural Economy* 14(6): 644-661.

Assessment: Presentation (10%, 500 words) in the AT.

Essay (90%, 4000 words) in the WT.

Presentation (10%) - Each student will sign up to lead a small seminar discussion in a group of 4-5 people for one week of the term. On this week, students will also post on Moodle a 500 word

plan for the seminar discussion, including introductory comments and discussion question. The mark will reflect the written component of the presentation only.

Essay (90%) - Each student will write a prospectus for a potential research project on an infrastructure of their own choosing. This will have a 4,000-word limit and be due in the Winter Term. The essay will not involve collection or analysis of new data. Rather, it will ask students to: 1) identify an infrastructure that has potential to be the site of valuable, future research; 2) discuss the history of this infrastructure, its importance, and what makes it amenable to 'infrastructural inversion'; 3) analyse the potential theoretical value of this research, drawing on course concepts and literature; 4) sketch the data sources that could form the basis of this empirical research.

S04C6 Half Unit Reading Black Thought

This information is for the 2024/25 session.

Teacher responsible: Dr Olivia U. Rutazibwa

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Inequalities and Social Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Inequalities and Social Science. This may mean that not all students who apply will be able to get a place on this course.

Course content: This course offers a collective close reading of selected African and (politically) Black thinkers and texts in the context of ongoing conversations of decolonisation and decoloniality.

Peoples of African descent have historically been subjected to sustained mass human rights violations: violence, dehumanisations, captivity, destruction of life environment, forced labour and imposed poverty. Deconstructive critical, decolonial approaches have revealed the extent to which existing hegemonic Human Rights regimes, set out to combat these injustices, instead more often than not sustain colonial status quo in the present. The course is organised around 5 themes (1) Epistemologies, (2) Political Decolonisation and Self-determination, (3) Ecology and Political Economy of Global Racial Capitalism, (4) Gender, Race and the (im)possibility of the Human, (5) Conviviality and Transversal Solidarities) to engage the ethos of human rights constructively; it turns to epistemic Blackness to expand our sociological imagination of the good life, it thus engages with epistemic Blackness for decolonial rather than identitarian purposes. Through a close reading of historical and contemporary Black Thought we seek to unearth forgotten aspects, new perspectives, alternative priorities of human rights as well as address questions of possibilities and impossibilities of human rights for all.

Teaching: 30 hours of seminars in the AT.

The weekly 3h seminars are centred around students' understandings of the required reading materials.

Reading Weeks: Students on this course will have a reading week in AT Week 6, in line with departmental policy.

Formative coursework: max. 500 words reading summary of chosen text from pre-set reading list + portfolio ideas (bullet points)

Students are provided in text comments and verbal feedback during office hours (optional).

Indicative reading: 1 Ndlovu-Gatsheni, S. J. (2018) *Epistemic Freedom in Africa*

2 Nyamnjoh, Francis. (2020). *Decolonising the Academy: A Case for Convivial Scholarship*

 11 Soumahoro, Maboula, (2021). Black is the Journey. Africana the Name

Assessment: Portfolio (90%) in the WT.

Class participation (10%) in the AT.

The course is assessed via:

- 10% class participation assessed via in-class engagement and weekly reading summary template upload
- 90% portfolio consisting of 1000 word reading summary + 2000 word critical case study

Attendance at all seminars and completion of set readings is required.

SO4C7 Half Unit Patriarchy and Society

This information is for the 2024/25 session.

Teacher responsible: Dr Mai Taha

Availability: This course is available on the MSc in Human Rights and MSc in Human Rights and Politics. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students who have this course listed in their programme regulations. This may mean that not all students who apply will be able to get a place on this course.

Course content: How do we approach law, rights, work, care, and the home from an embodied perspective? How can studying patriarchy in society help us look at the social world differently? What can we learn from various movements of feminist resistance: from anti-colonial and anti-capitalist feminist movements to the queer liberation movement, human rights activism, and the feminist strike? This course engages with these questions by approaching patriarchy as historically co-constitutive of other forms of oppression and exploitation that affect the way we understand and experience the world today. Through this course, students are introduced to feminist legal thought, queer theory, critical race feminism, and Marxist feminism. Borrowing from law, sociology, history, literature, and film, Patriarchy and Society is interdisciplinary in substance and method. The course uses fiction and cinema in parallel with the assigned readings to think through issues of gender and sexuality, housework and social reproduction, racial justice, and class society. It engages with various themes that initially developed from outside of the academy, cohering feminist and queer liberation movements as spaces of knowledge-production. As such, the course explores some of the forms of violence embedded in spatio-temporal regimes: from labour-time in the slave plantation to labour-time in the factory and at home. Through this course, students will be able to reflect on the tension between structures of the patriarchy and its relationship with racism and capitalism, on the one hand, and the different forms of queer and feminist resistance, including ideas around friendship and solidarity to reimagine emancipatory futures, on the other.

Teaching: A minimum of 30 hours of seminars in the WT. Students on this course will have a reading week in Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Reflection paper on a choice of one text from the course materials

(1500 words)

Indicative reading:

- Octavia Butler, Kindred (1979).
- Guadalupe Nettel, Stillborn (Fitzcarraldo Editions, 2022).
- Robyn Maynard and Leanne Betasamosake Simpson, Rehearsals for Living (Haymarket Books, 2022).
- Gail Lewis, "Birthing Racial Difference: conversations with my mother and others" (2009) Studies in the Maternal 1(1), 1-21.
- Saidiya Hartman, Wayward Lives, Beautiful Experiments: Intimate Histories of Social Upheaval (New York: W. W. Norton and Company, 2019).
- Himani Bannerji, "Building from Marx: Reflections on Race, Gender and Class" (2011) in Sharzad Mojab (eds.) Educating from Marx. Marxism and Education (New York: Palgrave Macmillan, 2011).
- Jules Joanne Gleeson nad Elle O'Rourke, Transgender Marxism (Pluto Press, 2021).
- bell hooks, "Home place (as a Site of Resistance) in Yearning: Race, gender, and cultural politics (South End Press, 1990).
- Sophie Lewis, Full Surrogacy Now: Feminism Against the Family (Verso, 2019).
- Tithi Battacharya (ed.), Social Reproduction Theory: Remapping Class, Recentring Oppression (Pluto Press, 2017).
- Silvia Federici, Caliban and the Witch: Women, the Body and Primitive Accumulation (AK Press, 2004).

Assessment: Essay (50%, 2000 words) and essay (50%, 2000 words) in the ST.

Further details:

A Portfolio of the following:

- **Photo essay** (50%) 2000 words (including citations)

The photo essay would be in conversation with a selection of readings from the course materials. The photos could be curated from existing images and/or taken by the student.

- **Review essay** (50%) 2000 words (including citations)

The review essay would be on a choice of two readings from the course materials **or** Novel Review **or** Film Review.

SO4C8 Half Unit Not available in 2024/25 The Social and Political Lives of the Dead

This information is for the 2024/25 session.

Teacher responsible: Dr Claire Moon

Availability: This course is available on the MSc in Culture and Society, MSc in Human Rights, MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in International Migration and Public Policy, MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). Places are allocated based on a written statement. Priority will be given to students who have this course listed in their programme regulations. This may mean that not all students who apply will be able to get a place on this course.

Course content: It is said that death is 'the great leveller'. However, this course will challenge that truism by exploring the various ways in which death is not the moment at which social and political inequality is erased but is instead perpetuated by the varied and differential treatment of the corpse. As such, the course takes the corpse as the lens through which several critical social and political issues might be examined. It spans various social and political engagements with the dead, covering the ways in which they are regarded, treated, mourned (or not), disposed of, memorialised, venerated, exhumed, remembered, and forgotten.

The issues explored in this course are anchored by a set of key questions: What is the social and political significance of the dead body? What is the nature of the relationship between the living and the dead? How do grief and mourning tie the living and dead together? What forms of labour do the dead demand? What do the dead, and the ways in which they treat them, tell us about social life? What are the political 'uses' of the dead? How are social

inequalities reproduced in the treatment of the dead? What do we owe the dead?

The course will introduce students to a range of social and political issues related to the dead as well as theoretical frameworks for understanding their agency and social power.

The list of topics covered by the course is not intended to be exhaustive - this is a wide field - but are likely to be selected from the following: the corpse, the cemetery, death work, loss, grief and mourning, necropolitics, the stigmatised dead, necro-waste, exhibiting the dead, dead body parts (commodification, circulation, capitalism), the politics of exhumation, memorialisation, the dead body and human rights.

Students will encounter a range of literature and debates from different disciplinary perspectives, including sociology, history, politics, anthropology, science and technology and philosophy, to reflect upon and interpret the profound significance of the dead to social and political life.

Teaching: 30 hours of seminars in the AT.

Core teaching will be delivered across 10 weeks in the AT with a reading week in Week 6, in line with Departmental policy.

The reading week will be used for reading and preparation of the summative essay plan, due for submission in Week 7 of the course.

Formative coursework: Active participation in seminars in the form of contributions to discussion, group work and short presentations is expected.

Indicative reading:

- Amanik, Allan and Kami Fletcher (2020) *Till Death Us Do Part: American Ethnic Cemeteries as Borders Uncrossed*. Jackson: University of Mississippi Press.
- De Leon, Jason (2015) *Land of Open Graves: Living and Dying on the Migrant Trail*. Oakland, California: University of California Press.

- Winter, Jay (2014) *Sites of Memory, Sites of Mourning: The Great War in European Cultural History*. Cambridge: Cambridge University Press.

A longer reading list will be provided to students on enrolment in the course.

Assessment: Essay (90%, 4000 words) in the WT Week 1.

Essay plan (10%) in the AT Week 7.

The course is assessed in the following ways:

10% will be awarded for the essay plan, due in Week 7 which will form the foundation of the final summative, and 90% for one 4,000-word essay due in the first week of the WT.

Students will receive feedback from their essay plan to help them in the development of their final essay.

An electronic copy of the assessed essay plan, to be uploaded to Moodle, no later than 4.00pm on the Thursday of week 7 of Autumn Term.

An electronic copy of the assessed essay, to be uploaded to

Moodle, no later than 4.00pm on the Thursday of week 1 of Winter Term.

SO4C9 Half Unit Risk Governance

This information is for the 2024/25 session.

Teacher responsible: Dr Nils Peters

Availability: This course is available on the MSc in Economy and Society, MSc in Environmental Policy and Regulation, MSc in Finance and Risk and MSc in Regulation. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Places are allocated based on a written statement, with priority given to students on the MSc in Economy and Society, MSc in Environmental Policy and Regulation, MSc in Regulation and MSc in Risk and Finance. This may mean that not all students who apply will be able to get a place on this course.

Course content: This course introduces students to sociological perspectives on economic and societal risks. Topics include the social theory of risk and uncertainty, and markets as risk-governing actors, scientific expertise and knowledge production, and transnational and systemic risks. The course will draw upon a broad international literature in economic sociology and the sociology of risk, as well as case studies from the environmental, financial, and public health domains.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 25 hours across WT. Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Indicative reading:

- Aspers, P & Dodd, N (eds) (2015) *Re-Imagining Economic Sociology* (Oxford University Press);
- Beck, U. (1999) *World Risk Society* (Cambridge: Polity);
- Baker, T & Simon, J (eds) (2002) *Embracing Risk: The Changing Culture of Insurance and Responsibility* (University of Chicago Press);
- Bernstein, P L (1996) *Against the Gods: The Remarkable Story of Risk* (Princeton University Press);
- Hutter, B.M. (ed) (2010) *Anticipating Risks and Organizing Risk Regulation*, Cambridge University Press;
- Smesler, N. & Swedberg, R. (eds) (2005) *The Handbook of Economic Sociology*;
- Bulkeley, H (2014) *Transnational Climate Governance* (Cambridge University Press);
- Klínenberg, E (2002) *Heat Wave: A Social Autopsy of Disaster in Chicago* (University of Chicago Press);

Assessment: Essay (100%, 4000 words) in the WT.

Attendance at all seminars and submission of all set coursework is required.

SO4D1

Economic Sociology

This information is for the 2024/25 session.

Teacher responsible: Dr David Pinzur and Dr Rebecca Elliott

Availability: This course is compulsory on the MSc in Economy and Society. This course is available on the MSc in Political Sociology and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Students who have this course as a core course are guaranteed a place. Other than for students for whom the course is a core course, places are allocated based on a written statement. Priority will be given to students on the MSc in Political Sociology and MSc in Sociology. This may mean that not all students who apply will be able to get a place on this course.

Course content: Are we really rational utility-maximisers? What is 'the economy' and what is its relationship to society? How does economic life reflect and enact moral categories? How can we understand the production of economic 'winners' and 'losers'? This course offers a general introduction to the theoretical foundations of economic sociology, providing an opportunity to engage questions like these through both sociologically grounded accounts of economic phenomena and sociological critiques of the analytical assumptions and research procedures common in mainstream economics.

Topics covered in the course include: critical approaches to economy and society; economic rationality; the sociology of economics; economy and environment; morals and markets; racialized economic orders; finance; credit and debt; inequality.

Teaching: This course is delivered through a combination of lectures, online materials and seminars totalling a minimum of 50 hours across AT and WT.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Indicative reading: Recommended general texts:

- M Granovetter & R Swedberg (Eds), *The Sociology of Economic Life*;
- D Slater & F Tonkiss, *Market Society: Markets and Modern Social Theory*;
- N Smelser & R Swedberg (Eds), *The Handbook of Economic Sociology*;
- V Nee & R Swedberg (Eds), *The Economic Sociology of Capitalism*.

A detailed reading list will be provided at the beginning of the course.

Assessment: Essay (30%, 3000 words) in the WT.

Essay (70%, 4000 words) in the ST.

Attendance at all seminars and submission of all set coursework is required.

emerging from identity claims.

We will examine historical and theoretical approaches to modern selfhood, including a range of ideas of self, identity, and 'personhood' emerging from the early modern period in the West, their proliferation during the rise of urban industrial capitalism, their further transformations after the late 1950s, and their contemporary forms in a period dominated by technofinancial capitalism and 'hyperindividualism'. We consider a range of personhoods that developed in the West – for example, the 'freeborn', rational, or individual person. Many such personhoods provided 'templates' for various identitarian projects in the late modern period. We will examine how 19th century ethnonationalism can be seen as an original form of identitarianism that affected many unrelated identity projects. Identity is about the individual, but it is also about the group. We will therefore explore the theoretical tensions between individual and group-based approaches to identity. We also consider the tensions of hyperindividualism and 'moral excellence' that are relevant to some contemporary identity groups. The body is also relevant to many identity claims, so we also consider its significance for several identity and rights conflicts.

During the course, we consider the social, institutional and corporate forces that help explain why questions of identity have taken such sharp political forms today. A broader sociological approach also helps us see how identity politics on the left reflects the sensibilities, interests and concerns of a new liberal middle class, emerging after the 1990s, that mainly inhabits academia and education, NGOs, the public sector, the liberal corporate sector, the creative and cultural industries, and other employment sectors that have undergone significant transformation in recent decades. We will consider these areas in relation to debates about class transformations, the 'corporate capture' of social movement politics, and claims about the elite class basis of much identitarian thinking.

In the latter part of the course, we consider themes that will vary by year, but can include: right-wing and left-wing identitarianism, identity politics and the 'culture wars', international human rights conflicts related to identity, disputes about religion and secularism, sex and gender, and cultural authenticity. We will consider the distinctions between middle class identitarianism and the politics of social movements arising from ordinary, often working-class communities. We will engage a range of alternative approaches to the socially-embedded self, its personhood and identity from non-Western and Western sources.

Teaching: 10 hours of lectures and 10 hours of seminars in the WT.

This course is delivered through a combination of lectures, seminars, workshops and online materials, totalling a minimum of 20 hours in the WT. Teaching arrangements may be adjusted if online teaching is required at any point.

Weekly 60-minute lectures will focus on key debates and concepts relevant to the theme, provide overviews of these debates, and elaborate on their historical or contemporary importance.

Weekly 60-minute seminars will generate interactive discussion and participation, apply conceptual areas to empirical examples, bring student ideas and relevant experience to bear on the topics discussed, and explore potential or novel approaches to conceptual difficulties. During seminars, students will have to opportunity to undertake weekly structured interventions or intellectual 'provocations', engage in group and class debates around a given theme, and undertake small group analysis of written or visual material.

Reading Weeks: Students on this course will have a reading week in WT Week 6, in line with departmental policy.

Formative coursework: Students will be expected to produce 1 essay in the WT.

One 1000-word draft essay plan due at the start of Week 7 based on a list of essay titles.

Indicative reading:

- Appiah, K.A. (2018) *The Lies That Bind: Rethinking Identity*, Profile Books.
- Campbell, B. and Manning, J. (2018) *The Rise of Victimhood*

SO4D2 Half Unit

Modern Personhoods and Identitarian Thought

This information is for the 2024/25 session.

Teacher responsible: Prof Chetan Bhatt

Availability: This course is available on the MSc in Human Rights, MSc in Human Rights and Politics and MSc in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). Priority will be given to students who have this course listed in their programme regulations. This may mean that not all students who apply will be able to get a place on this course.

Course content: This interdisciplinary course focuses on selfhood, personhood and identitarian thinking from the start of the modern period until today. It draws on social and political theory, Western and non-Western histories of 'the self', and it considers contemporary manifestations of identity and rights conflicts

Culture: Microaggressions, Safe Spaces, and the New Culture Wars. New York, NY: Palgrave Macmillan.

Assessment: Essay (100%, 4000 words) in the ST.

The course is assessed by a 4,000-word essay due on the Department's deadline following the term's completion. The essay will be based on a title agreed with the course convenor that draws on various parts of the course, both conceptual and empirical. The summative essay will count for 100% of the assessment for the course.

SP400 Half Unit International Social and Public Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Isabel Shutes

The course will be taught by a team of faculty members with complementary areas of expertise.

Availability: This course is compulsory on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration) and MSc in International Social and Public Policy (Non-Governmental Organisations). This course is available on the MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses160>

Course content: This course engages with the social and public policy challenges facing states and citizens across the world. It introduces students to core issues, concepts, actors and debates shaping our understanding of social and public policy, its drivers and impacts. It outlines the questions raised by efforts to ensure a healthy, educated and productive population, to protect those without other means of support, and to reduce inequalities of e.g. gender, class, and ethnicity. It discusses diverse policy approaches to these issues, their ideological underpinnings, and the varying configurations of actors involved in the policy process - the state, the market, civil society, the family, and international organisations. The course explores applications to a range of policy domains, such as education, urbanisation, health, family, social care, migration, inequality and redistribution, and to varied country contexts. The course is informed by an international and comparative approach that considers both rich and poor country contexts and international dimensions and locates these within a historical understanding of both national and global processes.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn

Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in AT.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

- Beland, D., Shoyama, J. and Mahon, R. 2016. Advanced Introduction to Social Policy. Edward Elgar.
- Ferguson, J. 2016. Give a Man a Fish: Reflections on the New Politics of Distribution. Duke University Press.
- Fraser, N. 2008. Scales of Justice: Reframing Political Space in a Globalizing World. Polity.
- Gonzalez-Ricoy, I. and Gosseries, A. (eds.) 2016. Institutions for Future Generations. Oxford University Press.

- Yeates, N. and Holden, C. (eds.) 2022. Understanding Global Social Policy. Third Edition. Policy Press.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

SP401 Half Unit Understanding Policy Research

This information is for the 2024/25 session.

Teacher responsible: Dr Thomas Biegert

Availability: This course is compulsory on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is not available as an outside option. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: No Prerequisites.

Course content: This course aims to provide an understanding of issues associated with the research process, in the context of the MSc in International Social & Public Policy. The course includes an examination of philosophical issues underpinning research methods in social policy; the place of different research methods (qualitative and quantitative) in international social & public policy; the use of research; and the role of evidence in informing social & public policy.

This is not a 'how to' methods course. Instead, students will be equipped to become critical readers and users of research. Students will gain an understanding of the role of research in the policy process, and of the philosophical underpinnings of different approaches to ISPP research, both quantitative and qualitative; they will scrutinise which research designs are appropriate for different kinds of policy investigation; and learn to critique the validity of the implications for policy drawn by researchers, given the methods they have used.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be

provided by the Course Convenor in the first lecture of the course. This course is taught in AT.

Formative coursework: Students will be expected to answer a set of broad questions every week, which will be similar to the exam questions and related to the lecture and seminar material covered in that week.

Indicative reading:

- Alan Bryman (2012) *Social Research Methods*, 4th edition Oxford University Press;
- C Robson & K McCartan (2015) *Real world research: A resource for social scientists and practitioner-researchers*, 4th edition. Oxford University Press;
- Justin Parkhurst (2016) *The Politics of Evidence: From Evidence-Based Policy to the Good Governance of Evidence*, Routledge.

Assessment: Online assessment (100%) in January.

The course is intended to inform the student's dissertation in terms of underpinning issues, concepts, methodological choices and the role of research in social and public policy implementation.

Assessment is a 3-hour online assessment comprising questions requiring relatively shorter answers which aims to test the skills outlined above and reflects the breadth of issues covered throughout the course (100%).

SP403

Academic & Professional Skills Development for Social Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Timothy Hildebrandt

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is not available as an outside option. Available only to students on Social Policy Programmes.

Pre-requisites: No prerequisites.

Course content: The course will consist of a number of workshops in the AT focusing on the development of academic skills (to include effective reading; academic writing; presentation skills; networking skills; time management); and in the WT focusing on the development of professional skills, and working in the Social Policy sector. The course will complement students' academic studies and support them to get the most out of their courses and Programme; while also helping them to make the link between the skills and knowledge they develop during their time at LSE and the opportunities and requirements of a range of careers in Social Policy.

Teaching: The course will be delivered through a series of workshops, with associated tasks assigned to students' peer groups (assigned at the start of the academic year). The course will be delivered in AT & WT

Assessment: This course is non-credit bearing, and there is no formal assessment. The course will complement students' other courses and support their assessments for those courses through academic skills development.

SP410 Half Unit

Migration: Current Research, Critical Approaches

This information is for the 2024/25 session.

Teacher responsible: Dr Isabel Shutes

Availability: This course is compulsory on the MSc in International Social and Public Policy (Migration). This course is available on the MSc in Inequalities and Social Science, MSc in International

Migration and Public Policy, MSc in International Migration and Public Policy (LSE and Sciences Po), MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process. <https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: This interdisciplinary course addresses contemporary global migration issues with reference to both developing and developed country contexts, and to different patterns and forms of migration. The course examines the relationship between migration and social and public policies, including the implications for how migrants and migration are conceptualised, for inequalities in the movement of people, for welfare systems, and for the impacts of migration in countries of origin and destination. Teaching across the course integrates critical theoretical approaches to migration with applications using different migration-related research methods.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in AT.

Formative coursework: Students are expected to participate actively in seminars and course activities, to prepare a group presentation, and to write a formative essay linked to their written summative assignment.

Indicative reading:

Assessment: Coursework (100%) in the WT.

SP411 Half Unit

Social Policy and Development

This information is for the 2024/25 session.

Teacher responsible: Dr Sunil Kumar

Availability: This course is compulsory on the MSc in International Social and Public Policy (Development). This course is available on the MSc in International Social and Public Policy, MSc in

International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses> <https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: This course provides the conceptual tools needed to understand and critically evaluate the key challenges of social development. A wide range of development contexts will be discussed. Key themes include, among others, the link between social policy and social development; theories of development and post-development; race and development; intersectionality, social policy and social development; policy actors, regulation and decentralisation, civil society, markets and social development; informality, conflict and social development. Some of these themes are treated as cross-cutting issues where appropriate.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in AT.

Formative coursework: Students will be required to submit, as their formative, a detailed 750-word outline of their summative essay, later in the Michaelmas Term. Feedback will be provided but no grade given because the aim is that the formative will be developed into the summative essay.

Indicative reading:

Assessment: Essay (100%, 3500 words) in the WT.

A 3,500 words essay where a student formulates and answers their own question relating to social policy and development.

This course is available on the MSc in China in Comparative Perspective, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process. <https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Students will benefit from having some experience of work within NGOs and/or relevant government departments or donor agencies working with NGOs.

Course content: The course focuses on the specialised field of non-governmental organisations (NGOs) within the field of social policy and development, and considers theoretical and policy issues. Main topics include the history and theory of NGOs; the changing policy contexts in which NGOs operate; NGO service delivery and advocacy roles in policy; NGO relationships with other institutional actors including government, donors and private sector; challenges of NGO effectiveness and accountability; NGO organisational growth and change; and conceptual debates around civil society, social capital, social movements and globalisation.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in WT.

Formative coursework: Students will sit a mock exam as their formative work and will receive feedback from their academic Mentor.

Weekly student led seminars which involve discussion of the assigned readings will also help to develop students' critical thinking, reading, and analytical skills

Indicative reading:

Assessment: Essay (35%) and essay (65%).

The Summative Assessment consists of one Essay (35%) during the teaching term; and one essay (65%) after the end of teaching on the course.

SP415 Half Unit Urbanisation and Social Policy in the Global Souths

This information is for the 2024/25 session.

Teacher responsible: Dr Sunil Kumar

Availability: This course is available on the MSc in Development Management, MSc in Development Management (LSE and Sciences Po), MSc in Development Studies, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Some knowledge or experience of dealing with urban issues is desirable but not essential. To apply for a **place** on this course, prospective students will have to **write a 150-word statement** (word count to be respected) as to: (i) why they would like to take this course and what particular topic interests them - 60 words; (ii) what they can bring to the course - 40 words, and (iii) how they intend to use the knowledge gained (for example, for their dissertation or future employment or research) - 50 words.

Pre-requisites: Some engagement (work/volunteering) with the urban in the Global South/North is desirable but not essential.

Course content: The course critically explores the challenges and opportunities that urbanisation and urbanism (urban transformations) pose in the social, cultural, spatial, economic, institutional and political realms in the urban Global South. A plurality of theoretical and conceptual perspectives informing contemporary policies and planning practices are explored each week.

Some of the themes explored in the course are, urbanisation, urbanism, citizenship and social change, theories of urbanisation and urban change, internal migration, the rural-urban interface and age, urban poverty, livelihoods and capabilities, urban labour markets and livelihoods, urban housing and tenure, urban basic services, urban governance, and urban social movements and collective action. Gender and civil society are explored as cross-cutting themes.

Prospective students must be willing to commit themselves to full participation in all aspects of the course, including an element of art. They will be required to read selected readings before the lecture, read and discuss the essential readings for the weekly seminars, and read more widely and actively participate in the seminars. This course seeks a weekly commitment from students to undertake a non-assessed activity entitled *My_City*, a short desk-based piece of research and writing that links key issues emerging from each lecture to a city of their choice with the view to meeting one of the pedagogical aims of this course, namely, the link between theory and policy/practice.

Teaching: 1 All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course
2 Students are required to attend all lectures and seminars
3 This course is taught in WT

Formative coursework: Students taking this course will have the opportunity to write and receive feedback on: (i) a formative 250-word outline for the *My Just Neighbourhood* project - *MyJNp* and; (ii) on a formative 750-word outline for the *My Urban Essay*. The learning pedagogy and learning outcomes are designed to

provide feedback on formatives so that students can improve upon them and submit improved versions as summatives. Since the formatives are intended to lead to a summative essay, students will not receive a grade but will receive constructive written feedback. The formative essays will have to be submitted in the latter part of LT in which the course is taught so that timely feedback can be provided. In thinking of the subject matter for the their My Urban Essay, students are encouraged to read widely and will find undertaking the My_City weekly activities useful.

Indicative reading: A detailed reading list is provided for each lecture and seminar via the LSE library's electronic reading list. The following is an introductory list of texts in alphabetical order (a number of them are available as e-books via the LSE library).

- Miraftab, F. and N. Kudva (2014) *Cities of the Global South Reader*. New York: Routledge.

Assessment: Project (20%, 1250 words) in the WT.

Essay (80%, 4000 words) in the ST.

There are **two summative** assignments for the course; (i) a **'My Just Neighbourhood project (JNp)' - 20%**; and (ii) a **My Urban Essay - 80%**. The following is a short description of the two assignments.

My Just Neighbourhood (JNp) - 20% - in-course assessment submitted in the last week of WT

Students will be required to identify an urban injustice of their choice and write a 1000-words blog type format in which they set out the urban injustice, explore what (if anything) has been done to address it and suggest a blues-skies innovative solution to overcome existing limitations. Students can also chose an urban injustice where a solution does not exist. The MyJNp will be accompanied by a piece of artwork and a 250-word stand alone artwork narrative. Guidance notes for the My JNp and a dedicated marking frame is provided on Moodle.

My Urban Essay - 80% - submitted early in the ST.

This is a substantive summative essay of 4,000 words. It must:

- (i) address an urban issue in the global South or apply a southern perspective to an urban issue in the Global North; and (ii) relate to marginalised groups. The grading will reflect: (i) innovation of thought; (ii) application of cultural perspectives as appropriate; and (iii) the extent to which the essay dovetails theory, policy and practice.

There are three potential entry points for identifying the subject matter for the essay: (1) an academic critique of an urban policy (existing or proposed); (2) the identification of an urban issue that does not have a policy but requires one; (3) a critique of a conceptual framework that has been used to address an urban challenge. Students should note that entry points 1-3 are intended as prompts to help them approach the summative essay; thus, any number of starting points could be combined. Those students approaching the essay from starting points 1 and 2 are required to propose broad policy solutions and address key barriers to the adoption of the proposed policy. Those who would like to approach their essay from the perspective of point 3, will have to propose improvements to the conceptual framework being critiqued namely, how the critique changes the 'framing of the problem' and its associated policy implications. Students can also critique urban policy and conceptual frameworks in the global North as long as they use concepts from the global South. In doing so, they are required to suggest policy and conceptual improvements to urban challenges in the global North. This is designed to overcome the North-South divide and foster the transfer of ideas. Students who chose this option will have to demonstrate that the transfer of policy ideas or conceptual critiques, using literature from the urban South to the urban North, are feasible in terms of context, institutions and politics, for instance. Extensive guidance notes for the My Urban Essay is provided on Moodle.

SP417 Half Unit

Sexuality, Everyday Lives and Social Policy in Developing Countries

This information is for the 2024/25 session.

Teacher responsible: Dr Muzafferettin Seckinelgin

Availability: This course is available on the MSc in Gender (Sexuality), MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process. <https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: None

Course content: This course aims to analyse and understand the way social policies deploy sexuality categories in regulating everyday life in developing countries, both in its public and private manifestations. It aims to consider social policy and particular interventions in their historical contexts, as a way of unpacking the construction of sexuality in the intersection of colonialism, gender, race, class and international policy frameworks in developing countries. The course also aims to interrogate the relationship between particular social policy prescriptions developed in most industrialized welfare societies and the way some of these are transferred to developing countries. The major concern of the analysis is to bring out the perceptions of sexuality that underwrite these policies and how these interact with existing perceptions of sexualities and their performances (identities, desires and bodily practices) in multiple developing country contexts. These policy areas include, among others, discussions of rights, entitlements, citizenship, same-sex marriage, sexually transmitted disease, HIV/AIDS, family policies, migration/border controls, criminality and employment-related policies.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. The course will be delivered in WT.

Formative coursework: Students will be expected to submit a formative essay

Indicative reading:

- Tamale, S. (2011) *African Sexualities: A Reader*. Pambazuka Press.

Assessment: Essay (100%) in the WT.

SP418 Half Unit Global Social Policy and International Organizations

This information is for the 2024/25 session.

Teacher responsible: Dr Muzafferettin Seckinelgin

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Global Health Policy, MSc in Human Rights, MSc in Human Rights and Politics, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International

Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: What do the, the Catholic Church, Bill and Melissa Gates, UNICEF and the World Bank have in common? They are in one way or another involved in social policy that goes beyond the nation state. Policy could be seen as the exercise of political power and this political power has often been concentrated within the nation state. Far from the traditional study of policy this includes the effect of globalization on a variety of actors in social policy. This course examines how globalization has changed the way we perceive areas such as health, education, social care and other areas that concern social citizenship. The course examines the international policy environment, particularly intergovernmental organisations; bilateral and multilateral aid agencies and non-governmental organizations (NGOs), which influence the social policy environment in developing countries. The impact of the inter-governmental policy process on policy outcomes is examined. The same goes for religious groups, social movements and corporations that all play a role in global social policy. The main goal of the course is not only to open up the understanding of social policy and globalization but also to show the complexity of goals and actors of social policy. It is expected that the students will devote considerable time to reading and preparing for the seminars.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in WT.

Formative coursework: Students will write a long essay as their formative work for this course.

Indicative reading: A detailed reading list will be presented at the beginning of the term. Some introductory texts include:

- B Deacon *Global Social Policy and Governance*. Sage (2007);
- R. Baldwin *The Great Convergence: Information Technology and The New Globalization*. Belnap (2017);
- H. Seckinelgin *The politics of Global AIDS: Institutionalization of Solidarity, Exclusion of Context*. Springer (2017) ;
- I. Gonzalez-Ricoy and A. Gossies, *Institutions for Future Generations*. OUP (2016);
- R Mishra, *Globalisation and the Welfare State*, Edward Elgar (1999);
- D Nayyar, *Governing Globalization: Issues and Institutions*, OUP (2002);
- V S Peterson & A S Runyan, *Global Gender Issues*, Westview Press (1993).
- M. Callon, P. Lascombes, and Y. Barthe, *Acting in an Uncertain World*. The MIT Press (2009).
- D. Carpenter, *Reputation and Power: Organizational Image and Pharmaceutical Regulation at the FDA*. Princeton (2010).

Assessment: Essay (100%) in the ST.

SP419 Half Unit Social Movements, Activism, and Social Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Timothy Hildebrandt

Availability: This course is available on the MSc in China in Comparative Perspective, MSc in Criminal Justice Policy, MSc in Gender (Rights and Human Rights), MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy

(Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The course begins by examining theories of social movements, collective action, and contentious politics. It then moves on to examine how social movements engage with the policy process and the ways in which social movement activism informs social policy formulation and implementation. It examines the nature, past and present roles of social movements and their potential capacity in shaping social policy in developed and developing countries, and in democratic, hybrid, or authoritarian regimes. The course covers theoretical arguments and examines empirical examples and case studies.

The course examines the following topics: the role and impact of social movement activism in identifying and meeting needs; the role of grassroots mobilizations and solidarity; how movements are affected by regulatory frameworks; how and when movements achieve their objectives; movements relations with other actors (including, NGOs, trade unions, political parties, etc.); populism. The course considers the development, transformation, autonomy, interdependence, and probity of social movements. It draws on examples of social movements in different periods, countries, and areas of activity to examine and analyse how change happens and the obstacles to change.

The course also offers an accompanying film programme with four film screenings and discussions in LT. The remaining films are for students to watch in their own time.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in AT.

Formative coursework: Students will be expected to participate actively in seminars and to complete one formative assessment in the form of a take-home mock exam.

Indicative reading:

- Castells, M. (2012). Networks of Outrage and Hope: Social Movements in the Internet Age.
- Della Porta, D. (2015). Social Movements in Times of Austerity.

Assessment: Online assessment (100%) in the ST.

SP420 Half Unit

Understanding Policy Research (Advanced)

This information is for the 2024/25 session.

Teacher responsible: Dr Tania Burchardt

Availability: This course is compulsory on the MPhil/PhD in Social Policy and MSc in International Social and Public Policy (Research). This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration) and MSc in International Social and Public Policy (Non-Governmental Organisations). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: None

Course content: The course equips you with transferable research design skills, including the design of policy evaluations, and an in-depth understanding of the role of different types of research in the policy-making process. It is an advanced course and students are expected to already have a grasp of basic research design principles and their application to social and public policy, for example as covered in MY400 Fundamentals of Research Design or SP401 Understanding Policy Research, both of which run in the MT, although these courses are not a formal pre-requisite. Lectures are given by leading academics engaged in research using the methods under consideration, some of which has achieved substantial policy impact. Students are encouraged to critically assess applications of complex research methods to contemporary national and international social and public policy questions. Topics may include uses of randomised control trials, quasi-experimental methods, longitudinal and life history analysis, systematic reviews and meta-analysis. The relationship between research and policymaking is a theme that runs throughout the course.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. Each lecture will be given by a member of staff or external expert in that particular method or topic and will be followed by a seminar providing opportunities for students to work collaboratively in small groups to examine research exemplifying the approach and the issues raised. There will also be help sessions with the seminar leader to discuss feedback on essays and progress on the course. The course will be delivered in WT.

Formative coursework: There will be one compulsory formative coursework essay, which will follow from a seminar task. This formative assignment is designed to prepare students for the summative coursework. Written and/or verbal feedback will be provided.

Indicative reading:

- A Bryman (2016), *Social Research Methods*, 5th edn
- J Parkhurst (2017), *The Politics of Evidence*
- D Green (2016) *How Change Happens*

Additional references will be supplied at the start of the course and in lectures.

Assessment: Essay (100%) in the ST.

The summative assessment focuses on assessing students' abilities to devise and justify a research design to address a specified social policy research question. It will consist of one essay of 2000 words. Students will be given a choice of questions.

SP430 Half Unit

Social Security Policies

This information is for the 2024/25 session.

Teacher responsible: Dr Kitty Stewart

Availability: This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The course analyses the purposes, design and impact of social security policies, meaning policies that protect and support household income at times when income from the labour market does not suffice. The need for social security arises both from demographic factors that affect nearly everyone during their life course – childhood, parenthood, old age – and from risk factors that will end up affecting only some – e.g. job loss, low pay and sickness or disability.

The course takes a comparative approach, examining differences in the design of social security policies across welfare regimes and drawing on examples from different countries. Students will develop an understanding of the challenges and trade-offs that arise in designing social security policies to meet multiple goals, will further their knowledge about the ways systems function in practice, and will develop the tools for assessing the structure and effectiveness of social security in any given country. Furthermore, the course will consider how successfully social security systems are adapting to meeting the challenges of the twenty-first century, including an ageing population, migration, and the changing nature of employment brought about by rapid technological change. The course will also look at the role of social security in protecting household incomes in times of crisis, such as the Covid-19 pandemic.

Students will be encouraged to further their understanding of social security in their country of origin, or another country of their choice, and to draw on this knowledge in classes.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. This course is taught in WT.

Further information will be provided by the Course Convenor in the first lecture of the course.

Weekly lectures will set the agenda for the week and provide students with an overview of the key issues at stake. Seminars will be made up of two main components. All students will be expected to give a short presentation during the course of the term

on an aspect of social security or a recent social security reform in a country they are interested in (perhaps their country of origin). In the remainder of the class, students will debate propositions related to the week's required readings, which will often offer differing perspectives on the topic.

Formative coursework: Students will be required to write one formative essay during the course of the term, which will enable them to deepen their understanding of the course material and practice critical thinking skills in preparation for the summative essay assignment. Written feedback will be given.

Indicative reading:

- R Walker, *Social Security and Welfare: Concepts and Comparisons*, Oxford University Press, 2005;
- J Millar and R Sainsbury (eds), *Understanding Social Security*, 3rd ed. The Policy Press, 2018;
- M Frolich et al, *Social Insurance, Informality and Labor Markets*, Oxford University Press, 2014;

Assessment: Essay (100%) in the ST.

SP432 Half Unit

Education Policy, Reform and Financing

This information is for the 2024/25 session.

Teacher responsible: Dr Mobarak Hossain

Availability: This course is compulsory on the MSc in International Social and Public Policy (Education). This course is available on the MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process:

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: This course considers education policy, reform and financing across a diverse range of countries. It uses concepts and tools from a number of academic disciplines – social policy, sociology, economics, politics and philosophy – to scrutinise education. Throughout the course, there is a particular focus on equity, social justice and the distribution of resources.

Issues to be addressed include: the aims of education systems; the impact of social characteristics on educational outcomes (e.g. socio-economic status, gender, race and ethnicity) and related policy reforms; accountability and market-oriented reforms in education; privatisation; power and the politics of educational policy making; global policy transfer in education; early years education; school-based education; vocational and higher education. Not all of these issues are covered as separate weekly topics – some are 'cross-cutting' and will be discussed throughout the course.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. The course will be delivered in AT.

Formative coursework: One formative essay in AT.

Indicative reading: Specialist lists for each topic will be provided. The following books are recommended as a general introduction to the course content:

- Apple, M.W., Ball, S.J., Gandin, L.A. (2010) *The Routledge International Handbook of the Sociology of Education*. Abingdon: Routledge.
- Ball, S.J. (2021) *The Education Debate - Fourth Edition*. Bristol: Policy Press.
- Grek, S., Maroy, C., Verger, A. (2021) *World Yearbook of Education 2021: Accountability and Datafication in the Governance of Education*. Abingdon: Routledge.
- Hogan, A., Thompson, G. (eds) (2021) *Privatisation and Commercialisation in Public Education: How the Nature of Public Schooling is Changing*. Abingdon: Routledge.
- McGrath, S. Gu, Q. (eds) (2015) *Routledge Handbook of International Education and Development*. London: Routledge.

Assessment: Online assessment (100%) in the ST.

SP434 Half Unit Behavioural Public Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Adam Oliver

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in Environmental Economics and Climate Change, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research), MSc in Political Science (Political Science and Political Economy), MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration, MSc in Regulation and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The application of behavioural economics and behavioural science to public policy issues has been, and continues to be, a major theme in the policy discourse internationally. This course offers students a thorough grounding in the theory and findings that define behavioural economics, from the major violations of standard rational choice theory to prospect theory and the theories of human motivation. The course goes on to consider the conceptual policy frameworks that have been informed by behavioural economics, with examples - so-called nudge, shove and budge policies - illustrated so as to highlight how these frameworks are applied in practice. Students will also be exposed to the different behavioural-informed schools of thought that have prescribed divergent paths for public sector governance.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. The course will be delivered in WT

Formative coursework: All students will be required to present work in progress on their summative assignments during seminar class time. In addition, students will be required to present to the course convener a one page plan for their summative assessment, on which they will receive feedback.

Indicative reading:

- J. Le Grand (2006) *Motivation, Agency and Public Policy: of Knights and Knaves, Pawns and Queens*. Revised paperback edition. Oxford: Oxford University Press.
- J. Le Grand (2007) *The Other Invisible Hand; Delivering Public Services through Choice and Competition*. Oxford: Princeton University Press
- R. Thaler and C. Sunstein (2008) *Nudge: Improving Decision about Health, Wealth and Happiness* New Haven: Yale University Press
- Ariely, D. (2008). *Predictably irrational : the hidden forces that shape our decisions*. London, HarperCollins.
- Kahneman, D. (2011) *Thinking, Fast and Slow* London, Allen Lane
- P. Dolan et al (2010) *MindSpace: Influencing Behaviour through Public Policy*. London: Cabinet Office and the Institute for Government.

Assessment: Project (100%).

The summative assessment is a project write-up of 3,000 words, where students design their own behavioural public policies.

SP441 Half Unit Politics of Social Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Timo Fleckenstein

Availability: This course is available on the MPA Dual Degree (LSE and Columbia), MPA Dual Degree (LSE and Hertie), MPA Dual Degree (LSE and NUS), MPA Dual Degree (LSE and Sciences Po), MPA Dual Degree (LSE and Tokyo), MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research), MSc in Political Economy of Europe, MSc in Political Economy of Europe (LSE and Fudan), MSc in Political Economy of Europe (LSE and Sciences Po), MSc in Political Science (Conflict Studies and Comparative Politics), MSc in Political Sociology, MSc in Public Administration and Government (LSE and Peking University), MSc in Public Policy and Administration and Master of Public Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The course explores the politics of social policy in rich democracies of the OECD world. The main analytical approaches for the cross-national analysis of welfare states are introduced, and different actors in social policy-making are studied. Empirically, the course draws on historical evidence and the transformation of contemporary welfare states, including in-depth analysis of labour market, family and education policies in Nordic countries, Continental Europe, Anglo-phone countries and East Asia.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Michaelmas and/or Lent terms". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course.

The course will be delivered in WT

Formative coursework: Seminar members will be expected to make presentations to the seminar, and submit a formative essay

Indicative reading:

- Bonoli, Giuliano, and Natali, David, eds. (2012) *The Politics of the New Welfare State*, Oxford: OUP.
- Castles, Frances G. et al., eds. (2010) *The Oxford Handbook of the Welfare State*, Oxford: OUP.

- Kersbergen, Kees van and Vis, Barbara (2013) *Comparative Welfare State Politics: Development, Opportunities, and Reform*, Cambridge: CUP.
- Lewis, Jane (2009) *Work-Family Balance, Gender and Policy*, Cheltenham: Edward Elgar

Assessment: Essay (100%).

SP442 Half Unit

The Future of Work and Social Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Thomas Biegert

Availability: This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: Work is the central mechanisms for the distribution of economic capital in most societies today. It also plays a crucial role in the distribution of non-material goods such as status. A range of social policies embed the world of work, e.g., by regulating access to it or securing individuals when they are out of work. Moreover, in many societies policies are financed through taxes on income from work. This course starts from the observation that the world of work and employment has seen important shifts over the past decades. Some detect a growing precarization of work in post-industrial societies. In many low- and middle-income countries informal work plays an essential role. Technological change has led to polarisation of the work force locally and globally. Projecting out technological change some fear that automation will lead to dramatic job-loss in the not so distant future. Most recently, the COVID19 pandemic led to dramatic reorganization of work routines. Against this backdrop, this course takes an internationally comparative perspective to engage with the questions of what role social policies have played to embed the world of work in the past and how they will have to adapt to face the challenges that are suggested to come.

The course is structured in three blocks:

First, the course will start by discussing how we define work (e.g. by asking about the difference between paid and unpaid work and gendered consequences of the distinction), then assessing the central role work plays in contemporary societies in low, middle, and high income countries, and by analysing how social policies embed work in different ways across contexts.

Second, the course will investigate the social implications of recent changes in the world of work, such as precarization, informality, digitalization and technological change, and then cover different perspectives on how we might expect the world of work to change in the mid and long run.

In the third and most substantial block the course will then discuss potential strategies for social policies to deal with the challenges of

recent and future developments. The course will consider different proposals that range from "fixing things so that they can stay as they are" to more transformative and utopian ones.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. The course will be taught in the WT.

Formative coursework: Students will be expected to produce 1 case study in the WT.

Indicative reading:

- Autor, D.H., Mindell, D.A. and E.B. Reynolds (2021): *The Work of the Future: Building Better Jobs in an Age of Intelligent Machines*. Massachusetts Institute of Technology. Task Force on the Work of the Future, issuing body.

Assessment: Essay (100%, 3500 words) in the ST.

A summative essay in form of a policy proposal written from the stance of a researcher for an independent policy organisation of maximum 3500 words will inform 100% of the final mark.

SP443 Half Unit

Social Policy of Climate Change

This information is for the 2024/25 session.

Teacher responsible: Dr. Liam F. Beiser-McGrath is an Assistant Professor in International Social and Public Policy in the Department of Social Policy, Associate of the Grantham Research Institute on Climate Change and the Environment, and Affiliate of the Data Science Institute at the London School of Economics and Political Science. They are also an Editor for the journal *Environmental Politics* and the organiser of EPG Online, an online seminar series covering Environmental Politics and Governance. Their research primarily focuses on the political economy of climate change, using experimental research designs and machine learning. This research has been published in peer-reviewed journals such as *Nature Climate Change*, the *Journal of Politics*, *Science Advances*, *European Journal of Political Research*, *Comparative Political Studies*, *Political Analysis*, *Climatic Change*, *Political Science Research & Methods*, *Environmental Politics*, *Global Environmental Politics*, the *Journal of European Social Policy*, *Regulation and Governance*, *Electoral Studies*, and the *Journal of Public Policy*.

<https://www.liambeisermcgrath.com>

Availability: This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the

link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: Climate change is one of the world's most pressing problems with significant implications for human's welfare and wellbeing both now and in the future. Swift and significant policy action is therefore necessary to both adapt to and mitigate climate change.

This course examines the social and public policy of climate change, from both a domestic and international perspective, drawing on research from disciplines such as economics, political science, public policy, and social policy. In doing so, the course is divided in to three parts:

- First, the course documents the nature of the problem at hand by exploring the measurement of climate change and its possible human and societal impacts.
- Second, we focus on policy responses to climate change, examining how policy is formulated and implemented at both the domestic and international level.
- Finally, the course focuses on applying these insights and tools to issues such as economic development, migration, non-governmental organisations, and political violence.

In completing the course students will have a fuller understanding of the societal impacts of climate change and policy responses, with an eye to communicating scientific evidence to an audience of academics, policymakers, and stakeholders.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. The course will be taught in the WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

The formative coursework consists of a 500 word outline of the student's planned scientific review (summative coursework). Students should outline their topic of interest and some examples of relevant scientific literature. From there students will explain how they plan on conducting the full review and the type of questions/problems this review will be able to help answer.

Indicative reading: Readings will consist of academic articles and/or selected chapters from books for each. There is no one textbook for the course.

Illustrative Readings:

Assessment: Essay (100%, 3500 words) in the ST.

The summative assignment consists of a review article on a topic of the student's choice. This format requires engaging in more depth with peer-reviewed academic literature, and should be pitched toward a more informed consumer of research such as practitioners and policy makers. The review should provide a broad and systematic overview of research relating to the chosen topic. In doing so the review should organize, evaluate, and synthesise the literature in order to identify patterns, trends, and gaps requiring further research.

SP444 Half Unit

Educational Inequality in the Global South

This information is for the 2024/25 session.

Teacher responsible: Dr Shuang Chen

Availability: This course is available on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course explores sources of educational inequality in developing countries and the role of policies. We will examine issues and debates through an international and comparative lens, drawing on theories and evidence from multidisciplinary research.

The course starts by introducing theoretical perspectives and conceptual frameworks commonly used in the study of education in developing countries. Then we engage with a specific theme each week. Themes include but are not limited to free education for all, teachers and teaching, private schools, education in emergencies, etc. Specific themes might vary each year.

By the end of this course, you will be able to

1. Examine educational inequality through an international and comparative perspective and multiple theoretical frameworks.
2. Evaluate evidence and claims about education in academic literature and policy debate.
3. Propose new research and/or policy recommendations to address educational inequality in the global south.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. The course will be taught in the WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading:

- Buchmann, C., & Hannum, E. (2001). Education and stratification in developing countries: A review of theories and research. *Annual*

Review of Sociology, 27(1), 77–102.

- Steiner-Khamsi, G. (2010). The politics and economics of comparison. *Comparative Education Review*, 54(3), 323-342.
- Mundy, K., Green, A., Lingard, B., & Verger, A. (Eds.). (2016). *Handbook of global education policy*. John Wiley & Sons.
- Glewwe, P., & Muralidharan, K. (2016). Improving education outcomes in developing countries: Evidence, knowledge gaps, and policy implications. In *Handbook of the Economics of Education* (Vol. 5, pp. 653-743). Elsevier.

Assessment: Essay (90%, 3000 words) in the ST.

Class participation (10%) in the WT.

SP471 Half Unit Not available in 2024/25 Issues in Contemporary Policing

This information is for the 2024/25 session.

Teacher responsible: Prof Tim Newburn OLD 2.40a

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.
<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction to the subject in: Newburn, T. (2017) *Criminology*, London: Routledge, 3rd Edition

Course content: The flourishing sub-discipline of 'police studies' reflects the increasing centrality of policing in political debate and popular culture, and as a major concern of government policy. This course aims to familiarise students with the formidable volume of research knowledge that has now been built up. The course will enable students to understand the development and functioning of police organisations as well as providing them with an understanding of some of the key issues and debates affecting contemporary policing. The topics covered will include: the role and purposes of policing; the media and policing; governance and legitimacy; integrity and corruption; and policing and (in)equality.

Teaching: Courses in Social Policy will follow the Teaching Model which has been adopted by the Department of Social Policy during the period of the pandemic. This is outlined HERE: <https://www.lse.ac.uk/social-policy/Current-Students/teaching-in-the-department-of-social-policy>

This course will be taught through a combination of either a recorded lecture plus a follow-up Q and A session or a 'live' on-line lecture; and classes/seminars of 1-1.5 hours (with size and length of classes/seminars depending on social distancing requirements).

Further information will be provided by the Course Convenor in the first lecture of the course.

Formative coursework: Students will be required to write and submit two pieces of formative coursework. The first will be an essay outline - in effect an outline of an answer to a potential examination question, including a full introductory paragraph. The second will be a written assessment of a published book review - as the basis for the summative work to come.

Indicative reading:

- Bittner, E. (1990) *Florence Nightingale in pursuit of Willie Sutton*, in *Aspects of Police Work*, Boston: Northeastern University Press

- Zimring, F. (2017) *When Police Kill*, New York: OUP

Assessment: Essay (80%, 3000 words) in the WT.

Project (20%, 1000 words) in the AT.

The summative assessment will comprise a 3,000 essay involving a critical assessment of a minimum of two substantive issues covered in the course (80%), and a 1,000 word book review (20%).

SP473 Half Unit Policing, Security and Globalisation

This information is for the 2024/25 session.

Teacher responsible: Dr Johann Koehler

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in Human Rights and Politics, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research) and MSc in Public Policy and Administration. This course is available as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: This course focuses on global developments in modern policing, and on the issues and challenges those developments implicate. The course follows police scholarship's move from the study of policing in specific contexts to making sense of the police institution through an international and comparative lens. Further to that move, SP473 re-poses traditional questions surrounding the police role and function in the context

of contemporary debates about security and globalisation: among other topics, these include the policing of transitional societies and emergent democracies, the privatisation of policing, policing public order, and the effects of social movements — such as the demand to defund the police — that call for radical change in policing and the provision of security.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. The course will be delivered in AT.

Formative coursework: Students are invited to prepare two pieces of formative coursework:

- The first piece of formative work will take the form of a short group presentation on 'policing developing democracies' that students will design and deliver before Reading Week.
- The second piece of formative work will take the form of essay outline - in effect an outline answer to the longer summative essay, including a full introductory paragraph.

Indicative reading:

Assessment: Essay (80%) and coursework (20%).

Essay (80%) & Coursework (20%, either as a group presentation or a 1,000-word book review)

MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: Some familiarity with sociology and/or criminology would be an advantage, but is not a formal prerequisite. Anyone unfamiliar with criminology can find a full introduction to the subject in: Newburn, T. (2017) *Criminology*, London: Routledge, 3rd Edition.

Course content: This course focuses on urban or collective violence, or what more colloquially tend to be referred to as "riots". From Hong Kong and Santiago to the Gilets Jaunes in Paris and the uprisings in America after the death of George Floyd, this is a subject of great contemporary relevance. The course will consider the various approaches that have been taken to this subject – via history, psychology and sociology – and, focusing on particular examples, the course will examine some of the core issues in the field including: the causes of riots; psychological versus sociological explanations; the role of race/ethnicity; the impact of traditional and new social media on the nature and organisation of rioting; the role and changing nature of the policing of urban disorder; and how riots might be understood both historically and comparatively. The primary means of assessment will be via a research-based essay focusing on a single "riot".

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. The course will be delivered in AT.

Formative coursework: Students will be required to write and submit two pieces of formative coursework for assessment and peer feedback. The first will be an essay outline - in effect an outline of a answer to a potential examination question, including a full introductory paragraph. The second will be an outline of their intended case study. Both pieces of formative coursework will be shared via Moodle and all students will be encouraged to offer constructive feedback to each other as well, of course, as receiving feedback from the course director. Peer feedback will be utilised as a means of encouraging a degree of group work and collective endeavour among course participants.

Assessment: Coursework (80%) and presentation (20%).

The coursework (80%) will comprise a single summative essay offering an analytical case study of a modern riot and the remainder (20%) will comprise a short presentation at an end of term mini academic conference.

SP476 Half Unit Punishment and Penal Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Leonidas Cheliotis

Availability: This course is available on the MSc in Criminal Justice Policy, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is available as an outside option to students on other programmes where regulations permit. All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process.

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Pre-requisites: None.

Course content: This course runs as a half-unit option, and explores punishment and penal policy from a range of comparative perspectives. Focusing on Anglophone jurisdictions and the rest of the world in equal measure, the course considers in depth a wide variety of historical and international comparative studies of punishment and penal policy, both from the field of criminology and beyond. In so doing, the course critically examines theoretical frameworks and empirical research on such issues as:

- the forms state punishment has assumed over time and in different national and regional contexts;
- the array and relative significance of the reasons why punishment and penal policy may develop, qualitatively as well as

quantitatively, in particular ways at given historical junctures and in different jurisdictions;

- the relationship between political systems and punishment, with particular reference to processes of democratisation;
- the links between penal policy and different forms of economic organisation, from preindustrial capitalism to welfare capitalism and neoliberalism; and
- the role of punishment in society as explained through psychosocial theories and research

Thanks to its substantive foci and broad comparative approach, the course enhances provision in the School in the field of penology (e.g., the course 'Explaining Punishment: Philosophy, Political Economy, Sociology' (LL4CL), taught by Professors Lacey and Ramsay in the Law Department).

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. The course will be delivered in WT.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will be required to submit a 1,500-word essay on one of the topics addressed in the course.

Indicative reading:

- Alexander, M. (2010) *The New Jim Crow: Mass Incarceration in the Age of Colorblindness*. New York and London: The New Press.
- Brown, M. (2009) *The Culture of Punishment: Prison, Society, and Spectacle*. New York and London: New York University Press.
- Dumm, T. L. (1987) *Democracy and Punishment: Disciplinary Origins of the United States*. Madison, WI: The University of Wisconsin Press.
- Garland, D. (1985) *Punishment and Welfare: A History of Penal Strategies*. Aldershot, UK: Gower.
- Gottschalk, M. (2014) *Caught: The Prison State and the Lockdown of American Politics*. Princeton, NJ: Princeton University Press.
- Karstedt, S. (ed.) (2009) *Legal Institutions and Collective Memories*. Oxford: Hart.
- Lacey, N. (2008) *The Prisoners' Dilemma: Political Economy and Punishment in Contemporary Democracies*. Cambridge: Cambridge University Press.
- McBride, K. (2007) *Punishment and Political Order*. Ann Arbor, MI: The University of Michigan Press.
- Reiner, R. (2007) *Law and Order: An Honest Citizen's Guide to Crime and Control*. Cambridge: Polity.
- Salvatore, R. D., Aguirre, C. and G. M. Joseph (eds) (2001) *Crime and Punishment in Latin America: Law and Society since Colonial Times*. Durham, NC: Duke University Press.

Assessment: Essay (100%).

An essay on one of the substantive topics covered in the course, from a defined list of questions.

SP477 Half Unit Crime, Justice & Social Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Johann Koehler

Availability: This course is compulsory on the MSc in Criminal Justice Policy. This course is available on the LLM (extended part-time), LLM (full-time), MSc in Human Rights and Politics, MSc in Inequalities and Social Science, MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations), MSc in International Social and Public Policy (Research), MSc in Political

Sociology, MSc in Public Policy and Administration and University of Pennsylvania Law School LLM Visiting Students. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process:

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The course provides a detailed and critical foundation in the study of crime and criminal justice, through a focus on some of its constitutive ideas, institutions, practices, and participants. Lectures in the first half of term provide an overview of a criminological understanding of crime and deviance. Lectures in the second half of term provide an overview of a criminological understanding of justice policy. Throughout the course, particular emphasis is devoted to the historical, conceptual, and theoretical traditions that make up — and subvert — criminology's canon.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. The course will be delivered in AT.

Formative coursework: Students will be expected to answer a set of broad questions every week, which will be similar to the summative exam questions and related to the lecture and seminar material covered in that week.

Indicative reading:

- Christie, N. (1977). Conflicts as property. *British Journal of Criminology*, 1-15.
- Liebling, A., Maruna, S., & McAra, L. (Eds.). (2023). *The Oxford Handbook of Criminology*, 7th ed. Oxford University Press.
- Newburn, T. (2017). *Criminology*, 3rd ed. Routledge.
- Newburn, T. (Ed.). (2009). *Key Readings in Criminology*. Willan Publishing.
- Phillips, C., Earle, R., Parmar, A., & Smith, D. (2020). Dear British criminology: Where has all the race and racism gone?. *Theoretical Criminology*, 24(3), 427-446.
- Zedner, L. (2004). *Criminal justice*. Oxford University Press.

Assessment: Online assessment (100%) in January.

Assessment is a final Online Assessment comprising questions of varying length that test mastery of the concepts and issues covered throughout the course, duration 3.5 hours.

SP478 Half Unit Special Issues in Criminology & Criminal Justice

This information is for the 2024/25 session.

Teacher responsible: Professor Coretta Phillips

Availability: This course is compulsory on the MSc in Criminal Justice Policy. This course is available on the MSc in Human Rights and Politics and MSc in Public Policy and Administration. This course is available with permission as an outside option to students on other programmes where regulations permit.

All Social Policy Courses are 'Controlled Access'. Please see the link below for further details on the allocation process:

<https://info.lse.ac.uk/current-students/services/course-choice/controlled-access-courses>

Course content: The course provides a detailed and critical review of the varied perspectives that scholars in and beyond Social Policy bring to bear in the study of crime and criminal justice. Each lecture illustrates and applies a given perspective to one of the titular 'Special Issues' with which criminologists grapple. Throughout the course, particular emphasis is devoted to setting those perspectives in conversation, with a view toward exploring lines of potential complement, confrontation, and integration.

Although SP478 is designed as a successor to SP477, SP477 is not a prerequisite for enrolment into SP478. However, students with little prior criminological familiarity are encouraged to consult the Indicative Readings before the Winter Term commences.

Teaching: All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course. The course will be delivered in WT.

Formative coursework: Students will be expected to answer a set of broad questions every week, which will be similar to the summative essay questions and related to the lecture and seminar material covered in that week.

Indicative reading: Liebling, A., Maruna, S. and McAra, L. (eds.) (2017) *The Oxford Handbook of Criminology*. Sixth Edition. Oxford: Oxford University Press.

Newburn, T. (2017) *Criminology*. Third Edition. London: Routledge.

McLaughlin, E. and Newburn, T. (eds.) (2010) *The Sage Handbook of Criminological Theory*. London: Sage.

Downes, D., Rock, P., and McLaughlin, E. (2016) *Understanding Deviance: A Guide to the Sociology of Crime and Rule-Breaking*. 7th Edition. Oxford: Oxford University Press.

Newburn, T. (ed.) (2009) *Key Readings in Criminology*. Cullompton: Willan Publishing.

Assessment: Exam (100%, duration: 3 hours) in the spring exam period.

SP498 Criminal Justice Policy - Long Essay

This information is for the 2024/25 session.

Teacher responsible: Dr Leonidas Cheliotis

Availability: This course is compulsory on the MSc in Criminal Justice Policy. This course is not available as an outside option. Those taking the course part-time must submit the dissertation in their second year.

Course content: The 10,000 word dissertation enables students to analyse in greater depth an issue relevant to their Criminal Justice Policy programme. You should discuss with your designated supervisor the selection of topic and its title title.

Your supervisor can advise about preliminary reading, methods and broad analytical approach; and comment on the draft version. At their discretion, supervisors may give additional advice and comments.

Teaching: Online workshops/Dissertation support sessions will be held in late AT and throughout WT for students taking SP498 (CJP Dissertation) and those taking SP499 (ISPP Dissertation).

Academic Mentors will provide regular supervision and feedback throughout the three terms

Formative coursework: The area of study is defined by the student, in consultation with their Academic Mentor.

An Academic Mentor is appointed to supervise each student.

Students will discuss an outline proposal with their Mentor and submit their outline, as a basis of discussion to confirm their topic. The Mentor will provide regular supervision and feedback.

Assessment: Dissertation (100%, 10000 words).

Dissertations should be no more than 10,000 words in length, excluding notes and appendices and should be typed. They will be due in August.

SP499**Dissertation - International Social & Public Policy****This information is for the 2024/25 session.****Teacher responsible:** Prof Adam Oliver

Availability: This course is compulsory on the MSc in International Social and Public Policy, MSc in International Social and Public Policy (Development), MSc in International Social and Public Policy (Education), MSc in International Social and Public Policy (LSE and Fudan), MSc in International Social and Public Policy (Migration), MSc in International Social and Public Policy (Non-Governmental Organisations) and MSc in International Social and Public Policy (Research). This course is not available as an outside option. Those taking the course part-time must submit the dissertation in their second year.

Course content: The 10,000 word dissertation enables students to analyse in greater depth an issue relevant to their international social & public policy programme. You should discuss with your designated supervisor the selection of topic and its title. Your supervisor can advise about preliminary reading, methods and broad analytical approach; and comment on the draft version. At their discretion, supervisors may give additional advice and comments.

Please note: Students on the Development, Migration, Education or Non-Governmental Organisations ISPP streams are expected to complete dissertations on topics related to their stream, or they may not qualify for the stream Degree for which they are registered. Dissertations of students on the ISPP (Research) stream are required to be based on empirical quantitative or qualitative research, except by permission of the programme director.

Teaching: Online workshops/Dissertation support sessions will be held in late AT and throughout WT for students taking SP498 (CJP Dissertation) and those taking SP499 (ISPP Dissertation). Academic Mentors will provide regular supervision and feedback throughout the three terms.

Formative coursework: The area of study is defined by the student, in consultation with their Academic Mentor. An Academic Mentor is appointed to supervise each student. Students will discuss an outline proposal with their Mentor and submit their outline, as a basis of discussion to confirm their topic. The Mentor will provide regular supervision and feedback.

Assessment: Dissertation (100%, 10000 words) in August. Dissertations should be no more than 10,000 words in length (100% of this unit), excluding the bibliography. They will be due in August.

**ST405 Half Unit
Multivariate Methods****This information is for the 2024/25 session.****Teacher responsible:** Dr Yunxiao Chen

Availability: This course is available on the MPhil/PhD in Statistics, MSc in Data Science, MSc in Health Data Science, MSc in Marketing, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you request a place and meet the criteria you are likely to be given a place.

Pre-requisites: Students must have completed Further Mathematical Methods (MA212) and Probability, Distribution Theory and Inference (ST202).

Course content: An introduction to the theory and application of modern multivariate methods used in the Social Sciences: Multivariate normal distribution, principal components analysis, factor analysis, latent variable models, latent class analysis and

structural equations models.

Teaching: This course will be delivered through a combination of computer workshops and lectures, totalling a minimum of 28 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Coursework assigned fortnightly and returned to students via Moodle with comments/feedback before the computer workshops.

Indicative reading:

- D J Bartholomew, F Steele, I Moustaki & J Galbraith, Analysis of Multivariate Social Science Data (2nd edition);
- D J Bartholomew, M Knott & I Moustaki, Latent Variable Models and Factor Analysis: a unified approach;
- C Chatfield & A J Collins, Introduction to Multivariate Analysis;
- B S Everitt & G Dunn, Applied Multivariate Data Analysis;
- K.V. Mardia, J.T. Kent and J.M. Bibby, Multivariate Analysis.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

**ST409 Half Unit
Stochastic Processes****This information is for the 2024/25 session.****Teacher responsible:** Dr Andreas Sojmark COL 7.04

Availability: This course is compulsory on the MSc in Financial Mathematics and MSc in Quantitative Methods for Risk Management. This course is available on the MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Operations Research & Analytics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high. Students for whom the course is not compulsory and who meet the necessary pre-requisites may be allocated a place, space permitting. Students must provide a statement explaining how they meet the pre-requisites when asking for a place.

Pre-requisites: Students on MSc QMRM and MSc Financial Mathematics must have completed the pre-session course MA400.

All students should have a good undergraduate knowledge of probability theory, calculus, and integration theory, as e.g. covered in ST206 and MA212. Previous exposure to measure theory is helpful, but not essential.

Course content: A broad introduction to stochastic processes for postgraduates with an emphasis on financial and actuarial applications. The course examines martingales, Poisson processes, Brownian motion, stochastic calculus, and stochastic differential equations as well as applications in finance and insurance.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 30 hours across Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

Indicative reading: T Bjork, Arbitrage Theory in Continuous Time; T Mikosch, Elementary Stochastic Calculus; S I Resnick, Adventures in Stochastic Processes; B K Oksendal, Stochastic Differential Equations: An Introduction with Applications, D Williams, Probability with Martingales.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

ST411 Half Unit Generalised Linear Modelling and Survival Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Anastasia Kakou

Availability: This course is compulsory on the MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available on the MPhil/PhD in Statistics, MSc in Data Science, MSc in Health Data Science, MSc in Marketing, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Pre-requisites: Mathematics to the level of Mathematical Methods (MA100) and probability to the level of Probability, Distribution Theory and Inference (ST202). Some knowledge of linear regression.

Course content: An introduction to the theory and application of generalised linear models for the analysis of continuous, categorical and count data, and regression models for survival data. Topics include: general theory of regression and generalised linear models, linear regression, logistic regression for binary data, models for ordered and unordered (nominal) responses, log-linear models for count data, and models for survival (duration) data. The R software package will be used in computer workshops.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions, totalling a minimum of 20 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Answers to questions based on theoretical and data analysis exercises can be submitted for formative feedback.

Indicative reading:

- Dobson, A.J. & Barnett, A.G. (2002) An Introduction to Generalised Linear Modelling. 2nd edition. Chapman & Hall.
- McCullagh, P. & Nelder, J.A. (1989) Generalized Linear Models. 2nd edition. Chapman & Hall.
- Agresti, A. (2015) Foundations of Linear and Generalized Linear Models. Wiley [Available as electronic resource from LSE library].
- Hosmer, D.W. & Lemeshow, S. (1999) Applied Survival Analysis, Regression Modeling of Time-to-Event Data. Wiley.
- Long, J.S. and Freese, J. (2006) Regression Models for Categorical Dependent Variables Using Stata. 2nd edition. Stata Press.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

ST416 Half Unit Not available in 2024/25 Multilevel Modelling

This information is for the 2024/25 session.

Teacher responsible: Prof Jouni Kuha

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Health Data Science, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Priority is given to students from the Departments of Statistics and Methodology, and those with the course listed in their programme regulations.

Pre-requisites: A knowledge of probability and statistical theory, including linear regression and logistic regression.

Course content: A practical introduction to multilevel modelling with applications in social research. This course deals with the analysis of data from hierarchically structured populations (e.g. student nested within classes, individuals nested within households or geographical areas) and longitudinal data (e.g. repeated measurements of individuals in a panel survey). Multilevel (random-effects) extensions of standard statistical techniques, including multiple linear regression and logistic regression, will be considered. The course will have an applied emphasis with computer sessions using appropriate software (e.g. Stata).

Teaching: This course will be delivered through a combination of lectures and computer classes totalling a minimum of 30 hours in Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Coursework assigned fortnightly and returned to students via Moodle with comments/feedback before the computer lab sessions.

Indicative reading:

- T Snijders & R Bosker Multilevel Analysis: an Introduction to Basic and Advanced Multilevel Modelling, Sage (2011, 2nd edition);
- S Rabe-Hesketh & A Skrondal, Multilevel and Longitudinal Modeling using Stata, (Third Edition), Volume I: Continuous responses (plus Chapter 10 from Volume II, which is available free on the publisher's website). Stata Press (2012);
- H Goldstein, Multilevel Statistical Models, Arnold (2003, 3rd edition);
- S W Raudenbush & A S Bryk, Hierarchical Linear Models: Applications and Data Analysis Methods, Sage (2002).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

ST418 Half Unit Advanced Time Series Analysis

This information is for the 2024/25 session.

Teacher responsible: Clifford Lam COL.6.09

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Data Science, MSc in Econometrics and Mathematical Economics, MSc in Financial Mathematics, MSc in Marketing, MSc in Operations Research & Analytics, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access). Priority is given to students from the Departments of Statistics and those with the course listed in their programme regulations.

Pre-requisites: Good undergraduate knowledge of statistics and probability. Previous programming experience is not required but students who have no previous experience in R must complete an online pre-sessional R course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=7745>).

Course content: We start with the introduction of basic time series models (AR, MA, ARMA; ARCH and GARCH models for financial time series), trend removal and seasonal adjustment; model selection and estimation; forecasting. The second half of the course focus on multivariate and high dimensional time series: Factor modelling for vector and matrix-valued time series; Multivariate GARCH and regularisation methods. Simple examples of nonlinear time series models including threshold models. R examples will be given in lecture notes, and R applications will be investigated in exercises.

Teaching: 20 hours of lectures and 10 hours of computer workshops in the WT.

Week 6 will be used as a reading week.

Indicative reading: Brockwell & Davis, Time Series: Theory and Methods; Brockwell & Davis, Introduction to Time Series and

Forecasting; Box & Jenkins, Time Series Analysis, Forecasting and Control; Shumway & Stoffer, Time Series Analysis and Its Applications; Ruey S. Tsay, Multivariate Time Series Analysis: With R and Financial Applications; William W.S. Wei, Multivariate Time Series Analysis and Applications.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

ST425

Statistical Inference: Principles, Methods and Computation

This information is for the 2024/25 session.

Teacher responsible: Dr Nicholas Cron

Availability: This course is compulsory on the MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available on the MRes/PhD in Management (Marketing) and MSc in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and statistics to the equivalent level of ST102 Elementary Statistical Theory. Previous programming experience is not required but students who have no previous experience in R must complete an online pre-session R course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=7745>)

Course content: The course provides a comprehensive coverage of fundamental aspects of methods and principles in probability and statistics, as well as linear regression analysis. Real data illustrations with the statistical package R forms an integral part of the course, providing a hands-on experience in simulation and data analysis.

Teaching: This course will be delivered through a combination of classes, lectures and computer workshops totalling a minimum of 60 hours across Autumn Term. This course does not include a reading week, instead Week 11 will be used as a revision week.

Formative coursework: A pre-session self-study R course taking about 10 hours needs to be completed by the start of the term. Students will complete weekly assessed problem sheets. They will also complete R practice exercises following instructions from the weekly computing workshop.

Indicative reading: L. Wasserman, All of Statistics.

Assessment: Exam (85%, duration: 3 hours) in the January exam period.

Project (15%) in the AT.

ST426 Half Unit Not available in 2024/25

Applied Stochastic Processes

This information is for the 2024/25 session.

Teacher responsible: Dr Erik Baurdoux COL 6.04

Availability: This course is available on the MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available as an outside option to students on other programmes where regulations permit.

Course content: This course builds on material discussed in ST409 (Stochastic Processes). In particular, elements of the

general theory of semi-martingales will be covered and emphasis will be given on presenting a variety of models involving processes with general dynamics, including jumps. The theory will be applied to a range of topics in mathematical finance and insurance, as well as financial economics.

Teaching: 20 hours of lectures and 10 hours of seminars in the WT. 2 hours of lectures in the ST.

Week 6 will be used as a reading week; exercises will be given out to students to do at home.

Formative coursework: A set of coursework similar to the exercises that will appear in the exam will be assigned. Additional formative exercise will be available through Moodle.

Indicative reading: Brownian Motion and Stochastic Calculus.

Ioannis Karatzas and Steve Shreve

Numerical Solution of Stochastic Differential Equations with Jumps in Finance. Eckhard Platten, Nicola Bruti-Liberati.

Essentials of Stochastic Finance: Facts, Models, Theory. Albert Shiryaev.

Stochastic Integration and Differential Equations. Phillip Protter.

Levy Processes in Finance: Pricing Financial Derivatives. Wim Schoutens

Fluctuations of Lévy Processes with Applications. Andreas Kyprianou

Selected papers from scientific journals.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

ST429 Half Unit

Statistical Methods for Risk Management

This information is for the 2024/25 session.

Teacher responsible: Dr Xiaolin Zhu

Availability: This course is compulsory on the MSc in Quantitative Methods for Risk Management. This course is available on the Global MSc in Management, Global MSc in Management (CEMS MIM), Global MSc in Management (MBA Exchange), MSc in Data Science, MSc in Financial Mathematics, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students on the MSc in Quantitative Methods for Risk Management programme, students from outside this programme may not get a place.

Pre-requisites: Students must have completed Probability, Distribution Theory and Inference (ST202) and Stochastic Processes (ST302), or equivalent.

Previous programming experience would be helpful and students who have no previous experience in R must complete an online pre-session R course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=7745>).

Course content: This course covers fundamental definitions of loss functions involving risk factors and risk factor changes. These concepts will be illustrated with examples of different value functions. For the quantitative analysis of the losses of a portfolio we introduce risk measures: General overview from variance to expected shortfall. We concentrate in highly important risk measures: Value at Risk (VaR) and Expected Shortfall (ES). Considering a portfolio we analyse the distribution and dependence between different risks. We cover multivariate models and Copula models: Sklar's Theorem, Fundamental copulas, Clayton copulas, Archimedean copulas, Dependence measures. As part of dimension reduction we also study Principal component analysis. Finally, we also look at the tail of the distributions and study extreme value theory.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 30 hours during Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: A set of exercises which are similar to problems appearing in the exam will be assigned. A set of coding exercises which are similar to examples in computer lab sessions will be assigned.

Indicative reading: A.McNeil, R.Frey, P.Embrechts, Quantitative Risk Management: Concepts, Techniques, Tools; Princeton Series in Finance

Assessment: Exam (75%, duration: 2 hours) in the January exam period.

Project (25%) in the AT.

ST433 Half Unit Computational Methods in Finance and Insurance

This information is for the 2024/25 session.

Teacher responsible: Dr Yufei Zhang

Availability: This course is compulsory on the MSc in Quantitative Methods for Risk Management. This course is available on the MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed September Introductory Course (Financial Mathematics and Quantitative Methods for Risk Management) (MA400).

Any students who are taking ST433 as an optional course and who have not completed MA400 need to obtain permission from the lecturer by providing a statement explaining why and how they know the material covered in MA400.

Course content: The purpose of this course is to (a) develop the students' computational skills, (b) introduce a range of numerical techniques of importance in actuarial and financial engineering, and (c) develop the ability of the students to apply the theory from the taught courses to practical problems, work out solutions including numerical work, and to present the results in a written report.

Binomial and trinomial trees. Random number generation, the fundamentals of Monte Carlo simulation and a number of related issues. Finite difference schemes for the solution of ordinary and partial differential equations arising in insurance and finance. Numerical solutions to stochastic differential equations and their implementation. The course ends with an introduction to guidelines for writing a scholarly report/thesis.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 32 hours across Lent Term.

Formative coursework: Weekly exercises and practicals are set and form the basis of the classes.

Indicative reading: N E Steenrod, P Halmos, M M Schiffer & J A Dieudonne, How to write mathematics (1973); D.J. Duffy, Finite Difference Methods in Financial Engineering: A Partial Differential Equation Approach, Wiley; P. Glasserman, MonteCarlo Methods in Financial Engineering, Springer; P.E. Kloden and E. Platen, Numerical Solution of Stochastic Differential Equations, Springer. Further material will be specified during the course.

Assessment: Project (100%) in the ST.

ST436 Half Unit Financial Statistics

This information is for the 2024/25 session.

Teacher responsible: Prof Piotr Fryzlewicz

Availability: This course is compulsory on the MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available on the MSc in Data Science and MSc in Quantitative Methods for Risk Management. This

course is not available as an outside option.

This course has a limited number of places (it is controlled access) and demand is typically very high.

Pre-requisites: Knowledge of statistics up to the level of ST202, or alternatively up to the level of Larry Wasserman's "All of Statistics" textbook (or equivalent).

Course content: The course covers key statistical methods and data analytic techniques most relevant to finance. Hands-on experience in analysing financial data in the "R" environment is an essential part of the course. The course includes a selection of the following topics: basics of time series analysis, obtaining financial data, low- and high-frequency financial time series, ARCH-type models for low-frequency volatilities and their simple alternatives, predicting equity indices (case study), Markowitz portfolio theory and the Capital Asset Pricing Model, machine learning in financial forecasting, Value at Risk, simple trading strategies. If time permits, the course will end with an extended case study involving making predictions of market movements in a virtual trading environment.

Teaching: 22 hours of lectures and 11 hours of seminars in the AT.

Formative coursework: Weekly marked problem sheets, with solutions discussed in class. Two marked case studies.

Indicative reading: Lai, T.L. And Xing H. (2008) Statistical Models and Methods for Financial Markets. Springer. Tsay, R. S. (2005) Analysis of Financial Time Series. Wiley. Ruppert, D. (2004) Statistics and Finance – an introduction. Springer. Fan, Yao (2003) Nonlinear Time Series. Hastie, Tibshirani, Friedman (2009) The Elements of Statistical Learning. Haerdle, Simar (2007) Applied Multivariate Statistical Analysis. Ruppert, Matteson (2015) Statistics and Data Analysis for Financial Engineering

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

ST439 Half Unit Not available in 2024/25 Stochastics for Derivatives Modelling

This information is for the 2024/25 session.

Teacher responsible: Dr Luciano Campi COL 5.04

Availability: This course is available on the MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Course content: Valuation and hedging of derivative securities: general principles of mathematical finance; asset price models; static vs dynamic option pricing; connection with PDEs; exotic options; volatility derivatives; mean-variance hedging; Dupire's formula.

Teaching: 20 hours of lectures and 10 hours of seminars in the WT.

Week 6 will be used as a revision week.

Formative coursework: Weekly homework will be set. Students are not expected to submit this homework but will go over the exercises in the following seminar with the lecturer.

Indicative reading: Steven Shreve, Stochastic Calculus for Finance II: Continuous-Time Models, Springer.

Selected papers from scientific journals.

Thorsten Rheinlander and Jenny Sexton, Hedging Derivatives, World Scientific.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

ST440 Half Unit Not available in 2024/25 Recent Developments in Finance and Insurance

This information is for the 2024/25 session.

Teacher responsible: Dr George Tzougas COL 5.11

Availability: This course is available on the MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Course content: Recent developments in the theory of stochastic processes and applications in finance and insurance and their interface. A variety of topics will be chosen from: optimal hedging with special emphasis on new products and practical applications; regression methods for risk analysis and to forecast systemic risk (based on NASDAQ data, Yahoo Finance data and macro variables); regression models in life and non-life insurance. The workshops will focus on the use of programming language R for implementations based on real data. Some selected lectures will be given by practitioners in the finance and insurance fields.

Teaching: Week 8 will be devoted to students' presentations, using material which will have been provided in week 1 or 2; as well as to discuss in groups solutions to problems that will have been set in class.

Week 6 will be used as a reading week.

Formative coursework: A set of coursework similar to the exercises that will appear in the exam will be assigned as well as a mock exam.

Indicative reading: H. Foellmer and A. Schied: Stochastic finance. An introduction in discrete time. (3rd ed.), de Gruyter. Selected papers from scientific journals.

Assessment: Exam (90%, duration: 2 hours) in the January exam period.

Presentation (10%) in the AT Week 9.

ST442 Half Unit Longitudinal Data Analysis

This information is for the 2024/25 session.

Teacher responsible: Prof Fiona Steele COL 7.12

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Health Data Science, MSc in Social Research Methods, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). In previous years we have been able to provide places for all students that apply but that may not continue to be the case.

Pre-requisites: A knowledge of probability and statistical theory, including linear regression and logistic regression.

Please log into moodle.lse.ac.uk and self-enrol in the 'R for Statistics Pre-sessional Course

Course content: A practical introduction to methods for the analysis of repeated measures data, including continuous and binary outcomes. Topics include: longitudinal study designs, models for two measurements, (random effects) growth curve models, marginal models, missing data, latent class models, models for binary data and dynamic (autoregressive) models. The course will have an applied emphasis with fortnightly computer classes using R.

Teaching: This course will be delivered through a combination of lectures and computer classes totalling a minimum of 30 hours in WT.

Students are required to install R on their own laptops for use in the computer workshops.

This course includes a reading week in Week 6 of WT.

Formative coursework: Coursework assigned fortnightly and returned to students via Moodle with feedback.

Indicative reading:

- Singer JD, Willett JB. (2003) Applied Longitudinal Data Analysis: Modeling Change and Event Occurrence. New York: Oxford University Press. (Part I only).
- Rabe-Hesketh S, Skrondal A. (2012) Multilevel and Longitudinal Modeling Using Stata, Third Edition. Volume I: Continuous Responses. College Station, Texas: Stata Press.
- Hedeker D, Gibbons RD. (2006) Longitudinal Data Analysis. Hoboken, New Jersey: John Wiley & Sons, Inc.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

ST443 Half Unit Machine Learning and Data Mining

This information is for the 2024/25 session.

Teacher responsible: Prof Milan Vojnovic

Availability: This course is compulsory on the MSc in Data Science. This course is available on the MPA in Data Science for Public Policy, MSc in Applied Social Data Science, MSc in Econometrics and Mathematical Economics, MSc in Geographic Data Science, MSc in Health Data Science, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically high. This may mean that you're not able to get a place on this course.

Pre-requisites: The course will be taught from a statistical perspective and students must have a very solid understanding of linear regression models.

Students are not permitted to take this course alongside Algorithmic Techniques for Data Mining (MA429).

Course content: Machine learning and data mining are emerging fields situated between statistics and computer science. They focus on the objectives such as prediction, classification and clustering, particularly in contexts where datasets are large, commonly referred to as the world of 'big data'.

This course will commence with the classical statistical methodology of linear regression as a foundation. From there, it will progress to provide an introduction to machine learning and data mining methods from a statistical perspective. In this framework, machine learning will be conceptualised as 'statistical learning', aligning with the titles of the books in the essential reading list.

The course aims to cover modern non-linear methods such as spline methods, generalised additive models, decision trees, random forests, bagging, boosting and support vector machines. Additionally, it will delve into advanced approaches, such as ridge regression, the lasso, linear discriminant analysis, k-means clustering, and nearest neighbours.

Teaching: The first part of the course reviews regression methods and covers logistic regression, linear and quadratic discriminant analysis, cross-validation, variable selection, nearest neighbours and shrinkage methods.

The second part of the course introduces non-linear models and covers splines, generalized additive models, tree methods, bagging, random forest, boosting, support vector machines, principal components analysis, k-means, and hierarchical clustering. This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 35 hours across Autumn Term. This course includes a reading week in Week

6 of Autumn Term.

Formative coursework: Students will be expected to produce 5 problem sets in the AT.

The problem sets will consist of both theoretical questions and data problems that require the implementation of various methods in class using a computer.

Indicative reading: James, G., Witten, D., Hastie, T. and Tibshirani, R. An Introduction to Statistical Learning. 2nd Edition, Springer, 2021. Available online at <https://www.statlearning.com/>
Hastie, T., Tibshirani, R. and Friedman, J. The Elements of Statistical Learning: Data Mining, Inference and Prediction. 2nd Edition, Springer, 2009. Available online at <http://statweb.stanford.edu/~tibs/ElemStatLearn/index.html>

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Project (30%) in the AT Week 11.

ST444 Half Unit Computational Data Science

This information is for the 2024/25 session.

Teacher responsible: Dr Yining Chen COL 7.06

Availability: This course is available on the MSc in Data Science, MSc in Econometrics and Mathematical Economics, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Basic knowledge in calculus and linear algebra, as well as a first course in probability and statistics.

Course content: An introduction to the use of popular algorithms in statistics and data science, including (but not limit to) numerical linear algebra, optimisation, graph data and massive data processing, as well as their applications. Examples include least squares, maximum likelihood, principle component analysis, LASSO and graphical LASSO, PageRank, etc. Throughout the course, students will gain practical experience of implementing these computational methods in a programming language. Learning support will be provided for at least one programming language, such as R, Python or C++, but the choice of language supported may vary between years, depending on judged benefits to students, whether in terms of pedagogy or resulting skills. This year, the default choice is Python.

Teaching: This course will be delivered through a combination of classes/computer workshops/lectures/Q&A sessions totalling a minimum of 30 hours across Autumn Term. This course includes a reading week in Week 6.

Lectures will cover:

- (1) **Introduction:** overview of the topics to be discussed, how numbers are presented in memory, floating point arithmetic, stability of numerical algorithms
- (2) **Basic algorithms:** overview of different types of algorithms, Big-O notation, elementary complexity analysis, and their applications in data science
- (3) **Tools in optimisation:** convexity, bi-section, steepest descent, Newton's method, Quasi-Newton methods, stochastic gradient, coordinate descent, other related topics (e.g. stochastic search, ADMM)
- (4) **Tools in numerical linear algebra:** Gaussian elimination, Cholesky decomposition, LU decomposition, matrix inversion and condition, computing eigenvalues and eigenvectors, and their applications
- (5) **Other topics (if time permits):** graph data processing, massive data processing, Monte-Carlo methods, etc

Formative coursework: Students will be expected to produce 4 problem sets in the AT.

Bi-weekly exercises, involving computer programming and theory.

Indicative reading: Computational Statistics by Givens and

Hoeting

Statistical computing in C++ and R by Eubank and Kupresanin

Foundations of Data Science by Blum, Hopcroft and Kannan

Introduction to Algorithms by Cormen, Leiserson, Rivest and Stein

The Art of R Programming: A Tour of Statistical Software Design by Matloff

Think Python: How to Think Like a Computer Scientist by Downey

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Coursework (30%).

ST445 Half Unit Managing and Visualising Data

This information is for the 2024/25 session.

Teacher responsible: Dr Ieva Kazlauskaitė

Availability: This course is compulsory on the MSc in Data Science and MSc in Health Data Science. This course is available on the MPA in Data Science for Public Policy, MSc in Applied Social Data Science, MSc in Geographic Data Science, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to students for whom the course is compulsory; as well as students in the Department of Statistics where the course is listed as an option in their programme regulations, students on the MSc in Applied Social Data Science, and students on the MSc in Geographic Data Science. Students from outside these programmes may not get a place.

Pre-requisites: Students who have no previous experience in Python are required to take an online pre-sessional Python course from the Digital Skills Lab (<https://moodle.lse.ac.uk/course/view.php?id=7696>).

Course content: The focus of the course is on the fundamental principles and best practices for data manipulation and visualisation. The course is based on using Python as the primary programming language and various software packages. The first five weeks will focus on data manipulation which covers the basic concepts such as data types and data models. Students learn how to create data model instances, load data into them, and manipulate and query data. The course will cover data structures for scientific computing and their manipulation through the Python package NumPy, and high-level data structures and functions for working with structured or tabular data through the Python package Pandas. We will cover the basic concepts of relational data models and SQL query language for creating and querying database tables.

The last five weeks focus on data visualisation starting with the exploratory data analysis using various statistical plots. We will explain visualisations used for evaluation of binary classifiers such as receiver operating curve plots and precision recall plots. We will explain the principles of some dimensionality reduction methods used for visualisation of high-dimensional data points, starting with classical methods such as multidimensional scaling to more recent methods such as stochastic neighbour embedding. We will discuss the basic principles of graph data visualisation methods and different graph data layouts. The data visualisations will be materialised in code using Python packages such as Matplotlib, Seaborn, and various scikit-learn modules.

Teaching: 20 hours of lectures and 15 hours of seminars in the AT. This course will be delivered through a combination of classes, lectures and Q/A sessions totalling a minimum of 35 hours in Michaelmas Term. This course includes a reading week in Week 6 of Michaelmas Term.

Students are required to install Python on their own laptops and use their own laptops in the seminar sessions.

Formative coursework: Students will be expected to produce 8 problem sets in the AT.

Indicative reading:

Assessment: Project (80%) in the WT.

Problem sets (20%) in the AT.

Students are required to hand in solutions to 4 problem sets, each accounting for 5% of the final assessment (20% in total). In addition, there will be a take-home exam (80%) in the form of a final project in which they will demonstrate the ability to manage data and visualise it through effective statistical graphics using principles they have learnt on the course.

ST446 Half Unit Distributed Computing for Big Data

This information is for the 2024/25 session.

Teacher responsible: Dr Marcos Barreto

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Applied Social Data Science, MSc in Data Science, MSc in Econometrics and Mathematical Economics, MSc in Geographic Data Science, MSc in Health Data Science, MSc in Operations Research & Analytics, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. This may mean that you are not able to get a place on this course. The MSc in Data Science students are given priority for enrolment in this course.

Pre-requisites: Basic knowledge of Python or some other programming knowledge is desirable.

Course content: The course covers principles of distributed processing systems for big data, including distributed file systems (such as Hadoop); distributed computation models (such as MapReduce); resilient distributed datasets (Spark RDDs); structured querying over large datasets (Spark Dataframes and SQL); graph data processing systems (Spark GraphX and Neo4j); stream data processing systems (Kafka and MongoDB); scalable machine learning models (Spark MLlib and TensorFlow); distributed and federated machine learning models (Spark MLlib and TensorFlow Federated Learning).

The course enables students to learn about the principles and gain hands-on experience in working with the state of the art computing technologies such as Apache Spark, a general engine for large-scale data processing, and TensorFlow, a popular software library for (distributed) learning of deep neural networks. Through weekly exercises and course project work, student can gain experience in performing data analytics tasks on their laptops and cloud computing platforms.

Teaching: This course will be delivered through a combination of classes, and lectures and Q&A sessions totalling a minimum of 35

hours across the Winter Term (WT). This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 10 problem sets in the WT.

Eight of the weekly problem sets will represent formative coursework. The other two will represent summative assessment.

Assessment: Project (80%) in the WT.

Continuous assessment (10%) in the WT Week 4.

Continuous assessment (10%) in the WT Week 9.

Summative assessments: a problem set submitted in WT Week 6 (10%), a problem set submitted in WT Week 11 (10%), a project (80%) in the WT. Each summative problem set will be composed of theory and coding components, will have an individual mark of 10% and submission will be required in the WT in Weeks 6 and 11. In addition, there will be a take-home exam (80%) in the form of a group project in which they will demonstrate their ability to develop a big data solution for solving a task of their choice.

Formative assessments: short weekly coding problem sets which will build the ground for the seminar sessions.

ST447 Half Unit Data Analysis and Statistical Methods

This information is for the 2024/25 session.

Teacher responsible: Prof Qiwei Yao

Availability: This course is compulsory on the MSc in Data Science and MSc in Operations Research & Analytics. This course is available on the MSc in Health Data Science. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is NOT available on the following programmes: MSc in Statistics, MSc in Statistics (Research), MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Social Statistics), or MSc in Statistics (Social Statistics) (Research).

Pre-requisites: Basic knowledge in calculus and linear algebra, as well as a course in probability and statistics equivalent to ST102. Students who have no previous experience in R are required to take on an online pre-session R course from the Digital Skill Lab (<https://moodle.lse.ac.uk/course/view.php?id=7745>).

Course content: This course covers most frequently used statistical methods for data analysis. In addition to the standard inference methods such as parameter estimation, hypothesis testing, linear models and logistic regression, it also covers Monte

Carlo methods, bootstrap, EM-algorithm, permutation tests, regression based on local fitting, causal inference and false discovery rates. The software R constitutes an integral part of the course, providing hands-on experience of data analysis.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 30 hours across in Autumn Term.

Formative coursework: Students will be expected to produce 5 exercises in the AT.

The bi-weekly exercises enable students to learn about the different methods of statistics and data analysis. They also provide students the opportunities to implement statistical methods in R.

Indicative reading: All of Statistics, by Larry Wasserman, Springer. Data Analysis and Graphics using R: an Example-based Approach, by John Maindonald and John Braun, Cambridge University Press.

Assessment: Exam (85%, duration: 2 hours) in the January exam period.

Project (15%) in the AT.

ST448 Half Unit Not available in 2024/25 Insurance Risk

This information is for the 2024/25 session.

Teacher responsible: Daniela Escobar

Availability: This course is available on the MSc in Financial Mathematics, MSc in Quantitative Methods for Risk Management, MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is available with permission when students meet requirement on pre-requisites.

Pre-requisites: Students must have completed Stochastic Processes (ST302) and Probability, Distribution Theory and Inference (ST202).

Good undergraduate understanding of distribution theory and stochastic processes. ST202, ST302 or their equivalent.

Course content: A self-contained introduction to insurance risk analysis. Starting from classical actuarial modelling of insurance risk, utility theory with optimal forms of insurance from the insured's and from the insurer's point of view are analysed. Pareto-optimal risk exchanges are introduced. Standard schemes of reinsurance are introduced and analysed. The individual and collective model are introduced to understand the aggregated claim process and approximate it. There is an emphasis in the compound Poisson process and therefore a detailed description of the Poisson process is explained. In the second part of the course we cover Ruin theory for an insurance company and capital requirement are studied. Heavy tail distributions and the extreme value theory are introduced. We solve reinsurance problems in a scheme with aggregated claims. Finally, we study closed-form solutions of the ruin probability as we also approximate it using R.

Teaching: 20 hours of lectures and 10 hours of seminars in the AT. Week 6 will be used as a reading week.

Formative coursework: Students will be expected to produce 6 problem sets in the AT.

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Project (30%) in the WT.

ST449 Half Unit Artificial Intelligence

This information is for the 2024/25 session.

Teacher responsible: Dr Tengyao Wang

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Applied Social Data Science, MSc in Data Science, MSc in Econometrics and Mathematical Economics, MSc in Geographic Data Science, MSc in Health Data Science, MSc in Management and Strategy, MSc in Management of Information Systems and Digital Innovation, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access) and demand is typically high. This may mean that you are not able to get a place on this course. MSc in Data Science students are given priority for enrollment in this course.

Pre-requisites: Students who have no or limited experience in object oriented programming (OOP) must complete the relevant module in the online pre-sessional python course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=8709>).

Course content: The course provides a broad overview on fundamental concepts and algorithms of artificial intelligence systems, with focus on search methods, knowledge representation, game playing, logical and probabilistic reasoning, supervised learning and reinforcement learning. We use state-of-the-art data science and artificial intelligence Python libraries and tools to translate the studied principles and methods into practice, and to gain hands-on experience in data analysis.

- **Introduction:** aims, history, rational actions, and agents.
- **Simple uninformed search methods:** graph search, tree-like search, best-first search, breadth-first search, uniform search, depth-first search, limited depth-1st search, iterative deepening search.
- **Advanced informed search methods:** more sophisticated heuristic search algorithms, A* search, local search, hill-climbing search, simulated annealing, local beam search, genetic algorithm, conditional plan, AND-OR search, belief states.
- **Game playing:** adversarial search, the minimax algorithm and its shortcomings, improving minimax using alpha-beta pruning, Type A (wide) and Type B (deep) strategies, stochastic games, EXPECTIMAX search.
- **Constrained satisfaction problems (CSPs):** standardising search problems to a common format, backtracking algorithm for CSPs, heuristics for improving the search for a solution, constraint propagation and consistency, solving Sudoku.
- **Knowledge representation and logical reasoning:** representation of common sense knowledge, inference and knowledge representation schemes, propositional logic, syntax, semantics and entailment.
- **Probabilistic reasoning:** representing knowledge in uncertain domain, graphical models, Bayesian networks, statistical inference in Bayesian networks.
- **Supervised learning:** learning from examples, hypothesis space, loss and risk, model selection, regularization, linear regression and classification, logistic regression, kernel machines, multilayer perceptron and the backpropagation algorithm.
- **Reinforcement learning:** reinforcement learning problem formulation by using Markov Decision Processes, dynamic programming, Bellman optimality solution, simple tabular solution methods.

Teaching: 20 hours of lectures and 15 hours of classes in the AT. This course will be delivered through a combination of lectures and classes totalling a minimum of 35 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Assessment: Coursework (30%) in the AT Week 4.

Coursework (30%) in the AT Week 8.

Project (40%) in the AT.

There will be two individual assignments (30% each) to be completed in Week 4 and 8 of Autumn Term.

In addition, there is a graded take-home research project (40%) which is completed by students in groups, in which they demonstrate the ability to apply and train an appropriate model to a specific problem and dataset using principles they have learnt in the course.

ST450 Not available in 2024/25 Advanced Lectures on Special Topics in Statistics

This information is for the 2024/25 session.

Course content: Seminar series. Please refer to Departmental web page for details. <http://www.lse.ac.uk/statistics/home.aspx>

Teaching: 20 hours of seminars in the WT.

ST451 Half Unit Bayesian Machine Learning

This information is for the 2024/25 session.

Teacher responsible: Dr Konstantinos Kalogeropoulos

Availability: This course is available on the MSc in Applied Social Data Science, MSc in Data Science, MSc in Econometrics and Mathematical Economics, MSc in Health Data Science, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available as an outside option to students on other programmes where regulations permit. This course has a limited number of places (it is controlled access) and demand is typically very high. Priority is given to Department of Statistics students and those with the course listed in their programme regulations.

Pre-requisites: Basic knowledge in probability in statistics via a course such as the ST202 Probability Distribution Theory and Inference or an equivalent course; Previous programming

experience is not required but students who have no previous experience in Python must complete an online pre-session Python course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=7696>)

Course content: The course sets up the foundations and covers the basic algorithms covered in probabilistic machine learning. Several techniques that are probabilistic in nature are introduced and standard topics are revisited from a Bayesian viewpoint. The module provides training in state-of-the-art methods that have been applied successfully for several tasks such as natural language processing, image recognition and fraud detection. The first part of the module covers the basic concepts of Bayesian Inference such as prior and posterior distribution, Bayesian estimation, model choice and forecasting. These concepts are also illustrated in real world applications modelled via linear models of regression and classification and compared with alternative approaches.

The second part of the module introduces and provides training in further topics of probabilistic machine learning such as Graphical models, mixtures and cluster analysis, Variational approximation, advanced Monte Carlo sampling methods, sequential data and Gaussian processes. All topics are illustrated via real-world examples and are contrasted against non-Bayesian approaches.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 35 hours across the Winter Term.

Syllabus:

- Bayesian inference concepts: Prior and posterior distributions, Bayes estimators, credible intervals, Bayes factors, Bayesian forecasting, Posterior Predictive distribution.
- Linear models for regression: Linear basis function models, Bayesian linear regression, Bayesian model comparison.
- Linear models for classification: Probabilistic generative models, Probabilistic discriminative models, The Laplace approximation, Bayesian logistic regression.
- Variational inference, Variational linear and logistic regression.
- Graphical models: Bayesian networks, Conditional independence, Markov random fields.
- Mixture models and Clustering: Clustering, Mixtures, The EM algorithm.
- Sampling methods: Basic sampling algorithms, Markov chain Monte Carlo, Gibbs sampling
- Sequential data: Markov models, Hidden Markov models, Linear dynamical systems.
- Gaussian processes: Bayesian Non-Parametrics, Gaussian processes for regression and classification.

Formative coursework: Students will be expected to produce 10 problem sets in the WT.

10 problem sets in WT to prepare students for both summative assessment components. They will include theoretical exercises, targeting for learning outcomes a and b, as well as computer-based assignments (for learning outcome c) that will need to be presented in suitable form for the purposes of learning outcome d. Additionally, mostly related to learning outcome b, students will be encouraged to share and compare their responses in some challenging parts of the problem sets, through the use of dedicated Moodle forums.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Project (50%) in the ST.

ST452 Half Unit Probability and Mathematical Statistics I

This information is for the 2024/25 session.

Teacher responsible: Ms Giulia Livieri COL 7.10 and Prof Umut Cetin COL 6.08

Availability: This course is available on the MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

The availability as an outside option requires a demonstration of sufficient background in mathematics and statistics. Prior training on basic concepts of real analysis providing experience with formal proofs, sequences, continuity of functions, and calculus and is at the discretion of the instructor.

Course content: This course provides theoretical and axiomatic foundations of probability and mathematical statistics. In particular, the following topics will be covered:

1. Measure spaces; Caratheodory extension theorem; Borel-Cantelli lemmas.
2. Random variables; monotone-class theorem; different kinds of convergence.
3. Kolmogorov's 0-1 law; construction of Lebesgue integral.
4. Monotone convergence theorem; Fatou's lemmas; dominated convergence theorem.
5. Expectation; L^p spaces; uniform integrability.
6. Characteristic functions; Levy inversion formula; Levy convergence theorem; CLT.
7. Principle and basis for statistical inference: populations and samples, decision theory, basic measures for estimators.
8. Estimation: U and V statistics, unbiased estimators, MVUE, MLE.
9. Hypothesis testing: Neyman-Pearson lemma, UMP, confidence sets.
10. Product measures; conditional expectation.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 30 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce 9 problem sets in the AT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

Indicative reading: 1 Williams, D. (1991). Probability with Martingales. Cambridge University Press.

2 Durrett, R. (2019). Probability: Theory and Examples. Cambridge Series in Statistical and Probabilistic Mathematics.

3 Shao, J. (2007). Mathematical Statistics. Springer Texts in Statistics.

4 Keener, R. (2010). Theoretical Statistics. Springer Texts in Statistics.

Assessment: Exam (70%, duration: 2 hours, reading time: 10 minutes) in the spring exam period.

Coursework (30%) in the AT.

Three of the homework problem sets will be submitted and marked as assessed coursework.

Course content: This course provides instruction in advanced topics in probability and mathematical statistics, mainly based on martingale theory. It is a continuation of Probability and Mathematical Statistics I. The following topics will in particular be covered:

- 1 Conditional expectation revisited; linear regression; martingales and first examples.
- 2 Concentration inequalities; dimension reduction; log-Sobolev inequalities.
- 3 Martingale transforms; optional sampling theorem; convergence theorems.
- 4 Sequential testing; backwards martingales; law of large numbers; de Finetti's theorem.
- 5 Markov chains; recurrence; reversibility; foundations of MCMC.
- 6 Ergodic theory.
- 7 Brownian motion; quadratic variation; stochastic integration.
- 8 Stochastic differential equations; diffusions; filtering.
- 9 Bayesian updating; Ergodic diffusions; Langevin samplers.
- 10 Brownian bridge; empirical processes; Kolmogorov-Smirnov statistic.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 30 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 9 problem sets in the WT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

Indicative reading: 1 Williams, D. (1991). Probability with Martingales. Cambridge University Press.

4 Shao, J. (2007). Mathematical Statistics. Springer Texts in Statistics.

5 Keener, R. (2010). Theoretical Statistics. Springer Texts in Statistics.

Assessment: Exam (70%, duration: 2 hours, reading time: 10 minutes) in the spring exam period.

Coursework (30%) in the WT.

Three of the homework problem sets will be submitted and marked as assessed coursework.

ST454 Half Unit Bayesian Data Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Sara Geneletti Inchauste Col 5.07

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Data Science, MSc in Health Data Science, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

The course will require the use of computers so students must have a laptop.

Pre-requisites: Students must have completed Elementary Statistical Theory (ST102).

Basic knowledge in probability and a first course in statistics such as ST102 or equivalent probability distribution theory and inference. Basic knowledge R or an equivalent programming language required. Students who do not have prior knowledge of R will be required to take an R module with the Digital Skills Lab.

Course content: The course is a hands-on introduction and development of the analysis of Bayesian models with using Nimble (similar to BUGS), Stan and R-INLA with focus on data sets and

ST453 Half Unit Probability and Mathematical Statistics II

This information is for the 2024/25 session.

Teacher responsible: Prof Umut Cetin and Prof Konstantinos Kardaras

Availability: This course is available on the MSc in Quantitative Methods for Risk Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Probability and Mathematical Statistics I is a pre-requisite.

application. The main topics will be Bayesian regression, Bayesian Hierarchical models and Spatial models. Throughout the course there will be practical examples from epidemiology, public health and social science which will involve data analysis.

Teaching: This course will be delivered using a combination of lectures, seminars and Q&A sessions totalling a minimum of 33 hours in the Winter Term. Week 6 will be used as a reading week.

The course will cover the following

Spatio-temporal data: what is it and why is it useful?

Basics of the R programming language

Bayesian methods, with focus on an intuitive understanding and practical data analysis.

- Bayesian foundations
- Markov Chain Monte Carlo
- Regression (including GLMs)
- Hierarchical Models
- Hamiltonian Monte Carlo
- Integrated Nested Laplace Models
- Spatial models including areal data, ecological regression and spatial prediction

Bayesian software

- Nimble (similar to BUGS)

• Stan

• R-INLA

- Discussion of advantages and differences between software

Formative coursework: There will regular workshops where students have to replicate the analyses covered in lectures in different data sets

Indicative reading: Data analysis and regression using multilevel/hierarchical models: Andrew Gelman and Jennifer Hill

Statistical Rethinking: A Bayesian Course with Examples in R and STAN

Spatial and Spatio-temporal Bayesian models with R-INLA: Marta Blangiardo and Michela Cameletti

Assessment: Project (20%, 2500 words) in the WT Week 6.

Presentation (30%, 1500 words) in the WT Week 11.

Project (50%, 6000 words) in the ST Week 2.

ST455 Half Unit Reinforcement Learning

This information is for the 2024/25 session.

Teacher responsible: Mr Chengchun Shi COL 8.08

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Applicable Mathematics, MSc in Applied Social Data Science, MSc in Data Science, MSc in Geographic Data Science, MSc in Health Data Science, MSc in Management of Information Systems and Digital Innovation, MSc in Operations Research & Analytics, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

This course has a limited number of places (it is controlled access). MSc Data Science students will be given priority for enrolment in this course; followed by students in the Department of Statistics (including students on the MSc in Health Data Science), and those with the course listed in their programme regulations.

Pre-requisites: The course requires some mathematics, in particular some use of vectors and some calculus. Basic knowledge of computer programming is expected. Knowledge of Python is useful.

Course content: This course is about reinforcement learning, covering the fundamental concepts of reinforcement learning framework and solution methods. The focus is on the underlying methodology as well as practical implementation and evaluation using software code. The course will cover the following topics:

1 Introduction – course overview, epsilon-greedy, upper confidence

bound algorithm, Thompson sampling

2 Foundations of reinforcement learning – Markov decision process, Bellman optimality equation, the existence of optimal stationary policy

3 Dynamic programming and Monte Carlo methods – policy evaluation, policy improvement, policy iteration, value iteration based on dynamic programming, and Monte Carlo methods for reinforcement learning, including Monte Carlo estimation and Monte Carlo control

4 Temporal difference learning – temporal difference learning, temporal difference prediction, Sarsa, Q-learning double Q-learning, and n-step temporal difference predictions, TD(lambda).

5 TD learning with function approximation – types of function approximators (value and action-value function approximator), gradient based methods for value function prediction, convergence guarantees with linear function approximator, fitted q-iteration.

6 Applications to TD learning – deep Q-network and the MDP order dispatch policy

7 Policy-based learning – policy-gradient theorem, REINFORCE, actor-critic methods that combine policy function approximation with action-value function approximation

8 Model-based learning – Dyna, Monte carlo tree search, AlphaGo

9 Batch policy optimisation – pessimistic principle, MOPO, lower confidence bound algorithm

10 Batch off-policy evaluation – importance sampling-based method, doubly robust method, marginalized importance sampling, double reinforcement learning

Teaching: 20 hours of lectures and 15 hours of classes in the WT.

This course will be delivered through a combination of classes and lectures totalling a minimum of 35 hours in Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 8 problem sets in the WT.

Indicative reading:

• Puterman, M. L. (1994). Markov decision processes: discrete stochastic dynamic programming. John Wiley & Sons. <https://onlinelibrary.wiley.com/doi/book/10.1002/9780470316887>

• OpenAI Gym, <https://gym.openai.com/>

Assessment: Project (80%), continuous assessment (10%) and continuous assessment (10%) in the WT.

Two of the problem sets submitted by students weekly will be assessed (20% in total). Each problem set will have an individual mark of 10% and submission will be required in WT Weeks 4 and 7. In addition, there will be a take-home exam (80%) in the form of a group project in which they will demonstrate the ability to apply and evaluate different reinforcement learning algorithms.

ST456 Half Unit Deep Learning

This information is for the 2024/25 session.

Teacher responsible: Prof Milan Vojnovic

Availability: This course is available on the MPA in Data Science for Public Policy, MSc in Applicable Mathematics, MSc in Applied Social Data Science, MSc in Data Science, MSc in Geographic Data Science, MSc in Health Data Science, MSc in Management of Information Systems and Digital Innovation, MSc in Operations Research & Analytics, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

MSc Data Science students will be given priority for enrollment in this course.

Pre-requisites: The course requires some mathematics,

particularly basic concepts of linear algebra, and expects a basic knowledge of computer programming, primarily in Python.

Course content: This course is about deep learning, covering fundamental concepts of deep learning, neural networks, training and evaluation methods, and neural network architectures designed for tasks such as prediction and generative models for images, sequences, natural language processing, and large language models. The course will cover the following topics:

1 Introduction: course overview

2 Introduction to neural networks: single-layer networks, linear discriminant functions, XOR problem, perceptron, multi-layer perceptron, perceptron learning criteria, perceptron learning algorithm, feedforward neural network architecture

3 Optimisation algorithms: empirical loss function minimisation, gradient descent algorithm, stochastic gradient descent algorithm

4 Advanced optimisation algorithms: adaptive learning rates, momentum, backpropagation, dropout

5 Convolutional neural networks (CNNs): principles and basic operations of convolutional neural networks, LeNet example

6 Modern convolutional neural networks: understanding principles of modern CNN architectures, including AlexNet, VGGNet, NiN, GoogLeNet, ResNet, and DenseNet

7 Recurrent neural networks (RNNs): RNN models, training RNNs, gated RNNs, GRU, LSTM, Deep RNNs, bidirectional RNNs, vector to sequence models using RNNs

8 Sequence to sequence models: machine translation tasks, encoder-decoder architecture, attention mechanisms, transformer, large language models

9 Autoencoders: introduction to autoencoders, linear factor models, PCA and probabilistic PCA, sparse coding, autoencoders, variational autoencoders

10 Generative adversarial networks (GANs): introduction to GANs, GAN architecture and training, Wasserstein GANs, Wasserstein GANs with gradient penalty

Teaching: 20 hours of lectures and 15 hours of classes in the WT. This course will be delivered through a combination of classes, and lectures and Q&A sessions totalling a minimum of 35 hours across WT. This course includes a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 8 problem sets in the WT.

Indicative reading:

- Ian Goodfellow, Yoshua Bengio and Aaron Courville, Deep Learning, MIT Press, 2016, <https://www.deeplearningbook.org/>
- Aston Zhang, Zachary C. Lipton, Mu Li, and Alexander J. Smola, Dive into Deep Learning, <https://d2l.ai/>
- TensorFlow – An end-to-end open source machine learning platform, <https://www.tensorflow.org/>

Assessment: Project (80%) in the WT.

Continuous assessment (10%) in the WT Week 5.

Continuous assessment (10%) in the WT Week 11.

Two of the problem sets submitted by students weekly will be assessed (20% in total). Each problem set will have an individual mark of 10% and submission will be required in WT Weeks 5 and 11. In addition, there will be a take-home exam (80%) in the form of a group project in which they will demonstrate their ability to develop, train and evaluate neural network algorithms for solving a task of their choice.

ST457 Half Unit Graph Data Analytics and Representation Learning

This information is for the 2024/25 session.

Teacher responsible: Prof. Zoltan Szabo (COL.5.14)

Homepage: <https://zoltansz.github.io/>

Availability: This course is available on the MSc in Data Science, MSc in Geographic Data Science, MSc in Health Data Science, MSc in Operations Research & Analytics, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics)

(Research), MSc in Statistics (Research), MSc in Statistics (Social Statistics) and MSc in Statistics (Social Statistics) (Research).

This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: No particular course is required as pre-requisite.

The course requires basic knowledge of linear algebra, calculus, probability, (un)supervised learning, and programming experience in Python (used throughout the classes). Familiarity with notions such as vector, matrix, matrix-vector multiplication, inner product and distance of vectors, transpose and inverse of a matrix, eigenvalue, eigenvector, derivative of a function, probability mass/density function, some formulation of regression, classification and clustering is beneficial.

Course content: Graphs are among the most widely-used data structures in machine learning. Their power comes from the flexibility of capturing relations (edges) of collections of entities (nodes) which arise in a variety of contexts including economic, communication, transportation, citation, social, neuron, computer, or particle networks, knowledge, scene or code graphs, molecules or 3D shapes. Graphs naturally generalize unstructured vectorial data and structured data such as time series, images or bags of entities. The goal of this course is to provide an overview of the fundamental computational methods leveraging this additional relational structure and leading to improved prediction. We will cover examples and techniques for node classification (which can be applied for example to determine whether a user is a bot, to classify the topic of papers, or to determine the function of proteins), link prediction (for instance to recommend content on online platforms, to complete knowledge graphs, or to predict drug side-effects), clustering and community detection (for example to determine collaborating communities in citation networks, or to reveal fraudulent groups of users in financial transaction networks), graph classification / regression / clustering (for instance to predict the toxicity or the solubility of molecules, or to detect malicious computer programs) and graph generation (e.g. for drug discovery or material design).

We will cover the following topics:

- 1 types and representation of graphs, examples of prototype tasks tackled,
- 2 basic graph statistics for node classification, neighborhood overlap statistics for link prediction, PageRank,
- 3 spectral methods, hidden community detection,
- 4 traditional dimensionality reduction techniques,
- 5 learning node embeddings, encoder-decoder framework, factorization-based methods, random walk embeddings,
- 6 extension of node embeddings to multi-relational data, knowledge graphs,
- 7 node embedding with graph neural networks (GNNs), message passing framework, extension to graph-level embedding,
- 8 practical hints for GNNs, relation to approximate graph isomorphism tests,
- 9 R-convolution framework, graph kernels,
- 10 generative graph models: Erdos-Renyi model, stochastic block model, Watts-Strogatz model, preferential attachment model.

Teaching: 20 hours of lectures and 15 hours of classes in the WT. This course will be delivered through a combination of lectures and classes totalling a minimum of 35 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 10 problem sets in the WT.

Indicative reading: 1 William L. Hamilton. Graph Representation Learning. Morgan and Claypool, 2020. [https://www.cs.mcgill.ca/~wlh/grl_book/]

4 Albert-László Barabási. Network Science. Cambridge University Press, 2016. [<http://networksciencebook.com/>]

Assessment: Project (80%) in the WT.

Continuous assessment (20%) in the WT Week 8.

The problem set submitted by students will be assessed (20% of the total score). In addition, there will be a graded take-home research project (80%) which will be completed by the students in groups, in which they will demonstrate the ability to apply and train an appropriate model to a specific problem and dataset using principles they have learnt in the course.

ST458 Half Unit Financial Statistics II

This information is for the 2024/25 session.

Teacher responsible: Dr Tengyao Wang

Availability: This course is compulsory on the MSc in Statistics (Financial Statistics) and MSc in Statistics (Financial Statistics) (Research). This course is available on the MSc in Data Science and MSc in Quantitative Methods for Risk Management. This course is not available as an outside option.

Pre-requisites: Students must have completed Statistical Inference: Principles, Methods and Computation (ST425) and Financial Statistics (ST436).

Course content: The course covers a wide range of modern financial data analytics, with some built on the course ST436 Financial Statistics using the "R" environment, bridging advanced concepts in financial statistics to hands on practices.

Topics include:

- Decision Trees, Random Forests and Gradient Boosting;
- Neural Networks and deep learning in financial data analysis;
- Extension to the LSTM architecture;
- Factor model and cointegration;
- Granger Causality;
- Portfolio allocation in high frequency data;
- All refresh vs pairwise refresh times;
- Gross/Maximum exposure constraints for vast portfolios.

Consolidation of all concepts and practices will be done through case studies, on top of bi-weekly exercises.

Teaching: This course will be delivered through a combination of classes and lectures totalling a minimum of 30 hours across Winter Term.

This includes 20 hours of lectures (10 two-hour sessions), together with 10 hours of seminars (10 one-hour sessions) that go through the practical aspects of the course.

Formative coursework: Students will be expected to produce 5 problem sets in the WT.

Indicative reading:

Lecture notes will be provided on Moodle.

Assessment: Exam (70%, duration: 2 hours) in the spring exam period.

Group project (30%) in the WT.

ST459 Half Unit Quantum Computation and Information

This information is for the 2024/25 session.

Teacher responsible: Prof Konstantinos Kardaras COL.6.07

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Data Science, MSc in Financial Mathematics, MSc in Operations Research & Analytics, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Advanced knowledge of linear algebra, as well as basics of complex numbers, at the level of MA222, are essential. Familiarity with Python is also required.

Students who have no previous experience in Python are required to complete an online pre-session Python course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/info.php?id=8709>).

Course content: The course will start with reminders on linear algebra and complex numbers. Then, foundational principles of quantum mechanics necessary for understanding quantum computation will be established: postulates of quantum mechanics, quantum superposition, and the measurement problem. The concept of qubits and their representation will be studied, as well as basic quantum gates, such as the Pauli and Hadamard gates. Subsequently, the course will move to discussing quantum algorithms, focusing on foundational ones such as Deutsch-Jozsa, and Grover's search algorithm. In terms of quantum information theory, concepts such as quantum entanglement and quantum teleportation will be discussed, as well as the no-cloning theorem. If time permits, quantum error correction will be covered.

For all the previous, hands-on exercises and demonstrations using Python through the quantum programming package Qiskit will enable students to gain practical experience in implementing and simulating quantum algorithms.

Teaching: 30 hours of seminars in the WT.

There will be a mixture of theory and examples/applications/homework solutions (roughly split in half between theory and practice). The third of the three weekly hours will be mostly used for working out problems from the formative coursework, and illustrations through computer code. A mid-term summative assessment will be provided, to be worked out by students during the reading week.

Formative coursework: Students will be expected to produce 9 problem sets in the WT.

Weekly problem sets will be provided, and will be discussed during the seminars.

Indicative reading: The main material will come from the first two sources:

- Quantum Computation and Quantum Information. M. A. Nielsen and I. L. Chuang, Cambridge University Press; 2010
- Lecture Notes on Quantum Computation and Information. A. Jacquier and K. Kardaras; 2024
- Mathematics of Quantum Computing: An Introduction. W. Scherer, Springer; 2020.
- Classical and Quantum Computation. A. Yu. Kitaev, A. H. Shen, M. N. Vyalyi, American Mathematical Society; 2002

Assessment: Exam (80%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Coursework (20%) in the WT.

Coursework accounting for 20% of the grade will be given to be worked on during the reading week. This will consist of a number of exercises students will be required to solve throughout the term.

ST463 Half Unit Stochastic Simulation, Training, and Calibration

This information is for the 2024/25 session.

Teacher responsible: Dr Giulia Livieri

Availability: This course is available on the MSc in Applicable Mathematics, MSc in Econometrics and Mathematical Economics, MSc in Financial Mathematics, MSc in Operations Research & Analytics, MSc in Quantitative Methods for Risk Management, MSc in Statistics, MSc in Statistics (Financial Statistics), MSc in Statistics (Financial Statistics) (Research) and MSc in Statistics (Research). This course is available with permission as an outside option to students on other programmes where regulations permit. From 2025/26, this course will be compulsory for MSc in Quantitative Methods for Risk Management students. This course has a limited number of places (it is controlled access). Priority is given to students on the MSc Quantitative Methods for Risk Management.

Pre-requisites: Students must have completed Stochastic Processes (ST409).

Any student who has not taken ST409 would need to obtain permission from the lecturer. They need to provide a statement explaining the extent to which they have studied topics from ST409 before. If students can demonstrate a good understanding of relevant statistical and machine learning models, this may compensate for ST409, provided the student is ready to acquire the necessary background in probability and stochastic processes through self-study.

Course content: The course will equip students with the skills to competently apply modern statistical and machine-learning methods to critical computational problems within the nexus of quantitative finance, risk management, and insurance. The course will start by covering key aspects of Monte Carlo methods, simulation of stochastic processes, and generative adversarial networks with applications to risk management. Next, the course will discuss generalized linear models, building a bridge to deep neural networks and looking at novel applications in insurance. From there, the course proceeds to discuss the key challenges for effective calibration of statistical and machine learning models in general. Finally, the course concludes with a treatment of reinforcement learning and applications to hedging in commodity and energy markets through swing option pricing.

Teaching: 20 hours of lectures and 10 hours of seminars in the WT.

Formative coursework: The formative assessment of the course will be based on weekly problem sets given in the seminars/computer classes; the examples in the computer classes will be based both on synthetic (i.e., simulated) and real data examples.

Indicative reading:

- P. Glasserman, Monte Carlo Methods in Financial Engineering, Springer, 2003
- I. Goodfellow et al., Generative Adversarial Networks, Communications of the ACM, 2020.
- Dobson, A.J.; Barnett, A.G., Introduction to Generalized Linear Models (3rd ed.). 2008.
- A. Bella et. al, Calibration of a Machine Learning model, 2012.
- Sutton, R. and Barto, A., Reinforcement Learning: An Introduction, 1998.

Assessment: Project (60%) in the WT.

Project (25%, 3500 words) and project (15%, 1000 words) in the ST Week 1.

ST498 Capstone Project

This information is for the 2024/25 session.

Teacher responsible: Dr Marcos Barreto (course co-ordinator). A project supervisor will be identified during the Autumn Term (AT).

Availability: This course is compulsory on the MSc in Data Science. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites to this course.

The students should master a programming language (such as Python) and a set of data science methodologies and tools learnt and/or improved during their MSc programme. Other specific requisites depend on the problem being addressed and data/models to be used.

Course content: The capstone is a collaborative project, providing students with the opportunity to work in groups studying in depth a topic of specific interest. The topic will normally relate to a specific data source (or sources) and will require the use of data science skills learnt on the programme. The topic for a capstone project will be similar to that for the kinds of data-based issues faced in practice by private or public sector organisations.

The capstone project is conducted in partnership with an industry partner and is jointly supervised by the LSE faculty and company partner collaborators. The partner proposes a data science research project, potentially provides access to data, and engages through participation in joint meetings that are either online or onsite. The capstone project may require students to spend some time on the partner's premises, for example, to have access to data.

The capstone project requires creative work in formulating research questions and hypotheses, identifying most suited methodology, referring to research literature, and analysing data sources using data science approaches and technologies.

Teaching: A topic and project supervisor will be identified during AT. Supervisors will provide formal advice from the end of AT until two weeks after the end of ST. Project partners will engage with students in weekly or bi-weekly meetings, agreed at convenience of both sides. The students are expected to be proactive in communicating with and asking for technical support from their partners and LSE supervisor.

The students should attend all planned meetings and deliver a draft report (a date in June) and a final report (a date in August). They should also attend all meetings with the partner and engage with the agreed activities.

Formative coursework: Formative assessment is via informal feedback from supervisors on the project report and contributions to the project as an individual contributor and team member. Other courses on the MSc programme will also provide a range of formative assessments of relevance to the outcomes of this project.

Indicative reading:

- J. Burke, M. Dempsey. Undertaking capstone projects in education: a practical guide to students. Routledge, 2022.
- J. Poulin, S. Kauffman, T. Ingersoll. Social work capstone projects: demonstrating professional competencies through applied research. Springer, 2021.
- J. Chong, Y. Chang. How to lead in data science. Manning, 2021.

- * M. Carey. The social work dissertation: using small-scale qualitative methodology. 2nd edition. Open University Press, 2013.
- D. Patil. Building data science teams. O'Reilly, 2011.

Assessment: Project (100%) in August.

Group report: maximum page limit of 50 pages of A4 (minimum font size of 11pt and line spacing 1.5).

Individual report: check Moodle for formatting instructions.

Formative assessment is provided through recurrent meetings between the students and the LSE supervisor, as well as partial results (presentations and reports) delivered during the course.

ST499

Dissertation

This information is for the 2024/25 session.

Teacher responsible: Dr Tengyao Wang, Dr Konstantinos Kalogeropoulos and Prof Jouni Kuha

Availability: This course is compulsory on the MSc in Statistics (Financial Statistics) (Research), MSc in Statistics (Research) and MSc in Statistics (Social Statistics) (Research). This course is not available as an outside option.

Course content: Taking the Dissertation module (ST499) gives students an opportunity to study in-depth a topic of specific interest, and to apply knowledge and skills gained during the MSc programme. This study may involve the application of one or more of the topics covered in the programme.

Students will carry an independent project work on a subject chosen. The subject can include, but is not limited to, i) analysis of a previously unanalysed dataset, or one for which existing analyses are unsatisfactory; ii) attempt at innovation in statistical methodology; and iii) comparison and critique of existing statistical methodologies.

Teaching: No formal teaching hours. Students should arrange regular and frequent meetings with supervisors.

In addition, students will be expected to attend two compulsory sessions during Winter Term. The first at the beginning of Winter Term will be a dissertation support session, which will provide information about the dissertation, the process and the expectations.

In the second session, at the end of Winter Term, students will be required to give a structured summary of their work in progress, including slides.

Formative coursework: No formative coursework. The students should meet with their supervisors on a regular basis to get feedback on any written sections of their dissertations.

Indicative reading:

- P. Halmos. How to Write Mathematics. <https://sites.math.washington.edu/~lind/Resources/Halmos.pdf>

Assessment: Dissertation (100%) in August. (50 page limit).

Executive Taught Master's Course Guides

EC452E Half Unit**Applying Behavioural Economics for Social Impact: Design, Delivery and Policy****This information is for the 2024/25 session.****Teacher responsible:** Prof Nava Ashraf SAL.3.18

Director of Research, Marshall Institute

Course content: This course delivers insights from cutting edge research in psychology and economics, and asks students to use these insights to design solutions to significant social challenges. Students learn how to diagnose, design, deliver, and rigorously test products and services using the principles of behavioural economics and the methods of field experimentation.

The course begins by describing the principle of coproduction: outcomes in health, education and similar fields are not simply given to end-users, but are produced by end-users themselves, interacting with supply-side factors. Drawing on the insights from behavioural economics and using qualitative methods, students learn how to diagnose end-user needs, preferences and behaviour. The course then explores how the psychological aspects of behaviour can be combined with the tools and structure of economics to induce behaviour change and improve outcomes, including the challenge of setting prices and designing incentives. Throughout the course there is emphasis upon the critical importance of effective measurement in the context of the social sector, where traditional market feedback mechanisms are typically absent and where mission-driven leaders' evaluation of organisational impact can itself be subject to cognitive bias and distortion. Appropriate measurement in turn informs improvements in diagnosis and design. This emphasis on appropriate measurement reinforces students' learning in earlier modules of the programme, where they will be introduced to the principles and concepts of rigorous social impact evaluation. The course concludes by exploring policy impact and how research can be translated into policy action. Real world case studies are used at every stage of the course.

This course is relevant to all those who wish to improve the effectiveness of social interventions and programmes across a range of diverse fields, whether such interventions are administered through the state or, increasingly, through private philanthropy and social entrepreneurship.

Teaching: Ten sessions of three hours each, delivered across one module (teaching block).

Formative coursework: Formative assessment will be through short case questions written by students on the basis of lecture/seminars.

Indicative reading: There is no single textbook for the course. For an introduction to the field of behavioural economics, students should consult *Nudge: Improving Decisions About Health, Wealth, and Happiness* by Richard Thaler and Cass Sunstein (2009, Penguin) and *Thinking, Fast and Slow*, by Daniel Kahneman (2012, Penguin).

Other indicative readings are:

- Ashraf, N., Bandiera, O. and Jack, B.K. 2014. "No margin, no mission? A field experiment on incentives for public service delivery." *Journal of Public Economics* 120 (December): 1-17
- Ashraf, N., Camerer, C. F. and Loewenstein, G. 2005. "Adam Smith, Behavioral Economist." *Journal of Economic Perspectives* 19(3): 131-145.
- Glennerster, R. and Takavarasha, K. 2013. *Running randomized evaluations: a practical guide*. Princeton: Princeton University Press.
- Hirschman, A 1997. *The passions and the interests: political arguments for capitalism before its triumph* (20th anniversary edition). Princeton: Princeton University Press.
- Kamenica, E. 2012. "Behavioral Economics and Psychology of Incentives." *Annual Review of Economics* 4(1): 427-452.

Further readings relevant to specific case studies will be provided during the course.

Assessment: Take-home assessment (85%) and class participation (15%).

Assessment will be through a take home exam (85%) and class

participation (15%).

FM405E Half Unit**Fixed Income Securities and Credit Markets****This information is for the 2024/25 session.****Teacher responsible:** Prof Peter Kondor

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

This course is not capped, any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: Students must have completed FM422E and FM423E.

Course content:

- Interest rate modelling and derivatives

- Credit risk

- Credit derivatives and risk management

This course provides a thorough grounding in recent developments in fixed income securities pricing, hedging and portfolio management.

By the end of the course, the students will be familiar with the fixed income state of the art business practice and a variety of topics including (i) an analysis of the main products traded in the credit markets, such as government and corporate bonds, bond options, swaps, caps, floors, swaptions, callable, puttable and convertible bonds, and an analysis of the main credit derivatives such as total-return swaps, spread options and credit default swaps; (ii) the specific tools used in the industry practice to evaluate and hedge these products, which range from no-arbitrage trees and the calibration of yield curve derivatives to the main tools used to monitor and manage credit risk; (iii) the process of securitization, with particular reference to collateralized default obligations and mortgage-based securities.

Teaching: 30 hours of lectures in the AT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Indicative reading: The primary source for this course is a comprehensive set of Lecture Notes, tutorials and case studies and the main reference is Pietro Veronesi: *Fixed Income Securities*, (Wiley 2010).

Assessment: Continuous assessment (100%).

FM406E Half Unit**Topics in Portfolio Management****This information is for the 2024/25 session.****Teacher responsible:** Dr Michela Verardo

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

This course is not capped, any eligible student that requests a place will be given one.

This course is not available to auditing students.

Pre-requisites: Students must have completed Corporate Finance (FM422E) and Asset Markets (FM423E).

Course content:

- Portfolio optimization and the Black-Litterman model
- Dynamic Investment Strategies
- Selecting and Monitoring Portfolio Managers: Mutual funds and hedge funds
- Transactions Costs and Liquidity Risk

The course covers a wide range of topics in portfolio management, with a strong focus on empirical applications. The first part of the course reviews the basics of portfolio theory and develops the Black-Litterman approach to portfolio optimization. The second

part of the course introduces students to the implementation of several dynamic investment strategies and to the estimation of their performance; portfolio strategies include size, value, momentum, betting-against-beta, and quality-minus-junk. The third part of the course focuses on selecting and monitoring portfolio managers, with particular emphasis on the identification of selectivity, allocation, and timing skills for mutual funds and hedge funds. The last part of the course examines trading costs and liquidity risk, as well as their impact on the profitability of investment strategies. The course is based on recent empirical studies and applied exercises using financial data.

Teaching: 30 hours of lectures in the AT.

Formative coursework: Students will be expected to complete coursework regularly.

Indicative reading: A study pack will include lecture notes and case studies. All relevant articles will be made available during the course. Useful references are: *Investments*, by Z. Bodie, A. Kane, and A. Marcus, McGraw-Hill Irwin; *Modern portfolio theory and investment analysis*, by E. J. Elton, M. J. Gruber, S. J. Brown, and W. N. Goetzmann, Wiley Press; *Modern investment management*, by Bob Litterman and the Quantitative Resource Group, GSAM, Wiley Press.

Assessment: Continuous assessment (100%) in the AT.

FM407E Half Unit

Mergers, Buyouts and Corporate Restructurings

This information is for the 2024/25 session.

Teacher responsible: Professor Amil Dasgupta & Professor Alexander Gorbenko

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option. This course is not capped, any student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: Students must have completed FM422E and FM423E.

Course content:

- Financial analysis of corporate transactions
- Mergers and acquisitions
- Leveraged buyouts
- Corporate restructuring in financial distress
- Shareholder activism

This course focuses on the strategy, valuation and execution of corporate deals. In particular, the course examines several key types of transactions including mergers and acquisitions, leveraged buyouts, restructuring in financial distress, and shareholder activism. The course combines in-depth analysis based on financial economics drawing on academic research with a sustained focus on institutional details, utilizing a number of case studies to support the learning process.

Teaching: 30 hours of lectures in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Students will be expected to complete coursework regularly.

Indicative reading: A course pack will be distributed that includes case studies as well as additional readings such as textbook chapters, and practitioner articles.

Assessment: Continuous assessment (100%) in the WT.

FM408E Half Unit Not available in 2024/25

Financial Engineering

This information is for the 2024/25 session.

Teacher responsible: Dr Jean-Pierre Zigrand

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course is not capped, any eligible student that requests a place will be given one.

Pre-requisites: Students must have completed FM422/FM422E Corporate Finance and FM423/FM423E Asset Markets, or FM436 Financial Economics.

Students will be expected to show some familiarity with calculus and statistics

Course content: This course provides a thorough grounding in the theory and practice of financial engineering. The emphasis is on the application of derivatives pricing and hedging methodology to equity, FX, commodities, volatility and correlation trading strategies, and to structured products. We study selected case studies in order to gain a better understanding of their practical, sometimes live, usage. We also implement the models numerically in R.

Teaching: 30 hours of lectures in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive. There will be extra introductory lessons on the mathematical concepts required and on R coding tailored to the course.

Indicative reading: Based on a set of extensive lecture notes. No one book covers the material of the entire course, and no books are required. Books recommended include *The Volatility Surface: A Practitioner's Guide*, 2nd Edition, by Jim Gatheral, and *The Volatility Smile* by Derman, Miller and Park. Background reading can be found in *Volatility: Practical Options Theory* by Adam Iqbal, *Derivatives Markets* by Robert McDonald or *Options, Futures and Other Derivatives* by John C. Hull.

Assessment: Continuous assessment (100%) in the WT.

FM409E Half Unit Not available in 2024/25

Risk Management in Financial Markets

This information is for the 2024/25 session.

Teacher responsible: Dr Christian Julliard

Availability: This course is available on the MSc in Finance (full-time), MSc in Finance (full-time) (Work Placement Pathway), MSc in Finance (part-time), MSc in Finance and Economics, MSc in Finance and Economics (Work Placement Pathway), MSc in Finance and Private Equity and MSc in Finance and Private Equity (Work Placement Pathway). This course is not available as an outside option.

This course is not capped, any eligible student that requests a place will be given one.

Pre-requisites: Students must have completed Corporate Finance (FM422/E) and Asset Markets (FM423/E).

Course content:

- Hedging in equity and fixed income markets
- Market Risk, Value at Risk and Expected Shortfall
- Endogenous Risk and Limits to Arbitrage
- Credit risk and structured products

The aim of this course is to offer an introduction to the analysis and management of risk within financial markets. The course develops a conceptual framework for thinking about financial risk and shows how these concepts are implemented in practice in

a variety of contexts. First, the course offers an overview of risk management in the context of portfolios of fixed income securities and derivatives. Next, we discuss the implementation and the merits of Value at Risk measures. We will spend some time on endogenous risk and limits to arbitrage. In the context of credit risk we will cover ratings based and structural models, as well as credit risk on portfolios and credit derivatives. Throughout, the course spends a significant amount of time on practical applications of the theories that are introduced. Limitations of current approaches are also discussed.

Teaching: 30 hours of lectures in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Problem sets. In addition, students will have the opportunity to present the results of a case study to the class.

Indicative reading: Course readings will vary from year to year depending upon the topics covered. The main reference is: John C. Hull, *Risk Management and Financial Institutions*, Wiley, 2015, 4th edition.

Additional useful references are: Michel Crouhy, Dan Galai and Robert Mark, *Risk Management*, McGraw-Hill, 2001. Philippe Jorion, *Value at Risk*, McGraw-Hill, 2007, 3rd edition. Jon Danielsson, *Financial Risk Forecasting*, Wiley, 2011. John C. Hull, *Options, Futures and Other Derivatives*, Pearson, 2012, 8th edition. Darrell Duffie and Ken Singleton, *Credit Risk*, Princeton University Press, 2003.

Assessment: Continuous assessment (100%) in the WT.

FM414E Half Unit Venture Capital and Entrepreneurial Finance

This information is for the 2024/25 session.

Teacher responsible: Dr Juanita Gonzalez-Urbe

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

This course is not capped, any eligible student that requests a place will be given one.

This course does not permit auditing students.

Pre-requisites: Students must have completed FM422E Corporate Finance and FM423E Asset Markets.

This course cannot be combined with FM476.

Course content: Throughout the course, we will seek to answer the fundamental set of questions all entrepreneurs should ask themselves: When do we raise money? How much? From whom? Under what terms? What are the longer term implications of the chosen financing strategy? Although the course focuses on the entrepreneur's perspective when considering these questions, we often consider the investor's viewpoint as well, since understanding the motivations and incentives faced by one's counterpart is critical to avoiding financing pitfalls and successfully negotiating the best financing outcome for one's venture. Among the topics we will cover are: Business Plans, Cash Flows, Unit Economics, Multi-Stage Financing, Deal Structure, Seed financing, VC Method, Negotiation and Pitching.

Teaching: 30 hours of seminars in the AT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Each week there will typically be a formative or summative case study assignment.

Indicative reading: Marco Da Rin and Thomas Hellman, *Fundamentals of Entrepreneurial Finance*, Oxford University Press, 2020

Assessment: Continuous assessment (100%) in the AT.

FM417E Half Unit Venture Capital and Entrepreneurial Finance

This information is for the 2024/25 session.

FM422E Corporate Finance

This information is for the 2024/25 session.

Teacher responsible: Professor Daniel Ferreira

Professor Dirk Jenter

Availability: This course is compulsory on the MSc in Finance (part-time). This course is not available as an outside option.

This course does not permit auditing students.

Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

Course content:

- Financing
- Valuation

This core course provides a broad introduction to the key issues in corporate finance. The first half of the course, the Financing Module, investigates how companies finance their activities by issuing securities (debt, equity, and convertible claims) and how business policy interacts with financial policy. The aim is to understand what factors determine optimal capital structures and how the interplay of these factors affects financing decisions in a way that creates value. The second half of the course, the Valuation Module, covers firm and project valuation and establishes how companies should select among investable assets. The module focuses on fundamental valuation techniques based on discounting future cash flows. The course goes on to introduce further valuations methods, such as real options analysis, as well as key applications of valuation concepts to major corporate decisions such as mergers and acquisition and initial public offerings. The course interweaves key conceptual material with a series of cases.

Teaching: 30 hours of lectures in the AT. 30 hours of lectures in the

WT.

This course is taught in an interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Regular homework will be completed as part of the formative assessment for this course.

Indicative reading: The recommended textbook for this course is Berk and DeMarzo, Corporate Finance. Other recommended readings will be included in a study pack.

Assessment: Continuous assessment (100%) in the AT and WT.

FM423E

Asset Markets

This information is for the 2024/25 session.

Teacher responsible: Dr Georgy Chabakauri and Dr Igor Makarov

Availability: This course is compulsory on the MSc in Finance (part-time). This course is not available as an outside option. This course does not permit auditing students.

Pre-requisites: Aimed at people with a good undergraduate degree and good quantitative skills, with some knowledge of economics.

Course content:

- Investments and Securities Valuation
- Portfolio choice and performance evaluation
- Derivatives

The aim of the course is to familiarize students with the workings of financial markets, and equip them with the fundamental tools of asset valuation. The course will focus on the three main asset classes - fixed income, stocks, and derivatives - giving a unified perspective of modern valuation methods. The starting point will be the present value formula. The course will then proceed to fixed-income securities, focusing mainly on government bonds. These will be valued off the term structure of interest rates, using the present value formula. The connection with the principle of no-arbitrage will be emphasized. The course will then move to stocks, starting with portfolio theory and then deriving the relation between risk and return (CAPM). The CAPM will provide a risk-adjusted discount rate that will be used to discount stocks' cash flows with the present value formula. Alternative pricing models such as the APT and multi-factor models will also be covered, and the models will be applied to issues of asset allocation and portfolio selection. The last topic will be derivatives, especially futures and options. After familiarizing students with the use of derivatives, the course will cover the main valuation methods (binomial model, Black-Scholes) emphasizing again the principle of no-arbitrage.

Teaching: 30 hours of lectures in the AT. 30 hours of lectures in the WT.

This course is taught in the interactive lecturing format. There is no distinction between lectures and classes/seminars; there are "sessions" only, and the pedagogical approach in each session is interactive.

Formative coursework: Students will be expected to complete coursework regularly.

Indicative reading: The organisation of topics of the course follows closely the treatment in Berk and DeMarzo, Corporate Finance, 6th Edition, Pearson International, and Bodie, Kane and Marcus, Investments, 12th Edition, McGraw Hill. Other recommended readings and case studies will be included in a study pack.

Assessment: Continuous assessment (100%) in the AT and WT.

FM471E Half Unit

Sustainable Finance and Impact Investing

This information is for the 2024/25 session.

Teacher responsible: Professor Christopher Polk and Dr Greg Fischer

Availability: This course is available on the MSc in Finance (part-time). This course is not available as an outside option.

No exceptions to the availability policy will be made, and audits of FM471E are not allowed.

Pre-requisites: Students must have taken FM422E and FM423E.

Course content: This course provides a conceptual foundation in sustainable finance and impact investing along with a clear understanding of the empirical facts associated with how sustainable finance and impact investing affect firm and fund performance. Using a blend of readings, lectures, cases, and discussions, participants will learn to critically assess the actions of investors and firms with regards to sustainable finance and impact investing, including both motivation and resulting consequences.

Topics addressed will include corporate ESG (Environmental, Social, and Governance) investing, climate finance, and various impact investing topics. Participants will take away from the course a solid understanding of 1) the evolution of sustainable finance and impact investing from niche field to mainstream; 2) the variety of ways in which sustainable finance and impact investing are implemented in practice, and 3) the tools, models and frameworks behind sustainable finance and impact investing.

Teaching: 30 hours of seminars in the WT.

Formative coursework: Case studies and homework assignments will help communicate and develop understanding of course concepts.

Indicative reading:

- Freeman, Ed, 1997, "Stakeholder Theory of the Modern Corporation", Business Ethics, 5th Edition, 38-48.
- Friedman, Milton, 1970, "A Friedman doctrine: The social responsibility of business is to increase its profits," The New York Times Magazine, September 13, 1970.
- Giglio, Stefano, Bryan Kelly and Johannes Stroebe, 2021, "Climate Finance", Annual Review of Financial Economics 13, 15-36.
- Pastor, Lubos, Robert F. Stambaugh, and Lucian Taylor, 2021, "Sustainable Investing in Equilibrium," Journal of Financial Economics 160 142 550-571.
- Pedersen, Shaun Fitzgibbons, and Lukasz Pomorski, 2021, "Responsible Investing: The ESG-efficient Frontier," Journal of Financial Economics 142 572-597.

Assessment: Continuous assessment (100%).

FM475E Half Unit

Financial Management (modular)

This information is for the 2024/25 session.

Teacher responsible: Prof Amil Dasgupta (MAR.7.04)

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2024-2026 cohort.

Course content: This course will provide a comprehensive overview of financial decision making in corporations. Our approach to finance will be rigorous, but both applied and practical, enabling students to address topical issues faced by modern corporations. In particular, the course will develop concepts in business strategy, valuation techniques, and capital structure choice, applying these in a systematic and rigorous way to real-life financial management problems. Topics such as corporate liquidity management, financial distress, and initial public offerings will also be covered.

Teaching: The course is taught during Module 3, over ten interactive sessions of three hours each. The teaching approach

will intensively intermingle the following four elements:

- 1 New conceptual material. This will be taught via interactive lectures.
- 2 Real life business cases applying and extending such conceptual material. These will be explored via interactive classroom discussion sessions.
- 3 Group classroom exercises to reinforce concepts, and
- 4 Discussion of ongoing or recent real world financial events that illustrate key concepts developed in the course via reference to media articles from the Financial Times, The Economist, etc.

Formative coursework: Feedback on class participation.

Indicative reading: The recommended readings for this course consist of Higgins, Koski, and Mitton, Analysis for Financial Management (McGraw-Hill) and several business case studies.

Assessment: Essay (20%, 1500 words), project (65%) and class participation (15%).

The essay is an assessed 1,500 word group essay.

The project is a take-home individual project.

HP4A1E Half Unit Financing Health Care

This information is for the 2024/25 session.

Teacher responsible: Mr George Wharton COW.2.14

Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is available on the Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences. This course is not available as an outside option.

Course content: This course aims to give students a thorough grounding in health financing policy. It focuses on the health financing functions of collecting revenue, pooling funds and purchasing services, as well as on policy choices concerning coverage, resource allocation and market structure. The course mainly draws on examples from health financing policy in European countries, but the general principles studied apply internationally.

The course provides an overview of key health financing policy issues, including the advantages and disadvantages of different ways of raising revenue for health; the role of private financing mechanisms; the importance of pooling; decisions about whom to cover, what services to cover, and how much of service cost to cover; allocating resources to purchasers, purchasing market structure and the principles of strategic purchasing; the incentives associated with different methods of paying providers; and the issue of financial sustainability.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 23 hours. During the seminars, students will work in groups to present an overview of a health system in a country of their choice (having prepared in advance), providing an overview of its structure, organisation, management and financing. They will be asked to highlight particular strengths, weaknesses, opportunities and challenges faced by the health system, a summary of key policy debates, and highlight potential policy solutions to critical challenges. Each presentation will be followed by a Q+A and a plenary discussion led by the seminar leader.

Formative coursework: Group presentation giving an overview of a health system in a country of their choice, providing an overview of its structure, organisation, management and financing.

Indicative reading: WHO, World Health Report 2010 - Health systems financing: the path to universal coverage (2010); E Mossialos, A Dixon, J Figueras & J Kutzin (eds), Funding health care: options for Europe, Open University Press (2002); J Kutzin, Health financing policy: a guide for decision-makers, World Health Organization (2008); T Rice, The economics of health reconsidered, Health Administration Press (3rd edn, 2009)

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle. They will be expected to read these prior to the first day of

class.

Assessment: Take-home assessment (100%).

HP4A2E Half Unit Health Administration and Management

This information is for the 2024/25 session.

Teacher responsible: Mr George Wharton COW.2.14

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: This course is intended to provide the student an orientation and overview on managing organizations within health systems. The governance, execution, information management, quality of care, and sustaining human resources will be discussed, including an examination of the uses of accounting and other forms of reporting to manage health services. This is an introductory course, appropriate for students with no formal inpatient health care management experience. The course will cover the following topics: principle responsibilities of a health care system and organizations within the system; issues and strategies for enabling health care organizations to be responsive to their environment; concepts for supporting and implementing governance decisions; strategies for performance measurement and information, and analytical activities related to planning, finance, and information needs; characteristics and development of systems to assure quality of clinical services.

Teaching: The course will be delivered in no less than 20 hours.

Formative coursework: In-class formative assessments.

Indicative reading: 1. Drucker PF. 1994. "The Theory of the Business." Harvard Business Review. September- October. HBSP # 94506

2. Hammond, John S. "Learning by the Case Method." Harvard Business School. 9-376-241

3. Heskett, James. "The Job of the General Manager." 9-388-035

4. Jick, TD. 1989. "The Vision Thing." Harvard Business Review. 9-490-019

5. Porter ME. 1996. "What is Strategy?" Harvard Business Review. November-December. HBR # 96608

6. Porter, ME. "The Five Competitive Forces That Shape Strategy", Harvard Business Review, January 2008: 25-40. Reprint R0801

Assessment: Essay (100%, 3000 words) in the post-spring term.

HP4A3E Half Unit Resource Allocation and Cost-effectiveness Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Ranjeeta Thomas COW 2.07

Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The aim is to give an overview of the theory underlying economic evaluation as applied to the health care sector; to consider the different forms of economic evaluation; to give an understanding of the techniques associated with economic evaluation as applied to health care; to give an understanding of the interpretation of the results gained from economic evaluation; to provide the main practical tools necessary to undertake economic evaluation using computer-based programs. The course will cover the following topics: Conceptual rationales for economic evaluation in the health care sector (Pareto efficiency, Social Welfare, extra-welfarism and decision-making); Introduction to the methods of economic evaluation: cost-effectiveness analysis, cost-utility analysis, and Cost-benefit analysis; Cost data; Incremental cost-effectiveness analysis; Quality Adjusted Life Years gained and

other outcome measures; Discounting; Uncertainty and sensitivity analysis; Economic evaluation and clinical trials; Policy decision-making using economic evaluation.

Teaching: This course will be delivered as a combination lectures and seminars. In seminars students will work on structured learning activities set by the course lead.

Formative coursework: In class group exercise: critical appraisal of published evidence

Indicative reading: M Drummond et al, *Methods for the Economic Evaluation of Health Care Programmes*, Oxford, OUP, 2015, fourth edition..

M Drummond & A McGuire (Eds), *Economic Evaluation in Health Care: Merging Theory with Practice*, Oxford, OUP, 2002.

Gray, A. Clarke, P.M, Wolstenholme, P., Wordsworth, S. *Applied Methods of Cost-effectiveness Analysis in Healthcare (Handbooks in Health Economic Evaluation)*, Oxford, OUP, 2011.

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Take-home assessment (100%) in the ST. Students will complete a take home assessment of critical appraisal of a published study (100% of the final mark) in the weeks following teaching delivery.

HP4A4E Half Unit Health Economics

This information is for the 2024/25 session.

Teacher responsible: Prof Alistair McGuire COW 2.02

Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: Distinction between health and health care. Nature of health care as an economic commodity. How markets and insurance markets work, and how they can fail for health care and health insurance. Incentive mechanisms and principal-agent relationships in health care. Yardstick competition and Diagnostic Related Group payment schemes. Labour markets in health care. Economic evaluation as a regulatory tool.

Teaching: The course will be delivered in no less than 22 hours and includes lectures and seminars. In seminars students will work in small groups to complete problem sets and learning activities set by the course lead.

Formative coursework: 1,500 word essay forms the basis of formative review

Indicative reading: The following is a basic reading list for the course: S Folland, A C Goodman & M Stano, *The Economics of Health and Health Care* (3rd edn), Prentice Hall, 2001; B McPake, L Kumaranayake & C Normand, *Health Economics - An International Perspective*, Routledge, 2002.

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Take Home Assessment (100%)

HP4B1E Half Unit Pharmaceutical Economics and Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Panagiotis Kanavos COW 1.05

Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The aim of this course is to introduce students to the economics of pharmaceutical markets and related policies that

affect national and international markets broadly.

- To provide students with an understanding of basic features of pharmaceutical markets and how pharmaceutical markets work and how competition manifests itself in different parts of pharmaceutical markets.
- To illustrate to students how the pharmaceutical market is linked to the health care market, why it is often the focus of much regulation, and to help students understand the multidimensional goals of pharmaceutical policies.
- To introduce students to the economic and policy problems encountered in managing pharmaceutical markets and how to evaluate the impact of alternative policy approaches. The course will also give students some experience in critically evaluating the impact of policy on market outcomes.
- To facilitate consideration of various country-specific political, cultural and economic factors that may drive governments' approaches to pharmaceutical regulation. In this context, this course will help students consider the extent to which policies may be transferable.
- To enable students to analyse pharmaceutical markets from the perspectives of several main actors: governments, third party payers, the pharmaceutical industry, doctors, patients, pharmacists and wholesalers. Literature from Health Economics, Industrial Organisation and Health Policy will be incorporated into lectures, discussions and seminars.
- To introduce students to the economics of pricing and reimbursing pharmaceutical products, to explore different models of pricing and reimbursing medicines in OECD countries, including rate of return regulation, value-based pricing, cost-plus pricing, external price referencing and internal reference pricing, among others.

Teaching: This course will be delivered as a combination of lectures and seminars, totalling a minimum of 20 hours. Seminars will be interactive and students will discuss specific case studies.

Formative coursework: A selection of multiple choice and/or open-ended questions to test extent of knowledge and understanding of syllabus

Indicative reading: E Mossialos, M Mrazek & T Walley (eds), *Regulating Pharmaceuticals in Europe. Striving for Efficiency, Equity and Quality*, Buckingham, Open University Press (2004); S O Schweitzer, *Pharmaceutical Economics and Policy*, Oxford University Press (2006); W S Comanor, 'The Political Economy of the Pharmaceutical Industry', *Journal of Economic Literature*, XXIV (September): 1178-1217 (1986); F M Scherer 'The Pharmaceutical Industry', Chapter 25, in: A J Culyer & J P Newhouse (Eds), *Handbook of Health Economics*, Vol 1, Amsterdam, Oxford, Elsevier, 2000.

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Take-home assessment (100%) in the WT.

HP4B2E Half Unit Health Care Quality Management

This information is for the 2024/25 session.

Teacher responsible: Mr George Wharton COW2.14

This course will be led by Dr. Michael Holland, Medical Director and Consultant Psychiatrist, South London and Maudsley NHS Foundation Trust.

Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: An introduction and overview of quality improvement methodology as used in healthcare settings internationally. The course will cover the following areas:
1) History of quality management: The course will start with an overview of key theories in quality management such as those described Taylor, Shewhart, Deming and Juran. An overview of

quality assurance systems used in healthcare, such as ISO 9000, Magnet, Baldrige award and their role in quality improvement. It will also include a discussion and overview of value-based healthcare.

2) A critical assessment of the mainstream schools of thought of quality as part of the production process - this will include a study of the relationship between supply chain procurement management and quality as well as the requirements for good production models and the critique of evidence-based decision-making in the clinical setting

3) Quantitative methods in quality management - This course will examine a number of tools for quality management purposes - both how to do them as well as how they fit into the various schools of thought on quality management. It will cover statistical process control which is a method of statistical analysis of time series data that is used in quality management. This method shows whether there is variability in processes and gives the user an ability to both measure improvements and declines in performance of both processes and outcomes and to understand whether processes are performing within acceptable limits. An overview of the quality improvement methodology known as Design of Experiments will also be given. The role of case mix adjustment in quality assessment will also be discussed.

4) Process Mapping - Understanding the value and power of mapping processes both at a systems level and at the individual process level. They will also be given an example of a process map from a healthcare environment to work on optimising.

5) Theories of capacity and flow management and examples of this in both in-patient and outpatient settings will be discussed. This will also include how DRG/HRG payment has a role within organisations of capacity management.

6) A critical overview of Lean, Six Sigma and Model for Improvement. While these models can be useful in healthcare management, these are not deep philosophies of organisation and many of the things which make healthcare unique (e.g. asymmetry of information, difficulty of measuring quality, patient behaviour and societal preferences for fairness) are sometimes not accounted for in these models.

Teaching: A combination of lectures and workshops in no less than 20 hours. The workshops will focus on analysing case studies with a view of giving students a practical understanding of approaches to quality management in healthcare settings.

Formative coursework: An in-class exercise

Indicative reading: Donabedian, A. (1966). "Evaluating the quality of medical care." *The Millbank Memorial Fund Quarterly* 44(3): 166-203.

Assessment: Essay (100%, 3000 words).

HP4B3E Half Unit

Measuring Health System Performance

This information is for the 2024/25 session.

Teacher responsible: Prof Andrew Street COW.1.02

Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: This course aims to present a framework to discuss the opportunities and challenges with performance measurement in health care, examine the various dimensions and levels of health system performance, identify the measurement instruments and analytic tools needed, and examine the implications of these issues for policy makers and regulators. Lectures generally focus on measuring health system performance in high-income countries but draw on the experience of other countries where relevant.

After taking this course students are expected to:

- understand the principles of performance measurement
- appreciate the challenges, approaches, and opportunities in performance measurement in four dimensions: population health, patient outcomes, equity, quality and appropriateness of care, and productivity
- understand the methodological issues facing performance measurement relating to risk adjustment, developing composite measures, and measuring attribution and causality
- identify key issues relevant to policy makers relating to: developing targets and reporting on progress to the public, and developing incentives to improve performance

Teaching: This course will be delivered as a combination of lectures and seminars, totalling a minimum of 20 hours

Formative coursework: In-class exercise during seminar time.

Students will receive feedback on it from their seminar leader after completion.

Indicative reading: Papanicolas I and Smith PC (Eds), *Health System Performance Comparison: An agenda for policy, information and research*. Maidenhead: Open University Press, 2013.

PC Smith, E Mossialos, I Papanicolas S. Leatherman (Eds), *Performance measurement for health system improvement: experiences, challenges and prospects*. Cambridge University Press, 2010;

Institute of Medicine, *Crossing the Quality Chasm: A New Health System for the 21st Century*. Washington, DC, National Academies Press, 2001;

OECD, *Measuring up: improving health system performance in OECD countries*. Paris: OECD, 2002.

World Health Organization (WHO), (2000) *The world health report 2000: Health systems: Improving performance*, Geneva: WHO Publications

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Essay (75%, 3000 words) and in-class assessment (25%).

HP4B4E Half Unit Not available in 2024/25

Principles of Evidence-Based Medicine and Clinical Trials

This information is for the 2024/25 session.

Teacher responsible: Mr George Wharton COW2.14

In addition, Professor Allan Hackshaw (Deputy Director, Cancer Research UK and UCL Cancer Trials Centre, UCL) will be teaching on this course.

Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: A large amount of medical research is conducted,

with variable quality. Also, health claims are frequently reported in the media, and it can be difficult to determine which is based on reliable evidence and which is not. It is therefore essential to be able to interpret study results and conclusions appropriately, in order to change clinical practice or develop public health policy. This is achieved by Evidence-Based Medicine. The module will enable students to evaluate risk factors for disease or early death, and methods of disease prevention or treatment. The module will provide students with practical skills in the following key areas:

- Understanding the different types of research that can be conducted in humans and their strengths and limitations, i.e. observational studies and a focus on clinical trials.
- Interpreting research results and conclusions using aspects of epidemiology and medical statistics, and how to communicate study findings.
- Reading and understanding published journal articles or pharmaceutical company reports.
- Examining the efficacy and safety of health care interventions (an important part of a complete health economic evaluation of a clinical trial).
- Familiarity with systematic reviews (i.e. how several studies are combined, and the importance of looking at the evidence as a whole).

Teaching: 10 interactive seminars/workshops, each 2-3 hours long.

Formative coursework: Students will be given two short exercises before the course begins, via Moodle, to help prepare for the course. The tutor will go over these during the contact week, and address any queries from the students. However, detailed written answers are provided, so the students can access these if they undertake any of the exercises after the contact week. The tutor is also available for one-to-one email contact with any student.

Indicative reading:

- Hackshaw A. A concise guide to clinical trials. BMJ Books, Wiley-Blackwell, first edition 2009.
- Hackshaw A. A concise guide to observational studies in healthcare. BMJ Books, Wiley-Blackwell, first edition 2015.
- Greenhalgh T. How to Read a Paper: The Basics of Evidence-Based Medicine. BMJ Books, Wiley-Blackwell, fourth edition, 2010.

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle.

Assessment: Coursework (50%) and coursework (50%) in the WT. There will be two pieces of coursework based on a clinical trial of an intervention or a risk/causal factor, in the form of:

- a written assignment in the form of a PowerPoint slide deck (about 25 slides) and a statement of 400 words of further discussion and conclusions, based on a published paper and associated media news article of the paper (50%)
- 4-5 questions specific to a published paper with answers requiring 1-3 paragraphs each (50%).

HP4B5E Half Unit Not available in 2024/25 Statistical Methods in Health Care Economic Evaluation

This information is for the 2024/25 session.

Teacher responsible: Dr Maria Raikou

Course content: This course develops the statistical and modelling techniques necessary to apply economic evaluation to the health care sector.

Introduction to statistical methods, linear regression analysis, logistic regression analysis, survival analysis for health outcomes, survival analysis for treatment costs, economic evaluation and clinical trials. Estimation of confidence intervals for cost-effectiveness ratios. Transformation of ratios - net benefit approach. Missing data, parametric and non-parametric approaches. Presentation of analysis, acceptability curves.

Teaching: 13 hours of lectures and 8 hours of seminars (computer based)

Formative coursework: In-class exercise during seminar time.

Students will receive feedback on it from their seminar leader after completion.

Indicative reading: The following are basic reading for the course: M Drummond & A McGuire (Eds), Economic Evaluation in Health Care: Merging Theory with Practice, OUP, 2002; M Drummond, B O'Brien, G Stoddart & T Torrance, Methods for the Economic Evaluation of Health Care Programmes, 2nd edn, OUP, 1997; M Gold, J Siegel, L Russell & M Weinstein, Cost-Effectiveness in Health and Medicine, OUP, 1996; M Johannesson, Theory and Methods of Economic Evaluation in Health Care, Kluwer, 1996; P Johansson, Evaluating Health Risks: An Economic Approach, CUP, 1995.

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Take-home assessment (100%).

HP4B7E Half Unit Advanced Health Economics

This information is for the 2024/25 session.

Teacher responsible: Prof Alistair McGuire COW 2.02

Availability: This course is available on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The course will cover: international comparisons of health care expenditure, health care insurance, contract theory applied to the health care sector (including principal-agent theory and incentive payment mechanisms), equity in health care, health behaviour and an introduction to econometric analysis applied to health care data.

Teaching: This course will be delivered as a combination lectures, workshops and student presentations, totalling a minimum of 19 hours.

Formative coursework: 1500 word essay

Indicative reading: Culyer, A.J., and Newhouse, J.P., (eds.), 2001, Handbook of Health Economics Volumes 1A & 1B, (North-Holland, Amsterdam); Zweifel, P. and Breyer, F., 1997, Health Economics, (OUP, Oxford).

Assessment: Essay (100%, 3000 words).

HP4B9E Half Unit Dissertation in Health Economics, Policy and Management

This information is for the 2024/25 session.

Teacher responsible: Mr George Wharton COW2.14

Availability: This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The aim of the dissertation is for students to pursue an independent piece of research that will contribute to the field of health economics, health policy or health management. The contribution of the work to the chosen field must be made clear. The output will be a piece of work of 5000 words or less that is written in an article format that is suitable for submission to a peer reviewed journal. Students must obtain the approval of their supervisor and have ethics approval before embarking on any research.

Arrangements for supervision

Students' tutors will act as their dissertation supervisor in the first instance. The Programme Director can recommend changes to supervision and/or secondary supervision should the topic of

research warrant it.

Teaching: The dissertation process is supported by three teaching sessions.

Formative coursework: Dissertation Proposal submitted in Winter Term (Year 2).

Assessment: Dissertation (100%, 5000 words).

HP4C1E Half Unit Economic Analysis for Health Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Andrew Street COW 1.02

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences. This course is not available as an outside option.

Course content: The course will serve as an introduction to major issues in the economics of health and health care. It will provide participants with a strong understanding of the role economics can play in health policy and health system administration. It will provide a framework with which to understand the demands placed on the health care system, the changing nature of health care supply and delivery, the interactions between patients and providers of health care, and the performance and productivity of the health system. Participants will also be introduced to essential statistical concepts in the evaluation of clinical interventions. Seminar sessions will focus on current policy debates in health care drawing on the theory and evidence from the lectures.

Teaching: The course will be delivered as a combination of lectures and seminars totalling no less than 25 hours.

Formative coursework: An 800-word "mock" blog entry for The Conversation, which covers policy-relevant issues written by academic contributors. A series of topics will be provided to students to choose from.

Indicative reading: Course textbook: Bhattacharya, Jay, Timothy Hyde, and Peter Tu. Health economics. Palgrave Macmillan, 2013. Chapters 2, 16, 17, 20, Sections 5.4, 6.3.

Pocock SJ et al. Making Sense of Statistics in Clinical Trial Reports: Part 1 of a 4-Part Series on Statistics for Clinical Trials. J Am Coll of Cardiol. 2015;66(22):2536-49

Assessment: Essay (70%, 2500 words) and presentation (30%). The two assessments will be:

2. Individual-based presentation (30%). Students will record a presentation based on their formative blog.

1. Summative essay (70%) of 2500 words. This will be a fuller discussion of the topic covered in the blog and presentation. These assessments will evaluate the students' ability in summarising, applying, and critically appraising the relevance of health economics concepts to a health policy issue.

HP4C2E Half Unit Quality and Outcomes in Clinical Sciences

This information is for the 2024/25 session.

Teacher responsible: Dr Rocco Friebel COW 2.09

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences. This course is not available as an outside option.

Course content: Against a backdrop of great technological advances and delivery system innovations, healthcare systems are facing daunting challenges. Over the past half-century, research has manifested remarkable advances in the prevention and treatment of diseases. Yet, great challenges remain, primarily due to a lack of strong research evidence about how best to improve the quality, outcomes, and efficiency in health systems with a focus on diseases. Outcomes research aims to produce such evidence.

In addition to briefly reviewing key epidemiological trends in Europe

and globally, this course will introduce key 'evidence-practice' gaps in diseases. The first part of the course provides an overview of the definition of quality, its key components, and its measurement in different health care systems. The second part offers a critical perspective on the literature evaluating quality improvement interventions. The third part focuses on the basics of study design for evaluating quality improvement interventions, programmes, and policies, distinguishing between strong and weak research designs.

The intended learning outcomes of this course are the following:

- Describe epidemiological trends¹⁶⁰
- Summarise the primary components of quality in health care
- Explain the main limitations of the literature evaluating quality improvement interventions
- Define the principal threats to validity in studies evaluating quality
- Design an evaluation strategy for a quality improvement policy or intervention in a group setting
- Critically evaluate empirical evaluations of quality and outcomes in health care research in oral and written form

Teaching: The course will be delivered in no less than 24 hours and comprises lectures and seminars

Formative coursework: Formative feedback on group presentations

Indicative reading:

- Krumholz HM. Outcomes research: generating evidence for best practice and policies. Circulation 2008;118:309–18.
- Ellwood PM. Shattuck lecture – outcomes management: a technology of patient experience. N Engl J Med 1988; 318: 1549–56.

Assessment: Essay (100%, 3000 words).

HP4C3E Half Unit Economic Evaluation in Health Care

This information is for the 2024/25 session.

Teacher responsible: Mr Alexander Carter COW 2.10

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences. This course is not available as an outside option.

Course content: In the health sector, decision makers are regularly faced with the challenge of allocating finite resources in an optimal manner. Economic evaluation (or cost-effectiveness analysis) is used to formalise the process of decision-making by estimating the expected costs and benefits from alternative scenarios or interventions. Decision makers use evidence from economic evaluations to make specific recommendations for coverage, reimbursement, and pricing decisions for a variety of health interventions, and to define best practice. The course introduces principles and practices for measuring the costs and effects of interventions, using measures such as Quality-Adjusted Life Years (QALYs) and Disability-Adjusted Life Years (DALYs). The course will enable candidates to understand and apply economic evaluation methods and it will provide a solid foundation for exploring more advanced approaches. With a focus on clinical decision making, candidates will learn transferable skills about the design and execution of economic evaluations.

Teaching: The course will be delivered as a combination lectures

and seminars, totalling a minimum of 20 hours.

Formative coursework: The formative assessment will require students to prepare a group presentation critically appraising a published study based on a few questions provided by the course leader.

Indicative reading: Drummond M et al. *Methods for the Economic Evaluation of Health Care Programmes*. Oxford, OUP, 2005
Drummond M et al. *Economic Evaluation in Health Care: Merging Theory with Practice*, Oxford, OUP, 2002.

Assessment: Research project (100%) in the post-spring term.

HP4C4E Half Unit Systematic Review and Meta-analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Huseyin Naci COW 3.01

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: Systematic review and meta-analysis methods are increasingly used to evaluate the relative benefits and harms of healthcare interventions. A broad range of decision making bodies across the health care sector (including health technology assessment bodies, drug and medical device licensing agencies, biopharmaceutical industry, and hospitals) need experts equipped with the methods of reviewing and synthesizing the existing body of evidence.

This course will be focused on the principles of reviewing and synthesizing the existing body of literature. The course will first provide the rationale for adopting a systematic approach for evidence review and synthesis. It will then equip students with the methods to undertake risk of bias assessments of individual randomized controlled trials and also collections of randomized controlled trials. In addition to providing an overview of methods for quantitatively synthesizing multiple randomized controlled trials in meta-analysis, the course will present the opportunities and challenges of using evidence for decision-making in health care.

Learning outcomes:

- Describe the rationale for adopting a systematic approach to literature review
- Define the principal threats to validity both in individual randomized controlled trials and collections of randomized controlled trials
- Critically evaluate the internal validity of randomized controlled trials
- Assess heterogeneity in a collection of randomized controlled trials
- Critically appraise a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 22 hours. As well as access to lectures, students will also work in small groups to complete self-directed learning activities. Computer workshops will be held to introduce students to systematic review and meta analysis software.

Formative coursework:

- Course convener will provide written feedback on project outlines

Indicative reading:

Assessment: Research project (100%) in the post-spring term.

HP4C5E Half Unit Using Health Economics to Analyse and Inform Policy and Practice

This information is for the 2024/25 session.

Teacher responsible: Prof Andrew Street COW 1.02

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences. This course is not available as an outside option.

Course content: The health care sector is extremely complex, and this gives rise to concerns about how the health system should be organised, how incentives should be designed, and how performance should be evaluated. The objective of the course is to give students an introduction to how health systems are constructed, and how the various parts of the system interact; the role of regulation, resource allocation, payment arrangements, and performance measurement; the complexities of evaluating policy and performance; and the contribution that health economics can make to the evaluation and development of health policy. Participants are introduced to variety of econometric methods as the course progresses.

Teaching: This course will be delivered as a combination of lectures and seminars. The course will be delivered over a minimum total of 25 hours.

Formative coursework: Formative assessment (up to 1000 words), is an outline of the summative assessment essay question. This will give students an opportunity to develop their thoughts ahead of the summative assessment, and will allow for feedback from course teachers that will guide students when they work on their longer summative essay

Assessment:

Essay (80%, 4500 words)

Multiple Choice Quizzes (20%, 4 quizzes at 5% each)

HP4D1E Half Unit**Introduction to Management in Health Care****This information is for the 2024/25 session.****Teacher responsible:** Dr George Wharton**Availability:** This course is compulsory on the Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.**Course content:** The course aims to introduce students to the main principles of management and strategy and related issues that impact on organisational change, group decision making, innovation and leadership. Key models and academic tools will be presented and their application to real world situations discussed. The course aims to give students a strong academic understanding and also enable them to apply this knowledge to their practice.

The course outline is below

1. Strategy and Managerial Work

In this session, we will explore the development of the modern practice of 'strategy' and what it means today. Along the way, we will show how organisational practices like planning met emerging ideas in academia, especially in economics, to develop new tools and ways of thinking that transformed the practice of management in the late 20th century. The development of strategic management and planning tools and the competitive environment in which they emerged will be discussed and the application of these tools will be examined in competitive markets.

2. Innovation Management

This part of the course will introduce the topic of innovation management. In particular, it introduces participants to the conceptualization of innovation as a means to affect the competitive process. Participants will be introduced to the basics of the competitive process and the effect of innovation on the competitive process. Participants will be active in analysing the competitive process surrounding their organization and the competitive position their organization occupies within it and activities will be used to promote thinking about how innovations, small or large, can defend and/or improve their competitive position.

3. How Individuals and Groups Organise and Make Decisions and Take Risk

This part of the course will introduce issues related to working as individuals within an organisation and as a group. It will look at the "benefits" and "harms" of group decision making processes – especially with reference to health care where collaborative multi-disciplinary teams are commonplace – and also discuss how group decisions making can be undermined by systematic biases.

4. Behaviour Change and Social Marketing

This part of the course will introduce the drivers and mechanisms of behaviour change in organisations. In particular, we will discuss how different organizational-level factors may influence behaviour change, including resistance to change from various levels and sustainability of changes across time, and how organizational behaviour change can be measured. Models of organisational behaviour change will be introduced and the principles of managing and leading change in established systems will be discussed with a focus on the stages of planning and implementation of change. Alongside this appropriate tools and resources will be introduced to aid future organisational changes. The coverage of social marketing will deal with the formulation and execution of strategies designed to influence behaviour change amongst groups at risk of cardiovascular disease.

5. Culture and Leadership

This part of the course will explore the definition of culture within organisations and leaders' role in creating and supporting successful teams. Key components of leadership, like the ability to establish direction and motivate and inspire a workforce as well as handle relationships with external stakeholders, will then be introduced with a consideration of how they affect culture and working practices.

Teaching: This course will be delivered as a combination lectures

and seminars, totalling a minimum of 25 hours. During the course students will also undertake a writing seminar series covering critical reading and writing skills for effective management communication.

Formative coursework: Students will be expected to produce 1 essay.

The formative assessment is a 500 word outline of the summative assessment essay question.

Indicative reading: Mintzberg, H., Ahlstrand, B. and Lampel, J. (2008). *Strategy Safari: The Complete Guide Through the Wilds of Strategic Management* (Second Edition). Prentice-Hall. Chapters 1 and 4Whittington, R. (2000). *What is Strategy—and Does it Matter?*

(Second Edition) Thomson International. Chapters 1, 2 and 4

Barney, J. 1995. Looking Inside for Competitive Advantage. *The Academy of Management Executive*. 9(4): 49-61.Christensen, C.M., Raynor, M.E., McDonald, R. 2015. What Is Disruptive Innovation? *Harvard Business Review*. December Issue (available online at <https://hbr.org/2015/12/what-is-disruptive-innovation>)**Assessment:** Essay (100%, 3000 words).

The course will be assessed on the basis of a 3000 word essay on a specific topic. In writing this essay, students will be able to demonstrate and synthesise what they have learned from the lectures, reading material, group discussions and their own independent research and thinking. The content of the assessments will lead on from the simulation exercises that have been used in the seminars and students will be encouraged to use topics they have identified during reflections on their own work.

HP4D2E Half Unit**Principles of Health Technology Assessment****This information is for the 2024/25 session.****Teacher responsible:** Mr Alexander Carter**Availability:** This course is available on the Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.**Course content:** Health Technology Assessment a multidisciplinary process that summarises information about the medical, social, economic, and ethical issues related to the use of a health technology in a systematic, transparent, unbiased, and robust manner. Health Technology Assessment differs in its governance, data and evidence requirements, assessment methods, and operational arrangements across different settings and contexts. This course is aimed at introducing the key principles of Health Technology Assessment, its operational modalities, the different models of value assessment and how they link to decision-making.

Outline of the course is included below:

1. The role of Health Technology Assessment in health care decision making
2. Models of Health Technology Assessment and their application in different jurisdictions - a comparative perspective
3. Governance issues (position in health care decision-making, topic selection, assessment process, stakeholder involvement)
4. Data and evidence requirements for value assessment
5. Health Technology Assessment and value assessment: focus on clinical benefit assessment
6. Health Technology Assessment and value assessment: focus on clinical-cost-effectiveness
7. Assessment methods in Health Technology Assessment
8. Explaining similarities and differences in Health Technology Assessment recommendations – a toolkit
9. The role of multiple criteria decision analysis in value assessment
10. Beyond Health Technology Assessment: links to risk-sharing and special purchasing arrangements

Teaching: This course will be delivered as a combination lectures and seminars, totalling a minimum of 20 hours.

Formative coursework: A selection of multiple choice and/or open-ended questions to test extent of knowledge and understanding of syllabus

Indicative reading: Chalkidou, K., Tunis, S., Lopert, R., Roach, L., Sawicki, P. T., Nasser, M., & Xerri, B. (2009). Sorenson, C. (2010). Use of comparative effectiveness research in drug coverage and pricing decisions: a six-country comparison. *Issue Brief (Commonwealth Fund)*, 91, 1-14.

Assessment: Research project (100%) in the post-spring term.

HP4D5E Half Unit

Methods for Evaluating Health Programs and Policies

This information is for the 2024/25 session.

Teacher responsible: Dr Mylene Lagarde COW 3.02

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: Clinicians have long used experimental methods (randomized trials) to test the efficacy of drugs and other medical treatments. Whilst economists and other social scientists have used alternative quasi-experimental methods to determine the causal effects of policies, they are increasingly using the experimental approach to evaluate the effects of a range of public policies.

The objective of this course is to teach students about the different quasi-experimental approaches and to unpack the principles of experimental (randomised) methods for evaluating policies, programmes, and interventions relevant to health policy. This course will draw on examples from LMICs (low and middle income countries).

This course will provide an overview of the principles and models of evaluation, including the importance of developing a theory of change. We will then provide an overview of the main quasi-experimental designs for evaluating health interventions and policies. Next we will focus on key technical principles of experimental approaches (including issues of statistical power and sample size calculation), and discuss the nature and impact of a range of problems (e.g. attrition, spillovers, compliance) to the internal validity of a study design. Data and measurement considerations for quantitative studies will be discussed. The course will conclude with practical and ethical issues when undertaking randomised evaluations.

Teaching: This course will be delivered as a combination lectures and seminars, totalling a minimum of 20 hours. As well as access to lectures, students will work in small groups to develop their research design during seminars.

Formative coursework: 1,000 word outline

Indicative reading: Glennerster, R., & Takavarasha, K. (2013). *Running Randomized Evaluations* (STU - Student edition ed.): Princeton University Press.

Assessment: 1 x Protocol, 4,000 words (100%)

HP4D6E Half Unit

Behavioural Insights for Health Incentive Design

This information is for the 2024/25 session.

Teacher responsible: Prof Joan Costa-Font COW 1.06

Availability: This course is available on the Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences and Executive MSc in Health Economics, Policy and Management. This course is not available as an outside option.

Course content: The course provides an introduction to behavioural health economics and policy. It is structured in three sections. The first section introduces the main concepts of the course. This includes the meaning of behavioural incentives, choice architecture and cognitive biases such as present bias and availability biases and in the health and health care. In this section we offer some discussion on the methods for behavioural incentive design. A core of the section is the understanding of the learning and behaviour formation in health and health care. We examine a number of learning models which include rational learning, bounded learning, bayesian learning, social learning, emotional learning and other forms of behavioural learning. We draw on a number of examples on COVID-19 as well as from recently published evidence. A second section discusses the role of the specific behavioural incentives in practice, and more specifically, monetary and social incentives in explaining health behaviours, as well as the role of nudge and the choice architecture. This section discusses the role of pay for performance, and crowding out, the role of esteem and number of biases that limit the use of social incentives such as social desirability biases, as well as social preferences. The section covers identity models, as well as the role of envy, guilt and regret and more generally emotions in guiding behaviour in health and health care. We discuss the effect of narratives, and the effect of esteem and stigma. Similarly, we examine the role of nudge and reference points, alongside the cultural transmission and family joint formation of health behaviours. A final section is devoted to study the specific behavioural mechanisms such as the role of behavioural spillovers and prevention failures, incentives for vaccine uptake and how to motivate providers behaviours and finally the role of incentives for insurance uptake and generally time and risks preferences, behavioural hazards, social anchoring and the effects of reminders and risk perceptions. Hassle costs and insurance misunderstandings. We discuss a number of recent experiences from Oregon experiment and Medicaid expansions in the United States, and other insurance expansion in other countries.

Teaching: The course will be delivered through a combination of lectures, seminars, workshop preparation and workshop totalling a minimum of 24 hours. Students will take part in workshops which include a small group preparation and presentation of a group project. Groups will prepare a short presentation of a question that builds on content delivered in the lectures.

Formative coursework: It is expected students to participate in organised discussion during workshop preparations and will prepare for the workshop presentations. There will be a quiz for students to answer and assess their performance.

Indicative reading:

• Hanoch, Y, A Barnes and T Rice (2017) *Behavioural Economics and Healthy Behaviors: Key Concepts and Current Research*. Routledge.

Assessment: Project (100%, 3000 words).

HP4D7E Half Unit

Fundamentals of Management and Leadership in Health Care

This information is for the 2024/25 session.

Teacher responsible: Dr George Wharton

Availability: This course is compulsory on the Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences. This course is not available as an outside option.

Course content: The course is intended to be an introduction to the theory and practice of management for specialists moving into leadership roles in the health care field. It is intended to support the content and outcome orientation of core analytical and health policy courses, by providing relevant knowledge and skills for formulating and leading organizational development and change. We will argue that a holistic understanding of organisational phenomena, and an ability to critique and synthesise the lessons of theory are the basis of effective and reflective practice. This course complements and supports the analytical and policy evaluation tools developed in other core courses, which focus on identifying and evaluating desired outcomes. In this course we will develop the managerial and leadership tools to complement these 'what' questions and explore the 'who' and 'how' questions of leading and implementing organisational change and development.

As it is a half unit that must cover a great deal of ground, the course is designed to provide a sound basis for effective action by focusing on fundamental theories while teaching foundational skills.

We will consider the nature of organisations in theory and practice, and how the development of each influenced the other. What are the properties and functions of modern organisations? What theories have been advanced to explain their existence and form? We will see that the relationship between theory and practice are complicated and reflexive, and why understanding this is an important first step in developing an effective managerial practice. We will explore the knowledge set that has come to define managerial practice. How did the practice of management and leadership, and theories of organisation develop? What social science disciplines have contributed to it? We will see that the explanations and prescriptions of various schools of thought can be divergent or even contradictory. We will see how the ability to critique and synthesise the insights of diverse perspectives and tools is key to both formulating and implementing effective organisational change.

We will also explore the social construction of the 'role' of the manager. How do managers make sense of their world, and what theories have shaped what managers do (and what they think they should do)? We will discover how answers to these questions depend in part on our assumptions about the nature of organisations as social spheres and managers as actors and decision-makers and demonstrate the importance of 'who' and 'how' considerations in thinking about the 'what' questions of policy.

Finally, we will bring the course to a conclusion by considering the question of leadership and how we usefully employ the concept to draw together the lessons of theory in practice. What are leadership theories, and what are the lessons of what we have learned thus far for leadership practice? Students will be asked to consider their own synthesis in light of the content of the course and the requirements of the people and situations they know from their own experience.

Teaching: Teaching will be delivered via lectures, seminars and workshops over a minimum of 20 hours.

The lectures will develop an understanding of the core phenomena: organisation, management and leadership. We begin by considering organisational theories and present the simultaneous development of the managerial knowledge set and modern organisational forms and practices. We then consider the relationship between models of organisational behaviour and strategy and conceptions of the manager as an actor and decision-maker. Finally, we consider the question of leadership in multiple

conceptions and theories to develop students' understanding of the forces at play in the relationship between leaders and led. Classes will develop a critique of management theories via the analysis of organisational situations. We will encourage the consideration and synthesis of eclectic theories across social science disciplines and levels of analysis to develop students' holistic thinking about leadership in organisations.

The writing workshops will develop critical reading, thinking and writing skills that will enable further learning and reflective practice, as well as effective communication.

Formative coursework: Skills for carrying out the essay will be developed in the exercises presented as part of the writing workshops. These exercises will also provide opportunities to explore and refine a topic that is suitable for the assignment with the course teacher.

After the course session, the formative submission will be a formal proposal and preliminary outline of the final paper, which will form the basis for feedback and further consultation with the course teacher.

HP4E1E Half Unit Not available in 2024/25

Global Health Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Clare Wenham COW 1.03 and Dr Justin Parkhurst COW 2.08

Course content: Health policy is no longer purely a government activity, but globalisation and global organisations have impacted on the nature of global health, and the policies created to manage the health needs of the global population. This module critically examines global health policy and normative shifts in understanding global health which impact upon it. The multi-actor framework of global health actors involved in the provision and practice of health policy now includes United Nations agencies (WHO, UNICEF, UNAIDS etc), a number of NGOs, civil society organisations, private sector, foundations, public private partnerships. Each actor has their own priorities for setting the global health agenda, and this module examines the role of each and their impact on health policy at national, regional and global levels. The module will analyse a range of case studies of global health events and global health policies and the governance arrangements made by them. In doing so, this module will draw on contributions from international relations, political science, sociology and public health research

Teaching: 12 hours of lectures and 8 hours of seminars in the AT. All students will have the opportunity to participate in additional lectures undertaken by external guests. These lectures will be run twice a week from 6pm to 8pm during the teaching period at LSE. In addition, students will be given the option to participate in a three-hour webinar hosted at least 10 days before the due date of the take-home assessment. The webinar will consist of two-hours of lectures and one hour of question time.

Formative coursework: Students will be expected to produce 1

essay in the AT.

1 X 1000 word essay. Students will be asked to submit a short 1000 word essay (on the topic that they are writing on for the summative, but a different question) at the end of January. These will be graded and feedback given to students. This allows students to get valuable experience of writing at MSc level at LSE, and the expectations of the summative assessment. This then allows students to take this feedback and use it in their writing of the summative work. For example, if a student's formative work flagged particular concerns this could be addressed ahead of the summative submission.

- Parker, M., & Allen, T. (2014). De-politicizing parasites: reflections on attempts to control the control of neglected tropical diseases. *Medical anthropology*, 33(3), 223-239.

Assessment: Essay (100%, 4000 words) in the WT.

1 x 4000 word essay due in LT (after lecture/seminar programme in December) – 100% of grade

Students will be asked to pick one essay question from a list of 8 topics. They are also given the option to choose their own essay topic (after discussion with their seminar leader) if they would prefer. The questions will be broad, allowing for student individuality to come across in their answers. For example: What role should the WHO play in the future of global health policy?

HP4E5E Half Unit Economics of the Pharmaceutical Sector

This information is for the 2024/25 session.

Teacher responsible: Dr Panagiotis Kanavos COW 1.05

Availability: This course is compulsory on the Executive MSc in Healthcare Decision-Making, in collaboration with NICE. This course is not available as an outside option.

Course content: The aim of this course is to introduce students to the economics of pharmaceutical markets and related policies at national, supranational, and global level. The course will illustrate to students how pharmaceutical markets are linked to the health care market and the associated imperfections and market failures and how these manifest themselves at national, supranational, and global level. The course will provide students with an understanding of basic features of pharmaceutical markets (intellectual property, licensing, pricing regulation, policies on reimbursement) and an understanding of how pharmaceutical markets work, how competition manifests itself in different market segments (in-patent vs off-patent). The course will introduce students to the economics of pricing and reimbursing pharmaceutical products and will explore different pricing and reimbursement models for medicines in OECD countries, including rate of return regulation, value-based pricing, cost-plus pricing, external price referencing and internal reference pricing. Finally, the course will explore key aspects of the global health agenda related to pharmaceuticals and, specifically, access to medicines in resource-challenged settings, R&D models with emphasis on R&D in neglected diseases, vaccine procurement, and strategic

procurement of medicines.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 22 hours

Formative coursework: The formative assessment will be a 800 word outline of the summative assessment essay question. The formative assessment will be a more detailed written outline of their essays written individually. Students will receive detailed individual feedback on their formative assessments and continue developing their assessed essays individually. The formative feedback is intended to help the students while developing their final essays.

Assessment: Essay (80%, 2500 words) and continuous assessment (20%)

HP4F1E Half Unit Impact Evaluation in Healthcare

This information is for the 2024/25 session.

Teacher responsible: Dr Emilie Courtin

Availability: This course is compulsory on the Executive MSc in Healthcare Decision-Making, in collaboration with NICE. This course is not available as an outside option.

Course content: The objective of this course is to introduce students to key concepts in evaluation in healthcare. The course will provide an overview of the principles and models of evaluation, and the role of theories, concepts, and hypotheses. In terms of research design, it will cover study design choices in light of bias, validity and other design tradeoffs. It will introduce students to experimental, quasi-experimental, non-experimental, and qualitative designs for evaluating healthcare interventions, programmes and policies aimed at achieving high quality care, reducing costs, and improving health outcomes. Data and measurement considerations for both quantitative and qualitative studies will be discussed alongside the importance of using mixed-methods and triangulation for interpreting findings and taking a critical approach to the results of evaluation. The course will conclude with practical and ethical issues when undertaking evaluation studies.

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 20 hours

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT.

Following the group presentations delivered on the last day of the course, students will continue developing their projects individually. The formative assessment will be a more detailed written outline of their projects written individually. Students will receive detailed feedback (individually and not as a group) on their formative assessments and continue developing their project reports individually. The formative feedback is intended to help the students while developing their final project reports.

HP4F2E Half Unit Not available in 2024/25

Quasi-Experimental Evaluation of Healthcare Programs and Policies

This information is for the 2024/25 session.

Teacher responsible: Dr Elisabetta De Cao COW 3.06

Availability: This course is compulsory on the Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE. This course is not available as an outside option.

Course content: When randomised controlled trials are not possible to conduct due to feasibility, ethical, or policy reasons, quasi-experimental study designs can be used to evaluate the causal impact of health programs and policies. The objective of this course is to teach students how to design, critically appraise, and conduct quasi-experimental studies evaluating health policies, programmes, and interventions. The main focus of the course will be on regression discontinuity designs, interrupted time-series designs, difference-in-differences designs, instrumental variable designs, and synthetic control approaches. This module will provide an overview of these study designs and outline the advantages and disadvantages of each approach with specific examples from the health care literature. Suitability of routinely available healthcare datasets for quasi-experimental evaluation studies will be discussed with seminal examples. Computer workshops will provide the students with hands-on experience in conducting quasi-experimental evaluations.

Teaching: The course will be delivered in no less than 22 hours and consists lectures and seminars.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

Student will receive detailed feedback on their project report outlines. Feedback received on the project outline will be helpful when developing the final project report.

Assessment: Project (100%, 2500 words) in the post-spring term.

HP4F3E Half Unit Not available in 2024/25

Randomised Evaluation of Health Programmes and Policies

This information is for the 2024/25 session.

Teacher responsible: Dr Mylene Lagarde COW.3.02

Availability: This course is compulsory on the Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE. This course is not available as an outside option.

Course content: Randomized trials have long been used in the clinical world to test the efficacy of drugs and other medical treatments. Recently, social scientists have started using the same approach, using random assignment to allocate resources or implement a policy intervention differently to different groups, in order to determine the causal effects of the policy of interest. The popularity of randomized evaluations has grown especially, but not exclusively, among researchers and policymakers in low- and middle-income settings.

Conducting a successful randomized evaluation involves many inter-related steps and a good understanding of a few statistical concepts. Randomized evaluations also usually require to design and organise the data collection of relevant and useful information, which involves a number of steps to avoid critical pitfalls. It is therefore essential to understand these different steps to design and implement randomised evaluations adequately, or to be able to critically analyse them.

This course proposes a hands-on and intuitive approach to designing and conducting a randomised evaluation. In the first half of the course, we will discuss reasons for undertaking randomised evaluations; how to design the randomised experiment to ensure it answers the question(s) of interest (including issues of statistical power and sample size calculation); how to deal with threats to randomisation (e.g. attrition, spill-overs). In the second half of the course, we will discuss practical issues raised by primary data collection, including how to best measure outcomes of interest; how to design good tools and how to conduct and manage fieldwork. We will also discuss the ethics of randomised policy evaluations.

The course will be a mix of lectures and small-group discussions and exercises in seminars.

Seminars will be designed to encourage students to critically engage with the topics and apply the technical skills taught. Each seminar will be closely aligned with the lecture content to give students the opportunity to apply the new knowledge. Seminars will be built around a group project defined at the beginning of the week: students in a group will gradually build the design of their randomised evaluation and plan the different components, working towards a final product which will form the basis of their evaluation. This will ensure that students maintain their engagement throughout the course, but also apply their skills immediately.

Teaching: The course will be delivered in no less than 24 hours and consists lectures and seminars.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

Students will be asked to submit a short 1,000 word draft protocol after the end of the course. The draft protocol will serve as an outline of the final research protocol, which will account for 100% of the final mark.

While some aspects of their work may still be work in progress (e.g. using bullet points), students will be expected to write up one section of their protocol in a more detailed way. The outlines will be graded and feedback given to students. Students will be able to use this feedback in their writing of the summative work.

- Dupas, P., & Miguel, E. (2017). Impacts and Determinants of Health Levels in Low-Income Countries. In E. Duflo & A. Banerjee (Eds.), *Handbook of Field Experiments*: North Holland.

Assessment: Research project (100%) in the post-spring term. 1 x Research protocol (3,000 words max) to plan the randomised evaluation of a particular health programme – 100% of grade. Students will be asked to pick one programme/policy from a proposed list. They are also given the option to choose their own intervention (after discussion with their seminar leader) if they would prefer.

HP4F4E Half Unit Not available in 2024/25 Dissertation in Evaluation of Healthcare Interventions and Outcomes

This information is for the 2024/25 session.

Teacher responsible: Dr Rocco Friebe and Dr Panagiotis Kanavos

Availability: This course is compulsory on the Executive MSc in Evaluation of Health Care Interventions and Outcomes, in collaboration with NICE. This course is not available as an outside option.

Course content: The dissertation could be on any topic in the field of health services research and health policy. It should attempt to integrate approaches and knowledge learned across courses and present results to address a health policy or economic issue or a problem identified through the use of either primary or secondary data. It must demonstrate adequate knowledge of relevant theoretical and empirical literature in the field. In addition, careful analysis of the policy implications and formulation of policy recommendations is essential. The main body of the dissertation should, in principle, include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.

Teaching: Tuition for the dissertation will be delivered in no less than 20 hours. The course will enable students to investigate an original research question to the standards of scientific enquiry, the dissertation module will detail methodological and academic criteria when producing a piece of original work in the context of health care interventions and outcomes research. The week-long course will include taught sessions as follows:

- Departmental expectations for a dissertation;
- Developing a research question;
- Critical appraisal of the literature;
- Overview of different methodological approaches;
- Scientific writing workshop;
- Communication of dissertation findings: policy and practice implications

The taught sessions will introduce the content and provide theoretical framework for topics to be disseminated in seminars. Through teaching and learning, students will be able to develop a poster highlighting a potential dissertation research question and methodology, which they will present at the end of the course. We will use this opportunity to assign expertise-based supervision to students, who will in turn receive support and guidance on academic matters as well as the progress of their research. Students will be entitled to arrange 3 x 30-minute one-to-one meetings with their supervisors over the course of their study to receive feedback and bespoke support throughout the dissertation process.

Formative coursework: Students will be expected to produce 1 presentation in the AT.

Students will develop a poster setting out a proposed research question and methodology for presentation in the closing session

of the week's teaching for comment and appraisal by faculty. The project presented in the poster will be a starting point for the student's research project; therefore, it may or may not be developed further and to form the basis for the dissertation itself.

Assessment: Dissertation (100%, 5000 words) in the AT.

HP4F5E Half Unit Health Care Regulation

This information is for the 2024/25 session.

Teacher responsible: Dr Rocco Friebe

Availability: This course is compulsory on the Executive MSc in Healthcare Decision-Making, in collaboration with NICE. This course is not available as an outside option.

Course content: Health care systems are complex organisational structures governed by an ambition to provide high-quality health care services to its population. In this context, governance describes a framework through which individual stakeholders are being held accountable to improving the quality of services and safe-guarding high standards of care. The framework also ensures a consistent evaluation and regulation of care processes and is crucial for the efficient functioning of health care systems around the world.

This course provides a detailed perspective on the complexities surrounding the interplay between different stakeholders in the regulation of health care markets and the problems facing the management of health care services. The course builds on theoretical concepts and on principles of sound economic analysis and exposes students to learning from regulatory experiences beyond the health sector, including from data sciences.

Following completion of this course, students will have an advanced understanding of the theoretical underpinnings of regulation and governance and they will be familiar with key topics of current concern, including the problems associated with health care management, planning, purchasing and commissioning, and quality of care. Knowledge drawn from this course will equip students with the necessary skills required to understand the complexities of health care regulation and governance and to critically assess policy decisions in their respective health systems.

Teaching: The course will be delivered in no less than 21 hours and includes lectures and seminars.

Formative coursework: Formative coursework will be completed in class. Students will be provided with a case study of a regulatory policy, which ought to be analysed and critiqued. Feedback will be provided, allowing students to develop skills to complete the summative assignment successfully.

HP4F6E Half Unit

Critical Appraisals of Clinical Trials and Real-World Evidence in Decision Making

This information is for the 2024/25 session.

Teacher responsible: Dr Panagiotis Kanavos

In addition, Professor Allan Hackshaw (Director, Cancer Research UK and UCL Cancer Trials Centre, UCL) will be teaching on this course.

Availability: This course is compulsory on the Executive MSc in Healthcare Decision-Making, in collaboration with NICE. This course is not available as an outside option.

Course content: Interventions in clinical medicine and public health are usually evaluated through robust evidence including randomised clinical trials (RCTs). These have been the cornerstone for changing practice for many decades. In recent years, large scale observational studies (such as disease registries from governmental or commercial organisations, drug prescription claims databases, and reimbursement databases) have been used to complement the evidence from RCTs, or to be used with (single arm) clinical trials to show a therapy's efficacy and safety. The module will provide students with practical skills in the following key areas:

- Understanding the different types of clinical trials (phase I to III), and how they provide different levels of evidence; how they are designed and analysed; how they form part of the evidence package that ultimately leads to the approval of a new drug or combination of drugs, or other intervention type; the limitations of modern RCTs, especially with the increasing use of molecular biomarkers; and how earlier phase trials can be used to approve therapies for rare/orphan disorders;
- Understanding the principles of real world data (RWD) studies: randomised pragmatic trials and large scale observational studies; the value of RWD for clinical decision making and approving new interventions; different sources of RWD; how RWD studies are designed, analysed and interpreted; strengths and

design and analytical limitations of RWD; and how RWD studies have been successfully used to influence decision making (for example, approval of a new drug or extending the licence of a drug already in routine use), and examples where this has failed.

- Examining the efficacy, safety and health-related quality of life of health care interventions (an important part of a complete health economic evaluation of a clinical trial).
- Interpreting research results and conclusions using aspects of epidemiology and medical statistics, and how to communicate study findings.
- Reading and understanding published journal articles or pharmaceutical company reports. And
- Familiarity with systematic reviews (i.e. how several studies are combined, and the importance of looking at the evidence as a whole).

Teaching: The course will be delivered by interactive workshops and will be 25 hours in total over the teaching week

Formative coursework: Students will be given two short exercises before the course begins, via Moodle, to help prepare for the course. The tutor will go over these during the contact week, and address any queries from the students. Detailed written answers are provided to the students, as template responses. The tutor is also available for one-to-one email contact with any student.

Indicative reading:

- Hackshaw A. *A concise guide to clinical trials*. BMJ Books, Wiley-Blackwell, first edition 2009.
- Hackshaw A. *A concise guide to observational studies in healthcare*. BMJ Books, Wiley-Blackwell, first edition 2015.
- Greenhalgh T. *How to Read a Paper: The Basics of Evidence-Based Medicine*. BMJ Books, Wiley-Blackwell, fourth edition, 2010.
- Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle.

Assessment:

Coursework (50%) and coursework (50%).

There will be two pieces of coursework in the form of a written assignment provided as a PowerPoint slide deck (about 25-30 slides) and a statement of 400 words of further discussion and conclusions, based on:

- a randomised clinical trial (50%)
- a real world evidence study (50%).

HP4G1E Half Unit

Statistical Methods in Health Care Economic Evaluation

This information is for the 2024/25 session.

Teacher responsible: Dr Ranjeeta Thomas

Availability: This course is compulsory on the Executive MSc in Healthcare Decision-Making, in collaboration with NICE. This course is available on the Executive MSc in Health Economics, Outcomes and Management in Clinical Sciences. This course is not available as an outside option.

Course content: This course develops the statistical and modelling techniques necessary to apply economic evaluation to the health care sector.

Introduction to statistical methods, linear regression analysis, logistic regression analysis, survival analysis for health outcomes, survival analysis for treatment costs, economic evaluation and clinical trials. Estimation of confidence intervals for cost-effectiveness ratios. Transformation of ratios - net benefit approach. Missing data, parametric and non-parametric approaches. Presentation of analysis, acceptability curves.

Teaching: A combination of lectures and seminars (computer based) totalling a minimum of 20 hours

Formative coursework: In-class exercise during seminar time. Students will receive feedback on it from their seminar leader after completion.

Indicative reading: The following are basic reading for the course:

- M Drummond & A McGuire (Eds), *Economic Evaluation in Health Care: Merging Theory with Practice*, OUP, 2002;
- M Drummond, B O'Brien, G Stoddart & T Torrance, *Methods for the Economic Evaluation of Health Care Programmes*, 2nd edn, OUP, 1997;

- M Johannesson, *Theory and Methods of Economic Evaluation in Health Care*, Kluwer, 1996; P Johannesson, *Evaluating Health Risks: An Economic Approach*, CUP, 1995.

Students will be given access to essential readings before the course begins through the pre-session reading programme on Moodle, which they will be expected to read prior to the first day of class.

Assessment: Take-home assessment (100%).

HP4G2E Half Unit

Principles of Health Technology Assessment

This information is for the 2024/25 session.

Teacher responsible: Dr Panagiotis Kanavos COW 1.05

Availability: This course is compulsory on the Executive MSc in Healthcare Decision-Making, in collaboration with NICE. This course is not available as an outside option.

Course content: Health Technology Assessment a multidisciplinary process that summarises information about the medical, social, economic, and ethical issues related to the use of a health technology in a systematic, transparent, unbiased, and robust manner. Health Technology Assessment differs in its governance, data and evidence requirements, assessment methods, and operational arrangements across different settings and contexts. This course is aimed at introducing the key principles of Health Technology Assessment, its operational modalities, the different models of value assessment and how they link to decision-making.

Outline of the course is included below:

- 1 The role of Health Technology Assessment in health care decision making
- 2 Models of Health Technology Assessment and their application in different jurisdictions - a comparative perspective
- 3 Governance issues (position in health care decision-making, topic selection, assessment process, stakeholder involvement)
- 4 Data and evidence requirements for value assessment
- 5 Health Technology Assessment and value assessment: focus on clinical benefit assessment
- 6 Health Technology Assessment and value assessment: focus on clinical-cost-effectiveness
- 7 Assessment methods in Health Technology Assessment
- 8 Explaining similarities and differences in Health Technology Assessment recommendations – a toolkit
- 9 The role of multiple criteria decision analysis in value assessment
- 10 Beyond Health Technology Assessment: links to risk-sharing and special purchasing arrangements

Teaching: This course will be delivered through a combination of lectures and seminars totalling a minimum 21 hours.

Formative coursework: A selection of multiple choice and/or open-ended questions to test extent of knowledge and understanding of syllabus

Indicative reading:

HP4G3E Half Unit

Economic Modelling for Health Care Decision Making

This information is for the 2024/25 session.

Teacher responsible: Mr Alexander Carter COW 2.10

Availability: This course is compulsory on the Executive MSc in Healthcare Decision-Making, in collaboration with NICE. This course is not available as an outside option.

Course content: Health care decision makers are often faced with the challenges of resource allocation. Economic evaluation is used to formalize the process of decision-making on the basis of costs and benefits associated with multiple alternative scenarios or interventions. Decision makers use evidence from economic evaluation analyses to make specific recommendations for coverage, reimbursement, and pricing decisions for a variety of health care interventions, as well as define best practices. This course will enable students to understand and apply analytic methods in the economic evaluation of health interventions and provide a strong foundation in the several advanced concepts in economic evaluation, and in particular cost-effectiveness of interventions used in long-term chronic illnesses. The course will provide an overview of the principles and practices of measuring and analyzing costs; and estimating effectiveness in terms of quality-adjusted life years and disability-adjusted life years. Practical topics will include the design and implementation of economic evaluation models and the role of clinical data inputs to inform economic evaluation analyses.

Teaching: The course will be delivered in no less than 25 hours and consist of lectures, seminar and computer-based workshops.

Formative coursework: Students will be expected to produce 1 piece of coursework in the ST.

Indicative reading:

- Drummond M et al. *Methods for the Economic Evaluation of Health Care Programmes*. Oxford, OUP, 2005
- Drummond M et al. *Economic Evaluation in Health Care: Merging Theory with Practice*, Oxford, OUP, 2002.

Assessment: Research project (100%).

HP4G4E Half Unit

Systematic Review and Meta-analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Rocco Friebe COW 2.09

Availability: This course is compulsory on the Executive MSc in Healthcare Decision-Making, in collaboration with NICE. This course is not available as an outside option.

Course content: Systematic review and meta-analysis methods

are increasingly used to evaluate the relative benefits and harms of healthcare interventions. A broad range of decision making bodies across the health care sector (including health technology assessment bodies, drug and medical device licensing agencies, biopharmaceutical industry, and hospitals) need experts equipped with the methods of reviewing and synthesizing the existing body of evidence.

This course will be focused on the principles of reviewing and synthesizing the existing body of literature. The course will first provide the rationale for adopting a systematic approach for evidence review and synthesis. It will then equip students with the methods to undertake risk of bias assessments of individual randomized controlled trials and also collections of randomized controlled trials. In addition to providing an overview of methods for quantitatively synthesizing multiple randomized controlled trials in meta-analysis, the course will present the opportunities and challenges of using evidence for decision-making in health care.

Learning outcomes:

- Describe the rationale for adopting a systematic approach to literature review
- Define the principal threats to validity both in individual randomized controlled trials and collections of randomized controlled trials
- Critically evaluate the internal validity of randomized controlled trials
- Assess heterogeneity in a collection of randomized controlled trials
- Design and perform a systematic review and meta-analysis evaluating a health care intervention in a group setting
- Describe the opportunities and challenges of using systematic review and meta-analysis findings for decision making

Teaching: The course will be delivered in no less than 24 hours

Formative coursework:

- Course convener will provide feedback on group presentations on the last day of the in-person teaching session
- Course convener will also provide written feedback on project outlines.

Indicative reading: Cochrane Handbook for Systematic Reviews of Interventions (version 5.1.0, updated March 2011).

Diplomacy and Challenges

This information is for the 2024/25 session.

Teacher responsible: Prof Chris Alden

Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: This course looks at six key aspects of diplomacy: the tools of diplomacy and negotiation; international security and policy challenges, such as climate change; emerging security domains such as cyber and outer space security; policy assessment on a major current international problem; simulations on crisis management and diplomatic negotiations; the future of diplomacy and international affairs.

Teaching: 30 hours of lectures, 20 hours of seminars and 20 hours of workshops in the WT.

Formative coursework: One formative policy paper (2,000 words) with a pre-arranged task. Feedback will involve a meeting with each student to discuss their formative policy paper. We will aim to ensure that students are able to: critically evaluate different kinds of evidence; assess the strengths and weaknesses of competing policy options; formulate arguments and policy recommendations in a coherent and balanced fashion.

Assessment: Project (100%, 3000 words) in the WT.

3,000 word assessed policy paper setting out a detailed strategy to implement a policy.

IR443E

Strategy in a Changing World

This information is for the 2024/25 session.

Teacher responsible: Prof Chris Alden

Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: This course examines five different perspectives on strategy: new approaches to strategy in international affairs; the interplay between old and new strategic actors; global strategic and economic trends; political and security developments in the world's key regions; the nature of strategic decisions.

Teaching: 40 hours of lectures and 30 hours of seminars in the AT.

Formative coursework: One 2,000 word formative essay with a pre-arranged title due in the AT. Feedback will involve a meeting with each student to discuss their formative essay. In the process, we will aim to ensure that students are able to: critically evaluate different kinds of evidence; assess the strengths and weaknesses

of competing explanatory paradigms; formulate arguments in a coherent and balanced fashion.

Indicative reading: 1. Baylis, J.; Smith, S.; Owens, P. (2017), *The Globalization of World Politics: An Introduction to International Relations*, 7th Edition (Oxford: Oxford University Press).

IR444E Half Unit Strategy in Action

This information is for the 2024/25 session.

Teacher responsible: Prof Chris Alden

Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: In this course we will be examining through lectures, seminars and workshops major foreign policy decisions, the diplomatic background to each of these and the strategic thinking behind them. We will be asking the students through group exercises to prepare a strategy and policy paper relevant to the day.

Teaching: 8 hours of seminars in the ST.

The course is taught over 48 hours. This includes 3 intense sessions - a weekend of assessing strategic decisions involving drafting and crafting papers, a second weekend of formulating strategic decisions and briefing sessions on methodology. All these will lay the foundations for the dissertation plan.

Formative coursework: Group discussion and formulation of strategy/policy papers.

Indicative reading: Readings vary each year depending on the cases, scenarios and policy issues examined during each policy session. Readings will be provided to registered students in advance.

Assessment: Dissertation (100%, 3000 words) in the WT. The formulation of a dissertation topic which must be in the form of a 3,000 word dissertation plan (100%). This should include the title, an abstract, a problem statement which should identify the features and theoretical concepts associated with the topic, the

aims and objectives (including research questions or hypotheses), a literature review and the methodology. This module is taken in conjunction with IR496 Dissertation: MSc Diplomacy and International Strategy (1.5 units).

IR496E One and Half Unit Dissertation: MSc International Strategy and Diplomacy (1.5 units)

This information is for the 2024/25 session.

Teacher responsible: Prof Chris Alden

Availability: This course is compulsory on the MSc in International Strategy and Diplomacy. This course is not available as an outside option.

Course content: The dissertation will address a topic in the social sciences drawn broadly from the three core courses. The topic should make central use of concepts in the study of International Relations, strategy and diplomacy and should demonstrate a good understanding of these concepts and implications. The dissertation will draw on empirical topic areas but should also demonstrate a high degree of conceptual originality. Guidance on standards of presentation will be given in the handbook and conform to the standard laid down for MSc dissertations in the International Relations Department. The subject and title of the dissertation must be approved by the dissertation supervisor.

Teaching: Arrangements for supervision. Students will receive advice on how to choose a topic and how to write a dissertation from a 1.5 hour workshop and from three half hour individual supervision sessions.

Formative coursework: Students submit a 3,000 dissertation plan on which they receive written feedback (see the details of the IR444 course, taken in conjunction with IR496).

Assessment: Dissertation (100%, 15000 words) in the WT. A 15,000 word dissertation (100%) to be submitted in September. This course is taken in conjunction with IR444 Strategy in Action (H).

Using the dissertation plan (IR444), the dissertation will include an introduction, theoretical framework, a literature review and methodology followed by chapters, conclusion and bibliography.

LL400E Half Unit European Capital Markets Law

This information is for the 2024/25 session.

Teacher responsible: Professor Niamh Moloney

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: The course examines the EU's regulation of the capital markets. It considers the harmonized regulatory regime which applies to key capital market actors across the Member States and which supports the integrated market. The topics covered include: the rationale for integration and the role of law, the evolution of the integration project, and the impact of the financial crisis and subsequent reforms; the deregulation, liberalization, harmonization, and re-regulation mechanisms used to integrate and regulate the EU market and the role of the Court; market access and the passport for investment services; the Markets in Financial Instruments Directive 2014 (MiFID II) and the Markets

in Financial Instruments Regulation 2014 (MiFIR) and regulation; the liberalization of order execution and the regulation of trading venues; the 'UCITS' mutual funds regime; retail investor protection and conduct regulation; the prospectus and disclosure regime; gatekeepers (credit rating agencies and investment analysts); and the institutional structure for law-making and for supervision, including the European System of Financial Supervision and the European Securities and Markets Authority. Course coverage may vary slightly from year to year.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Reading lists will be provided in advance for each seminar. Sample texts include: Moloney, EU Securities and Financial Markets Regulation Regulation (2014), Veil (ed) European Capital Markets Law (2017), and Busch, Avgouleas, and Ferrarini (eds) Capital Markets Union in Europe (2018).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL401E Half Unit

The Law of Armed Conflict

This information is for the 2024/25 session.

Teacher responsible: Prof Stephen Humphreys CKK.5.12

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course covers the international law governing the conduct of hostilities (jus in bello, also known as the law of armed conflict or international humanitarian law)—as distinct from the law on the resort to force (jus ad bellum), which is a separate course. The course will take a critical approach to the international regulation and facilitation of armed conflict. As well as the laws governing the means and methods of war ('Hague' law), the 'protected' groups hors de combat ('Geneva' law), and the distinction between international and non-international armed conflict, the course will cover 'lawfare' more generally: the recourse to law as a means of waging war. It will examine the application of the laws of war, including occupation law, in recent conflicts, including recent wars in Iraq, Afghanistan, Syria, and Ukraine; the 'war on terror'; and the Palestinian Occupied Territories. Students can expect to have a thorough grasp of the principles and regulations governing the conduct of hostilities, the context and efficacy of enforcement mechanisms, and a critical understanding of the normative and political stakes of international law in this area.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: It is worthwhile acquiring the following books: Yoram Dinstein, *The Conduct of Hostilities under the Law of International Armed Conflict* (Cambridge UP, 3rd ed., 2016), Roberts and Guelff, *Documents on the Laws of War* (Oxford UP, 2000); Michael Walzer, *Just and Unjust Wars* (Basic books, 4th ed. 2006). Other useful books include: David Kennedy, *Of Law and War* (Princeton UP, 2006); Geoffrey Best, *War and Law Since 1945* (Oxford UP, 1997). Detailed readings for each seminar will be made

available on Moodle.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL402E Half Unit

Key Issues in Transnational Environmental Law

This information is for the 2024/25 session.

Teacher responsible: Prof Veerle Heyvaert CKK.5.08

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: The course focuses on key developments in environmental law beyond the State, which includes both the European and international level. It examines the key values, legal principles and strategies that guide environmental policy and decision making. It considers the role and contribution of non-state actors, such as private green certification schemes, to environmental law. Then, the course turns the spotlight on the most important environmental challenges of our time and examines the role of transnational law in managing or resolving them. The course is structured as follows: 1. Environmental law in context: economic and alternative approaches to sustainable development. 2. Sources and principles of international environmental law. 3. Transnational liability: responding to global catastrophes. 4. Transnational environmental law: the role of non-state actors 5. Protecting biodiversity: comparing treaty-based and market-based approaches. 6. Protecting biodiversity: the rise of rights of nature 7. Climate change: international law and policy developments. 8. Climate change litigation. 9. De-transnationalisation? Brexit and the impact on UK environmental law and policy 10. Trade and the environment. 11. Revision.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: A detailed reading list will be provided for each seminar. Essential reference works include:

- Heyvaert, *Transnational Environmental Regulation and Governance. Purpose, Strategies, and Principles* (CUP, 2018);
- Sands and Peel, *Principles of International Environmental Law* (CUP, 2018);
- Bodansky, *The Art and Craft of International Environmental Law* (Harvard University Press, 2010);
- Bodansky, Brunnee & Hey, *The Oxford Handbook of International Environmental Law* (OUP, 2007);
- Kingston, Heyvaert & Cavooski, *European Environmental Law* (CUP, 2017).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL403E Half Unit International Human Rights: Concepts, Law and Practice

This information is for the 2024/25 session.

Teacher responsible: Dr Margot Salomon

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course is concerned with the international protection and promotion of human rights and its relation to a range of current global problems. The course draws on the international law and practice of human rights to examine how we might best understand the contribution and limitations of human rights to addressing contemporary ills. Through the consideration of a range of topics, participants will learn about, and critically analyse, human rights concepts, norms, institutions and actors. The course engages with the ideas and objectives that underpin the post-1945 human rights legal order, including through the United Nations and regional systems. We build on these foundations to examine a variety of current human rights issues and to explore how international law in these areas has developed and is deployed. Subjects may include: institutional developments; categories of human rights; human rights and water; the right to development; the rights of indigenous peoples to land; human rights and sexuality; business and human rights; human rights and resistance; human rights and poverty; and the question of fragmentation.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: O de Schutter, *International Human Rights Law: Cases, Materials, Commentary*; C Clark, 'Of What Use is a Deradicalized Human Right to Water?' *Human Rights Law Review* (2017); J Kozma, M Nowak and M Scheinin, *A World Court of Human Rights – Consolidated Draft Statute and Commentary*; UN Special Rapporteur on Extreme Poverty and Human Rights: Mission to the UK, UN Doc A/HRC/41/39/Add.1 (2019); M Mutua, *Human Rights Standards: Hegemony, Law, and Politics* (2016); *Advisory Opinion on Human Rights and the Environment*, *Inter-American Court of Human Rights* (2017); C de Albuquerque, 'Chronicle of an Announced Birth: The Coming into Life of the Optional Protocol to the International Covenant on Economic, Social and Cultural Rights' *Human Rights Quarterly* (2010).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL404E Half Unit European and UK Human Rights Law

This information is for the 2024/25 session.

Teacher responsible: Prof Conor Gearty CKK 6:11

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be

offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course has two parts. In part one the origins, development and current standing of the European Convention on Human Rights and Fundamental Freedoms are considered. The primary focus will be on the case-law of the European Court of Human Rights, though the cases of other jurisdictions will also be referred to where appropriate. The course will analyse the Convention from the perspective of selected rights within it, but will also engage with the subject thematically, subjecting such concepts as the 'margin of appreciation', 'living instrument' and proportionality to close scrutiny. The goal of this part of the course is to give students a good critical understanding of the Convention, the case-law of the Strasbourg court and the Convention's place within the constitutional and political structure of 'Greater Europe'. The second part of the course is made up of a detailed study of the UK Human Rights Act. The origins and the political background to the Act will be explained, and the structure of the measure will be fully elaborated, relying on the text of the Act itself but also on the burgeoning case law that accompanies the measure. This part of the course will identify the principles that underpin the UK Act and explain its proper place in British law. It will also explore the wider constitutional implications of the measure, looking at its effect on the relationship between courts and Parliament. Linkages with the broader European framework discussed in the first part will be made by students through their reading and through class-engagement. The implications for human rights of the UK's departure from the EU will also be considered, as will current proposals to replace the measure with a UK bill of rights.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Jacobs and White, *The European Convention on Human Rights* 7th edn (OUP, 2017) and/or Harris, O'Boyle and Warbrick, *Law of the European Convention on Human Rights* 3rd edn (Oxford, 2014). The text on the UK is Gearty, *On Fantasy Island. Britain, Strasbourg and Human Rights* (Oxford University Press, 2016). Also useful is Mowbray, *Cases and Materials on the European Convention on Human Rights* 3rd edn (Oxford, 2012). Kavanagh, *Constitutional Review under the UK Human Rights Act* (Cambridge, 2009), Hickman *Public Law after the Human Rights Act* (Hart, 2010) and Gearty, *Principles of Human Rights Adjudication* (Oxford University Press, 2004).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL405E Half Unit Dispute Resolution and Advanced Mediation

This information is for the 2024/25 session.

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: The principal focus of the course is upon methods of resolving disputes other than adjudication. The course brings together theory and observation of practice and is

divided into two parts. In the first section students examine what motivates people to enter into disputes and the range of outcomes they seek, the history of the "informal justice" movement and the transformation of attitudes to dispute resolution in the UK and beyond. The emphasis in this part of the course is also on looking at the two primary forms of dispute resolution, negotiation and mediation. In the second part of the course specialist practitioners work with the class in exploring the interface between theory and practice and the different dynamics of disputes and their resolution in specific subject areas such as commercial law, community disputes, international law and family law. The course is designed to complement the option on Commercial Arbitration.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Students will also find it useful to access the following books which provide important context for debate about the civil litigation system and negotiation tactics:

Henry Brown and Arthur Marriot, (2012) *ADR: Principles and Practice*, London: Sweet and Maxwell. This is written by practitioners but also makes reference to a number of seminal academic studies. It provides a good framework within which to position the more in-depth arguments contained in the academic articles set each week.

Genn, Hazel, (2009) *Judging Civil Justice (The Hamlyn Lectures)* Cambridge, Cambridge University Press. This book provides a really good overview of civil justice reforms across developed legal systems and will alert you to many of the academic and policy debates which have surrounded reform.

Roger Fisher and William Ury (2012) *Getting to Yes: Negotiating an Agreement Without Giving In*, Random House. This is a classic text in the field and very simple to read. This book will also help you when we come to study mediation which is often described as a form of facilitated negotiation.

Simon Roberts and Michael Palmer's 2005 (second edition) *Dispute Processes: ADR and the Primary Forms of Dispute Resolution*, Cambridge, Cambridge University Press. This is the most theoretical book in this list but provides extracts from many of the seminal works in the field that we will be studying. It adopts a very inter-disciplinary approach. This is useful as background reading.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL406E Half Unit Regulation of Financial Markets I

This information is for the 2024/25 session.

Teacher responsible: Dr Philipp Paech CKK.7.05

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: This course (Part I and Part II) examines the regulatory structures governing financial markets and investment services. It covers the main principles of international, EU and UK financial regulation, with the aim of developing a critical understanding of the dynamics and conceptual framework of financial regulation. The course does not aim to provide a detailed comparative account of financial regulation across countries,

but international comparisons may be made where these are useful. In this context, students are encouraged to draw on their knowledge of their own national systems of regulation in making comparisons, and to apply the analytical perspectives suggested to those systems. The focus will be on the regulation of national and international aspects of financial services and markets, rather than on private law and transactional aspects. No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. Indeed, the course provides a good background for further study of both financial and economic law and economic analysis of law. The course might be regarded as complimentary to a number of other courses, including Law of Corporate Finance or International Financial Law and Practice I & II.

The first part of this course will address the following topics:

Anatomy of the Financial Market and the Great Financial Crisis

Building Blocks of the Regulatory World

Rationales for its Regulation: Systemic Stability, Market Integrity,

Principle-Agent Competition

Key Elements of Financial Regulation: disclosure, resilience, risk

modelling and regulation inside firm

Global and EU Regulatory Structures

Financial Stability – Policy Issues, Principles and Global Standard Setters

Prudential Regulation of Banks – The Basel Accords

The EU Banking Union

Deposit Guarantees

Bank Resolution and Insolvency

Teaching: 24-26 hours of contact time (for each half unit)

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students, where possible. In addition, the students will be invited to do independent reading. Good general introductions to financial markets and their regulation include: A Turner et al, *The Future of Finance: The LSE Report* (2010); S Valdez and P Molyneux, *Introduction to Global Financial Markets* (7th edn).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL407E Half Unit Regulation of Financial Markets II

This information is for the 2024/25 session.

Teacher responsible: Dr Philipp Paech CKK.7.05

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: This course examines the regulatory structures governing financial markets and financial services. It covers the main principles of international, EU and UK financial regulation with the aim of developing a critical understanding of the conceptual framework for financial regulation. This half unit focuses on financial stability, including macro and micro-prudential regulation, regulation of trading and market infrastructure, and on new and emerging issues in financial regulation.

The course does not aim to provide a detailed comparative account of financial regulation across countries, but international

comparisons may be made where these are useful. In this context, students are encouraged to draw on their knowledge of their own national systems of regulation in making comparisons, and to apply the analytical perspectives suggested to those systems. The focus will be on the regulation of national and international aspects of financial services and markets, rather than on private law and transactional aspects.

No previous knowledge of financial market regulation or background in economics is required for those wishing to follow this course. Indeed, the course provides a good background for further study of both financial and economic law and economic analysis of law. For non-lawyers, a willingness to engage in legal analysis will be necessary, although a legal background is not required. The course might be regarded as complimentary to a number of other courses, including Law of Corporate Finance or International Financial Law and Practice I & II.

Topics include:

1. Unpicking the Great Financial Crisis
2. Mapping regulation for financial stability
3. States, Banks and Global Markets: the macroeconomic Background
4. The next Financial Crisis
5. Ethics in Finance
6. Market Integrity
7. The role of Consumers
8. Consumer Protection
9. Securities markets and Conduct of Business
10. Fast, global, decentralized – the Challenges of the Future

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: A full reading list will be distributed during the course and essential materials will be made available to the students, where possible. In addition, the students will be invited to do independent reading. Good general introductions to financial markets and their regulation include: A Turner et al, *The Future of Finance: The LSE Report* (2010); S Valdez and P. Molyneaux, *Introduction to Global Financial Markets* (7th edn).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL408E Half Unit Comparative Constitutional Law

This information is for the 2024/25 session.

Teacher responsible: Prof Jo Murkens CKK.7.31

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: Comparative Constitutional Law is a rejuvenated discipline that attracts a broad range of interdisciplinary interest in the formation, design, and operation of constitutions. LL408E examines the central issues across a range of jurisdictions and from a variety of perspectives. In Part I, we will discuss the idea of comparative law as a legal discipline with its own distinctive method as well as the transnational transfer of constitutional ideas and ideologies. Part II deals with key constitutional concepts, in particular the historical origins of fundamental law, constituent power, constitutional change, and the rule of law. Part III deals

with questions of constitutional design, with a special focus on constitution-making in deeply divided and authoritarian societies. LL408E offers a rich historical and conceptual account of the origins of Western constitutional ideas. It also examines their contemporary meaning and application in non-Western contexts. In so doing, the course develops its own critique of mainstream liberal thought that idealises constitutions as normative constraints on politics or essentialises the concept of constituent power in constitutional theory. We will ask whether formal constitutions facilitate democratisation and political change or whether they undermine democracy and entrench the ruling elite. The study of law, like the study of all social phenomena, is always comparative and inevitably fragmented. In LL408E, we will not be comparing, doctrinally and systematically, the constitutional codes of different legal orders. Instead, the objective of the course is to study comparative constitutional law comprehensively, critically, and contextually. This approach enables the student to deepen their understanding of law as a method and to connect that understanding independently to other disciplines.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: There is no set book for this course. All materials will be made available in advance on Moodle.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL409E Half Unit Comparative Human and Constitutional Rights

This information is for the 2024/25 session.

Teacher responsible: Prof Kai Moller CKK.7.01

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines a range of controversial issues in human and constitutional rights law from a comparative perspective. These include: Negative and Positive Obligations, and Social Rights; Abortion; 'Deviant' Sex: Sodomy, Sado-Masochistic Sex, and Incest; Same-Sex Marriage; Religion in the Public Sphere; Hate Speech and Denial of the Holocaust; Obscenity. We will approach them by comparing and contrasting judgments from courts all over the world, with an emphasis on cases from the U.S. Supreme Court, the Canadian Supreme Court, the South African Constitutional Court, the European Court of Human Rights, the U.K. Supreme Court, and the German Federal Constitutional Court. The goals of the course are, first, to introduce the students to the jurisprudence of those extremely powerful and influential courts, and, second, to invite them to think about and critically analyse some of the most controversial, difficult, and important rights issues of our time.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: The course is mainly case-based; however, interested students may find the following book helpful: V Jackson and M Tushnet, *Comparative Constitutional Law*, 3rd edition, 2014.

Assessment: Assessment path 1

Essay (100%, 8000 words).
 Assessment path 2
 Take-home assessment (100%).

LL410E Half Unit International Financial Law and Practice I

This information is for the 2024/25 session.

Teacher responsible: Dr Philipp Paech CKK.7.05

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: As the recent debate on shadow banking shows, the traditional financial market sectors of commercial banking, investment banking, derivatives, capital markets and asset management are nowadays converging. However, their academic analysis is still largely sector-based. This course offers a cross-sectoral, functional analysis, permitting students to grasp the big picture of the entire financial market law. To this end, the course largely concentrates on the different activities of risk taking and risk shifting regardless of the type of financial institution involved. The course is also a novelty to the extent that it integrates both spheres of rulemaking for the financial markets, notably financial law and some fundamentals of financial regulation. Experience shows that approaching the framework for financial law without at least considering the interdependencies with risk management and capital requirements leaves us with only a fragmented picture. For non-practitioners, the market context of financial law appears sometimes confusing. Therefore, this course will first approach each subject from in a market perspective before coming to the legal framework. This is essential with a view to understanding the permanent interaction between market behaviour and the legislators' and regulators' responses to it. The legal framework will be analysed taking into account international rules and developments as well as European legislation. Since the City of London is one of the globally most important financial markets, England will be used as anchor-jurisdiction in order to develop patterns of global significance that are addressed by legislators and regulators around the world, in particular also looking at the European Union and at international rulemaking. The course also considers key trends. It is designed to be as topical as possible, and the content may change in the light of developments. While the precise topics covered will vary from year to year they typically will include the following:

- The logic and the players of the financial market. The creation and allocation of risk. The distinction between 'Law' and 'Regulation'.
- The reasoning and sources of financial law and regulation. The role of European financial law and regulation. The role of international law.
- Understanding the financial crisis.
- Banks and their nature. Assets and Liabilities. Deposit-taking and bank loans. Money market instruments. Rank of creditors in bank insolvencies.
- Raising capital. Primary market and secondary market. Issuance of debt securities (bonds). Issuance of Eurobonds. Issuance of equity (shares).
- Security interests and financial collateral.
- Repurchase agreements, repurchase agreements and securities lending. Relevant conflict-of-laws problems.
- Guarantee, indemnity, insurance.
- Derivatives. Types of derivatives. The rise of derivatives. Recharacterisation risk. Standard documentation (ISDA).

- Netting and set-off. Relation to insolvency law. Importance for derivatives, repos, securities lending. Conflict-of-laws analysis. Cross-jurisdictional problems.
- Trusts.
- Fund structures (public and alternative).
- Structured finance, securitisation and asset-backed securities. The rationale behind it. Risks.
- Transfer of financial instruments. Stock exchanges. Trading and settlement of securities. Intermediated securities. Conflict of laws and cross-jurisdictional problems. Derivatives clearing.
- Syndicated loans.
- Regulatory arbitrage in respect of financial transactions.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading:

- P. Wood. Law and Practice of International Finance, Sweet & Maxwell, 2008 (ca. £40, soft bound). This book is the first building block of the Basic Reading. Students might consider buying it.
- J. Benjamin, Financial Law, Oxford University Press 2007. Ca. £200. This volume is available at a heavily discounted price (ca. £100 for hardcover) at the Waterstones bookshop on the LSE campus only.
- For an understanding of the underlying market aspects: S. Valdez, Ph. Molyneux, An Introduction to Global Financial Markets, 7th ed., Palgrave-McMillan 2013, ca. £29.- P. Wood. Law and Practice of International Finance, Sweet & Maxwell, 2008 (ca. £40, soft bound). This book is the first building block of the Basic Reading. Students might consider buying it.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL411E Half Unit International Financial Law and Practice II

This information is for the 2024/25 session.

Teacher responsible: Dr Philipp Paech CKK.7.05

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Pre-requisites: There are no specific prerequisites for taking this course. While this course is complimentary to LL410E prior

completion of the latter is not necessary to take LL411E.

Course content: This course explores contemporary issues of the commercial law of international financial markets. These include

- the future of English law as reference law for international finance after Brexit
 - financial markets and modern trends in conflict-of-laws
 - the legal characteristics of the various types of networks used in financial markets (central, decentral, distributed)
 - the disruption of law caused by 'blockchain' technology and FinTech
 - the legal challenges flowing from the increasing use of 'big data' and artificial intelligence in financial services
 - the future role of commercial law in managing risk
 - the nature of so-called smart contracts and their role in standard documentation, risk management and due diligence
 - legal issues associated with cryptocurrencies and crypto-money
- As the course is conceived to be very topical, some of the course content may change.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading:

- The reading will consist of 2-3 scholarly articles per subject, such as P Paech, 'Governance of Blockchain Financial Networks', *Modern Law Review* (forthcoming), https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2875487.
- Basic knowledge on international financial law (recommended in particular to students who did not take LL410E): P. Wood. *Law and Practice of International Finance*, Sweet & Maxwell, 2008 (ca. £40, soft bound).
- Understanding the financial market: S. Valdez, Ph. Molyneux, *An Introduction to Global Financial Markets*, 8th ed., Palgrave-McMillan 2015 (soft bound, ca. £29 - this is not a legal work but very useful for those new to the financial market).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL412E Half Unit International Economic Law I

This information is for the 2024/25 session.

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: The aim of the course is to introduce students to the field of international economic law: its principles, rules, practices, and institutions, and the debates which attend each. The course focuses on the public international law rules and institutions which govern international trade. Students will be given a grounding in the jurisprudence of the WTO, but will also be introduced to interdisciplinary material on the broader political, economic, institutional and normative contexts in which international economic law operates. Key themes will include the question of 'development' and developing countries, the role of expertise in global economic governance, and institutional aspects of judicial international dispute settlement. Special attention will be paid to the current crisis around the contemporary international trading system, and US-China relations. Students will be expected to engage with the principles and practice of international

economic law both at the technical level, and at the level of critical reflection.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: M.J. Trebilcock, R. Howse and A. Eliason, *The Regulation of International Trade*, 4th ed., Routledge, 2012; P. Van den Bossche and W. Zdouc, *The Law and Policy of the World Trade Organization: Text, Cases and Materials*, 4th ed., Cambridge UP, 2017; S. Lester, B. Mercurio and A. Davies, *World Trade Law: Texts, Materials and Commentary*, 3rd ed., Hart Publishing 2018.

Assessment path 2

Take-home assessment (100%).

LL413E Half Unit International Economic Law II

This information is for the 2024/25 session.

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: This course is a continuation of LL412E.

In International Economic Law II, topics to be covered may include: Trade Remedies (Antidumping, Countervailing duties and Safeguards); Trade and Global Value Chains; State-owned Enterprises; Advanced Issues in WTO Dispute Settlement; Digital Trade; Trade and Taxation; the Level Playing Field and others. We will set aside time to consider contemporary issues, for example around international trade in the post-Trump era, digital trade, public international regulation of global finance, regional economic integration, development and developing countries in the trading system, and environmental aspects of international trade.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: M.J. Trebilcock, R. Howse and A. Eliason, *The Regulation of International Trade*, 4th ed., Routledge, 2012; P. Van den Bossche and W. LL415E Half Unit Fundamentals of International Commercial Arbitration

This information is for the 2024/25 session.

Teacher responsible: Dr Paul Macmahon

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: Arbitration — binding adjudication outside the courts deriving its authority from party consent — is a standard form of dispute resolution for international commercial disputes. Supporters of arbitration cite its neutrality, its confidentiality, its flexibility, the greater expertise of arbitrators, and the global enforceability of arbitral awards. To detractors, however, international arbitration is often expensive and slow; other critics contend, more fundamentally, that arbitration infringes the spheres appropriately occupied by national courts and national law. Regardless, the complex relationship between arbitrators and courts, especially when combined with transnational elements, raises a host of fascinating theoretical and practical problems. London is one of the world's main centres for international commercial arbitration and, accordingly, this course focuses on English arbitration law. English law, however, is consistently placed in comparative perspective, especially with UNCITRAL's Model Law and with the laws of some of London's most significant competitors: France, Switzerland, Hong Kong, Singapore, and the United States. Coverage includes:

- Forms of international commercial arbitration
 - Validity and interpretation of arbitration agreements
 - Challenges to arbitral jurisdiction
 - Appointment of arbitrators
 - Arbitral procedure
 - The role of courts in assisting arbitral proceedings
 - Law applicable to the merits of the dispute
 - Challenges to arbitral awards
 - Recognition and enforcement of arbitral awards
 - Public policy limitations on international commercial arbitration
- This course concentrates on arbitration resulting from agreements between private parties and may particularly appeal to students with interests in contracts and private international law.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Nigel Blackaby & Constantine Partasides, Redfern and Hunter on International Commercial Arbitration (6th edn, OUP 2015); Margaret Moses, *The Principles and Practice of International Commercial Arbitration* (3rd edn, CUP 2017); Gary Born, *International Arbitration: Law and Practice* (3rd edn, Kluwer 2015); Emmanuel Gaillard & John Savage, *Fouchard Gaillard Goldman on International Commercial Arbitration* (1999); George Bermann, 'The "Gateway" Problem in International Commercial Arbitration' (2012) 37 *Yale Journal of International Law* 1; Jan Kleinheisterkamp, 'Overriding Mandatory Laws in International Arbitration' (2018) 67 *ICLQ* 903-930

LL416E Half Unit

Advanced Issues of International Commercial Arbitration

This information is for the 2024/25 session.

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period.

The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Pre-requisites: Fundamentals of International Commercial Arbitration (LL415E) or equivalent course in previous studies or relevant practical experience with international arbitration

Course content: This course aims at giving students who already are acquainted with the fundamentals of arbitration the possibility to go into depth into selected problems of international commercial arbitration. The course is designed to allow intense discussions of these problems in order to raise the sensitivity for the issues at stake and to lead to a research oriented approach. Despite its academic outset, the course is highly relevant for those wanting to specialise in arbitration practice, as the theoretical problems have a most significant impact on practical solutions. The course will treat a selection of topical contemporary issues of international commercial arbitration, such as the role of internationally mandatory rules of law, arbitration & insolvency, the scope of the competence-competence principle; arbitration and fraud and corruption, or the enforcement of awards set aside abroad. The course seeks to be as topical as possible, so that content may change in the light of developments.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: G. Born, *International Commercial Arbitration* (2nd edn, Kluwer 2015); N. Blackaby / C. Partasides, Redfern & Hunter on *International Commercial Arbitration* (6th edn, OUP 2015); J.-F. Poudret / S. Besson, *Comparative Law of International Commercial Arbitration* (Sweet & Maxwell 2007); E. Gaillard / J. Savage, *Fouchard Gaillard Goldman on International Commercial Arbitration* (Kluwer 1999). Cases and doctrinal articles for each topic.

Assessment: Assessment path 1

Assessment path 2

Take-home assessment (100%).

LL417E Half Unit

International Commercial Contracts: General Principles

This information is for the 2024/25 session.

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Pre-requisites: Firm knowledge of contract law and/or international sales law from previous studies.

Course content: The course treats what can be called the general part of transnational contract law, i.e. the general principles of law which are of relevance in any kind of international contract, be it sale, construction, shipping, financing, or joint venture. These general principles relate to contractual formation and negotiations, interpretation, transversal general principles, changed circumstances and hardship, agency, third parties, assignment, self-help and set-off, direct performance and damages and

penalties. At present, such contracts are governed either by uniform rules of international conventions or by the national laws applicable by virtue of conflict of law rules. The course puts the existing national and international solutions in a comparative perspective so as to work with the sources of such generally accepted principles. Where there are divergences between existing solutions, the course focuses on the elaboration of new efficient solutions that are internationally acceptable and have the potential of becoming general principles in the future. For these purposes, special attention is given to the UNIDROIT Principles on International Commercial Contracts and the European Principles of Contract Law. Other national laws, however, are drawn upon from time to time. Students are also encouraged, in both examination and classes, to reflect upon the similarities and differences between their own national laws and the UNIDROIT Principles.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: S. Vogenauer & J. Kleinheisterkamp, Commentary on the UNIDROIT Principles of International Commercial Contracts (1st edn, OUP 2009); H. Kötz, European Contract Law (OUP 1997); K. Zweigert & H. Kötz, An Introduction to Comparative Law (3rd edn, OUP 1998); H. Beale et al., *Ius Commune Casebook on the Common Law of Europe: Cases Materials and Text on Contract Law* (2nd edn, OUP 2010); J. Gordley & A. von Mehren, *An Introduction to the Comparative Study of Private Law: Readings, Cases, Materials* (CUP 2006).

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL418E Half Unit Comparative Corporate Governance

This information is for the 2024/25 session.

Teacher responsible: Prof Robert Kershaw CKK.7.16 and Mr Edmund-Philipp Schuster CKK.6.30

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: This course will focus on topical issues in corporate governance, including: corporate governance codes as a regulatory technique; corporate governance reform, firm performance and financial development; the role of the board of directors in large public companies and groups of companies; the division of powers between the managers and shareholders; directors' duties and enforcement of duties; executive remuneration; stakeholder representation, in particular employee representation, in corporate decision-making; shareholder activism and corporate short-termism; the market for corporate control as a corporate governance device.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Reading will be prescribed for each seminar. Preliminary reading can be found in P. Davies, *Introduction to Company Law* (OUP, 2nd edition 2010), chapters 5-9; R. Kraakman et al, *The Anatomy of Corporate Law* (3rd edition 2017); Gordon and W.G. Ringe (eds.), *The Oxford Handbook of Corporate Law and*

Governance (2018).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL419E Half Unit Law of Corporate Finance

This information is for the 2024/25 session.

Teacher responsible: Mr Edmund-Philipp Schuster CKK.6.30

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course examines the private law rules governing how companies raise finance. The issues covered include e.g. capital structures, identifying and protecting shareholder rights, issuing shares, initial legal capital and alternatives, dividends, reduction of capital and share buy-backs, reform and moving to a solvency test and financial assistance. The course will focus on English Law but reference will be made to the relevant EU rules.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: David Kershaw, *Company Law in Context* (2012) chapters 1, 17 and 19.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL420E Half Unit International Law and Climate Change

This information is for the 2024/25 session.

Teacher responsible: Prof Stephen Humphreys CKK.6.15

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course covers the international law dealing with climate change with a view to assessing how risks and uncertainties caused by climate change are governed and allocated in different legal regimes. The course adopts the stance that the political and legal questions raised by climate change cannot be addressed by reference to climate change law (or indeed international environmental law) alone. Climate change gives rise to a series of profound problems touching upon a range of bodies of law (international economic law, human rights law, state responsibility, international migration law) in a complex political and ethical environment. In approaching climate change as a concrete concern relevant to these various bodies of law

and practice, the course will address the normative and/or ethical bases for choosing between actions designed to prevent and/or manage climate change and its consequences, attentive to developmental imperatives and the theoretical concerns raised by the 'fragmented' nature of international law

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Paul Edwards, *A Vast Machine*, MIT Press (2013); Tim Mitchell, *Carbon Democracy*, Verso (2011); Rosemary Rayfuse and Shirley Scott (eds.), *Climate Change and International Law*, Edward Elgar (2011) Stephen Gardiner, Simon Caney, Dale Jamieson and Henry Shue (Eds.), *Climate Ethics: Essential Readings*, Oxford University Press (2010); Patricia Birnie, Alan Boyle, Catherine Redgwell, *International Law and the Environment*, Oxford University Press (2009); Nicholas Stern, *The Economics of Climate Change: The Stern Review*, Cambridge: Cambridge University Press (2007); IPCC, *Sixth Assessment Report*, Cambridge University Press (2021-22); Stephen Humphreys (ed.), *Climate Change and Human Rights*, Cambridge University Press (2009); Larry Lohmann, *Carbon Trading*, Dag Hammarskjöld Foundation (2006); Lavanya Rajamani, *Differential Treatment in International Environmental Law*, Oxford University Press (2006).

LL423E Half Unit

Media Law: Regulating Publication

This information is for the 2024/25 session.

Teacher responsible: Dr Andrew Scott CKK.6.25

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: The course examines the legal and administrative regulation of mainstream media publication (principally the press, the broadcast media, and institutionalised Internet publication) and content issues on social media. The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media and communication in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media publication practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines potential restrictions on publication that are aimed at promoting or preserving specific private and/or public interests. The key private interests considered are those in reputation (defamation), privacy, and confidentiality. The key public interests considered are the integrity of the judicial process (contempt and reporting restrictions), the impartiality of political representations, the avoidance of offence (obscenity and religion), national security, and the protection of children.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Warby, Moreham and Christie (eds) *Tugendhat and Christie: The Law of Privacy and the Media*, (3rd edn, OUP, 2016), Parkes and Busutill (eds), *Gatley on Libel and Slander* (Sweet & Maxwell, 13th ed, 2022); Fenwick and Phillipson, *Media*

Freedom Under the Human Rights Act (OUP, 2006); Robertson and Nicol, *Media Law* (Sweet & Maxwell, 5th ed 2007), Doley and Mullis (eds), *Carter Ruck on Libel and Privacy* (6th edn, Lexis Nexis, 2010), Barendt, *Freedom of Speech* (OUP, 2nd ed 2005), Nicol, Millar and Sharland, *Media Law and Human Rights* (OUP, 2009); Cram, *A Virtue Less Cloistered: Courts, Speech and Constitutions* (Hart Publishing, 2002).

LL424E Half Unit

Media Law: Regulating Newsgathering

This information is for the 2024/25 session.

Teacher responsible: Dr Andrew Scott CKK.6.25

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines the legal and administrative regulation of newsgathering and content production practices undertaken by journalists and others working in the media sector. The course is introduced with consideration of a number of themes that underpin the rest of the syllabus: the role(s) of the media in society (including conceptions of the 'public interest'); the main social, technological and regulatory influences that shape media newsgathering practise, and rights jurisprudence (in particular, the freedom of expression and freedom of the press in national and international law). The course then examines a number of newsgathering practices that are either facilitated or proscribed by law and/or other forms of regulation. These include protection of sources (in general; vis-a-vis police and security interests; technological circumvention of source protections; payment of sources); access to information held by the state (common law principle; official secrets; news management; freedom of information); access to the justice system (secret justice / physical access to courts; access to court documents; technology and the courts - text-based reporting and broadcasting; access to prisoners); media-police interaction; harassment and media intrusion, and surreptitious newsgathering practices (hacking, tapping and subterfuge).

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Warby, Moreham and Christie (eds) *Tugendhat and Christie: The Law of Privacy and the Media*, (3rd edn, OUP, 2016), Millar and Scott, *Newsgathering: Law, Regulation and the Public Interest* (OUP, 2016); Robertson and Nicol, *Media Law* (Sweet & Maxwell, 5th ed 2007), Nicol, Millar and Sharland, *Media Law and Human Rights* (OUP, 2009), Davies, *Flat Earth News* (Chatto & Windus, 2008).art Publishing, 2002).

LL425E Half Unit Competition Law

This information is for the 2024/25 session.

Teacher responsible: Prof Pablo Ibanez Colomo

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: The course is a comprehensive study of the main features of competition law. While the focus is on EU competition law, reference will be made to the laws of other jurisdictions (e.g. the United States and the UK) when these offer relevant points for comparison. The first part of the course examines the history and aims of competition law. It considers the role of economic analysis and its limitations in the light of non-economic considerations. The second part is a review of the major substantive fields: restrictive practices; the regulation of monopolies and dominant positions; distribution and cooperation agreements and merger control. The third part addresses the public and private enforcement of competition law.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Whish and Bailey Competition Law (7th edn, 2011); Jones & Sufrin, EC Competition Law: Cases and Materials (7th ed, 2014); Geradin, Layne-Farrar, and Petit, EU Competition Law and Economics (2011); Faull & Nikpay, The EC Law of Competition (3rd edn, 2004).

LL426E Half Unit Rights Adjudication and Global Constitutionalism

This information is for the 2024/25 session.

Teacher responsible: Prof Kai Moller CKK.7.01

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Some knowledge of human or constitutional rights law of any jurisdiction may be helpful, but is not essential. A knowledge of philosophy is not required.

Course content: Human and constitutional rights are increasingly and properly discussed in a global, as opposed to domestic or regional, context. This module provides an introduction to theories of human and constitutional rights by focusing on the emerging global discussion about their structure, substance, and justification. Topics to be discussed will include: Robert Alexy's Theory of Rights as Principles; Ronald Dworkin's Theory of Rights as Trumps; The Debate about Proportionality; Absolute Rights; The

Debate about Judicial Review; The Culture of Justification and the Right to Justification.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: The course will rely on both cases from various jurisdictions and articles and book chapters from authors including Ronald Dworkin, Robert Alexy, Mattias Kumm, Jeremy Waldron and Frances Kamm.

Assessment: Assessment path 1

Essay (100%, 8000 words).

LL427E Half Unit Constitutional Law and Theory

This information is for the 2024/25 session.

Teacher responsible: Prof Thomas Poole CKK 7.20

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course examines the role of constitutions and the nature of constitutional discourse. It considers the ways in which theorists have advanced understanding of constitutions and devised solutions to a range of constitutional questions. The course deals with the following topics: the scope of constitutional theory; the constitution of government; constitutional politics; representation; sovereignty; constituent power; constitutional rights; the rule of law; liberalism and republicanism; constitutional adjudication; cultural pluralism; theories of federalism; the cosmopolitan polity.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Much of the reading for the course consists of classic texts in political thought. Many are available online and the course is delivered through Moodle. Indicative reading includes: Hobbes, Leviathan; Rousseau, The Social Contract; Montesquieu, The Spirit of the Laws; Burke, Reflections on the Revolution in France; Tocqueville, Democracy in America; Schmitt, Constitutional Theory; Oakeshott, On Human Conduct; Hayek, The Constitution of Liberty.

LL430E Half Unit International Investment Law and Arbitration

This information is for the 2024/25 session.

Teacher responsible: Mr Oliver Hailes CKK6.19

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year,

although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Pre-requisites: In advance of this course, students with no background in public international law may find it helpful to consult Roberts & Sivakumaran, 'The Theory and Reality of the Sources of International Law' in Evans (ed), *International Law* (2018) ch 4. Equally, students with no background in arbitration may consult Born, 'Introduction to International Arbitration' in *International Arbitration: Law and Practice* (2021) ch 1.

Course content: Investment treaties are instruments of economic governance at the heart of international arbitration and current policy debates. After the Second World War, many states agreed to minimum standards of conduct towards foreign investors to promote capital inflows in the face of political risks. Today, the standards contained in nearly 3,000 bilateral treaties (or chapters in trade agreements) serve to delimit the lawful exercise of governmental authority from a state's international responsibility to make reparation for injury to investors, usually in the form of compensation. These treaties typically include each state's consent to arbitration on the notice of any protected investor, known as investment treaty arbitration or investor-state dispute settlement (ISDS). With around 1,500 cases, investment treaty arbitration has become an important vehicle for the development of international law. At the same time, diverse voices have protested the alleged chilling effect of large compensation awards on public interest regulation, not least amid the renewable energy transition, whilst there are live debates among governments as to the future law and procedure of foreign investment disputes. The aim of the course is to introduce students to international investment law, focusing on the rules of public international law that regulate foreign investments and are applied by arbitral tribunals in investment treaty disputes. The course has five main elements: (1) the historical, theoretical and policy background behind investment treaties and dispute settlement by arbitration; (2) the rules governing jurisdiction and admissibility of investor-state arbitration cases; (3) the substantive principles and standards – such as national treatment, most-favoured-nation treatment, expropriation, protection of contracts by umbrella clauses, and the minimum standard in international law – that may apply to investor-state relationships; (4) annulment, recognition and enforcement of arbitral awards and the interaction between international tribunals and national courts; and (5) the discussion of the future of international investment law.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Douglas, Pauwelyn & Viñuales (eds), *The Foundations of International Investment Law: Bringing Theory into Practice* (2014); Kulick & Waibel (eds), *General International Law in International Investment Law: A Commentary* (2024); Lim, Ho & Paparinskis, *International Investment Law and Arbitration* (2021); McLachlan, Shore & Weiniger, *International Investment Arbitration: Substantive Principles* (2017).

Assessment: Assessment path 1

LL432E Half Unit

Mergers, Acquisitions and Restructurings in Europe

This information is for the 2024/25 session.

Teacher responsible: Mr Edmund-Philipp Schuster CKK.6.30

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option.

Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Pre-requisites: There are no formal pre-requisites for this module.

Course content: In this module, we will explore the regulation of mergers, acquisitions and restructurings in Europe. We will focus on legal techniques for the combination and restructuring of business operations in Europe, with a particular focus on the legal issues arising in cross-border transactions in the EU.

There are a number of reasons for corporations wanting to restructure their operations or to make acquisitions. For instance, firms may want to acquire a strategically valuable firm or asset in order to improve the efficiency (and thus increase the value) of their business operations; they may want to implement a better governance structure, enabling them to manage their undertaking more effectively; or they may want to subject themselves to more favourable legal or tax rules – including choosing among different national corporate laws.

EU law offers a range of legal vehicles for achieving such aims, and it is these vehicles we will explore throughout the term. In particular, we will look at re-incorporations of EU companies based on the relevant Treaty provisions; takeovers of (listed) EU companies; domestic ("statutory") mergers; de-mergers and spin-offs; cross-border mergers in the EU; and the European Company. Content overview:

- The market for corporate control, corporate ownership structures

LL433E Half Unit State and Market in the EU

This information is for the 2024/25 session.

Teacher responsible: Prof Pablo Ibanez Colomo CKK.5.16

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: Member States of the EU are not free to award subsidies to their national companies or to support them in a comparable way (by, inter alia, securing favourable supply conditions to the companies, granting loans at favourable rates or providing unlimited guarantees). In the wake of the recent financial crisis, for instance, bailout measures adopted across the EU had to be cleared by the European Commission in accordance with Articles 107 and 108 TFEU. The first part of the course explores the economic rationale underpinning the control of State aid in the European Union (the reasons why similar regimes are not implemented at the national level in federal countries facing similar issues, such as the United States, will also be explored). The second part examines (i) the notion of State aid within the

meaning of Article 107(1) TFEU and (ii) the conditions under which measures falling under the scope of that provision may be deemed compatible with the internal market. The third part provides an overview of the application of the law in some sectors (including the financial and the communications sectors) or for some purposes (e.g. research and development, regional aid). The fourth part is devoted to the procedural aspects of the discipline.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Quigley, European State Aid Law and Policy (3rd Edition, 2015); Bacon (ed), European Community Law of State Aid (3rd Edition, 2017); Jones and Sufrin, EU Competition Law (online chapter) (6th Edition, 2017)

LL435E Half Unit Innovation, Technology and Patent Law

This information is for the 2024/25 session.

Teacher responsible: Dr Siva Thambisetty CKK 7.29

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: Patent rights are the link between your index finger that slides or twirls to open your smartphone, a synthetically generated living cell, the diagnostic test for breast cancer, the velcro on your gym bag and the connectivity we often take for granted on social media. From obscure, arcane beginnings, patent law and policy is now central to domestic and international issues as wide ranging as innovation priorities, access to medicines, international trade and development, food security, artificial intelligence and the ethical and sustainable use of genetic resources.

This course will critically examine core concepts of the protection of inventions in UK/European, US and International patent law often taking a comparative approach. The course adopts a broad approach to questions of patentability, and through readings and discussion you will investigate the economic, social and political dimensions of the use, control and exploitation of technology and innovation. We examine specific industrial or technology sectors such as software, artificial intelligence, biotechnology and pharmaceuticals in order to understand how the empirical and normative drive to protect technology varies in different sectors. Current issues are often discussed. For instance the global effort to bring vaccines and treatments for Covid-19 has much to teach us about the intersection between market incentives like patents and structural inequality.

You do not need prior exposure to intellectual property law or a science background to take the course. You will be supported throughout the course to understand technologies via their legally significant attributes.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option to produce a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Bently, Sherman, Gangjee and Johnson Intellectual Property Law, OUP 2018, Pila The Requirement for an Invention in Patent Law Oxford University Press 2010, Spence Intellectual Property, Clarendon Law Series 2007, Landes and Posner The Economic Structure of Intellectual Property Law Harvard University Press 2003, Robert Merges Justifying Intellectual Property Law HUP 2011, Jaffe & Lerner, Innovation and its Discontents Princeton University Press 2004, S Parthasarathy Patent Politics: Life Forms, Markets, and the Public Interest in the United States and Europe (University of Chicago Press 2017), Katharina Pistor The Code of Capital: How the Law Creates Wealth and Inequality (Princeton University Press 2019)

For more information please refer to the Department of Law website.

Course content: EU law is a fast-moving, dynamic area of law.

The course will address core aspects of EU law and develop a number of key themes in the public law and policy of the EU and its Member States. It will provide a sophisticated understanding of the legal, political and constitutional issues surrounding the central debates in the EU, from its origins to the recent crises, including the Euro-crisis and Brexit. Topics will include: - Law and Politics of European Integration - Fundamental Freedoms - Collective Autonomy and Social Justice - Authority of EU Law - Sovereignty, Identity and Pluralism - Political Economy - Future of the EU. The course will use general theoretical accounts in law and related disciplines in order to situate EU law in its economic, political and social context. It uses the LSE's unique interdisciplinary expertise in European law, constitutional theory, public law, and legal theory for a rich and varied study of the challenges facing the EU and its future development.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Chalmers et al., European Union Law (CUP, 2014); Craig and DeBurca, EU Law: Text, Cases and Materials (OUP, 2015); Craig and DeBurca (eds.) The Evolution of EU Law (OUP, 2011); Maduro and Azoulai (eds.) The Past and Future of EU Law (Hart, 2010); Dickson and Eleftheriadis (eds.) Philosophical Foundations of EU Law (OUP, 2012); Tuori and Tuori, The Eurozone crisis: A Constitutional Analysis (CUP, 2013)

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL437E Half Unit International Criminal Law

This information is for the 2024/25 session.

Teacher responsible: Prof Stephen Humphreys CKK.6.15

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Some background in public international law is helpful for this course. If an introduction or refresher is needed, a standard textbook such as Malcolm Shaw's International Law is recommended.

Course content: The course looks at the history of and background to international criminal law and at its substantive content—its origins in the early Twentieth Century, its purported objectives, and the core crimes set out in the Rome Statute over which the International Criminal Court has jurisdiction (war crimes, crimes against humanity, genocide). The course will then examine in more detail a number of areas of contemporary interest (at least two from among the following: aggression, universal jurisdiction, immunity, torture, terrorism, international tribunals). The course is

LL436E Half Unit Rethinking EU Law

This information is for the 2024/25 session.

Teacher responsible: Prof Michael Wilkinson CKK.6.28

Availability: This course is available on the Executive Master of

mainly directed at the conceptual problems associated with the prosecution of war criminals and, more broadly, legalised retribution.

Teaching: 24-26 hours of contact time.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Cryer, Friman, Robinson & Wilmschurst, *An Introduction to International Criminal Law and Procedure* (Cambridge), 4th edition (2019)

Indicative reading

Gary Bass, *Stay the Hand of Vengeance. The Politics of War Crimes Tribunals* (Princeton, 2000); Judith Shklar, *Legalism* (Harvard, 1964); Mark Osiel, *Mass Atrocity, Collective Memory & the Law* (Transaction Publishers, 1997); T McCormack & G Simpson, *The Law of War Crimes* (Kluwer 1997); W Schabas, *The International Criminal Court* (Cambridge, 2001); H Arendt, *Eichmann in Jerusalem* (Penguin, 1997); Simpson, *Law, War and Crime, Polity* (2007).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL438E Half Unit Commercial Remedies

This information is for the 2024/25 session.

Teacher responsible: Prof Charles Webb CKK 6.26 and Dr Andrew Summers CKK 6.06

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option.

Pre-requisites: Undergraduate contract and tort law

Course content: The objective of the course is to provide students with a detailed understanding of remedies in a commercial context. The reading addresses both case law and academic commentary. Here is an indicative list of the issues that will be considered on the course:

1. The aims of commercial remedies: What interests and other policies may be served by the law when remedying commercial disputes?
2. The function of contract damages: How do the courts assess damages for breaches of contract? Should the courts do more to protect the claimant's interest in performance? What limits are placed on the recovery or measure of damages?
3. Punishment: Is punishment of a defaulting defendant ever a legitimate aim in commercial remedies? Should punitive damages be given a greater role in English commercial law?
4. Agreed remedies: To what extent are commercial parties free to fix the remedies available to them in the event of breach? Does freedom of contract extend to the parties' secondary obligations?
5. Unjust enrichment: What is the law of unjust enrichment? What is its relationship to the law of contract? What can commercial parties recover under the law of unjust enrichment?
6. Comparative law: How do other jurisdictions deal with these questions? What might the common law learn from civil law systems?

Teaching: 24 hours

Formative coursework: All students are expected to produce one 1,500 word formative essay during the course. Formative assessment opportunities will be provided (essay or problem questions)

Indicative reading: Rowan, *Remedies for Breach of Contract: A Comparative Analysis of the Protection of Performance* (OUP 2012)

Burrows, *Remedies for Torts and Breach of Contract* (4th edn OUP 2019)

Virgo and Worthington (eds), *Commercial Remedies: Resolving Controversies* (CUP 2017)

Webb, *Reason and Restitution* (OUP 2016)

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL439E Half Unit UK Corporate Law

This information is for the 2024/25 session.

Teacher responsible: Prof Robert Kershaw CKK.7.16

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option.

Course content: 1. The Evolution of the UK company. This session will address the evolution of the corporate form from the mid-19th century, and outline the partnership based conception of UK company. It will contrast the partnership conception with the corporate / entity conception. 2. Legal personality, formation and structure – considering the implications and function of separate legal personality and the scope to disregard the corporate veil; the process of formation; and the constitutional make-up of the company. 3. Corporate Actions – considering how the company acts in contract, tort and crime. 4. The distribution of power in a UK company – considering the location and contractual distribution of power in a UK corporation; the problem of separation of ownership and control / the agency problem; mandatory versus default rules; core mandatory rights: removal of directors and calling shareholder meetings. 5. Director's duties I: the nature of duties; who owes them; to whom; the corporate objective; the duty to promote the success of the company. 6. Directors Duties II: the duty of care (business judgments, business process, monitoring, systems and controls, risk management) 7. Directors Duties III: the duty of loyalty (self-dealing transactions, corporate opportunities, competing with the company, bribes and commissions). 8. Company law and creditor protections – shareholder incentives to exploit creditors; the scope for unlimited liability, duties to creditors; wrongful trading. 9. Derivative Actions: the rule in *Foss v Harbottle*; the new derivative action mechanism; indemnity orders and contingency fees; reflective loss. 10. Minority shareholder protections – common law restraints on the exercise of majority shareholder power and influence; statutory constraints on the exercise of such power and influence (122(g) Insolvency Act 1986 and section 994 Companies Act 2006).

Teaching: 20 hours of seminars in the AT.

24 hours (Executive LLM)

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Core Texts: David Kershaw, *Company Law in Context* (2nd ed, OUP 2012)

Paul Davies, Gower and Davies' *The Principles of Modern Company Law* (10th edn, Sweet & Maxwell, 2016).

For each session in addition to the main texts other readings will include cases, statutes and journal articles. As an example:

Session 1:

Paul Davies, Gower and Davies' *The Principles of Modern Company Law* (6th eds, Sweet & Maxwell, 1996), Chapter 1.

Extracts from N. Lindley, *Treatise on the Law of Companies* (as a Branch of the Law of Partnerships) (1889).

F. Palmer, *Company Law: A Practical Handbook for Lawyers and Business Men* (5th eds, 1905).

Extracts from D. Kershaw, *The Path of Corporate Fiduciary Law* (2012) 8 New York University Journal of Law and Business 395.

M. Lobban, *Corporate Identity and Limited Liability in France and England 1825-67*, 25 Anglo American Law Review. 397, 403-04 (1996).

Ernst v Nichols (1857) 10 Eng. Rep.

Ashbury Railways v Riche [1874-80] All ER Rep Ext.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL440E Half Unit Digital Rights, Privacy and Security

This information is for the 2024/25 session.

Teacher responsible: Dr Orla Lynskey (CKK 6.07)

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: Basic knowledge of EU law is desirable but not essential for this course.

Course content: Personal data is an important factor of production in data-driven economies and a critical input for the development of AI systems. The processing of personal data can generate significant economic and social benefits. However, personal data processing can also have a detrimental impact on established rights and values, such as autonomy, privacy and data protection. As a result, legal frameworks to regulate personal data processing have been enacted across the world, with the EU legal model used as a blueprint. Yet, despite the development of such legal frameworks across the globe, critical questions remain unanswered. For instance, the objectives of data protection frameworks differ with some prioritising a fundamental-rights approach to data protection regulation while other frameworks are based on an economic free-trade rationale. Disagreement also persists regarding how the balance should be struck between effective data protection and other rights (such as freedom of expression and freedom of information) and interests (such as innovation and national security). This course will critically evaluate the legal framework applicable to personal data processing. It will be do this predominantly with reference to the EU framework. In order to bring key issues to life, a number of case studies will be considered, including the application of data protection and privacy rules to online behavioural advertising and to State surveillance.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Bygrave, Data Privacy Law: An International Perspective (OUP, 2015)
Cohen, Between Truth and Power (OUP, 2019)
Lynskey, The Foundations of EU Data Protection Law (OUP, 2015)
Zuboff, The Age of Surveillance Capitalism (Profile, 2019)

Assessment: Assessment path 1
Essay (100%, 8000 words).
Assessment path 2
Take-home assessment (100%).

LL441E Half Unit Employment Law

This information is for the 2024/25 session.

Teacher responsible: Dr Astrid Sanders CKK.7.19

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: Regulation of the content and the form of the

employment relation. The contract of employment, including express and implied terms and the scope of employment law. Regulation of minimum wage and working time. Protection against discrimination in the workplace. Discipline and protection from dismissal and termination of employment. The approach involves theoretical perspectives, economic analysis, comparative law of employment, and examination of relevant European law.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: Detailed syllabus of readings will be available and the materials can all be accessed through Moodle. Hugh Collins, Employment Law, 2nd edn (Oxford University Press, 2010), Chapters 1-9 or Hugh Collins, KD Ewing and Aileen McColgan, Labour Law (2nd edition, CUP 2019).

Assessment: Assessment path 1
Essay (100%, 8000 words).

Assessment path 2
Take-home assessment (100%).

LL442E Half Unit Corporate Restructuring

This information is for the 2024/25 session.

Teacher responsible: Prof Sarah Paterson CKK.6.06

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: This course is concerned with the principles and policies underlying the rescue of financially distressed companies and businesses. The course considers formal legal procedures available for dealing with companies and businesses in financial distress. Topics include: Chapter 11 as a Rescue Procedure. Corporate Rescue Procedures in the UK. The European Restructuring Directive. The Theory and Philosophy of Rescue.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A full Reading List will be distributed during the course. The recommended text is V. Finch and D. Milman, Corporate Insolvency Law: Perspectives and Principles (Cambridge University Press, 2017) (3rd edition). Wider background reading will include some comparative law reform and other material including: R. Olivares-Caminal et al, Debt Restructuring (Oxford University Press, 2013) and the ABI Commission to Study Reform of Chapter 11 Final Report

Assessment: Assessment path 1
Essay (100%, 8000 words).

Assessment path 2
Take-home assessment (100%).

LL443E Half Unit Corporate Bankruptcy

This information is for the 2024/25 session.

Teacher responsible: Prof Sarah Paterson CKK.6.06

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be

offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: This course is concerned with the principles and policies underlying the legal treatment of corporate bankruptcy. The impact of these procedures and approaches on third parties, for example corporate groups, secured and unsecured creditors, directors and employees, is also considered. Topics include: Secured creditors; The distributional order of priority in corporate bankruptcy; Setting aside transactions; Quasi-security devices for the unsecured creditor; The problem of corporate groups; Company directors in troubled times; Employees in distress and European and international recognition in corporate bankruptcy.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 2,000 word formative essay during the course.

Indicative reading: A full Reading List will be distributed during the course. The recommended text is V. Finch and D. Milman, *Corporate Insolvency Law: Perspectives and Principles* (Cambridge University Press, 2017) (3rd edition).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL444E Half Unit International Law and the Use of Force

This information is for the 2024/25 session.

Teacher responsible: Dr Devika Hovell CKK 7.06

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Pre-requisites: Executive version of an existing taught masters course (LL4A8).

Course content: The use of force is prohibited in international law. This simple but fundamental legal principle can be obscured by a geo-political context littered with conflict and threatened conflict where the exceptions are more often seen as the rule. Relatedly, there can be a tendency to dismiss international law as a 'marginal enterprise' at moments of political crisis. Nevertheless, states continue to refer to legal justifications when they resort to force. The practice of states, even that forged in heated times of war and crisis, can harden into enduring legal principles unless debated, criticized and ultimately objected to in the aftermath. In this course, we consider the complex mix of law and politics at the heart of the legal regime for the use of force. We focus on the development and interpretation of the prohibition of the use of force and its two key exceptions, Security Council authorization and self-defence. We also look at other claimed or emerging exceptions, including humanitarian intervention, protection of nationals and self-determination. Finally, we consider the concept of 'war as crime' and consider the potential and pitfalls of recognition of the crime of aggression.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are expected to produce one 1500 word formative essay during the course.

Indicative reading: A detailed reading list will be issued in advance of the course. A helpful textbook is Christine Gray, *International Law and the Use of Force* (4th ed, 2018).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL445E Half Unit Cultural Property and Heritage Law

This information is for the 2024/25 session.

Teacher responsible: Dr Tatiana Flessas CKK.7.27

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: This course looks at cultural property and heritage law from legal, social theoretical and practice-oriented perspectives. It provides an overview of existing and emerging cultural property and heritage legislation (domestic and international). We will be looking in particular at the development of cultural property legislation in the 20th century and emerging international cultural property and heritage initiatives under the auspices of the UN and UNESCO. Topics to be covered include the origins of cultural property law, the problems in defining cultural property and heritage, current issues and cases in repatriation and restitution of cultural objects, the National Trust and other heritage protection regimes, and intangible cultural heritage. The course also addresses the creation and management of museums and heritage sites, primarily within the UK, but also including sites in North and South America, Europe and Asia. We consider how the issues that we've identified throughout the course arise in the ongoing construction, protection, and (primarily economic) uses of heritage. Along with specialist seminars, the course includes visits to museums and contact with practising experts in the field.

Teaching: Courses are taught over 5 days (Mon-Fri) with approximately 5 hours teaching per day. There is a morning and an afternoon session, so 10 sessions in total with the overall contact time being 24-26 hours.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Neil Cookson, *Archaeological Heritage Law* (2000 Barry Rose); John Henry Merryman and Albert E. Elsen, *Law, Ethics and the Visual Arts* (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 1* (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 3* (1989 Butterworths); J.E. Tunbridge and G.J. Ashworth, *Dissonant Heritage: the management of the past as a resource in conflict* (1996 J. Wiley); Norman Palmer, *Museums and the Holocaust: law, principles and practice* (2000 Institute of Art and Law); John Henry Merryman, *Thinking about the Elgin Marbles: critical essays on cultural property, art and law* (2000 Kluwer Law International); Nick Merriman, *Beyond the Glass Case: the past, the heritage and the public in Britain* (1991); Jeanette Greenfield, *The Return of Cultural Treasures* (1989); Richard Prentice, *Tourism and Heritage Attractions* (1993); G.J. Ashworth and P.J. Larkham, eds. *Building a New Heritage: tourism, culture, and identity* (1994); Peter Mandler, *The Fall and Rise of the Stately Home* (1997); Patrick J O'Keefe, *Trade in Antiquities: reducing destruction and theft* (1997); Ismail Serageldin, Ephim Shluger, Joan Martin-Brown, eds. *Historic Cities and Sacred Sites: cultural roots for urban futures* (2001);

Federico Mayor, *Memory of the Future* (1995); Peter J. Fowler, *The Past in Contemporary Society: then, now* (1992); David Brett, *The Construction of Heritage* (1996); Karl Ernest Meyer, *The Plundered Past* (1974).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL446E Half Unit

Art Law

This information is for the 2024/25 session.

Teacher responsible: Dr Tatiana Flessas CKK.7.27

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: This course engages in a discussion of specific cases and issues regarding acquisition, ownership, and restitution of works of art, and the problems that arise in regulating markets in art, antiquities and cultural artefacts. 'Art Law' is a specialized area of practice and an emerging area of theory and scholarship. We will look at some of the cases and theory of art and law, including the practices of dealers and auction houses in valuing (and mis-valuing) art for sale; the recent developments in addressing the restitution of art taken during the Nazi era; museum loans and the cross-border movement of art; the restoration and conservation debate(s) and then turn to a scholarly and interpretive approach to the issues that arise in considering the art market. We will look at domestic (UK and US) and international legislation regulating the art and antiquities trades. Against this legislative background, the course examines important cases in disputes regarding looting and provenance of art, and questions of commodification and sale of cultural artefacts, focusing on the issues that arise in the operation of the art market (dealers, museums, collectors and auction houses). Within this context, we will touch on the similar or overlapping issues that arise in the market(s) in cultural objects and antiquities and the legal and ethical burdens on the participants in this trade. We will discuss the practices and constraints that arise in the context of both private purchasers/dealers and museums acquiring these kinds of objects. Finally, practitioners in these areas, museum and auction house professionals, archaeologists, and art experts will be contributing to the seminars on the emerging legal issues in this area.

Teaching: Courses are taught over 5 days (Mon-Fri) with approximately 5 hours teaching per day. There is a morning and an afternoon session, so 10 sessions in total with the overall contact time being 24-26 hours.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Colin Renfrew, *Loot, Legitimacy and Ownership: The Ethical Crisis in Archaeology* (2000 Duckworth); Neil Cookson, *Archaeological Heritage Law* (2000 Barry Rose); James Cuno, *Who Owns Antiquity? Museums and the Battle over our Ancient Heritage* (2010 Princeton University Press); John Henry Merryman and Albert E. Elsen, *Law, Ethics and the Visual Arts* (2002 Kluwer Law International); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 1* (1984 Abingdon); Lyndel V. Prott & P.J. O'Keefe, *Law and the Cultural Heritage Vol 3* (1989 Butterworths); Norman Palmer, *Museums and the Holocaust: law, principles*

and practice (2000 Institute of Art and Law); Olav Velthuis, *Talking Prices: Symbolic Meanings of Prices on the Market for Contemporary Art* (2007 Princeton University Press); Jason Felch & Ralph Frammolino, *Chasing Aphrodite: The Hunt for Looted Antiquities at the World's Richest Museum* (2010 Houghton Mifflin Harcourt); Sarah Thornton, *Seven Days in the Art World* (2009 Granta Books); Jeanette Greenfield, *The Return of Cultural Treasures* (1989); Patrick J O'Keefe, *Trade in Antiquities: reducing destruction and theft* (1997); Karl Ernest Meyer, *The Plundered Past* (1974).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL447E Half Unit

International Law: Courts and Tribunals

This information is for the 2024/25 session.

Teacher responsible: Dr Devika Hovell CKK.6.32

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Law School will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Law School's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Law School website.

Course content: The course introduces students to the practice and theory of international legal dispute resolution, focusing on dispute settlement before courts and tribunals. The former Prosecutor of the Yugoslav Tribunal, Richard Goldstone, resolved that: 'it seems to me that if you don't have international tribunals, you might as well not have international law'. Given the proliferation of courts and tribunals applying and enforcing international law, certain scholars have argued we are witnessing the emergence of an 'international judicial system' (Martinez). The course involves three main elements:

1. Firstly, the course examines the structure and work of the International Court of Justice, the principal judicial organ of the United Nations, focusing on jurisdiction/admissibility, contentious cases and advisory opinions.
2. Secondly, the course introduces a variety of other international courts and tribunals, such as the International Criminal Court, domestic and regional courts dealing with international law and human rights, including the European Court of Human Rights and the European Court of Justice, the WTO Dispute Settlement Body and investment treaty arbitral tribunals. Using contemporary and controversial case studies, the course will critically analyze and contrast the institutional design and jurisdiction of these courts and tribunals.
3. Thirdly, throughout the course we explore key theoretical controversies surrounding the adjudication of international law, focusing in particular on (a) how these courts and tribunals relate to one another (hierarchy, specialization and fragmentation); (b) what criteria should be used in assessing the legitimacy and effectiveness of these courts and tribunals; and (c) whether and how these courts and tribunals create international law.

Teaching: 24-26 hours of contact time.

Formative coursework: Students are encouraged to produce one 2,000 word formative essay during the course.

Indicative reading: Indicative reading includes Karen Alter, *The New Terrain of International Law: Courts, Politics, Rights* (2014 Princeton); Gleider Hernández, *The International Court of Justice and the Judicial Function* (2014 OUP); Yuval Shany, 'No Longer a Weak Department of Power? Reflections on the Emergence of a New International Judiciary' (2009) 20(1) *European Journal*

of International Law 73; Frederic Megret and Marika Giles Samson, 'Holding the Line on Complementarity in Libya: the Case for Tolerating Flawed Domestic Trials' (2013) 11 Journal of International Criminal Justice 571.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL448E Half Unit

Terrorism and the Rule of Law

This information is for the 2024/25 session.

Teacher responsible: Prof Conor Gearty CKK 6:11

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course will provide a theoretical and historical introduction to the concept of terrorism. It will critically consider definitions of terrorism, and analyse the relationship between terrorism and the right to rebel, and the right to engage in civil disobedience. The historical development of the idea of 'terrorism' from the late eighteenth century through to the present will then be traced, with the emphasis on locating the practice of political terror in its political and military/quasi-military context. The role of international law generally and international human rights law in particular in the context of terrorism and anti-terrorism action will be considered in detail. The course will teach the material in context, so the subject will be analysed by reference to particular situations where necessary, eg Northern Ireland, the Palestine/Israel conflict and the post 11 September 'war on terror'. The aim of the course is to give the student a good critical understanding of this most controversial of subjects, and also to impart an understanding of the role of law in shaping the fields of terrorism and of counter-terrorism (and, latterly, the emerging field of 'extremism').

Teaching: 24-26 hours of contact time.

Formative coursework: All students are encouraged to produce one 2,000 word formative essay during the course.

Indicative reading: There are four pieces ideally to be read before we meet:

- (i) Richard English Terrorism: How to Respond (Oxford 2009; pb 2010).
- (ii) Conor Gearty, Liberty and Security (Polity, 2013).
(Note both of these books are in paperback, and short!)
- (iii) Conor Gearty, 'Terrorism and Human Rights' in Gearty, Selected Essays on Human Rights and Terrorism (Cameron May 2008), ch 24 – I have a PDF available.
- (iv) Conor Gearty, 'Terrorist threats, Anti-terrorism and the Case against the Human Rights Act' in F Cowell (ed), Critically Examining the Case against the Human Rights Act (Hart 2017) I have a word version.
Please try to ensure that you have completed this reading prior to the module.
Further reading:
(v) A marvellous fund of information is at: <http://www.parliament.uk/topics/Terrorism.htm>

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL449E Half Unit

Cyberlaw

This information is for the 2024/25 session.

Teacher responsible: Prof Andrew Murray CKK.6.07

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course critically analyses the regulation of the Internet and digital devices (such as smart devices and tablets).

It begins by providing a theoretical framework for the regulation of the Internet, examining questions such as whether the internet is capable of regulation, whether such regulation should be neutral and who should assume the task of regulating the online environment. Students taking the course will be expected to develop knowledge and understanding of the different values and interests brought to bear in the regulation of information technologies and communities.

Armed with this theoretical background, students will then be asked to consider how these values are reflected in the regulatory design of the online environment. This examination will be conducted by considering a number of case studies relating to online privacy, defamation, criminal activity and market power. The course concludes by examining the topical and politically charged question of whether Internet Service Providers should be allowed to vary service conditions by types of content.

Teaching: 24-26 hours of contact time.

Formative coursework: All students are encouraged to produce one 2,000 word formative essay during the course.

Indicative reading: Murray, Information Technology Law: The Law and Society (OUP, 5th ed, 2023)

Reed & Murray, *Rethinking the Jurisprudence of Cyberspace* (Edward Elgar, 2018)

Murray, *The Regulation of Cyberspace* (Routledge, 2007)

Lessig, *Code Ver, 2.0* (Basic Books, 2006)

Zittrain, *The Future of the Internet* (Penguin, 2009)

Reed: *Making Laws for Cyberspace* (OUP, 2012)

Sunstein, *Republic.com 2.0* (Princeton UP, 2009).

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL450E Half Unit

Banking and Finance Law: Regulating Retail, Consumer, and SME Markets

This information is for the 2024/25 session.

Teacher responsible: Dr Joseph Spooner

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option.

Course content: As the past fifteen years have transformed understandings of finance and the economy, they have highlighted the economic centrality of household finance. The Covid-19 and Cost-of-Living crises laid bare how households and the wider economy have come to depend on credit markets to make ends meet and maintain economic activity. Responsibility for both the Global Financial Crisis of the late 2000s and the subsequent Great Recession can be attributed to failures of household credit markets. Consumer expenditure accounts for over 50% of GDP in most OECD economies, meaning that the financial markets and products powering this spending are of central policy importance. Key contemporary problems of economic stagnation, inequality and political instability can all in some ways be linked to problems arising in consumer financial markets, which are increasingly important sites of legal and political activity. The economic significance of SME finance is similarly clear. Small and Medium Enterprises (SMEs) account for 99% of firms and approximately 70% of jobs in OECD countries, and questions of how these firms access finance raise perennial policy concerns. This is a particularly important time to review household and small business financial markets, given the rethinking of economic fundamentals in the aftermath of Covid-19 and the Cost-of-Living Crisis.

The significance and expansive reach of the consumer and SME dimensions of financial law are not matched by coverage in typical law school curricula – this course aims to address this imbalance by presenting a unique offering. The course begins by discussing key principles and theoretical ideas of retail financial market regulation. It considers the nature and structure of consumer and SME financial markets, examining the institutions and sources that create the ground rules of markets. The course also asks of whom we are speaking when we talk of ‘consumers’ and ‘Small and Medium Enterprises’. The course then considers the various rationales justifying policy action in consumer and SME markets, and the various tools available to policymakers in responding to these ideas and designing market interventions.

The course applies these ideas in examining discrete consumer and SME financial product markets and related areas of law. It draws on a combination of international norms and examples from European, North American and English law. In addressing the regulation of financial contracts, it examines the bank-client relationship and fundamental assumptions regarding freedom of contract. The course considers business conduct under the common law and legislation, considering firms’ duties when negotiating, marketing, and advising in retail markets. Information disclosure regulations and ‘duties to warn’ are evaluated, before the course considers how the law requires firms to consider the affordability of loans under ‘responsible lending’ rules. Finally, the course turns its focus to financial distress and bankruptcy, considering principles for the treatment of household over-

indebtedness and entrepreneurial failure in a financialised economy.

The course is academic in nature and will be of value to law students wishing to study aspects of banking and financial law that are not considered by courses focusing on business-to-business transactions. It is inter-disciplinary in nature, and so students from non-law backgrounds should also find the course accessible. The course is also designed to be valuable at a practical level to those working in legal and corporate practice advising financial services firms and/or their clients, as well as those based in government and the third sector. The course is international in scope, meaning that its content should be of interest to candidates from many jurisdictions.

Teaching: This is an intensive module, which will be delivered through interactive seminars. The module will provide between 24 and 26 hours of contact teaching time. Students will be provided with online materials for the module well in advance of the intensive teaching. The teaching will take place in week-long sessions, running from Monday to Friday.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Formative assessments are set by teachers during the course and students will be given a submission date of approximately one month from the end of the teaching session. Feedback will be provided within two weeks following submission, either on Moodle or via email. The word limit for formative essays is 2000 words.

Indicative reading: General:

- Sir Ross Cranston, Emiliós Avgouleas, Kristin van Zwieten, Christopher Hare, and Theodor van Sante, *Principles of Banking Law* (3rd edition, OUP 2018)

AND

- Geraint Howells, Iain Ramsay, and Thomas Wilhelmsson (eds.), *Handbook of Research on International Consumer Law*, (2 edition, Elgar 2018)

OR

- Geraint Howells, Christian Twigg-Flesner and Thomas Wilhelmsson, *Rethinking EU Consumer Law* (1 edition, Routledge 2017).

Why Regulate of Consumer and SME Financial Markets?

- Iain Ramsay, ‘Consumer Credit Law, Distributive Justice and the Welfare State’ (1995) 15 *Oxford Journal of Legal Studies* 177.
- George A. Akerlof, ‘The Market for ‘Lemons’, 84 *The Quarterly Journal of Economics* 488 (1970)
- David Caplovitz, *Poor Pay More: Consumer Practices of Low-Income Families* (Free Press 1968).
- Luigi Zingales, ‘Does Finance Benefit Society?’ (2015) 70 *The Journal of Finance* 1327.
- Financial Conduct Authority, ‘Fair Pricing in Financial Services’ (FCA 2018) Discussion Paper DP18/9

Complexity in Financial Products: Contract-as-Product

- Oren Bar-Gill, *Seduction by Contract: Law, Economics, and Psychology in Consumer Markets* (OUP Oxford 2012), Chapter 1.
- Margaret Jane Radin, *Boilerplate: The Fine Print, Vanishing Rights, and the Rule of Law* (Princeton University Press 2012), Chapters 1-4.

Consumers, SMEs, and Financial Stability: Prudential Perspectives

- Anat Admati and Martin Hellwig, *The Bankers’ New Clothes: What’s Wrong with Banking and What to Do about It* (Updated edition, Princeton University Press 2014).
- Atif Mian and Amir Sufi, *House of Debt* (University of Chicago Press 2014).
- Kathleen C Engel and Patricia A McCoy, *The Subprime Virus: Reckless Credit, Regulatory Failure, and Next Steps* (OUP USA 2011)

Sample Reading:

- Sir Ross Cranston, Emiliós Avgouleas, Kristin van Zwieten, Christopher Hare, and Theodor van Sante, *Principles of Banking Law* (3rd edition, OUP 2018)
- Geraint Howells, Iain Ramsay, and Thomas Wilhelmsson (eds.), *Handbook of Research on International Consumer Law*, (2 edition, Elgar 2018)

- Anat Admati and Martin Hellwig, *The Bankers' New Clothes: What's Wrong with Banking and What to Do about It* (Updated edition, Princeton University Press 2014).
- Atif Mian and Amir Sufi, *House of Debt* (University of Chicago Press 2014).
- Kathleen C Engel and Patricia A McCoy, *The Subprime Virus: Reckless Credit, Regulatory Failure, and Next Steps* (OUP USA 2011)
- Iain Ramsay, 'Consumer Credit Law, Distributive Justice and the Welfare State' (1995) 15 *Oxford Journal of Legal Studies* 177.
- Luigi Zingales, 'Does Finance Benefit Society?' (2015) 70 *The Journal of Finance* 1327.
- Financial Conduct Authority, 'Fair Pricing in Financial Services' (FCA 2018) Discussion Paper DP18/9

Assessment: Assessment path 1

Take-home assessment (100%).

Assessment path 2

Essay (100%, 8000 words).

Students will be examined through a combination of an (8,000 word) assessed long essay (which may take the form of a policy paper) or take-home examination (6,000 words). The take-home examination will be uploaded and submitted electronically, and will be set two months after the completion of the intensive teaching. Video revision/question-and-answer sessions will be offered to students between the end of the teaching session and the exam.

LL451E Half Unit Anglo-American Contract Law

This information is for the 2024/25 session.

Teacher responsible: Dr Paul Macmahon CKK 6.23

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Course content: This course in Anglo-American Contract Law has two main aims. First, it acquaints students with the fundamental ideas in the common law of contracts. Second, students learn how these common-law ideas have developed differently in England and the United States. The course's main themes include: freedom of contract and its limits; the tension between documentary certainty and tacit understandings; the relevance of extracontractual notions of fairness; and the nature of the judicial role in contractual dispute resolution. We will explore these themes by working through both hypothetical and real cases. Students learn to apply, compare, and evaluate English and American contract law.

We are likely to cover the following topics:

- Contract Law in England and the United States: Institutional Comparison
- The Core Requirements for Binding Contracts in English and U.S. law
- Precontractual Liability
- Unconscionability and Standard Form Contracts
- Interpretation of Contracts: Formalism and Contextualism
- Implied Terms and the (Limited) Role of Good Faith
- Variation of Contracts: Relational Norms vs. Neoformalism
- Change of Circumstances: Frustration and Impracticability
- The Theory and Practice of Efficient Breach of Contract
- Contract Law as a Product on the Global Market for Dispute Resolution: London vs. New York vs. the rest

Our coverage is necessarily selective. The topics have been chosen according to three criteria. First, though some historical

understanding is crucial, the emphasis is on issues with contemporary practical importance. Second, we focus on ideas that are peculiar to the common law of contracts and otherwise inaccessible to students from a civil law background. Third, we pay special attention to areas where English and American law have diverged. Along the way, students become familiar with the distinctive styles of legal reasoning on display in each country. Students may benefit especially by gaining an understanding of how the United States' complex and opaque system of judicial federalism works in private law cases.

Teaching: 24-26 hours of contact time.

Formative coursework: Students have the option of producing a formative essay or answer to a problem question (max. 2000 words) to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Essential readings will include excerpts from judicial decisions, and also from the following secondary sources:

- Ewan McKendrick, *Contract Law* (14th edn, Red Globe Press 2021)
- Randy E. Barnett, *Oxford Introductions to U.S. Law: Contracts* (Oxford University Press 2010)
- Margaret Radin, *Boilerplate: The Fine Print, Vanishing Rights, and the Rule of Law* (Harvard University Press, 2014)
- Lon Fuller, *Consideration and Form*, 41 *Colum. L. Rev.* 799 (1941)
- Geoffrey P. Miller, *Bargains Bicoastal: New Light on Contract Theory*, 31 *Cardozo L. Rev.* 1475 (2010)
- Gregory Klass, *Intent to Contract*, 95 *Virginia L. Rev.* 1437 (2009)
- John Cartwright, *An Introduction to the English Law of Contract for the Civil Lawyer* (3rd edition, Bloomsbury, 2016)
- Richard A. Posner, *Law and Legal Theory in England and the United States* (Oxford University Press, 1997)
- Guenter Teubner, *Legal Irritants: Good Faith in British Law or How Unifying Law Ends up in New Divergences*, 61 *Modern L. Rev.* 11 (1998)

The common law of contracts has developed mainly through case law, so a large proportion of the readings consists of excerpts from judicial decisions.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL452E Half Unit Tort Law: Foundations and Contemporary Issues

This information is for the 2024/25 session.

Teacher responsible: Professor Emmanuel Voyiakis (CKK.6.17)

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. This course will be offered on the Executive LLM during the four-year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information, please refer to the Department of Law website.

Course content: Tort law is not only one of the foundational topics in the common law, it is also one of the most intellectually stimulating and vibrant areas of legal practice. Tort principles are fundamental to many specialist areas of law (from competition to consumer, labour, and environmental law), so familiarity with their structure and content pays multiple dividends. While necessarily selective, our course will look at the core principles of tort law, their theoretical underpinnings, and their application in a number of controversial questions in modern litigation. We will discuss some central ideas in the law of negligence (acts vs omissions, duties of care, breach, causation and remoteness), as well as the major schools of thought on the purpose and function of tort

law (especially wrong-based vs economic theories). We will also look at a wide range of questions in contemporary tort litigation: the complex position of public authorities in negligence; torts relating to autonomy and privacy (wrongful conception, autonomy-reducing medical negligence, invasions of privacy); vicarious liability and its applicability to the modern economy; and the various economic torts (inducing breach of contract; the 'unlawful means' tort; conspiracy). As befits all common law subjects, we will explore these themes by working through both hypothetical and real cases.

Teaching: 24-26 hours of contact time.

Teaching will follow the standard ELLM format of ten three-hour seminars (including breaks). Students will be expected to have studied the reading in advance of the seminar, and to be ready to engage in a critical discussion of the topics and questions. Our last seminar will provide an overview of the course and focus on revision.

Formative coursework: Students will have the option of producing a formative essay or answer to a problem question (max. 2000 words) to be delivered one month from the end of the module's teaching session by email.

Indicative reading: For some good sources of introductory reading on tort law (useful if you want to freshen up your knowledge, or for checking your level of familiarity, and all available electronically in our library), see:

- Nick McBride & Roderick Bagshaw, *Tort Law* (6th ed., Pearson, 2018), Chapter 1.
- Tony Weir, *An Introduction to Tort Law* (2nd ed., Oxford University Press, 2015), Chapter 1
- Jenny Steele, *Tort Law: Text, Cases and Materials* (4th ed., Oxford University Press, 2017), Part III (on negligence).
- Peter Cane, *Atiyah's Accidents, Compensation, and the Law* (4th ed., Cambridge University Press), Parts I & II.

Essential readings, especially in the second part of the course, will include excerpts from judicial decisions. They will also include excerpts from the following secondary sources:

- Ernest Weinrib, *The Idea of Private Law* (Reprint: Oxford University Press, 2012)
- Arthur Ripstein, *Private Wrongs* (Harvard University Press, 2016)
- John Goldberg & Ben Zipursky, *Recognizing Wrongs* (Harvard University Press, 2020)
- Guido Calabresi, *The Costs of Accidents* (Yale University Press, 1970)
- Emmanuel Voyiakis, *Private Law and the Value of Choice* (Hart Publishing, 2017)
- Saul Levmore & Martha Nussbaum, *The Offensive Internet: Speech, Privacy, and Reputation* (Harvard University Press, 2010)
- Samuel Warren & Louis Brandeis, 'The Right to Privacy', 4 *Harvard Law Review* (1890) 193
- Paula Giliker, *Vicarious Liability in Comparative Perspective* (Cambridge University Press, 2010)
- Ken Oliphant (ed.), *The Liability of Public Authorities in Comparative Perspective* (Intersentia, 2015)
- Nicole Priaux, *The Harm Paradox: Tort Law and the Unwanted Child in an Era of Choice* (Routledge, 2007)
- John Murphy, *The Province and Politics of the Economic Torts* (Hart Publishing, 2022)
- Hazel Carty, *An Analysis of the Economic Torts* (Oxford University Press, 2010)
- Joanne Conaghan & Wade Mansell 'Remedying Sexual Harassment and Abuse' in *The Wrongs of Tort* (2nd ed., Oxford University Press, 1998).

A full reading List will be distributed at the start of the course. Given its advanced nature, the course does not rely on a textbook. Good introductory reading on the theoretical part includes:

- Oberdiek J. (ed.), *Philosophical Foundations of the Law of Torts* (2014);
- Owen D (ed.), *Philosophical Foundations of Tort Law* (1995); and
- Ripstein A., *Private Wrongs* (2016).

On the more practical part of the course, good general reading includes:

- Levmore S. – Nussbaum M., *The Offensive Internet: Speech,*

Privacy, and Reputation (2012);

- Oliphant K. (ed.), *The Liability of Public Authorities in Comparative Perspective* (2016)

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL453E Half Unit Law and Politics of the EU

This information is for the 2024/25 session.

Teacher responsible: Dr Floris De Witte 7.03 CKK

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Students do not require previous knowledge of EU law.

Course content: How is the European Union governed? This course will discuss this question in both a descriptive and a normative fashion. In descriptive terms, the course looks at the way in which the EU institutions are structured, how they function internally, and the powers that they have. It looks at the power of the European Court of Justice, at the role of fundamental rights, and the way in which the Treaty can be amended. This descriptive discussion forms the backdrop for the (more central) normative discussion: how should Europe be governed? Is the EU democratic? Should it be? Should Member States have more or less power to challenge EU measures? What will the future of the EU look like? And what should it look like?

Students will be challenged to think about the EU as an institutional structure in which both law and politics play a crucial role. Really understanding the EU requires knowledge of both areas as well as knowledge of their interaction. At no other time in the development of the EU has the interaction between law and politics so fundamentally affected the direction of the integration process.

The coming years will see fundamental changes to the EU's structure; which are informed as much by political dynamics as by legal mechanisms. This course prepares you to fully understand those changes - and allow you to analyse critically both their normative content and institutional structure.

Substantive topics include Brexit, the rule-of-law crisis, and the Eurozone crisis and can be tailored to the interests of the students.

Teaching: 25 hours of seminars

Formative coursework: Students will have the option of producing a formative essay of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Dawson & De Witte, 'EU Law and Governance' (CUP 2022)

S. Novak & M. Hillebrandt, 'Analysing the trade-off between transparency and efficiency in the Council of the European Union' (2020) *JEPP* 141.

D. Keleman & L. Pech, 'The Uses and Abuses of Constitutional Pluralism: Undermining the Rule of Law in the Name of Constitutional Identity in Hungary and Poland' (2019) *CYELS* 59.

Schimmelfennig, Leuffen, Rittberger, 'The European Union as a System of Differentiated Integration: Interdependence, Politicisation, and Differentiation' (2015) *JEPP* 764.

Bonelli & Baraggia, 'Linking Money to Values: the new Rule of Law Conditionality Regulation and its constitutional challenges' (2022) *GLJ*

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

This Executive LLM course is assessed by either take-home exam (100%) or by 8,000 word assessed essay (100%).

LL4COE Half Unit Taxation of Wealth

This information is for the 2024/25 session.

Teacher responsible: Dr Andrew Summers CKK.6.06

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Available to Executive LLM students only. This course will be offered on the Executive LLM during the four year degree period. The Department of Law will not offer all Executive LLM courses every year, although some of the more popular courses may be offered in each year, or more than once each year. Please note that whilst it is the Department of Law's intention to offer all Executive LLM courses, its ability to do so will depend on the availability of the staff member in question. For more information please refer to the Department of Law website.

Pre-requisites: This course is suitable for students from any social science background, including but not only Law. No previous study of taxation is required. Some prior familiarity with principles of tax design is advantageous but not essential.

Course content: The course examines the taxation of wealth from a variety of academic perspectives, drawing on research from political theory, economics, sociology and law. Taxes on wealth are defined broadly to include taxes on transfers of wealth, returns on wealth, and holdings of wealth. The course equips students with an interdisciplinary framework for explaining and evaluating taxes on wealth, and applies these approaches to existing tax policies and options for reform. The focus is on the UK and US contexts although comparisons are also made with other jurisdictions. Part I of the course introduces key debates from across the social sciences relevant to the taxation of wealth. Seminars 1-5 cover: (i) defining and measuring wealth; (ii) inequality and distributive justice; (iii) property rights; (iv) economic perspectives; and (v) social and political perspectives. Part II applies these debates to specific wealth tax policies. Seminars 6-10 cover: (i) taxes on transfers: inheritance/estate tax, lifetime receipts tax, comprehensive income tax; (ii) taxes on returns: capital gains tax, capital income tax and (iii) taxes on holdings: property tax, land-value tax, net wealth tax.

Teaching: 25 hours of seminars in the ST.
24-26 hours of contact time.

Formative coursework: Students will be expected to produce 2 pieces of coursework in the ST.
Students will receive formative feedback on two essay-plans (comprising 300-word abstract, outline of subheadings,

and bibliography) based on past or sample summative essay titles.

Indicative reading: Atkinson, *Inequality: What can be Done?* (Harvard University Press 2015); Graetz & Shapiro, *Death by a Thousand Cuts: The Fight over Taxing Inherited Wealth* (Princeton University Press 2005); Hills et al, *Wealth in the UK: Distribution, Accumulation and Policy* (OUP 2013); Institute for Fiscal Studies, *The Structure and Reform of Direct Taxation: The Meade Report* (Allen & Unwin 1978); Institute for Fiscal Studies, *Tax by Design: The Mirrlees Review, Vols 1 & 2* (OUP 2011); Murphy and Nagel, *The Myth of Ownership: Taxes and Justice* (OUP 2002); Piketty, *Capital in the Twenty-First Century* (Harvard University Press 2014); Sandford, *Taxing Personal Wealth* (Allen & Unwin 1971); Scheve & Stasavage, *Taxing the Rich: A History of Fiscal Fairness in the United States and Europe* (Princeton University Press 2016); Waldron, *The Right to Private Property* (OUP 1991); Young, *The Myth of Millionaire Tax Flight: How Place Still Matters for the Rich* (Stanford University Press 2017)

Assessment: Assessment path 1
Take-home assessment (100%) in the ST.
Assessment path 2
Essay (100%, 8000 words) in the ST.

LL4CPE Half Unit Tax Avoidance

This information is for the 2024/25 session.

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option.

Course content: This course will provide a comprehensive overview of the phenomenon of tax avoidance and of the attempts by states to combat it: both unilaterally and multilaterally. Whilst using examples predominantly from the UK and USA the issues addressed by the course are general across many jurisdictions and so will be applicable to those with interests beyond the UK and USA.

The course will be multi-disciplinary, in that the course will draw on accessible social-science literature.

Taxpayers have always sought to minimise their tax burden.

However recent decades have witnessed a sharp rise in popular and governmental concern with tax shelters and other tax avoidance. Traditional strategies of tax avoidance have included postponement of taxes and tax arbitrage, in addition to attempting to exploit 'loopholes' through a formalist interpretation of legislation. In recent years the proliferation of complex financial instruments has increased the opportunities for such avoidance. Additionally, globalisation and the development of the digital economy have facilitated tax avoidance strategies of base erosion and profit shifting (BEPS). This rise in opportunities for tax avoidance has been accompanied by an increased public concern that individuals and companies pay their 'fair share' of taxation: which states have responded to both through unilateral and multilateral actions (including the OECD's project on BEPS and the EU's Anti Tax Avoidance Package).

Particular topics covered will include (i) defining avoidance; (ii) strategies of tax avoidance; (iii) statutory interpretation and judicial approaches to tax avoidance especially with reference to the UK and USA; (iv) General Anti-Abuse and Anti-Avoidance Rules and Specific and Targeted Anti-Avoidance Rules; (v) reporting rules and other policies to deter avoidance; (vi) BEPS and the EU; and (vii) corporate social responsibility, professional ethics and public attitudes with regard tax avoidance.

Teaching: The module will provide between 24 and 26 hours of contact teaching time. Students will be provided with online materials for the module well in advance of the intensive teaching. The teaching will take place in week-long sessions, which will typically be held in the first half of September, December and April.

Formative coursework: Students will have the option of producing a formative exam question of 2000 words to be delivered one month from the end of the module's teaching session by email.

Assessment: Assessment path 1

Take-home assessment (100%) in the AT.

Assessment path 2

Essay (100%, 8000 words) in the AT.

LL4CQE Half Unit

Legal Aspects of Private Equity and Venture Capital

This information is for the 2024/25 session.

Teacher responsible: Prof Sarah Paterson Cheng Kin Ku Building 6.19 and Mr Simon Witney N/A

This module is co-taught by Simon Witney, Visiting Professor in Practice and a practicing lawyer, and Sarah Paterson, Professor of Law. Simon teaches Sessions 1-8 and Sarah teaches Sessions 9 and 10.

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. Students should note that private equity is a specialist asset class, and the basics of debt and equity are not covered in LL4CQE. The course is, therefore, recommended for students who are taking other, relevant corporate law and financial law courses, or who have relevant experience.

Course content: This module will equip students with a detailed understanding of the legal structures and issues arising in international private equity and venture capital. It is founded on deep academic analysis of pertinent theoretical and legal issues complemented by insights from relevant practitioners. It has a UK focus but includes relevant aspects of European Union law with comparative global perspectives. The module will cover:

- Private equity and venture capital fund raising and fund structuring, including the usual terms of private equity funds.
- The European regulatory framework.
- The structure and terms of venture capital investments and buyouts.
- The corporate governance of private equity-backed companies.
- The debt financing arrangements usually encountered on an LBO.

Session 1: Introduction to private equity and venture capital and some basic theory

This Session will introduce the legal structures and commercial dynamics of private equity and venture capital and the theoretical frameworks that will underpin the course.

Session 2: Fund terms

In Session 2 we examine the core economic and non-economic terms of a typical private equity or venture capital fund. We consider the theoretical basis for these terms.

Session 3: Fund structures: the limited partnership

In this Session we look at the limited partnership structure, examine why it is used and its main legal and tax characteristics. We also look at other aspects of the typical private equity fund structure.

Session 4: Private equity fund (and manager) regulation

This Session looks at UK and EU regulatory initiatives, and critically evaluates the provisions of the Alternative Investment Fund Managers Directive which affect private equity funds.

Session 5: Venture capital investments

Starting from a theoretical perspective, we will analyse the terms of a typical venture capital investment into a portfolio company by reference to example documents. We will also examine various aspects of contract and company law which have particular relevance to VC structures.

Session 6: Negotiating the VC deal: case study

In this Session, we will discuss the key points arising from a venture capital investment case study. We will focus on key points which have a legal as well as a commercial aspect, and connect these to the theoretical discussions in Session 5.

Session 7: The buyout: structure and terms

This Session will examine the structure of a buyout and how it differs from a VC investment. We will focus on pertinent company law rules and the main commercial terms.

Session 8: The buyout: corporate governance issues

This Session will examine the ways in which private equity firms

approach corporate governance. We will consider this in the context of the UK legal framework and some recent developments in corporate governance regulation that apply to large, private companies.

Session 9: LBO debt financing

In this Session we will analyse and evaluate the structure of the LBO financing transaction; the relationship between the theory and practice of private equity and the legal terms found in the leveraged loan agreement; and the relationship between the theory and practice of private equity.

Session 10: LBO debt financing (continued)

In this Session we will analyse agency theory and maintenance financial covenants; the rise of covenant-lite and covenant-loose financing for PE LBOs; and the implications of these developments.

Teaching: Students will receive approximately 30 hours of contact time.

Formative coursework: Students will have the option of producing a formative essay of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading: Core texts:

- Gilligan, J. and Wright, M., Private equity demystified: An explanatory guide, ICAEW, 2014 (freely available at <https://www.icaew.com/technical/corporate-finance/financing-change/private-equity-demystified-an-explanatory-guide-160216>).
- Hale, C. (ed.), Private Equity: A Transactional Analysis, 4th edition (Globe Law and Business, 2020).
- Witney, S., The corporate governance of private equity-backed companies, 2017, PhD thesis (freely available at: <http://etheses.lse.ac.uk/3557/>).

Further readings will be posted on Moodle.

Assessment: Assessment path 1

Essay (100%, 8000 words).

Assessment path 2

Take-home assessment (100%).

LL4CTE Half Unit

Brands and Trademark Law

This information is for the 2024/25 session.

Teacher responsible: Dr Luke McDonagh CKK 7.35

Availability: This course is available on the Executive Master of Laws (ELLM). This course is not available as an outside option. You do not need prior exposure to intellectual property law or a marketing background to take the course. You will be supported throughout the course to understand trademarks as legal signs and as brands within a consumer marketplace.

Course content: The Brands and Trademark Law Executive LLM module focuses on a growing part of the modern economy: the protection and enforcement of intangible brand value. This course takes a socio-legal approach to branding, exploring legislation and case law concerning registered trademarks in the UK and EU, undertaking comparative analysis of US and International trademark law and drawing insights from marketing and anthropological literature. After an introduction to the historical bases and normative premises of modern trademark law, we explore the core elements of trademark jurisprudence. We also consider the wider notion of the 'brand' in the modern economy and examine how the law protects this value.

Topics covered include: an introduction to national, regional and international trademark registration systems; registration requirements, including absolute grounds and relative grounds of refusal; the scope of trademark rights; branding, marketing and the ownership of brand image in the context of the interaction between consumers and corporate brands; trademark infringement; confusion and dilution; and exceptions and defences.

Teaching: The course would involve 24-26 hours of contact time.

This Would take the form of a week-long course with two x 120min seminars per day, with additional online contact.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Students will have the option of producing a formative essay of 2000 words to be delivered one month from the end of the module's teaching session by email.

Indicative reading:

- F. Schechter, 'The rational basis of trademark protection' (1926) 40 Harvard Law Review 813-833.

Assessment: Assessment path 1
Essay (100%, 8000 words).

Assessment path 2
Take-home assessment (100%).

MG406E Half Unit Behavioural Decision Science

This information is for the 2024/25 session.

Teacher responsible: Dr Barbara Fasolo

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: This course introduces students to Behavioural Decision Science: the science that explains and predicts how humans make decisions (the decision 'process') and how well (the decision 'outcome'). The course will focus on the process, and unveil the subtle and sometimes unconscious influences played by our mind (biases) and the context in which decisions are faced: What has been chosen in the past? Is there positive or negative affect - perhaps because of risk and uncertainty? Can AI be involved? All of these (and more) are factors that often determine how information is searched before choosing, how decisions are made, and the quality of the decision made.

In this course, you will be guided to the scientific language of decisions, judgments and biases. Each day you will work as a group and apply the steps of our proprietary tool 'Decision Canvas' to improve a real decision that you will select, applying different behavioural interventions – from 'process nudges' to 'debiasing' and 'choice architecture'.

The course is entirely seminar-based and balances theory, evidence and experience. It involves group-work throughout the course. We will alternate teaching with interactive activities designed to observe and feel the process of decision making from the 'inside', before reviewing behavioural decision theories and evidence from lab and field studies.

The assessment is designed to give students the opportunity to work as a group and apply their new skills to support a real decision, as well as produce, individually, a rigorous and scholarly report on a specific aspect of decision making, of their interest.

Teaching: 15 hours of lectures and 8 hours of seminars in the AT.

Formative coursework: The formative assignment will take place on the final day of the course after all the lectures and seminars have been completed. The assignment will consist of a plenary presentation in which students divided into small groups will be asked to give a short presentation discussing an intervention that can be used to tackle the most important biases in a decision making problem of their choice. Student groups will develop their plenary presentations during seminars while interacting with the course teachers and other students. The formative feedback will be given at a team level, and will focus on the rigour and use of behavioural science concepts learned in the course.

Indicative reading:

- Bazerman, M. (2017) Judgment in Managerial Decision Making. New York: Wiley. 8th edition;
- Kahneman, D. (2011) Thinking Fast and Slow. London: Allen Lane;
- Russo, J. E. & Schoemaker, P. J. H. (2002) Winning decisions: How to make the right decision the first time, Piatkus Publ. Limited.
- Larrick, R.P. (2004). Debiasing (Chapter 16). In D.J. Koehler, & N. Harvey, Blackwell Handbook of Judgement and Decision Making. Malden: Blackwell Publishing

Assessment: Coursework (100%, 3000 words) in the AT.

The summative assignment consists of two parts.

In Part 1 (no more than 1,000 words), you will be asked to report on the decision, the bias and behavioural interventions recommended within the 'Decision Canvas' work that you did with your group.

Part 2 (no more than 2,000 words) will be an essay where you will zoom in on a particular aspect of the decision process (e.g. decision frame, a judgement, a bias, a de-biasing or choice architecture technique) which you as a developing behavioural scientist have found intriguing and important (be it as a 'buddy' or as a 'decision maker'). This is done in a scholarly and rigorous manner.

Part 1 will count for 25% of your mark while 75% will come from Part 2. You will be required to provide full essay-style referencing. Although the summative assignment will tackle the decision problems presented in groups, all students will write both parts of the summative assessment on their own and receive an individual mark.

MG440E Half Unit Managerial Economics (modular)

This information is for the 2024/25 session.

Teacher responsible: Professor Ricardo Alonso

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2024-2026 cohort.

Course content: A graduate-level introduction to the foundations of managerial economics and its application to high-level business decisions. Topics include:

1. Economics as a theory of organisation
2. Demand, supply, and equilibrium: the determinants of consumers' and firms' market responses, the nature of non-strategic interaction
3. Perfectly Competitive Markets: Government Intervention and International Trade
4. Strategic interaction and Game Theory
5. Information and efficiency: adverse selection
6. Pricing with Market Power: Monopoly Pricing
7. Pricing with Market Power: Direct and Indirect Price Discrimination
8. Pricing with Market Power: Dynamic Pricing
9. Pricing with Market Power: Horizontal and Vertical Differentiation

Teaching: 31.5 hours of lectures in the AT.

Nine 3.5 hour sessions plus one review session.

Formative coursework: Students will be expected to produce one problem set in the AT.

Indicative reading: Optional textbook: B. Douglas Bernheim and Michael D. Whinston, *Microeconomics*, McGraw Hill, 2008. Further readings will be provided at the beginning of the course.

Assessment: Class participation (15%), other (70%) and multiple choice quiz (15%) in the AT.
Class Participation (15%), Consulting Project (70%) and Multiple Choice Summative Assessment (15%)

MG441E Half Unit Foundations of Management (modular)

This information is for the 2024/25 session.

Teacher responsible: Dr Rebecca Campbell

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

This information in this course guide pertains to the 2024-2026 cohort.

Course content: A thorough grounding in the key management disciplines. Students will be provided with an overview of the development of Management disciplines and will develop an understanding of the disciplinary anchors in economics, sociology, psychology and business history. Within each field, we will cover origins, disciplinary boundaries, core concepts and current debates.

Teaching: 35 hours of lectures in the AT.
Scheduled over 2 modules – 10 sessions of up to 3.5 hours each.

Lectures: 1. Course introduction and the origins of management
2. The theory of the firm
3. The professionalisation of management
4. What about the workers?
5. Understanding organisational structure
6. Organisational decision making
7. The origins of modern strategy
8. Contemporary strategic management: Firms as bundles of resources
9. Managed by markets?
10. The challenge of the age: Climate change

Seminar classes: 1. Managers and managerial work
2. Bureaucracy and Agency
3. Scientific management
4. How to generate cooperation
5. How should structure reflect strategy
6. Understanding decision biases
7. Strategy: how not to compete
8. Firms as bundles of resources
9. Managed by markets
10. Can sustainability and profit co-exist?

Formative coursework: 1,500-word case write-up

Indicative reading: Paul Willman: *Understanding Management*: Social Science Foundations
Oxford University Press, September 2014.

Assessment: Class participation (10%) and case assignment (30%) in the AT.

Take-home assessment (60%) in the WT.

MG443E Half Unit Organisational Behaviour and Leadership (modular)

This information is for the 2024/25 session.

Teacher responsible: Dr Emma Soane

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

This information in this course guide pertains to the 2024-2026 cohort.

Course content: Understanding how individuals and teams function within organisational contexts is key to leadership effectiveness. This course reviews a range of psychological theories and demonstrates how they contribute to understanding behaviour, performance and organisational phenomena. It brings together theory and practice by using class discussions, group activities and presentations that apply the course material to organisational issues. By the end of the course, you will be able to synthesise some of the main theories of organisational behaviour and apply those theories to your organisation.

Topics include personality, creativity and innovation, team processes, leadership, negotiations, ethics, organisational risk and organisational culture.

The course will also focus on developing your leadership style and skills. Drawing on relevant theories, we will consider your personal leadership style and its implications for working with others. We will discuss the leadership skills that contribute to effectiveness in a range of contexts, and consider how to apply these skills to build positive organisational environments. You will be asked to complete two in-depth evaluations, and profiles will be used to guide your leadership development.

Teaching: 35 hours of teaching spread over the first 3 modules of the EGMiM programme. There are 10 sessions of 3.5 hours each. The teaching is highly participative and includes breakout discussions and group activities.

Formative coursework: A practice exam will be provided and feedback will be given on this assignment.

Indicative reading: The course relies on journal articles (for example from, the *Journal of Applied Psychology*, the *Academy of Management Journal*). A complete reading list will be provided at the start of the course. There is no required textbook. The following textbook is recommended for students who would like further reading:

Robbins, S. P., Judge, T. (2023). *Organizational Behavior* (19th Global Edition). Prentice Hall

Assessment: Class participation (5%), take-home assessment (65%) and group project (30%).

Class participation will be based on group presentations.

The take-home assessment will be an individual essay.

MG445E Half Unit Marketing Strategy (modular)

This information is for the 2024/25 session.

Teacher responsible: Dr Heather Kappes

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2024-2026 cohort.

Course content: This course is a rigorous examination of the key analytical frameworks, technical tools, and concepts that are essential to building an effective marketing strategy. Peter Drucker, the father of business consulting once famously remarked, "Because the purpose of business is to create a customer, the business enterprise has two—and only two—basic functions: marketing and innovation". In today's highly competitive business environment these words ring even more true: a well-designed marketing strategy can make all the difference between success and failure in the marketplace. While marketing is commonly associated with consumer goods companies (e.g., Unilever) it would be myopic to restrict the relevance of marketing to such instances alone. Marketing, ultimately, is about understanding and shaping behaviour. Accordingly, banks and other financial institutions, as well as governmental, medical, and not-for-profit organisations - from those that design and sell financial products, to those that implement public policy (e.g., those dedicated to reducing drunk driving, increasing literacy, and encouraging safe contraception), have all found that a well-thought out marketing strategy can be a critical arbiter of success even in this "ideas

marketplace.”

By using a wide range of quantitative as well as qualitative methods, interactive lectures, videos, hands-on exercises, and case studies, we will share key analytical frameworks and tools that are essential to a good marketing strategy. The aim is to develop an analytical tool-kit that will be applicable to a wide range of industries and functions.

Teaching: Teaching will be spread across 8 sessions.

Formative coursework: Students will receive formative feedback on a preliminary version of their group work.

Indicative reading: There is no required textbook. Further references will be provided at the commencement of the course.

Assessment: Take-home assessment (65%) and group project (35%).

MG446E Half Unit Strategy, Organisation and Innovation (modular)

This information is for the 2024/25 session.

Teacher responsible: Professor Connson Locke, course convenor
Dr Lourdes Sosa
Dr Mia de Kuijper

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2023-2025 cohort.

Course content: The course seeks to understand differences in profitability across (for-profit) firms with the objective of designing strategic recommendations for managers to improve (and defend) their firms' competitive positions. To do so we will first review industry-wide as well as firm-specific determinants of short-term profitability. On that foundation we will look at long-term determinants of profitability including dynamic capabilities and innovative ability. The course aims to balance exposure to general strategic principles and specific practical applications. To that purpose, we will use theoretical frameworks to analyse practical cases from a wide array of firms in varied countries.

Topics include business models, value proposition, strategic resources and inimitability, dynamic capabilities, disruptive innovation, power nodes strategy and scenario planning.

Teaching: 10 sessions - scheduled over 2 modules. The teaching is highly participative and includes lectures, breakout discussion and exercises.

Formative coursework: In-class analysis of Lego case study.

Indicative reading: The course relies on journal articles, cases, and books (for example, Strategic Management Journal). A complete reading list will be provided at the start of the course. Sample texts include the following: Christensen, C., Bower J. (1996) Customer Power, Strategic Investment, and the Failure of Leading Firms (Strategic Management Journal); Teece, D., Pisano, G., Shuen, A. (1997) Dynamic Capabilities and Strategic Management (Strategic Management Journal); De Kuijper, M. (2009) Profit Power Economics.

Assessment: Presentation (25%), class participation (10%) and take-home assessment (65%).

Group presentation (25%), class participation (10%) and take home exam (65%).

MG447E Half Unit International Business Strategy and Emerging Markets (modular)

This information is for the 2024/25 session.

Teacher responsible: Dr Christine Cote

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside

option.

The information in this course guide pertains to the 2023-2025 cohort.

Course content: This course analyses the emergence of firms which operate on a global scale and their current and likely future interactions with emerging markets. Teaching will be based upon interactive lectures and a number of key international strategy cases. Lectures and case discussions in September will prepare students for the study visit to Cape Town in November and especially the company visits which represent a key component of the case content of the course.

Multinational firms have been an increasingly significant aspect of the corporate environment in developed countries since the 1960s and are responsible for a high proportion of global output, as well as the bulk of foreign direct investment. In the past few decades their activities have been increasingly focused to developing economies, notably those which have liberalised and entered a more rapid growth phase. These economies, emerging markets, include some important world economies including China, India, transition economies such as South Africa, and Latin American countries such as Brazil and Argentina. The new institutional economics has developed as a field to understand the impact of variation in institutions on economies performance. This course will focus on how the institutional characteristics of emerging markets affect the choices and behaviour of multinational firms, now and into the future.

We commence with the basic framework of analysis of the behaviour of multinational enterprises (MNEs), outlining models of the MNE which draw on transaction cost economics, the eclectic OLI paradigm of Dunning, Barney's Resource Based View and entry mode choices for internationalization. We will then provide an analysis of economic performance and growth in emerging markets and the role of distance and institutions as determinants of FDI. Firm internationalization strategies based on the work of Pankaj Ghemawat will be explored. Other topics include the phenomena of emerging market multinationals and the importance of non-market and global taxation strategies for the MNE. Finally, the course will focus on practical learnings and observations from our immersive visit to Cape Town South Africa, including the exploration of social entrepreneurship in emerging markets.

Outline of Sessions: Session 1 - Globalization, trade and GVCs, Session 2 - Models and Strategies of the Multi-National Enterprise(OLI/ Entry Mode), Session 3 - Institutions, Distance and Determinants of FDI, Session 4 - Global Strategies in Emerging Markets, Session 5 - Non Market Strategies, Session 6 - Emerging Market Multinationals, Session 7 - Introduction to Social Entrepreneurship in Emerging Markets, Session 8 - Company visits in Cape Town South Africa, Session 9 - Spillovers and the Impact of FDI in Emerging Markets, Session 10 - Student Presentations.

Teaching: 10 sessions scheduled over three modules both in London and Cape Town South Africa.

The course will run between the following dates:

02 – 07 September 2024 – London Module

03 – 08 November 2024 – Cape Town South Africa Module

06 – 11 January 2025 – London Module

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading:

- P. Ghemawat, Redefining Global Strategy, Harvard Business School Press, 2007T.
- S Commander and Saul Estrin, The Connections World, Cambridge University Press 2022
- Cote, C., Estrin, S., Meyer, K. E., & Shapiro, D. (2020). Covid-19 and the dynamics of distance in international business. Academy of International Business Insights, 20(3).
- J. Dunning, "The Eclectic Paradigm", Journal of International Business Studies, No. 1, 1988
- Khanna, K. Palepu and J. Sinha, "Strategies That Fit Emerging Markets", Harvard Business Review, 2005
- Ramamurti, R., 2012. What is really different about emerging market multinationals? Global Strategy Journal, 2(1), pp.41-47.

Assessment: Take-home assessment (60%) and presentation (30%) in the WT.
Class participation (10%) in the AT and WT.

MG457E

Foundations of Management 2: Financial Control and Governance (modular)

This information is for the 2024/25 session.

Teacher responsible: Dr Yally Avrahampour

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

The information in this course guide pertains to the 2024-2026 cohort.

Course content: This course teaches, over two modules, topics relating to financial accounting and management accounting. In so doing the course also examines the relationship between the exercise of financial control within organizations and the setting of external standards relating to governance, and the implications of this for the organization of firms. In the first module the course covers topics such as the construction of the financial statements, and then considers topics relating to measurement, for example the contrast between historical cost and fair value and the recognition of intangible assets. In the second module the course examines topics relating to the determination of the cost of a product or service, balanced performance measurement and economic value added.

Teaching: Eight sessions of 3.5 hours each, composed of lecture and case discussions. Four sessions in module 1 and four sessions in module 2.

Formative coursework: Formative assignment after module 2.

Indicative reading: Kaplan, R. & Atkinson, A. (2014) Advanced Management Accounting, Weetman, P. (2019) Financial Accounting: An Introduction, 8th ed

Assessment: This course will not be assessed.

MG498E Half Unit

Dissertation/Capstone Project (modular)

This information is for the 2024/25 session.

Teacher responsible: Various

Availability: This course is compulsory on the Executive Global MSc in Management. This course is not available as an outside option.

Course content: This course consists of a project which will be undertaken throughout the second year of the degree. Students will choose between an academic dissertation or a capstone project. The academic dissertation will explore a question that is grounded in academic theory and literature. The capstone project will explore a business idea or venture. In both projects, students will collect original data relevant to their research question or business idea and must analyse the data, discuss limitations, and draw conclusions.

Teaching: Students are required to participate in scheduled seminar sessions which will provide guidance and support in developing their dissertation or capstone project. Students will be allocated a faculty advisor who will support and guide them.

Formative coursework: Students will be required to agree their dissertation/capstone topic with a faculty advisor and provide a plan which they will receive feedback on.

Indicative reading: Relevant reading will be provided by academic advisors.

Assessment: Dissertation (100%, 6000 words).

*Dissertation or capstone project (6,000 words)

MG4H1E Half Unit

Foundations of Social Business I

This information is for the 2024/25 session.

Teacher responsible: Prof Stephan Chambers Marshall Institute, 44 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: This course focuses on three critical aspects of social business: entrepreneurship; strategy; and leadership. It focuses on both existing organisations and start-ups as vehicles for social change, and aims to support 'intrapreneurs' as well as entrepreneurs. Its purpose is to bring students' understanding of the worlds of opportunity and venture into clear organisational focus, and to develop their skills as an altruistic leader. It begins to sensitise students to the challenges of starting, running, and leading mission-based organisations, explores established vehicles for combining social and commercial purpose, and examines strategy development where the imperative is not market-capture but the reversal of market failure.

Students will be introduced to the main elements of entrepreneurial planning including opportunity identification and evaluation, rapid prototyping and resource-gathering. They will explore the business model canvas and ideas of lean start-up. Critiques of over-simplified, heroic or 'solutionist' models of social entrepreneurship will be explored. They will consider the main techniques for planning and implementing activities to take advantage of entrepreneurial opportunities, including customer journeys, sources of advantage, competencies, and the resource-based view of the firm. Students will be provided with a foundation in organisational behaviour, drawing on research in psychology and sociology, to understand the behaviour and attitudes of people in organisations. The theories and research will address these topics generally, and place them in the context of social business by applying them to case studies and problems faced by leaders of social businesses.

Teaching: There will be ten integrated lecture/seminars of three hours each, delivered across two modules.

Formative coursework: A practice coursework assignment.

Indicative reading:

MG4H2E Half Unit

Foundations of Social Business II

This information is for the 2024/25 session.

Teacher responsible: Prof Stephan Chambers Marshall Institute, 44 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available

as an outside option.

Course content: The social business, as any other firm, has to understand its environment and undertake consequent activities to enable sustainability and effectiveness; this challenge is complicated by the requirement to achieve not only profit or financial sustainability, but also environmental sustainability and mission-driven social impact. Foundations of Social Business II specifically introduces students to three critical aspects of this interaction between the social business and its environment: social finance; marketing; and technology.

The course focuses on the opportunities for and external constraints on social business. Its purpose is to introduce students to the environment of both opportunity and threat in which pro-social business exists. A primary challenge for any social business is funding. The course looks in detail at the varieties of financing available to social ventures (impact finance, social finance, grant finance), and introduces emerging social finance mechanisms that are enabling innovative collaborations and resourcing to solve social problems. Social businesses must be able to analyse and respond to the markets in which they are situated, and the course explores the concepts and tools of marketing. Finally, no business, whether social or commercial, can ignore the emerging importance of technology as an opportunity and perhaps a threat. The course explores the use of technology, including AI, to analyse and to respond to complex task environments; it explores the potential for technology to improve the internal productivity of the firm including through radical decentralisation of the organisation.

Teaching: Ten integrated lectures / seminars of three hours each, delivered across two modules (teaching blocks)

Formative coursework: One formative assessment exercise will be offered: a practice essay.

Assessment: Coursework (100%).

Assessment will be through an individual coursework assignment (100%) comprised of 2 essay questions.

MG4H3E Half Unit Social Impact and Its Evaluation

This information is for the 2024/25 session.

Teacher responsible: Prof Julian Le Grand Marshall Institute, 44 Lincoln's Inn Fields, Dr Jonathan Roberts Marshall Institute, 44 Lincoln's Inn Fields and Dr Eva Neitzert Marshall Institute, 44 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: Those who want to improve society face three immediate dilemmas – first, what is the public benefit? How can I define, with clarity, my moral purpose? Second, how can I decide between different courses of action in order to pursue the public benefit? And third, how can I know that what I do makes any real contribution to the public benefit? What is the evidence? This innovative course sets out to support students in coming to their own resolutions of these dilemmas. Its goal is to introduce

the concepts and techniques of impact measurement from the perspective of – and through specific examples of interest to – organisational leaders and policymakers and those who intend to commission social business and social enterprise interventions. A first section challenges students to consider and discuss the nature of the public benefit. It introduces students to different philosophical conceptions of the good, including libertarianism, utilitarianism, Rawls' theory of justice and Sen's capabilities approach. It will also discuss whose conception of the good is the more important: the actor or agent, the beneficiary, the government or the wider society.

Our choices of outcomes and impact measures are in turn not neutral, but are infused with moral choices about the definition of the public good. The second (and larger section) of the course introduces students to key concepts and skills in developing and assessing evidence of social impact. It aims to equip students with the ability to be intelligent commissioners of interventions for the public good and critical assessors of evidence and published research. Concepts to which students will be introduced include the distinction between correlation and causation, the counterfactual, opportunity costs, trade-offs, spill overs and substitution effects. Students will be introduced to techniques through which the effectiveness of social interventions can be evaluated, including randomised experiments, quantitative evaluation of non-experimental data, cost-benefit and cost-effectiveness analyses and realistic evaluation approaches; the strengths and weaknesses of these methods are considered. It will also consider the politics of impact measurement and how to ensure that evaluation enables continuous improvement.

Teaching: Ten sessions of three hours each, delivered across two modules (teaching blocks).

Formative coursework: Two formative assessments will be provided – a critical assessment of an evaluation report and an in-class group exercise.

Indicative reading:

Assessment: Coursework (70%) and coursework (30%).

Assessment will be through two individual coursework assignments

MG4H4E The Altruistic Entrepreneur Project

This information is for the 2024/25 session.

Teacher responsible: Prof Stephan Chambers Marshall Institute, 44 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: This course crystallises the academic learnings from across the degree programme into an applied experience. It runs concurrently with course delivery across all modules. Students will work in groups of four or five, supported by faculty, to develop an entrepreneurial business proposal for social impact, moving through idea generation, initial design and formal proposal. The proposal may be a new organisation or an activity within an existing organisation with explicit social benefit.

The project creates a space for real world application of students' learning; development of the project concurrently with programme delivery enables substantive interaction between project work and core skills learning. The course mirrors the development of the programme overall by requiring students to address questions of context (and relation to state and private actors), questions of strategy and market development, financing, and reporting as well as personal leadership, communications and persuasion. Projects are designed in the expectation of potential real world implementation.

Working in a group is an essential component of this course. Students will be expected to reflect on how their groups form, how they establish principles for working effectively, and how they resolve conflict or disagreement. They will be asked to reflect on their own group dynamic and how it might be a function of culture, mission, and measurement. Students will be asked explicitly to reflect in their essays on the process of selecting a topic and assigning roles. Since so much of their professional life will involve impromptu and non-elective group working we consider this aspect of the course particularly important.

Teaching: Teaching will take place over the duration of the programme. There will be whole cohort teaching sessions of three hours each module, plus tutorial meetings for each project group.

Formative coursework: Formative work, through presentations and discussions in tutorial meetings, will be continual for the duration of the programme. Students will be asked to submit a draft outline of their final summative essay.

Assessment: Essay (50%), presentation (35%) and proposal (15%). Assessment will be through a group presentation (35%), group composition of a business model canvas (15%), and an extended essay of 5,000 words at the end of the project (50%).

MG4H6E Half Unit The Hybrid Economy

This information is for the 2024/25 session.

Teacher responsible: Prof Julian Le Grand Marshall Institute, 44 Lincoln's Inn Fields and Dr Jonathan Roberts Marshall Institute, 44 Lincoln's Inn Fields

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: Following the failure of both states and markets to resolve persistent social problems, a hybrid economy is emerging in which new organisational forms and new multi-actor collaborations blend outcomes, behaviours and structures drawn from different sectors with the aim of achieving both social and financial returns. Examples of organisations and activities in this emerging economy include corporate firms that internalise social purpose, business-oriented philanthropists, private organisations that spin out of the state sector (public service mutuals), social impact investment, and complex collaborative financial instruments such as social impact bonds.

This course explores the economics and politics of this emerging phenomenon. It provides students with knowledge of the newly developing institutions, organisations and mechanisms, and with the critical and analytic skills through which to evaluate them. It assesses the historic and contemporary failures by the state, market and voluntary sector in developed and developing economies; and it considers the competitive advantage and disadvantage of the hybrid social business as a remedy for these failures. The course focuses specifically on motivation and incentive theory, exploring how we can design organisations and wider institutions that both nurture and capitalise upon altruism, but that also acknowledge more self-directed motivations.

The course explores the scope and nature of the political relationship between hybrid organisations and the state, exploring whether the function of the social business is best conceived as a complement to state services, a replacement for state services in conditions of austerity and exponentially growing demand, or

separately as an innovative laboratory for social interventions. It concludes by exploring ethical criticisms of the hybrid economy, focusing in particular on controversies about the introduction (or intrusion) of the market and business into the social or public realm.

Teaching: Ten integrated lecture/seminars of three hours each, delivered across one module (teaching block).

Formative coursework: One formative assessment exercise will be offered: a practice essay.

Assessment: Coursework (100%).

Assessment will be through an individual coursework assignment (100%) comprised of 2 essay questions.

MG4H7E Half Unit The Purpose-Driven Corporation

This information is for the 2024/25 session.

Teacher responsible: Prof Stephan Chambers, Dr Jonathan Roberts and Dr Julia Morley

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: Social and environmental purpose is critical to the current business and leadership agenda. Large commercial sector companies are increasingly wrestling with challenges to their legitimacy and considering how to support senior staff in approaching questions of social impact, justice, harm mitigation and moral purpose – whether as corporate social responsibility strategies or more profoundly integrated within the core objectives of the firm. These concerns are no longer peripheral, but are central issues for the competitive advantage and survival of firms; they are also central to solving environmental and social problems. Many of the ideas and practices behind this realignment remain unclear and challenging.

This course takes on the key debates in this field and provides a framework for action for senior managers. First, it considers the emerging landscape of the purpose-driven corporation and the different labels in this field, from the conscious corporation to corporate social responsibility (CSR) and to the benefit corporation. Second, it explores theoretical propositions concerning, and the empirical evidence for, the concept of 'shared value' – the

suggestion that, by creating social impact, or at least by reducing harmful practices, firms can increase their profitability. Third, it addresses the challenge for the modern firm of providing an account of its social performance, examining the theory and practice of accounting for environmental and social impact through Environmental, Social and Governance (ESG) criteria and other systems of social accounting. Fourth, it examines the role of the various stakeholders in the purpose-driven corporation, including shareholders, managers, employees and consumers. Finally, the course explores how to integrate ESG management and a social and environmental focus into business practice. Cross-cutting themes include particular reference to climate action and corporations, and exploration of the dynamic policy environment, including emerging legal codification of the benefit corporation in a number of countries and tax policy towards corporations. Using analytical frameworks drawn from management, accounting, and public policy, the course will critically evaluate the opportunities and challenges faced by the purpose-driven corporation. Examples of the types of question that we will investigate include: what is the social and environmental responsibility of business? Can corporations maximise profitability while doing good? If so, under what conditions? How should we hold corporations to account for their social and environmental impact? Who should decide on the definition and characteristics of a 'good' firm? What is the role of voluntary certification systems such as B Corps or Fair Trade? How can government policy support and incentivise corporations to improve their social and environmental impact? These are all strongly contested debates, and the course will give students the critical understanding to come to their own answers.

Teaching: Ten integrated lecture/seminars of three hours each, delivered across two modules (teaching blocks).

Formative coursework: Students will be expected to produce 1 piece of coursework in July.

Formative assessment will be twofold on this course. First, formative take-home coursework will prepare students for their summative work. Second, students will discuss a case study in class.

Assessment: Coursework (50%, 2000 words) and coursework (50%, 2000 words) in August.

MG4H8E Half Unit

Social Entrepreneurship in Context

This information is for the 2024/25 session.

Teacher responsible: Dr Kerry Krige (MAR.9.06) and Dr Jonathan Roberts (MAR.9.05)

Availability: This course is compulsory on the Executive MSc in Social Business and Entrepreneurship. This course is not available as an outside option.

Course content: This course focuses on how social entrepreneurs, policy makers, impact investors and other stakeholders understand and function in contexts that are unstable, complex and contradictory. Doing so, requires a distinct set of skills from the social entrepreneur as they navigate the context within which they are embedded, to generate the social, environmental and market returns they seek. To whom do social enterprises turn in fragile states, where the rule of law is weak, and they need to do business? How do social enterprises work in isolated or marginalised communities where there is physical, social, and political exclusion? How do social enterprises that are established to address patriarchy, function within the patriarchal community? These questions flag some of the contextual paradoxes social entrepreneurs face, as they deliver social and environmental value through their enterprises. These paradoxes have a profound effect on social entrepreneurial action and determine the strategies, skills and tools needed to navigate context. As such, this course deepens learnings of the EMSBE programme, building on the motivation, hybridity, organisational structuring, and operational approaches that are taught as part of the programme. This course takes a multi-disciplinary approach, drawing from management, sociology, entrepreneurship, and development studies to present a view of social entrepreneurship across four contextual dimensions: political, social, market and field. Class sessions are practical, focused on developing the skills and strategies students need to navigate these dimensions. Theoretically, the course draws from institutional and social capital theories. Students will learn how legitimacy is built, the delicate balance of conforming to normative and regulatory systems, the duality of formal and informal logics and how this informs the social entrepreneurial response. It analyses the link between context and organisational characteristics, and how this affects managerial decisions relating to financing, scaling and social outcomes.

The course then explores how these approaches apply to different stakeholders in the sector. For the entrepreneur, it demands a dynamic mix of skills to navigate the complexity, contradictions, and fragility of their environment. For the impact investor, it requires innovation in the development and management of funds. For the policy maker, it requires a nuance in approach that accommodates a multitude of realities, which is often at odds with bureaucratic government systems.

By studying this course, students will be able to deliver on their social entrepreneurial activities in different contexts, having developed their theoretical positions and applied tools and frameworks to deepen their professional perspectives. It has as an underpinning philosophy that social entrepreneurship is shaped by the context it operates in, whilst shaping that context through its activities, and equips students with the skills they need to navigate this complexity.

Teaching: Ten integrated lecture/seminars of three hours each, delivered across two modules (teaching blocks).

Formative coursework: Students will be expected to produce 1 case study in the ST.

Using a single case study, students will submit a case study analysis that discusses the effect of context on the scenario given (1500 words).

Assessment: Presentation (20%) and case analysis (80%) in the ST.

1. Video Presentation (Group) 20%: Students will submit a short video. Here students must describe a selected context, identify the barriers for social entrepreneurship in this context and propose a policy approach that would address these barriers in the short, medium, and long term.
2. Case analysis 80%, 2000 words: Using a case study, students will apply the theoretical and contextual dimensions (political, social, market and field) introduced in class, to analyse their impact on the example given in the case.

PB413E Half Unit Frontiers in Behavioural Science Methods

This information is for the 2024/25 session.

Teacher responsible: Dr Matteo M Galizzi

Dr Dario Krpan

Dr Alina Velias

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: Behavioural science is the scientific study of human behaviour, and it combines research techniques from experimental psychology and economics. The course offers an integrated training in advanced behavioural science methods by introducing students to state-of-the-art experimental techniques that stretch across the spectrum of both disciplines. The course covers the following topics: advanced considerations in

experimental design; determining evidential value of behavioural science research: undisclosed flexibility in data collection, dance of p-values, p-curve analysis; pre-registration, pre-analysis plan; reproducibility practices in modern behavioural science experiments; measuring attitudes and preferences; designing behavioural priming experiments and measures that tap into implicit cognition; behavioural game theory and experimental games of strategic interaction; non-linear regression models; understanding the mechanisms behind behavioural effects by employing experimental-causal-chain, measurement-of-mediation, and moderation-of-process designs; state-of-the-art physiological research techniques; tests of hypotheses and sample size calculations for experiments in theory and practice; systematic reviews of the literature.

Teaching: The course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours in the third teaching session (April).

Formative coursework: Students will be expected to produce 1 piece of coursework after the teaching session. For the formative assignment, you will need to produce a brief research proposal plan (500 words) that will serve as the basis for the full research proposal (3,000 words) that will constitute your summative assignment. In the research proposal plan, you will propose a design and implementation of a behavioural science experiment entailing the use of (at least) two different software packages introduced in the seminars. The structure of the proposal plan should be as follows: a) Introduce a viable research question (on a topic of your choice) that will guide your experimentation; b) Describe how you would design and implement behavioural science research to answer the question; and c) Explain which statistical approaches covered in lectures and seminars you would use to analyse the data. Feedback received for the formative assignment will help you to prepare the summative assignment by identifying both strengths and weaknesses of your approach.

Assessment: Proposal (100%).

For the summative assignment, you will be required to expand the research proposal plan submitted as part of the formative assignment into a full research proposal comprising 3,000 words. Your task will be to propose a design and implementation of a behavioural science experiment entailing the use of (at least) two different software packages introduced in the seminars.

The structure of the proposal should be as follows:

- 1 Introduce a viable research question (on a topic of your choice) that will guide your experimentation;
- 2 Describe how you would design and implement behavioural science research to answer the question; and
- 3 Explain which statistical approaches covered in lectures and seminars you would use to analyse the data.

In the proposal, we will expect you to use in-text scholarly citations and provide a reference list at the end. The summative assignment should allow you to not only demonstrate your knowledge regarding the present course, but also to gain deeper insights into experimental analysis and design that should help you in producing a high-quality dissertation.

PB434E Half Unit Behavioural Science in an Age of AI and New Technology

This information is for the 2024/25 session.

Teacher responsible: Dr Dario Krpan

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: When psychology and economics got “married”, the product was behavioural science. Although this discipline has elevated theoretical and practical understanding of human behaviour to previously unseen heights, recent technological developments have produced new insights in understanding and predicting people’s actions that not only supplement traditional tools of behavioural science but also go beyond them. The future of the discipline will therefore likely depend on how effectively behavioural scientists can harness new developments in technology to understand and change the way people act. The aim of this course is to a) Introduce major technological advancements that are relevant for predicting, influencing, and understanding human behaviour; b) outline how they supplement and extend commonly used tools of behavioural change; and c) examine how they can be used to propel behavioural science into the future. The course will tackle behavioural science in relation to artificial intelligence (AI), virtual environments, social robotics, social networks, and other relevant developments in information technology. Emphasis will be placed on how the technological tools covered throughout the course can be used to change

behaviour in applied settings, and students will be encouraged to discuss implications for their organisations and other areas of interest.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 23 hours in the ST.

Day 1

Lecture 1 (1.5h): Course introduction. Course introduction. I am AI – Who am I?

Lecture 2 (1.5h): Has AI taken over behavioural science, and what is left for us humans to do?

Seminar 1 (2h)

Day 2

Lecture 3 (1.5h): Changing behaviour through gamification

Lecture 4 (1.5h): Social robots: Our new friends?

Seminar 2 (2h)

Day 3

Lecture 5 (1.5h): Behavioural science in virtual worlds

Lecture 6 (1.5h): Behavioural informatics

Seminar 3 (2h)

Day 4

Lecture 7 (1.5h): Digital footprints and human behaviour

Lecture 8 (1.5h): Psychological targeting in digital age

Seminar 4 (2h)

Day 5

Lecture 9 (1.5h): Change thyself: Using technology to influence our own behaviour

Lecture 10 (1.5h): The ethics of emerging technologies in the context of behavioural science

Formative coursework: Students will be expected to produce 1 presentation in the ST.

Formative coursework will serve as your preparation for the summative assignment. You will need to create a 5 minute presentation on the topic of the summative assignment: Propose an intervention that relies on technological tools that were either covered throughout the course or that you identified through personal search to create behavioural change in an applied setting of your choice (e.g. your organisation, personal life; you can select any setting you desire). In the presentation, you will need to a) Introduce the behaviour you want to tackle and argue why changing this behaviour would be important; b) Present your intervention that uses technological tools to change the behaviour and c) argue why this intervention would be effective based on your knowledge of behavioural science gained through the class material and personal literature search.

Similar to the summative assignment, the presentation will be delivered in a video format: you will be given a clear step-by-step guide describing how to produce the presentation in a video format (we will go through this guide during a seminar to make sure it is clear to everyone how the summative assignment should be produced). The main aim of the formative assignment is for me to evaluate your approach to tackling points a), b), and c) mentioned above so I can give you relevant feedback that will help you when preparing the summative presentation, and also for you to get comfortable with producing the video presentation.

 - Koivisto, J., & Hamari, J. (2019). The rise of motivational information systems: A review of gamification research. *International Journal of Information Management*, 45, 191-210.
 - Krpan, D., Booth, J. E., & Damien, A. (2023). The positive-negative-competence (PNC) model of psychological responses to representations of robots. *Nature Human Behaviour*, 7(11), 1933-1954.
 - Boyd, D. (2016). Untangling research and practice: What Facebook's "emotional contagion" study teaches us. *Research Ethics*, 12(1), 4-13.

Assessment: Presentation (100%) in the post-spring term. The aim of the summative assessment will be to propose an intervention that relies on technological tools that were either covered throughout the course or that you identified through personal search to produce behavioural change in an applied setting of your choice (e.g. your organisation, personal life; you can select any setting you desire). This intervention will be conveyed in the form of a 15-20 minute presentation that will count as your summative assignment. More precisely, in the presentation, you will need to a) Introduce the behaviour you want to tackle and argue why changing this behaviour would be important; b) Present your intervention that uses technological tools to change the behaviour and c) argue why this intervention would be effective based on your knowledge of behavioural science gained through the class material and personal literature search.

The presentation will be delivered in a video format: you will be given a clear step-by-step guide describing how to produce the presentation in a video format (we will go through this guide during a seminar to make sure it is clear to everyone how the summative assignment should be produced). Together with the video presentation, you will need to submit an annotated bibliography that contains a) a list of scientific references you used for the presentation; and b) a short text below each reference (1-2 sentences) describing why exactly the reference is important in the context of your presentation. The main purposes of the annotated bibliography will be to demonstrate the academic background upon which your presentation was built.

PB436E Half Unit

The Science of Time at Work

This information is for the 2024/25 session.

Teacher responsible: Dr. Laura M Giurge

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: Time is arguably the fabric of our lives, but its value often goes unnoticed. Every day we make decisions (or decisions are made for us) about how and with whom to spend our finite temporal resources. But what is time? How should we think about the value of an hour, or a decade? What does it mean to optimally allocate our time? How does time affect our motivation, productivity, and well-being? Why is it so difficult to eradicate inequality in time-use at work and at home? What can leaders and employees do to protect desired work-life boundaries? And if time is our most precious resource, why is time theft not a crime? This course seeks to address such questions by drawing primarily from the management literature and featuring real-life examples across industries and cultures. Students taking this course will gain a multidisciplinary perspective on understanding and managing time at work and in life; will learn to think critically about their own experiences and uses of time, and how this shapes their

expectations and behaviours in their personal life, at work, and in society; they will be able to recognize the barriers that prevent them from pursuing activities that are beneficial for them and their community; will gain knowledge about how innovations and work has changed the way we think about time; and will learn how to integrate time across all aspects of their lives so they can enact positive change for themselves and their community.

Given that how we spend our time is how we live our life, this course is set up to be highly interactive and experiential. Students taking this course will not only learn about the theoretical insights on time but will also get to apply the science on time by engaging in various evidence-based exercises.

Course objectives:

- To discover time research and why it matters for productivity and well-being.
- To get insights into one's own perceptions and (mis)uses of time.
- To explore new team dynamics and leadership that centre around time.
- To gain a better understanding of the role of work and motivation in our lives.
- To identify solutions that turn innovations from threats to opportunities.

Teaching: 15 hours of lectures and 7 hours and 30 minutes of seminars in the ST.

Formative coursework: 1 Group project: From Monday to Thursday, you will work as a group to analyse and seek to resolve, or at least mitigate, one of your own time-related challenge (e.g., procrastination, overcommitment, overload, etc.). Each day you can apply what we learn in class, from what drives this challenge to how it could be tempered. On Friday, you will give a short, in-class presentation.

2 Individual 250-word pitch for your summative op-ed. For your summative, you will write an op-ed essay on an academic article (you will get to choose one of three articles that will be provided to you). To prepare you for your summative, part of your formative work will be to write a pitch on the article you choose to write an op-ed on. In your pitch, you should describe which article you plan to focus on, why you chose that article, and how you plan to approach your op-ed.

Indicative reading:

- Young, C., & Melin, J. L. (2019). Time is a network good. *Current Opinion in Psychology*, 26, 23-27.

Assessment: Essay (80%, 1500 words) and research proposal (20%) in the ST.

1 Research Proposal (20%): Along learning to translate academic knowledge to the public, it is also important to know how to

identify a meaningful gap in the academic knowledge. To that end, one part of the summative requires you to write a brief (1000-word max) research proposal that identifies a meaningful gap in the academic research on time (specifically within the article you will write an op-ed on) and describes a viable way to address this gap. Unlike the op-ed, the research proposal should be written in academic language.

2 Essay + Annotated bibliography (80%): You will write an essay (max 1.500 words, excluding the bibliography) that follows the structure of an op-ed article (e.g., Harvard Business Review style). You will be provided with three academic articles, and you will have to choose which article you want to write an op-ed on. Like op-ed articles, you will use hyperlinked citations. Along the op-ed, you will need to submit a 500-word annotated bibliography that contains a) a list of scientific references that you used for the op-ed (you can include references beyond those used in the academic article you chose to write the op-ed on), and b) a short text below your key references (1-2 sentences only) describing why exactly the reference is important in the context of your op-ed. You should format your reference list using the APA reference style. A successful annotated bibliography should show understanding of the sources included and not be a mere description of the sources. The reference text itself does not count towards the word limit.

PB450E Half Unit Behavioural Science and Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Paul Dolan
Prof Liam Delaney

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: This course aims to introduce students to the main concepts and tools of the growing fields of behavioural science. The course covers the following topics: What is behavioural science?; What are preferences to economists and psychologists?; Dual-process models of behaviour and the role of the unconscious mind; Dual processing into policy using the MINDSPACE checklist; the role of emotions in decision making; compensating behaviours; breaking and creating habits. Students will develop an understanding of how people make decisions across a variety of contexts and the importance of understanding decisions for designing policy in both public and private organisations. We will cover canonical texts and ideas from behavioural science such as Kahneman & Tversky and Thaler & Sunstein, and we will also introduce students to cutting-edge research within behavioural science including recent work by our own faculty.

Teaching: 9 hours of lectures and 12 hours of seminars in the AT. Please note that the lectures will be a mixture of pre-recorded and live. The seminars will be delivered live.

Formative coursework: Students will be expected to produce 2 essays in the AT.

There will also be formative exercises in the seminars.

Indicative reading: Dolan, P. (2014). *Happiness by design: finding pleasure and purpose in everyday life*. London: Allen Lane.

Assessment: Coursework (100%, 4000 words) in the WT.
2 x 2000 word essays

PB451E Dissertation in Behavioural Science

This information is for the 2024/25 session.

Teacher responsible: Dr Matteo M Galizzi (CON.4.06)

Availability: This course is compulsory on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: The aim of the dissertation is for students to pursue an independent piece of research within the field of behavioural science. The dissertation can consist of: an empirical analysis of existing data; a collection and analysis of new data; a randomised controlled experiment (lab, field, online); a systematic review of the literature. Students must obtain the approval of their supervisor before embarking on any research.

Teaching: 3 hours of classes in the WT.

Formative coursework: Students will be required to agree their dissertation topic with a faculty supervisor and to provide a topic proposal which they will receive feedback on.

Indicative reading: Relevant reading will be provided by supervisors.

Assessment: Dissertation (100%, 10000 words) in the AT.

PB452E Half Unit Behavioural Science for Health and Regulation

This information is for the 2024/25 session.

Teacher responsible: Dr Matteo M Galizzi (CON 4.06)
Elisabeth Costa

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: The course aims to introduce to students the main principles, insights and state-of-the-art applications of behavioural science to health policy and practice, and to regulation. The course is designed to enhance students' abilities to apply rigorously and critically behavioural science tools to concrete contemporary challenges in the areas of health and regulation. It covers principles of behavioural science for health and regulation; heterogeneity and behavioural economics; behavioural health economics and behavioural public policy; behavioural experiments in health (field, lab, lab-field, online, mobile); behavioural data linking; measures of behavioural science for health and regulation: risk, time, and social preferences; heterogeneous attitudes, beliefs, and perceptions; risk perception and risk communication; behavioural biases for information policies; information overload and information avoidance; financial and non-financial incentives; behaviourally supercharged incentives; nudging behavioural change in health; beyond nudging: 'nudge+' and 'boosts'; behavioural spillovers; behavioural insights for taxation on risky health behaviours; behavioural insights for health practice, management, and policy challenges; behavioural public health; regulation, policy-making, and the role of the 'behavioural regulator'; behavioural biases in regulated markets and behavioural market failures; health regulation, the UK health regulatory landscape; digital health and regulating decisions made in online environments; boosting prevention through personalised data and interventions; mental health, behavioural science, and AI; de-shrouding the food system; shaping markets for better health outcomes. Case studies include: behavioural insights for, and applications to, health-related behaviours such as diet and nutrition, physical exercise, alcohol abuse, tobacco and drug use, e-cigarettes, medication, screening, infectious diseases, prevention, prophylaxis, vaccination, anti-microbial resistance, early health,

mental health; COVID-19 pandemic responses; medical decision-making; doctor-patient interaction and shared decision-making; behavioural insights for blood and organ donations; sugar tax; COVID-19 apps.

Teaching: The course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours in the third teaching session (April).

Formative coursework: Students will be expected to produce 1 presentation during the teaching session and 1 other piece of coursework after the teaching session.

Assessment: Essay (100%, 3000 words).

PB453E Half Unit

Corporate Behaviour and Decision Making

This information is for the 2024/25 session.

Teacher responsible: Dr Grace Lordan

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

Course content: This course delivers insights from cutting edge research in behavioural science, psychology, economics, and management and guides students in their application to decision making within corporate companies in high stake settings. The course covers search and hiring, circumventing groupthink, compensation and promotions decisions, the role of bias in equity markets, skills and the future of work, C-Suite decision making, conduct and motivating workers. Real world class case studies are used during the course to reinforce lessons learned, and allow students visualise scenarios in which the theory and insights covered in the course can be applied.

The assessment is designed to give students the opportunity to apply the theory and insights they learned on the course to a real-world case study.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours in the WT.

Formative coursework: Students will be expected to produce 1 case study in the WT.

Case study with short questions that matches the style of the summative assessment

PB454E Half Unit

Policy Appraisal and Ethics

This information is for the 2024/25 session.

Teacher responsible: Dr Ganga Shreedhar and Prof Liam Delaney

Availability: This course is available on the Executive MSc in Behavioural Science. This course is not available as an outside option.

This course is one of two options.

Course description: This course aims to introduce students to the main concepts and tools of behavioural policy evaluation and appraisal, and yield insight into key moral and political values,

and trade-offs, essential for policy-makers when they draw on behavioural science. The course offers practical examples and applications to key policy sectors, such as environment, technology, health, and infrastructure.

The course covers the following topics:

1. Behavioural policy tools, their rationale and assumptions
2. Policy evaluation tools, their rationale and assumptions (e.g. impact evaluation)
3. Policy appraisal tools, their rationale and assumptions (e.g. cost-benefit analysis for market and non-market goods) & adjustments (e.g. time discounting, optimism, risk and uncertainty);
4. Elicitation of social values through revealed and stated preference methods;
5. Welfare and subjective wellbeing analysis of policy interventions;
6. Ethical challenges and tools (e.g. FORGOOD framework).

Learning outcomes

1. Students will be able to articulate the key behavioural policy appraisal and evaluation tools for the appraisal of projects, policies, programmes and regulations applied to key domains (e.g. health and environment), along with their underlying ethical frameworks.
2. Students will be able to critically assess the core appraisal methods, the underlying theories and their assumptions, and discuss the evidence that supports or casts doubt on those methods and theories, and their relative strengths and weaknesses.
3. Students will be able to perform statistical analysis to evaluate policy outcomes and critically appraise the quality of the evidence generated through these techniques.
4. Students will be able to critically appraise the underlying ethical and moral problems associated with libertarian paternalism, its links to other policy mechanisms (like campaigns, regulation, taxation).

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours in the WT.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

The formative assessment will be an outline proposal to undertake a policy appraisal in an area of your choice.

Indicative reading:

- Lades, L.K. and Delaney, L. (2020). *Nudge FORGOOD*. *Behavioural Public Policy*. 1-20.

Assessment: Coursework (100%, 4000 words) in the WT.

The summative assessment will be a detailed proposal (which can be based on the formative).

Behavioural Science. This course is not available as an outside option.

Course content: The course aims to introduce students in an intuitive and accessible way to the main methodological concepts and tools in behavioural science. To achieve this objective, the self-contained course combines rigorous conceptual discussion with hands-on practical applications. The course covers: The beauty of experiments: how randomization solves the sample selection bias; randomized controlled experiments from the lab to the field: taxonomy, principles, best practices; online experiments, lab-field experiments; internal validity, external validity, generalizability, and reproducibility of experiments; Statistical tools: distributions and their moments, the inference problem; Experimental design: between-subjects design, block/stratified randomization, matched-pair design, within-subjects design, cluster randomization, the mechanics of randomization, principles of experimental design; Tests of hypothesis: principles and practices, parametric and non-parametric tests in practice, intuitions and rules of thumbs; Introduction to econometrics: simple and multiple linear regression models, econometric analysis of experimental data; Sampling: optimal sample size calculation in practice, useful rules of thumbs; Experimental best practices and challenges: ethics, recruitment, informed consent form, attrition, non-compliance, external validity, behavioural data-linking; When randomization is not possible: before and after, matching, natural experiments, difference-in-difference, regression discontinuity design; Outcomes and behavioural measures in experiments, principles of survey design. The seminars involve hands-on practical applications using Stata, R, and online resources.

Teaching: The course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours in the second teaching session (January).

Formative coursework: Students will be expected to produce 1 piece of coursework after the teaching session.

Indicative reading:

Assessment: Portfolio (100%).

Students will be asked to submit a "portfolio" of hands-on practical tasks related to the main stages of a behavioural science project after the teaching session.

PB471E Half Unit Research Methods for Behavioural Science

This information is for the 2024/25 session.

Teacher responsible: Dr Matteo M Galizzi CON 4.06

Dr Alina Velias

Availability: This course is compulsory on the Executive MSc in

PP409E Half Unit

Public Policy in Practice Workshop III (EMPA)

This information is for the 2024/25 session.

Teacher responsible: Professor Daniel Berliner

Availability: This course is compulsory on the Executive Master of Public Administration. This course is not available as an outside option.

Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPA to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.

Teaching: A three-day modular teaching block. This course is delivered as a combination of classes and lectures delivered over three days.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course

Assessment: Essay (100%, 2000 words).

Assessment will consist of a 2,000 word reflective essay. Further details will be provided at the Executive MPA programme induction.

PP410E Half Unit

Public Economics for Public Policy

This information is for the 2024/25 session.

Teacher responsible: Professor Xavier Jaravel
Dr Joana Naritomi

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but the course is only available by prior agreement with Executive MPA and Executive MPP Programme Directors if students haven't completed Empirical Methods for Public Policy (PP455E) and Economic Policy Analysis (PP440E) prior to this course.

Course content: This is a course in theoretical and applied public economics using intermediate economic theory. Topics include issues of equity and efficiency and alternative theories of the role of the state. Models of public goods and externalities, including environmental policy. Who really pays taxes: issues of tax incidence and tax evasion. Income inequality, poverty alleviation and the role of welfare programmes in theory and in practice. Health and education policy. The effects of taxes and transfers on labour supply and migration; The optimal taxation of commodities and incomes. Current topics in public finance. The main institutional references will be to the UK and the US, but some attention will also be given to broader international experience.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Formative coursework: One mock examination will be offered.

Indicative reading: A full reading list will be distributed prior to the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Online assessments take place on the third weekend after the module teaching concludes. Assessed essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP421E Half Unit

Global Market Economics

This information is for the 2024/25 session.

Teacher responsible: Professor Emily Blanchard
Professor Davin Chor

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but the course is only available by prior agreement with the Executive MPA and Executive MPP Programme Directors if students haven't completed Empirical Methods for Public Policy (PP455E) and Economic Policy Analysis (PP440E).

Course content: This course focuses on the economic interdependence between countries in a global economy. The first part of the course examines the structure and geography of world trade and examines popular hypothesis such as the "global village" or "flat earth". The second part of the course analyses macroeconomic issues such as the magnitude and effects of international capital flows, the debate over fixed versus flexible exchange rates and the economics of a common currency

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Formative coursework: One mock online assessment opportunity will be provided.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Online assessments take place on the third weekend after the module teaching concludes. Assessed essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP430E

Introduction to Statistics for Public Policy

This information is for the 2024/25 session.

Teacher responsible: Pol Simpson

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Course content: The objective of this module is to introduce a number of fundamental concepts in statistics and mathematics to prepare students for the more advanced material that they will encounter during the EMPA and EMPP programmes. The module first introduces students to the key steps of statistical testing. In addition, the course introduces a small number of mathematical concepts that are widely used in empirical work in public policy.

Teaching: 12 hours of lectures in the AT.

Two days of teaching. Each day of teaching has six contact hours starting at 9:00 and ending at approximately 17:00 with lunch and coffee breaks.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment:

There is no assessment.

PP440E Half Unit Economic Policy Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Sandra Sequeira and Sir Charles Bean

Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but recommended advance readings will be distributed ahead of the course.

Course content: The course is an introductory graduate course providing an economics background suitable for high-level public policy-making. The emphasis is on acquiring sound models and methods suitable for appraising policy-making issues and applicable in a wide variety of contexts. The course will cover both key microeconomic policy issues, such as externalities, public goods and principal-agent problems and macroeconomic issues such as unemployment, fiscal and monetary policies, international trade and finance and the determinants of long-run growth.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Formative coursework: One mock examination will be provided.

Indicative reading: A full reading list will be distributed prior to the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Online assessments take place on the third weekend after module teaching concludes. A 2,000 word essay is due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP454E Half Unit Development Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Adnan Khan and Dr Joana Naritomi

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but the course is only available by prior agreement with the Executive MPA and Executive MPP Programme Directors if students haven't completed Empirical Methods for Public Policy (PP455E) and Economic Policy Analysis (PP440E) prior to this course.

Course content: The main focus of this course is on acquiring the necessary theoretical and empirical skills to engage in the rigorous analysis of public policies in developing countries. Topics at the forefront of development economics will be covered. These include growth and poverty, governance and accountability, motivation of bureaucrats, firms and markets, determinants of productivity, jobs and labour markets, shocks and insurance, infrastructure, connectivity, education and health, trade and globalization, the value of exporting, delivering public services, incentivising teachers and health workers, environment and climate change, management of natural resources, taxation and state capacity. The emphasis will be on combining theory and data to evaluate the effectiveness of policies in these different areas.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Formative coursework: One mock essay opportunity will be

provided.

Indicative reading: A reading list will be distributed at the start of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Online assessments take place on the third weekend after the module teaching concludes. Assessed essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP455E Half Unit Empirical Methods for Public Policy

This information is for the 2024/25 session.

Teacher responsible: Prof Daniel Sturm and Dr Gharad Bryan

Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but recommended advance readings will be distributed ahead of the course. Familiarity with the material covered in the EMPA/ EMPP Introduction to Statistics module is assumed.

Course content: The course introduces students to the quantitative evaluation of public policies. The focus of the course is on practical applications of techniques to test the effectiveness of public policy interventions. The course begins with an overview over the key benefits of randomized experiments in the evaluation of public policies. Next the course covers a number of techniques that are widely used in the evaluation of public policies, including difference-in-differences regressions, regression discontinuity approaches and matching. It concludes with an introduction to cost-benefit analysis.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Formative coursework: One mock examination will be provided.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Online assessments take place on the third weekend after module teaching concludes. A 2,000 word essay is due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP478E Half Unit Political Science and Public Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Sarah Brierley

Dr Victoria Paniagua

Availability: This course is compulsory on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites, but recommended advance readings will be distributed ahead of the course

Course content: This course introduces students to core concepts and problems in politics and policymaking. Among the questions we address: What determines political preferences and electoral outcomes? How are interests represented? How do political institutions shape policy outcomes? We focus on tools that students should be able to apply broadly in analyzing the political

world.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Formative coursework: One mock examination will be provided.

Indicative reading: A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Online assessments take place on the third weekend after the module teaching concludes. Assessed essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP488E Half Unit Regulatory Analysis

This information is for the 2024/25 session.

Teacher responsible: Prof Martin Lodge

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.

Course content: The course examines contemporary issues in regulation in OECD countries and elsewhere. The focus is on exploring competing approaches towards regulation in the context of different domains, ranging from utility, environmental to health and safety regulation. Particular attention will be paid to issues such as institutional design, enforcement and compliance, as well as the relationship between politicians, regulators, business and other actors. Topics include institutional design, development and regulation, standard-setting, enforcement, 'better regulation', and accountability.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Formative coursework: One mock examination opportunity will be provided.

Indicative reading: Managing Regulation by Martin Lodge and Kai Wegrich (Palgrave, 2012) introduces key themes. A different introduction is Understanding Regulation by Robert Baldwin, Martin Cave and Martin Lodge (Oxford University Press, second edition, 2012)

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Online assessments take place on the third weekend after the module teaching concludes. Assessed essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP4A1E Half Unit Cities in an Urban Age: Challenges and Opportunities

This information is for the 2024/25 session.

Teacher responsible: Prof Richard Burdett FAW 8.01J and Prof Antony Travers CON6.06

Availability: This course is compulsory on the Executive MSc in

Cities. This course is not available as an outside option.

Course content: Cities in an Urban Age is an intensive introduction to global urbanisation and the state of cities. The course explores different stages of urban development in cities and regions across the world. It provides students with an understanding of the key challenges facing both mature and rapidly-developing metropolitan areas. It will locate the key challenges facing large cities, notably the persistent levels of social inequality, poverty, unsustainable resource use and constraints to economic efficiency. The course introduces the key tools for intervention such as planning, governance and management of land and infrastructure in response to critical pressures linked to economic development, globalisation, migration, social inclusion, climate change, resource efficiency, and resilience. The key purpose of the course will be to give participants a comprehensive framework for understanding the challenges which cities are facing today.

Topics include: global urbanisation, development and design, urban change, population growth, urban productivity, urban expansion, urban sprawl, densification, intensification, sociability, urban governance, urban institutions, budgets and responsibilities.

Teaching: The course will be taught via a combination of asynchronous sessions and live sessions, the latter of which can be attended in-person or remotely. A minimum of 10 hours of asynchronous learning materials sessions will be provided ahead of live teaching, which will consist of videos, readings and interactive activities. Approximately 10 hours of live teaching will be provided, consisting of lecture-based discussions, seminars and workshops. These live sessions will build upon the outcomes of the asynchronous sessions. All live teaching will take place over a one week period (Module 1).

Formative coursework: Students will be expected to produce 1 essay in the AT.

Submission of a 500 word non-assessed formative statement outlining the key political, environmental and socioeconomic challenges in the student's city that will shape the content of the 2,000 word assessed report.

Indicative reading:

Ungovernable City, Palgrave

- Jacobs, Jane (1961): The death and life of great American cities. Random House.

Assessment: Essay (70%, 2000 words) and presentation (30%) in the AT.

A presentation and submission of a 2,000 word report in AT of how the student's city or organisation is dealing with some of the challenges and opportunities presented in the course.

PP4A2E Half Unit

Cities and Society: Design and Social Cohesion

This information is for the 2024/25 session.

Teacher responsible: Prof Richard Burdett 8.01J

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.

Course content: Cities and Society: Design and Social Cohesion looks at some of the major drivers of urban inequality and poverty and the key actions that cities are taking to reduce urban inequalities through urban design, infrastructure and policy. This is a heavily applied course providing students with tools to analyse the socio-demographic profile of households and neighbourhoods and their relation to spatial distribution and clustering in cities of the developing and developed world. Students are introduced to traditional measures of poverty and inequality such as income and wealth as well more recent multi-dimensional poverty measures such as health and education, and provided with analytical and mapping tools to identify areas of concentration of deprivation. A particular emphasis is placed on identifying spatial strategies that can alleviate the concentration of urban poverty and inequality by optimising access to jobs, housing, education, health, public space, transport and community infrastructure.

Cities and Society will also look at the macro-economic forces that are producing uneven regional and urban development and the key planning methods to reduce levels of inequality. These include spatially blind policies such as taxation and redistribution; spatially connective policies such as infrastructure links between high and low income neighbourhoods and finally spatially targeted policies where private and public investment is targeted at the most deprived urban areas.

Topics include: inequality and GINI coefficients; from income to multi-dimensional measures of poverty; the Human Development Index and its urban relevance; affordable housing, social infrastructure; equity planning (examples include London, Barcelona, Medellin and Bogota); the London model of urban regeneration; infrastructure and equity, health and well-being, migration.

Teaching: The course will be taught via a combination of asynchronous sessions and live sessions, the latter of which can be attended in-person or remotely. A minimum of 10 hours of asynchronous learning materials sessions will be provided ahead of live teaching, which will consist of videos, readings and interactive activities. Approximately 10 hours of live teaching will be provided, consisting of lecture-based discussions, seminars and workshops. These live sessions will build upon the outcomes of the asynchronous sessions. Live teaching will take place over three one-week periods (Modules 2, 3 & 4).

Formative coursework: Students will be expected to produce 1 essay in the AT.

500 word submission identifying the social research methods used in the assessment of a policy or project of your choice

Assessment: Essay (70%, 2000 words) and presentation (30%) in the AT.

Design and present a research method to assess a project or policy of your choice (30%) and submission of an essay looking critically at the social research methods used in the assessment of an existing policy or project (70%).

PP4A3E Half Unit

Cities and the Environment: Urban Environmental Transitions

This information is for the 2024/25 session.

Teacher responsible: Dr Philipp Rode FAW.8.01L

Availability: This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.

Course content: Cities and the Environment explores critical aspects of environmental sustainability in relation to both urbanisation globally and urban change in individual cities. This is an applied course giving students the relevant tools to measure, analyse and assess environmental impact. It introduces debates on different green city paradigms and focuses specifically on approaches to urban climate change mitigation and adaptation. The course further examines implications for urban planning, governance and management.

Cities and the Environment aims to provide the students with an analytical understanding of environmental challenges linked to urban development. Based on these, students are introduced to planning approaches, policy instruments and governance arrangements enabling environmental sustainability and resilience, facilitating the transition to a green economy in cities.

Topics include: environmental sustainability, green economy, environmental impact assessments, climate change adaptation and mitigation in cities, climate resilience, urban environmental transition, resource consumption, pollution, biodiversity.

Teaching: The course will be taught via a combination of asynchronous sessions and live sessions, the latter of which can be attended in-person or remotely. A minimum of 10 hours of asynchronous learning materials sessions will be provided ahead of live teaching, which will consist of videos, readings and interactive activities. Approximately 10 hours of live teaching will be provided, consisting of lecture-based discussions, seminars and workshops. These live sessions will build upon the outcomes of

the asynchronous sessions. Live teaching will take place over three one-week periods (Modules 2, 3 & 4).

Formative coursework: Students will be expected to produce 1 essay in the WT.

Assessment: Essay (70%, 2000 words) and presentation (30%) in the WT.

Present an environmental strategy for an urban development project (30%) and submission of 2,000 word written report (70%).

PP4A4E Half Unit**Cities and the Economy: Urban Economic Development and Finance****This information is for the 2024/25 session.****Teacher responsible:** Dr Savvas Verdis FAW.8.01E**Availability:** This course is compulsory on the Executive MSc in Cities. This course is not available as an outside option.**Course content:** Cities and the Economy forms part of the Executive MSc in Cities. This is an applied course looking at the role of city government and firms in driving inclusive local economic development. The course introduces traditional and more progressive ways to measure and analyse the city economy as well as policies and tools available to attract investment and finance as well as improve the distributional effects of economic growth.

From a global economic level, we will look at the forces shaping urban development and the capacity of national, regional and local policies to influence these drivers. From a more local economic level, we will look at the make-up and sectorial composition of a city economy; how we can measure the economic impact of policies and projects and finally how we can finance and fund complex infrastructure projects.

Topics include: inclusive growth; economic inequalities; measuring growth and competitiveness over time, comparative vs competitive advantage, key performance indicators of a city economy, the role of infrastructure and megaprojects in driving competitiveness, managing city budgets, financing your city, global city indexes, special economic zones and other incentives.

Teaching: The course will be taught via a combination of asynchronous sessions and live sessions, the latter of which can be attended in-person or remotely. A minimum of 10 hours of asynchronous learning materials sessions will be provided ahead of live teaching, which will consist of videos, readings and interactive activities. Approximately 10 hours of live teaching will be provided, consisting of lecture-based discussions, seminars and workshops. These live sessions will build upon the outcomes of the asynchronous sessions. Live teaching will take place over three one-week periods (Modules 2, 3 & 4).**Formative coursework:** Students will be expected to produce 1 essay in the WT.

500 word submission describing the financing strategy of a project of your choice.

Assessment: Presentation (30%) in the WT.

Essay (70%, 2000 words) in the ST.

Pitch a financing strategy for a selected case study area to an expert panel (30%) and submission of a 2,000 word written report analysing the financing strategy of a project of your choice (70%).

PP4A5E**Urban Infrastructure and Strategic Planning****This information is for the 2024/25 session.****Teacher responsible:** Dr Philipp Rode FAW.8.01I and Prof Antony Travers CON6.06**Availability:** This course is available on the Executive MSc in Cities. This course is not available as an outside option.**Course content:** Urban infrastructure and strategic planning is a workshop based course providing practical insights on infrastructure development and strategic planning for cities. The course combines a series of lectures with studio-based group work on a case study city. Students are introduced to all key components of urban infrastructure, cutting across transport, energy, water, waste and digital network systems. A particular focus of this course is the interrelationship of transport infrastructure and urban form. This relationship forms the basis for an inquiry into strategic planning approaches and practical applications in cities around the world. Furthermore, the course covers important aspects of infrastructure governance, finance and regulation and examines implications for large-scale physical infrastructure as well as digital, smart city technologies. Infrastructure and strategic planning aims to provide the students with a praxis-oriented understanding of urban infrastructure development and strategic planning. The workshop-based nature of the course facilitates learning and skills development in relation to strategic development planning.

Topics include: urban infrastructure, transport, energy, water, waste, digital networks, strategic planning, smart cities, finance, privatisation, municipalisation, public private partnerships, design life, lock-in, phasing

Teaching: The course will be taught via a combination of asynchronous sessions and live sessions, the latter of which can be attended in-person or remotely. A minimum of 10 hours of asynchronous learning materials sessions will be provided ahead of live teaching, which will consist of videos, readings and interactive activities. Approximately 20 hours of live teaching will be provided, consisting of lecture-based discussions, seminars and workshops. The majority of these will be delivered during Module 5. In addition to these activities, students will undertake supervised collaboration sessions on a remote basis during the lead up to Module 5.**Formative coursework:** Students will be expected to produce 1 essay in the ST.

A 500 word formative statement outlining the structure of the and key deliverables of the group policy brief.

Assessment: Essay (25%, 2500 words) in the ST.

Essay (50%, 10000 words) and presentation (25%) in the post-spring term.

Assessment 1: A 2,500 word group workshop briefing document to be submitted before Module 5 (25% of course grade).

Assessment 2: A 30 minute assessed group presentation to be delivered at the end of Module 5 (25% of course grade)

Assessment 3: A 10,000 word group policy brief to be submitted after Module 5 (50% of course grade).

PP4A6E

Urban Development and Master Planning

This information is for the 2024/25 session.

Teacher responsible: Prof Richard Burdett FAW 8.01J and Dr Savvas Verdis FAW 8.01E

Availability: This course is available on the Executive MSc in Cities. This course is not available as an outside option.

Course content: Urban Development and Master Planning is an applied group project based on a major regeneration site. Groups will be introduced to one of the regeneration sites project teams which will include: local planning officers, developers, planners, designers and financing teams. The groups will first immerse themselves in the host organisation as well as the site and understand some of the project challenges. The groups will then work in a collaborative environment in order to develop solutions to

the challenges set by the project teams.

Using some of the key assessment and planning tools developed in courses PP4A1E, PP4A2E, PP4A3E & PP4A4E of the Executive MSc in Cities, this project will encourage students to apply the most appropriate analysis, planning and finance methods to an actual development site.

Topics covered: land ownership, development goals, developing the brief, urban design and master planning strategies, wider urban context, phasing, capturing value, mix of uses, public vs private space, financing projects, residual values, negotiations between developers and public agencies, planning constraints and policies, affordable housing, lifecycle assessment, built form, density and integration.

Teaching: The course will be taught via a combination of asynchronous sessions and live sessions, the latter of which can be attended in-person or remotely. A minimum of 10 hours of asynchronous learning materials sessions will be provided ahead of live teaching, which will consist of videos, readings and interactive activities. Approximately 20 hours of live teaching will be provided, consisting of lecture-based discussions, seminars and workshops. The majority of these will be delivered during Module 5. In addition to these activities, students will undertake supervised collaboration sessions on a remote basis during the lead up to Module 5.

Formative coursework: Students will be expected to produce 1 essay in July.

A 500 word formative statement outlining the structure of the and key deliverables of the group policy brief.

Indicative reading:

Assessment: Essay (25%, 2500 words) in the ST.

Essay (50%, 10000 words) and presentation (25%) in the post-spring term.

Assessment 1: A 2,500 word group workshop briefing document to be submitted before Module 5 (25% of course grade).

Assessment 2: A 30 minute assessed group presentation to be delivered at the end of Module 5 (25% of course grade).

Assessment 3: A 10,000 word group policy brief to be submitted after Module 5 (50% of course grade).

PP4A7E

Urban Consultancy Project

This information is for the 2024/25 session.

Teacher responsible: Dr Philipp Rode 8.01I and Dr Savvas Verdis 8.01E

Availability: This course is compulsory on the Executive MSc in

Cities. This course is not available as an outside option.

Course content: The Consultancy Project is a six-month individual consultation undertaken by a student in the Executive MSc in Cities in their own organisation or for an external organisation. Through the consultancy project, students will apply the knowledge and skills acquired in the first six courses of the programme to craft policy or program improvements for public or private agencies and non-profit organisations.

Through in depth interviews with the organisation's leaders as well as the relevant stakeholders, students will focus on a specific project and offer advice on one or more of its design and implementation phases. These may include but are not limited to the concept, feasibility, design, assessment, delivery and/ or evaluation phases in the project cycle.

Examples of projects include design briefs, assessment of master plans or strategic plans, social, economic and environmental impact assessment of projects, project finance and greening of projects and policies.

Teaching: Each student will be allocated a supervisor, who will provide overall guidance on the project's development. Other members of staff may also advise as required. Students will be supported with face to face or web based tutorials throughout the duration of their consultancy project.

Formative coursework: Students will be expected to produce 1 essay in the AT.

A 500 word proposal brief for the consultation project that will be carried out independently by each student.

Indicative reading:

- Bryman, Alan. *Social Research Methods*, 2012. Oxford University Press.
- Cook, Curtis R. 2005. *Just enough project management the indispensable four-step process for managing any project, better, faster, cheaper*. New York: McGraw-Hill.
- Czerniawska, Fiona, and Paul May. 2006. *Management consulting in practice award-winning international case studies*. London: Kogan Page.
- Lindblom, Charles Edward, and David K. Cohen. 1979. *Usable knowledge: social science and social problem solving*. New Haven: Yale University Press.
- Office for Government Commerce. 2004. *Common Causes of Project Failure*. London: OGC.
- Prime Minister's Strategy Unit. 2004. *Strategy Survival Guide*. London.

Assessment: Project (100%, 6000 words) in the WT.

A consultancy report assessing an organisation's challenge and offering strategic advice on possible solutions at any stage of the project or policy cycle.

PP4B3E Half Unit Executive MPP Capstone Project

This information is for the 2024/25 session.

Teacher responsible: Professor Daniel Berliner

Availability: This course is available on the Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites for this course.

Course content: The Capstone project facilitates application of analytical tools developed on the programme. Students will undertake a group project (in teams usually of 3 to 5 people) relating to a public policy problem faced by the Civil Service. The group will have one week to work on an issue identified jointly by the Civil Service and LSE academics, investigating and developing a workable solution to the problem. They will then deliver a presentation, followed by a policy memo and two articles.

Teaching: A one-week modular teaching block.

Formative coursework: Feedback will be provided on work-in-progress during the project duration and on the presentation on the final day of the module.

Indicative reading: Readings that are specific to project work will be distributed at the beginning of the course. Useful preliminary

reading includes: Charles E. Lindblom and David K. Cohen, *Social Science and Social Problem Solving* (New Haven: Yale University Press, 1979); Martha S. Feldman, *Order Without Design: Information Production and Policy-making* (Stanford, CA: Stanford University Press, 1989); Ray Pawson, *Evidence-based Policy: A Realist Perspective* (London: Sage, 2006); Office for Government Commerce *Common Causes of Project Failure* (London: OGC, 2004); *Strategy Survival Guide* (London: Prime Minister's Strategy Unit. July 2004); C. R. Cook, *Just Enough Project Management* (McGraw-Hill, 2004); J. E. McGrath and F. Tschan, *Dynamics in Groups and Teams: Groups as Complex Action Systems*, chapter three in M. S. Poole and A. H. Van de Ven (eds) *Handbook of Organizational Change and Innovation* (Oxford University Press, 2004).

Assessment: Presentation (20%), project (50%) and coursework (30%).

The project work is conducted in teams, and the assessment is based on a collective group mark for each component except in exceptional circumstances.

1. Presentation (20%) on the final day of the module.
2. Policy memo (50%), summarising the proposal for the relevant minister, which incorporates the feedback from the presentation, due three weeks after the module (1500 words).
3. Two standard-length newspaper articles (30%), due three weeks after the module.

In the two articles (500 words each), the students should consider how their policy proposal would be reported in two different media outlets.

PP4G8E Half Unit Introduction to Public Policy (EMPA)

This information is for the 2024/25 session.

Teacher responsible: Professor Daniel Berliner

Availability: This course is compulsory on the Executive Master of Public Administration. This course is not available as an outside option.

Course content: This module provides a foundational introduction to social-scientific inquiry, economics, and political science and their application to public policy. Topics covered include: why policymaking benefits from adopting a social-scientific approach; the policy cycle; institutions and incentives; markets and market failures; and linking theory to practical policy making.

Teaching: A two-day modular teaching block.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance may be permitted in exceptional circumstances.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.

Assessment: Essay (100%, 2000 words).

Assessment will consist of a 2,000 word essay. Essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

PP4G9E Half Unit Public Policy in Practice Workshop I (EMPA)

This information is for the 2024/25 session.

Teacher responsible: Professor Daniel Berliner

Availability: This course is compulsory on the Executive Master of Public Administration. This course is not available as an outside option.

Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPA to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by

the students and presentations by policy practitioners involved in the policy area.

Teaching: A three-day modular teaching block. This course is delivered as a combination of classes and lectures delivered over three days.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.

Assessment: Essay (100%, 3000 words).

Assessment will consist of a 3,000 word essay. Essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA programme induction.

PP4J1E Half Unit

Introduction to Public Policy (EMPP)

This information is for the 2024/25 session.

Teacher responsible: Professor Daniel Berliner

Availability: This course is compulsory on the Executive Master of Public Policy. This course is not available as an outside option.

Course content: This module provides a foundational introduction to social-scientific inquiry, economics, and political science and their application to public policy. Topics covered include: why policymaking benefits from adopting a social-scientific approach; the policy cycle; institutions and incentives; markets and market failures; and linking theory to practical policy making.

Teaching: A two-day modular teaching block. This course is delivered as a combination of classes and lectures delivered over two days.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance may be permitted in exceptional circumstances.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.

Assessment: Essay (100%, 2000 words).

Assessment will consist of a 2,000 word essay. Essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPP programme induction.

PP4J2E Half Unit

Public Policy in Practice Workshop I (EMPP)

This information is for the 2024/25 session.

Teacher responsible: Professor Daniel Berliner

Availability: This course is compulsory on the Executive Master of Public Policy. This course is not available as an outside option.

Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPP to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.

Teaching: A three-day modular teaching block. This course is delivered as a combination of classes and lectures delivered over three days.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.

Assessment: Essay (100%, 3000 words).

Assessment will consist of a 3,000 word essay. Essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPP programme induction.

PP4J3E Half Unit

Public Policy in Practice Workshop III (EMPP)

This information is for the 2024/25 session.

Teacher responsible: Professor Daniel Berliner

Availability: This course is compulsory on the Executive Master of Public Policy. This course is not available as an outside option.

Course content: The policy workshop applies the analytical tools that are taught in the week-long modules of the Executive MPP to specific policy areas. Teaching is based on a series of case studies. The case studies are taught by specialists in a particular policy area and are complemented with group working sessions by the students and presentations by policy practitioners involved in the policy area.

Teaching: A three-day modular teaching block. This course is delivered as a combination of classes and lectures delivered over three days.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Indicative reading: Readings that are specific to each policy area will be distributed at the beginning of the course.

Assessment: Essay (100%, 2000 words).

Assessment will consist of a 2,000 word reflective essay. Further details will be provided at the Executive MPP programme induction.

PP4J5E Half Unit

Fiscal Governance and Budgeting

This information is for the 2024/25 session.

Teacher responsible: Dr Joachim Wehner

Dr Paolo de Renzio

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no pre-requisites, but recommended advance reading is given below.

Course content: The course examines contemporary issues in fiscal governance and public budgeting in OECD countries and elsewhere. The focus is on executive and legislative actors and the institutional structures within which they make budgetary choices. Following an introduction to theoretical approaches to the study of budgeting, topics include medium-term frameworks, top-down budgeting, fiscal rules and fiscal councils, performance budgeting, legislative budgeting, fiscal decentralisation, budget transparency, audit and accountability.

Teaching: A one-week modular teaching block. This course is delivered through a combination of classes and lectures delivered in one week.

The default mode of instruction is in-person in the classroom at LSE. Remote attendance is available in case of challenges preventing in-person attendance.

Formative coursework: One mock examination opportunity will be provided.

Indicative reading: Fiscal Governance in Europe by Mark Hallerberg, Rolf Strauch and Jürgen von Hagen (Cambridge University Press, 2009) introduces an important theoretical approach and is a good reference for several topics. The OECD Journal on Budgeting <http://www.oecd.org/gov/budget/journal> discusses current issues in applied budgeting. A full reading list will be distributed at the beginning of the course.

Assessment: Essay (50%, 2000 words) and online assessment (50%).

Online assessments take place on the third weekend after the module teaching concludes. Assessed essays are due on the sixth Sunday after module teaching concludes. Further details will be provided at the Executive MPA/ Executive MPP programme inductions.

PP4V8E Half Unit

Policy Paper

This information is for the 2024/25 session.

Teacher responsible: Professor Daniel Berliner

Participating students will be assigned an academic supervisor with relevant knowledge of the topic and supervision experience.

Availability: This course is available on the Executive Master of Public Administration and Executive Master of Public Policy. This course is not available as an outside option.

Pre-requisites: There are no formal pre-requisites but the course is only available by prior agreement with the Executive MPA and Executive MPP Programme Directors.

Course content: The aim of the course is to enable students to plan, design and conduct independent analysis in an area of public policy. Executive MPA/ EMPP students will write an individually-authored policy paper of no more than 6,000 words on a topic developed in consultation with an Academic Adviser. The paper will analyse a concrete policy problem in a specific setting and propose an evidence-based solution or course of amelioration. It must be addressed to a non-academic audience and should be clearly and directly written, suitable for consideration by policy-makers. The main body of the paper should include methodology, results of the analysis, discussion of different policy options, conclusions and policy recommendations. The policy paper must be accompanied by an Executive Summary. Policy papers can utilise quantitative and/or qualitative data and draw on secondary and/or primary research.

Teaching: The student's Academic Adviser will provide advice and guidance on this piece of work as required during the duration of the assessment.

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT, WT and ST.

A policy paper proposal (of no more than 750 words in total) consisting of the title, abstract, research question, justification for analysis, feasibility of the topic, an explanation of sources, structure and analytical framework must be submitted well in advance of the assessment deadline. Students may only change their topic thereafter with the agreement of the Academic Adviser/ Programme Directors. Students will be given feedback on their proposal.

Indicative reading: A suitable programme of reading will be developed in consultation with the Academic Adviser. Useful background readings may include:

- Eugene Bardach, *A Practical Guide for Policy Analysis: The Eightfold Path to More Effective Problem Solving*, 4th ed. (CQ Press, 2012);
- Catherine F. Smith, *Writing Public Policy: A Practical Guide to Communicating in the Policy Making Process*, 3rd ed. (Oxford University Press, 2012).
- Charles Lindblom and David K. Cohen, *Usable Knowledge: Social Science and Social Problem Solving* (Yale University Press, 1979).
- Philip E. Tetlock, *Expert Political Judgment: How Good Is It? How Can We Know?* (Princeton University Press, 2006).

Assessment: Policy paper (100%) in the AT, WT and ST.

- 6,000 word policy paper

SO4A8E Half Unit

Leadership and Social Change

This information is for the 2024/25 session.

Teacher responsible: Dr George Kunnath (CBG 12.04)

Availability: This course is compulsory on the Postgraduate Certificate in Social and Economic Equity. This course is not available as an outside option.

Course content: The course responds to the needs of the AFSEE Fellows to develop critical skills and understandings of leadership within various contexts and themes indexed to transforming global inequality. This approach marries a structural analysis of global inequality and its manifestations with critical analysis, reflexive

thinking, as well as practical skills that will provide students with the tools to bring systemic change into being. Crucially, the course is heavily rooted in theories of practice, in which Fellows are introduced to and demonstrate a sound knowledge and critical appreciation of their field and its associated practice and research techniques, and show that these techniques can be successfully applied in revealing or challenging injustice and inequality. The course will consist of lectures, presentations, seminars and workshops. Lectures will introduce Fellows to key concepts, approaches and techniques for understanding and challenging inequality. Workshops and seminars will help Fellows clarify and deepen their understanding of points and issues raised in the lectures, through practical work carried out individually and in groups.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across WT and ST.

Week 1 – Reading Week of Winter Term - Leadership and Social Change

Week 2 – First Week after Spring Term - Leadership and Social Change

Teaching arrangements may be adjusted if online teaching is required at any point.

Formative coursework: There will be one piece of formative coursework, a 750 word essay outline for their policy report in response to a set question. The formative outline will be due in week 10 of Winter Term. Fellows will receive written feedback on the essay outline and will have the opportunity to discuss the written feedback with the Course Convenor. This formative coursework is directly related to the summative essay which will be due in Spring Term.

S04E1E Half Unit

Foundations of Social and Economic Inequality

This information is for the 2024/25 session.

Teacher responsible: Dr George Kunnath (CBG 12.04) and Prof Armine Ishkanian (CBG 12.06)

Availability: This course is compulsory on the Postgraduate Certificate in Social and Economic Equity. This course is not available as an outside option.

This course is only available to Atlantic Fellows for Social and Economic Equities who are enrolled in the Postgraduate Certificate in Social and Economic Equity.

Course content: This course focuses on the foundations of social and economic equity – ‘foundations’ here means both historical foundations of these inequalities (including colonisation and post-colonial moments) as well as foundation understandings of what are inequalities.

The course considers the histories & legacies of inequalities and how these shape current realities, including issues around racial capitalism and the impacts of wealth inequalities. This historical (historiographical) look at inequalities then leads to an analysis of the approaches to defining & measuring inequality; the impacts of wealth inequality; and alternative economic models that can influence both how we understand inequalities and how we enact change to alleviate inequalities.

Specifically, course starts an overview lecture focusing on inequalities, power, and intersectionality. It moves onto a historical analysis – specifically looking at how the historical legacies of plantation shape and produce income and wealth inequalities in the present. This leads analysis of wealth inequalities (as opposed to income inequalities), its consequences, and how it can be tackled. The course uses racial capitalism to understand the links between the historical legacies of slavery and the contemporary issues of global wealth inequalities. At this point, the course moves to a more economic understanding of inequalities. It introduces students to an analysis of income inequalities and how these are measured in orthodox economics. From there, the course critically engages with alternative economic perspectives and how they shift the understandings of economic inequalities – this includes degrowth, heterodox, and feminist economics. The aim is to offer a broad understandings of the debates across ways of understanding economic inequalities that students can use in understanding specific contextual issues.

Aside from lectures and seminars, the course also includes additional learning events: a City of London Inequalities Walk and an LSE Inequalities Scavenger Hunt. The first links to the study of wealth inequalities as students understand how the geography and wealth in the city of London today links to colonial histories. The second brings the study of inequalities to the LSE, where students, through clues, discover LSE's own history in both maintain and challenging inequalities – the hunt is followed by a seminar where students link what they have been learning in the course to LSE's history as an academic institution.

Finally, the course hosts a roundtable with alumni of the programme who work in areas of economic change (through policy advocacy, national government, or social movements). This links theoretical concepts presented in the course to professional practice.

Teaching: 31 hours and 30 minutes of classes in the AT. This course will consist of approximately 30 hours of class teaching hours – including workshops, lectures, seminars, roundtables, and creative learning spaces over the course of nine days of intensive teaching. This will take place in the first full two weeks of September, prior to the beginning of Autumn Term.

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT.

In week 4 of AT, students will submit a 300-word blog summary stating what they hope to write about in their summative blog post along with a 200-word outline of the post.

Indicative reading:

- GOSH, J., 2021. ‘Women in (Recognized) Work: Feminist Economics’, Lecture given to *New Economic Thinking*, available here: <https://www.youtube.com/watch?v=-l9yiFaFme8>

Assessment: Blog post (50%) in the AT Week 7.

Presentation (50%) in the WT Week 6.

The power-mapping and presentation is an assessment of both the powermap in-and-of itself and of the presentation where students are asked to explain the analysis used to make the power-map.

S04E2E

PGCert in Social and Economic Equity: Independent Project

This information is for the 2024/25 session.

Teacher responsible: Dr George Kunnath (CBG 12.04)

Availability: This course is compulsory on the Postgraduate Certificate in Social and Economic Equity. This course is not available as an outside option.

This course is only available to students doing the Postgraduate Certificate in Social and Economic Equity.

Course content: This course is to support the independent research project that students on the PGCertification in Social and Economic Equity complete as a part of the programme. The purpose of the project is for students to conduct an independent research project that integrates reflections on the learning they have undergone throughout programme year and applying it to a piece of practitioner-based research. This research is informed by particular theories in addressing social and/or economic inequalities within researcher in/on/about a particular professional practice in a particular context. The final output project must speak to a particular audience – an audience that could use the finding from the research to of the can take the form of an action research extended essay, a report with policy recommendations, a podcast mini-series, a short documentary, or an e-zine.

Teaching: 2 hours and 30 minutes of workshops in the AT. 2 hours and 30 minutes of workshops in the WT. 3 hours of workshops in the ST.

This course is to support the independent research project that students on the PGCertification in Social and Economic Equity complete as a part of the programme. The purpose of the project is for students to conduct an independent research project that integrates reflections on the learning they have undergone throughout programme year and applying it to a piece of practitioner-based research.

This research is informed by particular theories in addressing social and/or economic inequalities within researcher in/on/about a particular professional practice in a particular context. The final output project must speak to a particular audience. Outputs include:

- A policy report with recommendations (8000 words max)

- A draft of an academic article (8000 words max)
- A video documentary (45 minutes) + a literature review / reflection (2500 words)
- A podcast mini-series (3 episodes, each at least 20 minutes long) + a literature review / reflection (2500 words)
- A training handbook for practitioners drawing on research findings (8000 words max)
- An e-zine made up of a series of short articles / blogs presenting the research and / or graphic art, making arguments for action, etc (total 8000-words max across the articles)

This course consists of 8 hours of seminars, held throughout the academic year. There are 2.5 hours face-to-face during the first two weeks of September, which focus on project proposals.

Then, in Winter Term, there are an additional 2.5 hours focused on ethical thinking and reflexivity (and preparing ethical review forms) This will be online because students on this programme are 1) part-time, and 2) distanced. Therefore, they are not in London during this time.

The remaining 3 hours are in Spring Term (final week), face-to-face, and it will focus on discussions around the practical implications of conducting research on social change focused on practice.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

The formative assessment is a 1500 proposal for the research which is due week 0 of Winter Term.

Indicative reading:

- Tuhiwai Smith, L. (2008) *Decolonizing Methodologies: Research and Indigenous Peoples* 2nd edition. New York: Zed Books Ltd.

- Campbell, A. & Groundwater-Smith, S. (2007) *An Ethical Approach to Practitioner Research: Dealing with Issues and Dilemmas in Action Research*. New York: Routledge.
- Gaventa, J. & Cornwall, A. (2006) 'Challenging the Boundaries of the Possible: Participation, Knowledge and Power', *IDS Bulletin*, 3,6, pp. 122-128.
- Bradbury, H. (2015) *The SAGE Handbook of Action Research*, 3rd edition. Sage. Specifically, the following chapters:
1 'Chapter 36: Praxis – Retrieving the Roots of Action Research' by Olav Eikeland
2 'Chapter 47: Knowledge, Democracy, Community-based Action Research, the Global South and the Excluded Global North' by George Ladaah Openjuru, Namrata Jaitli, Rajesh Tandon, & Budd Hall
3 'Chapter 70: Radical Epistemology as Caffeine for Social Change' by Alfredo Ortiz Aragon & Juan Giles Macedo

Assessment: Research project (100%) in August.

The summative assessment is a project output (100% of final mark). The output can be:

- A policy report with recommendations (8000 words max)
- A draft of an academic article (8000 words max)
- A video documentary (45 minutes) + a literature review / reflection (2500 words)
- A podcast mini-series (3 episodes, each at least 20 minutes long) + a literature review / reflection (2500 words)
- A training handbook for practitioners drawing on research findings (8000 words max)
- An e-zine made up of a series of short articles / blogs presenting the research and / or graphic art, making arguments for action, etc (total 8000 words max across the articles)

MRes/PhD Programme Regulations

Key to Regulations

(H) means a half-unit course

(AT) means Autumn Term

(WT) means Winter Term

(ST) means Spring Term

MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track)

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Programme Structure - MRes

Programme code: TMRESAC1

Department: Accounting

For students starting this programme of study in 2024/25

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Training courses

Compulsory (examined):

Paper 1 AC502 Foundations of Accounting, Organisations and Institutions (0.5)

And

MY500 Fundamentals of Social Science Research Design (0.5)

Paper 2 MY551A Introduction to Quantitative Analysis (0.5)

Or

MY551W Introduction to Quantitative Analysis (0.5)

And one of the following 0.5 unit(s):

MY521 A Qualitative Research Methods (0.5)

MY521 W Qualitative Research Methods (0.5)

MY526 Doing Ethnography (0.5) #

MY528 Qualitative Text and Discourse Analysis (0.5) #

Depending on previous methods training students have undertaken, they are allowed to replace one or all of the required methods courses listed under Paper 2 with more advanced methods courses. Should a student, for instance, have had previous training in quantitative methods to the level taught in MY551, the student will be asked to replace that course with a more advanced course in quantitative methods, such as MY552 (Applied Regression Analysis).

Paper 3 Courses to the value of 1.0 unit from the following:

AC411 Accounting, Strategy and Control (0.5)

AC470 Accounting in the Global Economy (0.5) #

EH429 History of Economics: Ideas, Policy and Performativity (0.5)

EH430 Monetary and Financial History (1.0) # (not available 2024/25)

EH463 The Long-Run Analysis of Firms and Industries (0.5)

SO470 The Sociology of Markets (0.5) (not available 2024/25)

Any other graduate or research-level course available in the School with permission from the lead supervisor and doctoral programme director.

Training Courses

Compulsory (not examined):

AC500 Topics in Accounting Research (AOI) (0.0) examined in Year 2 of the MRes (as AC504)

Transferable skills

Compulsory (not examined):

Department of Accounting Research Forums (ARF's)
Accounting, Organisations and Institutions Research

Seminars and Workshops

Year 2

Training Courses

Compulsory (examined):

Paper 4 AC504 Topics in Accounting Research (AOI) (1.0)

Paper 5 AC599 Research Paper in Accounting (1.0)

*The AC599 Research Paper must be 6000-8000 words in length

Paper 6 Courses to the value of 1.0 units in relevant fields, including more specialised methods training, if not taken above, such as:

MY526 Doing Ethnography (0.5) #

MY528 Qualitative Text and Discourse Analysis (0.5) #

Any other graduate or research-level course available in the School with permission from the lead supervisor and doctoral programme director.

Transferable skills

Compulsory (not examined):

AC507 Accounting Work in Progress Seminars (0.0)

*AC507 Presentation requirements: AOI/EoA joint seminars. Students are required to present their work in progress within AC507 (Seminar in Accounting) in the second year.

Department of Accounting Research Forums (ARF's):
Accounting, Organisations and Institutions Research
Seminars and Workshops

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course.

Please view the course guide for more information.

Progression to Year 2 of the MRes in Accounting

In order to progress unconditionally from the first to the second year of MRes registration students are required to achieve pass marks of 50% or higher in papers 1, 2 and 3. With the permission of the MRes Programme Director, students missing the overall progression requirement by one paper may proceed to the second year but will subsequently need to re-sit and pass the paper to the necessary standard. Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before progression to the second year can be permitted. Re-sits must be taken during the next available resit period.

Award of the MRes

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Master's Degree.

The mark of Paper 5 (Research paper) and the highest marks to the value of 4 course units out of the remaining 5 course units taken will be used to determine the degree classification. Students are required to achieve a pass mark of 50% in Paper 5 (Research paper). A fail in one of the remaining four marks used for classification (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper, or an aggregate mark of 440 in the non-failed papers. If compensated, a fail shall result in a drop in the overall award classification where a Distinction or Merit would otherwise have been awarded. It shall have no further impact where a Pass is to be awarded.

An award cannot be made where the student receives a bad fail in any mark, even if it is not being used for the calculation of an award. Where a student receives a bad Fail mark they must resit on one occasion only in order to be considered as eligible for award of the degree.

Progression to PhD registration

For progression to PhD registration, students are required to achieve marks of 50% or higher in Papers 1, 2, and 3, marks of 60% or higher in Paper 6 (50% or higher if Paper 6 is an MRes/PhD research course in another department, e.g. Finance or Economics) and marks of

65% or higher in Papers 4 and 5.

Students missing the overall progression requirement by one paper are permitted to provisionally progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students failing two papers may **exceptionally** be permitted to provisionally progress to PhD registration when they miss the progression requirement by 3 marks or less in each paper (with permission from the Doctoral Programme Director and MRes Accounting Sub-Board of Examiners) but will subsequently need to re-sit and pass these papers to the necessary standard to continue their PhD registration. Students failing to meet the progression requirements for more than 2 full units will need to re-sit and pass these papers to the necessary standard before continuing to PhD registration.

Should students not meet the progression requirements for Paper 5 (AC599), they will be asked to revise and resubmit their research paper within 3 months of having received their grade which will count as a re-sit attempt. Papers 4 and 6 must be retaken during the next available resit period.

Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach the required standard at resit.

The MRes Accounting Sub-Board of Examiners will meet twice: in late June/early July to receive and confirm the summer examination marks and to make progression decisions in relation to these; and in September to receive and confirm the AC599 marks and to make progression decisions in relation to these.

Programme Structure - PhD

Programme code: RPAC3

From Year 3 onwards
(if upgraded to PhD)

Training courses

Compulsory (not examined):

AC500 Topics in Accounting Research (AOI) (0.0) examined in Year 2 of the MRes (as AC504)

Transferable skills

Compulsory (not examined):

AC507 Accounting Work in Progress Seminars (0.0) Department of Accounting Research Forums (ARFs) Accounting, Organisations and Institutions Research Seminars and Workshops

*AC507 Presentation requirements: AOI/EoA joint seminars. Students are required to present their work in progress within AC507 (Seminar in Accounting) in each of the years of their degree, starting in year 2.

Progression during PhD registration

Throughout the PhD registration, progression is monitored via bi-annual progress reviews by the departmental Research Student Assessment Review Committee. The Committee meets each year in January to assess a student's progress mid-year progress and in June to assess a student's end-of-year progress and make decisions on continued registration/de-registration. During their second year of the PhD, students will undergo a 'mid-term review'. As part of the mid-term review, students have to submit a solid draft of one complete core chapter, a less developed draft of one further core chapter, as well as a detailed outline for the rest of the PhD thesis with a timeline for completion. Students will be provided with an opportunity to defend their submitted written materials orally. The materials will

be reviewed by a Departmental Review Committee which will consist of the supervisory team and one internal reviewer drawn from the Department, who has not been involved in the supervision of the student. Students need to pass the 'mid-term review' to progress to the third year of their PhD studies.

The School allows students to submit their thesis in one of two formats:

- 1 a monograph that forms an integrated whole; or
- 2 a series of at least 3 papers

Students should liaise with their supervisor for advice on the format of their thesis and refer to the Regulations for Research Degrees for further details.

The Department of Accounting requires a paper-based thesis to contain at least 3 separate papers, one of which must be solo authored.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MRes/PhD in Accounting (EoA) (Economics of Accounting Track)

Programme Structure - MRes

Programme code: TMRESAC2

Department: Accounting

For students starting this programme of study in 2024/25

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Introductory Course

Students are required to attend the following before commencing the MRes/PhD programme:

EC400 Introductory Course in Mathematics and Statistics (0.0) #

Training courses

Compulsory (examined):

- | | | |
|---------|-------|-----------------------------|
| Paper 1 | EC411 | Microeconomics (1.0) # |
| Paper 2 | EC402 | Econometrics (1.0) # |
| Paper 3 | FM436 | Financial Economics (1.0) # |

Training courses

Compulsory (not examined):

AC506 Topics in Accounting Research (EoA) (0.0) (not available 2024/25) examined in Year 2 of the MRes (as AC501)

Transferable Skills

Compulsory (not examined):

Department of Accounting Research Forums (ARFs) Economics of Accounting Research Seminars and Workshops

Year 2

Training Courses

Compulsory (examined):

- | | | |
|---------|-------|--|
| Paper 4 | AC501 | Topics in Accounting Research (EoA) (1.0) (not available 2024/25) |
| Paper 5 | AC599 | Research Paper in Accounting (1.0)
*The AC599 Research Paper must be 6000-8000 words in length |
| Paper 6 | | Courses to the value of 1.0 unit in relevant fields, including:
FM502 Corporate Finance for Research Students (1.0) |

Any other graduate or research-level course available in the School with permission from the lead supervisor and doctoral programme director.

Transferable Skills

Compulsory (not examined):

AC507 Accounting Work in Progress Seminars (0.0)
Department of Accounting Research Forums (ARFs)
Economics of Accounting Research Seminars and Workshops

*AC507 Presentation requirements: AOI/EoA joint seminars. Students are required to present their work in progress within AC507 (Seminar in Accounting) in each of the years of their degree, starting in Year 2.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Progression to Year 2 of the MRes in Accounting

MRes/PhD in Anthropology

Programme Structure - MRes

Programme code: TMRESAN

Department: Anthropology

For students starting this programme of study in 2024/25

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Paper 1	AN471	Qualitative and Quantitative Methods for Anthropologists (1.0)
Paper 2	AN472	Evidence and Arguments in Anthropology and Other Social Sciences (1.0)
Paper 3	AN442	Supervised Reading Course and Fieldwork Preparation (1.0)
Paper 4	AN443	Research Proposal (1.0)
In addition students are required to complete the following courses, which are compulsory but not examined:		
Paper 5	AN500	Seminar on Anthropological Research (0.0)
Paper 6	All MRes students are required to audit one or two of the department's main lecture courses (to the value of 1.0 unit):	
	AN402	The Anthropology of Religion (1.0)
	AN405	The Anthropology of Kinship, Sex and Gender (1.0)
	AN451	Anthropology of Politics (0.5)
	AN456	Anthropology of Economy (1): Production and Exchange (0.5)
	AN457	Anthropology of Economy (2): Transformation and Globalisation (0.5)
	AN479	Anthropology of Law (0.5)

Award of the MRes in Anthropology

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree. The marks for AN471 and AN472 will count respectively as 25% of the total mark for the year. The research proposal, worth 50% of the total mark for the MRes year, will be examined (and the examination includes a viva). In order to be upgraded to PhD registration and allowed to commence fieldwork, students (a) must earn an average of 60 or more across all units; (b) must earn a minimum mark of 60 on the research proposal.

Progression to the PhD

If the above MRes requirements are met, students will be upgraded to PhD registration and will commence the fieldwork phase of the programme. The mandatory first year progress review of PhD students will be based on written reports about the early phase of fieldwork. The mandatory third year progress review for students in Anthropology is held in the third term (or, exceptionally, in the fourth term) after their return from fieldwork; this entails a viva with both supervisors and one external examiner.

Programme Structure - PhD

Programme code: RPAN2

In the programme regulations below Years 1 and 2 are listed as "fieldwork", with Years 3 and 4 being post-fieldwork, although in practice the timing/duration of these stages may vary to some extent between students.

Year 1 - Fieldwork

Year 2 - Fieldwork

Year 3

Paper 1	AN505	Advanced Professional Development in Anthropology (1.0)
Papers 2 & 3	Compulsory non-examined courses:	
	AN500	Seminar on Anthropological Research (0.0)
	AN503	Thesis Writing Seminar (0.0)

Year 4

Papers 4 & 5	Compulsory non-examined courses:	
	AN500	Seminar on Anthropological Research (0.0)
	AN503	Thesis Writing Seminar (0.0)

Local rules

The only permitted format for theses in the Department of Anthropology is that of a monograph that forms an integrated whole.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MRes/PhD in Economics

A PhD in Economics consists of two years of coursework, followed by a thesis which is expected to take three years. The coursework requirement involves three PhD-level core courses in microeconomics, macroeconomics and econometrics, three field courses and a supervised research paper.

Programme Structure - MRes

Programme code: TMRESEC

Department: Economics

For students starting this programme of study in 2024/25

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

First Year MRes

Introductory course

All students are required to attend the following introductory course in Year 1:

EC400	Introductory Course in Mathematics and Statistics (0.0) #
-------	---

Students are required to take the following MRes core courses:

Paper 1	EC441	Microeconomics for MRes students (1.0) #
Paper 2	EC442	Macroeconomics for MRes students (1.0)
Paper 3	EC443	Econometrics for MRes students (1.0) # or
	EC484	Econometric Analysis (1.0) #*A

Students who have completed EC484 to the required standard as part of their MSc do not have to take the course again. To substitute for EC484, students will take one unit from the following Field Selection List. The EC484 mark will be carried forward to count as the Paper 3 mark for progression to PhD registration. It will not count towards the award of the MRes degree:

Field Selection List

Second year or higher MRes

Students are required to take:

Paper 4 EC599 Research Paper in Economics (1.0) B
Papers 5

& 6 Courses to the value of 2.0 unit(s) from the following:
Field Selection List

Students are required to attend:

A. The following seminar where they must present their research:

EC501 Work in Progress Seminars (0.0)

B. The weekly departmental seminar series closest to their major field.

Field Selection List

- EC541 Topics in Advanced Econometrics for Research Students I (0.5)
- EC542 Topics in Advanced Econometrics for Research Students II (0.5)
- EC543 International Economics for Research Students I (0.5)
- EC544 International Economics for Research Students II (0.5)
- EC545 Labour Economics for Research Students I (0.5)
- EC546 Labour Economics for Research Students II (0.5)
- EC547 Public Economics for Research Students I (0.5)
- EC548 Public Economics for Research Students II (0.5)
- EC549 Development Economics for Research Students I (0.5)
- EC550 Development Economics for Research Students II (0.5)
- EC551 Economics of Industry for Research Students I (0.5)
- EC552 Economics of Industry for Research Students II (0.5)
- EC553 Microeconomic Theory for Research Students I (0.5) #
- EC554 Microeconomic Theory for Research Students II (0.5) #
- EC555 Macroeconomics for Research Students I (0.5)
- EC556 Macroeconomics for Research Students II (0.5)
- EC557 Political Economy for Research Students I (0.5) #
- EC558 Political Economy for Research Students II (0.5) #
- EC559 Environmental Economics for Research Students I (0.5)
- EC560 Environmental Economics for Research Students II (0.5)

Prerequisite Requirements and Mutually Exclusive Options

* means available with permission

means there may be prerequisites for this course.

Please view the course guide for more information.

Footnotes

A: Permission must be obtained to sit EC484: it is intended for students with a strong econometric background and an interest in pursuing a PhD with econometrics as the primary field.

B: The EC599 Research Paper must be 5,000 - 10,000 words in length.

Programme Structure - PhD

Programme code: RPEC2

First year PhD Programme

Students who have been upgraded to PhD are required to work on their research and write a PhD thesis. In addition they are required to take:

Paper 7 Courses to the value of 1.0 unit(s) from the following:
Field Selection List

Students are also required to attend:

A. The following seminar where they must present their research:

EC501 Work in Progress Seminars (0.0)

B. The weekly departmental seminar series closest to their major field.

Students are required to work on their research and to write a PhD thesis.

Second and subsequent years PhD Programme

Students are required to attend:

A. The following seminar where they must present their research:

EC501 Work in Progress Seminars (0.0)

B. The weekly departmental seminar series closest to their major field.

Students are required to work on their research and to write a PhD thesis.

Field Selection List

- EC541 Topics in Advanced Econometrics for Research Students I (0.5)
- EC542 Topics in Advanced Econometrics for Research Students II (0.5)
- EC543 International Economics for Research Students I (0.5)
- EC544 International Economics for Research Students II (0.5)
- EC545 Labour Economics for Research Students I (0.5)
- EC546 Labour Economics for Research Students II (0.5)
- EC547 Public Economics for Research Students I (0.5)
- EC548 Public Economics for Research Students II (0.5)
- EC549 Development Economics for Research Students I (0.5)
- EC550 Development Economics for Research Students II (0.5)
- EC551 Economics of Industry for Research Students I (0.5)
- EC552 Economics of Industry for Research Students II (0.5)
- EC553 Microeconomic Theory for Research Students I (0.5) #
- EC554 Microeconomic Theory for Research Students II (0.5) #
- EC555 Macroeconomics for Research Students I (0.5)
- EC556 Macroeconomics for Research Students II (0.5)
- EC557 Political Economy for Research Students I (0.5) #
- EC558 Political Economy for Research Students II (0.5) #
- EC559 Environmental Economics for Research Students I (0.5)
- EC560 Environmental Economics for Research Students II (0.5)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course.

Please view the course guide for more information.

Progression to Year 2 of MRes in Economics

In order to progress unconditionally from the first to the second year of MRes registration, students are required to achieve pass marks of 50% or higher in Papers 1, 2 and 3. With the permission of the MRes Programme Director, students missing the overall progression requirement by one paper may proceed to the second year, but will subsequently need to re-sit and pass the paper to the necessary standard for the award of the MRes degree and for progression to PhD registration at the end of year 2. Students missing the progression requirement by more than one paper are required to

pass those papers to the necessary standard before progression to the second year can be permitted.

Timing of Paper 7

While Paper 7 will generally be taken after progression to the PhD, students who have successfully progressed to Year 2 of the MRes programme may be permitted, with the approval of the Doctoral Programme Director, to take one or both half units of Paper 7 in their second year. For students who have taken one or both units of Paper 7 in their second year the progression and award regulations are adjusted as follows:

MRes award - Students are required to achieve a pass mark of 50% in Papers 1, 2, 3, 4 and 50% or higher in courses to the value of 1.0 unit in courses taken from Papers 5, 6 and any courses taken towards paper 7. Fail marks in courses to the value of 1.0 unit (but not bad fails of 29% or less) can be compensated by 60% or higher in courses to the value of 1.0 unit.

Progression to PhD registration - For PhD registration students are required to achieve 60% or higher in courses to the value of 4.0 units and 50% or higher in courses to the value of 2.0 units in MRes Papers 1, 2, 3, 4, 5, 6 and any courses taken towards paper 7, with 60% or higher achieved in at least two of MRes core Papers 1, 2, and 3.

Progression to Year 2 of PhD for students who complete Paper 7 in Year 2 of the MRes – In order to progress to the second year of PhD students are required to obtain an aggregate score of at least 300 in the six half units for Papers 5-7, with no bad fails of 29% or less.

Award of the MRes in Economics

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Master's Degree. Students are required to achieve 50% or higher in Papers 1, 2, 3, 4 and in any two half units taken under Papers 5 or 6.

The eight classification marks from Papers 1 - 4 and further two highest marks (to the value of 1.0 unit) from Papers 5 or 6 will be used to determine the degree classification. Fail marks in courses to the value of 1.0 unit (but not bad fails of 29% or less) can be compensated by marks of 60% or higher in courses to the value of 1.0 unit, or an aggregate mark of 440 in the non-failed papers. Compensation shall result in a drop in the overall award classification where a Distinction or Merit would otherwise have been awarded. It shall have no further impact where a Pass is to be awarded.

Progression to PhD registration

For PhD registration students are required to achieve 60% or higher in courses to the value of 4.0 units and 50% or higher in courses to the value of 2.0 units across MRes Papers 1, 2, 3, 4, 5 and 6, with 60% or higher achieved in at least two of MRes core Papers 1, 2, and 3.

Condoning marks: A mark between 55 - 59% in one of the Papers 1, 2 or 3 can be condoned by a mark of 70% or higher in another from Papers 1, 2, 3 or from a mark of 70% or higher in Paper 4 (the EC599 research paper). Students missing the overall progression requirement in courses to the value of 1.0 unit are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the courses to the value of 1.0 unit to the necessary standard to continue their PhD registration. Students missing the progression requirement by more than one unit are required to pass the courses to the necessary standard before PhD registration can be permitted.

Students failing a paper or missing progression marks will have to retake the courses within one year of the initial assessment. In exceptional circumstances, the MRes/PhD Economics Examination sub-board can grant permission to a candidate to resit at the next available opportunity. Students can resit courses only once. Students registered for the PhD remain subject to

the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

A student can appeal against the Department's decision on progression to PhD according to the Appeals Regulations for Research Students <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/AppealsRegulationsForResearchStudents.pdf>.

Progression to Year 2 of PhD

In order to progress to the second year of PhD registration students are required to achieve an aggregate of at least 100 in the two half-units taken for Paper 7, with no bad fails of 29% or less.

Award of the PhD in Economics

Award of the PhD is contingent on progression requirements within the PhD and on the completion and defence of an original research thesis, in accordance with LSE regulations.

Special provisions for students who have completed an MSc degree within the Economics Department at LSE

Students who have completed EC484 to the required standard as part of their MSc do not have to take the course again. To substitute for EC484, students will take courses to the value of 1.0 unit from the Field Selection List. The EC484 mark will be carried forward to count as the Paper 3 mark for progression to PhD registration. It will not count towards the award of the MRes degree. With the approval of the Doctoral Programme Director, students who have completed an MSc degree within the Economics department at LSE will exceptionally be permitted to take their PhD qualifying field course (Paper 5) in the first year of the MRes.

Departmental Guidelines

The Department of Economics' guidelines state that a thesis can be either an integrated contribution or a series of distinct papers, provided that each paper advances the knowledge of the subject significantly and demonstrates originality and depth.

There is no minimum or maximum number of chapters for a thesis, but it should not exceed 100,000 words, including footnotes, but excluding bibliography and appendices.

Your thesis must meet the following criteria to be accepted for submission:

- It must consist of at least three substantive core chapters containing distinct research contributions. At least one of these core chapters should be single authored.
- The core chapters must demonstrate the capacity to do original research that meets professional standards of competence.
- It may contain some joint work, but we recommend that at least two chapters of the whole thesis should be single authored, in addition to at least one of the core chapters.
- It should review the literature in the area, but a literature review chapter does not count as a substantive contribution in its own right.

The thesis examiners will ultimately determine whether a thesis is acceptable. Your supervisor(s) will be able to give you the best advice on whether a paper is of suitable substance for a thesis chapter.

School Guidelines

In order to ensure that a thesis adheres to the School's regulations <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/>

Calendar/RegulationsForResearchDegrees.pdf (see page 4), you should also ensure that:

- The introduction chapter and a conclusion chapter interpret and critically evaluate the main findings in your own words;
- Jointly authored work is identified as such: you must clearly state your personal share in the investigation. The supervisor must certify this statement.
- Jointly authored work is introduced and interpreted in your own words.
- Outside editorial assistance for the thesis does not exceed the parameters outlined in the LSE's Statement on editorial help with a PhD thesis.
- Before you consider submitting your thesis, see the Regulations for Research Degrees in the Research section of the Calendar.

Editorial help with your thesis

You might wish to seek help from a third party in editing your thesis before you submit it for examination. You will need to read the School's Statement on Editorial Help <https://info.lse.ac.uk/current-students/phd-academy/assets/documents/StatementOnEditorialHelp.pdf>, provide a copy of it to any third party you use and declare what help you have received from a third party in the front pages of your thesis (see template for front pages of your thesis <https://info.lse.ac.uk/current-students/phd-academy/assets/documents/Template-for-Front-Pages-of-Thesis.pdf>).

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm](https://info.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm). Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm](https://info.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm).

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Progression

To progress unconditionally to registration on the Year 2 of MRes in Economics and Management students are required to achieve pass marks of 50% or higher in Papers 1, 2 and 3. With the agreement of the Department of Economics and the Programme Director, a student missing this requirement by one paper may be allowed to resit. Students are restricted to sitting a maximum of four exams, including resits and MG598 in Year 2. Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before progression to the second year can be permitted.

Award (students take 6 units of papers but the award is calculated on papers 1-5): At the end of the second year of the MRes, students may be awarded the classification of the MRes degree consistent with the School's Scheme for the Award of a five-unit Taught Master's Degree.

This mirrors the requirements of an award of MRes in Economics, that is students are required to achieve a pass mark of 50% in Papers 1, 2, 3, 4 and Paper 5. The marks in these papers will be used to calculate the overall award.

A fail in one of these five classification papers (but not a bad fail of 29% or less) can be compensated by a mark of 60% or higher in another paper, or an aggregate mark of 440 in the non-failed papers. If compensated, a fail shall result in a drop in the overall award classification where a Distinction or Merit would otherwise have been awarded. It shall have no further impact where a Pass is to be awarded.

Progression to PhD registration

To progress to PhD registration, students are required to achieve four marks of 60% or higher and two marks of 50% or higher in MRes Papers 1, 2, 3, 4, 5, 6 with at least two of the 60% or higher marks achieved in the MRes core Papers 1, 2 and 3. For Paper 6 if two half units are taken to fulfil the one unit requirement, then students must achieve a mark of 50% or higher in each 0.5 unit. For progression, the average of the two 0.5 unit course marks will be taken for Paper 6 will be used as the achieved mark.

Condoning marks: A mark between 55-59% in one of the Papers 1, 2 or 3 can be condoned by a mark of +70% in

either Papers 1, 2 or 3. A mark between 50 - 59% in one of the Papers 1, 2 or 3 can be condoned by a mark of +70% in the MG598 research paper.

Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration within one year of the original examination. In exceptional circumstances, the Graduate Studies Sub-Committee can grant permission to a candidate to resit a paper at the next available opportunity. Students can resit each paper only once.

At the end of Year 2 there will be an Annual Progress Review to confirm the successful completion of second year course work with marks meeting the required standards, the quality and contribution of MG598 paper and satisfaction with progress and participation in the programme. Recommendation for registration to the PhD programme by the DoM PhD Committee for the following year will be based on the successful completion of the previous year, and on the expectation of the student will achieve the marks required in any resit exams.

PhD Progression

In the first year of the PhD programme (Year 3 of registration) students must complete courses to the value of one unit in either Economics or Management (Paper 7). They must achieve a grade of 50% in this 1 unit or both 0.5 units.

Students must also pass the PhD Review, during Year 3 of registration and defend their research design in viva voce. The students submit a research proposal that includes:

- 1) the research question(s);
- 2) a concise literature review through which the significance of the proposed research is articulated;
- 3) a discussion of research methodology;
- 4) a draft timeline of activity;
- 5) preliminary data collection and analysis or a 'pilot' study; and
- 6) discussion of research ethics and risks.

This material is evaluated by the academic assessors in two independently written reports submitted prior to a viva voce with the supervisor(s). The outcome of the review will be reported to the Department's PhD Committee at the next opportunity.

PhD progression, completion and submission

After passing the PhD Review students are expected to focus on the research and writing of their thesis, the continued development of research ideas for publication, participation in relevant training courses and career development activities. Each year the PhD progression will be on the recommendation of the annual review panel and agreed by the Department's PhD committee.

Rules for the composition and content of theses within this programme

There are two formats of PhD Examination in the Department of Management. These align with those set out in Regulation 48 of the Regulations for Research Degrees <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForResearchDegrees.pdf> that provide for two different formats of PhD submission/examination to be followed, as appropriate, according to the normal practice in your field.

The two formats approved by the Department of Management and applicable to this programme are:

1. A monographic thesis addressing a single subject in an integrated way.

Or

2. A set of publishable papers on a set of related topics within the context framed by an introductory

and concluding chapter, and adhering to the following guidance:

- An introduction to explain the justification for the research question and articulate the links between the papers.
- Papers may be written with others/co-authored. Candidates may find it helpful to use CRediT taxonomy to define their contribution and evaluate if their contribution to a paper is sufficient to warrant inclusion in their thesis.
- The candidate must solely write the introduction, all linking material and the discussion.
- A minimum of 3 papers. This is a standard number in the paper by thesis format, but it is up to the candidate to decide how many papers to include, considering the advice of their supervisor and the normal practice in their field of study.

Within Management the norms between fields are variable, and therefore it is important to understand this and discuss the practices and examination norms and how best to meet the expectations and requirements of the job market in your field with your supervisor and the Programme Director. The composition of your thesis should be discussed and agreed with your supervisor and the Programme Director.

Award of the PhD in Economics and Management

Award of the PhD is contingent on progression requirements within the PhD and on the completion and defence of an original research thesis, in accordance with LSE regulations.

MRes/PhD in Finance

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Programme Structure - MRes

Programme code: TMRESF1

Department: Finance

For students starting this programme of study in 2024/25

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Introductory course

Students are required to attend the following before commencing the MRes/PhD programme:

EC400 Introductory Course in Mathematics and Statistics (0.0) #

Training courses

Compulsory (examined):

- | | | |
|---------|-------|--|
| Paper 1 | EC441 | Microeconomics for MRes students (1.0) # |
| Paper 2 | EC442 | Macroeconomics for MRes students (1.0) |
| Paper 3 | EC443 | Econometrics for MRes students (1.0) # |

Transferable skills courses

Compulsory (not examined):

A. FM436 Financial Economics (1.0) #

B. Capital Markets Workshop

Optional (not examined):

- C. Workshop in Information Literacy: finding, managing and organising published research and data
- D. Any relevant seminars in related areas.

Year 2

Training courses

Compulsory (examined):

- | | | |
|---------|-------|---|
| Paper 4 | FM502 | Corporate Finance for Research Students (1.0) |
| Paper 5 | FM503 | Asset Pricing for Research Students (1.0) |
| Paper 6 | FM482 | Research paper in Finance (1.0) A |

Transferable skills courses

Compulsory (not examined):

A. FM505 PhD Seminar in Finance (1.0) B

B. Capital Markets Workshop

Optional (not examined):

C. Any relevant seminars in related areas.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course.

Please view the course guide for more information.

Footnotes

A: The FM482 Research Paper must be 6,000 - 8,000 words in length.

B: Presentation requirements: Students are required to do an FM505 seminar presentation in the second year.

Programme Structure - PhD

Programme code: RPF12

Year 3

(if upgraded to PhD)

Training courses

Compulsory (examined):

Paper 7 FM505 PhD Seminar in Finance (1.0) A

Transferable skills courses

Compulsory (not examined):

A. Capital Markets Workshop

Footnotes

A: Students need to pass Paper 7 with a mark of 65% or higher.

Progression and upgrade requirements

In order to progress unconditionally from the first to the second year of MRes registration students are required to achieve pass marks of 50% or higher in papers 1, 2 and 3. Students who do not attain this standard may proceed to the second year with up to two resit papers, only with the permission of the MRes Programme Director, with the restriction that they can sit a maximum of four exams in year 2, which must be the two resits, either paper 4 or 5, and paper 6.

Award of the MRes in Finance

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a five-unit Taught Masters Degree. Students are required to achieve a pass mark of 50% in 5 of full-unit papers, which must include Paper 6 (Research paper) and four papers from Papers 1, 2, 3, 4, and 5. One failed paper (but not a bad fail of 29% or less) can be compensated by a mark of 55% or higher in another paper.

Progression to PhD registration

For PhD registration students are required to achieve marks of 50% or higher in Papers 1, 2, and 3, marks of 60% or higher in papers 4 and 5 and a mark of 65% or higher in Paper 6.

Students missing the overall progression requirement by one paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students missing the progression requirement by more than one paper are required to pass those papers to the necessary standard before PhD registration can be permitted.

Throughout the coursework portion of the MRes or MRes/PhD programme, students failing a paper or missing a progression mark will have to retake that paper within one year of the original examination. Students can resit each paper only once. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students who have been permitted to progress onto the PhD without satisfying the complete progression standard will have their PhD registration discontinued if they fail to reach this standard at re-sit.

A **finance thesis** should normally consist of a series of

at least three papers with one paper being solo-authored and it is expected that the papers be of publishable quality.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MRes/PhD in International Development

Programme Structure - MRes

Programme code: TMRESDV

Department: International Development

For students starting this programme of study in 2024/25

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Compulsory courses

1. DV501 Development History, Theory and Policy for Research Students (0.5)
2. DV502 Research Design in International Development (1.0)
3. Methodology course choice to the value of one full unit (at the 400 and 500 level). Course choices must be approved by the supervisor and Doctoral Programme Director.

4. Methodology or Theory course choice to the value of 0.5 units (at the 400 and 500 level). Courses may be chosen from the list of optional courses below or an unlisted course. Course choices must be approved by the supervisor and Doctoral Programme Director.

5. DV510 Research Design and Proposal in International Development (1.0)

Optional courses

6. The following courses are recommended options under Paper 4 above:

- DV507 Poverty (0.5)
- DV513 Environmental Problems and Development Interventions (0.5)
- DV515 Global Environmental Governance (0.5) (not available 2024/25)
- DV518 African Development (0.5)
- DV520 Complex Emergencies (0.5)
- DV524 International Institutions and Late Development (0.5) (not available 2024/25)
- DV528 Managing Humanitarianism (0.5)
- DV532 China in Developmental Perspective (0.5) (not available 2024/25)
- DV533 The Informal Economy and Development (0.5) (not available 2024/25)
- DV545 Research Themes in International Development (0.5) (not available 2024/25)
- DV560 Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference (0.5) (not available 2024/25)
- DV590 Economic Development Policy I (0.5) #
- DV591 Economic Development Policy II (0.5) (not available 2024/25)
- DV592 Economic Development Policy III: Government Policy Analysis (0.5) #
- GV517 Comparative Political Economy: New Approaches and Issues in CPE (0.5) (not available 2024/25)

The following course is a prerequisite for 400 and 500 level EC courses for students planning to take advanced Economics courses for their PhD research:

EC400 Introductory Course in Mathematics and Statistics (0.0) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Award of the MRes in International Development

The award and classification of the MRes degree is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree.

Programme Structure - PhD

Programme code: RPDV2

Upgrade to PhD

Upgrade to PhD is dependent upon:

1. Achieving an average of 65 in MRes taught courses.
2. Achieving a minimum of 65 in the Research Proposal. The Research Proposal Examiners will offer constructive advice and make one of four decisions:

- Unconditional approval
- Conditional approval
- Revise and resubmit
- Fail

Students who are required to Revise and Resubmit are usually expected to resubmit the proposal within three months. These students will obtain a conditional upgrade, with the approval of the Chair of the Research Degrees Subcommittee, dependent on any revised submission(s) meeting the departmental upgrade requirements by a fixed deadline set by the department. Students who are successful will be unconditionally upgraded to PhD.

The progress of each student will be reviewed at the end of each subsequent year.

Thesis composition

The thesis can be submitted either as a monograph, or as a series of papers. For candidates who choose to submit their thesis as a series of papers, there should be at least three papers, plus a substantial introduction, linking chapter and conclusion.

Notes on co-authored work:

- Co-authored papers are permitted, but normally at least two of the papers should be sole authored by the candidate.
- The introduction, the linking materials, and the conclusion must be solely the work of the candidate.
- Only one paper can be co-authored with the student's supervisor, with appropriate safeguards for the candidate.
- In any co-authored paper, normally the student must have conceived the idea and methodology and drafted the paper. The part played by all the authors must be clearly indicated. The student and their co-authors must all attest that the percentage of work stated is accurate, and a note to this effect must be included in the thesis.

The candidate should decide on the format of their thesis by the end of the first academic year following their upgrade from MRes to PhD. The decision should be made after discussion with their supervisor(s), and with the Doctoral Programme Director if necessary.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/

CourseAndProgrammeInfo/updatedPGFuture.htm.

MRes/PhD in Management (Employment Relations and Human Resources)

Programme Structure - MRes

Programme code: TMRESMGERH

Department: Management

For students starting this programme of study in 2024/25

Year 1

Research Practicum

Throughout the first 2 years of their programme students will be required to participate in Research Practicums where they are assigned to a member of Faculty to jointly explore research collaborations. These interactions are intended to allow students to explore in-depth research topics and shape research projects **besides** their main dissertation (MG598) in Year 2.

Research proposal

At the end of Year 1 students submit an initial "research proposal". Students will be expected to start work on developing this proposal over the summer period.

Training Course

Compulsory (not examined)

- MG5A1 A Social Sciences Perspective of Academic Research in Management (0.0)
- Paper 1 MG518 Employment Relations and Human Resource Management Seminar I (0.5) **or**
- MG519 Employment Relations and Human Resource Management Seminar II (0.5) (not available 2024/25)
- Paper 2 MY500 Fundamentals of Social Science Research Design (0.5)
- If an MRes student enters the programme with a previous research design training; alternative, advanced research design courses can be taken, such as MY556 Survey Methodology (0.5) with supervisor ad PhD Programme Director permission, timetable permitting.
- Paper 3 MY521A Qualitative Research Methods (0.5) **or**
- MY521W Qualitative Research Methods (0.5)
- If an MRes student enters the programme with previous qualitative methods training; alternative advanced qualitative methods courses such as: MY526 Doing Ethnography (0.5); MY527 Qualitative Research with Non-Traditional Data (0.5); MY528 Qualitative Text Analysis (0.5), can be taken with Supervisor permission, timetable permitting
- Paper 4 **One course to the value of 0.5 units from the following:**
- MY551A Introduction to Quantitative Analysis (0.5)
- MY551W Introduction to Quantitative Analysis (0.5)
- MY552A Applied Regression Analysis (0.5) #
- MY552W Applied Regression Analysis (0.5) #
- MY555 Multivariate Analysis and Measurement (0.5) #
- Or**
- If an MRes student enters the programme with previous quantitative methods training; alternative, advanced quantitative methods courses can be taken, with Supervisor permission, timetable permitting. Some examples are as follows:
- MY557 Causal Inference for Observational and Experimental Studies (0.5) #
- MY559 Quantitative Text Analysis (0.5) #
- MY561 Social Network Analysis (0.5)
- ST452 Probability and Mathematical Statistics I (0.5)
- ST501 Multilevel Modelling (0.5) #
- Paper 5 **One course to the value of 0.5 units from the following list:**
- EU443 European Models of Capitalism (0.5)
- EU477 Labour Markets and the Political Economy of Employment in Europe (0.5) #

- GI409 Conceptual Foundations in Gender, Development and Globalization (0.5)
- GI418 Feminist Economics and Policy: An Introduction (0.5) #
- GV517 Comparative Political Economy: New Approaches and Issues in CPE (0.5) (not available 2024/25)
- LL4H8 Employment Law (0.5)
- LL4H9 Human Rights in the Workplace (0.5)
- MG475 Organisational Theory and Practice (0.5)
- MG476 Corporate Social Responsibility and International Labour Standards (0.5) #
- MG4B7 Leading Organisational Change (0.5)
- MG4C2 Organisational Behaviour (0.5)
- MG4D2 International Employment Relations (0.5) #
- MG4D3 The Dark Side of the Organisation (0.5) # (not available 2024/25)
- MG4D4 Cross Cultural Management (0.5) # (not available 2024/25)
- MY523 Interview Methods for Social Science Research (0.5) #

Given the ER/HR domain is multidisciplinary, the student can take an equivalent, appropriate MSc or PhD level course that is aligned with the student's dissertation and research interest from within the Department of Management or from another department, with Supervisor permission, timetable permitting.

Year 2

- Paper 6 MG518 Employment Relations and Human Resource Management Seminar I (0.5) **or**
- MG519 Employment Relations and Human Resource Management Seminar II (0.5) (not available 2024/25)
- Paper 7 For Paper 7, students are expected to take MG527 and **courses to the value of 1.0 unit(s) from the elective course list for Paper 5.** Student may also take appropriate MSc or PhD level courses from within the Department of Management or from another department as agreed with their Supervisor and subject to timetabling constraints. For example, the supervisor and student may determine that the student requires further, advanced methods courses to successfully analyse dissertation data. Or, the supervisor and student may determine that theoretically based courses are required for the student.
- MG527 Advanced Quantitative Analysis for Research in Management (0.0) #
- And courses to the value of 1.0 unit(s) from:
- Paper 5 elective list*
- Paper 8 MG598 Research Paper in Management (MRes PhD Programmes) (1.0)

Annual Progress Reviews

In order to progress unconditionally from the first to the second year of MRes registration students are required to achieve pass marks of 60% in 2.5 units (5 classifications marks). Students that do not attain this standard may still be able to progress as follows, subject to approval by the Department of Management (DoM) PhD Committee:

Students may fall short of this requirement by up to 1 unit of marks; which may consist of up to a maximum of 0.5 unit mark of fail and/or a 0.5 unit mark of between 50-59. Students will resit at the next available opportunity. Where a student is resitting a course they have passed in order to meet the progression requirements the new mark will not show on the transcript or be used to calculate the award of the degree.

There will be regular student progress reviews each term by the DoM PhD committee. An Annual Progress review for Years 1 and 2 of the MRes/PhD programme will take place between May and July. The review will monitor

academic progress and include feedback from the Programme Director, Faculty group and student. All final progression decisions are reviewed and approved by the DoM PhD Committee.

End of Year 1: The APR in Year 1 will consider attendance in MY5A1, participation in the Research Practicums, supervision attendance, supervisor(s) progress reports and available scores on the MRes papers. Re-registration for the following year will be approved by the DoM PhD Committee, and on the expectation of the student will achieve the marks required in any resit exams.

End of Year 2: The APR in Year 2 will review the successful completion of second year course work with marks meeting the required standards, the quality and contribution of MG598 paper and satisfaction with progress and participation in the programme. Recommendation for registration to the PhD Programme by the DoM PhD Committee for the following year, will be based on the successful completion of the previous year, and on the expectation the student will achieve the marks required in any resit exams.

End of Year 3: Recommendation for registration in year 4 by the DoM PhD Committee will be based on students achieving the required grades in any resit exams and successfully passing the PhD review process.

For the PhD Review the student submits a research proposal that includes:

- 1) the research question(s);
- 2) a concise literature review through which the significance of the proposed research is articulated;
- 3) a discussion of research methodology;
- 4) a draft timeline of activity;
- 5) preliminary data collection and analysis or a 'pilot' study; and
- 6) discussion of research ethics and risks.

This material is evaluated by the academic assessors in two independently written reports submitted prior to a viva voce with the supervisor(s). The outcome of the review will be reported to the Department's PhD Committee at the next opportunity.

Year 4: Re-registration in year 5 will be based on continued satisfactory progress and the approval by the Programme Director and the DoM PhD Committee.

Award of the MRes in Management – Employment Relations and Human Relations

The award and classification of the MRes degree will be subject to the normal application of the School's Scheme for the Award of a five-unit Taught Master's Degree.

Progression to PhD registration

In order to progress and upgrade to PhD registration students must have taken and passed all 5 units (10 classification marks) with a grade of 60% or higher by the end of the programme. Students can compensate by achieving an aggregate of 600 marks (with no failed papers) which must include a grade of 60% in their core seminar. Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students missing the overall progression requirement by 0.5 paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students failing to meet this standard will have their PhD registration discontinued. The final decision to register to the PhD Programme is taken by the DoM PhD Committee and is based on successful completion of the MRes requirements as specified above as well as satisfactory progress in their research activities and approval of the MG598 Research Proposal. In Year 3 students must also pass the PhD Review process by the end of the ST. This will be reported on to the DoM PhD Committee at the end of Year 3 along with any results from resits taken in that

year.

Students will have the opportunity to submit and defend their PhD Review proposal in the MT and the LT during year 3. If the student does not pass the PhD Review by the end of the ST, they will be given the opportunity to revise and resubmit their proposal by the following September on a specific date before registration for the progression to year 4.

Paper 5 elective list

EU443	European Models of Capitalism (0.5)
EU477	Labour Markets and the Political Economy of Employment in Europe (0.5) #
GI409	Conceptual Foundations in Gender, Development and Globalization (0.5)
GI418	Feminist Economics and Policy: An Introduction (0.5) #
GV517	Comparative Political Economy: New Approaches and Issues in CPE (0.5) (not available 2024/25)

MY523	Interview Methods for Social Science Research (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Programme Structure - PhD

Programme code: RPMGERHR

Years 3,5 If upgraded to PhD

Years 3-5

From Year 3, students are expected to meet regularly with their Supervisor(s) each term throughout Year 3-5. After their PhD Review, students are expected to focus on the research and writing of their thesis, the continued development of research ideas for publication, participation in relevant training courses and career development activities.

Rules for the composition and content of theses within this programme

There are two formats of PhD Examination in the Department of Management. These align with those set out in Regulation 48 of the Regulations for Research Degrees <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForResearchDegrees.pdf> that provide for two different formats of PhD submission/examination to be followed, as appropriate, according to the normal practice in your field.

The two formats approved by the Department of Management and applicable to this programme are:

1. A monographic thesis addressing a single subject in an integrated way.

Or

2. A set of publishable papers on a set of related topics within the context framed by an introductory and concluding chapter, and adhering to the following guidance:

- An introduction to explain the justification for the research question and articulate the links between the

papers.

- Papers may be written with others/co-authored. Candidates may find it helpful to use CRediT taxonomy to define their contribution and evaluate if their contribution to a paper is sufficient to warrant inclusion in their thesis.
- The candidate must solely write the introduction, all linking material and the discussion.
- A minimum of 3 papers. This is a standard number in the paper by thesis format, but it is up to the candidate to decide how many papers to include, considering the advice of their supervisor and the normal practice in their field of study.

Within Management the norms between fields are variable, and therefore it is important to understand this and discuss the practices and examination norms and how best to meet the expectations and requirements of the job market in your field with your supervisor and the Programme Director. The composition of your thesis should be discussed and agreed with your supervisor and the Programme Director.

MRes/PhD in Management (Marketing)

Programme Structure - MRes

Programme code: TMRESMGMK

Department: Management

For Students starting this programme of study in 2024/25

Year 1

Research Practicums

Research practicums

Throughout the first 2 years of their programme students will be required to participate in Research Practicums where they are assigned to a member of Faculty to jointly explore research collaborations. These interactions are intended to allow students to explore in-depth research topics and shape research projects besides their main dissertation (MG598) in Year 2.

Research proposal

At the end of Year 1 students submit an initial "research proposal". Students will be expected to start work on developing this proposal over the summer period.

Training Course

Compulsory (not examined):

MG5A1 A Social Sciences Perspective of Academic Research in Management (0.0)

Paper 1 MG512 Marketing I: Consumer Behaviour and Quantitative Modelling (0.5) **or**

MG520 Marketing II: Consumer Behaviour and Quantitative Modelling (0.5) (not available 2024/25)

Paper 2 Students on the Quantitative Modelling Marketing research track should choose between:

EC411 Microeconomics (1.0) #

EC486 Econometric Methods (1.0)

ST425 Statistical Inference: Principles, Methods and Computation (1.0) #

*EC411 includes a non credit bearing pre-session course EC400 which must be attended as a prerequisite.

Or

Students on the Consumer Behaviour Marketing research track take:

MY555 Multivariate Analysis and Measurement (0.5) #

And one from:

MY551A Introduction to Quantitative Analysis (0.5)

MY551W Introduction to Quantitative Analysis (0.5)

If the student enters the programme with previous quantitative methods training; alternative, advanced quantitative methods courses can be taken, with Supervisor permission, timetable permitting and approval of the course leader.

Paper 3 courses to the value of 1.0 unit(s) from the following:
EC443 Econometrics for MRes students (1.0) # **or**
EC486 Econometric Methods (1.0)

Or

courses to the value of 1.0 unit(s) from the following:

MY552A Applied Regression Analysis (0.5) #1

MY552W Applied Regression Analysis (0.5) #2

MY555 Multivariate Analysis and Measurement (0.5) #

MY557 Causal Inference for Observational and

Experimental Studies (0.5) #

If EC443 is chosen please note the following prerequisite: Students should have completed an undergraduate level course in econometrics and statistical theory. Linear algebra and multivariate calculus will be used frequently.

Year 2

Note

From the start of AT in Year 2, students continue to shape their research proposal and will be given ongoing feedback, and the opportunity to develop ideas.

Paper 4 MG512 Marketing I: Consumer Behaviour and Quantitative Modelling (0.5) **or**

MG520 Marketing II: Consumer Behaviour and Quantitative Modelling (0.5) (not available 2024/25)

Paper 5 Courses to the value of 1.0 unit(s) from the following:
EC486 Econometric Methods (1.0)

EC545 Labour Economics for Research Students I (0.5)

EC546 Labour Economics for Research Students II (0.5)

MY552A Applied Regression Analysis (0.5) #

MY552W Applied Regression Analysis (0.5) #

MY555 Multivariate Analysis and Measurement (0.5) #

MY557 Causal Inference for Observational and

Experimental Studies (0.5) #

Students may also take alternative courses below if agreed with their supervisor and programme director and subject to timetabling constraints:

EC411 Microeconomics (1.0) #A

EC427 The Economics of Industry (1.0) #

EC484 Econometric Analysis (1.0) #3B

MY555 Multivariate Analysis and Measurement (0.5) #

PP454 Development Economics (1.0) #

ST405 Multivariate Methods (0.5) #

ST442 Longitudinal Data Analysis (0.5) #

ST443 Machine Learning and Data Mining (0.5) #

Paper 6 MG598 Research Paper in Management (MRes PhD Programmes) (1.0)

Annual Progress Reviews

In order to progress unconditionally from the first to the second year of MRes registration students are required to achieve pass marks of 60% in 2.5 units (5 classifications marks). Students that do not attain this standard may still be able to progress as follows, subject to approval by the Department of Management (DoM) PhD Committee:

Students may fall short of this requirement by up to 1 unit of marks; which may consist of up to a maximum of 0.5 unit mark of fail and/or a 0.5 unit mark of between 50-59. Students will resit at the next available opportunity. Where a student is resitting a course they have passed in order to meet the progression requirements the new mark will not show on the transcript or be used to calculate the award of the degree.

There will be regular student progress reviews each term by the DoM PhD committee. An Annual Progress review for Years 1 and 2 of the MRes/PhD programme will take place between May and July. The review will monitor academic progress and include feedback from the Programme Director, Faculty group and student. All final progression decisions are reviewed and approved by the DoM PhD Committee.

End of Year 1: The APR in Year 1 will consider attendance in MY5A1, participation in the Research Practicums, supervision attendance, supervisor(s) progress reports and the available scores on the MRes papers. Re-registration for the following year will be approved by the DoM PhD Committee, and on the expectation of the student will achieve the marks required in any resit exams.

End of Year 2: The APR in Year 2 will review the successful completion of second year course work with marks meeting the required standards, the quality and contribution of MG598 paper and satisfaction with progress and participation in the programme. Recommendation for registration to the PhD programme by the DoM PhD Committee for the following year will be based on the successful completion of the previous year, and on the expectation the student will achieve the marks required in any resit exams.

End of Year 3 Recommendation to re-register in year 4 by the DoM PhD committee will be based on students achieving the required grades in any resit exams and passing the PhD Review process.

For the PhD Review the student submits a research proposal that includes:

- 1) the research question(s)
- 2) a concise literature review through which the significance of the proposed research is articulated
- 3) a discussion of research methodology
- 4) a draft timeline of activity
- 5) preliminary data collection and analysis or a 'pilot' study

- 6) discussion of research ethics and risks

This material is evaluated by the academic assessors in two independently written reports submitted prior to a viva voce with the supervisor(s). The outcome of the review will be reported to the Department's PhD Committee at the next opportunity.

Year 4: Re-registration in year 5 will be based on continued satisfactory progress and the approval by the DoM PhD Committee.

Award of the MRes in Management – Marketing

The award and classification of the MRes degree will be subject to the normal application of the School's Scheme for the Award of a five-unit Taught Masters Degree.

Progression to PhD registration

In order to progress and upgrade to PhD registration students must have taken and passed all 5 units (10 classification marks) with a grade of 60% or higher by the end of the programme. Students can compensate by achieving an aggregate of 600 marks (with no failed papers) which must include a grade of 60% in their core seminar.

Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students missing the overall progression requirement by 0.5 paper are permitted to progress to PhD registration, but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students failing to meet this standard will have their PhD registration discontinued.

The decision to register to the PhD programme is taken by the DoM PhD committee and is based on successful completion of the MRes requirements as specified above as well as satisfactory progress in their research activities and the MG598 Research paper.

In Year 3 students must also pass the PhD Review by the end of the ST. This will be reported on to the DoM PhD committee at the end of Year 3, along with any results from resits taken in that year. Students will have the opportunity to submit and defend their PhD Review proposal in the AT and the WT during year 3. If the

student does not pass the PhD Review by the end of the ST, they will be given the opportunity to revise and resubmit their proposal by the following September on a specific date before registration for the progression to year 4.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

1 : MY552A can not be taken with MY552W

2 : MY552W can not be taken with MY552A

3 : Before taking EC484 you must take EC451

Footnotes

A: EC411 may be taken if not chosen during the first year of MRes. EC411 includes a non credit bearing pre-session course EC400 which must be attended as a prerequisite.

B: Before taking EC484 you must take EC451

Introductory course. EC451 is taught in September. It consists of 45 hours of lectures and an additional 22 hours of classes, across a 3-week period.

Programme Structure - PhD

Programme code: RPMGMK

Years 3,5 If upgraded to PhD

Years 3-5

Year 3 students are expected to meet regularly with their Supervisor(s) each term throughout Years 3-5. After the PhD Review, students are expected to focus on the research and writing of their thesis, the continued development of research ideas for publication, participation in relevant training courses and career development activities.

Award of the PhD

The PhD is awarded according to the rules of LSE.

Rules for the composition and content of theses within this programme

There are two formats of PhD Examination in the Department of Management. These align with those set out in Regulation 48 of the Regulations for Research Degrees <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForResearchDegrees.pdf> that provide for two different formats of PhD submission/examination to be followed, as appropriate, according to the normal practice in your field.

The two formats approved by the Department of Management and applicable to this programme are:

1. A monographic thesis addressing a single subject in an integrated way.

Or

2. A set of publishable papers on a set of related topics within the context framed by an introductory and concluding chapter, and adhering to the following guidance:

- An introduction to explain the justification for the research question and articulate the links between the papers.
- Papers may be written with others/co-authored. Candidates may find it helpful to use CRediT taxonomy to define their contribution and evaluate if their contribution to a paper is sufficient to warrant inclusion in their thesis.
- The candidate must solely write the introduction, all linking material and the discussion.
- A minimum of 3 papers. This is a standard number in the paper by thesis format, but it is up to the candidate to decide how many papers to include, considering the advice of their supervisor and the normal practice in their field of study.

Within Management the norms between fields are

variable, and therefore it is important to understand this and discuss the practices and examination norms and how best to meet the expectations and requirements of the job market in your field with your supervisor and the Programme Director. MRes/PhD in Management (Organisational Behaviour)

Programme Structure - MRes

Programme code: TMRESMG0B

Department: Management

For students starting this programme of study in 2024/25

Year 1

Research Practicum

Throughout the first 2 years of their programme students will be required to participate in Research Practicums where they are assigned to a member of Faculty to jointly explore research collaborations. These interactions are intended to allow students to explore in-depth research topics and shape research projects **besides** their main dissertation (MG598) in Year 2.

Research proposal

At the end of Year 1 students submit an initial "research proposal". Students will be expected to start work on developing this proposal over the summer period.

Training Course

Compulsory (not examined):

- | | | |
|---------|--------|--|
| | MG5A1 | A Social Sciences Perspective of Academic Research in Management (0.0) |
| Paper 1 | MG505 | Research in Organisational Behaviour Seminar I (0.5) or |
| | MG525 | Research in Organisational Behaviour Seminar II (0.5) (not available 2024/25) |
| Paper 2 | MG4C2 | Organisational Behaviour (0.5) or |
| | PB431 | Social Psychology of Economic Life: Advanced Topics (0.5) |
| | | or equivalent to be agreed with their supervisor and programme director. |
| Paper 3 | MY500 | Fundamentals of Social Science Research Design (0.5) |
| | | If an MRes student enters the programme with a previous research design training; alternative, advanced research design courses can be taken, such as MY556 Survey Methodology (0.5) with supervisor permission, timetable permitting |
| Paper 4 | MY521A | Qualitative Research Methods (0.5) or |
| | MY521W | Qualitative Research Methods (0.5) |
| | | If an MRes student enters the programme with previous qualitative methods training; alternative advanced qualitative methods courses such as: MY526 Doing Ethnography (0.5); MY527 Qualitative Research with Non-Traditional Data (0.5); MY528 Qualitative Text Analysis (0.5), can be taken with supervisor permission, timetable permitting. |
| Paper 5 | | One from the following: |
| | MY551A | Introduction to Quantitative Analysis (0.5) |
| | MY551W | Introduction to Quantitative Analysis (0.5) |
| | MY552A | Applied Regression Analysis (0.5) # |
| | MY552W | Applied Regression Analysis (0.5) # |
| | MY555 | Multivariate Analysis and Measurement (0.5) # |
| | | If an MRes student enters the programme with previous quantitative methods training; alternative, advanced quantitative methods courses can be taken, with supervisor permission, timetable permitting. Some examples are as follows: |
| | MY557 | Causal Inference for Observational and Experimental Studies (0.5) # |

- | | |
|-------|---|
| MY559 | Quantitative Text Analysis (0.5) # |
| MY561 | Social Network Analysis (0.5) |
| ST452 | Probability and Mathematical Statistics I (0.5) |
| ST501 | Multilevel Modelling (0.5) # |

Given the Organisational Behaviour domain is multidisciplinary, the student can take an equivalent, appropriate MSc or PhD level course that is aligned with the student's dissertation and research interest from within the Department of Management or from another department, with supervisor permission, timetable permitting.

Year 2

- | | |
|---------|---|
| Note: | From the start of AT in Year 2 students continue to shape their research proposal and will be given ongoing feedback, and the opportunity to develop ideas. |
| Paper 6 | MG505 Research in Organisational Behaviour Seminar I (0.5) or |
| | MG525 Research in Organisational Behaviour Seminar II (0.5) (not available 2024/25) |
| Paper 7 | MG527 Advanced Quantitative Analysis for Research in Management (0.0) # |

And

Courses to the value of 1.0 unit(s) from the following:

- | | |
|---------|--|
| MG475 | Organisational Theory and Practice (0.5) |
| MG476 | Corporate Social Responsibility and International Labour Standards (0.5) # |
| MG512 | Marketing I: Consumer Behaviour and Quantitative Modelling (0.5) |
| MY528 | Qualitative Text and Discourse Analysis (0.5) # |
| MY551A | Introduction to Quantitative Analysis (0.5) |
| MY551W | Introduction to Quantitative Analysis (0.5) |
| MY552A | Applied Regression Analysis (0.5) # |
| MY552W | Applied Regression Analysis (0.5) # |
| MY555 | Multivariate Analysis and Measurement (0.5) # |
| Paper 8 | MG598 Research Paper in Management (MRes PhD Programmes) (1.0) |

Annual Progress Review

In order to progress unconditionally from the first to the second year of MRes registration students are required to achieve pass marks of 60% in 2.5 units (4 classifications marks). Students that do not attain this standard may still be able to progress as follows, subject to approval by the Department of Management (DoM) PhD Committee:

Students may fall short of this requirement by up to 1 unit of marks; which may consist of up to a maximum of 0.5 unit mark of fail and/or a 0.5 unit mark of between 50-59. Students will resit at the next available opportunity. Where a student is resitting a course they have passed in order to meet the progression requirements the new mark will not show on the transcript or be used to calculate the award of the degree.

There will be regular student progress reviews each term by the DoM PhD committee. An Annual Progress review for Years 1 and 2 of the MRes/PhD programme will take place between May and July. The review will monitor academic progress and include feedback from the Programme Director Faculty group and student. All final progression decisions are reviewed and approved by the DoM PhD Committee.

End of Year 1: The APR in Year 1 will consider attendance in MY5A1, participation in the Research Practicums, supervision attendance, supervisor(s) progress reports and available scores on the MRes papers. Re-registration for the following year will be approved by the DoM PhD Committee, and on the expectation of the student will achieve the marks required in any resit exams.

End of Year 2: The APR in Year 2 will review the successful completion of second year course work with marks meeting the required standards, the quality and contribution of MG598 paper and satisfaction

with progress and participation in the programme. Recommendation for registration to the PhD Programme by the DoM PhD Committee in the following year will be based on the successful completion of the previous year, and on the expectation the student will achieve the marks required in any resit exams.

End of Year 3: Recommendation to re-register in year 4 by the DoM PhD Committee will be based on students achieving the required grades in any resit exams and successfully passing the PhD Review.

For the PhD Review, the student submits a research proposal that includes:

- 1) the research question(s);
- 2) a concise literature review through which the significance of the proposed research is articulated;
- 3) a discussion of research methodology;
- 4) a draft timeline of activity;
- 5) preliminary data collection and analysis or a 'pilot' study; and
- 6) discussion of research ethics and risks.

This material is evaluated by the academic assessors in two independently written reports submitted prior to a viva voce with the supervisor(s). The outcome of the review will be reported to the Department's PhD Committee at the next opportunity.

Year 4: Re-registration in year 5 will be based on continued satisfactory progress and the approval by the DoM PhD Committee.

Award of the MRes in Management – Organisational Behaviour

The award and classification of the MRes degree will be subject to the normal application of the School's Scheme for the Award of a five-unit Taught Master's Degree.

Progression to PhD registration

In order to progress and upgrade to PhD registration students must have taken and passed all 5 units (10 classification marks) with a grade of 60% or higher by the end of the programme. Students can compensate by achieving an aggregate of 600 marks (with no failed papers) which must include a grade of 60% in their core seminar.

Students registered for the PhD remain subject to the relevant MRes regulations for any courses or examinations they are completing. Students missing the overall progression requirement by 0.5 paper are permitted to progress to PhD registration but will subsequently need to re-sit and pass the paper to the necessary standard to continue their PhD registration. Students failing to meet this standard will have their PhD registration discontinued.

The decision to register to the PhD programme is taken by the DoM PhD committee and is based on successful completion of the MRes requirements as specified above as well as satisfactory progress in their research activities and the MG598 Research paper.

In Year 3 students must also pass the PhD Review by the end of the ST. This will be reported to the DoM PhD committee at the end of Year 3 along with any results from resits taken in that year. Students will have the opportunity to submit and defend their PhD Review proposal in the AT and the WT during year 3. If the student does not pass the PhD Review by the end of the ST, they will be given the opportunity to revise and resubmit their proposal by the following September on a specific date before registration for the progression to year 4.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Programme Structure - PhD

Programme code: RPMGOB

Years 3,5 If upgraded to PhD

Years 3-5

From year 3, students are expected to meet regularly with their Supervisor(s) each term. After their PhD Review, students are expected to focus on the research and writing of their thesis, the continued development of research ideas for publication, participation in relevant training courses and career development activities.

Award of the PhD

The PhD is awarded according to the rules of LSE.

Rules for the composition and content of theses within this programme

There are two formats of PhD Examination in the Department of Management. These align with those set out in Regulation 48 of the Regulations for Research Degrees <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForResearchDegrees.pdf> that provide for two different formats of PhD submission/examination to be followed, as appropriate, according to the normal practice in your field.

The two formats approved by the Department of Management and applicable to this programme are:

1. A monographic thesis addressing a single subject in an integrated way.

Or

2. A set of publishable papers on a set of related topics within the context framed by an introductory and concluding chapter, and adhering to the following guidance:

- An introduction to explain the justification for the research question and articulate the links between the papers.
- Papers may be written with others/co-authored. Candidates may find it helpful to use CRediT taxonomy to define their contribution and evaluate if their contribution to a paper is sufficient to warrant inclusion in their thesis.
- The candidate must solely write the introduction, all linking material and the discussion.
- A minimum of 3 papers. This is a standard number in the paper by thesis format, but it is up to the candidate to decide how many papers to include, considering the advice of their supervisor and the normal practice in their field of study.

Within Management the norms between fields are variable, and therefore it is important to understand this and discuss the practices and examination norms and how best to meet the expectations and requirements of the job market in your field with your supervisor and the Programme Director. The composition of your thesis should be discussed and agreed with your supervisor and the Programme Director.

MRes/PhD in Political Science

Programme Structure - MRes

Programme code: TMRESPOLSC

Department: Government

For students starting this programme of study in 2024/25

Students complete and are examined in courses to the value of four full units.

Please note that places are limited on some optional courses.

Admission onto any particular course is not guaranteed and can be subject to timetabling constraints and/or students meeting specific prerequisite requirements.

Year 1

Paper 1 **Research Design**

Paper 2 GV5X1 Research Design in the Social Sciences (1.0)
Methods courses
 Students take courses under A, B or C to the value of one unit:

A) Quantitative research topics

MY552A Applied Regression Analysis (0.5) #
 MY552W Applied Regression Analysis (0.5) #
 MY557 Causal Inference for Observational and Experimental Studies (0.5) #
 GV481 Quantitative Analysis for Political Science (0.5)
 GV4G1 Applied Quantitative Methods for Public Policy and Political Science (0.5) # (not available 2024/25)
 GV4J6 Game Theory for Research (0.5) #

B) Qualitative research topics

GV4N1 Qualitative Analysis for Political Science (0.5)
 GV513 Qualitative Methods in the Study of Politics (0.5) (not available 2024/25)
 MY551A Introduction to Quantitative Analysis (0.5)
 MY551W Introduction to Quantitative Analysis (0.5)

C) Political theory research topics

GV504 Research Methods in Political Theory (1.0)
 If these courses have already been taken, other methods courses may be substituted with the approval of the Doctoral Programme Director.

Paper 3 **Field seminars**

Courses to the value of 1.0 unit from the following:

GV517 Comparative Political Economy: New Approaches and Issues in CPE (0.5) (not available 2024/25)
 GV5X2 Research Paper in Conflict Studies and Comparative Politics (1.0)
 GV5XA Research Paper in Conflict Studies and Comparative Politics (0.5)
 GV5XB Research Paper in Conflict Studies and Comparative Politics (0.5)
 GV5X3 Research Paper in Political Behaviour (1.0)
 GV5XC Research Paper in Political Behaviour (0.5)
 GV5XD Research Paper in Political Behaviour (0.5)
 GV5X4 Research Paper in Global Politics (1.0)
 GV5XE Research Paper in Global Politics (0.5)
 GV5XF Research Paper in Global Politics (0.5)
 GV5X5 Research Paper in Political Science and Political Economy (1.0)
 GV5XG Research Paper in Political Science and Political Economy (0.5)
 GV5XH Research Paper in Political Science and Political Economy (0.5)
 GV5X6 Research Paper in Political Theory (1.0)
 GV5XJ Research Paper in Political Theory (0.5)
 GV5XK Research Paper in Political Theory (0.5)
 GV5X7 Research Paper in Public Policy and Administration (1.0)
 GV5XL Research Paper in Public Policy and Administration (0.5)
 GV5XM Research Paper in Public Policy and Administration (0.5)

Any research methods or specialist subject course taught anywhere in the School, with the approval of the Course Convenor and the Doctoral Programme Director, or any course from the following if not already taken under Paper 2 above:

Paper 2 options list

Paper 4 **Research Prospectus**

GV599 Research Prospectus in Political Science (1.0)

Paper 2 options list

GV481 Quantitative Analysis for Political Science (0.5)
 GV4G1 Applied Quantitative Methods for Public Policy and Political Science (0.5) # (not available 2024/25)
 GV4J6 Game Theory for Research (0.5) #
 GV4N1 Qualitative Analysis for Political Science (0.5)

GV504 Research Methods in Political Theory (1.0)
 GV513 Qualitative Methods in the Study of Politics (0.5) (not available 2024/25)
 MY551A Introduction to Quantitative Analysis (0.5)
 MY551W Introduction to Quantitative Analysis (0.5)
 MY552A Applied Regression Analysis (0.5) #
 MY552W Applied Regression Analysis (0.5) #
 MY557 Causal Inference for Observational and Experimental Studies (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Programme Structure - PhD

Programme code: RPPOLSCI

Years 1, 2, 3, 4

A. Research and write a dissertation
 B) Participate in at least one Doctoral Workshop in the Government Department or elsewhere in the School in each year. For example:

GV501 Doctoral Workshop: Political Theory (0.0)
 GV503 Political Philosophy Research Seminar (0.0)
 GV514 Political Science and Political Economy Doctoral Workshop (0.0)

C) Second year students have the option of taking the following courses. Permission to attend is at the discretion of the course convenor:

EC557 Political Economy for Research Students I (0.5) #
 EC558 Political Economy for Research Students II (0.5) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Award of the MRes

The award and classification of the MRes is consistent with the School's Scheme for the Award of a four-unit Taught Master's Degree

Conditions for progression to PhD

1. Award of the MRes with at least a Merit;

And

2. Award of GV599 with at least a Merit;

And

3. Successfully passing an oral hearing, consisting of a short presentation by the student and questions from the Research Prospectus Approval Committee.

The Research Prospectus Approval Committee will look for: a clear explanation of the research question(s) and motivation(s); an account of relevant related scholarly work; a discussion of methods, approaches, or challenges; and a plan to conduct the work within four years. The Department will publish more detailed guidance on assessment criteria.

The Research Prospectus Approval Committee normally consists of one supervisor or advisor of the student, at least one member of the Department's Doctoral Programme Committee, and an external assessor (usually the External Examiner for the MRes in Political Science). The Doctoral Programme Director chairs the Research Prospectus Approval Committee.

The Research Prospectus Approval Committee will make one of four decisions: Unconditional Approval, Conditional Approval, Revise and Resubmit, and Fail. Students with Conditional Approval have to submit a revised Research Prospectus to their Supervisor, normally within four weeks. The Doctoral Programme Director decides whether the conditions have been met, in consultation with the supervisor. Students who are required to Revise and Resubmit are usually expected to resubmit within three months. Resubmitted work

is assessed by at least two members of the Research Prospectus Approval Committee. The Committee has discretion to conduct a second oral hearing if this is deemed necessary for the upgrade decision. If a second hearing is conducted, at least two members of the committee take part. Students who fail to pass, either at the first oral hearing or after Revise and Resubmit, will not be upgraded to PhD status.

In exceptional circumstances, the Research Prospectus Approval Committee can recommend to the Research Degrees Subcommittee to upgrade students who do not meet progression condition 1 (Award of MRes degree with at least a Merit). Such a recommendation must be based on very strong performance in certain subjects that offset weaknesses in others and an exceptionally strong Research Prospectus. Personal circumstances affecting assessment performance may also be taken into account.

Award of the PhD

The PhD is awarded according to the rules of LSE and the department, as follows:

The thesis to be submitted EITHER as:

1 a monograph; **or**

2 a series of papers, with an introduction, critical discussion, and conclusion.

A paper-based thesis must contain at least three separate papers and a substantial introduction, conclusion, and some linking material to ensure the overall coherence of the thesis submitted. The total word count should not exceed that of a monograph PhD thesis (which should not exceed 100,000 words, including footnotes but excluding bibliography and appendices), unless special permission has been granted by the Research Degrees Subcommittee Chair).

Joint Authorship in a Paper-Based PhD Thesis

Introduction, conclusion and linking material must be solely the work of the candidate, and at least one paper must be single authored by the candidate.

With the permission of the supervisor, the remaining papers included may be co-authored. However, if more than one paper is co-authored, the candidate must demonstrate that their contribution to the co-authored papers is substantial, and that the total overall quality and originality of the candidate's submission is not compromised. To this purpose, the candidate must submit a written statement explaining the respective contributions of the co-authored papers in relation to the PhD, and their own respective contribution to the co-authored papers in relation to their co-authors. This statement must be endorsed by the supervisor and received by the Doctoral Programme Director, normally at least 6 months prior to submission. Submission of a thesis with more than one co-authored paper is only permitted after receiving written permission from the candidate's supervisor and the Doctoral Programme Director.

MPhil/PhD Programme Regulations

Key to Regulations

(H) means a half-unit course

(AT) means Autumn Term

(WT) means Winter Term

(ST) means Spring Term

MPhil/PhD in Cities Programme

Programme Code: RPCP

Department: Sociology

For students starting this programme of study in 2024/25

(This programme has been discontinued. Last year of entry 2022/23)

The MPhil/PhD in Cities is an interdisciplinary degree offered through the Sociology Department. Research within this programme addresses not only works within the discipline of sociology but also other fields that comprise urban studies, such as architecture, design, urban geography, urban history, and planning. A Cities PhD thesis should assume a scholarly audience that includes sociologists as well as other urbanists. Through theory, empirical focus and/or methods, students must engage with urban space as a conceptual category, significant contextual feature, or object of analysis.

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper **Course number, title (unit value)**
Year 1

Training courses

Compulsory (examined):

SO500 Aims and Methods Research Class for MPhil Students (1.0)

Students may also be asked to attend and pass the assessment for up to one further course unit (or two half units) chosen with their supervisor on the basis of an assessment of their research training needs.

Optional (examined):

MY500 Fundamentals of Social Science Research Design (0.5)

MY521A Qualitative Research Methods (0.5)

MY521W Qualitative Research Methods (0.5)

MY551A Introduction to Quantitative Analysis (0.5)

MY551W Introduction to Quantitative Analysis (0.5)

MY552A Applied Regression Analysis (0.5) #

MY552W Applied Regression Analysis (0.5) #

Other courses from Sociology master's programmes

Specialist research courses:

SO491 Quantitative Social Research Methods (0.5)

SO492 Qualitative Social Research Methods (0.5)

SO511 Research Seminar in Political Sociology (0.0) (not available 2024/25)

SO521 Research Seminar on Cities and Space (0.0) (not available 2024/25)

Transferable skills course

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2 and/or Year 3

Training courses

Compulsory (not examined):

SO501 Data Analysis Workshop (0.0) A

Year 3 and/or Year 4

Training courses

Optional (not examined):

SO505 Becoming a Professional Sociologist (0.0) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course.

Please view the course guide for more information.

Footnotes

A: SO501 is required.

Progression and upgrade requirements

In the Spring term of each year the progress of each student registered in the Department is discussed at the MPhil/PhD Board, which is a general meeting of all research student supervisors. This Board decides whether to recommend to the School that students be permitted to proceed to the next year of study. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register. The following benchmarks are used by the MPhil/PhD Board to determine if students are progressing appropriately:

By Spring Term Year 1 for Full Time Students:

Submission of Formative Essay for SO500, including approvals from the Ethics Committee and Health and Safety

By Spring Term Year 2 for Full Time Students: Upgrade from MPhil to PhD Student

By Spring Term Year 3 for Full Time Students: Successful completion of the Third Year Progression Package

In addition, students are expected to have completed requirements as laid out by the supervisory team. The PhD is an individual project and will require research and writing tailored to that project.

Full time students are required to have submitted their Upgrade materials in Week 6 of the Autumn Term of Year 2, and to have successfully defended their research design in viva voce by the end of the Autumn Term of Year 2. Upon successful completion, the student will upgrade from MPhil to PhD student. All full-time research students are required to have made the transition from MPhil to PhD (upgrading) student within two years of first registration and to have submitted their PhD thesis within four years. Part-time students are expected to be upgraded to PhD student by the end of their third year, and to submit their thesis within eight years.

The decision to upgrade a student from MPhil to PhD is taken by a panel consisting of two academics from the Department. For upgrade, students submit a 10,000 word research proposal that includes: 1) the research question(s); 2) a concise literature review through which the significance of the proposed research is articulated; 3) a discussion of research methodology; 4) preliminary data collection and analysis or a 'pilot' study; and 5) discussion of research ethics and risks. This material is then assessed by viva voce, with the supervisor(s) in attendance and available to be consulted by the panel. A written report is made by the panel on the basis of both the written upgrade submission and the viva. Students should aim to have a complete a first draft of their thesis in years three to four and allow three to six months for revision and submission. To facilitate this, students are required to submit a Third Year Progression Package no later than Week 6 of the Winter Term in the 3rd Year for full time students. The decision to progress a student from the third to the fourth year is taken by a panel consisting of two academics from the LSE with at least one being from the Sociology Department. Students are to submit: a) two draft chapters (an introduction and a substantive chapter) totalling no more than 20,000 words; b) a thesis outline; c) a timeline for completion and d) a bibliography. This material is then assessed by viva voce, with the supervisor(s) in attendance and available to be consulted by the panel.

Award of the PhD

The PhD is awarded according to the rules of LSE and the department, as follows:

A thesis to be submitted by monograph. The thesis will:

- 1 consist of the candidate's own account of their investigations. Work already published, either by the candidate or jointly with others, may be included only if it forms an integral part of the thesis and so makes a relevant contribution to its main theme and is in the same format as the rest of the thesis. The student must clearly state the part played by the candidate in any work done jointly with the supervisor(s) and/or fellow researchers;

- 2 be an integrated whole and present a coherent argument;

- 3 be written in English and must be presented in line with published School guidance;

- 4 include a full bibliography and references

MPhil/PhD in Data, Networks and Society

Programme Code: RPDNS

Department: Media and Communications

For students starting this programme of study in 2024/25

These regulations apply to students entering in or after the 2017/18 academic year.

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (not examined):

Any two of the following:

MC402 The Audience in Media and Communications (0.5) #

MC408 Theories and Concepts in Media and Communications (0.5) #

MC409 Media, Technology and Everyday Life (0.5) #

MC418 Communication: Cultures and Approaches (0.5) #

MC424 Media and Communication Governance (0.5) #

MC425 Interpersonal Mediated Communication (0.5) #

MC430 Data in Communication and Society (0.5)

MC433 Technology and Justice (0.5) # (not available 2024/25)

MC434 Digital Platforms and Media Infrastructures (0.5) #

MC440 Children, Youth and Media (0.5) #

Plus:

The following full-unit course

MC5M2 Advanced Methods of Research in Media & Communications (Specialisation Quantitative Analysis) (1.0)

Optional (examined/not examined):

Other graduate courses relevant to research subject and agreed with supervisor.

Transferable skills courses

Compulsory (not examined):

MC500 Research Seminar for Media and Communications (0.0)

Optional (not examined):

LN988 Thesis Writing (0.0) #

Modern Foreign Language courses offered by the Language Centre or other graduate seminars of relevance to research subject.

Presentation requirements:

At least one presentation annually in the following:

MC500 Research Seminar for Media and Communications (0.0)

And a poster presentation at the MC500 Mini-Conference in WT11

Year 2

Training courses

Optional (examined/not examined):

Students can take either another qualitative or quantitative analysis course offered by the Department of Methodology. Courses must be approved by the supervisor and discussed with the MC5M1/MC5M2 convenor.

Transferable skills courses

Compulsory (not examined):

MC500 Research Seminar for Media and Communications (0.0)

Annual Joint PhD Symposium for Second Years and above, at Goldsmiths, Westminster and City

Presentation requirements:

At least one presentation annually in the following:

MC500 Research Seminar for Media and Communications (0.0)

And a poster presentation at the MC500 Mini-Conference in WT11

Other graduate seminars of relevance to research subject.

Year 3

Transferable skills courses

Optional (not examined):

MC501 Advanced Doctoral Workshop in Media and Communications (0.0) #

Year 4

Transferable skills courses

Optional (not examined):

MC501 Advanced Doctoral Workshop in Media and Communications (0.0) #

Research Students are expected to complete their research.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

Students will be required to submit a full Thesis Proposal of 10,000 words to their Thesis Committee in week 4 of Summer Term in their first year (part-time students can submit their Proposal in week 4 of Summer Term in their second year). This paper will include a substantive statement of the aims, theories and methods proposed for the thesis, a tentative chapter outline, an indicative bibliography and a timetable for its completion. Together with any examination/s for quantitative methodological courses, the thesis proposal will form part of the evaluation process, and, together with an upgrade viva, will determine whether students are permitted to upgrade from MPhil to PhD and continue into their second year. In the Summer term of each year the progress of each student registered in the Department is assessed and a decision made as to whether students can proceed to the next academic session. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student reregister as an MPhil student or a recommendation that the student not be allowed to re-register.

PhD completion and submission

Submission of the final thesis will be in accordance with the relevant regulations. With approval from the supervisor(s), the thesis will consist either of a monograph that forms an integrated whole; or alternatively, a series of papers, with an introduction, critical discussion, and conclusion. A thesis that contains only joint papers is not acceptable. It must contain linking materials which must be solely the work of the candidate; the part played by the candidate in any work done jointly with the supervisor(s) and/or fellow

researchers must be clearly stated by the student; the introduction and conclusion should be serious pieces which clearly explain the intellectual link between the papers and the conclusion, and what they add together to knowledge of the field.

MPhil/PhD in Demography (Social/Formal)

Programme Code: RPDES F

Department: Methodology

For students starting this programme of study in 2024/25

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper **Course number, title (unit value)**

Year 1

Training courses

Optional (not examined):

In their first year, a student may be required to take specified courses in demography and/or research methodology which are most relevant to their PhD project. The courses most commonly required are:

MY500 Fundamentals of Social Science Research Design (0.5)

MY521A Qualitative Research Methods (0.5)

MY521W Qualitative Research Methods (0.5) 1

MY551A Introduction to Quantitative Analysis (0.5)

MY551W Introduction to Quantitative Analysis (0.5)

MY552A Applied Regression Analysis (0.5) #

MY552W Applied Regression Analysis (0.5) # 2

MY599 Department of Methodology MPhil/PhD Students Seminar (0.0)

Students will discuss with their supervisors any other methodological training that may be relevant for the successful completion of the MPhil/PhD programme.

Year 2

Training courses

Optional (not examined):

Students are encouraged to audit or take for credit courses which are useful to them, with the agreement of their supervisors.

Year 3

Training courses

Optional (not examined):

Students are encouraged to audit or take for credit courses which are useful to them, with the agreement of their supervisors.

Year 4

Training courses

Optional (not examined):

Students are encouraged to audit or take for credit courses which are useful to them, with the agreement of their supervisors.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course.

Please view the course guide for more information.

1: MY521W can not be taken with MY521A

2: MY552W can not be taken with MY552A

Progression and Upgrade requirements: In the Summer Term of their first year, candidates will produce a 10,000 word 'first year review' that outlines the aims and methods of their thesis: this means summarising the key literature(s), motivating their specific research questions, and highlighting the planned contributions of their work. A first-year review document typically includes a general introduction, a comprehensive literature review (covering relevant empirical and theoretical work), a motivation of the research questions and hypotheses, and an indication of the literature(s) that the candidate

is seeking to contribute to (i.e. the gaps in knowledge that will be addressed). Candidates will also give an oral presentation of their proposal at the Department of Methodology PhD day where all PhD students present their work, and which takes place in June each year. Written and oral work will be assessed by two academics (not members the supervisory team), normally members of Department of Methodology staff, although sometimes from other Departments in the School. This work has to reach an acceptable standard to enable students to progress to the second year. It is particularly important that the first-year review clearly states the objectives of the doctoral research and indicates how the empirical work will be carried out. If the panel deems the first-year review to be not suitably clear, they can choose not to accept the submitted document and give the candidate up to a month to implement clarifications to the document. This decision will be taken maximum one week after the Department of Methodology PhD Day. Examples of unclear work might include (but not be limited to):

- A first-year review that does not state clear research questions.
- A first-year review that does not adequately review the specific literatures that the empirical work is contributing to;
- A first-year review that does not give enough methodological detail, showing how the design will produce data that allows the candidate to address the theoretical issues at stake in a systematic and rigorous way.

After the first-year candidates will spend more time on independent study under the guidance of their supervisor(s). This will involve the collection, organization and analysis of data, and writing up the results. During their second year of registration, they will typically submit three (minimum) draft chapters of their thesis plus a short introduction and a detailed plan for its completion. The three draft chapters will typically include a detailed literature review, specification of research problem(s) and two empirical chapters. If candidates are pursuing a paper-based thesis, their upgrading documents will typically include a short introduction, a literature review and at least two empirical papers. Whether a traditional or paper-based thesis, the material will be evaluated by an upgrading committee (two academics, not necessarily of the Department of Methodology or even the LSE) who will recommend transferral to PhD registration if their work is judged to be of sufficient quality and quantity. Throughout the MPhil/PhD and PhD, candidates will attend the Institute's research seminar and other specialist workshops and seminars related to their interests. The student must present at every Department of Methodology PhD day.

Department of Methodology local rules for the

composition of PhD theses (to be read in conjunction with the Regulations for Research Degrees <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForResearchDegrees.pdf>)

A PhD thesis may take the form either of a monograph, or a paper-based format. The decision on the appropriate format is approved by the supervisory team. Paper based theses will:

- Consist of a minimum of 3 publishable empirical papers (normally 6,000-10,000 words), of which at least one is single-authored. Other papers may be co-authored.
- Include linking materials which integrate the contribution as a whole, normally including an Introduction (2,000-4,000 words), Literature Review (8,000-10,000 words) and Conclusion (2,000-4,000

words). Linking materials must be single-authored.

MPhil/PhD in Economic Geography

Programme Code: RPECGY

Department: Geography and Environment

For students starting this programme of study in 2024/25

In addition to progressing with their research, students are expected to take the courses listed below. Students may take courses other than those listed but must discuss this with their supervisor.

Paper **Course number, title (unit value)**

Year 1

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Compulsory (examined):

1. Relevant subject-specific training courses to the value of 1.0 unit:

GY400 The Economics of Urbanisation (0.5) #

GY404 Inclusive Growth (0.5) #

GY409 Globalisation and territorial development: Theory, Evidence and Policy (0.5)

GY410 Economics of Local and Regional Development (0.5)

GY413 Regional Development and Policy (0.5) #

GY447 The Economics of Regional and Urban Planning (0.5) #

GY457 Applied Urban and Real Estate Economics (1.0) #

EC411 Microeconomics (1.0) #

Other relevant subject-specific training courses can be chosen subject to supervisor and course manager approval.

Students who select EC411 are also required to take the following introductory course:

EC400 Introductory Course in Mathematics and Statistics (0.0) #

Note: Students who join the PhD programme after having completed either MSc in Local Economic Development or MSc in Real Estate Economics and Finance cannot retake the same courses or be waived the one unit of subject-specific training.

2. Relevant advanced research methods courses to the value of 1.0 unit:

GY428 Applied Quantitative Methods (0.5) #

GY460 Techniques of Spatial Economic Analysis (0.5) #

MY500 Fundamentals of Social Science Research Design (0.5)

MY521A Qualitative Research Methods (0.5)

MY521W Qualitative Research Methods (0.5)

MY526 Doing Ethnography (0.5) #

MY556 Survey Methodology (0.5) #

MY557 Causal Inference for Observational and Experimental Studies (0.5) #

MY559 Quantitative Text Analysis (0.5) #

Other relevant advanced research methods courses can be chosen subject to supervisor and course manager approval.

Transferable skills courses

Optional (not examined):

GY500 Research Project Seminar (0.0)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course.

Please view the course guide for more information.

Progression and upgrade requirements: Once on the MPhil/PhD programme students will go through a First Year Progress Review, taking place in the Summer Term of the first year.

For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year.

Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression to the second year (third year of the 1+3 programme) is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. Students are asked to discuss their research paper/thesis outline during an Upgrade Meeting in front of an Upgrading Committee normally formed by main supervisor, review supervisor and a third member of staff with relevant expertise. The material is evaluated by the Upgrading Committee, who will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the Director of Postgraduate Studies for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal

annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

Composition and content of the thesis:

1. General

For the award of a PhD a student is required to submit (normally within four years of full-time registration, or part-time equivalent) a thesis which:

- Forms a distinct contribution to the knowledge of the subject and affords evidence of originality by the discovery of new facts and/or by the exercise of independent critical power
- Gives a critical assessment of the relevant literature, describes the method of research and its findings, and includes a discussion on those findings, and indicates in what respects they appear to the candidate to advance the study of the subject; and so demonstrates a deep and synoptic understanding of the field of study, and;
- Demonstrates research skills

What these criteria mean in practice will vary between topics and with the conventions of the different sub-disciplines of our various PhD programmes. Supervisors are responsible for providing guidance as to what they imply for a student's particular research project, though ultimately it is examiners who decide whether to recommend the award of the PhD.

2. Form

Subject to approval of a student's supervisors, in relation to conventions and publication practices in the field appropriate to your research, your thesis can take either of two forms:

- (i) The monographic PhD is written as an integrated whole. Such a thesis is a monograph of up to 100,000 words.

More details about the specific requirements can be found in the School's Regulations for Research Degrees, which can be found in the LSE Calendar.

- (ii) A set of publishable papers – on a set of related topics – within a context framed by an introduction, critical discussion, and conclusion. Candidates who are being examined may submit such a thesis, subject to the approval of their supervisor, and the following provisos:
 - (a) The thesis must meet all general academic requirements expected of the traditional thesis and should similarly reflect what can be expected from 3 years of effective full-time research.
 - (b) It should normally include either:
 - (i) At least three single-authored papers of publishable quality; or
 - (ii) At least two single-authored papers plus at least two jointly-authored papers (to which the candidate has made a major contribution) of such quality, subject to provision to the examiners of a clear, agreed statement from supervisors and other authors of the respective contributions to each.

Other possible combinations of joint- and single-authored papers might be sufficient to constitute a PhD thesis. If the structure of the student's thesis deviate from either (i) or (ii) here above, the student should seek explicit approval from their supervisors and from the Director of Doctoral Studies.

- (c) All papers should be primarily the result of research undertaken during the period of registration for the degree.
- (d) The thesis should include a substantial introduction and a conclusion, which are expected to highlight the contributions of the papers to knowledge in the relevant field and demonstrate how the set of papers meets the general requirements set out for a PhD above.

It is recommended that paper-based PhD submissions include an integrated bibliography at the end of the

thesis – even where there are separate bibliographies for the different papers. If a student has any doubts, please discuss this matter with your supervisors.

A student should discuss with their supervisors which PhD form is more suitable for their PhD work even if the norm may be very clear in relation to their specific field of research; the specific circumstances and aspects of the student's research topic are to be considered

MPhil/PhD in Economic History

Programme Code: RPEH

Department: Economic History

For students starting this programme of study in 2024/25

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper **Course number, title (unit value)**

Year 1

Training courses

Compulsory (examined):

Unless already taken as part of the master's degree:

EH401 Historical Analysis of Economic Change (0.5)

EH402 Quantitative Analysis in Economic History I (0.5)

EH520 Approaches to Economic and Social History (0.0)

And, where appropriate, a pre-sessional statistics course.

Optional (not examined):

Supervisors may require students in their first or subsequent years of study to take other relevant economic history courses, methodological courses provided by the Department of Methodology or the Institute of Historical Research or skills training courses as required for their thesis topic.

Transferable skills courses

Compulsory (not examined):

EH590 Thesis Workshop in Economic History (0.0)

Year 2

Training courses

Compulsory (not examined):

EH590 Thesis Workshop in Economic History (0.0)

Year 3

Training courses

Compulsory (not examined):

EH590 Thesis Workshop in Economic History (0.0)

Year 4

Training courses

Compulsory (not examined):

EH590 Thesis Workshop in Economic History (0.0)

Progression and upgrade requirements: During the Summer Term students are required to submit at least one draft thesis chapter and a 3-5 page thesis outline to the department's Graduate Review Committee.

Students taking one or more MSc examination may, with the support of their supervisor, apply to defer their submission of work to no later than the start of the 7th week of the Summer Term. The Committee will interview all students during the Summer Term, and re-registration for a second year will be conditional on the work presented being of a satisfactory standard. All students are expected to gain broad knowledge of the subject from graduate level course work in their first year and active participation in workshops, seminars and conferences to complement the expertise gained from intense thesis research.

By the Summer Term of the second year the Graduate Review Committee will normally expect to see about half the thesis in draft. The Committee will interview students, and if the submitted work is of an acceptable standard,

students will be upgraded from MPhil to PhD. Students may defer the upgrade decision until their third year for fieldwork or other reasons, but only with the support of their supervisor.

Format of submitted thesis:

A PhD thesis in Economic History can take one of two forms:

- 1 a monograph of up to 100,000 words, **or**
- 2 a series of papers, such that the thesis:
 - consists of at least three publishable papers that are thematically connected,
 - includes an introduction that articulates the connection between your papers.

Co-operation with a co-author(s) on part of the thesis is permitted, subject to the following conditions.

- The thesis must contain, at least, the equivalent of three main chapters or papers of which you are the sole author. This allows, for example, the replacement of one sole-authored paper (or chapter) with two co-authored papers (or chapters).
- The paper(s) (or chapter(s)) written with a co-author must not contain the core findings of your thesis.
- Your co-author cannot be your supervisor.

MPhil/PhD in Environmental Economics

Programme Code: RPENEC

Department: Geography and Environment

For students starting this programme of study in 2024/25 In addition to progressing with their research, students are expected to take the courses listed below to the value of 3 examined units. Students may take courses other than those listed, but must discuss this with their supervisor and seek the approval of the Programme Director.

Paper **Course number, title (unit value)**

Year 1

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Compulsory (examined):

Students cannot repeat courses which they have already taken. Where such courses are compulsory for this programme, students may take alternative courses, subject to agreement with supervisors and approval from the Programme Director.

3 units in total:

1. EC411 Microeconomics (1.0) #

Students must also take the following introductory course:

EC400 Introductory Course in Mathematics and Statistics (0.0) #

Note: Students who have previously successfully completed this course, or an equivalent course at another institution, may ask for the requirement to take EC400 and EC411 to be waived.

2. GY426 Environmental and Resource Economics (1.0) #

3. Advanced research methods courses(s) to the value of 1.0 unit. Typical course choices include:

GY428 Applied Quantitative Methods (0.5) # A

EC402 Econometrics (1.0) #

EC426 Public Economics (1.0) #

MY555 Multivariate Analysis and Measurement (0.5) #

MY556 Survey Methodology (0.5) #

MY557 Causal Inference for Observational and Experimental Studies (0.5) #

MY559 Quantitative Text Analysis (0.5) #

Students may also audit the following course:

GY520 Environmental Regulation: Implementing Policy (1.0)

Students may take courses other than those listed,

subject to agreement with supervisors and approval from the Programme Director.

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

Year 2

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

means there may be prerequisites for this course.

Please view the course guide for more information.

Footnotes

A: Students who have graduated from the MSc in Environmental Economics and Climate Change cannot repeat courses taken as part of their master's programme and therefore cannot take GY428 from the list above.

Progression and Upgrade requirements for Routes 1 and 2

Once on the MPhil/PhD programme, students will go through a First Year Progress Review taking place in the Summer Term of their first year.

For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year.

There will be a progress review meeting between the student and the supervisor(s) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Importantly, progression is also dependent on students having **passed all** required examinations and obtained **at least one merit**, and having **presented their work satisfactorily** in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrading committee that will recommend transferral to PhD registration if the work

is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's supervisor(s), and a third member of staff with relevant expertise. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the Director of Post-Graduate Studies for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

Composition and content of the thesis:

1. General

For the award of a PhD a student is required to submit (normally within four years of full-time registration, or part-time equivalent) a thesis which:

- Forms a distinct contribution to the knowledge of the subject and affords evidence of originality by the discovery of new facts and/or by the exercise of independent critical power
- Gives a critical assessment of the relevant literature, describes the method of research and its findings, and includes a discussion on those findings, and indicates in what respects they appear to the candidate to advance the study of the subject; and so demonstrates a deep and synoptic understanding of the field of study, and;
- Demonstrates research skills.

What these criteria mean in practice will vary between topics and with the conventions of the different sub-disciplines of our various PhD programmes. Supervisors are responsible for providing guidance as to what they imply for a student's particular research project, though ultimately it is examiners who decide whether to recommend the award of the PhD.

2. Form

Subject to approval of a student's supervisors, in relation to conventions and publication practices in the field appropriate to your research, your thesis can take either of two forms:

- (i) The monographic PhD is written as an integrated whole. Such a thesis is a monograph of up to 100,000 words.

More details about the specific requirements can be found in the School's Regulations for Research Degrees, which can be found in the LSE Calendar.

- (ii) A set of publishable papers – on a set of related topics – within a context framed by an introduction, critical discussion, and conclusion. Candidates who are being examined may submit such a thesis, subject to the approval of their supervisor, and the following provisos:
 - (a) The thesis must meet all general academic requirements expected of the traditional thesis and should similarly reflect what can be expected from 3 years of effective full-time research.
 - (b) It should normally include either:
 - (i) At least three single-authored papers of publishable quality; or
 - (ii) At least two single-authored papers plus at least two jointly-authored papers (to which the candidate has made a major contribution) of such quality, subject to provision to the examiners of a clear, agreed statement from supervisors and other authors of the respective contributions to each.

Other possible combinations of joint- and single-authored papers might be sufficient to constitute a PhD thesis. If the structure of the student's thesis deviate from either (i) or (ii) here above, the student should seek explicit approval from their supervisors and from the Director of Doctoral Studies.

Progression and Upgrade requirements

Once on the MPhil/PhD programme, students will go through a First Year Progress Review taking place in the Summer Term of their first year. For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and justification for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year. Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression to the second year is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrade committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's main supervisor, review supervisor and a third member of staff with relevant expertise. The committee will recommend transfer to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the Director of Post-Graduate Studies Director for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the

student is asked to produce specific written documents to be evaluated by a review panel.

Composition and content of the thesis:**1. General**

For the award of a PhD a student is required to submit (normally within four years of full-time registration, or part-time equivalent) a thesis which:

- Forms a distinct contribution to the knowledge of the subject and affords evidence of originality by the discovery of new facts and/or by the exercise of independent critical power'
- Gives a critical assessment of the relevant literature, describes the method of research and its findings, and includes a discussion on those findings, and indicates in what respects they appear to the candidate to advance the study of the subject; and so demonstrates a deep and synoptic understanding of the field of study, and;
- Demonstrates research skills

What these criteria mean in practice will vary between topics and with the conventions of the different sub-disciplines of our various PhD programmes. Supervisors are responsible for providing guidance as to what they imply for a student's particular research project, though ultimately it is examiners who decide whether to recommend the award of the PhD.

2. Form

Subject to approval of a student's supervisors, in relation to conventions and publication practices in the field appropriate to your research, your thesis can take either of two forms:

- (i) The monographic PhD is written as an integrated whole. Such a thesis is a monograph of up to 100,000 words.

More details about the specific requirements can be found in the School's Regulations for Research Degrees, which can be found in the LSE Calendar.

- (ii) A set of publishable papers – on a set of related topics – within a context framed by an introduction, critical discussion, and conclusion. Candidates who are being examined may submit such a thesis, subject to the approval of their supervisor, and the following provisos:
 - (a) The thesis must meet all general academic requirements expected of the traditional thesis and should similarly reflect what can be expected from 3 years of effective full-time research.
 - (b) It should normally include either:
 - (i) At least three single-authored papers of publishable quality; or
 - (ii) At least two single-authored papers plus at least two jointly-authored papers (to which the candidate has made a major contribution) of such quality, subject to provision to the examiners of a clear, agreed statement from supervisors and other authors of the respective contributions to each.

Other possible combinations of joint- and single-authored papers might be sufficient to constitute a PhD thesis. If the structure of the student's thesis deviate from either (i) or (ii) here above, the student should seek explicit approval from their supervisors and from the Director of Doctoral Studies.

- (c) All papers should be primarily the result of research undertaken during the period of registration for the degree.
- (d) The thesis should include a substantial introduction and a conclusion, which are expected to highlight the contributions of the papers to knowledge in the relevant field and demonstrate how the set of papers meets the general requirements set out for a PhD above.

It is recommended that paper-based PhD submissions include an integrated bibliography at the end of the thesis – even where there are separate bibliographies for

the different papers. If a student has any doubts, please discuss this matter with your supervisors.
A student should discuss with their supervisors which PhD form is more suitable for their PhD work even if the norm may be very clear in relation to their specific field of research; the specific circumstances and aspects of the student's research topic are to be considered.

Year 1

Training courses

Compulsory (not examined):

EU550 Research Workshop in European Studies (0.0)

Optional (examined):

MY552A Applied Regression Analysis (0.5) # **or**

MY552W Applied Regression Analysis (0.5) #

Further training courses provided by the Department of Methodology and agreed with their supervisors.

Transferable skills courses

Optional (not examined):

EU455 Concepts in Political Economy (0.5)

Relevant courses provided by the Library, Teaching and Learning Centre and Methodology Institute.

Year 2

Training courses

Compulsory (not examined):

EU550 Research Workshop in European Studies (0.0)

Students expected to take relevant course(s) in the Department of Methodology or in other departments as agreed with their supervisors.

Transferable skills courses

Optional (not examined):

EU455 Concepts in Political Economy (0.5)

Year 3

Training courses

Compulsory (not examined):

EU550 Research Workshop in European Studies (0.0)

Optional (not examined):

GV517 Comparative Political Economy: New Approaches and Issues in CPE (0.5) (not available 2024/25)

IR555 International Political Economy Research Workshop (0.0)

Transferable skills courses

Optional (not examined):

EU455 Concepts in Political Economy (0.5)

Year 4

Transferable skills courses

Optional (not examined):

EU550 Research Workshop in European Studies (0.0)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Upgrading to PhD/Targets for Progress

Year 1 - For a standard thesis: a research proposal (approximately 2,500 words) and abstract of the whole thesis (one page); a sample chapter (approximately 8,000 words); a chapter synopsis, and a timetable for completion. For a thesis as a series of publishable

papers: a research proposal (approximately 2,500 words) and an abstract covering the three prospective papers; a full draft of the introduction or a full draft of one of the papers (approximately 8,000 words); and a timetable for completion.

Year 2 - For a standard thesis: at least two further substantive chapters (of approximately 5,000-7,000 words each). For a thesis as a series of publishable papers: at least one fully written paper (approximately 10,000 words); and outlines of the other two papers (approximately 2,000 words).

Year 3 - For a standard thesis: a full draft of all core chapters and agreed timetable for completion. For a thesis as a series of publishable papers: full drafts of all three papers and agreed timetable for completion of the thesis.

Within the scope provided by the Regulations for Research Degrees, and subject to approval from the Doctoral Programme Director, it is for students and supervisors to agree the format and content of the thesis.

MPhil/PhD in Gender

Programme Code: RPGE

Department: Gender Studies

For students starting this programme of study in 2024/25
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper **Course number, title (unit value)**

Year 1

Training courses

Compulsory (examined):

Upgrade (first year programme)

Compulsory (not examined):

Lectures only:

GI424 Gender Theories: An Interdisciplinary Approach (0.5)

Lectures, seminars and workshops:

GI402 Gender, Knowledge and Research Practice (0.5)

Optional (not examined):

GI499 Dissertation - Independent Research Project (1.0)

Quantitative and/or qualitative training courses provided in the Department of Methodology, as agreed with supervisor.

Audit any course from the Department of Gender Studies menu:

GI403 Gender and Media Representation (0.5)

GI407 Globalisation, Gender and Development (1.0) (not available 2024/25)

GI409 Conceptual Foundations in Gender, Development and Globalization (0.5)

GI410 Screening the 21st Century: Cinema and Cultural Critique (0.5) #

GI411 Gender, Post/coloniality and Development: Critical Perspectives and New Directions (0.5) #

GI413 Gender, Race and Militarisation (0.5)

GI499 Dissertation - Independent Research Project (1.0)

GV4H3 Feminist Political Theory (0.5)

Audit of relevant courses on other master's programmes with agreement of the supervisor

Transferable skills courses

Compulsory (not examined):

GI500 Doctoral Workshop: Department of Gender Studies (0.0)

Relevant courses provided by the Library, Teaching and Learning Centre and Department of Methodology.

Year 2**Training courses****Optional (students should agree with their supervisor whether the courses taken will also be examined):**

Quantitative and/or qualitative training courses provided in the Department of Methodology as agreed with supervisor.

Audit any course from the Department of Gender Studies menu as above.

Audit of relevant courses on other master's programmes with agreement of the supervisor.

Transferable skills courses**Compulsory (not examined):**

GI500 Doctoral Workshop: Department of Gender Studies (0.0)

Year 3**Training courses****Optional (students should agree with their supervisor whether the courses taken will also be examined):**

Quantitative and/or qualitative training courses provided in the Department of Methodology and/or Department of Gender Studies as agreed with supervisor.

Audit any course from the Department of Gender Studies menu as above.

Audit of relevant courses on other master's programmes with agreement of the supervisor.

Transferable skills courses**Compulsory (not examined):**

GI500 Doctoral Workshop: Department of Gender Studies (0.0)

Year 4**Training courses****Optional (examined/not examined):**

Quantitative and/or qualitative training courses provided in the Department of Methodology, as agreed with supervisor.

Audit any course from the Department of Gender Studies menu as above.

Audit of relevant courses on other master's programmes with agreement of the supervisor.

Transferable skills courses**Compulsory (not examined):**

GI500 Doctoral Workshop: Department of Gender Studies (0.0)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

In the first year students will go through their Upgrade Viva. This is held in the summer term and materials should be submitted by the given date in the handbook. Students submit a draft chapter and a research proposal for consideration by a panel of their supervisor and advisor (and one other person with appropriate expertise). The research proposal follows:

- a draft chapter of up to 10,000 words, normally a literature review which situates the research and intended contribution in the relevant literature;
- a research design document of 4-5 pages outlining the research rationale, research question and objectives, and the ethical, epistemological and methodological issues relevant to the research;
- a 2 page chapter outline of the thesis with an indication of chapter contents;
- a timeline for completion.

The nature of the chapter should be agreed with the supervisor. Both parts of the assessment focus on the student's own research and draw on material and debates engaged in GI424 and GI402 where relevant.

Students must the viva before progressing to their second year. If unsuccessful at first sit, students have the opportunity to retake once more at the end of September. Part-time student submissions are calculated pro-rata for Upgrading.

Expectations for successful Upgrading:

- GI402 participation;
- MSc core course GI424 attendance;
- GI500 training seminars participation;
- additional relevant course(s) attendance;
- regular supervision meetings participation;
- Events: Research Seminars, Public Lectures, Third Year Presentations attendance.

Having successfully Upgraded, all students will have an annual review with their supervisor and advisor to ensure satisfactory progress.

Format

Currently there is one general mode of PhD Examination encouraged and supported in the Department of Gender Studies. However, by agreement amongst student, supervisors, and the Doctoral Programme Director it may be possible to pursue a PhD through papers.

The current mode available is a monographic thesis addressing a single subject in an integrated way.

In line with school regulations an alternative is possible:

1 A set of publishable papers on a set of related topics within the context framed by an introductory and concluding chapter, and adhering to the following guidance:

- An introduction to explain the justification for the research question and articulate the links between the papers.
- A concluding chapter which includes a summary of the preceding chapters.
- A minimum of 3 papers. This is a standard number in the paper by thesis format, but it is up to the candidate to decide how many papers to include, considering the advice of their supervisor and the normal practice in their field of study.

Guidance

Because interdisciplinary approaches in Gender Studies vary, it is important to understand this and discuss how to best meet the expectations and requirements of the job market in your field with your supervisor and the Doctoral Programme Director.

MPhil/PhD in Health Policy and Health Economics

Programme Code: RPHPHE

Department: Health Policy

For students starting this programme of study in 2024/25

In addition to progressing with their research, students are expected to take training, research methodology, and transferable skills courses.

Paper Course number, title (unit value)

Year 1**Training courses****Compulsory (examined):**

HP500 Advanced Health Policy and Health Economics (1.0)

Optional (examined):

Students are expected to take two relevant half-unit courses, as agreed with their Supervisors. The options include those listed below:

Graduate-level courses offered by the Department of Health Policy

Or

MY405 Research Design for Policy and Programme Evaluation (0.5)

- MY500 Fundamentals of Social Science Research Design (0.5)
- MY521A Qualitative Research Methods (0.5) 1
- MY521W Qualitative Research Methods (0.5) 2
- MY551A Introduction to Quantitative Analysis (0.5) 3
- MY551W Introduction to Quantitative Analysis (0.5) 4
- MY552A Applied Regression Analysis (0.5) # 5
- MY552W Applied Regression Analysis (0.5) # 6
- MY565 Intermediate Quantitative Analysis (0.5) #
- ST501 Multilevel Modelling (0.5) #
- ST542 Longitudinal Data Analysis (0.5) #

Or

Where regulations permit and subject to Supervisor and Doctoral Programme Director approval, students may take courses instead of those listed above.

Year 2

Training courses

Compulsory (not examined):

- HP500 Advanced Health Policy and Health Economics (1.0)

Optional (examined / not examined):

Audit of relevant courses from those offered in the Department of Health Policy, as agreed with Supervisors. Audit of relevant courses on other MSc programmes, where regulations permit and as agreed with Supervisors.

Year 3

Training courses

Compulsory (not examined):

- HP500 Advanced Health Policy and Health Economics (1.0)

Transferable skills courses

Optional (not examined):

Attendance and participation at Research Seminars held across the Department, details to be made available to student by email and on website. Departmental and research seminar series Training offered by the PhD Academy, Teaching and Learning Centre, and LSE LIFE.

Year 4

Training courses

Compulsory (not examined):

- HP500 Advanced Health Policy and Health Economics (1.0)

Optional (examined/not examined):

Audit of relevant courses from those offered in the Department of Health Policy, as agreed with Supervisors. Audit of relevant courses on other MSc programmes, where regulations permit and as agreed with Supervisors.

Transferable skills courses

Optional (not examined):

Departmental and research seminar series Training offered by the PhD Academy, Teaching and Learning Centre, and LSE LIFE.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

- 1: MY521A can not be taken with MY521W
- 2: MY521W can not be taken with MY521A
- 3: MY551A can not be taken with MY551W
- 4: MY551W can not be taken with MY551A
- 5: MY552A can not be taken with MY552W
- 6: MY552W can not be taken with MY552A

The Department encourages students throughout their PhD programme to attend, and where appropriate, present at conferences in relation to their particular research topic.

Progression rules

Students are initially registered as MPhil, and will be able to upgrade to PhD registration following their first year of

full-time enrolment, subject to successful completion of the Major Review. Progress is assessed by the student's Supervisors in consultation with the Doctoral Programme Director.

In the ST of every academic year, the progress of each student registered in the Department is discussed with the Supervisory Panel. The Panel decides whether to recommend to the School that students be permitted to proceed to the next year of study.

If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by Supervisors may be required, or a recommendation may be made that the student not be allowed to re-register.

Upgrade requirements

Each student is required to undergo Major Review (also known as Upgrade) at the end of their first year of full-time study. In order to earn the Upgrade, the candidate – (1) Must have attended a minimum of 80% of the compulsory course in Advanced Health Policy and Health Economics (based on their time at LSE); (2) Must have achieved a minimum average grade of 60% across the two half unit taught courses; (3) Must have submitted a 5,000-word thesis proposal including a research question, literature review, description of methodology, plans for data collection, and a timetable through to completion. Where relevant, there will be assessment of any ethics review required for the student's research undertaken in accordance with the School's research ethics policies.

Candidates are subject to a viva voce and marking of their thesis proposal by two non-supervisory members of the Department, where students will be required to earn a minimum grade of 60%. Following Major Review, a decision is taken whether to upgrade the student from MPhil to the PhD programme.

Targets for progress

For students who successfully upgrade to PhD enrolment there will be another review in the second and third years of full-time study. Progression will be conditional upon fulfilling the requirements agreed and approved by the Supervisors and the Doctoral Programme Director.

Year 2

Progression to Year 3 will be conditional upon students having achieved a pass (50%) in both the two taught courses, taken within their first two years of FT registration;

For a thesis as a monograph: submission of a thesis document, including an abstract of the whole thesis, a chapter synopsis, and a substantive first chapter (approx. 10,000 words), and an updated timetable through to completion.

For a thesis as a series of publishable papers: submission of an abstract for each of the three prospective papers, a full draft of the introduction or a full draft of one of the papers (approx. 10,000 words), and an updated timetable through to completion.

Year 3

For a thesis as a monograph: submission of full draft with all core chapters, and agreed timetable through to completion of the thesis.

For a thesis as a series of publishable papers: full drafts of all three papers and agreed timetable for the completion of the thesis.

Teaching opportunities

The Department employs Graduate Teaching Assistants (GTAs) to teach and lead seminars on a number of postgraduate courses. First-year MPhil/PhD students are normally not permitted to teach. Research students are encouraged to undertake some teaching following successful Major Review. Students who undertake teaching are offered the opportunity to pursue a

Postgraduate Certificate in Higher Education.

Rules

The Department of Health Policy will allow your thesis to be submitted as a monograph or as a series of publishable papers.

Year 2: For a thesis as a monograph, submission of a thesis document, including an abstract of the whole thesis, a chapter synopsis, and a substantive first chapter (approx. 10,000 words), and an updated timetable through to completion needs to be submitted.

For a thesis as a series of publishable papers, submission of an abstract for each of the three prospective papers, a full draft of the introduction or a full draft of one of the papers (approx. 10,000 words), and an updated timetable through to completion needs to be submitted.

Year 3: If a monograph, a submission of a full draft with all core chapters and an agreed timetable to completion of the thesis will need to be submitted. If a series of publishable papers, full drafts of all three papers and agreed timelines for the completion of the thesis must be submitted.

You must gain permission in writing from your Supervisor as to which format you are choosing before commencing any work.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm. Changes to course and programme information for future academic sessions can be found on the graduate summary page for future students lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm.

MPhil/PhD in Human Geography and Urban Studies

Programme Code: RPHUGY

Department: Geography and Environment

For students starting this programme of study in 2024/25

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper **Course number, title (unit value)**

Year 1

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Compulsory (examined):

1. The following core course:

GY403 Contemporary Debates in Human Geography (0.5)

Note:

Students who have graduated from MSc Human in Geography and Urban Studies cannot repeat courses taken as part of their master's programme. In order to fulfil their obligation to sit for one full unit of subject-specific training, students who have already taken GY403 must instead take courses to the value of one unit from the list of options on the relevant MSc degrees.

2. Course(s) to the value of a half unit from the list of options available on MSc in Human Geography and Urban Studies (Research). Other relevant courses can be chosen subject to supervisor and course manager approval.

3. Relevant advanced qualitative research methods course(s) to the value of 1.0 unit from the following:

MY500 Fundamentals of Social Science Research

Design (0.5)

MY526 Doing Ethnography (0.5) #

MY528 Qualitative Text and Discourse Analysis (0.5) #

MY521A Qualitative Research Methods (0.5) **or**

MY521W Qualitative Research Methods (0.5)

Other relevant advanced research methods courses can be chosen subject to supervisor and course manager approval.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and Upgrade requirements

Once on the MPhil/PhD programme, students will go through a First Year Progress Review taking place in the Summer Term of their first research year.

For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year.

Normally, there will be a progress review meeting between the student and the supervisor(s) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress to the second year. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive

revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. The material is evaluated by an upgrading committee that will recommend transferral to PhD registration if the work is judged to be of sufficient quality and quantity. The upgrading committee is normally formed by the student's supervisors and a third member of staff with relevant expertise. The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the Director of Post-Graduate Studies for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

Composition and content of the thesis:

1. General

For the award of a PhD a student is required to submit (normally within four years of full-time registration, or part-time equivalent) a thesis which:

- Forms a distinct contribution to the knowledge of the subject and affords evidence of originality by the discovery of new facts and/or by the exercise of independent critical power'
- Gives a critical assessment of the relevant literature, describes the method of research and its findings, and includes a discussion on those findings, and indicates in what respects they appear to the candidate to advance the study of the subject; and so demonstrates a deep and synoptic understanding of the field of study, and;
- Demonstrates research skills

What these criteria mean in practice will vary between topics and with the conventions of the different sub-disciplines of our various PhD programmes. Supervisors are responsible for providing guidance as to what they imply for a student's particular research project, though ultimately it is examiners who decide whether to recommend the award of the PhD.

2. Form

Subject to approval of a student's supervisors, in relation to conventions and publication practices in the field appropriate to your research, your thesis can take either of two forms:

- (i) The monographic PhD is written as an integrated whole. Such a thesis is a monograph of up to 100,000 words.

More details about the specific requirements can be found in the School's Regulations for Research Degrees, which can be found in the LSE Calendar.

- (ii) A set of publishable papers – on a set of related topics – within a context framed by an introduction, critical discussion, and conclusion. Candidates who are being examined may submit such a thesis, subject to the approval of their supervisor, and the following provisos:
 - (a) The thesis must meet all general academic requirements expected of the traditional thesis and should similarly reflect what can be expected from 3 years of effective full-time research.
 - (b) It should normally include either:
 - (i) At least three single-authored papers of publishable quality; or
 - (ii) At least two single-authored papers plus at least two

jointly-authored papers (to which the candidate has made a major contribution) of such quality, subject to provision to the examiners of a clear, agreed statement from supervisors and other authors of the respective contributions to each.

Other possible combinations of joint- and single-authored papers might be sufficient to constitute a PhD thesis. If the structure of the student's thesis deviate from either (i) or (ii) here above, the student should seek explicit approval from their supervisors and from the Director of Doctoral Studies.

- (c) All papers should be primarily the result of research undertaken during the period of registration for the degree.
- (d) The thesis should include a substantial introduction and a conclusion, which are expected to highlight the contributions of the papers to knowledge in the relevant field and demonstrate how the set of papers meets the general requirements set out for a PhD above.

It is recommended that paper-based PhD submissions include an integrated bibliography at the end of the thesis – even where there are separate bibliographies for the different papers. If a student has any doubts, please discuss this matter with your supervisors.

A student should discuss with their supervisors which PhD form is more suitable for their PhD work even if the norm may be very clear in relation to their specific field of research; the specific circumstances and aspects of the student's research topic are to be considered.

MPhil/PhD in International History

Programme Code: RPIH

Department: International History

For students starting this programme of study in 2024/25

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

On being admitted, all students are formally registered for an MPhil. By 13 June (Week 8 Summer Term) of their first year (1 March of their second year for

part-time students) they are required to submit three hardcopies of their dossier containing (1) the provisional title of their thesis, together with the provisional titles of their chapters; (2) a bibliography, setting out as comprehensively as possible the primary published and unpublished sources they intend to use, along with the books, articles, unpublished theses and other sources they will consult; (3) an historiographical essay, evaluating the contributions of other scholars to their subject, and indicating clearly how their own thesis will contribute to it; and (4) a draft chapter of approximately 10,000 words based largely upon primary sources. The dossier will be read by three members of the Department , and students will be required to undergo a 20-30 minute viva. After the viva you will be informed of the outcome and will receive a joint report from the panel. If the Committee deems the dossier/viva satisfactory, the Department will recommend the student for transfer of registration from MPhil to PhD status. If it is less than satisfactory it will be examined by the Committee who will determine whether the student should be allowed to resubmit revised upgrade materials, which may be permitted once. The review and viva process is designed to determine whether the student is likely to meet the requirements of a PhD, and whether the chosen topic is suitable for a doctoral dissertation.

Composition of theses submitted for examination

Only monographic theses are permitted. Theses by papers are not permitted. Within the framework set out in the Regulations for Research Degrees, the specific composition of the monograph will be decided between the student and supervisor(s).

MPhil/PhD in International Relations

Programme Code: RPIR

Department: International Relations

For students starting this programme of study in 2024/25 In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Progression and upgrade requirements

All MPhil/PhD students at LSE are initially registered with MPhil status. Continued re-registration and upgrade are dependent on satisfactory progress being made. Upgrade to PhD registration will normally happen at the end of the first academic year and no later than within 18 months of initial registration in line with Research Degrees Regulations.

Upgrade: In order to progress to PhD registration, students must normally have met the progression requirements outlined below:

- Achieved a mark of at least 50% in each of the required examined graduate-level course units in Research Methods training
- Have made satisfactory progress in their research: this will be assessed by a face to face Review panel involving two academic staff members and including the views of the supervisor. Review panels will be formed in consultation with the supervisor.

Material to be submitted to the Review panel for upgrade must include: a research outline and one draft chapter of no more than 10,000 words. The proposal, which should illustrate the student's command of the theoretical and empirical literature related to their topic, will be a clear statement of the theoretical and methodological approach they will take. This should demonstrate the coherence and feasibility of the proposed research and thesis. The submission will also include a timetable to completion, which should identify any periods of fieldwork necessary to the research.

The material submitted will be also discussed and commented upon at IR501 lab sessions.

Regular attendance at IR501 and the IR Research Cluster Workshop will be taken into account for progression: at least 80% attendance is expected. In the unlikely event where a student is successful at passing the upgrade panel but requires a second attempt at completing the Research Methods Courses, they may be authorised to be upgraded but would be required to pass the course by the end of their Second Year in order to re-register.

Progress review: After the first year Review panel, progress will be reviewed annually as per Regulations for Research Degrees. Continued re-registration will be dependent on satisfactory progress being made.

In Year 2, students will be expected to submit two additional draft chapters and a timetable to completion which will be reviewed by the same panellists as in Year 1. The two chapters should be substantially new work, but may include revised material from Year 1.

A virtual panel meeting will be scheduled and make recommendations on further progression based on progress made and quality of work submitted, as well as attendance at a Cluster Workshop.

Students in their third year of registration will be required to submit an annual progress report at the end of June, including a timetable to completion clearly setting out the work completed and remaining on the student's research, as well as their commitment to a Research Cluster.

These will need to be approved by the supervisor and reviewed by the Doctoral Programme Director in order to

authorise re-registration.

Requirements for all theses submitted for the degrees of MPhil and PhD in International Relations

The full requirements of a thesis are set out in the Regulations for Research Degrees.

A PhD thesis in International Relations, in addition to meeting the criteria outlined above, can take either of two forms and:

- 1 consist either of a monograph that forms an integrated whole and present a coherent argument; or,
- 2 alternatively, consist of a series of three or more publishable papers, with an introduction, critical discussion and conclusion, which may be submitted instead of a conventional thesis.

A thesis that contains only joint papers is not acceptable, and the Department will only allow one paper to be jointly authored. The thesis must contain linking materials which must be solely the work of the candidate. The part played by the candidate in any work done jointly with the supervisor(s) and/or fellow researchers must be clearly stated by the student;

Within the scope provided by the Regulations for Research Degrees, the format of the thesis will be agreed with and approved by the supervisor(s) who will ensure that the format conforms to the Department's requirements.

MPhil/PhD in Law

Programme Code: RPLL

Department: Law School

For students starting this programme of study in 2024/25

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1**Training courses****Compulsory:**

1. The following core course:
LL500 Doctoral Research Seminar series (0.0)
2. PhD seminar series:
Staff seminar series
3. One other relevant course offered by any department or other unit within the School

Year 2**Training courses****Optional (not examined):**

- LL500 Doctoral Research Seminar series (0.0)
- PhD Seminar Series
- Staff Seminar Series

Year 3**Training courses****Optional (not examined):**

- LL500 Doctoral Research Seminar series (0.0)
- PhD Seminar Series (compulsory for Year three students - not examined)
- Staff Seminar Series

Year 4**Transferable skills courses****Optional (not examined):**

- LL500 Doctoral Research Seminar series (0.0)
- PhD Seminar Series
- Staff Seminar Series

Progression and upgrade requirements

Upgrade to PhD takes place at the end of the first year, progression being conditional on submission of a satisfactory statement of the research question and a satisfactory sample chapter towards the end of the Spring Term.

MPhil/PhD in Management - Information Systems and Innovation

Programme Code: RPMGIS

Department: Management

For students starting this programme of study in 2024/25

Paper **Course number, title (unit value)**

Year 1

Transferable skills course

Compulsory (not examined)

MG500 Information Systems PhD Seminar Series and Workshops (0.0)

Research Practicums

Throughout the first year students will be required to participate in Research Practicums where they are assigned to a member of Faculty to jointly explore research collaborations.

Training Course

Compulsory (not examined)

MG5A1 A Social Sciences Perspective of Academic Research in Management (0.0)

Paper 1 MG522 Research Design and Theoretical Foundations for Information Systems and Digital Innovation (1.0)

Paper 2 MY521A Qualitative Research Methods (0.5)
or

MY521W Qualitative Research Methods (0.5)

And

MY551A Introduction to Quantitative Analysis (0.5)
or

MY551W Introduction to Quantitative Analysis (0.5)

Paper 3 MG509 Contemporary Digital Innovation Research (0.5)

Plus courses to the value of 0.5 unit(s) from

the following options:

MY523 Interview Methods for Social Science Research (0.5) #

MY526 Doing Ethnography (0.5) #

MY528 Qualitative Text and Discourse Analysis (0.5) #

MY552A Applied Regression Analysis (0.5) #

MY552W Applied Regression Analysis (0.5) #

MY555 Multivariate Analysis and Measurement (0.5) #

MY561 Social Network Analysis (0.5)

MY580 Methodology Short Courses (0.0)

Year 2

Paper 4 MG599 Research Proposal Paper in Management (1.0)

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

All students are expected to gain broad knowledge of the subject from graduate level course work in their first year and active participation in workshops, seminars, and conferences to complement the expertise gained from intense thesis research. Students are expected to meet regularly with their Supervisor(s) each term throughout the programme.

Timeline of activities

The normal duration of PhD study is four years of full-time study including the time spent as an MPhil student in years 1 and 2.

Award of the PhD

The PhD is awarded according to the rules of LSE.

Year 1

Courses (as described above)

Year 2

MG599 Research Proposal and Upgrade panel

Autumn Term by Week 6: Students submit their Research Proposal* for upgrade to PhD (MG599).

Autumn Term by Week 11: The Upgrade Panel, in the form of a viva voce to assess the research proposal.

The Upgrade Panel will consist of two ISI faculty as assessors and the student's two supervisors. If the submitted work is of an acceptable standard, students will be upgraded from MPhil to PhD. Should the submitted work fall short of an acceptable standard, then the Upgrade Panel can decide either to ask for further work to be submitted no later than at the end of the Winter Term or recommend to the Department's Annual Progression meeting that the student should not be allowed to continue their studies.

By the end of Year 2: Students must have progressed to PhD registration to continue their studies.

Year 3

Winter Term by Week 6: Students submit their Progression Package: a) two draft chapters (an introduction and a substantive chapter) totalling no more than 20,000 words; b) a thesis outline; and c) a timeline for completion and d) a bibliography. The material is then assessed in a viva voce by a panel taken from the MPhil / PhD Board.

Year 4

By the end of Year 4: Submission of PhD thesis and scheduling of viva.

Annual Progression

In the Summer term of each year the progress of each student is discussed at the ISI MPhil / PhD Board, which is a general meeting of all ISI research student supervisors, the ISI PhD Programme Director, and the ISI Faculty Group Lead. The ISI MPhil / PhD Board will recommend that students who are deemed to have made satisfactory progress during the year be permitted to re-register for the following year. Those deemed not to have made satisfactory progress either be refused permission to re-register or be required to produce satisfactory written work over the summer as a condition for re-registration in the autumn.

All progression and upgrade recommendations by the ISI MPhil / PhD Board must be approved at the next appropriate DoM PhD Committee meeting.

Progression to year 2

For progression to year 2 (and hence upgrade to PhD) students are required to achieve marks of 60%+ in the three year one papers.

Students who achieve 50-59 in a half unit course in year one can only progress to year two if approved by the DoM PhD Programme Director and will be required to resit and is not an automatic right. The general progress of the student will be taken into consideration when deciding to allow a resit. Resits should be taken at the next available opportunity.

Students who achieve 50-59 in more than one half unit (or equivalent) in year one will not normally be permitted to progress to the second year.

Rules for the composition and content of theses within this programme

There are two formats of PhD Examination in the Department of Management. These align with those set out in Regulation 48 of the Regulations for Research Degrees <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForResearchDegrees.pdf> that provide for two different formats of PhD submission/examination to be followed, as appropriate, according to the normal practice in your field.

The two formats approved by the Department of Management and applicable to this programme are:

1. A monographic thesis addressing a single subject in an integrated way.

Or

2. A set of publishable papers on a set of related topics within the context framed by an introductory

and concluding chapter, and adhering to the following guidance:

- An introduction to explain the justification for the research question and articulate the links between the papers.
- Papers may be written with others/co-authored. Candidates may find it helpful to use CRediT taxonomy to define their contribution and evaluate if their contribution to a paper is sufficient to warrant inclusion in their thesis.
- The candidate must solely write the introduction, all linking material and the discussion.
- A minimum of 3 papers. This is a standard number in the paper by thesis format, but it is up to the candidate to decide how many papers to include, considering the advice of their supervisor and the normal practice in their field of study.

Within Management the norms between fields are variable, and therefore it is important to understand this and discuss the practices and examination norms and how best to meet the expectations and requirements of the job market in your field with your supervisor and the Programme Director. The composition of your thesis should be discussed and agreed with your supervisor and the Programme Director.

MPhil/PhD in Mathematics

Programme Code: RPMA

Department: Mathematics

For students starting this programme of study in 2024/25

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (not examined):

Courses designed for research students in Mathematics, chosen in consultation with their lead supervisor. All first-year research students are required to attend a minimum of four taught courses. For those students working in financial mathematics this will usually comprise a number of units organised by the London Graduate School in Mathematical Finance (LGSMF; www.londonmathfinance.org.uk). Students working in other areas of mathematics will usually be required to take courses from the selection offered by the London Taught Course Centre (LTCC; www.ltcc.ac.uk). Lead supervisors will advise on taught course selection and students will need to obtain approval for their course choice from their lead supervisor. A student may, with the agreement of their lead supervisor and the Doctoral Programme Director, substitute one or more LSE Master's Course for courses offered by either the LGSMF or the LTCC. Courses offered by the LGSMF, the LTCC or LSE Master's Courses with more than 20 teaching hours are normally counted as two courses of the four courses required. Students also have the option of attending or auditing LSE Taught Masters modules, where appropriate.

Transferable skills courses

Compulsory (not examined):

MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation (0.0)

MA501 Research Student Seminar (0.0)

Optional (not examined):

MA422 Research Topics in Financial Mathematics (0.0)

Year 2

Training courses

Optional (not examined):

Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance.

Transferable skills courses

Compulsory (not examined):

MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation (0.0)

MA501 Research Student Seminar (0.0)

Optional (not examined):

MA422 Research Topics in Financial Mathematics (0.0)

Year 3

Training courses

Optional (not examined):

Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance.

Transferable skills courses

Compulsory (not examined):

MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation (0.0)

MA501 Research Student Seminar (0.0)

Optional (not examined):

MA422 Research Topics in Financial Mathematics (0.0)

Year 4

Training courses

Optional (not examined):

Students have the option of attending advanced courses organized by the London Taught Course Centre or the London Graduate School in Mathematical Finance.

Transferable skills courses

Compulsory (not examined):

MA500 Mathematics: Seminar on Combinatorics, Games and Optimisation (0.0)

MA501 Research Student Seminar (0.0)

Optional (not examined):

MA422 Research Topics in Financial Mathematics (0.0)

Teaching opportunities:

All students are offered the opportunity to teach for the department, subject to a successful interview and language requirements.

Progression and upgrade requirements

Students are initially registered for the MPhil, and will be able to upgrade to PhD registration during their second year, dependent on satisfactory progress. Progress is assessed regularly by the student's supervisors, in consultation with the Doctoral Programme Director, on the basis of the extent to which the agreed research goals have been achieved. Any upgrade is dependent on the successful completion of a Major Review, the date of which is determined by the Doctoral Programme Director in consultation with the lead supervisor.

Local rules for the format of a PhD thesis

A thesis can be submitted in one of two formats:

1. a monograph that forms an integrated whole; or
2. a series of papers with linking material that outlines and discusses the key contributions of the papers and places them in the wider literature. The thesis must contain substantial material which is solely the work of the candidate. A jointly authored paper can only be included in the thesis if the candidate contributed substantially to it. All papers need to be included in the same format as the rest of the thesis. An exception from the requirement of having at least three papers in a paper-based thesis will be made for a thesis whose overall scope and contribution is in line with regulations 50 and 51 of the Regulations for Research Degrees <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance->

and-Review-Office/Assets/Documents/Calendar/RegulationsForResearchDegrees.pdf.
The student needs the approval of their lead supervisor for the format of the thesis.

MPhil/PhD in Media and Communications

Programme Code: RPME
Department: Media and Communications
For students starting this programme of study in 2024/25
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper **Course number, title (unit value)**
Year 1

Training courses	
Compulsory (not examined):	
MC401	Mediated Resistance and Activism (0.5) # (not available 2024/25)
MC402	The Audience in Media and Communications (0.5) #
MC403	Contemporary Issues in Media and Communications Policy (0.5) #
MC407	International Media and The Global South (0.5) #
MC408	Theories and Concepts in Media and Communications (0.5) #
MC409	Media, Technology and Everyday Life (0.5) #
MC416	Representation in the Age of Globalisation (0.5) #
MC418	Communication: Cultures and Approaches (0.5) #
MC420	Identity, Transnationalism and the Media (0.5) # (not available 2024/25)
MC422	Critical Studies in Media and Journalism (0.5) #
MC423	Global Media Industries (0.5) #
MC424	Media and Communication Governance (0.5) #
MC425	Interpersonal Mediated Communication (0.5) #
MC427	Digital Media Futures (0.5) #
MC428	Media Culture and Neoliberalism in the Global South (0.5) #
MC430	Data in Communication and Society (0.5)
MC433	Technology and Justice (0.5) # (not available 2024/25)
MC434	Digital Platforms and Media Infrastructures (0.5) #
MC436	Mediating the Past (0.5) #
MC437	Media, Data and Social Order (0.5) #
MC438	Mediated Feminisms (0.5) #
MC439	Media, Technology, and the Body (0.5) # (not available 2024/25)
MC440	Children, Youth and Media (0.5) #

And
One of the following courses:
For students who want to specialise in qualitative methods:
MC5M1 Advanced Methods of Qualitative and Quantitative Research in Media & Communications (Specialisation Qualitative Analysis) (0.5)
Plus an additional qualitative analysis course taught at the methodology department.
Or for students who want to specialise in quantitative methods or who have a scholarship that requires quantitative methods training (e.g. ESRC):
MC5M2 Advanced Methods of Research in Media & Communications (Specialisation Quantitative Analysis) (1.0) A

Optional (examined/not examined):

Other graduate courses relevant to research subject and agreed with supervisor.

Transferable skills courses
Compulsory (not examined):
MC500 Research Seminar for Media and Communications (0.0)

Optional (not examined):
Courses to the value of 0.0 unit(s) from the following:
LN988 Thesis Writing (0.0) #
Modern Foreign Language courses offered by the Language Centre.
Other graduate seminars of relevance to research subject.

Presentation requirements:
At least one presentation annually at following:
MC500 Research Seminar for Media and Communications (0.0)

And a poster presentation at the MC500 Mini-conference in WT11

Year 2

Training courses
Optional (examined/ not examined):
Students can take either another qualitative or quantitative analysis course offered by the Department of Methodology. Courses must be approved by the supervisor and discussed with the MC5M1/MC5M2 convenor.

Transferable skills courses
Compulsory (not examined):
MC500 Research Seminar for Media and Communications (0.0)

Presentation requirements:
At least one presentation annually in the following:
MC500 Research Seminar for Media and Communications (0.0)
And a poster presentation at the MC500 Mini-Conference in WT11
Other graduate seminars of relevance to research subject.

Year 3

Transferable skills courses
Optional (not examined):
MC501 Advanced Doctoral Workshop in Media and Communications (0.0) #

Year 4

Transferable skills courses
Optional (not examined):
MC501 Advanced Doctoral Workshop in Media and Communications (0.0) #

Research Students are expected to complete their research.

Prerequisite Requirements and Mutually Exclusive Options
means there may be prerequisites for this course. Please view the course guide for more information.

Footnotes
A: Students wishing to select this option must seek approval from the Programme Director. Approval is subject to timetabling constraints.

Progression and upgrade requirements
Students will be required to submit a full Thesis Proposal of 10,000 words to their Thesis Committee in week 4 of Summer Term in their first year (part-time students can submit their Proposal in week 4 of Summer Term in their second year). This paper will include a substantive statement of the aims, theories and methods proposed for the thesis, a tentative chapter outline, an indicative bibliography and a timetable for its completion. Together with any examination/s for quantitative methodological courses, the thesis proposal will form part of the evaluation process, and, together with an upgrade viva, will determine whether students are permitted to upgrade

from MPhil to PhD and continue into their second year. In the Summer term of each year the progress of each student registered in the Department is assessed and a decision made as to whether students can proceed to the next academic session. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student re-register as an MPhil student or a recommendation that the student not be allowed to re-register.

PhD completion and submission

Submission of the final thesis will be in accordance with the relevant regulations. With approval from the supervisor(s), the thesis will consist either of a monograph that forms an integrated whole; or alternatively, a series of papers, with an introduction, critical discussion, and conclusion. A thesis that contains only joint papers is not acceptable. It must contain linking materials which must be solely the work of the candidate; the part played by the candidate in any work done jointly with the supervisor(s) and/or fellow researchers must be clearly stated by the student; the introduction and conclusion should be serious pieces which clearly explain the intellectual link between the papers and the conclusion, and what they add together to knowledge of the field.

MPhil/PhD in Philosophy

Programme Code: RPPH

Department: Philosophy, Logic and Scientific Method

For students starting this programme of study in 2024/25

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor. All programmes of study should be agreed with the supervisor at the start of the year.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (examined/ not examined):

PH501 Philosophical Problems Seminar (0.0)

Students who have never taken a paper in formal logic at degree must take the following (examined):

PH502 Logic and Probability (1.0)

Students who have already taken a formal logic course should choose one further MSc course not already taken as part of an MSc degree. Students have three options regarding assessment for this course: (i) they can take the examination for the course, (ii) they can choose to write two assessed essays, one at the end of each of the first two terms, or (iii) they can (with the course teacher's approval) choose to write a single, more substantial assessed essay at the end of the second term, producing a first draft of the essay at the end of the first term.

Either

A further MSc course (again one not taken as part of the MSc course) plus one term unit of PhD level seminars.

The seminars on offer are:

PH500 Research Methods in Philosophy (0.0)

PH551 Research Seminar in the Philosophy of Natural Sciences (0.0)

PH555 Research Seminar in the Philosophy of Economics and Social Sciences (0.0)

If students choose to take a further MSc course, they can either decide to be examined or instead choose to write two assessed essays, one at the end of each of the first two terms. PhD level seminars are not examined and assessment is solely based on essays.

Or

Three term units of PhD level seminars with associated coursework. Taking three term units means that students can either take all three terms of one of these seminars or 'mix and match' by taking different seminars in different terms. Seminars must be taken with associated course work.

Transferable skills courses

Optional (not examined):

Transferable skills courses offered by the Teaching and Learning Centre or the Department of Methodology.

Year 2

Training courses

Optional (not examined):

PH500 Research Methods in Philosophy (0.0)

PH551 Research Seminar in the Philosophy of Natural Sciences (0.0)

PH555 Research Seminar in the Philosophy of Economics and Social Sciences (0.0)

Optional (examined/not examined):

Transferable skills courses offered by the Teaching and Learning Centre or the Department of Methodology.

Year 3

Training courses

Optional (not examined):

PH500 Research Methods in Philosophy (0.0)

PH551 Research Seminar in the Philosophy of Natural Sciences (0.0)

PH555 Research Seminar in the Philosophy of Economics and Social Sciences (0.0)

Optional (examined/not examined):

Transferable skills courses offered by the Teaching and Learning Centre or the Department of Methodology.

Year 4

Training courses

Optional (not examined):

PH500 Research Methods in Philosophy (0.0)

PH551 Research Seminar in the Philosophy of Natural Sciences (0.0)

PH555 Research Seminar in the Philosophy of Economics and Social Sciences (0.0)

Optional (examined/not examined):

Transferable skills courses offered by the Teaching and Learning Centre or the Department of Methodology.

Progression and upgrade requirements

Successful completion of work required for each year is a necessary condition for re-registration in the following year; and for upgrading from MPhil to PhD status.

During the first year students must write a first chapter of the thesis as well as an outline (research plan) of the rest of the thesis. The chapter should be around 40 pages and **needs to be submitted on 1 September**; the research plan should be around 10 pages and needs to be submitted at the end of Spring Term, the exact date to be confirmed at the start of the academic year. This upgrading will normally take place after the successful completion of Year 1 requirements in Case A, and after the successful completion of Year 2 requirements in Case B. In both cases once you are registered for the PhD that registration will be backdated to the start of your MPhil/PhD studies.

Dissertation submission

The Department allows PhD dissertations in two formats:

1. a more traditional monograph-style dissertation which forms an integrated whole,
2. a collection of papers, known as a "dissertation by papers".

A **dissertation by papers** in Philosophy should conform to the following rules (note that these may differ to rules adopted in other departments).

1. The dissertation must contain **at least three substantial papers**. These papers need not be as tightly integrated as in a monograph-style dissertation, but

there should nonetheless be some connections between them. They should all fall within the same general area of philosophy (e.g., ethics, or philosophy of science) and should share some common themes or concepts.

2. In addition to the papers, the dissertation must also contain a substantial **introduction**, which explains the aims of the papers and how they are connected. (Other sorts of content, e.g., a conclusion or appendix, are permitted but not required).

3. It is permitted for some of the papers to be co-authored, but the majority should not be. In cases of co-authored work, the contribution of the candidate in producing this work should be substantial and must be clearly stated in the dissertation.

4. The total word count of the dissertation—including all papers, the introduction, and any other material— should normally fall in the range **50,000 to 80,000 words**. Longer dissertations are permitted up to the LSE limit of 100,000 words. Shorter dissertations are permitted if the work is of exceptional quality and there is no strong intellectual reason for adding further content. (Note that the same policy applies to monograph-style dissertations).

MPhil/PhD in Psychological and Behavioural Science

Programme Code: RPPB
Department: Psychological and Behavioural Science
For students starting this programme of study in 2024/25
The MPhil/PhD programme includes taught courses on both methodology and theory. The precise courses students are required to attend varies and exemptions may apply depending on prior experience and qualifications. These matters should be discussed and agreed with the supervisor in the first formal supervision meeting.

Paper	Course number, title (unit value)
Years 1-4	

Training courses
Students are asked to complete 10 hours of research training in each year of study, which should be agreed with your supervisor according to your needs. Taught classes can be accessed within the Department of Psychological and Behavioural Science, as well as in departments across LSE including Methodology. Methodology courses available include Qualitative Research Methods, Survey Methodology, Applied Regression Analysis and Multivariate Analysis and Measurement. Training courses are offered through our PhD academy and with affiliate institutions. Access is subject to agreement with the relevant course convenors (e.g. according to space considerations).

Transferable skills courses
Compulsory (not examined):
PB500 Current Research in Psychological and Behavioural Science (0.0)
Weekly seminars including plenary and specialist sessions in Autumn Term, Winter Term and Spring Term.

Progression and upgrade requirements
The first year Extended Essay and the second year Upgrade chapters (see below) are examined by a three-person thesis committee, which includes the student's supervisor, as well as two other academic colleagues.

Targets for progress
Year 1 - Extended Essay of 6,000 words, submitted on first day of Winter Term.
Year 2 - Upgrade viva. Two draft chapters of 10,000 words each (total of 20,000 words), submitted on first day of Winter Term. These chapters form the basis of an oral examination by three person thesis committee

usually four to six weeks after submission. Success in this examination results in upgrade from MPhil to PhD status.

Year 3 - Completed first draft by end of three years.

Teaching experience
Graduates will usually gain some teaching experience and have had the opportunity to develop teaching skills.

The Department of Psychological and Behavioural Science allows for two formats of PhD:
1. The "thesis (aka monograph) format" is the traditional PhD format. Candidates produce several chapters examining a single subject in an integrated way, similar to the format and structure of a book. This remains the most common format, and it is expected that most PhD candidates will use this format.
2. The "article format" is a more recent PhD format which has become common in experimental domains. Candidates produce distinct papers which are combined with integrative material to address a single subject. The defining feature of this format is that some of the "chapters" can be articles which either have been published or prepared for publication. This format tends only to be suitable for PhD projects which comprise a series of distinct (but inter-related) empirical studies.

Extra guidelines for "article format" PhD
The thesis should comprise three to six publishable articles minimally framed by an introduction, critical discussion, and conclusion. Articles are normally co-authored with supervisors (this is a more general requirement about the papers written on your PhD topic while being under supervision). Articles and chapters both count as "papers" – the most important part is that they are publishable quality. They do not have to have been submitted, and even if they have been submitted and accepted this does not automatically entail that the Committee will find them suitable within the larger context of the project.

MPhil/PhD in Regional and Urban Planning Studies

Programme Code: RPRP
Department: Geography and Environment
For students starting this programme of study in 2024/25
In addition to progressing with your research, you are expected to take the courses listed below. You may take courses other to those listed but must discuss this with your supervisor.

Paper	Course number, title (unit value)
Year 1	
	Training courses
	Compulsory (not examined):
	GY502 Staff / Research Students Seminars (0.0)
	Compulsory (examined):
	1. Courses to the value of one unit from the relevant MSc degrees
	2. Relevant subject-specific training courses to the value of 1.0 unit:
	GY428 Applied Quantitative Methods (0.5) #
	GY460 Techniques of Spatial Economic Analysis (0.5) #
	MY500 Fundamentals of Social Science Research Design (0.5)
	MY521A Qualitative Research Methods (0.5) 1
	MY521W Qualitative Research Methods (0.5) 2
	MY526 Doing Ethnography (0.5) #
	MY528 Qualitative Text and Discourse Analysis (0.5) #
	MY556 Survey Methodology (0.5) #
	MY557 Causal Inference for Observational and Experimental Studies (0.5) #
	MY559 Quantitative Text Analysis (0.5) #

Methods courses: other relevant subject-specific training courses can be chosen subject to supervisor and course manager approval

Note: Students who join the PhD programme after having completed an MSc Regional and Urban Planning Studies or another Department of Geography MSc cannot retake the same courses or be waived the one unit of subject-specific training.

Transferable skills courses

Compulsory (not examined):

GY500 Research Project Seminar (0.0)

Year 2

Training courses

Compulsory (not examined):

GY502 Staff / Research Students Seminars (0.0)

Progression and upgrade requirements: Once on the MPhil/PhD programme you will go through a First Year Progress Review, taking place in the Summer Term of your first year.

For the First Year Progress Review, students must submit a written progress report containing an extensive and updated research proposal (typically including an introduction to the topic and motivation for the research; aims and objectives/research questions; contribution to knowledge; summary of methods to be used; and outline of the work to be done) and either a comprehensive literature review or a substantive draft of a chapter/paper as evidence of progress made during the year.

Normally, there will be a progress review meeting between the student and the supervisors (main supervisor and review supervisor) to discuss the written material presented. The work has to reach an acceptable standard to enable the student to progress. There is provision for a second Supplementary Review in cases where there are doubts as to whether progress has been sufficient to allow the student to enter the second year. Progression to the second year (third year of the 1+3 programme) is also dependent on students having passed all required examinations and obtained at least one merit, and having presented their work satisfactorily in the doctoral presentation workshops.

All research students are initially registered for an MPhil and have to be upgraded to PhD status. The upgrade from MPhil to PhD usually occurs during the second year of full-time registration. The exact timing depends on the student's progress. Students are required to submit a formal written upgrade report consisting of an extensive revised research proposal, two substantive draft papers/chapters, of which one can be a literature review, and a detailed plan for completion. Students are asked to discuss their research paper/thesis outline during an Upgrade Meeting in front of an Upgrading Committee normally formed by main supervisor, review supervisor and a third member of staff with relevant expertise. The material is evaluated by the Upgrading Committee, who will recommend transferral to PhD registration if the

work is judged to be of sufficient quality and quantity.

The upgrade is also dependent on students having completed all required training courses and having made a satisfactory research presentation in their doctoral presentation workshop.

In addition to these formal arrangements, each year during the Summer Term and throughout the course of their studies, all PhD students and their supervisors have to complete a yearly Progress Report Form, detailing progress made, problems arising and plan/timeline for completion. The forms are sent to the the Director of Post-Graduate Studies for approval before students are able to re-register for the following session. If perceived lack of progress is identified, it can trigger a more formal annual review of progress in which the student is asked to produce specific written documents to be evaluated by a review panel.

Composition and content of the thesis:

1. General

For the award of a PhD a student is required to submit (normally within four years of full-time registration, or part-time equivalent) a thesis which:

- Forms a distinct contribution to the knowledge of the subject and affords evidence of originality by the discovery of new facts and/or by the exercise of independent critical power'
- Gives a critical assessment of the relevant literature, describes the method of research and its findings, and includes a discussion on those findings, and indicates in what respects they appear to the candidate to advance the study of the subject; and so demonstrates a deep and synoptic understanding of the field of study, and;
- Demonstrates research skills

What these criteria mean in practice will vary between topics and with the conventions of the different sub-disciplines of our various PhD programmes. Supervisors are responsible for providing guidance as to what they imply for a student's particular research project, though ultimately it is examiners who decide whether to recommend the award of the PhD.

2. Form

Subject to approval of a student's supervisors, in relation to conventions and publication practices in the field appropriate to your research, your thesis can take either of two forms:

- (i) The monographic PhD is written as an integrated whole. Such a thesis is a monograph of up to 100,000 words.

More details about the specific requirements can be found in the School's Regulations for Research Degrees, which can be found in the LSE Calendar.

- (ii) A set of publishable papers – on a set of related topics – within a context framed by an introduction, critical discussion, and conclusion. Candidates who are being examined may submit such a thesis, subject to the approval of their supervisor, and the following provisos:
 - (a) The thesis must meet all general academic requirements expected of the traditional thesis and should similarly reflect what can be expected from 3 years of effective full-time research.
 - (b) It should normally include either:
 - (i) At least three single-authored papers of publishable quality; or
 - (ii) At least two single-authored papers plus at least two jointly-authored papers (to which the candidate has made a major contribution) of such quality, subject to provision to the examiners of a clear, agreed statement from supervisors and other authors of the respective contributions to each.

Other possible combinations of joint- and single-authored papers might be sufficient to constitute a PhD thesis. If

the structure of the student's thesis deviate from either (i) or (ii) here above, the student should seek explicit approval from their supervisors and from the Director of Doctoral Studies.

- (c) All papers should be primarily the result of research undertaken during the period of registration for the degree.
- (d) The thesis should include a substantial introduction and a conclusion, which are expected to highlight the contributions of the papers to knowledge in the relevant field and demonstrate how the set of papers meets the general requirements set out for a PhD above.

It is recommended that paper-based PhD submissions include an integrated bibliography at the end of the thesis – even where there are separate bibliographies for the different papers. If a student has any doubts, please discuss this matter with your supervisors.

A student should discuss with their supervisors which PhD form is more suitable for their PhD work even if the norm may be very clear in relation to their specific field of research; the specific circumstances and aspects of the student's research topic are to be considered.

MPhil/PhD in Social Policy

Programme Code: RPSA

Department: Social Policy

For students starting this programme of study in 2024/25
In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

SP420 Understanding Policy Research (Advanced) (0.5) #

Optional (not examined):

If not already taken previously:

- MY500 Fundamentals of Social Science Research Design (0.5)
 - MY521A Qualitative Research Methods (0.5) 1
 - MY521W Qualitative Research Methods (0.5) 2
 - MY525 Case Studies and Comparative Methods for Qualitative Research (0.5) #
 - MY551A Introduction to Quantitative Analysis (0.5) 3
 - MY551W Introduction to Quantitative Analysis (0.5) 4
- Students will discuss with their supervisors any other methodological training that may be relevant for the successful completion of the MPhil/PhD programme.

Transferable skills courses

Compulsory (not examined):

SP501 Research Student Seminar (0.0)

Optional (not examined):

Relevant courses provided by the Library, Teaching and Learning Centre and Department of Methodology.

Year 2

Training courses

Optional (not examined):

- MY552A Applied Regression Analysis (0.5) # 5
- MY552W Applied Regression Analysis (0.5) # 6
- MY555 Multivariate Analysis and Measurement (0.5) #

- 6: MY552W can not be taken with MY552A

Progression and upgrade requirements

Each student is required to undertake Major Review in the summer term of their first year (second year for part-time students). For Major Review they must submit a 10,000 word document with a detailed thesis proposal, their research question, a literature review, a description of their methodology, their plans for data collection and a timetable through to completion. They are interviewed on this document by senior staff who make the decision on upgrading.

Each year post-Major Review, every student is expected to submit a 1,000 to 2,000 word progress report, approved by supervisors, to the Doctoral Programme Director(s).

Each pre-Major Review student is expected to make a presentation on their proposed research to the SP501 seminar prior to the submission of their major review document and to address issues raised by the Doctoral Programme Director(s).

Composition of Theses

PhD theses, whether comprising papers or in book format are normally expected to contain a minimum of three substantive chapters / papers of which a minimum of two should be sole authored. Theses are also normally expected to contain a substantive introduction and conclusion which locate the thesis within the general field to which it makes a contribution.

MPhil/PhD in Social Research Methods

Programme Code: RPMI

Department: Methodology

For students starting this programme of study in 2024/25

Paper Course number, title (unit value)

Year 1

Training courses

Optional (examined):

In the first year, students will typically spend a portion of their time taking some methodological and/or substantive courses. These are selected in discussion with the supervisors dependent on assessed needs. The courses will normally be some of the research courses taught by the Department of Methodology (any courses with course codes MY5**) but they may also include courses from other LSE departments.

The supervisors may require that a student be formally assessed for some such courses, and that the results of these assessments be included as part of the conditions for progression to the second year. Any such conditions will be communicated to the student in writing early in the Michaelmas term of Year 1.

Courses that are not formally required for progression can be either assessed (taken for credit) or audited. Students should agree with their supervisors which courses they will take for credit and which courses they will audit.

Optional (not examined):

Courses that are not formally required for progression can be either assessed (taken for credit) or audited.

Students should agree with their supervisors which courses they will take for credit and which courses they will audit.

Year 2

Training Courses

Optional (not examined):

Students are encouraged to audit or take for credit further courses which are useful to them, with the agreement of their supervisors.

Year 3

Training courses

Optional (not examined):

Students are encouraged to audit or take for credit further courses which are useful to them, with the agreement of their supervisors.

Year 4

Training courses

Optional (not examined):

Students are encouraged to audit or take for credit further courses which are useful to them, with the agreement of their supervisors.

Progression and upgrade requirements

The major milestones and targets for progress during the programme are the following:

Year 1: First-year progress review and presentation at the PhD day

Year 2: Upgrade from MPhil to PhD status

Year 3: Third-year progress review

Year 4: Completion and submission of the PhD thesis
In the Summer Term of their first year of registration (full-time equivalent), students will submit a 10,000-word first-year review document that outlines the aims, methods and theoretical motivation of their thesis, and provides a plan for the programme of work leading to the final thesis. In essence, this document is the extended, in-depth research proposal for the PhD research, in a form which takes into account the student's work in the first year. Students will also give an oral presentation of this document at the PhD Day. The written review document and oral presentation will be assessed by a review panel of two academics who are not on the supervisory team. This work has to reach an acceptable standard to enable the student to progress to the second year.

In the Summer Term of their second year, students will submit a document for consideration for upgrade from the MPhil to the PhD programme. This document should consist of a minimum of three draft chapters of the thesis, plus a detailed plan and timetable for the completion of the remainder of the PhD and a short introduction which links together the other parts of the document. The upgrade materials will be evaluated by an upgrade panel which will consist of two academics, not necessarily from the Department of Methodology. The panel will conduct an oral examination where the student will have an opportunity to defend the upgrade materials. The panel will then recommend transfer to PhD registration if in their judgement the student's progress and plans for the remaining work are of a sufficient quality and quantity that the work can reasonably be expected to lead, by the end of the student's fourth year of registration, to a thesis which will meet the requirements of a PhD thesis as stated in the LSE Regulations.

In the Summer Term of their third year of registration, students will submit a progress report. The focus of the third-year progress review is whether the student is making timely progress towards the goal of finishing the work and submitting the PhD thesis within the normal maximum of four years of registration. The report will be assessed by a review panel who will also conduct an interview with the student.

Throughout their MPhil/PhD studies, students will attend

the Department's research seminar and other specialist workshops and seminars related to their interests. Each student must give a presentation of their work at every Department of Methodology PhD day.

Teaching opportunities

The Department strongly encourages MPhil/PhD students to engage in teaching and offers a number of opportunities as Graduate Teaching Assistants (GTAs) on its methodology courses. A Postgraduate Certificate in Higher Education is offered to those who wish to pursue it.

Department of Methodology local rules for the composition of PhD theses

(to be read in conjunction with the Regulations for Research Degrees <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForResearchDegrees.pdf>)

A PhD thesis may take the form either of a monograph, or a paper-based format. The decision on the appropriate format is approved by the supervisory team.

Paper based theses will:

- Consist of a minimum of 3 publishable empirical papers (normally 6,000-10,000 words), of which at least one is single-authored. Other papers may be co-authored.
- Include linking materials which integrate the contribution as a whole, normally including an Introduction (2,000-4,000 words), Literature Review (8,000-10,000 words) and Conclusion (2,000-4,000 words). Linking materials must be single authored.

Note for prospective students: For changes to graduate course and programme information for the next academic session, please see the graduate summary page for prospective students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm](https://info.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGProspective.htm). Changes to course and programme information for future academic sessions can be found on the graduate summary for future students [lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm](https://info.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/updatedPGFuture.htm).

MPhil/PhD in Sociology

Programme Code: RPSO

Department: Sociology

For students starting this programme of study in 2024/25

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1

Training courses

Compulsory (examined):

SO500 Aims and Methods Research Class for MPhil Students (1.0)

Students may also be asked to attend and pass the assessment for up to one further course unit (or two half units) chosen with their supervisor on the basis of an assessment of their research training needs.

Optional (examined):

MY500 Fundamentals of Social Science Research Design (0.5)

MY521A Qualitative Research Methods (0.5) 1

MY521W Qualitative Research Methods (0.5) 2

MY551A Introduction to Quantitative Analysis (0.5) 3

MY551W Introduction to Quantitative Analysis (0.5) 4

MY552A Applied Regression Analysis (0.5) # 5

MY552W Applied Regression Analysis (0.5) # 6

Other courses from Sociology Masters programmes
Specialist research courses:

- SO491 Quantitative Social Research Methods (0.5)
 SO492 Qualitative Social Research Methods (0.5)
 SO511 Research Seminar in Political Sociology (0.0) (not available 2024/25)
 SO521 Research Seminar on Cities and Space (0.0) (not available 2024/25)

Transferable skills courses**Optional (not examined):**

Methods software training workshop

And

Workshop in Information Literacy: finding, managing and organising published research and data

Year 2 and/or Year 3**Training courses****Compulsory (not examined):**

SO501 Data Analysis Workshop (0.0) A

Year 3 and/or Year 4**Training courses****Optional (not examined):**

SO505 Becoming a Professional Sociologist (0.0) #

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

1: MY521A can not be taken with MY521W

2: MY521W can not be taken with MY521A

3: MY551A can not be taken with MY551W

4: MY551W can not be taken with MY551A

5: MY552A can not be taken with MY552W

6: MY552W can not be taken with MY552A

Footnotes

A: SO501 is required.

Progression and upgrade requirements

In the Summer term of each year the progress of each student registered in the Department is discussed at the MPhil/PhD Board, which is a general meeting of all research student supervisors. This Board decides whether to recommend to the School that students be permitted to proceed to the next year of study. If progress is unsatisfactory, a course of action to assist students to reach performance standards deemed appropriate by supervisors may be required, or a recommendation may be made that the student not be allowed to re-register. The following benchmarks are used by the MPhil/PhD Board to determine if students are progressing appropriately:

By Spring Term Year 1 for Full Time Students:

Submission of Formative Essay for SO500, including approvals from the Ethics Committee and Health and Safety

By Spring Term Year 2 for Full Time Students: Upgrade from MPhil to PhD Student

By Spring Term Year 3 for Full Time Students: Successful completion of the Third Year Progression Package

In addition, students are expected to have completed requirements as laid out by the supervisory team. The PhD is an individual project and will require research and writing tailored to that project.

Full time students are required to have submitted their Upgrade materials in Week 6 of the Autumn Term of Year 2, and to have successfully defended their research design in viva voce by the end of the Autumn Term of Year 2. Upon successful completion, the student will upgrade from MPhil to PhD student. All full-time research students are required to have made the transition from MPhil to PhD (upgrading) student within two years of first registration and to have submitted their PhD thesis within four years. Part-time students are expected to be upgraded to PhD student by the end of their third year, and to submit their thesis within eight years.

The decision to upgrade a student from MPhil to PhD is taken by a panel consisting of two academics from

the Department. For upgrade, students submit a 10,000 word research proposal that includes: 1) the research question(s); 2) a concise literature review through which the significance of the proposed research is articulated; 3) a discussion of research methodology; 4) preliminary data collection and analysis or a 'pilot' study; and 5) discussion of research ethics and risks. This material is then assessed by viva voce, with the supervisor(s) in attendance and available to be consulted by the panel. A written report is made by the panel on the basis of both the written upgrade submission and the viva.

Students should aim to have a complete a first draft of their thesis in years three to four and allow three to six months for revision and submission. To facilitate this, students are required to submit a Third Year Progression Package no later than Week 6 of the Winter Term in the 3rd Year for full time students. The decision to progress a student from the third to the fourth year is taken by a panel consisting of two academics from the LSE with at least one being from the Sociology Department. Students are to submit: a) two draft chapters (an introduction and a substantive chapter) totalling no more than 20,000 words; b) a thesis outline; c) a timeline for completion and d) a bibliography. This material is then assessed by viva voce, with the supervisor(s) in attendance and available to be consulted by the panel.

Award of the PhD

The PhD is awarded according to the rules of LSE and the department, as follows:

A thesis to be submitted by monograph. The thesis will:

1. consist of the candidate's own account of their investigations. Work already published, either by the candidate or jointly with others, may be included only if it forms an integral part of the thesis and so makes a relevant contribution to its main theme and is in the same format as the rest of the thesis. The student must clearly state the part played by the candidate in any work done jointly with the supervisor(s) and/or fellow researchers;
2. be an integrated whole and present a coherent argument;
3. be written in English and must be presented in line with published School guidance;
4. include a full bibliography and references.

MPhil/PhD in Statistics

Programme Code: RPST

Department: Statistics

For students starting this programme of study in 2024/25

In addition to progressing with their research, students are expected to take the listed training and transferable skills courses. Students may take courses in addition to those listed, and should discuss this with their supervisor.

Paper Course number, title (unit value)

Year 1**Training courses****Compulsory (examined)**

ST505 Statistical Modelling and Data Analysis (0.5) #

ST552 Probability and Mathematical Statistics I (0.5)

And one of:

ST510 Foundations of Machine Learning (0.5) #

ST553 Probability and Mathematical Statistics II (0.5)

#

Students may take a different course option with the agreement of both the supervisor and PhD Programme Director.

Optional (not examined):

Courses offered by the London Graduate School in Mathematical Finance.

Courses offered by the London Taught Course Centre.

Optional (examined):

Masters level courses relevant to research and agreed by supervisor in department, the School or University of London College.

Transferable skills courses**Compulsory (not examined):**

One presentation.

Attendance of departmental seminars appropriate to the student's field of study

Optional (not examined):

London Graduate School in Mathematical Finance Seminar Day.

Poster Presentations.

The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined):

The department encourages students to attend and, where the opportunity arises, present a paper or poster at conferences during their PhD programme in relation to their particular research topic.

Optional (examined):

Courses provided by the Department of Methodology.

Prerequisite Requirements and Mutually Exclusive Options

means there may be prerequisites for this course. Please view the course guide for more information.

Progression and upgrade requirements

Formal assessment is made towards the end of each Spring Term. This assessment is based on a combination of course evaluation, the evaluation of a preliminary research project, and on statements made by the student and the supervisors in the progress report form. Performance in the compulsory taught courses will contribute to the decision on a student's progression to the next year. Students are also required to complete a supplementary report, providing in more detail an outline of their current research.

The MPhil/PhD Evaluation Committee will meet during the Spring Term in order to oversee the progress of students and to decide on whether to recommend to the School that students be permitted to proceed to the next year of study. The outcome of this progress review may be progression, progression to the next year with conditions, or de-registration from the programme. The following benchmarks are used by the MPhil/PhD Evaluation Committee to determine if students are progressing appropriately:

- By Spring Term Year 1 (full-time students):
 1. Pass at least two courses from the ones taken. At least one has to be either ST552 or ST505;
 2. In the case of students failing one course, they should have demonstrated serious engagement and serious attempts in all assessments;
 3. Present their research topic at the annual presentation events.
- By Spring Term Year 2 (full-time students): Upgrade from MPhil to PhD status and present their research findings at the annual presentation events (Successful completion of 1. and 2. above is required for an upgrade)
- By Spring Term Year 3 (full-time students): Submit a plan for completion and present their research findings at the annual presentation events

In addition, students are expected to have completed requirements as directed by the supervisory team, according to the needs of their individual PhD project. All full-time students are required to have made the transition from MPhil to PhD status within two years of first registration and to have submitted their PhD thesis within four years.

It is expected that the student is assessed for upgrade within the first 18 months of registration. The student is required to submit a written report of literature searches,

research findings and related work, together with a written research plan. The student presents her/his work to date and findings to a panel (comprised of the first and/or second supervisor and another expert in the field of the research undertaken by the student) and answers questions from the panel. If satisfactory progress has been made, the programme director will recommend that registration be upgraded to PhD status. The department's research committee also monitors the progress of PhD students.

Teaching opportunities

The department employs Graduate Teaching Assistants (GTAs) to teach a number of its undergraduate and postgraduate courses. In particular ST102, Elementary Statistical theory, and ST107, Quantitative Methods, are taught to a large number of students across the School and require a significant number of classes. Research students are encouraged to undertake some teaching from year two onwards. First year MPhil/PhD students are normally not permitted to teach, although some marking may be available during the year or for the external degree at the end of the year. A Postgraduate Certificate in Higher Education is offered to those who wish to pursue this.

Thesis Guidelines

A PhD thesis must form a distinct contribution to the knowledge of the subject. It must advance original ideas or hypotheses with suitable arguments and evidence, and exercise independent critique. A thesis must give a critical assessment of the relevant literature, describe the method of research and its findings. It must include a discussion of those findings and their significance in advancing the knowledge of the field.

As we have different research groups, in practice the criteria will vary between topics and within the overarching theme of each research group. Supervisors are responsible for providing guidance, but ultimately the candidate is responsible for the decisions on their thesis. It is ultimately the examiners who decide whether to recommend that the candidate is worthy of being awarded a PhD.

Format

Aligning with the LSE regulations for research degree (Rule 48), <https://info.lse.ac.uk/Staff/Divisions/Academic-Registrars-Division/Teaching-Quality-Assurance-and-Review-Office/Assets/Documents/Calendar/RegulationsForResearchDegrees.pdf> there are two modes of PhD thesis approved by the Department of Statistics:

- A monograph that forms an integrated whole;

Or

- A set of publishable papers on a set of topics and adhering to the following guidance:
 1. Include an introductory chapter at the beginning of the thesis which includes a brief overview of the field, summarizes the papers, and provides a rationale for their inclusion in the thesis. Links between the papers should be articulated clearly.
 2. Inclusion of co-authored papers is considered on a case-by-case basis, and any form of co-authorship should be discussed with the candidate's supervisor.
 3. The norm is three papers, but deviation can take place depending on the overall quality and nature of the papers submitted/to be submitted. The whole manuscript should constitute a significant contribution to the research area. Both quality and quantity of the produced work will be considered.

Research Course Guides

AC500

Topics in Accounting Research (AOI)

This information is for the 2024/25 session.

Teacher responsible: Prof Michael Power MAR 3.43

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This is an advanced course for doctoral and postdoctoral students focusing on the institutional and organisational context of accounting practices in their broadest sense. The seminars are generally based on key readings at the interface between accounting, organisation studies, regulation and management. Discussions will be focused on the analysis of accounting and calculative practices in context drawing on a wide range of approaches. The course provides students also with training in qualitative methods in accounting research, including document analysis; interviewing techniques and transcript analysis; ethnographic methods in accounting; and theory building from data.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a reading week in week 6 of both AT and WT.

Indicative reading: There is no single text for this course and the seminars will be based on pre-distributed readings.

Assessment: First year MRes/PhD students in Accounting (Accounting, Organisations and Institutions Track) will not normally be formally assessed but they will receive formative feedback on written work as agreed with the Course Director.

Second year MRes/PhD students in Accounting (Accounting, Organisations and Institutions Track) are formally assessed by:

- (i) A referee report of a working paper (25% weighting). This will normally be assigned in week 5 of Winter Term to be worked on during the following week (6) when there is no class meeting.
- (ii) A take-home examination (75% weighting). This will cover a selection of key areas/papers studied in AC500 and AC504. It will be designed to be completed within a three-day (72 hour) period in the Spring Term.

In addition, all students participating in the course are expected to present and discuss their own work in progress as well as other published works discussed in this course. Students will receive feedback on their presentations, so that they can develop and improve their presentation skills.

AC501 Not available in 2024/25

Topics in Accounting Research (EoA)

This information is for the 2024/25 session.

Teacher responsible: Dr Xi Li MAR 3.40

Availability: This course is compulsory on the MRes/PhD in Accounting (Economics of Accounting Track). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This is a readings-based course dealing with advanced issues in accounting research methods. Its primary focus is to study accounting and financial reporting issues from an economics perspective. While much research studied in the course will be empirical archival in nature, the course also emphasises the importance of theory and research design in developing high quality research. The course covers a wide range of accounting issues including the design of and choices between alternative accounting methods, the use of accounting numbers in economic decision making, assessment of financial reporting quality, the economic consequences of financial reporting, and the interactions between financial reporting, legal and economic institutions, and corporate governance.

Teaching: 20 hours of lectures in the AT. 20 hours of lectures in the

WT.

There will be a reading week in week 6 of both AT and WT.

Assessment: Report (25%) and take-home assessment (75%).

Second year MRes/PhD students in Accounting (Economics of Accounting Track) are formally assessed by:

- (i) A referee report of a current working paper (25% weighting). This will normally be assigned in Week 5 of Winter Term to be worked on during the following week (6) when there is no class meeting.
- (ii) A take-home examination (75% weighting). This will cover a selection of key areas/papers studied in AC501 and AC506. It will be designed to be completed within a three-day (72 hour) period in the summer.

First year MRes/PhD students in Accounting (Economics of Accounting Track) will not normally be formally assessed but they will receive feedback in the form of formative assessments. In addition, all students participating in the course are expected to present research papers being studied and will receive feedback on their presentations aimed at developing and improving their presentation skills.

AC502 Half Unit

Foundations of Accounting, Organisations and Institutions

This information is for the 2024/25 session.

Teacher responsible: Dr Andrea Mennicken MAR 3.24

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track). This course is available with permission as an outside option to students on other programmes where regulations permit. This course is also offered for students from other MPhil/PhD or MRes/PhD programmes, with the approval and written permission of the PhD in Accounting Programme Director (Accounting, Organisations and Institutions Track).

Course content: The object of the course is to provide students with exposure to advanced analyses of the accounting process within and between organisations, both public and private, and across societies more generally. Students will be required to engage with studies of accounting practices to understand how they are shaped by their institutional contexts, have behavioural consequences and can represent different values. The course will focus on how efforts to design internal and external accounting practices are both a function of specific economic and political interests, but are also shaped by social and political aspirations. The role of accountants and other agents of accounting processes will be addressed.

Overall, the course is intended to cultivate an understanding of the inter-relationships between technical, organisational and institutional issues. While some technical accounting knowledge will be helpful, it is not essential and each seminar will provide the necessary technical foundations.

Indicative topics include:

Foundations of Reporting, Calculation and Disclosure; Transnational Regulation and Standardisation; Accounting and the Notion of "Entity"; Audit and Assurance: The Audit Society; Organisational Boundaries, Structure and Control; Performance, Accountability Incentives; Accounting for Sustainability; Organisational Failure as a Process.

Teaching: Teaching will be delivered in the form of two weekly 90-minute sessions over 10 weeks during the Autumn Term. Each session contains a variety of technical content, practical exercises, and case analyses.

This course has a reading week in Week 6 of AT.

Formative coursework: Students are expected to come to each session prepared having done the assigned readings and having prepared the assigned cases and discussion questions.

Indicative reading: Chapman, Cooper & Miller (eds), *Accounting, Organizations and Institutions* (Oxford, 2009); Hopwood & Miller (eds), *Accounting as Social and Institutional Practice*, (Cambridge, 1994); Power, *The Audit Society*, (Oxford, 1999); Mennicken &

Espeland, "What's new with numbers" Annual Review of Sociology (2019); Power, "Modelling the microfoundations of the audit society: Organizations and the logic of the audit trail". Academy of Management Review (2021); Mennicken & Salais (eds), The New Politics of Numbers (Cham, 2022).

Assessment: Essay (100%, 8000 words) in the ST.

AC504

Topics in Accounting Research (AOI)

This information is for the 2024/25 session.

Teacher responsible: Professor Michael Power MAR 3.43

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This is an advanced course for doctoral and postdoctoral students focusing on the institutional and organisational context of accounting practices in their broadest sense. The seminars are generally based on key readings at the interface between accounting, organisation studies, regulation and management. Discussions will be focused on the analysis of accounting and calculative practices in context drawing on a wide range of approaches. The course provides students also with training in qualitative methods in accounting research, including document analysis; interviewing techniques and transcript analysis; ethnographic methods in accounting; and theory building from data.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

There will be a reading week in week 6 of both AT and WT.

Indicative reading: There is no single text for this course and the seminars will be based on pre-distributed readings.

Assessment: Report (25%) and take-home assessment (75%).

Second year MRes/PhD students in Accounting (Accounting, Organisations and Institutions Track) are formally assessed by:

(i) A referee report of a working paper (25% weighting). This will normally be assigned in week 5 of Winter Term to be worked on during the following week (6) when there is no class meeting.

(ii) A take-home examination (75% weighting). This will cover a selection of key areas/papers studied in AC500 and AC504. It will be designed to be completed within a three-day (72 hour) period in the Spring term.

First year MRes/PhD students in Accounting (Accounting, Organisations and Institutions Track) will not normally be formally assessed but they will receive formative feedback on written work as agreed with the Course Director. In addition, all students participating in the course are expected to present and discuss their own work in progress as well as other published works discussed in this course. Students will receive feedback on their presentations, so that they can develop and improve their presentation skills.

AC506 Not available in 2024/25

Topics in Accounting Research (EoA)

This information is for the 2024/25 session.

Teacher responsible: Dr Xi Li MAR 3.40

Availability: This course is compulsory on the MRes/PhD in Accounting (EoA) (Economics of Accounting Track). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This is a readings based course dealing with advanced issues in accounting research methods. Its primary focus is to study accounting and financial reporting issues from an economics perspective. While much research studied in the course will be empirical archival in nature, the course also

emphasises the importance of theory and research design in developing high quality research. The course covers a wide range of accounting issues including the design of and choices between alternative accounting methods, the use of accounting numbers in economic decision making, assessment of financial reporting quality, the economic consequences of financial reporting, and the interactions between financial reporting, legal and economic institutions, and corporate governance.

Teaching: 20 hours of lectures in the AT. 20 hours of lectures in the WT.

There will be a reading week in week 6 of both AT and WT.

Assessment: First year MRes/PhD students in Accounting (Economics of Accounting Track) will not normally be formally assessed but they will receive feedback in the form of formative assessments.

Second year MRes/PhD students in Accounting (Economics of Accounting Track) are formally assessed by:

(i) A referee report of a current working paper (25% weighting). This will normally be assigned in Week 5 of Winter term to be worked on during the following week (6) when there is no class meeting.

(ii) A take-home examination (75% weighting). This will cover a selection of key areas/papers studied in AC501 and AC506. It will be designed to be completed within a three-day (72 hour) period in the summer.

In addition, all students participating in the course are expected to present research papers being studied and will receive feedback on their presentations aimed at developing and improving their presentation skills.

AC507

Accounting Work in Progress Seminars

This information is for the 2024/25 session.

Teacher responsible: Dr Xi Li, MAR 3.40 and Dr Tommaso Palermo, MAR 3.23

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track) and MRes/PhD in Accounting (EoA) (Economics of Accounting Track). This course is not available as an outside option.

Course content: Research students present their work in progress to faculty and peers. Outside speakers may also be invited from time to time.

Teaching: The frequency of meetings to be determined according to the number of students, but the group will meet regularly (e.g. fortnightly) throughout the session.

Assessment: This course is not examinable.

AC599

Research Paper in Accounting

This information is for the 2024/25 session.

Teacher responsible: Dr Xi Li, MAR 3.40 and Dr Tommaso Palermo, MAR 3.23.

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track) and MRes/PhD in Accounting (EoA) (Economics of Accounting Track). This course is not available as an outside option.

Course content: Students produce a research paper related to the student's designated major field, to be submitted at the end of August.

Teaching: There are no direct teaching hours.

Formative coursework: Feedback on progress will be provided by the student's MRes/PhD supervisor/supervisory team.

Students will be asked to prepare and submit a detailed outline of their research paper, on which they will receive feedback in

the Autumn term. They will meet regularly with their supervisor/supervisory team throughout the year to further develop their research question, receive feedback on the proposed research design, data collection and analysis (if applicable), and writing up.
Assessment: Research paper (100%) in August.

AN500

Seminar on Anthropological Research

This information is for the 2024/25 session.

Teacher responsible: Dr Nicholas Long, Prof Deborah James and Prof Katherine Gardner

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: Seminar on Anthropological Research

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 12 hours of seminars in the ST.

There is a reading week in Week 6 of the AT and WT.

Assessment: This course is not assessed.

AN503

Thesis Writing Seminar

This information is for the 2024/25 session.

Teacher responsible: Dr Andrea Pia, Dr Gisa Weszkalnys and Dr Yazan Doughan

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option. This seminar is for 3rd and 4th year post-fieldwork students.

Course content: Students present draft dissertation chapters to their cohort.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 14 hours of seminars in the ST.

The contact hours listed above are the minimum expected. This course has reading week in Week 6 of the AT and WT.

Assessment: This course is not assessed.

AN505

Advanced Professional Development in Anthropology

This information is for the 2024/25 session.

Teacher responsible: Dr Harry Walker and Dr Mareike Winchell

Availability: This course is compulsory on the MRes/PhD in Anthropology. This course is not available as an outside option.

Course content: This seminar course has two main aims. First, it examines key theoretical concepts and approaches in Anthropology at an advanced level that may be relevant to post-fieldwork doctoral candidates. It may focus on widely ranging thematic areas, e.g. recent developments in cognitive anthropology and/or in material culture studies and/or in anthropological studies of ontology. The aim is to enhance the ability of students to engage with such debates at an advanced level. Second, the course aims to enhance the professional development of doctoral students by providing them with advice and support in relation to their career progression.

Teaching: 10 hours of seminars in the AT. 10 hours of seminars in the WT. 8 hours of seminars in the ST.

The contact hours listed above are the minimum expected.

Assessment: This course is not assessed.

DV501 Half Unit

Development History, Theory and Policy for Research Students

This information is for the 2024/25 session.

Teacher responsible: Prof James Putzel

Availability: This course is compulsory on the MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Available with the permission of the teacher responsible.

Course content: The course integrates the concepts and perspectives of a range of disciplines to consider: major trends of development and change in modern history and interpretations of them in the social sciences and contemporary economic and social theory and their bearing on the policy and practice of development. The course critically discusses concepts of 'development' and the historical evolution of paradigms of development thinking and policy. With reference to comparative historical experience, we explore the role of states and markets in development and/underdevelopment, colonial legacies and path dependencies, and developmental states in comparative perspective. We examine the impact of pro-market reforms, globalisation and financialisation, and challenges to the reigning development paradigm.

Teaching: 20 hours of lectures and 15 hours of seminars in the AT. This course is delivered through a combination of lectures and seminars in the Autumn Term. Students attend the lectures and seminars of DV400. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to make one presentation, usually jointly with another student, and to submit a formative essay of no more than 3000 words by the first day of Week 7.

Indicative reading: The following are recommended basic readings for the course:

A Kohli, *State-Directed Development: Political Power and Industrialization in the Global Periphery* (Cambridge, 2004).
 A Sen, *Development as Freedom* (Anchor, 1999).
 HJ Chang, *Kicking Away the Ladder: Development Strategy in Historical Perspective* (Anthem, 2002).
 HJ Chang, *Economics: The User's Guide* (Penguin, 2014)
 K Gardner and D Lewis, *Anthropology and Development: Challenges for the Twenty-First Century* (Pluto, 2015)
 D Rodrik, *One Economics, Many Recipes: Globalization, Institutions, and Economic Growth* (Princeton University Press, 2008)
 J Ferguson, *The Anti-Politics Machine: 'Development', Depoliticisation and Bureaucratic Power in Lesotho* (Cambridge, 1990).

M Jerven, *Poor Numbers: How we are misled about African development statistics and what to do about it* (Cornell, 2013).
 United Nations, "Transforming Our world: the 2030 Agenda for Sustainable Development" (SDGs) A/RES/70/1 (25 September 2015).

Assessment: Essay (100%, 5000 words) in January.

DV502

Research Design in International Development

This information is for the 2024/25 session.

Teacher responsible: Dr Arjan Gjonca

Availability: This course is compulsory on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: This course is designed for engagement with methodological and research design issues in International Development research. Sessions are organized around methodological research design and practical issues (e.g., case studies, data collection and manipulation, fieldwork and ethics),

and presentations of research projects. The aim of this course is to help PhD students engage with research design in development contexts. Students will learn how to develop their research question, choose a feasible strategy for engaging with data, and match data collection and analytic methods to the aims of the PhD project. Students will also reflect on the relation of their project to wider development theory. The course will help students, during their first year, to turn research ideas into well-structured projects that make a valuable contribution to knowledge.

Students will have opportunities to present their own research proposals and get feedback from peers and teaching staff. In making their presentations students are asked to provide (a) background material about the particular issue at hand, (b) a clear statement of the research questions and/or hypotheses that are being addressed, and (c) discussion of the research methods to be employed. Students should inform their supervisor(s) of the date when they are scheduled to make a presentation.

Teaching: 15 hours of seminars in the AT. 10 hours of seminars in the WT.

Indicative reading: Borgman, C. L. (2015). *Big data, little data, no data: Scholarship in the networked world*. MIT press.

Brady, Henry E., and David Collier. (Eds.) 2010. *Rethinking Social Inquiry: Diverse Tools, Shared Standards*. New York: Rowman & Littlefield. 2nd edition.

Crawford, G., Jaspersen, L. J., Kruckenberg, L., Loubere, N., & Morgan, R. (Eds.). (2017). *Understanding global development research: fieldwork issues, experiences and reflections*. Sage.

Geddes, Barbara. 2003. *Paradigms and Sand Castles: Theory Building and Research Design in Comparative Politics*. Ann Arbor, MI: University of Michigan Press.

Merry, S. E., Davis, K. E., & Kingsbury, B. (Eds.). (2015). *The quiet power of indicators: measuring governance, corruption, and rule of law*. Cambridge University Press.

Mkandawire, T. (2005). *African intellectuals: Rethinking politics, language, gender and development*. Zed Books.

Rubin, H. J., & Rubin, I. S. (2011). *Qualitative interviewing: The art of hearing data*. sage.

Schensul, J and LeCompte, M. (2016) *The Ethnographer's Toolkit (Ethnographer's Toolkit, Second Edition)*, 7 Volumes (paperback), AltaMira Press.

Assessment: Essay (30%) in January.

Research design (70%) in the WT.

This is a PhD level research design course. Students submit two summative pieces of work: a critical analysis essay (2500 words), and an analysis of their research design and methodology (3000 words). They will also give presentations and receive feedback on their work in progress. The presentations are part of formative rather than summative work and are an important part of professional development. The main learning outcomes are to help the PhD students develop a high-quality research design.

DV507 Half Unit Poverty

This information is for the 2024/25 session.

Teacher responsible: Dr Sohini Kar

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: The course is an interdisciplinary analysis of poverty. With attention to both the macro-level political economy of poverty and the micro-level lived experiences of the poor, we will examine how and why poverty persists in developing countries and analyse policy interventions and their outcomes. The course is interdisciplinary in focus, drawing on a range of methodological approaches to poverty, and does not require any prior mathematical or statistical qualification.

The course begins with an examination of the definition and measurement of poverty. We will then consider social mobility, followed by the spatial dimensions of poverty, including urban and

rural poverty. We will then turn to issues of work and employment, social protection, and the politics of poverty, followed by weeks on environmental poverty, and private sector involvement, including the question of financial inclusion. The course will end with focus on successful cases of pro-poor development.

Teaching: 15 hours of lectures and 15 hours of seminars in the AT. Student on this course will have a reading week in Week 6.

Formative coursework: Students will give at least one class presentation, and submit one formative essay of 1500 words.

Indicative reading:

- Javier Auyero, *Patients of the State: The Politics of Waiting in Argentina* (Duke University Press 2012)
- Abhijit Banerjee and Esther Duflo, *Poor Economics: A Radical Rethinking of the Way to Fight Global Poverty* (Public Affairs/Penguin 2011)
- Anirudh Krishna, *Broken Ladder: The Paradox and Potential of India's One Billion* (Cambridge University Press 2017)
- Tania Li *Land's End: Capitalist Relations on an Indigenous Frontier* (Duke University Press 2014)
- Rob Nixon, *Slow Violence and the Environmentalism of the Poor* (Harvard University Press Ananya Roy, 2011)
- *Poverty Capital: Microfinance and the Making of Development* (Routledge 2010)

Assessment: Essay (100%, 5000 words) in the ST.

Assessment will be 100% on final 5,000 word essay. The topic of the essay will be related to the course, but the specific question will be developed with each student prior to the end of term. The research-based essay will enable students to develop a literature review that will complement their research interests, while the course syllabus will provide a key set of resources for students to consult in developing their research topic.

DV510

Research Design and Proposal in International Development

This information is for the 2024/25 session.

Teacher responsible: Professor Tiziana Leone

Availability: This course is compulsory on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: Students will work with their academic supervisors to structure a doctoral research proposal that has the potential to make a significant contribution to knowledge and that reflects a sophisticated mastery of advanced theoretical and methodological tools from one or more academic disciplines related to international development. They will learn how to identify good research questions that are embedded in the current academic literature, and how to apply recognisable, defensible and academically sophisticated methodologies to address those questions. The doctoral research proposal itself will identify a key research question(s) for investigation, a justification well embedded in existing academic literature for why the topic is theoretically and empirically important, and a well-developed theoretical and methodological framework for researching the question(s).

Teaching: Students will meet their supervisors three times a term during their first year of study in accordance with the LSE's regulations for Research Degrees. Their proposals will be developed over the course of these meetings. There will be one DV510 proposal writing workshop in the Summer Term at which students will present their draft proposals and receive feedback.

Formative coursework: Students will submit at least one full draft of their proposal to their supervisors, for detailed feedback. Partial drafts may also be submitted, along with preparatory work that the supervisor may assign in the course of AT, WT and ST, all of which will receive detailed feedback.

Indicative reading: The reading list for each student will be determined by the research they propose undertaking.

Assessment: Research proposal (100%) in August.

A research proposal of 10,000 words to be submitted in August.

DV513 Half Unit

Environmental Problems and Development Interventions

This information is for the 2024/25 session.

Teacher responsible: Prof Tim Forsyth

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: This course is for students who wish to study social and political aspects of environmental change and its implications for international development. The aim is to summarise the key current debates about 'environment and development' from perspectives of social and political theory with special reference to institutional theory, livelihoods, and inclusive policy interventions.

The course is structured to analyse the challenges of making well-informed environmental interventions in the face of poverty and vulnerability, and then seeking practical solutions to these dilemmas. The course first considers the nature of environmental problems within a 'development' context, and what this means for environmental science and norms as applied in developing countries. Themes include assessing environmental science and expertise in concerning adaptation to population growth, resource scarcity, deforestation, desertification, vulnerability to 'natural' disasters, and risks associated with climate change, including questions of gender and environment. As the course progresses, it considers debates about policy interventions such as common property regime theory; theories of the state and environment (including resistance and social movements); community-based natural resource management and Sustainable Livelihoods; adaptation to climate change; forests; and urban environmental policy (these latter themes involve debates on multi-level, multi-actor governance involving the connections of local development and global climate change policy). The main theoretical content of the course is institutional theory, drawing on both rational choice, but also cultural, historical, and political approaches to institutions

Teaching: 15 hours of lectures and 10 hours of seminars in the AT. This course is delivered through a combination of lectures and seminars in the AT.

Student on this course will have a reading week in Week 6.

Formative coursework: Students will have the opportunity to produce 1 essay in AT

Indicative reading: A detailed weekly reading list will be provided online via Moodle. Students are not advised to buy a single textbook for this course but to read selectively and critically from various sources. The following books might be useful introductions:

- Adams, W.M. 2019. *Green Development: environment and sustainability in a developing world*. 4th edition. London: Routledge.
- Forsyth, T. 2003. *Critical Political Ecology: the politics of environmental science*, London, Routledge
- Jones, S. and Carswell, G. 2004. *The Earthscan reader in environment, development and rural livelihoods*. London; Sterling, VA : Earthscan.
- Kohler, P. (2019) *Science Advice and Global Environmental Governance: Expert Institutions and the Implementation of International Environmental Treaties*, London and New York: Anthem Press.
- Neumann, R. 2005. *Making Political Ecology*, London: Hodder Arnold.
- Nightingale, A. (ed) 2019. *Environment and Sustainability in a Globalizing World*, London: Routledge.
- Ostrom, E., Stern P.C., Diet, T., Dulsak, N. and Stonich, S. (eds.) 2002 *The Drama of the Commons: Understanding Common Pool Resource Management*. Washington, D.C.: National Academy Press.

- L Schipper and I Burton (eds) (2008) *The Earthscan Reader on Adaptation to Climate Change*, London: Earthscan.

Assessment: Essay (100%, 5000 words) in the WT.

DV515 Half Unit Not available in 2024/25

Global Environmental Governance

This information is for the 2024/25 session.

Teacher responsible: Prof Kathryn Hochstetler
Dr Tasha Fairfield

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: This course is for a MRes/PhD student who wishes to study the politics of global environmental policy from the perspective of environmental governance and international development. The aim is to summarise debates about 'global' environmental problems and to review the contributions of debates about 'governance' to political solutions. The main theoretical focus of the course is on understanding the evolution of environmental policy regimes at multiple scales and with multiple actors. The guiding empirical focus is on the role of developing countries in global environmental governance and the effects of environmental policy regimes on their development strategies and outcomes. Some of this draws upon debates within International Relations, but this course also considers other theoretical literatures about environmental politics. Only part of global environmental governance takes place in formal spheres specifically devoted to environmental topics. Thus, while about half the course focuses on global efforts to solve environmental problems, especially in international negotiations, the other half examines economic institutions like trade and financial institutions and their intersections with environment and development concerns. Non-state actors including business actors and civil society actors are also considered.

To make the course focused, it considers primarily anthropogenic climate change, biodiversity and forests, and human movement in response to environmental change.

Teaching: 15 hours of lectures and 10 hours of seminars in the WT.

Student on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Indicative reading: A detailed reading list will be presented at the beginning of the term. There is no single textbook for this course, but we recommend the following as a basic background reading list:

- Betsill, M. and Corell, E. (eds). 2007. *NGO Diplomacy: The Influence of Nongovernmental Organizations in International Environmental Negotiations*, MIT Press.
- Biermann, F, Pattberg, P. and Zelli, F. (eds). 2010. *Global Climate Governance Beyond 2012: Architecture, Agency and Adaptation*, Cambridge University Press.
- Ciplet, D., J.T. Roberts, and M.R. Khan. 2015. *Power in a Warming World: The New Global Politics of Climate Change and the Remaking of Environmental Inequality*. MIT Press.
- Kopinski, D. and Q. Sun. 2014. *New Friends, Old Friends? The World Bank and Africa When the Chinese Are Coming*. *Global Governance: A Review of Multilateralism and International Organizations* 20(4): 601-623.
- Najam, A. 2005. *Developing Countries and Global Environmental Governance: From Contestation to Participation to Engagement*. *International Environmental Agreements* 5: 303-321.
- Newell, P. and J.T. Roberts (eds). 2016. *The Globalization and Environment Reader*. Wiley.
- Neilson, T.D. 2014. *The Role of Discourses in Governing Forests to Combat Climate Change*. *International Environmental Agreements: Politics, Law and Economics* 14(3): 265-280.
- Raustiala, K. and D. Victor. 2004. *The Regime Complex for Plant Genetic Resources*. *International Organization* 58(2): 277-309.

- Warner, K. 2018. Coordinated Approaches to Large-scale Movements of People: Contributions of the Paris Agreement and the Global Compacts for Migration and on Refugees. *Populations and Environment* 39(4): 384-401.

Assessment: Essay (100%, 5000 words) in the ST.

DV518 Half Unit African Development

This information is for the 2024/25 session.

Teacher responsible: Dr Laura Mann, CON.7.10

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: Taking the work of the late Thandika Mkandawire as its inspiration, DV418: African Development applies a critical lens to questions of economic and social development in African countries. It focuses on the role that knowledge and technology play in development and takes a multi-disciplinary approach, combining theory from economics, economic sociology, and science and technology studies (STS) to the topic. Students are not required to have any background in economics to follow and enjoy the course.

The first two weeks explore why foreign scholarship and donor agendas have become so dominant in framing how development is understood in African countries, and how the more transformative visions of the independence era were dismantled by structural adjustment policies and the attack on African civil servants, middle class professionals, business owners and institutions of higher education and science. We encourage students to look beyond the donor-led vision of poverty reduction and think about development as ultimately being autonomy and self-determination. Students are then given a solid foundation into some of the core processes that strengthen this autonomy; 1) domestic resource mobilisation (or the strengthening of domestic sources of finance in place of aid), 2) structural transformation (or the shifting of the workforce out of commodity production into more knowledge-intensive activities) and 3) transformative social policy (or the linking of poverty reduction to broader nation-building and development goals). Students are asked to grapple with the challenges and contingencies of such policy-making: the difficulties of balancing competing demands across regions and class interests, the pressures of domestic political contestation in shaping long-term planning and the risks posed by the global economy in the form of price swings and long-term commodity cycles. The final weeks of the course confront new emerging trends such as the growing penetration of digital technology firms and connectivity into African markets as well as the emergence of new donors such as China, Korea and Brazil. In all cases, we ask students to scrutinise how these new developments reshape the task of structural change.

Teaching: 15 hours of lectures and 15 hours of seminars in the WT. Student on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. The following readings provide an introduction to the course:

1. Thandika Mkandawire and Charles Soludo, (1999) *Our Continent, Our Future: African Perspectives on Structural Adjustment*. Dakar/Trenton, NJ: CODESRIA / African World Publications.
2. Mkandawire, T. (2001) "Thinking About Developmental States in Africa." *Cambridge Journal of Economics*, 25(3): 289-313.
3. Mkandawire, T. (2005) "Targeting and Universalism in Poverty Reduction" Geneva: UNRISD. Available electronically here. Pages 7-23.
4. Mkandawire, T. (2010) "On Tax Efforts and Colonial Heritage in Africa" *Journal of Development Studies* 46(10): 1647-69.
5. Mkandawire, Thandika (2014) "The Spread of Economic

Doctrines and Policymaking in Postcolonial Africa." *African Studies Review* 57(01):171-98.

6. Mkandawire, Thandika (2015) "Neopatrimonialism and the Political Economy of Economic Performance in Africa: Critical Reflections." *World Politics*:1-50.

Assessment: Essay (100%, 5000 words) in the ST.

DV520 Half Unit Complex Emergencies

This information is for the 2024/25 session.

Teacher responsible: Prof David Keen CON 6.06

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: When genocides, civil wars and famines are reported on television in countries such as Syria, Sudan or Yemen, we are often left with a sense of confusion. Why is this happening? Why do these disasters keep recurring? And which actors are driving the process? This course looks behind the headlines to get a deeper understanding of the causes and functions of humanitarian disasters.

By re-thinking common conceptions of conflict (such as the idea that war is a contest between two or more sides aiming to 'win'), the course offers new ways of thinking about war, humanitarian intervention and peacebuilding. Who benefits from conflict? Who benefits from famine? How do these benefits shape the information we receive? How is the 'enemy' defined, and whose interests do these changing definitions serve? And how can one make peace a peace that doesn't propel society back into war? The course offers an understanding of the complex fault-lines that lie behind oversimplistic news coverage. It also expands our understanding of disasters to take account of the fact that many disasters (from climate change to 'migration crisis', from Covid to democratic crisis) are now 'coming home' as far as Western

democracies are concerned.

The course draws on detailed empirical case-studies — including the course-leader's own fieldwork in Sudan, Sierra Leone, Sri Lanka, Iraq, Guatemala, France and on the Syria/Turkey border. The course makes use of the political thought of Hannah Arendt and Michel Foucault, showing how they can help us to deconstruct the interests and the language that muddle our understanding of the causes and functions of contemporary disasters — in whichever part of the world they are found.

The course is interdisciplinary and looks at the political, economic and psychological functions of violence, though it requires no specialist knowledge of any particular discipline.

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the WT.

This course is delivered through a combination of lectures and seminars in the WT.

Student on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: A detailed weekly reading list will be provided at the first course meeting. A useful text, which is designed in large part around the course, is David Keen, *Complex Emergencies* (Polity, 2008).

Other texts of interest include:

Assessment: Essay (100%, 5000 words) in the ST.

DV524 Half Unit Not available in 2024/25 International Institutions and Late Development

This information is for the 2024/25 session.

Teacher responsible: Prof Kenneth Shadlen CON.6.07

Availability: This course is available on the MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Please note all students are asked to submit a brief statement of 150 words (max) on why they want to take the course.

2/3 of the spaces should go to ID and joint degree students, distributed on a random basis.

1/3 go to non-ID/joint students, distributed on a random basis.

Everyone else goes on the waitlist, and as spots open the course leader will allocate these, without regard to degree/dept, on the basis of the brief statements.

Course content: This course examines the politics of the international economy. We analyse the overarching rules and regulations that structure the international economy, and thereby provide context for development policy, and we assess the role of a range of actors (e.g. governments, firms, non-state actors) in shaping and reshaping the international economic order. We are particularly interested in understanding the ways that developing countries respond to and participate in international regimes and organisations, and how changes in global economic governance affect opportunities for economic development. The first week, which synthesises a variety of explanations of the role that international organisations play in global politics, establishes the theoretical spine for the course. We then examine governance in international sovereign debt and finance, public and private. We analyse the politics of debt relief for the poorest and most heavily-indebted countries, where most of the debt is owed to public creditors; and we analyse the politics of debt restructuring for middle-income countries where significant shares of the debt is owed to private/commercial creditors. The course then turns to the politics of international trade, investment, and intellectual property. This cluster of five sessions is organised around a dialogue between multilateral and regional frameworks for integration into the global economy, with the World Trade Organisation (WTO) serving as our principal point of reference. We examine the emergence of the WTO, both in terms of the substance of the Uruguay Round agreements and as an inter-governmental organisation with its own set of procedures for agenda-setting, rule-making, and dispute-settlement. We then examine emerging arrangements for global governance in the areas of foreign investment and intellectual property. And, then we focus explicitly on the resurgence of new, North-South, bilateral and regional trade agreements, considering the implications of such agreements for development and the factors that contribute to their proliferation. In concluding the course, taking a step back and reviewing the term's material from a "birds-eye view," we analyse contrasting trajectories of change in two development regimes, one regarding "industrial transformation" and mobility in the international division of labour, and another regarding "humanitarianism" and poverty reduction.

Teaching: 20 hours of lectures and 13 hours and 30 minutes of seminars in the WT. 2 hours of lectures in the ST. There will be a reading week in Week 6.

Indicative reading: A detailed reading list is presented at the beginning of term.

Assessment: Exam (50%, duration: 2 hours) in the spring exam period.

Essay (50%, 4000 words) in the ST.

DV528 Half Unit Managing Humanitarianism

This information is for the 2024/25 session.

Teacher responsible: Professor Stuart Gordon, CON 8.02

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: The course looks at international, national and local responses to conflict and natural disasters. Building on an analysis of the causes, construction and consequences of humanitarian disasters, this course focuses on humanitarian actors (including aid workers, journalists, medics, government officials, soldiers, politicians and peace negotiators). It considers the principles and the politics of humanitarian action, exploring the overlaps and tensions between practices of humanitarian assistance and humanitarian intervention and how humanitarian institutions shape and are shaped by systems of global governance and state power. It asks how humanitarianism relates to ideas about human rights and justice, and the politics of securitisation. It considers why humanitarian organisations and governments respond to some crises and not to others as well as the critique of humanitarian assistance and the ways in which the UN and NGO communities have sought to professionalise their activities. The course also looks at how recipients of humanitarian aid respond to these programmes, and in some cases subvert or transform them into quite different projects. Case studies will be drawn primarily from Africa, Central and South Asia and Latin America. However, there is also likely to be discussion of ongoing humanitarian emergencies, wherever they are located.

Teaching: 20 hours of lectures and 15 hours of seminars in the AT. This course is delivered through a combination of lectures and seminars in the AT.

Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT.

Students will be expected to produce 1 piece of coursework in the AT, due by 17:00 on the Friday of Week 5.

This will be a formative 1000 word essay drawn from the list of formative seminar questions, and upon which the student will receive feedback.

Indicative reading: Stuart Gordon and Antonio Donini 'Romancing Principles and Human Rights - Are Humanitarian Principles Salvageable?' *International Review of the Red Cross* / Volume 97 / Issue 897-898 / June 2015, pp 77-109;

Assessment: Essay (100%, 3000 words) in the AT.

DV531 Development Management

This information is for the 2024/25 session.

Teacher responsible: Prof Elliott Green

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available to students in Year 2 or above of the MRes/PhD in International Development only. It is also available to students in Year 1 of the MRes/PhD in International Development,

in lieu of DV501, with permission.

Course content: Why are some countries rich and others poor? Why are some governed well and others badly? This course employs a political economy approach to examine the causes of development, identify the underlying obstacles to development, and evaluate potential solutions. It focuses on the principles governing the institutions, politics, and organisations through which policies, programmes and projects are produced and implemented. Attention is given to the different kinds of authority, incentives and accountability mechanisms that govern the relationships between leaders, managers and recipients. It reviews ongoing debates about the best ways of designing state agencies, private firms and NGOs, by showing how centralised bureaucracies, markets, participatory and solidaristic agencies operate to provide services in practice. It explores the dynamics of different forms of democratic and authoritarian states, the determinants of good and poor governance, and how social, political and economic forces interact to drive change and stability. In order to enable students to make practical judgments about institutional reform programmes in various contexts, competing approaches to development are critically and constructively analyzed in light of case studies.

The course is divided into several parts: Analytical Assumptions, Government and Governance, Private Sector, and Civil Society. On completing the course students should be able to:

(i) use theory to identify the causes of actual development challenges, (ii) identify and assess relevant case study material to inform development practice; and (iii) employ the insights developed throughout the course to formulate policy recommendations and plans of action for improving development.

Teaching: This course is delivered through a combination of lectures and seminars in the AT & WT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration.

Students are expected to attend all these sessions. Lectures will focus on the theoretical debates driving current policy practice in the development community, while seminars will relate these to practical problems of implementation, drawing on case studies, class exercises, and the personal experience of participants. Seminars will discuss topics covered in the lecture, and will be conducted on the basis either of a student presentation or a class exercise.

There will be a revision session in early ST.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: A detailed weekly reading list is provided at the first course meeting. Background readings include: Brett, E.A. (2009) *Reconstructing Development Theory*; Faguet, J.P. 2012. *Decentralization and Popular Democracy: Governance from Below in Bolivia*. Ann Arbor: University of Michigan Press; Chang, H. 2003, *Rethinking development economics*, Anthem Press; London, Intermediate Technology; Kohli, A. 2004 *State-directed development: political power and industrialization in the global periphery*, Cambridge, Cambridge University Press; Linz, J. & A. Stepan, *Problems of democratic transition and consolidation*, Johns Hopkins; Olson, M. 1982 *The rise and decline of nations*, Yale University Press; North, D. 1990. *Institutions, Institutional Change and Economic Performance*. Cambridge University Press. Putnam, R. D. 1993. *Making Democracy Work: Civic Traditions in Modern Italy*. Princeton: Princeton University Press; Rodrik, D. (Ed.). 2003. *In Search of Prosperity: Analytical Narratives on Economic Growth*. Princeton University Press; Sen, A., 1999 *Development as Freedom*. Oxford University Press; Stiglitz, J. 2002 *Globalization and its discontents*, Allen Lane, 2002; World Bank, *World Development Report, 2004, Making services work for poor people*, Washington, World Bank.

Assessment: Assessment path 1

Essay (100%, 10000 words) in the ST.

Assessment path 2

Exam (60%, duration: 3 hours) in the spring exam period.

Essay (40%, 5000 words) in the ST.

The research paper will be co-marked by the course convenor and the student's PhD supervisor.

DV532 Half Unit Not available in 2024/25 China in Developmental Perspective

This information is for the 2024/25 session.

Teacher responsible: Prof Jude Howell CON. 8.02

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Course content: This course looks at China from a comparative developmental perspective, locating the discussion of China within the interdisciplinary field of development studies. It examines China's developmental trajectory since 1949, explaining the fundamental shift in developmental path from late 1978 onwards. It considers China's role in low-income countries, as a model of innovation, as a voice for developing country concerns and as an important aid donor. It reflects on China's recent achievements in reducing poverty and places these in comparative context. The course considers the governance challenges posed by rapid economic reform, the attempts to reform the Party-state and to manage social tensions. It examines the social dimensions of rapid economic reform and the implications for social policies. It looks at the emergence of NGOs and other forms of civil society organising and considers changing state-society relations. Finally it considers China's role as aid donor and its emergence as a global economic and political power. The course will enable students to obtain an understanding of key developmental issues and discussions about China and to link these discussions to broader debates and theories in development studies.

Teaching: This course is delivered through a combination of lectures and seminars in the MT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration.

In addition, one introductory seminar session in MT and one essay preparation session in MT.

Students on this course will have a reading week in Week 6.

Formative coursework: Students have the opportunity to receive feedback on a formative essay of 1,500 words. Students will also receive feedback on their seminar performance. Students are welcome to come to course convenor's office hours to discuss any issues.

Indicative reading:

Assessment: Essay (100%, 5000 words) in the WT.

DV533 Half Unit Not available in 2024/25 The Informal Economy and Development

This information is for the 2024/25 session.

Teacher responsible: Dr Kate Meagher CON 7.11

Availability: This course is available on the MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is only available to research students in other departments with permission from the course convener (space permitting).

Course content: The expansion of the informal economy, which now employs more than 60% of the world's workers, represents a central paradox of contemporary development thinking. The COVID-19 pandemic has further exposed the pervasive role of informal employment across the globe, as well as drawing attention to the importance of informal economic systems for social provisioning in times of crisis. Practitioners, policy makers and academics seek a clearer understanding of the impact of informal economies on poverty, employment, governance and inclusive development. In a globalising environment, are large informal economies a poverty trap or an engine of growth? Do they stimulate entrepreneurship and popular empowerment, or promote criminality and exploitation? How does a greater understanding of the size and organization of informal economies affect policy on urban service provision, social protection or taxation? What are the implications of the informal economy for social cohesion and popular politics in the countries of the Global South?

This course will explore how high levels of informality are shaping processes of growth and governance in the Global South. The effect of informality on new policy narratives of inclusive growth will be a central theme in the course. Using a comparative institutional approach, we will examine informal economies in a range of regional contexts, including Africa, the Middle East, South and East Asia, and Latin America, highlighting variations in activities, relations with the state, linkages with the global economy, and development outcomes. Key issues covered in the course include the impact of the informal economy on labour markets, weak states, gender empowerment, urban services, the gig economy, social protection, taxation, and popular politics. Attention will be focused on the potential as well as risks of large informal economies in the face of contemporary development challenges, drawing on empirical evidence and comparative case studies from across the developing world.

Teaching: This course is delivered through a combination of lectures and seminars in the WT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration.

Student on this course will have a reading week in Week 6.

Formative coursework: Formative coursework will involve a 2,000 word essay during the term and at least one presentation.

Indicative reading: 1. Portes, Alejandro, Manuel Castells and Lauren A. Benton, eds. (1989) *The Informal Economy: Studies in Advanced and Less Developed Countries*. Baltimore: John Hopkins University Press.

Assessment: Essay (100%, 5000 words) in the ST.

DV545 Half Unit Not available in 2024/25 Research Themes in International Development

This information is for the 2024/25 session.

Teacher responsible: Dr Arjan Gjonca

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled on the MRes/PhD in International Development only.

Course content: The objectives of the course are: a) to introduce students to specialized dimensions of development which will facilitate their career paths by engaging with new issues not covered in standard courses; and/or b) to facilitate student engagement with novel dimensions of the interface between policy practice and development academe.

Students enrolled on DV545 follow an independent course of study on an approved topic. They will be matched with an adviser (any member of staff in the department who is not their primary supervisor), who will support them in producing the final research paper. There are no set lectures or seminars for this course, though students will be encouraged to make good use of the weekly lectures in the ID Cutting Edge Issues in Development Thinking & Practice seminar series, which feature speakers from different development organisations and research institutes.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT. This will involve a plan for the summative research paper (1500-2000 words) on which the student will receive feedback and topic approval.

Indicative reading: Boone, C. (2014). *Property and political order in Africa: Land rights and the structure of politics*. Cambridge University Press

Assessment: Essay (100%, 5000 words) in the ST.

DV560 Half Unit Not available in 2024/25

Bayesian Reasoning for Qualitative Social Science: A modern approach to case study inference

This information is for the 2024/25 session.

Teacher responsible: Dr Tasha Fairfield CON 6.02

Availability: This course is available on the MPhil/PhD in International Relations and MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students will be selected for DV560 based on a written statement of interest (max 150 words). Priority will be given to students on the programs listed above, if demand exceeds places.

Course content: The way we intuitively approach qualitative case research is similar to how we read detective novels. We consider various different hypotheses to explain what occurred—whether the emergence of democracy in South Africa, or the death of Samuel Ratchett on the Orient Express—drawing on the literature we have read (e.g. theories of regime change, or other Agatha Christie mysteries) and any salient previous experiences we have had. As we gather evidence and discover new clues, we continually update our beliefs about which hypothesis provides the best explanation—or we may introduce a new alternative that occurs to us along the way.

Bayesianism provides a natural framework that is both logically rigorous and grounded in common sense, that governs how we should revise our degree of belief in the truth of a hypothesis—e.g., “mobilisation from below drove democratization in South Africa by altering economic elites’ regime preferences,” (Wood 2001), or “a lone gangster sneaked onboard the train and killed Ratchett as revenge for being swindled”—given our relevant prior knowledge and new information that we obtain during our investigation. Bayesianism is enjoying a revival across many fields, and it offers a powerful tool for improving inference and analytic transparency in qualitative research.

This course introduces basic principles of Bayesian reasoning with the goal of helping us leverage our common-sense understandings of inference and hone our intuition when conducting causal analysis with qualitative evidence. We will examine the foundations of Bayesian probability as well as concrete applications to single case studies, comparative case studies, comparative historical analysis, and multi-methods research. Students will practice applying Bayesian reasoning to assess the strength and quality of inferences in published studies, drawing on exemplars of qualitative research from various fields of socio-political analysis including development studies, comparative politics, international relations, and policy analysis. Students will also apply Bayesian principles to various aspects of their own dissertation research in progress—e.g., generating or revising hypotheses, selecting cases, identifying weaknesses in salient background literature, and assessing the inferential weight of available evidence.

Upon completing the course, students will be equipped with a concrete set of Bayesian-inspired best practices to deploy in their own research, as well as widely-applicable analytic skills that will help them to better evaluate and critique socio-political analysis.

Teaching: This course is delivered through a combination of lectures and seminars in the LT. Seminars will be at or upwards of 45 minutes duration and lectures will be at or above 60 minutes duration.

Students will attend DV460 lectures and seminars in LT. Additional teaching and learning support in writing the final project will be agreed between the instructor and the student's PhD supervisor. Students on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1

exercise and 1 project in the WT.

Students will receive written and oral formative assessment on in-class exercises, which will ask them to explain key Bayesian concepts (e.g., the “weight of evidence”) in their own words and apply them to concrete examples (e.g. use Bayes’ rule to derive an inference from several pieces of evidence).

In addition, students will receive oral feedback on the first section of their final project, which will set up rival hypotheses to be compared in light of case evidence.

Indicative reading: Methodological foundations:

Tasha Fairfield and Andrew Charman, “A Dialogue with the Data: The Bayesian Foundations of Iterative Research in Qualitative Social Science,” *Perspectives on Politics* 17(1):154-167, 2019; Andrew Bennett, “Disciplining Our Conjectures: Systematizing Process Tracing with Bayesian Analysis,” in Andrew Bennett and Jeffrey Checkel, eds, *Process Tracing in the Social Sciences: From Metaphor to Analytic Tool*, Cambridge University Press, 276–98, 2015; Tasha Fairfield and Andrew Charman, “Explicit Bayesian Analysis for Process Tracing,” *Political Analysis* 25(363-380), 2017; Macartan Humphreys and Alan Jacobs, “Mixing Methods: A Bayesian Approach,” *American Political Science Review* 109(4):653-673, 2015; Timothy McKeown, “Case Studies and the Statistical Worldview,” *International Organization* 53(1):161-190, 1999.

Qualitative research exemplars:

Alan Jacobs, “How Do Ideas Matter? Mental Models and Attention in German Pension Politics,” *Comparative Political Studies* 42 (2) 2008; Tasha Fairfield and Candelaria Garay, “Redistribution under the Right in Latin America: Electoral Competition and Organized Actors in Policymaking,” *Comparative Political Studies* 50 (14) 1871-1906, 2017; Kenneth Schultz, “Fashoda Revisited” (Chapter 6) in *Democracy and Coercive Diplomacy*, Cambridge, 2001; Dan Slater, “Revolutions, Crackdowns, and Quiescence: Communal Elites and Democratic Mobilization in Southeast Asia,” *American Journal of Sociology* 115 (1) 203-254, 2009; Elisabeth Wood, “An Insurgent Path to Democracy: Popular Mobilization, Economic Interests, and Regime Transition in South Africa and El Salvador,” *Comparative Political Studies* 34 (8) 862-888, 2001.

Assessment: Project (100%, 5000 words) in the ST.

Students can choose from two options in consultation with the course instructor and the PhD supervisor, taking into account how far along they are in the research process:

- Conduct a full Bayesian scrutiny of a published work relevant to their dissertation topic, preferably one that analyses more than a single case. Students will be asked to pay attention to some nuanced aspects of Bayesian inference, including logical dependence among multiple pieces of evidence, and they will provide quantified assessments of priors, weight of evidence, and their posterior degree of confidence in the author's argument relative to rival explanations in light of the evidence.
- Directly apply Bayesian reasoning to their own dissertation research in progress. Students will devise at least two rival hypotheses to compare (preferably three), assess and justify priors in light of salient background literature they have read, and assess the weight of any available evidence they possess from their preliminary research and/or provide a Bayesian rationale for case selection. Students will be asked to pay attention to some nuanced aspects of Bayesian inference, including logical dependence among multiple pieces of evidence, and they will provide quantified assessments of the weight of evidence and their degree of confidence in each hypothesis relative to the rivals in light of their background information and preliminary evidence.

DV590 Half Unit

Economic Development Policy I

This information is for the 2024/25 session.

Teacher responsible: Dr Diana Weinhold CON 6.03

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

Enrolment will be controlled through the use of a pre-quiz (see DV490 Moodle page for details).

Pre-requisites: DV494 or an equivalent background in the econometrics of quantitative causal inference.

Course content: This course explores the foundations of applied macroeconomic policy analysis with applications to the theory and empirics of long-run growth in developing countries. Throughout the course, lectures provide analytical but non-technical overviews of broad themes in long-run growth and development policy, including growth theory, institutions and history, economic geography, globalization, inequality, balance of payments and financial crises, debt, industrial policy and international aid. There is a strong emphasis on how the body of knowledge has evolved over time via the synthesis of theoretical advances and rigorous empirical testing.

The seminars give students an opportunity to repeatedly practice and improve their analytical skills by working through methodologically-focussed problem sets based on top academic journal articles addressing issues from the lectures on macroeconomic development.

Teaching: 20 hours of lectures and 15 hours of seminars in the AT. This course is delivered through a combination of lectures and seminars in the MT.

Student on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: The bulk of the course will be taught using journal articles. A reading list will be handed out by the lecturers at the beginning of their sessions. Useful reference texts include Mastering 'Metrics: the Path from Cause to Effect, by Angrist & Pischke, Princeton University Press (2014); and The Quest for Growth by W. Easterly, MIT Press (2001)

Assessment: Essay (100%, 5000 words) in the ST.

DV591 Half Unit Not available in 2024/25 Economic Development Policy II

This information is for the 2024/25 session.

Teacher responsible: Dr Sandra Sequeira CON.6.05

Availability: This course is available on the MRes/PhD in International Development. This course is not available as an outside option.

This course is available as an option for students enrolled in the MRes/PhD in International Development only.

Course content: This course examines the microeconomic foundations of economic policy-making in developing countries. Classes will combine economic theory and rigorous empirical analysis to better understand the impact of economic development policy on development goals. We will focus on specific examples chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better economic development policies in the future.

The course is structured around three main themes:

(i) Human Development: health policy, education policy and intra-household dynamics

(ii) Institutions and Markets: labour markets, state capacity for public service delivery and private sector development

(iii) Behavioural Economics and Development Policy Design: the importance of psychology in explaining economic behaviour and how it can inform better development policy design

Teaching: This course is delivered through a combination of lectures and seminars in the WT. Seminars will be 90 minutes duration and lectures will be 120 minutes duration. There will be a weekly workshop run by a Teaching Fellow for students to ask questions about the material.

Seminars start in week 1 and there will be a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

A plan for the research paper (1500-2000 words) on which the student will receive feedback and topic approval

Indicative reading: Indicative reading: The bulk of the course will be taught using journal articles. A reading list will be handed out by the lecturers at the beginning of their sessions. Useful reference texts include D Ray, Development Economics (1998) which will serve as the course text, and W Easterly, The Quest for Growth.

Assessment: Essay (100%, 5000 words) in the ST.

DV592 Half Unit

Economic Development Policy III: Government Policy Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Joana Naritomi CON.6.12

Availability: This course is available on the MRes/PhD in International Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Entry onto the course might be limited at the discretion of the instructor.

Pre-requisites: DV494 or equivalent.

Course content: This course explores key issues in government policies in developing countries. The course will draw on specific examples chosen from development cases worldwide to learn which policies have worked, which ones have not, and how a rigorous analysis of these experiences can inform the design of better economic development policies in the future. It begins introducing concepts from public economics to discuss the scope and impacts of government interventions. In particular, the course will cover issues related to market failures, redistribution, public goods and externalities. The course will also discuss theoretical and empirical work on the economic consequences of government interventions, with particular focus economic incidence, efficiency trade-offs and unintended consequences of policies. In the second part, it focuses on challenges in raising government revenue and delivering public service in the developing world context, where limited state and fiscal capacity impose important constraints in policymaking. Beyond these topics, the course will provide background on relevant analytical tools in quantitative research, and develop skills to interpret empirical evidence in development economics.

Coursework will include a combination of class discussions, problem sets, presentations and computer-lab based sessions for students to explore programming and statistical skills.

Students are strongly encouraged to take DV491/591, as a highly complementary course that will also apply the empirical methods taught in DV490/590 to topics in Human Development, Institutions and Markets, Social Networks, Economic History and Cultural Economics, and Behavioural Economics and Development Policy Design.

Teaching: 20 hours of lectures and 15 hours of seminars in the WT.

This course is delivered through a combination of lectures and seminars in the WT.

Student on this course will have a reading week in Week 6.

Formative coursework: Students will be expected to produce 1 piece of coursework in the WT.

Indicative reading: 1 Alatas, V., Purnamasari, R., Wai-Poi, M., Banerjee, A., Olken, B. A., & Hanna, R. (2016). "Self-targeting: Evidence from a field experiment in Indonesia." *Journal of Political Economy*, 124(2), 371-427.

Assessment: Essay (100%, 5000 words) in the ST.

EC501

Work in Progress Seminars

This information is for the 2024/25 session.

Teacher responsible: Various.

Availability: This course is compulsory on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: Research students present their work to faculty and peers in the designated field. Outside speakers are also invited from time to time.

Teaching: Seminars EC501: seminar groups covering the major PhD field options, i.e. Capital Markets, Development and Growth, Econometric Theory, Industrial Economics, International Economics, Labour Economics, Macroeconomics/Monetary Economics, Microeconomic Theory, Political Theory, Public Economics. The frequency of meetings to be determined according to the number of students in each specialism, but generally each group will meet weekly throughout the session.

Assessment: This course is not examinable.

EC518 Not available in 2024/25

Topics in Advanced Econometrics for Research Students

This information is for the 2024/25 session.

Teacher responsible: Prof Francisco Hidalgo SAL.4.20 and Prof Taisuke Otsu SAL.4.25

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: See course content for EC485. Additionally, this course will examine more advanced theories and applications in Econometric Theory. Recent developments in the field will be discussed, giving students an insight into the process by which research is conducted, and suggesting fruitful areas for research.

Teaching: 20 hours of EC485 Topics in Advanced Econometrics lectures and 10 hours of EC518 lectures in each of the AT and the WT.

This course is delivered through lectures totalling a minimum of 60 hours across Autumn Term and Winter Term. There are no classes. Attendance at lectures is compulsory.

Indicative reading: See reading list for EC485. Additional readings will be recommended at the start of the course.

Assessment: Assessment path 1

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the

January exam period.

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Assessment path 2

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Exam (25%, duration: 1 hour, reading time: 15 minutes) in the spring exam period.

Essay (25%, 2000 words) in the ST.

EC532 Not available in 2024/25

International Economics for Research Students

This information is for the 2024/25 session.

Teacher responsible: Dr Thomas Sampson SAL.2.34, Prof Daniel Sturm SAL.2.35, Dr Isabela Manelici SAL.2.29 and Dr Dmitry Mukhin SAL.1.24

Prof Dave Donaldson TBC

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: This course is concerned with the latest developments in international economics. The course builds on techniques introduced in MSc International Economics (EC421) to take students to the research frontier. The course covers international trade, economic geography and urban economics, and international macroeconomics.

The course is based around research papers. Topics covered vary from year to year as the research frontier expands. A list of representative topics in international trade includes: micro-econometric studies of international trade (in developed and developing countries alike), quantitative trade models, firm heterogeneity and trade, and foreign direct investment. In addition, the course will also cover topics in economic geography and urban economics. A list of representative topics in international macroeconomics includes: international business cycles, determinants of international capital flows, portfolio choice and risk sharing, monetary and fiscal policy in open economies, theoretical and empirical work on the real exchange rate and international financial crises (e.g., currency attacks and sovereign defaults).

Teaching: 30 hours of lectures in the AT. 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 60 hours across Autumn Term and Winter Term. Attendance is compulsory.

Indicative reading: Readings will be from journal articles; a list will be supplied at the start of term.

Assessment: Coursework (50%) in the AT.

Coursework (50%) in the WT.

Two take-home assignments per term. Each assignment will carry equal weight. Take-home assignments may require students to analyse data, empirically solve a computational exercise, solve theoretical models, assess recent research, or prepare a research proposal.

EC533 Not available in 2024/25

Labour Economics for Research Students

This information is for the 2024/25 session.

Teacher responsible: Prof Yona Rubinstein CKK.5.32, Prof John Van Reenen SAL.2.27A, Prof Alan Manning SAL.2.36 and Prof Stephen Machin SAL.2.06A

Availability: This course is available on the MRes/PhD in Economics, MRes/PhD in Economics and Management and MRes/PhD in Management (Marketing). This course is not available as an outside option.

Course content: The aim of the course is to familiarise students with main theoretical and empirical issues in current labour economics, to provide them with the tools for conducting independent research in the field, and to provide a perspective on areas of ongoing research. The course has a strong applied focus. For each major topic covered we will investigate the main available theories in light of their testable implications, discuss the advantages and limitations of existing empirical work and assess policy options.

Topics include:

- Imperfect competition in the labour market (monopsony); minimum wages; immigration.
- Managerial and personnel economics; productivity; human capital; inequalities (labour share of income, CEO pay, wage inequality and new technologies).
- Intergenerational mobility; trade and labour; trade unions; alternative work arrangements; crime and the labour market.
- The economics of entrepreneurship and self-employment; labour market discrimination; human traits and labour market skills; the family and the labour market; trade and firms.

Teaching: 30 hours of lectures in the AT. 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 60 hours across Autumn Term and Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Take-home assessment (100%) in the ST.

EC534 Not available in 2024/25 Public Economics for Research Students

This information is for the 2024/25 session.

Teacher responsible: Prof Johannes Spinnewijn SAL.3.24, Prof Camille Landais SAL.3.23 and Dr Kate Smith SAL.3.16
Prof David Seim TBC

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: The course will cover the economics of the public sector, including material on taxation, public expenditures and political economics. The course, which covers both theory and empirics, aims to give students a broad overview of this growing field and bring them to the research frontier.

The specific topics covered may vary from year to year, but the following general areas would typically be included:

- Income and wealth inequality
- Behavioural responses to taxes and transfers
- Optimal taxation
- Dynamic taxation
- Behavioural public economics
- Social insurance
- Optimal public good provision

Teaching: 30 hours of lectures in the AT. 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 60 hours across Autumn Term and Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of the term. Although the course will not be based on a textbook as such, it will make extensive use of:

- Handbook of Public Economics Vol. 1-4 (A.J. Auerbach and M. Feldstein, eds.)
- Lectures in Public Economics, A.B. Atkinson and J.E. Stiglitz, Princeton University Press, 2015.

Clarification of assessment

Assessment: Problem sets (30%) and exercise (40%) in the AT and

WT.

Take-home assessment (30%) in the ST.

The assessment for this course is as follows:

- Two problem sets, one due in AT and one in WT (30%)
- An "extended replication exercise" (40%), consisting of:
 - a written referee report on a paper (AT)
 - a replication of a paper (empirical paper or paper based on simulations) and an extension of that paper (which requires developing a research design, positioning the question of the extension in the literature, etc.) (WT)
- A take-home exam in the ST (30%)

EC535 Not available in 2024/25 Development Economics for Research Students

This information is for the 2024/25 session.

Teacher responsible: Prof Maitreesh Ghatak SAL.3.08A, Prof Nava Ashraf SAL.3.17 and Dr Gharad Bryan SAL.3.10
Dr Clare Balboni (TBC)

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: The course will cover advanced topics in development economics where current research is active. It is intended to introduce research students in economics to the latest research in development economics and to serve as an input into the research work of these students.

Teaching: 30 hours of lectures in the AT. 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 60 hours across Autumn Term and Winter Term. Attendance is compulsory.

Formative coursework: Student will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Problem sets (100%) in the AT and WT.

There will be six take home problem sets, three in AT and three in WT. Problem set questions may include an empirical exercise analysing data, a computation exercise, solving a theoretical exercise, or evaluating a recent unpublished working paper. Each problem set will carry equal weight.

EC536 Not available in 2024/25 Economics of Industry for Research Students

This information is for the 2024/25 session.

Teacher responsible: Dr Pasquale Schiraldi SAL.4.22, Prof Alessandro Gavazza SAL.4.02 and Prof Martin Pesendorfer SAL.4.19

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: The main goal is to familiarize students with selected theoretical and empirical topics in industrial organization and to put students in a position to do their own research. Classical IO theory, well established empirical techniques including estimation of demand, production and models of strategic interaction and topics at the forefront of current IO research will be covered.

Teaching: 30 hours of lectures in the AT. 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 60 hours across Autumn Term and Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a

list will be supplied at the start of term.

Assessment: Problem sets (100%) in the AT and WT.

8 take home problem sets (two for each part - four in AT and four in WT). Each problem set will carry equal weight. Problem set questions may include an empirical exercise analysing data, a computation exercise, solving an analytical problem or evaluating a recent unpublished working paper.

EC537 Not available in 2024/25 Microeconomic Theory for Research Students

This information is for the 2024/25 session.

Teacher responsible: Dr Matthew Levy SAL.3.21, Dr Andrew Ellis SAL.3.09, Dr Francesco Nava SAL.3.20 and Dr Christopher Sandmann SAL.4.24

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Pre-requisites: Students must have completed Microeconomics for MRes students (EC441).

Course content: The objective of this course is to provide students with a graduate level introduction to advanced topics and contemporary developments in Microeconomic Theory. Topics may include:

- Classic static and dynamic game theory
- Contract theory
- Decision theory
- Bounded rationality
- Psychology and economics.

Teaching: 30 hours of lectures in the AT. 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 60 hours across Autumn Term and Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Osborne M, and Rubinstein A, A Course in Game Theory, MIT Press, 1994. Fudenberg D, and Tirole J, Game Theory, MIT Press, 1991

Assessment: Essay (25%) and essay (25%) in the AT. Essay (25%) and essay (25%) in the WT.

EC539 Not available in 2024/25 Macroeconomics for Research Students

This information is for the 2024/25 session.

Teacher responsible: Prof Matthias Doepke SAL.1.18, Prof Philippe Aghion SAL.2.30, Dr Maarten De Ridder SAL.1.11 and Dr Jonathon Hazell SAL.1.10

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: Surveys the most recent development in macroeconomics, with an emphasis on technical detail and directions for further research opened up by the material. The goal is to put the students on the research path by bringing them to the research frontier.

Teaching: 30 hours of lectures in the AT. 30 hours of lectures in the WT.

30 hours of lectures in the AT. 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 60 hours across Autumn Term and Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Assignment (100%) in the ST.

EC540 Not available in 2024/25 Political Economy for Research Students

This information is for the 2024/25 session.

Teacher responsible: Prof Torsten Persson TBA, Prof Gilat Levy SAL.4.31, Prof Valentino Larcinese CON.5.02 and Dr Ethan Ilzetzki SAL.1.11

Availability: This course is available on the MRes/PhD in Economics, MRes/PhD in Economics and Management, MRes/PhD in Management (Organisational Behaviour) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: MRes Economics first year core courses for Economics students, EC400 and adviser's approval for Government students. EC400, EC411 (or equivalent) and course convener's approval for all other students.

Course content: The course will provide students with the economic methodology and tools for the analysis of political decision making and its effect on public policy – e.g., how institutions such as elections, legislative bargaining, political parties or non-democratic regimes shape redistributive policies, fiscal policies, and the size of government. We will also consider different aspects of selection in politics: who is selected to be a politician or a political leader, and how those selected use their political power. In addition, we will study how political attitudes, beliefs, and norms shape policies. The course will focus on analytical models, their testable implications, and on empirical work relying on micro data.

Teaching: 30 hours of lectures in the AT. 30 hours of lectures in the WT.

The course is delivered through lectures totalling a minimum of 60 hours across Autumn Term and Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Political Economics by T. Persson and G. Tabellini, MIT Press 2002; Special Interest Politics by G. Grossman and E. Helpman, MIT Press 2001; Positive Political Theory 1, Collective Preference, by D. Austen-Smith and J. Banks, Michigan, 2000; Positive Political Theory 2, Strategy and Structure, by D. Austen-Smith and J. Banks, Michigan, 2005; Who Becomes a Politician?, by E. Dal Bo, F. Finan, O. Folke, and J. Rickne, QJE 2017; Gender Quotas and the Mediocre Man, by T. Besley, O. Folke, T. Persson, and J. Rickne, AER 2017; Economic and Social Insiders, but Political Insiders, by E. Dal Bo, F. Finan, O. Folke, and J. Rickne, RE Stud (forthcoming); Identity, Beliefs, and Political Conflict, G. Bonomi, N. Gennaioli and G. Tabellini, QJE, 2021. Alesina, Alberto, and Andrea Passalacqua, 2016. "The Political Economy of Government Debt." Chap. 33 in Handbook of Macroeconomics, vol. 2, edited by John B. Taylor and Harald Uhlig. Amsterdam: Elsevier.

Assessment: Essay (100%, 2000 words) in the ST.

EC541 Half Unit Topics in Advanced Econometrics for Research Students I

This information is for the 2024/25 session.

Teacher responsible: Prof Taisuke Otsu SAL.4.25

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: See course content for EC485. Additionally, this course will examine more advanced theories and applications in Econometric Theory. Recent developments in the field will be discussed, giving students an insight into the process by which research is conducted, and suggesting fruitful areas for research. Additional topics in this field are explored in Topics in Advanced Econometrics for Research Students II in the Winter Term.

Teaching: 20 hours of EC485 Topics in Advanced Econometrics lectures and 10 further hours of lectures in the AT.

This course is delivered through lectures totalling a minimum of 30 hours across Autumn Term. There are no classes. Attendance at lectures is compulsory.

Indicative reading: Please consult the reading list for EC485. Additional readings will be recommended at the start of the course.

Assessment: Exam (100%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

EC542 Half Unit

Topics in Advanced Econometrics for Research Students II

This information is for the 2024/25 session.

Teacher responsible: Prof Francisco Hidalgo

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: See course content for EC485. Additionally, this course will examine more advanced theories and applications in Econometric Theory. Recent developments in the field will be discussed, giving students an insight into the process by which research is conducted, and suggesting fruitful areas for research. Additional topics in this field are explored in Topics in Advanced Econometrics for Research Students I in the Autumn Term.

Teaching: 20 hours of EC485 Topics in Advanced Econometrics lectures and 10 further hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 30 hours across Winter Term. There are no classes. Attendance at lectures is compulsory.

Indicative reading: Please consult the reading list for EC485. Additional readings will be recommended at the start of the course.

Assessment: Assessment path 1

Exam (100%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

Assessment path 2

Exam (50%, duration: 1 hour, reading time: 15 minutes) in the spring exam period.

Essay (50%, 2000 words) in the ST.

EC543 Half Unit

International Economics for Research Students I

This information is for the 2024/25 session.

Teacher responsible: Dr Thomas Sampson SAL.2.34 and Prof Daniel Sturm SAL.2.35

Dr Catherine Thomas MAR 6.29

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: This course is concerned with the latest developments in international economics. The course builds on techniques introduced in MSc International Economics (EC421) to take students to the research frontier. The course covers international trade, as well as economic geography and urban economics.

The course is based around research papers. Topics covered vary from year to year as the research frontier expands. A list of representative topics in international trade includes: micro-econometric studies of international trade (in developed and developing countries alike), quantitative trade models, firm heterogeneity and trade, and foreign direct investment. In addition, the course will also cover topics in economic geography and urban economics.

Additional topics are explored in International Economics for

Research Students II in the Winter Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the AT.

This course is delivered through lectures totalling a minimum of 30 hours across Autumn Term. Attendance is compulsory.

Indicative reading: Readings will be from journal articles; a list will be supplied at the start of term.

Assessment: Coursework (100%) in the AT.

Two take-home assignments. Each assignment will carry equal weight. Take-home assignments may require students to analyse data, empirically solve a computational exercise, solve theoretical models, assess recent research, or prepare a research proposal.

EC544 Half Unit

International Economics for Research Students II

This information is for the 2024/25 session.

Teacher responsible: Dr Isabela Manelici SAL 2.29 and Dr Dmitry Mukhin SAL 1.24

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: This course is concerned with the latest developments in international economics. The course builds on techniques introduced in MSc International Economics (EC421) to take students to the research frontier. The course covers themes in international trade, and international macroeconomics.

The course is based around research papers. Topics covered vary from year to year as the research frontier expands. Representative topics in international trade includes: firm heterogeneity and trade, and foreign direct investment. Representative topics in international macroeconomics include: international business cycles, determinants of international capital flows, portfolio choice and risk sharing, monetary and fiscal policy in open economies, theoretical and empirical work on the real exchange rate and international financial crises (e.g., currency attacks and sovereign defaults).

Additional topics are explored in International Economics for Research Students I in the Autumn Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 30 hours across Winter Term. Attendance is compulsory.

Indicative reading: Readings will be from journal articles; a list will be supplied at the start of term.

Assessment: Coursework (100%) in the WT.

Two take-home assignments. Each assignment will carry equal weight. Take-home assignments may require students to analyse data, empirically solve a computational exercise, solve theoretical models, assess recent research, or prepare a research proposal.

EC545 Half Unit

Labour Economics for Research Students I

This information is for the 2024/25 session.

Teacher responsible: Prof Alan Manning SAL.2.36 and Prof John Van Reenen SAL.2.27A

Availability: This course is available on the MRes/PhD in Economics, MRes/PhD in Economics and Management and MRes/PhD in Management (Marketing). This course is not available as an outside option.

Course content: The aim of the course is to familiarise students with main theoretical and empirical issues in current labour economics, to provide them with the tools for conducting independent research in the field, and to provide a perspective on areas of ongoing research. The course has a strong applied

focus. For each major topic covered we will investigate the main available theories in light of their testable implications, discuss the advantages and limitations of existing empirical work and assess policy options. Topics are likely to include:

- Imperfect competition in the labour market (monopsony); minimum wages; immigration.
- Managerial and personnel economics; productivity; human capital; inequalities (labour share of income, CEO pay, wage inequality and new technologies).

Additional topics are explored in Labour Economics for Research Students II in the Winter Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the AT.

This course is delivered through lectures totalling a minimum of 30 hours in Autumn Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Take-home assessment (100%) in the WT.

EC546 Half Unit Labour Economics for Research Students II

This information is for the 2024/25 session.

Teacher responsible: Prof Yona Rubinstein CKK5.32
Dr Christiane Szerman TBC

Availability: This course is available on the MRes/PhD in Economics, MRes/PhD in Economics and Management and MRes/PhD in Management (Marketing). This course is not available as an outside option.

Course content: The aim of the course is to familiarise students with main theoretical and empirical issues in current labour economics, to provide them with the tools for conducting independent research in the field, and to provide a perspective on areas of ongoing research. The course has a strong applied focus. For each major topic covered we will investigate the main available theories in light of their testable implications, discuss the advantages and limitations of existing empirical work and assess policy options. Topics are likely to include:

- The inequality and distributional consequences of labour market policies.
 - The economics of entrepreneurship: self-employment and business entrepreneurship; labour market discrimination; human traits and labour market skills; the family and the labour market
- Additional topics are explored in Labour Economics for Research Students I in the Autumn Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 30 hours in Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Take-home assessment (100%) in the ST.

EC547 Half Unit Public Economics for Research Students I

This information is for the 2024/25 session.

Teacher responsible: Prof Johannes Spinnewijn SAL.3.24
Prof David Seim TBC

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: The course will cover the economics of the public sector, including material on taxation, public expenditures and political economics. The course, which covers both theory and

empirics, aims to give students a broad overview of this growing field and bring them to the research frontier.

The specific topics covered may vary from year to year. The following are likely to be included:

- Social insurance design: unemployment Insurance (and moral hazard); Health Insurance (and adverse Selection); social security; incidence.
- Inequality; intergenerational mobility; efficiency, labour supply and taxable income; employment protection.

Additional topics are explored in Public Economics for Research Students II in the Winter Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the AT.

This course is delivered through lectures totalling a minimum of 30 hours in Autumn Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of the term. Although the course will not be based on a textbook as such, it will make extensive use of:

- Handbook of Public Economics Vol. 1-4 (A.J. Auerbach and M. Feldstein, eds.)
- Lectures in Public Economics, A.B. Atkinson and J.E. Stiglitz, Princeton University Press, 2015.

Clarification of assessment

Assessment: Coursework (100%) in the AT.

Coursework may include problem sets or other take home assignments, referee reports or a replication exercise.

EC548 Half Unit Public Economics for Research Students II

This information is for the 2024/25 session.

Teacher responsible: Dr Kate Smith SAL.3.16 and Dr Xavier Jaravel SAL.3.15

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: The course will cover the economics of the public sector, including material on taxation, public expenditures and political economics. The course, which covers both theory and empirics, aims to give students a broad overview of this growing field and bring them to the research frontier.

The specific topics covered may vary from year to year. The following are likely to be included:

- Structural methods with applications to public economics questions.
- Externalities and internalities
- Business taxation
- Tax evasion and compliance
- Inequality
- Public goods and public provision of private goods
- Private provision of public goods

Additional topics are explored in Public Economics for Research Students I in the Autumn Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 30 hours in Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of the term. Although the course will not be based on a textbook as such, it will make extensive use of:

- Handbook of Public Economics Vol. 1-4 (A.J. Auerbach and M. Feldstein, eds.)
- Lectures in Public Economics, A.B. Atkinson and J.E. Stiglitz, Princeton University Press, 2015.

Clarification of assessment

Assessment: Coursework (100%) in the WT.

Coursework may include problem sets or other take home assignments, referee reports or a replication exercise.

EC549 Half Unit

Development Economics for Research Students I

This information is for the 2024/25 session.

Teacher responsible: Prof Maitreesh Ghatak SAL.3.08A
Dr Michael Callen SAL.3.18

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: The course will cover advanced topics in development economics where current research is active. It is intended to introduce research students in economics to the latest research in development economics and to serve as an input into the research work of these students.

Additional topics are explored in Development Economics for Research Students II in the Winter Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the AT.

This course is delivered through lectures totalling a minimum of 30 hours in Autumn Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Problem sets (100%) in the AT.

There will be three assessment exercises in AT. These assessment exercises may include preparing a research paper proposal, an empirical exercise analysing data, a computation exercise, solving a theoretical exercise, or evaluating a recent unpublished working paper. Each assessment exercise will carry equal weight

EC550 Half Unit

Development Economics for Research Students II

This information is for the 2024/25 session.

Teacher responsible: Dr Gharad Bryan SAL.3.10
Dr Clare Balboni (TBC)

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: The course will cover advanced topics in development economics where current research is active. It is intended to introduce research students in economics to the latest research in development economics and to serve as an input into the research work of these students.

Additional topics are explored in Development Economics for Research Students I in the Autumn Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 30 hours in Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Problem sets (100%) in the WT.

There will be three assessment exercises in WT. These assessment exercises may include preparing a research paper proposal, an empirical exercise analysing data, a computation exercise, solving a theoretical exercise, or evaluating a recent unpublished working paper. Each assessment exercise will carry equal weight

EC551 Half Unit

Economics of Industry for Research Students I

This information is for the 2024/25 session.

Teacher responsible: Dr Pasquale Schiraldi SAL.4.22 and Prof Martin Pesendorfer SAL.4.19

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: The main goal is to familiarize students with selected theoretical and empirical topics in industrial organization and to put students in a position to do their own research. Classical IO theory, well established empirical techniques including estimation of demand, production and models of strategic interaction and topics at the forefront of current IO research will be covered.

Additional topics are explored in Economics of Industry for Research Students II in the Winter Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the AT.

This course is delivered through lectures totalling a minimum of 30 hours in Autumn Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Problem sets (100%) in the AT.

4 take home problem sets in AT. Each problem set will carry equal weight. Problem set questions may include an empirical exercise analysing data, a computation exercise, solving an analytical problem or evaluating a recent unpublished working paper.

EC552 Half Unit

Economics of Industry for Research Students II

This information is for the 2024/25 session.

Teacher responsible: Prof Alessandro Gavazza SAL.4.02
Dr Eduard Boehm TBC

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: The main goal is to familiarize students with selected theoretical and empirical topics in industrial organization and to put students in a position to do their own research. Classical IO theory, well established empirical techniques including estimation of demand, production and models of strategic interaction and topics at the forefront of current IO research will be covered.

Additional topics are explored in Economics of Industry for Research Students II in the Winter Term. The two half unit courses are designed to complement each other.

Additional topics are explored in Economics of Industry for Research Students I in the Autumn Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 30 hours in Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Problem sets (100%) in the WT.

4 take home problem sets in WT. Each problem set will carry equal weight. Problem set questions may include an empirical exercise analysing data, a computation exercise, solving an analytical problem or evaluating a recent unpublished working paper.

EC553 Half Unit Microeconomic Theory for Research Students I

This information is for the 2024/25 session.

Teacher responsible: Dr Matthew Levy SAL.3.21 and Dr Francesco Nava SAL.3.20

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Pre-requisites: Students must have completed Microeconomics for MRes students (EC441).

Course content: The objective of this course is to provide students with a graduate level introduction to advanced topics and contemporary developments in Microeconomic Theory on the research frontier.

Topics may include:

- Behavioural economics: reference-dependent preferences, anticipatory utility and self-control
- Coasian dynamics: classical Coasian results and remedies, differentiated durable goods and competition.

Additional topics are explored in Microeconomics for Research Students II in the Winter Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the AT.

This course is delivered through lectures totalling a minimum of 30 hours in Autumn Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Osborne M, and Rubinstein A, A Course in Game Theory, MIT Press, 1994. Fudenberg D, and Tirole J, Game Theory, MIT Press, 1991

Readings will be mainly from journal articles; a list will be supplied at the start of each section.

Assessment: Essay (50%) and essay (50%) in the AT.

EC554 Half Unit Microeconomic Theory for Research Students II

This information is for the 2024/25 session.

Teacher responsible: Dr Christopher Sandmann SAL.4.24
Dr Paula Onuchic, TBC

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Pre-requisites: Students must have completed Microeconomics for MRes students (EC441).

Course content: The objective of this course is to provide students with a graduate level introduction to advanced topics and contemporary developments in Microeconomic Theory on the research frontier.

Topics may include:

- Auction theory
- Screening and multi-contracting
- Search and matching
- Information and Learning: properties of knowledge and information, comparisons of information structures, learning, and information design.

Additional topics are explored in Microeconomics for Research Students I in the Autumn Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 30 hours in Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles and class notes. A list of readings will be supplied at the start of each section, and class notes and slides will be provided concurrently with the lectures.

Assessment: Essay (50%) and essay (50%) in the WT.

EC555 Half Unit Macroeconomics for Research Students I

This information is for the 2024/25 session.

Teacher responsible: Prof. Rachel Ngai, SAL 1.15
Prof. Matthias Doepke, SAL.1.18

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: Surveys the most recent development in a range of macroeconomics topics, with an emphasis on technical detail and directions for further research opened up by the material. The goal is to put the students on the research path by bringing them to the research frontier.

Additional topics are explored in Macroeconomics for Research Students II in the Winter Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the AT.

This course is delivered through lectures totalling a minimum of 30 hours across Autumn Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Assignment (100%) in the WT.

EC556 Half Unit Macroeconomics for Research Students II

This information is for the 2024/25 session.

Teacher responsible: Prof Philippe Aghion SAL.2.30
Dr Maarten De Ridder SAL.1.11
Dr Jonathon Hazell SAL.1.10

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is not available as an outside option.

Course content: Surveys the most recent development in a range of macroeconomics topics, with an emphasis on technical detail and directions for further research opened up by the material. The goal is to put the students on the research path by bringing them to the research frontier.

Additional topics are explored in Macroeconomics for Research Students I in the Autumn Term. The two half unit courses are designed to complement each other.

Teaching: 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 30 hours across Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Readings will be mainly from journal articles; a list will be supplied at the start of term.

Assessment: Assignment (100%) in the ST.

EC557 Half Unit Political Economy for Research Students I

This information is for the 2024/25 session.

Teacher responsible: Prof Torsten Persson TBA and Prof Gilat Levy SAL.4.31

Availability: This course is available on the MRes/PhD in Economics, MRes/PhD in Economics and Management and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: MRes Economics first year core courses for Economics students, EC400 and adviser's approval for Government students. EC400, EC411 (or equivalent) and course convener's approval for all other students.

Course content: The course provides students with the economic methodology and tools for the analysis of political decision

making and its effect on public policy. The course will focus on analytical models, their testable implications, and on empirical work relying on micro data across a range of topics at the frontier of the literature. For example, how institutions such as elections, legislative bargaining, political parties or non-democratic regimes shape redistributive policies, fiscal policies, and the size of government. We will also consider different aspects of selection in politics: who is selected to be a politician or a political leader, and how those selected use their political power. In addition, we will study how political attitudes, beliefs, and norms shape policies. Additional topics in this field are also explored in the half unit Political Economy for Research Students II in the WT. The two half units are designed to complement each other.

Teaching: 30 hours of lectures in the AT.

The course is delivered through lectures totalling a minimum of 30 hours across Autumn Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Political Economics by T. Persson and G. Tabellini, MIT Press 2002; Special Interest Politics by G. Grossman and E. Helpman, MIT Press 2001; Positive Political Theory 1, Collective Preference, by D. Austen-Smith and J. Banks, Michigan, 2000; Positive Political Theory 2, Strategy and Structure, by D. Austen-Smith and J. Banks, Michigan, 2005; Who Becomes a Politician?, by E. Dal Bo, F. Finan, O. Folke, and J. Rickne, QJE 2017; Gender Quotas and the Mediocre Man, by T. Besley, O. Folke, T. Persson, and J. Rickne, AER 2017

Assessment: Coursework (100%) in the WT.

EC558 Half Unit

Political Economy for Research Students II

This information is for the 2024/25 session.

Teacher responsible: Dr Ethan Ilzetzki SAL.1.11 and Prof Valentino Larcinese CON.5.02

Availability: This course is available on the MRes/PhD in Economics, MRes/PhD in Economics and Management and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: MRes Economics first year core courses for Economics students, EC400 and adviser's approval for Government students. EC400, EC411 (or equivalent) and course convener's approval for all other students.

Course content: This course provides students with the economic methodology and tools for the analysis of political decision making and its effect on public policy. The course will focus on analytical models, their testable implications, and on empirical work across a range of topics at the frontier of the literature. Topics are likely to include the political economy of macroeconomics, with several applications relating to fiscal policy and broad exposure to dynamic modelling tools. In addition, several lectures will be devoted to the political economy of mass media. Additional topics in this field are also explored in the half unit Political Economy for Research Students I in the AT. The two half units are designed to complement each other.

Teaching: 30 hours of lectures in the WT.

The course is delivered through lectures totalling a minimum of 30 hours across Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: Alesina, Alberto, and Andrea Passalacqua, 2016. "The Political Economy of Government Debt." Chap. 33 in Handbook of Macroeconomics, vol. 2, edited by John B. Taylor and Harald Uhlig. Amsterdam: Elsevier; Alesina, Alberto and Guido Tabellini, 1990. "A Positive Theory of Fiscal Deficits and Government Debt," Review of Economic Studies, 57(3); Battaglini, Marco and Stephen Coate, 2008. "A Dynamic Theory of Public Spending, Taxation, and Debt," American Economic Review 98(1); Timothy Besley and Torsten Persson, 2009. "The Origins of State Capacity: Property Rights, Taxation, and Politics," American Economic Review, vol. 99(4), pages 1218-44, September; Alesina, Alberto, and Paola Giuliano. 2015. "Culture and Institutions."

Journal of Economic Literature, 53(4): 898-944; DellaVigna Stefano and Matthew Gentzkow (2010). Persuasion: empirical evidence, Annual Review of Economics, 2: 643-669; Prat, Andrea and David Stromberg (2013): The political economy of mass media, in Advances in economics and econometrics, Ed, D. Acemoglu, Manuel Arellano, Eddie Dekel, Cambridge University Press, pp. 135-187; Groseclose, Timothy and J. Milyo (2005). A Measure of Media Bias. Quarterly Journal of Economics. 120(4): 1191-1237; Larcinese, Valentino, Riccardo Puglisi and James M. Snyder, "Partisan Bias in Economic News: Evidence on the Agenda-Setting Behavior of U.S. Newspapers". Journal of Public Economics

Assessment: Coursework (100%) in the ST.

EC559 Half Unit

Environmental Economics for Research Students I

This information is for the 2024/25 session.

Teacher responsible: Dr Clare Balboni SAL 3.13 and Dr Gharad Bryan SAL.3.10

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will cover advanced topics in environmental economics where current research is active. It is intended to introduce research students in economics to the latest research in environmental economics and to serve as an input into the research work of these students.

The course will explore literature at the research frontier in three core areas:

- Valuing environmental benefits and harms: valuing benefits; air pollution damages; climate change damages; adaptation; discounting; uncertainty.
- Environmental policy design: environmental policy instruments; cost effective environmental policy; second best environmental policy.
- Innovation, diffusion and the environment: directed technical change; climate change innovation; industrial and place-based policies; diffusion and adoption.

Teaching: 30 hours of lectures in the AT.

This course is delivered through lectures totalling a minimum of 30 hours across Autumn Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: The course combines theory and empirics and has a strong applied focus. There is no textbook for the course. Students will instead be required to engage with academic papers at the frontier of the literature, as well as with historic seminal works.

The following are examples of some essential readings students can expect to engage with, though the course will evolve with the literature in this field:

- Chay, K.Y. and Greenstone, M., 2005. Does air quality matter? Evidence from the housing market. Journal of political Economy, 113(2), pp.376-424.
- Deryugina, T., Heutel, G., Miller, N.H., Molitor, D. and Reif, J., 2019. The mortality and medical costs of air pollution: Evidence from changes in wind direction. American Economic Review, 109(12), pp.4178-4219.
- Burgess, R., Deschenes, O., Donaldson, D. and Greenstone, M., 2017. Weather, climate change and death in India. University of Chicago, pp.577-617.
- Barreca, A., Clay, K., Deschenes, O., Greenstone, M. and Shapiro, J.S., 2016. Adapting to climate change: The remarkable decline in the US temperature-mortality relationship over the twentieth century. Journal of Political Economy, 124(1), pp.105-159.
- Nordhaus, W.D., 2007. A review of the Stern review on the economics of climate change. Journal of economic literature, 45(3), pp.686-702.
- Borenstein, S., Bushnell, J., Wolak, F.A. and Zaragoza-Watkins,

M., 2019. Expecting the unexpected: Emissions uncertainty and environmental market design. *American Economic Review*, 109(11), pp.3953-3977.

- Carlson, C., Burtraw, D., Cropper, M. and Palmer, K.L., 2000. Sulfur dioxide control by electric utilities: What are the gains from trade?. *Journal of political Economy*, 108(6), pp.1292-1326.
- Acemoglu, D., Aghion, P., Bursztyn, L. and Hemous, D., 2012. The environment and directed technical change. *American economic review*, 102(1), pp.131-166.

Assessment: Problem sets (100%) in the AT.

There will be three assessment exercises in AT. These assessment exercises may include preparing a research paper proposal, an empirical exercise analysing data, a computation exercise, solving a theoretical exercise, or evaluating a recent unpublished working paper. Each assessment exercise will carry equal weight.

EC560 Half Unit

Environmental Economics for Research Students II

This information is for the 2024/25 session.

Teacher responsible: Prof Robin Burgess SAL.3.03 and Prof Philippe Aghion SAL.2.30

Availability: This course is available on the MRes/PhD in Economics and MRes/PhD in Economics and Management. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course will cover advanced topics in environmental economics where current research is active. It is intended to introduce research students in economics to the latest research in environmental economics and to serve as an input into the research work of these students. This course complements Environmental Economics for Research Student I in the Autumn Term.

The course explores the literature on the implementation of adaptive and mitigation policies. In particular:

- Growth and the environment;
- Adaptation and social protection;
- Climate justice;
- Conservation and biodiversity: terrestrial and oceans;
- Clean air and water;
- Energy equality;
- Cost of environmental regulation;
- Behavioural economics and environmental policy;
- Trade and the environment;
- Migration and the environment.

Teaching: 30 hours of lectures in the WT.

This course is delivered through lectures totalling a minimum of 30 hours across Winter Term. Attendance is compulsory.

Formative coursework: Students will discuss papers in lectures.

Indicative reading: The course combines theory and empirics and has a strong applied focus. There is no textbook for the course. Students will instead be required to engage with academic papers at the frontier of the literature, as well as with historic seminal works.

The following are examples of some essential readings students can expect to engage with, though the course will evolve with the literature in this field:

- Jayachandran, S., 2022. How economic development influences the environment. *Annual Review of Economics*, 14, pp.229-252.
- Banzhaf, S., Ma, L. and Timmins, C., 2019. Environmental justice: The economics of race, place, and pollution. *Journal of Economic Perspectives*, 33(1), pp.185-208.
- Dasgupta, P., 2021. The economics of biodiversity: the Dasgupta review. Hm Treasury.
- Burgess, R., Colmer, J. M., & Greenstone, M. (2023). The economics of marine conservation. Working Paper.
- Duflo, E., Greenstone, M., Pande, R. and Ryan, N., 2013. Truth-telling by third-party auditors and the response of polluting firms: Experimental evidence from India. *The Quarterly Journal of*

Economics, 128(4), pp.1499-1545.

- Kremer, M., Leino, J., Miguel, E. and Zwane, A.P., 2011. Spring cleaning: Rural water impacts, valuation, and property rights institutions. *The Quarterly Journal of Economics*, 126(1), pp.145-205.
- Burgess, R., Greenstone, M., Ryan, N. and Sudarshan, A., 2020. The consequences of treating electricity as a right. *Journal of Economic Perspectives*, 34(1), pp.145-169.
- Abito, J.M., 2020. Measuring the welfare gains from optimal incentive regulation. *The Review of Economic Studies*, 87(5), pp.2019-2048.
- Allcott, H., 2011. Social norms and energy conservation. *Journal of public Economics*, 95(9-10), pp.1082-1095.
- Barrows, G. and Ollivier, H., 2021. Foreign demand, developing country exports, and CO2 emissions: Firm-level evidence from India. *Journal of Development Economics*, 149, p.102587.

Assessment: Problem sets (100%) in the WT.

There will be three assessment exercises in WT. These assessment exercises may include preparing a research paper proposal, an empirical exercise analysing data, a computation exercise, solving a theoretical exercise, or evaluating a recent unpublished working paper. Each assessment exercise will carry equal weight.

EC599

Research Paper in Economics

This information is for the 2024/25 session.

Teacher responsible: Various.

Availability: This course is compulsory on the MRes/PhD in Economics. This course is not available as an outside option.

Course content: A research paper, between 5,000 and 10,000 words, related to the student's designated major field, to be submitted in Spring term.

Assessment: Dissertation (100%, 10000 words) in the ST.

EH510

Seminar on Modern Economic History

This information is for the 2024/25 session.

Teacher responsible: Prof Tirthankar Roy SAR 616

Availability: This course is available on the MPhil/PhD in Economic History. This course is available as an outside option to students on other programmes where regulations permit.

For research students. Also open to other EH graduate students and attended by LSE and other faculty.

Course content: The seminar provides a context in which research students can discuss with a range of seminar presenters from inside and outside LSE presentations of different aspects of economic development during the modern period.

Teaching: 10 hours of seminars in the AT. 10 hours of seminars in the WT. 8 hours of seminars in the ST.

EH520

Approaches to Economic and Social History

This information is for the 2024/25 session.

Teacher responsible: Prof Mary Morgan SAR 609 and Prof Leigh Gardner SAR 507

Availability: This course is available on the MPhil/PhD in Economic History. This course is not available as an outside option.

This course is primarily structured for 1st year MPhil students in the Department of Economic History, for whom attendance is compulsory.

Second year MPhil students are expected to attend the session in

Week 3 only.

Course content: Approaches to Economic and Social History

Teaching: 20 hours of seminars and 2 hours of workshops in the AT. 20 hours of seminars in the WT. 8 hours of seminars and 6 hours of workshops in the ST.

All students are expected to participate in the Summer Term workshop

Formative coursework: Written work and presentations as required by the Doctoral Programmes Director.

Indicative reading: There is no indicative reading list for this course as readings are updated annually to reflect student's interests.

Assessment: This course has no summative assessment.

EH590

Thesis Workshop in Economic History

This information is for the 2024/25 session.

Teacher responsible: Prof Tirthankar Roy SAR 616

Availability: This course is compulsory on the MPhil/PhD in Economic History. This course is not available as an outside option.

Course content: Thesis workshop in Economic History.

Teaching: 22 hours of seminars in the AT. 22 hours of seminars in the WT. 14 hours of seminars in the ST.

Assessment: This course is not examined.

EU550

Research Workshop in European Studies

This information is for the 2024/25 session.

Teacher responsible: Prof Simon Glendinning CBG.7.01, Prof Christopher Anderson CBG.6.05, Dr Abigail Innes CBG.6.03 and Prof Jonathan Hopkin CBG.6.01

Availability: This course is compulsory on the MPhil/PhD in European Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.

The course is recommended for those second and third year PhD students in the Government Department whose research focuses on European topics.

Course content: Presentation and detailed discussion of PhD related research, outlines and progression. Discussion of thesis chapters and related doctoral research, with an emphasis on research design and methodology. Practice conference panel sessions. A detailed syllabus is fixed at the start of each term.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 30 hours across the Autumn and Winter Terms. It will be delivered through online and/or in-person seminars.

Assessment: There is no examination for this course. Regular attendance and active participation is required. All students are required: to present at least one substantial chapter/paper draft; to act as a discussant on another paper; and to read papers in advance of the seminar in which they are discussed.

FM502

Corporate Finance for Research Students

This information is for the 2024/25 session.

Teacher responsible: Dr Ashwini Agrawal, Prof Amil Dasgupta, Prof Dirk Jenter, Prof Martin Oehmke, and Dr Paul Voss

Availability: This course is compulsory on the MRes/PhD in Finance. This course is available with permission as an outside option to students on other programmes where regulations permit.

Doctoral students in the Departments of Finance and Economics, and other students with the permission of the PhD Finance Programme Director.

This course is not capped; any eligible student that requests a place will be given one.

Course content: The first half of this course focuses on the theory of corporate finance. The theory half of the course can, in turn, be subdivided into two parts. The first part reviews some of the classical concepts in corporate finance, using tools from game theory and contract theory to study incentive and information problems at the level of the firm, and examines how financial contracts can be designed to mitigate these problems. This part of the course also considers how takeovers and ownership concentration can help to mitigate conflict of interests among insiders and investors in firms. The second part focuses on the theory of financial intermediation. This component first reviews classic theories of banking while also introducing students to recent developments in the field. The course then introduces students to asset managers as financial intermediaries, examining their role in financial markets and corporate governance. The second half of the course will consider empirical research in corporate finance. Several lectures will be devoted to understanding and applying commonly used research methodologies, such as randomized control trials, instrumental variables in linear regressions, regression discontinuity designs, event studies, and structural estimation techniques. There will also be extensive discussion of subtopics within empirical corporate finance, such as firm financial policy, investment behaviour, control transactions, corporate governance, financial intermediation, household finance, consumer finance, and overlapping topics with industrial organization and labour economics. For each topic, time will be devoted to assessing current levels of active research and open questions for further work. A significant portion of time will also be spent critically evaluating empirical papers through referee reports and discussions. Students will also have the opportunity to consider various processes that different researchers follow to generate ideas, collect data, write papers, and manage the publication process.

Teaching: 30 hours of lectures in the AT. 30 hours of lectures in the WT.

Indicative reading: Readings will be mainly based on books and journal articles including:

Tirole, Jean, *The Theory of Corporate Finance*, 2006, Princeton University Press.

Freixas, X. and Rochet, J.C., *The Microeconomics of Banking*, 1997, MIT Press.

J. Wooldridge, *Econometric Analysis of Cross-Section and Panel Data*, Cambridge: The MIT Press, 2002.

M. Roberts and T. Whited: "Endogeneity in Empirical Corporate Finance," *Handbook of the Economics of Finance*, vol. 2.

Assessment: Continuous assessment (100%).

FM503

Asset Pricing for Research Students

This information is for the 2024/25 session.

Teacher responsible: Prof Ian Martin, Dr Cameron Peng, Prof Christopher Polk, Prof Dimitri Vayanos

Availability: This course is compulsory on the MRes/PhD in Finance. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not capped; any eligible student that requests a place will be given one.

Course content: The course is divided into two parts, one relating to theoretical asset pricing and one to empirical asset pricing. The theoretical part covers dynamic models of frictionless markets, both in discrete and in continuous time, and models with frictions. The frictionless material includes the theory of no-arbitrage and the scholastic discount factor; return predicatability and excess volatility; derivatives; and equilibrium models of financial markets.

The frictions material includes micro models of frictions such as, asymmetric information, costs of search and market participation, and leverage constraints, and models showing how the frictions affect equilibrium prices of stocks, government bonds, and currencies.

The second half of the course is an introduction to empirical asset pricing with a focus on stylized facts and the ability of asset-pricing theories to explain those findings. We first study single and multifactor models of the cross-section of average returns, focusing on the variety of methods that one can use to estimate and test such models. We next examine time-series predictability, with an emphasis on the present-value models that facilitate an understanding of those patterns, both in the aggregate and at the level of the firm. With that evidence and those methods in hand, we then study neoclassical extensions of the CAPM – including the Consumption CAPM (CCAPM), conditional versions of the CAPM and CCAPM, and the Intertemporal CAPM – that aim to explain those important stylized facts. Finally, we depart from the neoclassical paradigm, studying topics that include price-level tests of market efficiency, key findings related to institutional trading, demand-based asset pricing, behavioural and household finance and belief formation.

Teaching: 30 hours of lectures in the AT. 30 hours of lectures in the WT.

Indicative reading:

- John Campbell, 1999, Asset prices, consumption, and the business cycle, in J. B. Taylor and M. Woodford, Eds., *Handbook of Macroeconomics*, Volume 1C, Elsevier Science B.V
- John Campbell, 2017, *Financial Decisions and Markets: A Course in Asset Pricing*, Princeton University Press
- John Cochrane, 2004, *Asset Pricing*, Princeton University Press
- David Kreps, 2020, *The Black-Scholes-Merton Model as an Idealization of Discrete-Time Economies*, Econometric Society Monograph, Cambridge University Press.
- Andrei Shleifer, 2000, *Inefficient Markets: An Introduction to Behavioral Finance*, Clarendon Lectures in Economics, Oxford University Press.
- Kenneth Singleton, 2006, *Empirical Dynamic Asset Pricing*, Princeton University Press

Assessment: Continuous assessment (100%).

FM505

PhD Seminar in Finance

This information is for the 2024/25 session.

Availability: This course is compulsory on the MRes/PhD in Finance. This course is not available as an outside option.

Course content: This is a seminar course for PhD students in the early stages of their research to present their work in progress. Outside speakers may also be invited from time to time.

Teaching: 10 hours of seminars in the AT. 10 hours of seminars in the WT. 6 hours of seminars in the ST. Other meetings to be arranged as necessary.

Assessment: Essay (100%, 10000 words) in August. A 10,000 word essay on a topic to be agreed with the student's supervisor. This essay is to be submitted by the end of August.

GI500

Doctoral Workshop: Department of Gender Studies

This information is for the 2024/25 session.

Teacher responsible: Prof Clare Hemmings

Availability: This course is compulsory on the MPhil/PhD in Gender. This course is not available as an outside option.

Course content: The first aim of the workshop is to give students experience and practice in critically assessing and providing

feedback on one another's work. Students typically submit thesis chapter drafts (or draft articles if PhD by publication) for workshopping and build skills of critique and receiving feedback as they go forward. First year students are expected to present their work in progress towards their upgrade. Second and third year students (unless away on fieldwork) are expected to share some part of their dissertation research at least once per year.

The second aim of the workshop is to enhance professional training and personal development for PhD students. These have included 'attending conferences', 'writing for publication', 'taking effective notes', 'monograph proposal process' and so on. These are typically spread through the year, but are concentrated in ST. These also include early career researchers and faculty where appropriate.

Teaching: The seminar will run on a fortnightly basis in AT, WT, and ST, with occasional additional longer workshops without outsider researchers.

Indicative reading: PhD chapters and articles suggested by students relevant to their topic.

Assessment: No summative assessment, but attendance and participation is considered part of the overall formal assessment of progress, including upgrade at the end of the first year and annually thereafter. Students are normally expected to attend GI500 until the end of their third year.

Students should refer to the PhD handbook for advice on milestones.

GV501

Doctoral Workshop: Political Theory

This information is for the 2024/25 session.

Teacher responsible: Prof Lea Ypi

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option.

Compulsory for PhD students in the Department of Government specialising in political theory.

Course content: An opportunity for students to present chapters or papers related to their current research for critical discussion.

Teaching: There are typically 5 sessions in AT and 5 sessions in WT, and a variable number of sessions in ST, totalling around 18 hours of workshops across the terms. The precise schedule will be made available at the start of each term. There will be a reading week in Week 6 of both the AT and WT.

GV503

Political Philosophy Research Seminar

This information is for the 2024/25 session.

Teacher responsible: Prof Lea Ypi

Availability: This course is available on the MRes/PhD in Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit. Compulsory for all PhD students in the Department of Government specialising in political theory. Other interested students are welcome to attend, if numbers permit.

Course content: Guest speakers present papers and initiate discussion at seminars.

Teaching: There are typically 5 sessions in AT and 5 sessions in WT, and a variable number of sessions in ST, totalling around 18 hours of workshops across the terms. The precise schedule will be made available at the start of each term. There will be a reading week in Week 6 of both the AT and WT.

Assessment: No assessment

GV504

Research Methods in Political Theory

This information is for the 2024/25 session.

Teacher responsible: Prof Kai Spiekermann

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option.

Course content: This course provides an introduction to the philosophical and methodological foundations of political theory. It aims to give doctoral students a comprehensive conceptual toolbox that can be brought to bear on many different substantive problems and research questions in political theory and neighbouring fields and will prepare doctoral students for choosing and reflecting on their methodological approach. The course runs in concurrence with the Political Philosophy Research Seminar and the Doctoral Workshop in Political Theory, complemented by a reading group in the Winter Term on methodological questions in political theory.

Teaching: This course is made up of seminars totalling 10 hours in the Winter Term. There will be a reading week in WT Week 6.

The seminars run in concurrence with GV501 and GV503, for which attendance is compulsory if students are taking GV504. These courses are made up of 18 hours of workshops/seminars each, which run throughout the Autumn, Winter and Spring Terms.

Formative coursework: Regular presentations in the reading group.

Indicative reading: Possible readings will be discussed during a preparatory meeting in the AT.

Assessment: Essay (50%, 4000 words) in the WT.

Essay (50%, 4000 words) in the ST.

The essay topics will be chosen in consultation with the course convenor, but typically, one will reflect on a paper given by a visiting speaker in the Political Philosophy Research Seminar, and the other on one or more of the readings for the Winter Term Reading Group.

GV513 Half Unit Not available in 2024/25

Qualitative Methods in the Study of Politics

This information is for the 2024/25 session.

Teacher responsible: TBC

Availability: This course is available on the MRes/PhD in Political Science. This course is available with permission as an outside option to students on other programmes where regulations permit. Other PhD students must request permission from the class teacher, which is routinely granted subject to capacity.

Course content: This course introduces and critically evaluates a range of qualitative techniques and methods in political science. It builds students' capability to select, reject, and deploy them in research design and practice.

The course begins with debates over the place of qualitative methods in political science, and the question of how to match ideas to methods. The rest of the course is devoted to exploring a range of qualitative techniques, including case selection, case studies and process tracing, comparisons, interviews and field research, qualitative comparative analysis, and "mixed methods". The content of each week will be integrated as closely as possible with participants' own research projects (even if qualitative work constitutes only a small part thereof). The course is relevant for political scientists, but also students of development and international relations.

Teaching: 20 hours of seminars in the Lent Term, complemented by small-group work outside of the seminars. This course includes a reading week in LT Week 6. This year, some or all of this teaching may be delivered through a combination of online and on-campus seminars.

Indicative reading: G. King, R. Keohane, and S. Verba, *Designing Social Inquiry: Scientific inference in qualitative research* (Princeton, 1994). Antoinette Burton ed., *Archive Stories: Facts,*

Fictions, and the Writing of History (Duke University Press, 2006); David Collier and Henry Brady, *Rethinking Social Inquiry* (Rowman and Littlefield 2010); John Gerring, *Case Study Research: Principles and Practices* (Cambridge University Press 2007).

Assessment: Essay (30%, 2500 words) in the WT.

Project (70%, 3000 words) in the ST.

Students are assessed by two pieces of work:

(1) An essay answering one question from a list to be provided in Lent Term (up to 2500 words)

The deadline for this work will fall into Week 9 of Lent Term. It will be worth 30% of the final mark.

(2) A thorough critique of an article applying one or more of the methods discussed in this course, focused on its research design and execution (3000 words). The deadline for this work will fall into the first week of Summer Term. It will be worth 70% of the final mark.

GV514

Political Science and Political Economy Doctoral Workshop

This information is for the 2024/25 session.

Teacher responsible: Dr Aliz Toth

Availability: This course is available on the MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Mainly for second and subsequent year research students and staff in the Department of Government and elsewhere in the School involved in research in political science and/or political economy. First year MRes and research students are welcome to attend.

Course content: The PSPE Doctoral Workshop/Work in Progress Seminar is intended as a setting in which research students from the Department of Government present and receive feedback on early stage and ongoing research projects. In weeks when research students do not present, LSE PhD students, LSE staff, and visiting scholars from other departments will present. The seminar aims to foster a strong and lively research community and as such, welcome empirical or theoretical work linked in any way to politics or political economy.

Teaching: The workshop will meet every week, totalling a minimum of 40 hours' meeting time across the Autumn, Winter and Spring Terms.

Assessment: Not assessed.

GV517 Half Unit Not available in 2024/25

Comparative Political Economy: New Approaches and Issues in CPE

This information is for the 2024/25 session.

Teacher responsible: Prof Catherine Boone and Prof David Soskice

Availability: This course is available on the MPhil/PhD in European Studies, MRes/PhD in International Development, MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

This course is open to research students (MRes, MPhil and PhD) from any of the LSE departments. If you request a place and meet the criteria, you are likely to be given a place.

Course content: This half-unit seminar will be run as a workshop organized for research students at all levels who are working on topics in the Comparative Political Economy (CPE) of advanced capitalist and developing countries. The first seminar meetings will kick-off with overview discussions of different analytic strategies for conceptualizing variation in national economic structure,

explaining change in economic structure, and understanding the political causes and effects thereof. Subsequent meetings will workshop participants' research proposals and thesis chapters. Sessions will interlink with the CP CPE seminar series in the Government Department. The seminar is designed for MRes, MPhil and PhD students (research students) across the School wanting to engage with themes, controversies, and research frontiers in CPE, and to get feedback on their own research from scholars with shared interests. Our goal is to nurture innovation in doctoral-level CPE research at the LSE.

In general, CPE research is situated in the context of a changing global economy, but often focused on describing and explaining transformation at the level of nation states. Drivers of change can be found in the locus and organization of political power and political representation, in technological change, and/or in the dynamics of capital and geopolitics. Our seminar explores both productive connections and tensions that emerge across different explanatory models. Course themes generally emerge around the major topic areas of redistribution, accumulation, and domestic governance and regulatory regimes. A great many questions fit into these areas and our idea is that the seminars will enable students to raise issues related to their research.

Teaching: This course provides a minimum of 30 hours of seminars in the Winter Term. There will be a reading week in WT Week 6.

Formative coursework: For formative work, feedback will be provided on the student's first presentation of their dissertation proposal or chapter.

Indicative reading: (Recommended readings will be tailored for each student)

Anke Hassel and Bruno Palier, eds, *Growth and Welfare in Advanced Capitalist Economies: How have Growth Regimes Evolved* (CUP, 2021).

Jacob Hacker et al., *The American Political Economy: Politics, Markets, and Power* (CUP, 2022).

Torben Iversen and David Soskice, *Democracy and Prosperity: Reinventing capitalism through a turbulent century* (CUP, 2019).

Carles Boix, *Democratic Capitalism at the Crossroads: Technological Change and the Future of Politics* (Princeton, 2020). Jonathan Rodden, *Why Cities Lose: The Deep Roots of the Urban-Rural Divide* (Basic, 2019).

Richard Baldwin, *The Globotics Upheaval: Globalization, Robotics, and the Future of Work* (London: W&N, 2019), Chs. 4, 7.

Catherine Boone, *Inequality and Cleavage in African Politics: Regionalism by Design* (Cambridge, 2024).

Adnan Naseemullah, forthcoming in 2023. *The Political Economy of National Development*. *World Development* (forthcoming).

Mark Thatcher and Tim Vlandas, *Foreign States in Domestic Markets: Sovereign Wealth Funds and the West* (OUP, 2021).

Roselyn Hsueh, *Micro-Institutional Foundations of Capitalism: Sectoral Pathways to Globalization in China, India, and Russia* (CUP, 2022).

Frances McCall Rosenbluth and Margaret Weir, eds. *Who gets what? The New Politics of Insecurity* (CUP, 2021).

Gary Gereffi, *Global Value Chains and Development: Redefining the contours of 21st century capitalism* (CUP, 2018).

Scott Rozelle and Natalie Hell, *Invisible China: How the Urban-Rural Divide Threatens China's Rise* (U. of Chicago Press, 2020).

Assessment: Coursework (100%, 10000 words) in the ST.

Each student will submit a 20-25 page (double spaced) research paper, dissertation proposal, or draft dissertation chapter as the basis of assessment for this course.

GV599

Research Prospectus in Political Science

This information is for the 2024/25 session.

Teacher responsible: Dr Omar McDoom

Availability: This course is compulsory on the MRes/PhD in Political Science. This course is not available as an outside option.

For MRes/PhD students in Political Science only.

Course content: A research paper, not to exceed 10,000 words, related to the student's designated major field, to be submitted in August.

Assessment: Research project (100%, 10000 words) in August.

GV5X1

Research Design in the Social Sciences

This information is for the 2024/25 session.

Teacher responsible: Dr Omar McDoom

Availability: This course is compulsory on the MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Course content: The aim of this course is to help MRes/PhD students develop a research design. Students will learn how to find their research questions, choose a feasible data collection or modelling strategy, and match data collection and analytic methods to the aims of the PhD project. We also consider the relation of political theory and political science. This course is therefore designed to be a primer in asking the right questions, exploring the options available to us and understanding the consequences of the design decisions that we make. Accordingly, this course is ultimately about turning good research questions into systematic projects that deliver interesting and worthwhile results. We also debate issues in research ethics and provide advice on publication strategies, peer review and academic careers. Students will have opportunities to present their own research designs and get feedback from peers and teachers.

Teaching: This course is delivered through seminars (20 hours in Autumn Term and 20 hours in Winter Term), and includes reading weeks in Week 6 of AT and WT.

Formative coursework: This is a PhD level Research Design course. Students submit two summative pieces of work: a referee report as well as their research design. They will also give presentations and receive extensive feedback on their work in progress. These are part of formative rather than summative assessment and are an important part of professional development. The main learning outcomes are to help the MRes/PhD students develop professional research designs.

Indicative reading: King, G., R. Keohane & S. Verba (1994) *Designing Social Inquiry*. Princeton UP.

Box-Steffensmeier, J., H. Brady & D. Collier (eds) (2008) *The Oxford Handbook of Political Methodology*. OUP.

Dunning, T. (2012) *Natural Experiments in the Social Sciences: A Design-Based Approach*. CUP.

Dryzek, J., B. Honig & A. Phillips (eds.) (2008) *The Oxford Handbook of Political Theory*. OUP.

Assessment: Essay (25%, 2500 words) in the AT. Research project (75%) in the ST.

GV5X2

Research Paper in Conflict Studies and Comparative Politics

This information is for the 2024/25 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the relevant MSc programme and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are

required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.

Assessment: Research paper (100%).

A 10,000 word research paper to be submitted on Tuesday Week 1 of the Spring term. The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X3

Research Paper in Political Behaviour

This information is for the 2024/25 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the relevant MSc programme and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.

Assessment: Research paper (100%).

A 10,000 word research paper to be submitted on Tuesday Week 1 of the Spring term. The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X4

Research Paper in Global Politics

This information is for the 2024/25 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the relevant MSc programme and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.

Assessment: Research paper (100%).

A 10,000 word research paper to be submitted on Tuesday Week 1 of the Spring term. The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X5

Research Paper in Political Science and Political Economy

This information is for the 2024/25 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the relevant MSc programme and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval where applicable.

Assessment: Research paper (100%).

A 10,000 word research paper to be submitted on Tuesday Week 1 of the Spring term. The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X6

Research Paper in Political Theory

This information is for the 2024/25 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the relevant MSc programme and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.

Assessment: Research paper (100%).

A 10,000 word research paper to be submitted on Tuesday Week 1 of the Spring term. The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5X7

Research Paper in Public Policy and Administration

This information is for the 2024/25 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the relevant MSc programme and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor.

Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper (1,500 words) on which the students receive feedback and topic approval.

Assessment: Research paper (100%).

A 10,000 word research paper to be submitted on Tuesday Week 1 of the Spring term. The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GV5XA Half Unit

Research Paper in Conflict Studies and Comparative Politics

This information is for the 2024/25 session.

Teacher responsible: MRes/PhD Political Science Programme Director

Availability: This course is available on the MRes/PhD in Political Science. This course is not available as an outside option. Students on the MRes/PhD in Political Science only.

Course content: Attend a GV-prefixed course from the relevant MSc programme and write a research paper on a topic agreed by the convenor of the MSc course and the student's PhD supervisor. Students must obtain permission from the relevant MSc course convenor to attend the course concerned under this option. Regular attendance and active contributions to the seminars are required.

Teaching: Attend the lectures, seminars and reading week activities (if applicable) of the relevant MSc course.

Formative coursework: A plan for the research paper on which the students receive feedback and topic approval.

Assessment: Research paper (100%).

A 5,000 word research paper to be submitted on Tuesday Week 1 of the subsequent term (i.e., modules taken in the Autumn term submit in Week 1 of the Winter term; modules taken in the Winter term submit in Week 1 of the Spring term). The research paper will be co-marked by the convenor of the relevant MSc course and the PhD supervisor of the student.

GY500

Research Project Seminar

This information is for the 2024/25 session.

Teacher responsible: Prof Olmo Silva, Prof Simon Dietz, Dr Austin Zeiderman, Prof Michael Mason and Dr Romola Sanyal

Availability: This course is compulsory on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Human Geography and Urban Studies and MPhil/PhD in Regional and Urban Planning Studies. This course is not available as an outside option.

Attendance is compulsory for all MPhil/PhD students in the Department of Geography and Environment, unless a student is conducting approved fieldwork.

Course content: Presentations by research students of aspects of their own research, stressing problems of theory, methodology and techniques. These will either be scheduled in person, on campus; or in live online meetings.

Teaching: A series of workshops, running throughout the year, organised by each of the three research clusters in the Department of Geography & Environment (Economic Geography; Environmental Economics & Policy; Urbanisation, Planning and Development).

Formative coursework: All students attending this course will be required to present their own research once each year.

Assessment: This course is not intended as preparation for any particular examination.

GY502

Staff / Research Students Seminars

This information is for the 2024/25 session.

Teacher responsible: Dr Sefi Roth, Dr Ryan Centner and Dr Felipe Carozzi

Availability: This course is compulsory on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Human Geography and Urban Studies and MPhil/PhD in Regional

and Urban Planning Studies. This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics and MPhil/PhD in Human Geography and Urban Studies. This course is available with permission as an outside option to students on other programmes where regulations permit. For all MPhil/PhD students registered in the Department of Geography and Environment and staff. Other interested students may attend.

Course content: Topical seminar series involving presentations by speakers from both inside and outside the Department on aspects of their own research.

Teaching: There are three different seminar series taking place regularly throughout the year, organised by each of the three research clusters in the Department of Geography & Environment. The Economic Geography cluster seminar series is organized in conjunction with the Spatial Economics Research Centre (SERC); the Environmental Economics & Policy cluster seminar series is organized together with the Grantham Research Institute on Climate Change and the Environment; and the Urbanisation, Planning and Development seminar series. The timing and length of each seminar series vary across research clusters and schedules and format are subject to change depending on the availability of speakers.

Assessment: This course is not intended as preparation for any particular examination. But, students will find it useful in increasing their awareness of current research and the application of research methods across the discipline.

GY503

Writing the World

This information is for the 2024/25 session.

Teacher responsible: Dr Austin Zeiderman

Availability: This course is compulsory on the MPhil/PhD in Human Geography and Urban Studies. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The word "geography" derives from a Greek term whose literal translation is "earth description" or "writing the world." At a basic level, it refers to the art of producing written accounts of people and their environments based on first-hand knowledge. The institutionalization of geography in the nineteenth century paralleled the professionalization of academic disciplines in the service of empire and capital. This course provides a space for reengaging with the practice of "writing the world" as a shared intellectual pursuit.

GY503 has two main objectives, both of which are designed to support the intellectual and career development of doctoral students in human geography and related disciplines. The first objective is to provide advanced training in research-based writing. The second objective is to foster critical engagement with texts of a geographical nature. Both objectives are to be achieved collectively by bringing together doctoral students and academic staff to meet regularly throughout the year.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a series of workshops across Autumn, Winter and Summer Terms.

This course includes a reading week in Week 6 of Autumn Term and Week 6 of Winter Term.

The core participants in GY503 are doctoral students at all stages. Academic staff and postdoctoral fellows from the Department of Geography & Environment are also strongly encouraged to participate.

Formative coursework: Doctoral students participating in this course may have the opportunity to workshop a draft of their written work (approximately 10,000 words) once during the year. Example of suitable submissions include working drafts of thesis

chapters, journal articles, and research proposals. Participants are expected to attend all meetings and to have read the specified materials beforehand.

GY520

Environmental Regulation: Implementing Policy

This information is for the 2024/25 session.

Teacher responsible: Dr Richard Perkins, Prof Michael Mason, Dr Meredith Whitten and Dr Eugenie Dugoua.

Availability: This course is available on the MPhil/PhD in Environmental Economics and MPhil/PhD in Environmental Policy and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

The number of students that can be accommodated is limited. If the course is over-subscribed, places will be allocated at the Department's discretion and a waiting list may be created. For further details, please contact your relevant Programme Coordinator.

This course cannot be taken with GY465 Concepts in Environmental Regulation or GY475 Issues in Environmental Governance or GY420 Environmental Regulation: Implementing Policy.

Course content: This course provides critical insights into the characteristics, processes and evolving dynamics of environmental policy, regulation, and governance. In the AT, the course considers different rationales for environmental regulation and the influence of different interest groups over public environmental policy making. The course proceeds to examine the characteristics, design, and performance of different policy instruments, together with various factors impacting policy implementation processes. The WT component is designed to highlight key issues in environmental governance. A basic premise is that governing sustainability transitions requires us to consider environmental decision-making and action by an increasingly diverse set of actors – including private ones. The themes covered in the WT illustrate the challenges, approaches, and tools of environmental governance by these actors: governing technological change, corporate social responsibility, sustainable finance, civil regulation, and international negotiations.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across both Autumn Term and Winter Term.

This course includes a reading week in Week 6 of Autumn Term and Winter Term.

Formative coursework: Students are expected to prepare one formative piece of coursework in the AT: feedback will be provided. In the WT, students are required to give one presentation on an agreed topic.

Indicative reading: While there is no one single text that covers all aspects of the course, you are strongly advised to consult the following:

GY574 Half Unit

Politics of Environment and Development

This information is for the 2024/25 session.

Teacher responsible: Dr Kasia Paprocki and Dr Tanya Matthan

Availability: This course is compulsory on the MPhil/PhD in Environmental Policy and Development. This course is available with permission as an outside option to students on other programmes where regulations permit.

Available to other MPhil/PhD students with relevant permission

Course content: This course explores key themes at the intersection of development and environmental politics. Specifically, the course is centred on the applications of political ecology, critical development studies, and materialist human geography to topics in environment and development. In exploring the complex relationships between historical dynamics of development, inequality, and the environment, it covers a range of important natural resource and environmental issues, such as climate change, conservation, waste, and decolonizing environmental governance.

Teaching: In the Department of Geography and Environment, teaching will be delivered through a combination of classes/seminars, pre-recorded lectures, live online lectures, in-person lectures and other supplementary interactive live activities. This course is delivered through a combination of seminars and lectures across Winter Term.

This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 1 project in the AT.

Assessment: Essay (100%, 6000 words) in the ST.

HP500

Advanced Health Policy and Health Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Justin Parkhurst, Dr Mylene Lagarde, Dr Huseyin Naci and Dr Ranjeeta Thomas

Availability: This course is compulsory on the MPhil/PhD in Health Policy and Health Economics. This course is not available as an outside option.

Course content: The PhD programme is centred around this core course and all students registered in their 1st, 2nd or 3rd year are expected to attend.

Alongside a set of bespoke lectures, the course includes a journal club where key articles are critically appraised and a series of seminars given by faculty in the Department of Health Policy and external speakers, thereby guaranteeing exposure to different materials, research areas, and theoretical perspectives and analytical techniques.

Students will be required to participate in work-in-progress seminars where students present work relating to their theses and contribute fully to discussions on their colleagues' work. The course will provide students with insights into the breadth of work in the areas of health and social care policy and health economics, and will act as a supportive critical forum for discussion of each PhD student's work-in-progress.

Teaching: Over the course of the academic year, 24 hours of lectures and 24 hours of seminars will take place. Students on the course will have reading weeks in Week 6 of both Autumn and Winter Terms.

Formative coursework: Students will be expected to produce two one-hour presentations over the course of the academic year. In one of these, the student is to contribute to the course's journal club by critically appraising an important contribution to the health policy or health economics literature. In the other instance, students will present work-in-progress, thereby showing understanding of the concepts of the course and its application in designing their PhD thesis.

Indicative reading: Tim Bhattacharya, Timothy Hyde, and Peter Tu: *Health Economics* (Palgrave Macmillan 2014)

Robert H. Blank and Viola Desidera Burau: *Comparative Health Policy*, 3rd edition (Palgrave Macmillan 2013)

Sherry Glied and Peter Smith: *The Oxford Handbook of Health Economics* (Oxford University Press 2013)

Andrew M Jones ed.: *The Elgar Companion to Health Economics*, 2nd edition (Edward Elgar 2013)

Stephen Morris et al.: *Economic Analysis in Health Care*, 2nd edition (Wiley 2013)

Assessment: Oral examination (100%).

Summative assessment in the first year of full-time PhD enrolment will consist of a 5,000 word thesis document detailing students' thesis proposal, including research question, a literature review, a description of their methodology, their plans for data collection and a timetable through to completion. Students are subject to a viva voce and marking of this document by the two non-supervisory members of the department who make the decision on upgrading. Students will be required to achieve a Pass. Please note, this is a Pass, Pass (with amendments) or Fail course.

HY501

International History Research Student Workshop

This information is for the 2024/25 session.

Teacher responsible: Prof Joanna Lewis SAR G.02

Availability: This course is compulsory on the MPhil/PhD in

International History. This course is not available as an outside option.

Course content: The workshop aims to introduce students to effective archival research, issues in the preparation of a thesis and means of launching a career in academic or related fields; and the opportunity to present research in progress.

Students yet to pass their upgrade from MPhil to PhD attend the Introductory Workshop, which meets weekly in the Autumn Term. Meetings are devoted to research and interviewing techniques and mainly practical issues of historical research.

Students due to be upgraded attend the Advanced Workshop held in the Winter and the Spring Terms, the frequency of meetings depending upon the number of participants. The meetings are intended primarily as a forum for reviewing research in progress, with a view to enabling students to pass their upgrade.

Teaching: See above

Assessment: This course is not assessed.

HY509 Not available in 2024/25 International History Research Seminar

This information is for the 2024/25 session.

Teacher responsible: Prof Joanna Lewis SAR G.02

Availability: This course is available on the MPhil/PhD in International History. This course is not available as an outside option.

MA/MSc students are welcome to attend.

Pre-requisites: There are no pre-requisites for attending but students wanting to present their research need to have passed their upgrades to PhD status.

Course content: This research seminar is convened by PhD students in International History and offers the opportunity for second, third and fourth year PhD students to present their research for discussion in conversation with others. Staff from within the department as well as invited guests from beyond the LSE will participate as discussants and presenters.

Teaching: See above

Assessment: This course is not assessed.

HY510 Contemporary International History Research Seminar

This information is for the 2024/25 session.

Teacher responsible: Dr Elizabeth Ingleson SAR 2.06

Availability: This course is available on the MPhil/PhD in International History, as well as to PhD students from other departments.

Course content: This seminar is a joint collaboration between the London School of Economics and Tufts University. The LSE-Tufts Seminar in Contemporary International History provides a workshop space for advanced PhD students and early career researchers from institutions across the world on any aspect of 20th or 21st century international history, broadly defined. The seminar covers a wide range of different historical approaches including research exploring transnational networks, non-state actors, and geographies beyond the Global North. The seminar is structured as a space for works-in-progress whereby presenters submit a 15-20 page paper for discussion with the commentator and seminar participants.

Teaching: Hybrid: In-person seminars in London and Boston with an online option.

Indicative reading: See the webpage for the course for further details.

Assessment: The course is not assessed.

IR501

Methods in International Relations Research

This information is for the 2024/25 session.

Teacher responsible: Professor Chris Alden, Professor Tomila Lankina

Availability: This course is compulsory on the MPhil/PhD in International Relations. This course is not available as an outside option.

Course content: The main objective of this course is to offer students an introduction to and route map through the principal approaches to contemporary research in the main branches of International Relations and to help students identify the appropriate methods for their own thesis. The course will investigate the relationship between theory and method in the conduct of research. It will encourage students to think about the trade-offs and tensions involved in choosing specific methods and research designs. Our aim is to facilitate student learning so that each research student can comprehend, critically interrogate and engage with scholarship employing diverse methodological toolkits. The end result aimed for is well-rounded and professional academics that are familiar and hence intellectually at ease with the plurality of methodological and theoretical approaches available to those conducting cutting edge research in International Relations.

The course therefore aims to expose students to, and generate awareness of, a variety of research methods in the discipline irrespective of the particular approach students employ in their doctoral work, and at the same time help them develop a detailed research plan for their own research. The course will aim to promote an environment of mutual support and encouragement amongst first year research students, maximising the potential for cross fertilization between different projects. The course will also develop students' presentational skills in a group setting.

Teaching: 14 hours of seminars and 9 hours of workshops in the AT. 14 hours of seminars and 9 hours of workshops in the WT.

Formative coursework: Students will be expected to draft and present sections of their research plan in the Autumn Term and to prepare and present a full research plan at the end of the Winter Term.

Assessment: This course is not assessed.

IR502

International Relations Theory/Area/History Research Workshop

This information is for the 2024/25 session.

Teacher responsible: Professor John Sidel and Dr Martin Bayly

Availability: This course is open to all interested MPhil/PhD students and faculty in the Department of International Relations. It is available with permission as an outside option to students on

other programmes where regulations permit.

Course content: The department was present at the creation of international theory. Its scholars and research students have long played leading roles in inventing and developing the discipline's paradigms and approaches. In recent decades, international theory has moved beyond its European roots, enhanced by the theories and histories of other peoples and places. Area studies specialists, historians, and scholars from other fields increasingly situate their work in international and global contexts, creating new, interdisciplinary meeting points between IR and other fields in the humanities and social sciences. IR502 is part of the research-training programme for all research students working in the often overlapping spaces of international theory, area studies, and history. The workshop provides a forum in which faculty and research students can present their work on topics including everything from Global, Postcolonial and Feminist IR to IR's traditional paradigms. The papers are circulated in advance.

Teaching: A minimum of 6 hours of seminars in the AT. A minimum of 6 hours of seminars in the WT. Some of these may be delivered online.

Assessment: This course is not assessed.

IR504

Security and Statecraft Research Workshop

This information is for the 2024/25 session.

Teacher responsible: Professor Peter Trubowitz and Dr Lauren Sukin

Availability: This course is available on the MPhil/PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

It is open to all interested research students and faculty with the Department and is available with permission to students on other programmes.

Course content: IR504 is part of the research-training programme for all research students working in the area of security and statecraft broadly defined. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars. It provides a forum in which research students can present their work, discuss the theoretical and methodological problems involved, examine common challenges in conducting research in this area and obtain feedback on their work. Research in this area draws on diverse theoretic and methodological approaches, and ranges across levels of analysis, regions, and eras. Specific foci of research include diplomacy, foreign and security relations, foreign policy analysis, comparative strategy, identity and security, war and society, state-building, peace-building and conflict resolution, revolutions, human security and genocide.

Teaching: A minimum of 6 hours of seminars in the AT. A minimum of 6 hours of seminars in the WT. Some of these may be delivered online.

Assessment: This course is not assessed.

IR507

International Institutions, Law and Ethics Research Workshop

This information is for the 2024/25 session.

Teacher responsible: Dr Mathias Koenig-Archibugi and Dr Ulrich Sedelmeier

Availability: This course is available on the MPhil/PhD in International Relations. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is open to all interested research students and faculty

in the Department of International Relations.

Course content: IR507 is part of the research-training programme for all research students working on the theory, history and/or practice of international institutions, international law and ethics. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. Research in this area runs from the study of intergovernmental and nongovernmental institutions and global governance, to the politics of international law, to the ethical and normative dimensions of global politics. It includes, but is not limited to, the study of international institutions such as the European Union, North Atlantic Treaty Organisation, and the International Criminal Court and international issues such as human rights, humanitarian intervention, climate change, global health and international crime.

Teaching: A minimum of 6 hours of seminars in the AT. A minimum of 6 hours of seminars in the WT. Some of these may be delivered online.

Assessment: This course is not assessed.

IR509

International Relations Research Design Workshop

This information is for the 2024/25 session.

Teacher responsible: Prof Tomila Lankina

Availability: This course is compulsory on the MPhil/PhD in International Relations. This course is not available as an outside option.

This workshop is compulsory for all second year International Relations Department (IRD) research students and open to other interested IRD research students.

Course content: This workshop will address issues concerning the formulation and design of the PhD research project. Its principal objective is to assist research students in designing a well-thought out and manageable thesis. It seeks to do so by providing a forum students discuss their research topic, the particular set of questions they intend to address and the methods they wish to use with other members of the workshop. Its aim is to provide students with constructively critical observations about their research project and the problems they may confront and preparing students for their upgrade Research Panel in the summer.

Teaching: 12 hours of seminars in the AT.

Assessment: This course is not assessed.

IR517A Half Unit

Special Topics in International Relations

This information is for the 2024/25 session.

Teacher responsible: PhD Programme Director

Availability: This course is available on the MPhil/PhD in International Relations. This course is not available as an outside option.

Course content: Students enrolled on IR511A follow an independent course of study on an approved topic with their supervisor(s) who will support them in producing the final research paper. There are no set lectures or seminars for this course, though students are expected to attend and participate in the Departmental research workshop most closely aligned with their research interests.

The objectives of the course are to facilitate student engagement with specialised literature at an advanced level relevant to their area of research.

Teaching: Students will meet with their supervisor(s) on a fortnightly basis to discuss the readings, develop their research question, and receive feedback on their work.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Students will produce a plan for the research paper (1500 words) by the end of Week 4 of the AT on which the student will receive feedback and topic approval from their supervisor(s) which will be shared with the PhD Programme Director."

Indicative reading: There is no indicative reading list for this course. Readings will be developed by the student's supervisor(s) and the student to reflect the research student's interests. These will be shared with the PhD Programme Director.

Assessment: Essay (100%, 4000 words) in the WT Week 2.

A 4,000 word research paper on a topic agreed between the student and their supervisor(s) to be submitted by the beginning of Week 2 of the WT, with written feedback to be shared with the PhD Programme Director. This will count towards 100% of the final mark

IR517W Half Unit Special Topics in International Relations

This information is for the 2024/25 session.

Teacher responsible: PhD Programme Director

Availability: This course is available on the MPhil/PhD in International Relations. This course is not available as an outside option.

Course content: Students enrolled on IR517W follow an independent course of study on an approved topic with their supervisor(s) who will support them in producing the final research paper. There are no set lectures or seminars for this course, though students are expected to attend and participate in the Departmental research workshop most closely aligned with their research interests.

The objectives of the course are to facilitate student engagement with specialised literature at an advanced level relevant to their area of research.

Teaching: Students will meet with their supervisor(s) on a fortnightly basis in the Winter Term to discuss the readings, develop their research question, and receive feedback on their work.

Formative coursework: Students will be expected to produce 1 essay in the WT.

Students will produce a plan for the research paper (1500 words) by the end of Week 4 of the WT on which the student will receive feedback and topic approval from their supervisor(s) which will be shared with the PhD Programme Director.

Indicative reading: There is no indicative reading list for this course. Readings will be developed by the student's supervisor(s) and the student to reflect the research student's interests. These will be shared with the PhD Programme Director.

Assessment: Essay (100%, 4000 words) in the ST Week 2.

A 4,000 word research paper on a topic agreed between the student and their supervisor(s) to be submitted by the beginning of Week 2 of the ST, with written feedback to be shared with the PhD Programme Director. This will count towards 100% of the final mark

IR555 International Political Economy Research Workshop

This information is for the 2024/25 session.

Teacher responsible: Professor Jeffrey Chwieroth and Dr Victoria Paniagua

Availability: This course is open to all interested MPhil/PhD students and faculty in the Department of International Relations.

It is available with permission as an outside option to students on other programmes where regulations permit.

Course content: IR555 is part of the research-training programme for all research students working in the area of international political economy: the relationship between states and markets in a global context. The workshop's principal objective is to foster intellectual exchange by showcasing new and innovative work from leading and emerging scholars. The workshop will provide a forum in which research students can present their work, discuss the theoretical and methodological problems involved, discuss common challenges in conducting research in this area and obtain feedback on their work. Research in this area works at multiple levels of analysis and draws on an array of theoretic and methodological approaches from several disciplines. Both historical and contemporary questions are addressed across a range of issues including: trade, migration, global environmental politics, international economic organisations, economic diplomacy, international finance, foreign investment, exchange rates, and monetary relations.

Teaching: A minimum of 6 hours of seminars in the AT. A minimum of 6 hours of seminars in the WT. Some of these may be delivered online.

Assessment: This course is not assessed.

LL500

Doctoral Research Seminar series

This information is for the 2024/25 session.

Teacher responsible: Professor Thomas Poole

Availability: This course is compulsory on the MPhil/PhD in Law and MPhil/PhD in Law (Socio-Legal Theory). This course is not available as an outside option.

Course content: The course aims to equip students with the skills required to undertake advanced legal research. The focus in the AT is on methodological and theoretical issues arising in legal scholarship (with readings of Foucault, Geertz, Butler and others). The focus in the WT is on the various stages of the PhD process, and on preparation for professional life in academic law beyond the PhD. In the ST an Upgrade Conference is held at which first year research students present their work-in-progress.

Teaching: There will be 22 hours in Autumn Term and 22 hours in Winter Term. There will be a Reading Week in Week 6 of Autumn and Winter terms.

Assessment: There are no examination arrangements. However, attendance is compulsory for first year research students. Research students in other years may also attend.

MA500

Mathematics: Seminar on Combinatorics, Games and Optimisation

This information is for the 2024/25 session.

Teacher responsible: Dr Ahmad Abdi and Prof Bernhard Von Stengel

Availability: This course is compulsory on the MPhil/PhD in Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other members of the research community are welcome to attend.

Course content: The seminar ranges over many areas of pure and applied mathematics. The emphasis is on topics in discrete mathematics, operations research and game theory. The seminar is regarded as an important part of research students' formal training and they are expected to attend and contribute.

Teaching: 33 hours of seminars and 33 hours of seminars in the AT. 33 hours of seminars and 33 hours of seminars in the WT. 21 hours of seminars and 21 hours of seminars in the ST.

MA501

Research Student Seminar

This information is for the 2024/25 session.

Teacher responsible: Prof Jozef Skokan COL 3.04, Prof Julia Boettcher, Dr Ahmad Abdi and Prof Johannes Ruf

Availability: This course is compulsory on the MPhil/PhD in Mathematics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Other members of the research community are welcome to attend.

Course content: The seminars range across many areas of pure, applied and financial mathematics. The emphasis is on topics in discrete mathematics, algorithms, operations research, game theory, financial mathematics and control theory. The seminars are regarded as an important part of research students' formal training and they will all be expected to attend and contribute. Throughout the academic year, students are also invited to give presentations. There are additional reading groups aimed at students working in financial mathematics and discrete mathematics. These are compulsory for students working in this area but other students of the MPhil/PhD in Mathematics are welcome to attend.

Teaching: PhD Seminar on Combinatorics, Games and Optimisation (MA501.1): 11 one-and-a-half-hour seminars in the AT and WT. 7 one-and-a-half-hour seminars in the ST.

LGSMF Portfolio Optimisation Seminar (MA501.2): 11 three-hour seminars in the WT. 7 three-hour seminars in the ST.

Financial Mathematics Reading Group Seminar (MA501.3): 11 three-hour seminars and 11 one-hour seminars in the AT and WT. 7 three-hour seminars and 7 one-hour seminars in the ST.

Discrete Mathematics Reading Group Seminar (MA501.4): 11 three-hour seminars in the AT and WT. 7 three-hour seminars in the ST.

Approximately 80-90 meetings of between 1 and 3 hours throughout the AT, WT, and ST, dependent on speakers. See http://www2.lse.ac.uk/maths/Seminars/Research_Seminars.aspx for schedule and more details.

MC500

Research Seminar for Media and Communications

This information is for the 2024/25 session.

Teacher responsible: Professor Ellen Helsper

There will also be guest contributions from other academic staff from the Department of Media and Communications.

Availability: This course is compulsory on the MPhil/PhD in Data, Networks and Society and MPhil/PhD in Media and Communications. This course is not available as an outside option. This course is compulsory for doctoral researchers in the first and second years of the Doctoral Programmes in the Department of Media and Communications. Doctoral researchers in later years of study in the Department are welcome and encouraged to attend.

Course content: The aim of the course is to raise awareness of theoretical, conceptual and methodological issues in the interdisciplinary field of media and communications research and to develop students skills with respect to theory building, research design and implementation. The course focuses, in particular, on the key conceptual issues and analytical strategies required in media and communication research, with special reference to the study of the changing environment of media production, dissemination and consumption, under conditions of globalization and digitization of information

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

Indicative reading: Readings will be agreed upon by the teachers and students for each week. These will be made available on Moodle one week in advance.

An indicative reading list for theories can be found on the MC408

course guide.

An indicative reading list for methodology can be found on the MC5M2A and MC5M2B course guides.

Assessment: This course is based predominantly on student presentations on their work in progress.

Formative (e.g. the theoretical and methodology chapters, end of year reflection document) and summative assessments (e.g. upgrade and final vivas) associated with the PhD programme are seen as part of the assessment on this course and space is made in the course to write these documents and prepare for these examinations.

MC501

Advanced Doctoral Workshop in Media and Communications

This information is for the 2024/25 session.

Teacher responsible: Professor Lilie Chouliarakis

Availability: This course is available on the MPhil/PhD in Data, Networks and Society and MPhil/PhD in Media and Communications. This course is not available as an outside option.

Pre-requisites: Students must have completed Research Seminar for Media and Communications (MC500).

Course content: The series is intended to offer students guidance and support in the writing-up of their thesis. The approach to the series is student-centred, practice-oriented and dialogic, focusing on students' work - hence the term 'workshop'. Specifically, participants commit to submitting a draft of one of their PhD chapters and comment on others' submissions, in the course the academic term. The curriculum consists therefore of individual students' work, each week concentrating on a single student's draft (maximum 5000 words) submitted together with a relevant academic reading. Through a system of signing-up and pairing, each ninety-minute session is set up in two parts: the first part is a twenty-minute dialogue between the writer and their discussant, who introduces and comments on the writer's work; the second part is a full hour's exchange of ideas by all - the expectation being that everyone commits to reading the submitted draft. The role of the DPD is to gently guide group interaction and, when necessary, provide input as much on the submission as on subsequent discussion points. The role of the DPD is not to substitute the supervisor but to ensure that the discussion is conducted in an informal, friendly and non-intimidating way.

Teaching: 20 hours of workshops in the AT. 20 hours of workshops in the WT.

MC5M2

Advanced Methods of Research in Media & Communications (Specialisation Quantitative Analysis)

This information is for the 2024/25 session.

Teacher responsible: Professor Ellen Helsper

Availability: This course is compulsory on the MPhil/PhD in Data, Networks and Society and MPhil/PhD in Media and Communications. This course is not available as an outside option. This course is available for those who are on ESRC scholarships and students who are quantitatively oriented.

Course content: This course aims to provide students with methodological grounding in media and communications.

Harvard style seminars combine insight into epistemology and ontology of academic research, alongside practical instruction in several methods commonly deployed in our field, including interviews, surveys, textual analysis and more. Recognising the interdisciplinary character of media and communications research, course content will draw from this arena as well as disciplines such as computer science, sociology, cultural studies, linguistics,

psychology, and anthropology. The integral links between theory and method will be underscored, as will crucial issues of ethics and reflexivity. Support will be provided in the development of key skills, from crafting a research question through to study design and methods writing.

Please note, MC5M2 includes within it **MY465: Intermediate Quantitative Analysis**. This is a compulsory element and automatically included within the MC5M2 course code; no separate registration is necessary. Full details about this course, including structure, content, and assessment, can be found via the MY465 course page.

If students want **more advanced quantitative analysis training**, they can register for an additional course in WT (see MC5M2 handbook for course suggestions). These are not automatically included in the registration for MC5M2.

Teaching: This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 50 hours across the AT and the WT. This course includes a reading week in Week 6 of term.

1. **Advanced Principles of Social Research:** A series of ten two-hour Harvard style student assisted seminars led by media and communications faculty in the WT. Students are required to participate in all ten workshops.

2. **Intermediate Quantitative Analysis: Intermediate Quantitative Analysis:** Students take MY465 Intermediate Quantitative Analysis delivered through a combination of classes and lectures totalling a minimum of 30 hours across the AT. This course is compulsory and automatically included when students register for MC5M2.

Formative coursework: 1 Advanced Principles of Social Research: All students are expected to complete advance readings and weekly assignments, and help prepare one seminar. Students submit their formative assignment consisting of a methods chapter in ST1.

2 **Intermediate Quantitative Analysis:** Self-guided computer exercises implementing statistics covered in the lectures with weekly online homework on the material covered in the lectures and exercises during the AT.

- Miller, T. Birch, M. Mauthner, M & Jessop, J. (2014). *Ethics in Qualitative Research*. London: SAGE.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

1. One assessment relating to Intermediate Quantitative

Analysis: One exam in the January exam period for MY465 (see Methodology Department course guides).

Students must pass all components of MC5M2.

MC5M8

Advanced Methods of Research in Media & Communications (including Qualitative & Quantitative Analysis)

This information is for the 2024/25 session.

Teacher responsible: Professor Ellen Helsper

Availability: This course is available on the MPhil/PhD in Data, Networks and Society and MPhil/PhD in Media and Communications. This course is not available as an outside option.

Course content: 1 Advanced Principles of Social Research:

A series of ten two-hour Harvard style student assisted seminars led by media and communications faculty in the WT. Students are required to participate in all ten workshops.

2 **Quantitative Data Literacy:** Students take MY464 Critical Data Literacy for Media and Communications This course is compulsory and automatically included when students register for MC5M2B.

3 **Qualitative Analysis:** Students take (or audit) an additional course taught by the Department of Methodology focussed on qualitative methods. Students must enrol for this course separately and review the course guide.

Teaching: This course is delivered through a combination of lectures, seminars and workshops totalling a minimum of 35 hours across the AT and the WT. This course includes a reading week in Week 6 of term.

1 **Advanced Principles of Social Research:** Delivered through Harvard Style seminars totalling 20 hours across the WT.

2 **Quantitative Data Literacy:** Delivered through a combination of classes and lectures (MY464) totalling 30 hours in the AT.

3 **Qualitative Analysis:** Students take (or audit) an additional course taught by the Department of Methodology focussed on qualitative methods. Students must enrol for this course separately and review the course guide.

Formative coursework: 1 Advanced Principles of Social

Research: All students are expected to complete advance readings and weekly assignments, and help prepare one seminar. Students submit their formative assignment consisting of a methods chapter in the first week of ST.

2 **Quantitative Data Literacy:** Self-guided computer exercises implementing principles covered in the lectures with weekly online homework on the material covered in the lectures and exercises during the AT.

3 **Qualitative Analysis:** Students take (or audit) an additional course taught by the Department of Methodology focussed on qualitative methods. Students must enrol for this course separately and review the course guide.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

One assessment relating to Quantitative Data Literacy: One exam in the January exam period for MY464.

The Principles of Social Research element of the course will be assessed as part of each student's upgrade process at the end of the first year of doctoral study.

Students will also be expected to complete the necessary assessment for any Qualitative Analysis course they take. If a student audits, they will not be required to submit a summative assessment.

MG500

Information Systems PhD Seminar Series and Workshops

This information is for the 2024/25 session.

Teacher responsible: Dr Edgar Whitley MAR 4.32

Availability: This course is compulsory on the MPhil/PhD in Management - Information Systems and Innovation. This course is not available as an outside option.

Course content: This seminar series provides a forum for research students in management to present work in progress. Outside speakers may be invited from time to time.

Teaching: This course is delivered through seminars totalling a minimum of 40 hours across the Autumn Term and Winter Term. This course includes a reading week in Week 6 of each term. In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Assessment: There is no formal assessment, but all students are expected to attend the workshops and must email the course teacher to explain any absences and PhD students should normally present their work at one session per year.

MG505 Half Unit

Research in Organisational Behaviour Seminar I

This information is for the 2024/25 session.

Teacher responsible: Dr Lourdes Sosa MAR 5.40 and Dr Niranjana Janardhanan MAR 5.33

Availability: This course is compulsory on the MRes/PhD in Management (Organisational Behaviour). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources). This course is not available as an outside option.

This course is available with permission as an outside option to students on other programmes.

Course content: This course seeks to provide PhD students with a foundational understanding of established research in Organisational Behaviour with the objective of encouraging them

to design novel research that advances the field. Specifically, this course will introduce students to the evaluation of established research in micro- and macro-level Organisational Behaviour, progressing through units of analysis from psychology research to organisational theory.

Teaching: 30 hours of seminars in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Formative feedback on the individual presentation and essay will be provided throughout the course. Students will be expected to review their plan for presentation in office hours beforehand, and to informally present work in progress throughout the course for continuous feedback.

Indicative reading: Indicative readings include:

Barsade, S. G., & Gibson, D. E. (2007). Why does affect matter in organizations? *Academy of Management Perspectives*, 21(1), 36-59.

Hewlin, P. F. (2009). Wearing the cloak: Antecedents and consequences of creating facades of conformity. *Journal of Applied Psychology*, 94, 727-741.

Judge, T., Bono, J., Ilies, R., & Gerhardt, M. (2002). Personality and leadership: A qualitative and quantitative review. *Journal of Applied Psychology*, 87, 765-780.

Mathieu, J., Maynard, M. T., Rapp, T., & Gilson, L. (2008). Team effectiveness 1997-2007: A review of recent advancements and a glimpse into the future. *Journal of Management*, 34, 410-476.

Kellogg, K.C. (2014). Brokerage Professions and Implementing Reform in an Age of Experts. *American Sociological Review*, 79(5): 912-941.

Borgatti, S.P., & Lopez-Kidwell V. (2016). Chapter 4: Network Theory. In J. Scott, P.J. Carrington, eds. *The SAGE Handbook of Social Network Analysis* (SAGE Publications Ltd. London).

Assessment: Essay (100%, 4000 words) in the ST.

MG509 Half Unit

Contemporary Digital Innovation Research

This information is for the 2024/25 session.

Teacher responsible: Dr. Will Venters, MAR.4.13

Availability: This course is compulsory on the MPhil/PhD in Management - Information Systems and Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The course introduces students to a range of contemporary digital innovation research themes. Different themes will be introduced by members of the ISI faculty group, drawing on their research interests and expertise. The aim is to ground students in the traditional conceptualisations of IS and use this as the base for exploring the theoretical challenges brought about by a variety of digital innovations and to understand how these theoretical challenges are grounded in the relevant academic literature.

Teaching: This course is delivered through two hour seminars across Autumn Term.

This course includes a reading week in Week 6.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce a formative 1000 word preparatory essay in the AT by the start of week 7.

Indicative reading:

- Berente, N., Gu, B., Recker, J., and Santhanam, R. (2021). Managing artificial intelligence, *MIS Quarterly* 45(3), 1433–1450.

Assessment: Essay (100%, 4000 words) in the WT.

MG512 Half Unit

Marketing I: Consumer Behaviour and Quantitative Modelling

This information is for the 2024/25 session.

Teacher responsible: Prof Om Narasimhan MAR 6.32

Availability: This course is compulsory on the MRes/PhD in Management (Marketing). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course covers both consumer behaviour and quantitative modelling.

In the area of Consumer Behaviour the course objective is to familiarise students with research in cognitive psychology, social psychology, and marketing on information processing and judgment and decision making related topics to better understand and develop marketing strategies that affect consumer behavior. There are two main aims of this course: (1) to give students a strong foundation for critical thinking in the area of consumer behavior, and (2) to enable students to conceptualize, develop and operationalize research ideas. Therefore, the focus is on understanding current theoretical and methodological approaches to various aspects of consumer behavior, as well as advancing this knowledge by developing testable hypotheses and theoretical perspectives that build on the current knowledge base. This means that students have to actively read prior research in different areas – try to understand the authors' ideas and develop the habit of constructive criticism of the research. To encourage this habit, the role of author of certain papers may be assigned to some students in the class and the role of reviewer assigned to others.

In the area of quantitative modelling the course is designed to develop the quantitative foundations for marketing decisions. Both theoretical models which help analyse marketing issues, and decision-support models will be covered. There is a requirement for students to already have some understanding of calculus, probability, statistics and matrix algebra. Features of the course include a focus on all marketing decisions: product, pricing, advertising, salesforce and distribution. All necessary analysis tools from resource allocation models to NEIO (New Empirical Industrial Organization) models will be discussed. A comprehensive set of exercises will enable students to test their knowledge of models and their understanding of the material discussed in class. The course will also incorporate recent research findings in all aspects of marketing including online marketing and social media marketing.

Teaching: 30 hours of seminars in the AT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Indicative reading: - Higgins, E. T., & Kruglanski, A. W. (Eds.). (2007). *Social psychology: Handbook of basic principles* (2nd ed.). New York: Guilford Press.

Assessment: Essay (100%, 4000 words) in the ST.

MG518 Half Unit

Employment Relations and Human Resource Management Seminar I

This information is for the 2024/25 session.

Teacher responsible: Dr Jonathan Booth MAR 5.16

Availability: This course is compulsory on the MRes/PhD in Management (Employment Relations and Human Resources). This course is available on the MRes/PhD in Management (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The Employment Relations and Human Resource Management PhD seminars cover micro- and macro-HRM course content.

Specifically, the MG518 Seminar familiarizes students with foundational micro-HRM topics (e.g., job search, recruitment, and selection; organisational socialization and newcomer adjustment; compensation; work arrangements; retention and turnover; training, learning, and development; performance management; careers and career management; diversity and inclusion).

This course also provides students the opportunity to get to know faculty members and their research. Further, the course incorporates comprehensive discussion of each week's academic materials between students and faculty lead for the respective week. Seminar discussions allow students to develop their critical evaluation skills, to generate research ideas and make connections with previous studied literatures, and to learn best practice in reading and interpreting scholarly research to understand the theoretical, empirical, and other contributions. In addition to reading the required readings for each week and being prepared to engage in discussion, each student is generally asked to present and lead group discussion for at least one article. To aid students in generating research ideas, students typically are asked to identify a research gap in the respective week's literature and to bring to seminar a research proposal and/or model related to the identified gap for discussion with the larger seminar group.

Teaching: 30 hours of seminars in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Indicative reading: The seminars will follow a variety of formats, including discussing recent work of academic colleagues, and so include the following indicative reading.

- Bauer, T. N., Bodner, T., Erdogan, B., Truxillo, D. M., & Tucker, J. S. (2007). Newcomer adjustment during organizational socialization: A meta-analytic review of antecedents, outcomes, and methods. *Journal of Applied Psychology*, 92, 707-721. doi: 10.1037/0021-9010.92.3.707
- Bell, B. S., Tannenbaum, S. I., Ford, J. K., Noe, R. A., & Kraiger, K. (2017). 100 years of training and development research: What we know and where we should go. *Journal of Applied Psychology*, 102(3), 305-323.

quantitative review and future research agenda. *Journal of Applied Psychology*.

Assessment: Essay (100%, 4000 words) in the ST.

MG519 Half Unit Not available in 2024/25 Employment Relations and Human Resource Management Seminar II

This information is for the 2024/25 session.

Teacher responsible: Dr Jonathan Booth MAR 5.18

Availability: This course is compulsory on the MRes/PhD in Management (Employment Relations and Human Resources). This course is available on the MRes/PhD in Management (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: The Employment Relations and Human Resource Management PhD seminars cover micro- and macro-HRM course content. The MG518 Seminar I familiarizes students with foundational micro-HRM topics (e.g., job search, recruitment, and selection; organisational socialization and newcomer adjustment; compensation; work arrangements; retention and turnover; training, learning, and development; performance management; careers and career management; diversity and inclusion). MG519 Seminar II takes more of a macro-HRM approach, as well as discusses a future-oriented HRM perspective. Topics typically covered in MG519 Seminar II are as follows: strategic HRM; multilevel voice mechanisms; grass-root and social movements; unions, union alternatives, and other institutions; comparative employment relations; types of employment, precarious work, and new and emerging employment relationships (e.g., the gig economy); corporate social responsibility, labour standards, and value chains; work-nonwork interface and wellbeing; digital HRM and emerging technology (e.g., AI, machine learning, algorithms); and the future of work.

This course also provides students the opportunity to get to know faculty members and their research. Further, the course incorporates comprehensive discussion of each week's academic materials between students and faculty lead for the respective week. Seminar discussions allow students to develop their critical evaluation skills, to generate research ideas and make connections with previous studied literatures, and to learn best practice in reading and interpreting scholarly research to understand the theoretical, empirical, and other contributions.

Teaching: 30 hours of seminars in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Indicative reading: The seminars will follow a variety of formats, including discussing scholarly work in the respective literature and of academic colleagues, and so include some of the following indicative reading.

- Ashwin, S., Oka, C., Schuessler, E., Alexander, R., & Lohmeyer, N. (2020). Spillover effects across transnational industrial relations agreements: The potential and limits of collective action in global supply chains. *Industrial and Labor Relations Review*, 73(4), 995-1020.
- Birnbaum, S., & De Wispelaere, J. (2021). Exit strategy or exit trap? Basic income and the 'power to say no' in the age of precarious employment. *Socio-Economic Review*, 19(3), 909-927.

MG520 Half Unit Not available in 2024/25

Marketing II: Consumer Behaviour and Quantitative Modelling

This information is for the 2024/25 session.

Teacher responsible: Prof Amitav Chakravarti MAR 6.13

Availability: This course is compulsory on the MRes/PhD in Management (Marketing). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course covers both consumer behaviour and quantitative modelling.

In the area of Consumer Behaviour the course objective is to

familiarize students with research in cognitive psychology, social psychology, and marketing on information processing and judgment and decision making related topics to better understand and develop marketing strategies that affect consumer behavior. There are two main aims of this course: (1) to give students a strong foundation for critical thinking in the area of consumer behavior, and (2) to enable students to conceptualize, develop and operationalize research ideas. Therefore, the focus is on understanding current theoretical and methodological approaches to various aspects of consumer behavior, as well as advancing this knowledge by developing testable hypotheses and theoretical perspectives that build on the current knowledge base. This means that students have to actively read prior research in different areas – try to understand the authors' ideas and develop the habit of constructive criticism of the research. To encourage this habit, the role of author of certain papers may be assigned to some students in the class and the role of reviewer assigned to others.

In the area of quantitative modelling the course is designed to develop the quantitative foundations for marketing decisions. Both theoretical models which help analyse marketing issues, and decision-support models will be covered. There is a requirement for students to already have some understanding of calculus, probability, statistics and matrix algebra. Features of the course include a focus on all marketing decisions: product, pricing, advertising, salesforce and distribution. All necessary analysis tools from resource allocation models to NEIO (New Empirical Industrial Organization) models will be discussed. A comprehensive set of exercises will enable students to test their knowledge of models and their understanding of the material discussed in class. The course will also incorporate recent research findings in all aspects of marketing including online marketing and social media marketing.

Teaching: 30 hours of seminars in the AT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Assessment: Essay (100%, 4000 words) in the ST.

MG522

Research Design and Theoretical Foundations for Information Systems and Digital Innovation

This information is for the 2024/25 session.

Teacher responsible: Prof Chrisanthi Avgerou MAR.4.29

Availability: This course is compulsory on the MPhil/PhD in Management - Information Systems and Innovation. This course is available with permission as an outside option to students on other programmes where regulations permit.

Students from related PhD programmes who are interested in learning about research design may be able to join the course with the teacher's permission.

Course content: The course introduces students on the MPhil/PhD in Management – Information Systems and Innovation programme to research designs practiced in Information Systems and Digital Innovation and the theoretical foundations of this research field. There are three parts to the course:

Part one (lectures 1-4) discusses the main traditions within the philosophy of science (positivism, realism, constructivism) and relates these traditions to different stances adopted by major contributions in the information systems research field.

Part two (lectures 5-12) explores principles of research design for different types of research questions. It is intended to enable students to navigate important design considerations involved in adopting specific approaches using different forms of data in their research. Research design is taught in the spirit of methodological pluralism with the assumption that how we do research ultimately depends on the nature of the particular research question and the type of data that are available. We treat research design as following through on a commitment to a carefully articulated methodological approach in the acknowledgement that the choices made in crafting this design bring strengths, weaknesses, and trade-offs.

Part three (lectures 13-20) addresses the importance of theory in socio-technical research. We examine theories that provide conceptual foundations for most research in Information Systems and Digital Innovation, including theories about the digital object and theories about the way information technology in interaction to the individual and society enables social change. We discuss middle-range theories developed by research in Information Systems and Digital Innovation as examples of theoretical contribution in articles of the field's journals. With reference to ongoing theoretical debates, students are encouraged to engage with emerging theories in the field.

Teaching: This course is delivered through seminars across Autumn Term and Winter Term. Teaching hours will be commensurate with a usual full unit taught masters course. This course includes a reading week in Week 6 of each Term.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Work in Progress Seminar in Organisational and Institutional Economics

This information is for the 2024/25 session.

Teacher responsible: Dr Jordi Blanes I Vidal MAR 6.08

Availability: This course is compulsory on the MRes/PhD in Economics and Management. This course is not available as an outside option.

It is also open to MRes PhD in Economics students with the approval of the Department. PhD students in other fields (e.g., Finance or Political Science) may be invited to join for specific seminars.

Course content: Research students present their work to faculty and peers in the field. Outside speakers are also invited from time to time.

This provides a forum for LSE PhD students in Economics and Management and in Economics in which each student can present their ongoing research and receive feedback from peers, supervisors, Doctoral Programme Director and faculty. This seminar is central to our Department of Management environment. As well as sharing ideas and gaining insights from those other than their direct supervisors, students also benefit from guest speakers from academia, industry and alumni. These seminars are also an opportunity for students to receive transferable skills training including communication and networking skills, leadership, research management, and personal and career development.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Indicative reading: N/A

MG524

The Economics of Organisations and Institutions

This information is for the 2024/25 session.

Teacher responsible: Dr Jordi Blanes I Vidal

Availability: This course is compulsory on the MRes/PhD in Economics and Management. This course is not available as an outside option.

It is intended that MRes PhD in Economics students can enrol as an option. Other research students may be allowed to enroll upon permission of the course leader.

Pre-requisites: First year courses in the MRes PhD in Economics and Management and MRes PhD in Economics or close substitutes upon permission of the course leader.

Course content: The course studies from an economics perspective the major organisations and institutions in modern and historical economies. The course is divided into two sections: a core section which covers the main topics in organisations and institutions, and a set of lectures focusing on specific topics at the frontier of organisational economics research.

The core section focuses on the following areas: monetary and social incentives, decision-making in organisations, communication, organisational structures, careers, managers, leading explanations for productivity differences, boundaries of the firm, multinationals and FDI, managerial practices, and relational contracts.

Teaching: 30 hours of seminars in the AT. 30 hours of seminars in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will read and discuss academic articles throughout the course. The appropriate formative assessment will be the weekly discussion and presentation of research articles and academic manuscripts, and feedback during the seminar. Students will be asked to read research articles or manuscripts in advance of each course meeting, to present to their classmates the analysis in those readings, and (along with the faculty) to guide a discussion of the readings and their place in the literature. The analysis and synthesis of academic articles as ongoing formative assessment will prepare students for the questions in the take-home exam.

Indicative reading: Gibbons, Robert, "Foundations of Organizational Economics," Princeton University Press, forthcoming 2023.

Gibbons, R. (2010). Inside organizations: Pricing, politics, and path dependence. *Annual Review of Economics*, 2(1), 337-365.

Ashraf, N., & Bandiera, O. (2018). Social incentives in organizations. *Annual Review of Economics*, 10, 439-463.

Garicano, L., & Rayo, L. (2016). Why organizations fail: Models and cases. *Journal of Economic Literature*, 54(1), 137-192.

Macchiavello, R. (2022). Relational contracts and development. *Annual Review of Economics*, 14, 337-362.

Assessment: Take-home assessment (100%) in the ST. The summative assessments will be take-home exam in which students will need to exhibit a command of the literature studied in the course. This exam will ask students about the range of papers studied in the courses, mixing qualitative questions requiring summaries and syntheses of literatures studied, as well as some more technical questions on the details of the papers' methods (both theoretical and empirical).

MG525 Half Unit Not available in 2024/25 Research in Organisational Behaviour Seminar II

This information is for the 2024/25 session.

Teacher responsible: Dr Lourdes Sosa and Dr Niranjana Janardhanan

Availability: This course is compulsory on the MRes/PhD in Management (Organisational Behaviour). This course is available on the MRes/PhD in Management (Employment Relations and Human Resources). This course is available with permission as an outside option to students on other programmes where regulations permit.

Course content: This course seeks to provide PhD students with a foundational understanding of established research in Organisational Behaviour with the objective of encouraging them to design novel research that advances the field. Specifically, this course will introduce students to the evaluation of established

research in micro- and macro-level Organisational Behaviour, progressing through units of analysis from psychology research to organisational theory.

Teaching: 30 hours of seminars in the WT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Formative feedback on the essay will be provided throughout the course.

Indicative reading:

Assessment: Essay (100%, 4000 words) in the ST.

MG527

Advanced Quantitative Analysis for Research in Management

This information is for the 2024/25 session.

Teacher responsible: Dr Elizabeth Stillwell MAR.5.23

Availability: This course is available on the MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Management (Organisational Behaviour). This course is available with permission as an outside option to students on other programmes where regulations permit.

Students on other MRes programmes in the Department of Management may also attend specific seminars depending on their area of research.

Research students on other MRes/PhD programmes from other departments that would benefit from this training may be allowed to attend at the discretion of the course leader.

Pre-requisites: Students must have completed Introduction to Quantitative Analysis (MY551A) or Introduction to Quantitative Analysis (MY551W).

Students must have completed the first year of the MRes/PhD in Management (ERHR/OB) to take this course.

Course content: This course is designed to complement the required quantitative methodology coursework, including MY551 (Introduction to Quantitative Analysis) and MY555 (Multivariate Analysis and Measurement), with a focus on conceptualising, evaluating, and applying multivariate methods used in management and organisational sciences. It is also designed to enable students to develop skills in using software for data analysis, likely R or Mplus.

The course is intended for students with introductory experience with univariate and bivariate data analysis and an appreciation of multiple linear regression. Course content will focus on examples of research using: (1) scale construction, reliability and validity, (2) exploratory and confirmatory factor analysis, (3) causal inference

and experimental design, (4) multivariate regression, (5) meta-analysis, (6) latent variable models (including factor analysis, structural equation models, latent growth models), (7) moderation, mediation, and moderated mediation, (8) multilevel modelling, and (9) longitudinal data analysis. Students will also discuss the best practices in reviewing and providing feedback on quantitative methods for academic publications.

The primary goal of the course will be to enable students to translate and apply their understanding of general principles of data analysis and research methods to common management problems and research questions, and organisational contexts. Students will develop understanding and build skills throughout the course. It will focus on the contemporary debates and challenges of quantitative methodology in organisational research. Students will read, discuss, and evaluate current management journal articles from a range of specialisms using different methodologies, practice reviewing others' work and delivering thoughtful feedback, and identify areas where their own work may be improved throughout the course.

It is anticipated that students within the seminar will be at different stages in their research and data gathering. It is envisaged that the early seminars students will work on a common dataset, and as the teaching progresses students would be given the option to use their own data set or remain practicing on the common dataset. Each seminar will also offer an advanced element/option for students with more experience or further along in their research.

Teaching: 30 hours of seminars in the AT.

Each seminar will be a 2+1 hour seminar format with input from a variety of Department of Management Faculty. The first two hours will focus on theory, current research examples and discussion and the final hour will be focused on practical work and experimentation with data set using the R/ software.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 piece of coursework in the AT.

Students will be expected to write a 2000 word report on the Application of Quantitative Methods to Real-world Problems.

Assessment:

There is no summative assessment for this course.

MG598

Research Paper in Management (MRes PhD Programmes)

This information is for the 2024/25 session.

Teacher responsible: The Programme Director of each MRes/ PhD programme is responsible for the allocation of a supervisor depending on the interests/topic proposed by the student for their research paper.

Availability: This course is compulsory on the MRes/PhD in Economics and Management, MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Marketing) and MRes/PhD in Management (Organisational Behaviour). This course is not available as an outside option.

Course content: The Research Paper builds on the research training provided through the core courses, optional courses and research practicums undertaken taken by students during the MRes. At the start of the AT of Year 2 of their MRes programme students will be assigned to a faculty member as their Research Proposal supervisor. The topic area of the Research Paper is chosen by the students in consultation with their Research paper supervisor and the Programme Director.

The Research Paper must be independent work, demonstrate the ability to employ relevant concepts from their field of study and the wider social sciences effectively, show an understanding of and critical engagement with the relevant literature and an

appreciation of the nature of explanation and analysis in their field. The Research Paper must demonstrate the capacity to produce original research. Apart from it being an integral core component of the MRes programme, the Research Paper may also serve as a first step towards (a) the production of a publishable journal paper, (b) one of the papers in the students' prospective paper-based PhD dissertation or (c) the basis for the development of their PhD dissertation Research Proposal, or a combination of the above. Students will be given the opportunity to present and discuss their paper within the Department.

Students work continuously on the research papers with their supervisor throughout the year and submit their paper in the Spring Term.

Teaching: A short Research Paper proposal should be submitted by students outlining the topic to the Programme Director by the last day of the ST in Year 1.

Students are welcome to seek advice on their Research Paper initial ideas from their Programme Director, Faculty they have worked with in their Research Practicums and their wider Faculty Research Group. The supervisor for the MG598 research paper is assigned by the Programme Director in discussion with their Faculty group.

From the start of Year 2, the supervisor will provide academic support and feedback. It the responsibility of the supervisor and student to arrange regular meetings to discuss and receive feedback on the Research Paper. There will also be regular check-ins (at least 1 per term) between the student and the Programme Director or with a designated faculty member in cases where the Programme Director is also their supervisor.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Assessment: Dissertation (100%, 10000 words) in the ST.

The Research Paper should be between 7,000 - 10,000 words.

MG599

Research Proposal Paper in Management

This information is for the 2024/25 session.

Teacher responsible: Dr Edgar Whitley MAR 4.32
MPhil/PhD in Management ISI Programme Director

Availability: This course is compulsory on the MPhil/PhD in Management - Information Systems and Innovation. This course is not available as an outside option.

Course content: Students produce a research proposal between 7,000 and 15,000 words, related to the student's designated major field.

Students submit the research proposal by Week 6 in the AT of Year 2. The Research Proposal is for upgrade to PhD and must include:

- 1 the research question(s);
- 2 a concise literature review through which the significance of the proposed research is articulated;
- 3 a discussion of research methodology;
- 4 any preliminary data collection and analysis or a 'pilot' study;
- 5 any indication of the expected contribution to existing research and
- 6 discussion of research ethics and risks.

Students will be asked to defend their proposal in a review by the Upgrade Panel.

Teaching: In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Feedback on progress will be provided by the student's supervisors and the PhD Programme director and students will have an opportunity to present their draft proposal in a MG500 session before submission.

Assessment: Coursework (100%, 15000 words) in the AT.

The paper will be assessed by the Upgrade Panel by the end of

the Autumn Term. Should the submitted work fall short of an acceptable standard, then the Upgrade Panel can decide either to ask for further work to be submitted by the end of the Winter Term of the same year

MG5A1

A Social Sciences Perspective of Academic Research in Management

This information is for the 2024/25 session.

Teacher responsible: Head of the Doctoral Programme

Availability: This course is compulsory on the MPhil/PhD in Management - Information Systems and Innovation, MRes/PhD in Economics and Management, MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Marketing) and MRes/PhD in Management (Organisational Behaviour). This course is not available as an outside option.

Course content: The Seminar runs across all Management PhD Programmes and is a compulsory course for all students in the first year of their MRes/PhD or MPhil/PhD programme. The seminar provides the opportunity to engage with and appreciate research in other Management subject areas in order to understand some of the major streams of research (i.e. what is Micro OB vs. Macro OB, or Consumer Behaviour vs Modelling research in Marketing, researching formal and informal rules and their effects, etc). It also provides an opportunity for the full cohort of research students across the Department of Management programmes to meet regularly to discuss and share their different perspectives on academic research in Management.

The Seminar series will develop skills to evaluate underlying the research philosophy and research design in academic research. You will be required to submit a paper from outside your direct area of expertise and apply the insights gained from course to discuss and evaluate the research paper.

Alongside an overview of the different Management specialisms within the Department of Management Faculty groups the seminars will cover topics on undertaking Management research such as quantitative and qualitative methods, experimental data, measurement and survey design and theory development.

Teaching: 20 hours of seminars in the AT.

In its Ethics Code, LSE upholds a commitment to intellectual freedom. This means we will protect the freedom of expression of our students and staff and the right to engage in healthy debate in the classroom.

Formative coursework: Students will be expected to produce 1 essay in the AT.

Submit a paper of between 1000-1500 words responding to a research paper outside your subject specialism.

MY500 Half Unit

Fundamentals of Social Science Research Design

This information is for the 2024/25 session.

Teacher responsible: Prof Jonathan Jackson

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track), MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Management (Organisational Behaviour). This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in Human Geography and Urban Studies, MPhil/PhD in Regional and Urban Planning Studies and MPhil/PhD in Social Research Methods. This course is available as an outside option to students on other

programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

The course is available to all research students.

Course content: Research design necessitates trade-offs between the strengths and weaknesses of different feasible options. This course aims to introduce the broad range of design options and to foster an appreciation of these alternatives for particular research objectives. Drawing on a variety of examples from the social scientific literature, this course will explore design considerations and options across quantitative, qualitative and mixed-methods research. At the end of the course, students will be able to read a wide variety of empirical social science with a critical and balanced perspective and will be better equipped to implement and make arguments defending the methods they use in their PhD theses.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Autumn Term.

This course has a reading week in Week 6 of AT.

Formative coursework: A project outline (1-2 pages long) that sets up a research question that the student will develop in their summative assignment.

Indicative reading: Robson, Colin and McCartan, Kieran (2015, 4th edition). Real World Research. London: John Wiley.

Assessment: Research proposal (100%) in the WT.

Students can base their research proposal (3000 words) on a dimension of their dissertation topic subject to the approval of their home department.

MY505 Half Unit

Research Design for Policy and Programme Evaluation

This information is for the 2024/25 session.

Teacher responsible: Professor Flora Cornish

Availability: This course is open to any Research level student.

This course is not controlled access. If you register for a place you are likely to be given a place.

Course content: This course teaches the fundamentals of contemporary evaluation research design, for students interested in pragmatic applications of evaluation methods in real-world settings. Students will be equipped with research design skills to be able to design and critically appraise evaluation research in applied fields such as international development, health, and public policy. Students are taught to develop a clear and coherent Theory of Change as a foundation for an evaluation. Taking a mixed methods approach, the course covers the major quantitative designs, including randomized experiments and observational (i.e. non-randomized) research designs such as instrumentality variables, difference-in-differences, regression discontinuity design, matching, and synthetic control. It covers qualitative and participatory research designs and their contribution to formative research, process evaluation, realist evaluation, and theory-based evaluations. Examples from the fields of health, international development and public policy will be used throughout the lectures and seminars. Students learn to apply what they have learned, by working in groups on real research design tasks in seminars. The realities of designing evaluations for government and non-government organisations mean that resources are limited and ideal conditions are rarely met. The course therefore focuses on how to make pragmatic choices and deal with often sub-optimal tradeoffs in real-world contexts.

This course focuses primarily on the fundamental principles of evaluation design rather than the implementation of particular quantitative or qualitative methodologies, there are therefore no prerequisites required to register. It is complementary with most other quantitative and qualitative courses offered by the Department of Methodology. Given some overlaps in content on the quantitative side, it is usually advised not to take this course together with MY557 Causal Inference for Observational and

Experimental Studies. Research degree students may work on their individual PhD topics for their formative and summative assignments.

Teaching: This course is delivered through a combination of seminars and lectures totalling a minimum of 25 hours across Winter Term. This course has a Reading Week in Week 6 of Winter Term.

Formative coursework: A Theory of Change in the Winter Term.

Indicative reading: Angrist, J. D. and Pischke, J-S. (2014) *Mastering Metrics: The Path from Cause to Effect*. Princeton University Press

Bell, S. & Aggleton, P. (2016). *Monitoring and Evaluation in Health and Social Development: Interpretive and Ethnographic perspectives*. London: Routledge.

Cartwright, N. & Hardie, J. (2012). *Evidence-Based Policy: A practical guide to doing it better*. Oxford, UK: Oxford University Press.

Glennster, R. and Takaarasha, K. (2013) *Running Randomized Evaluations: A Practical Guide*, Princeton University Press.

Patton, M. Q. (2015). *Qualitative Research and Evaluation Methods*. (4th Edition). London: Sage.

Assessment: Research design (100%) in the ST.

MY521A Half Unit Qualitative Research Methods

This information is for the 2024/25 session.

Teacher responsible: Dr Raphael Susewind

Availability: This course is compulsory on the MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Management (Organisational Behaviour). This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in Human Geography and Urban Studies, MPhil/PhD in International Relations, MPhil/PhD in Regional and Urban Planning Studies, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology and MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track). This course is available as an outside option to students on other programmes where regulations permit. The course is available to all research students.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Course content: This course presents the fundamentals of qualitative research methods. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding qualitative methods, and with practical skills to put those methods into practice. It prepares students to design, carry out, report, read and evaluate qualitative research projects. First, students learn how to collect data using methods including interviews, focus groups, participant observation, and selecting documents and new media data. Second, we cover analysis, using thematic and discourse analysis. Issues of research design, quality indicators and ethics are addressed.

This is a generalist, introductory course and we invite students who have little previous experience of qualitative methods. Students with prior training in qualitative methods might be interested in more specialist alternatives offered by the Department of Methodology, such as MY523 Interview Methods for Social Science Research, MY525 Case Studies and Comparative Methods for Qualitative Research, MY526 Doing Ethnography, or MY528 Qualitative Text Analysis. Lectures introduce the main conceptual and practical issues. Seminars provide practical experience with the methods.

Teaching: The course runs twice per year: in AT (MY521A) and again in WT (MY521W). The content of the course, and the method of assessment, is exactly the same in each term.

This course is delivered through a combination of classes and

lectures totalling a minimum of 20 hours in Autumn Term.

This course has a reading week in Week 6 of AT.

Formative coursework: Students submit a portion of their practical work, with some written commentary, for formative assessment in Week 7.

Indicative reading: Textbooks: There is no set text for this course. The following are useful **general textbooks** for the pragmatic approach taken in MY521:

- Becker, H. S. (199). *Tricks of the trade: How to think about your research while you're doing it*. University of Chicago Press.
- Braun, V. & Clarke, V. (2018). *Successful qualitative research: a practical guide for beginners*, London: SAGE.
- Lareau, A. (2021). *Listening to People: A Practical Guide to Interviewing, Participant Observation, Data Analysis, and Writing it All Up*. University of Chicago Press.
- Mayan, M. J. (2016). *Essentials of qualitative inquiry*. Routledge.

Assessment: Project (100%, 5000 words) in the WT.

One final written project of 4000-5000 words, based on seminar exercises (100%). It takes the form of a research project report, with detailed appendices documenting the methods of data collection and analysis used.

MY521W Half Unit Qualitative Research Methods

This information is for the 2024/25 session.

Teacher responsible: Dr Raphael Susewind

Availability: This course is compulsory on the MRes/PhD in Management (Employment Relations and Human Resources) and MRes/PhD in Management (Organisational Behaviour). This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in Human Geography and Urban Studies, MPhil/PhD in International Relations, MPhil/PhD in Regional and Urban Planning Studies, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology and MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track). This course is available as an outside option to students on other programmes where regulations permit. The course is available to all research students.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Course content: This course presents the fundamentals of qualitative research methods. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding qualitative methods, and with practical skills to put those methods into practice. Assessment: Project (100%, 5000 words) in the ST.

One final written project of 4000-5000 words, based on seminar exercises (100%). It takes the form of a research project report, with detailed appendices documenting the methods of data collection and analysis used.

MY523 Half Unit Interview Methods for Social Science Research

This information is for the 2024/25 session.

Teacher responsible: Dr. Aliya Hamid Rao, Assistant Professor, Department of Methodology.

Availability: This course is available on the MRes/PhD in Management (Employment Relations and Human Resources). This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: This course focuses on the practical dimensions of interviews as a data collection method for social science research. In so doing, the course also engages with epistemological concerns, such as what kinds of claims interview data can be used to make. While this course does not require any pre-requisites, it takes a deep and narrow approach in its focus on semi-structured interviews. This course will consider sampling, recruitment, and ethical concerns that arise particular to interviews. Such considerations will be discussed throughout the course through readings, lectures, and seminars. Students seeking an introductory overview of qualitative methods are advised to see MY421/521. This course is designed to be most useful to those with some familiarity with qualitative methods broadly, and for those whose PhD projects will rely on semi-structured one-on-one interviews in some capacity.

Course content: This course will provide students with the skills to:

- Understand and implement the key principles for planning, designing, and executing an interview based study;
- Understand and implement the key principles in how to conduct interviews that yield rich data;
- Understand the key elements in interview data;
- Evaluate published research that draws on interview data.

Students will start off by learning what kinds of research questions can suitably be answered by the data usually collected through interviews. They will learn about the considerations that go into designing a largely interview-based study (including: recruitment, sample parameters, and interview guides). While the focus will generally be on the practical dimensions, students will also learn about some of the epistemological debates pertaining to these considerations.

The type of interviews this course will focus on will be semi-structured one-on-one interviews, which constitute one of the most common data collection methods in qualitative social science research. However, other types of interviews and related methods (such as couple interviews and ethnography will be referenced typically as a way to highlight how the data collected from one-on-one interview methods differs from these other related, but distinct, methods. The focus on one-on-one interviews is because when it comes to interviewing this is a predominant

way of conducting interviews in the social sciences. This course is designed to give students the practical skills and epistemological background to design and complete their own, individual, interview-based studies. This course may be particularly useful for students intending to conduct their own interview-based studies. The course is comprised of 10 lectures (of 90 mins each) which introduce the main conceptual and practical issues. 9 seminars (90 minutes each) provide a space to dive deeper into the debates in each topic as well as gain some practical experience.

The required text for this course is Annette Lareau's book *Listening to People*. Each week will usually have two required readings, typically one "method" and one "example" reading as well as several optional readings. The required readings will be made available through the Reading List in Moodle.

An indicative structure of the course is below. Please note this is subject to being amended.

- 1 Introduction: What can interviews tell us?
- 2 What kind of a sample do you need?
- 3 Ethics and reflexivity
- 4 What, how, and when should you ask?
- 5 Conducting interviews
- 6 Reading week
- 7 Special groups: Interviewing Elites
- 8 Data Analysis
- 9 Writing up an interview-based study to compellingly answer strong research questions
- 10 Evaluating interview research
- 11 Summing up: Course review and outstanding questions

Teaching: 15 hours of lectures and 13 hours and 30 minutes of seminars in the WT.

Formative coursework: The formative assessment consists of the students uploading the following in a single word document to Moodle, in this order:

- 2 Interview memos (each 1.5 pages, single-spaced, max, with a methodological and analytical component. Detailed instructions will be provided to students);
- 2 single-spaced pages of one interview transcript (consecutive pages, and ideally ones on which students want some feedback, single spaced).

Indicative reading: There is required book for the course: *Listening to People*, by Annette Lareau. The remainder of the required readings will be made available to students through Reading List in Moodle.

Assessment: Essay (100%, 4000 words) in the ST.

MY525 Half Unit Case Studies and Comparative Methods for Qualitative Research

This information is for the 2024/25 session.

Teacher responsible: Dr Eleanor Knott

Availability: This course is available on the MPhil/PhD in International Relations, MPhil/PhD in Social Policy and MPhil/PhD in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. This course is freely available to any MRes or PhD student interested in case study research designs. The course is most suited to students within macro- or meso-sociological traditions (e.g. political science, IR, sociology, political sociology, policy studies, development studies) than those within a micro-sociological/individualist tradition (e.g. micro-interactionist perspectives, psychology, psychiatry).

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place. There is no need to require authorisation.

Pre-requisites: There are no prerequisites for this course but capacity to work autonomously is expected (including conducting a literature review, finding one's own theoretical literature, creating one's own research question, etc.). Throughout the course, students are expected to make their own decisions and learn

how to become autonomous junior researchers by constructing a research project on their own. Students not confident in their capacity to work autonomously are encouraged to familiarise themselves with these skills before the beginning of the course to make the most out of the teaching (see for example LSE Life services for resources helping you to prepare yourself for autonomous work).

Course content: This course focuses on the approach and practice of designing and conducting case study and comparative research. Thinking outside of the areas of interest and specialisms and topics, students will be encouraged to develop the concepts and comparative frameworks that underpin these phenomena. In other words, students will begin to develop their research topics as cases of something.

The course will cover questions of design and methods of case study research, from single-n to small-n case studies including discussions of process tracing and Mill's methods. The course will address both the theoretical and methodological discussions that underpin research design as well as the practical questions of how to conduct case study research, including gathering, assessing and using evidence. Examples from the fields of comparative politics, IR, development studies, sociology and European studies will be used throughout the lectures and seminars.

More information about MY525 can be found on the Moodle page of the course (e.g., course structure, detailed formative and summative assignment instructions, examples of prior cohorts' summative assignments). Please do not hesitate to self-enrol to the Moodle page of the course to have a better idea of the content of the module and the work required.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 20 hours across Winter Term.

Lectures will provide students with the key concepts, ideas and approaches to case study and comparative research. Seminars will provide students with practical experience of assessing the approaches of case study and comparative research design, as well as opportunities to design and develop their own research projects.

This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 essay and 1 other piece of coursework in the WT.

- 1 formative paper: literature review and project outline (1-2 pages) due in Week 8.160
- 1 peer marking exercise: in-class oral peer feedback session for students to exchange ideas on formative assignment.

Indicative reading: Key texts:

- Beach, D., & Pedersen, R. B. 2019. *Process-tracing methods: Foundations and guidelines*. University of Michigan Press.
- Bennett, A. and Checkel, J.T. eds., 2014. *Process tracing: From metaphor to analytic tool*. Cambridge University Press.
- Della Porta, D. and Keating, M. eds., 2008. *Approaches and methodologies in the social sciences: A pluralist perspective*. Cambridge University Press.
- George, Alexander L. and Andrew Bennett. 2005. *Case Studies and Theory Development in the Social Sciences*.
- Gerring, J. 2017. *Case study research: principles and practices*. Second edition. Cambridge University Press.

Example readings for discussion:

- Briggs, Ryan C. 2017. "Explaining case selection in African politics research", *Journal of Contemporary African Studies*.
- Finkel, E. (2017) *Ordinary Jews: choice and survival during the Holocaust*. Princeton University Press.
- Lund, Christian. 2014. "Of What is This a Case? Analytical Movements in Qualitative Social Science Research." *Human Organization* 73(3): 224–234.
- Simmons, E. (2016) *Meaningful resistance: market reforms and the roots of social protest in Latin America*. Cambridge University Press.
- Simmons, E. S. and Smith, N. R. (2017) 'Comparison with an Ethnographic Sensibility', *PS: Political Science & Politics*, 50(01), pp. 126–130. doi: 10.1017/S1049096516002286.
- Slater, D. and Wong, J. (2013b) 'The Strength to Concede:

Ruling Parties and Democratization in Developmental Asia, *Perspectives on Politics*, 11(03), pp. 717–733. doi: 10.1017/S1537592713002090.

Assessment: Research design (100%) in the ST.

It is recommended that students base the research design proposal (5000 words) on their dissertation topic (e.g. the whole dissertation project, a chapter or paper). Where students also take MY500 (which has a similar summative assessment), students will be guided towards a modified version of the research proposal (e.g. a different research question) to avoid self-plagiarism between assignments.

MY526 Half Unit Doing Ethnography

This information is for the 2024/25 session.

Teacher responsible: Dr Chana Teeger

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Human Geography and Urban Studies, MPhil/PhD in International Relations, MPhil/PhD in Regional and Urban Planning Studies, MPhil/PhD in Social Research Methods and MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track). This course is available as an outside option to students on other programmes where regulations permit.

This course is available to all research students.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place

Pre-requisites: There are no prerequisites but some prior training in qualitative research methods is expected. Please contact the course convenor if unsure.

Course content: Doing ethnography enables us to examine how social order is produced as people go about their everyday interactions. Multiple sources of naturally-occurring data are used to understand how communities, organisations and institutions work, informally as well as formally. This interdisciplinary course equips students with a practical understanding of how to do, and to think about, contemporary ethnography. Core conceptual, ethical and methodological debates are introduced through in-depth engagement with exemplar texts, and through students' experience of fieldwork. Fieldwork is a key component of the course, with students collecting data locally. Methodological concerns regarding case selection, establishing rigour, reflexivity, representing others, and ethical issues are addressed in detail. Practical issues addressed include identifying and accessing study sites, writing field notes, and analysing and writing up ethnographic data. Emphasising that ethnography relies on the researcher-as-research-instrument, the course aims to develop students' sensitivity and rigour as ethnographic researchers.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours in Winter Term. This course has a Reading Week in Week 6 of WT.

Formative coursework: An excerpt of field-notes from the field visit undertaken as part of the course (up to 2,500 words) in WT. Field-notes should record rich details of observations (the data), researcher reflections and brief interpretations of the significance of these observations. Written feedback will be provided.

Indicative reading: De Laine, M. (2000). *Fieldwork, participation and practice: Ethics and dilemmas in qualitative research*. Sage Publications Ltd. DeWalt, K. M., ; DeWalt, B. R. (2002). *Participant observation: A guide for fieldworkers*. AltaMira Press. Emerson, R. M., Fretz, R. I.; Shaw, L. L. (1995). *Writing ethnographic fieldnotes*. University of Chicago Press. Wacquant, L. (2004) *Body and Soul: Ethnographic Notebooks of an Apprentice Boxer*. New York: Oxford University Press. Laureau, Annette. (2011). *Unequal Childhoods: Class, Race and Family Life* (2nd Edition). Berkeley: University Press

Assessment: Essay (100%, 4000 words) in the ST.

MY528 Half Unit

Qualitative Text and Discourse Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Audrey Alejandro

Availability: This course is available on the MPhil/PhD in Environmental Policy and Development, MPhil/PhD in Human Geography and Urban Studies, MPhil/PhD in International Relations, MPhil/PhD in Management - Information Systems and Innovation, MPhil/PhD in Regional and Urban Planning Studies, MPhil/PhD in Social Research Methods, MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track) and MRes/PhD in Management (Organisational Behaviour). This course is available as an outside option to students on other programmes where regulations permit.

This course is available to all research students who are permitted to take an outside option as part of their programme.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place. There is no need to require authorisation.

Pre-requisites: There are no prerequisites for this module but capacity to work autonomously is expected including conducting a literature review, finding one's own bibliographical resources, creating one's own research question, etc. Throughout the module, students are expected to make their own decisions and learn how to become autonomous junior researchers by constructing a research project on their own. Students not confident in their capacity to work autonomously are encouraged to familiarise themselves with these skills prior to the beginning of the module to be able to make the most out of the teaching (see for example LSE Life services for resources helping you to prepare yourself for autonomous work).

Course content: How can we use texts and discourses to create meaning about the social world? The goal of this course is to provide students with the skills to construct and conduct social science research using text and discourse as an entry point. While acquiring these skills, students also learn how to interpret textual data by exploring the concepts and case studies developed across disciplines. The course both establishes a theoretical foundation for text/discourse analysis and takes a practical and applied approach, so that students can acquire greater independence and confidence to conduct their research project autonomously. Discourse Analysis is the overarching method that structures the content of the course. The first part of the course focuses on the application of the most common methods used to analyse texts and discourses. The second part of the course places the in-depth analysis of texts in the broader context of research design and knowledge production, to ensure students know how to critically assess their work and produce research to the highest standards. Beyond learning the skills of qualitative text/discourse analysis, this course is an invitation to produce more structured, analytical and critical research capable of grasping not only the visible but also the invisible and implicit dimensions of politics and society. In that sense, the module also represents a perfect opportunity for students with a quantitative background to harness the strengths of qualitative methods and design strong mixed-methods analysis. Examples from across the social sciences will be used throughout the lectures and seminars. More information about MY528 can be found on the Moodle page of the module (for example course structure, examples of formative and summative assignments from the previous cohorts, and detailed guidelines about the assignments). Please do not hesitate to self-enrol to the Moodle page of the module to have a better idea of the content of the module and the work required.

Teaching: This course is delivered through a combination of lectures and seminars totalling a minimum of 30 hours across Winter Term.

This course has a Reading Week in Week 6 of WT.

Formative coursework: A project proposal (c.1,000 words) focusing on the topic that the student will develop in their summative assignment. The project proposal comprises a blog post and a project outline.

Indicative reading:

- Alejandro, A. (2021). Reflexive discourse analysis: A methodology for the practice of reflexivity, *European Journal of International Relations*, 27, 1, 2021, 150-174.
- Baker, P. and Ellece, S. (2010). *Key Terms in Discourse Analysis*, London: Continuum.
- Gee, JP (2011). *How to do discourse analysis: a toolkit*, New York: Routledge.
- Kuckartz U. (2014). *Qualitative text analysis: a guide to methods, practice & using software*. Los Angeles: Sage.
- Scheier, M. (2012). *Qualitative Content Analysis*. Thousand Oaks: Sage.
- Taylor, S (2013). *What is discourse analysis?* London: Bloomsbury Academic.

Assessment: Research project (100%) in the ST.

The summative assignment is an exploratory project of 4000 words. Students can base their research project on a dimension/sub-question of their dissertation topic (or a related topic, e.g. a PhD proposal) subject to the approval of their home department.

MY551A Half Unit

Introduction to Quantitative Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Sally Stares

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track) and MRes/PhD in Management (Employment Relations and Human Resources). This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in International Relations, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology, MRes/PhD in Management (Organisational Behaviour) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

The course is available to all research students.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place

Course content: An intensive introduction to quantitative data analysis in the social sciences. The course is intended for students with no previous experience of quantitative methods or statistics. It covers the foundations of descriptive statistics and statistical estimation and inference. At the end of the course students should be able to carry out and interpret a range of data analysis techniques, from univariate and bivariate descriptives to multiple linear regression and binary logistic regression at an introductory level. The seminars and computer exercises give 'hands-on' training in the application of statistical techniques to real social science research problems using the R computer package (no prior knowledge of R is necessary).

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 30 hours across Autumn Term.

The course runs twice per year: in AT (MY551A) and again in LT (MY551W). The content of the course, and the method of assessment, is exactly the same in each term.

This course has a Reading Week in Week 6 of AT.

Formative coursework: Self-guided computer exercises to be completed before weekly classes for discussion and a weekly online quiz.

Indicative reading: A course pack will be available for download online. Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*. Pearson Education. Or Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*. Pearson Education (note that the second book is more advanced and is particularly useful if you are planning to take MY551 and MY552).

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MY551W Half Unit

Introduction to Quantitative Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Michael Schultz

Availability: This course is compulsory on the MRes/PhD in Accounting (AOI) (Accounting, Organisations and Institutions Track) and MRes/PhD in Management (Employment Relations and Human Resources). This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in International Relations, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology, MRes/PhD in Management (Organisational Behaviour) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

The course is available to all research students.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

MY552A Half Unit

Applied Regression Analysis

This information is for the 2024/25 session.

Teacher responsible: Professor Jouni Kuha

Availability: This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Data, Networks and Society, MPhil/PhD in European Studies, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in International Relations, MPhil/PhD in Media and Communications, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology,

MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Marketing), MRes/PhD in Management (Organisational Behaviour) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: The course assumes a good working knowledge of basic descriptive statistics and statistical inference, to the level covered on a standard introductory statistics course such as MY451/MY551 (Introduction to Quantitative Analysis). Some prior familiarity with linear regression modelling will also be useful.

Course content: The course provides an introduction to statistical regression modelling and different types of regression models that are commonly used in the social sciences. The main topics covered are linear regression models, binary logistics models for dichotomous outcomes, multinomial and ordinal logistic models for polytomous outcomes, and Poisson and negative binomial regression models for counts. Examples are drawn from different social sciences. The course includes computer classes, where the R software is used for computation. Prior knowledge of R is not required.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Autumn Term.

The course runs twice per year: in AT (MY552A) and again in WT (MY552W). The content of the course, and the method of assessment, is exactly the same in each term.

This course has a Reading Week in Week 6 of AT.

Formative coursework: Weekly multiple-choice quizzes on Moodle, with feedback on the answers.

Indicative reading:

- A course pack will be available for download online.
- Gelman, A., Hill, J. & Vehtari, A. (2022). *Regression and Other Stories*. Cambridge University Press.
- Agresti, A. (2018). *Statistical Methods for the Social Sciences*. Pearson Education Limited.
- James, G., Witten, D., Hastie, T., and Tibshirani, R. (2021). *An Introduction to Statistical Learning with Applications in R*. Springer.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MY552W Half Unit

Applied Regression Analysis

This information is for the 2024/25 session.

Teacher responsible: Professor Jouni Kuha

Availability: This course is available on the MPhil/PhD in Cities Programme, MPhil/PhD in Data, Networks and Society, MPhil/PhD in European Studies, MPhil/PhD in Health Policy and Health Economics, MPhil/PhD in International Relations, MPhil/PhD in Media and Communications, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MPhil/PhD in Sociology, MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Marketing), MRes/PhD in Management (Organisational Behaviour) and MRes/PhD in Political Science. This course is available as an outside option to students on other programmes where regulations permit.

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MY555 Half Unit Multivariate Analysis and Measurement

This information is for the 2024/25 session.

Teacher responsible: Prof Jouni Kuha

Availability: This course is available on the MPhil/PhD in Environmental Economics, MPhil/PhD in International Relations, MPhil/PhD in International Relations, MPhil/PhD in Social Policy, MPhil/PhD in Social Research Methods, MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Marketing) and MRes/PhD in Management (Organisational Behaviour). This course is available as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place

Pre-requisites: The course will assume a knowledge of standard linear regression models, to the level covered in MY452/MY552 (Applied Regression Analysis)

Course content: An introduction to the application of modern multivariate methods used in the social sciences, with particular focus on latent variable models (including factor analysis, structural equation models, latent class models, latent trait models) and methods of data reduction such as principal components analysis and cluster analysis. The R software will be used to apply and illustrate the methods in data analysis exercises.

Teaching: 20 hours of lectures and 8 hours of computer workshops in the WT. 1 hour of lectures in the ST.

This course has a Reading Week in Week 6 of WT.

Formative coursework: Answers to questions based on data analysis exercises can be submitted for formative feedback.

Indicative reading: D J Bartholomew, F Steele, I Moustaki ; J I Galbraith (2008) *Analysis of Multivariate Social Science Data* (Second Edition).

Assessment: Research project (100%).

Research paper of 25-30 pages, including tables and figures, or approximately 3,000-4,000 words, answering a set of questions by applying multivariate analyses to some data (100%).

MY556 Half Unit Survey Methodology

This information is for the 2024/25 session.

Teacher responsible: Dr Sally Stares

Availability: This course is compulsory on the MPhil/PhD in International Relations. This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in Regional and Urban Planning Studies and MPhil/PhD in Social Research Methods. This course is available as an outside option to students on other programmes where regulations permit. This course is available to all Research students. This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: Knowledge of basic descriptive and inferential statistics, to the level of MY451/551 or equivalent.

Course content: This course provides a broad-based introduction to the design, implementation, and analysis of individual and household surveys. It is intended both for students who plan to design and collect their own surveys, and for those who need to understand and use data from existing large-scale surveys. Topics covered include defining target and survey populations, inference from sample to population, sampling error and nonsampling error; sample design and sampling theory; modes of data collection; web surveys; survey interviewing; cognitive processes in answering survey questions; design and evaluation of survey questions; deriving and applying survey weights; analysis of data from complex surveys; paradata and responsive designs; comparative and longitudinal surveys. The over-arching theoretical framework used to link the component parts of the course is the Total Survey Error framework. Theoretical concepts are illustrated with examples of diverse surveys from the UK and internationally. The course includes applied classes designing questionnaires using the software Qualtrics, question evaluation and cognitive interviewing and analysis of complex survey data using the statistical package Stata; no previous knowledge of Stata is required.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours across Winter Term.

This course has a reading week in Week 6 of WT.

Formative coursework: Three formative pieces of coursework: Designing and evaluating a questionnaire, using the Total Survey Error Framework, and secondary analysis of complex survey data.

Indicative reading: Groves, R M, Fowler, F J, Couper, M P, Lepkowski, J M, Singer, E, and Tourangeau, R (2009). *Survey Methodology* (2nd ed.). Wiley. Biemer, P. et al (2017) *Total Survey Error in Practice*. Wiley. Tourangeau, R, Rips, L J, and Rasinski, K (2000). *The Psychology of Survey Response*. Cambridge University Press

Assessment: Research project (100%) in the ST.

Research paper of 3500 words maximum, focusing on concept definition, question design, assessment of the strengths and limitations of an existing survey drawing on the material covered in the course.

MY557 Half Unit Causal Inference for Observational and Experimental Studies

This information is for the 2024/25 session.

Teacher responsible: Dr Daniel De Kadt

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in International Relations, MPhil/PhD in Regional and Urban Planning Studies, MPhil/PhD in Social Research Methods, MRes/PhD in Management (Employment Relations and Human Resources), MRes/PhD in Management (Marketing), MRes/PhD in Management (Organisational Behaviour) and MRes/PhD in Political

Science. This course is available as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: Knowledge of multiple linear regression and some familiarity with generalised linear models, to the level of MY452/MY552 or equivalent. Familiarity with notions of research design in the social sciences, to the level of MY400/MY500 or equivalent. Familiarity with R.

Course content: This course provides an advanced introduction to modern quantitative causal inference in the social sciences. The class covers the canonical approaches to causal inference and includes excursions to the leading edge of the field. We begin with a foundational introduction to both the potential outcomes and graphical frameworks for causality, before considering a range of applied research designs for causal inference. We first discuss identification and estimation for classical randomized experiments, with brief forays into more complex designs. We then turn to a range of observational designs, which will be the primary focus of the class. The first of these is selection on observables (SOO), and we cover regression, matching, and weighting as estimations strategies, before discussing sensitivity analyses and interval estimation (bounds). We then consider instrumental variables (IV) from both the modern potential outcomes perspective and, briefly, the classical structural approach, before delving into new IV settings like examiner designs, shift-share designs, and recentered instruments. From IV we move to regression discontinuity designs (RDD); we approach identification from the continuity perspective and introduce local polynomial approximation for estimation. Finally, we pivot to causal inference with time-varying data, focusing first on the canonical two-period difference-in-differences (DiD) design. We then consider generalised DiD with many time periods, treatment effect heterogeneity, staggered assignment, and non-absorbing treatments. Throughout the class examples are drawn from different social sciences. The course includes seminars for each of the major methods, which combine the close reading and discussion of an applied paper with a brief session on implementation in R.

Teaching: Combined hours across lectures and classes will be equivalent to a minimum of 30 hours of face-to-face teaching across the WT.

This course has a Reading Week in Week 6 of WT.

Formative coursework: Problem sets from the computer classes can be submitted for feedback.

Indicative reading:

- Imbens, G. W. and Rubin, D. B. (2015). *Causal Inference for Statistics, Social, and Biomedical Sciences: An Introduction*. Cambridge University Press.
- Angrist, J. D. and Pischke, J.-S. (2009). *Mostly Harmless Econometrics*. Princeton University Press.
- Rosenbaum, P.R. (2010). *Design of Observational Studies*. Springer.

Assessment: Coursework (100%, 4000 words).

MY559 Half Unit Quantitative Text Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Ryan Hubert

Availability: This course is available on the MPhil/PhD in Economic Geography, MPhil/PhD in Environmental Economics, MPhil/PhD in International Relations, MPhil/PhD in International Relations, MPhil/PhD in Regional and Urban Planning Studies and MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is available as an outside option to students on other programmes where regulations permit. This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: Applied Regression Analysis (MY452) or equivalent is required. Students should understand basic linear algebra and know at least one programming language. If this programming language is not R, students should take the Digital Skills Lab course in R before the start of term.

Course content: The course surveys methods for systematically extracting quantitative information from text for social scientific purposes, starting with classical content analysis and dictionary-based methods, to classification methods, and state-of-the-art scaling methods and topic models for estimating quantities from text using statistical techniques. The course lays a theoretical foundation for text analysis but mainly takes a very practical and applied approach, so that students learn how to apply these methods in actual research. The common focus across all methods is that they can all be reduced to a three-step process: first, identifying texts and units of texts for analysis; second, extracting from the texts quantitatively measured features - such as coded content categories, word counts, word types, dictionary counts, or parts of speech - and converting these into a quantitative matrix; and third, using quantitative or statistical methods to analyse this matrix in order to generate inferences about the texts or their authors. The course systematically surveys these methods in a logical progression, with a practical, hands-on approach where each technique will be applied using appropriate software to real texts.

Lectures, class exercises and homework will be based on the use of the R statistical software package but will assume no background knowledge of that language.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Winter Term.

This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to submit 1 problem set in the WT.

One structured problem set will be provided in the first weeks of the course. Students will start the problem set in the first computer workshop sessions and complete it outside of class.

Indicative reading: • quanteda: An R package for quantitative text analysis. <http://kbenoit.github.io/quanteda/>

Assessment: Exam (100%, duration: 2 hours) in the spring exam period.

MY561 Half Unit Social Network Analysis

This information is for the 2024/25 session.

Teacher responsible: Dr Milena Tsvetkova

Availability: This course is available on the MPhil/PhD in International Relations and MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is available to research students only. This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Course content: This course focuses on data about connections, forming structures known as networks. Networks and network data describe an increasingly vast part of the modern world, through connections on social media, communications, financial transactions, and other ties. This course covers the fundamentals of network structures, network data structures, and the analysis

and presentation of network data. Students will work directly with network data and structure and analyse these data using R. Social networks have always been at the centre of human interaction, but especially with the explosive growth of the internet, network analysis has become increasingly central to all branches of the social sciences. How do people influence each other, bargain with each other, exchange information (or germs), or interact online? A diverse array of deep questions about human behaviour can only be answered by examining the social networks encompassing and shifting around us. Network analysis has emerged as a cross-disciplinary science in its own right, and has in fact proven to be of even greater generality and broader applicability than just the social, extending to ecology, physics, genetics, computer science, and other domains. This course will examine the key papers in the development of social network analysis, and will develop the theory and methodological tools needed to model and predict social networks and use them in social sciences as diverse as sociology, political science, economics, health, psychology, history, or business. The core of the course will comprise the essential tools of network analysis, from centrality, homophily, and community detection, to random graphs, network formation, and information flow. Alongside this we will read a series of substantive and seminal papers, shaped in part by the interests of the students and their various backgrounds, with a particular focus on the difficult task of causal inference in social networks. The course will also provide an introduction to network modelling, analysis, and visualization using R.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours across Winter Term.

This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 1 problem set in the WT.

Type: Structured formative problem set in one of the weeks will build on what was covered in the staff-led lab sessions, to be completed by the student outside of class. Answers should be formatted and submitted for assessment.

Indicative reading: Newman, M.E.J. (2010). *Networks: An introduction*. Oxford, UK: Oxford University Press.
Scott, J. (2017). *Social Network Analysis*. Los Angeles: SAGE. 4th edition.

Easley, D., & Kleinberg, J. (2010). *Networks, Crowds, and Markets: Reasoning About a Highly Connected World*. New York: Cambridge University Press.

Assessment: Take-home assessment (55%) and problem sets (45%) in the WT.

Three summative problem sets will be marked in the WT. These will constitute 45% of the final overall mark.

MY565 Half Unit Intermediate Quantitative Analysis

This information is for the 2024/25 session.

Teacher responsible: Prof Jonathan Jackson

Availability: This course is available on the MPhil/PhD in Health Policy and Health Economics and MPhil/PhD in International Relations. This course is available as an outside option to students on other programmes where regulations permit.

This course is available to all research students where regulations permit. This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place

Pre-requisites: Participants should have studied introductory statistics or quantitative methods before, up to an introduction to descriptive statistics and basic statistical inference. Students with no previous studies in quantitative analysis should take instead Introduction to Quantitative Analysis (MY451).

Because of the overlaps between these courses, it is not possible to take both this course and either of Introduction to Quantitative

Analysis (MY451) or Applied Regression Analysis (MY452) as assessed courses.

Course content: The course is intended for students with some (even if limited) previous experience of quantitative methods or statistics. Using examples from psychological research, it covers first a review of the foundations of descriptive statistics and statistical inference, in the context of the analysis of two-way contingency tables and comparisons of means between two groups. The main topic of the course is linear regression modelling and related methods, including scatterplots, correlation, simple and multiple linear regression, and analysis of variance and covariance. An introduction to binary logistic regression modelling is also included.

Teaching: Combined hours across lectures and classes will be equivalent to a minimum of 30 hours of face-to-face teaching across the AT.

This course has a Reading Week in Week 6 of AT.

Formative coursework: Self-guided computer exercises implementing statistics covered in the lectures with weekly online homework on the material covered in the lectures and exercises.

Indicative reading: A course pack will be available for download online.

Additional reading: many introductory statistics books are available. But we particularly recommend Alan Agresti and Christine Franklin (2009) *Statistics: The Art and Science of Learning from Data*, and Alan Agresti and Barbara Finlay (2009, 4th edition) *Statistical Methods for the Social Sciences*.

Assessment: Exam (100%, duration: 2 hours) in the January exam period.

MY570 Half Unit Computer Programming

This information is for the 2024/25 session.

Teacher responsible: Dr Milena Tsvetkova

Availability: This course is available on the MPhil/PhD in International Relations and MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit. This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Course content: This course introduces students to the fundamentals of computer programming as students design, write, and debug computer programs using the programming language Python. The course will also cover the foundations of computer languages, algorithms, functions, variables, object-orientation, scoping, and assignment. The course will rely on practical examples from computational social science and social data science.

Students will learn how to design algorithms to solve problems and how to translate these algorithms into working computer programs. Students acquire skills and experience as they learn Python, through programming assignments with an approach that integrates project-based learning. This course is an introduction to the fundamental concepts of programming for students who lack a formal background in the field, but will include more advanced problem-solving skills in the later stages of the course. Topics include algorithm design and program development; data types; control structures; functions and parameter passing; recursion; computational complexity; searching and sorting; and an introduction to the principles of object-oriented programming and unit testing. The primary programming languages used in the course will be Python.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 25 hours across Autumn Term.

This course has a reading week in Week 6 of AT.

Formative coursework: Students will be expected to produce 1 problem sets in the AT.

Students will work on weekly, structured problem sets in the staff-

led class sessions. Example solutions will be provided at the end of each week.

Indicative reading:

- Guttag, John V. Introduction to Computation and Programming Using Python: With Application to Understanding Data. MIT Press, 2016.
- Gries, Paul, Jennifer Campbell, and Jason M Montojo. Practical Programming: An Introduction to Computer Science Using Python 3. The Pragmatic Bookshelf, 2013.
- Miller, Bradley N. and David L. Ranum. Problem Solving with Algorithms and Data Structures Using Python. Available online at <http://interactivepython.org/runestone/static/pythonds/index.html>.
- Python, Intermediate and advanced documentation at <https://www.python.org/doc/>.

Assessment: Project (50%) and problem sets (50%) in the AT. For the individual project, students will be required to develop Python software that addresses a sufficiently complex computational social science task. Examples of possible projects include a software package that collects and analyses online data, an experimental game, or an agent-based model. Marking of this assessment will be at a level appropriate for PhD students.

MY572 Half Unit Data for Data Scientists

This information is for the 2024/25 session.

Teacher responsible: Dr Ryan Hubert

Availability: This course is available on the MPhil/PhD in Social Research Methods. This course is available with permission as an outside option to students on other programmes where regulations permit.

This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place

Course content: This course will cover the principles of digital methods for storing and structuring data, including data types, relational and nonrelational database design, and query languages. Students will learn to build, populate, manipulate and query databases based on datasets relevant to their fields of interest. The course will also cover workflow management for typical data transformation and cleaning projects, frequently the starting point and most time-consuming part of any data science project. This course uses a project-based learning approach towards the study of online publishing and group-based collaboration, essential ingredients of modern data science projects. The coverage of data sharing will include key skills in on-line publishing, including the elements of web design, the technical elements of web technologies and web programming, as well as the use of revision-control and group collaboration tools such as GitHub. Each student will build one or more interactive website based on content relevant to his/her domain-related interests, and will use GitHub for accessing and submitting course materials and assignments. In this course, we introduce principles and applications of the electronic storage, structuring, manipulation, transformation, extraction, and dissemination of data. This includes data types, database design, data base implementation, and data analysis through structured queries. Through joining operations, we will also cover the challenges of data linkage and how to combine datasets from different sources. We begin by discussing concepts in fundamental data types, and how data is stored and recorded electronically. We will cover database design, especially relational databases, using substantive examples across a variety of fields. Students are introduced to SQL through MySQL, and programming assignments in this unit of the course will be designed to insure that students learn to create, populate and query an SQL database. We will introduce NoSQL using MongoDB and the JSON data format for comparison. For both types of database, students will be encouraged to work with data relevant to their own interests as they learn to create, populate and query data. In the final section of the data section of the course, we will step through a complete

workflow including data cleaning and transformation, illustrating many of the practical challenges faced at the outset of any data analysis or data science project.

Online publishing and collaboration tools forms the second part of this course, along with the tools and technologies that underlie them. Students will develop interactive, secure and powerful projects for the World Wide Web using both client and server side technologies. Collaboration and the dissemination and submission of course assignments will use GitHub, the popular code repository and version control system. The course begins with an in-depth look at the markup languages that form the foundations of building web sites with a study of HTML and CSS. Students next study basic programming in JavaScript, to provide client and server side tools including the customization of web content using Bootstrap and Jekyll to publish web pages, which will provide the basis for a class project.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Autumn Term.

This course has a reading week in Week 6 of AT.

Formative coursework: Students will be expected to produce 10 problem sets in the AT.

Students will work on weekly, structured problem sets in the staff-led class sessions. Example solutions will be provided at the end of each week.

- London, Kyle Developing Large Web Applications: Producing Code That Can Grow and Thrive O'Reilly, 2010.

Assessment: Problem sets (50%) and take-home assessment (50%) in the AT.

Marking of these assessments will be at a level appropriate for PhD students.

MY574 Half Unit Applied Machine Learning for Social Science

This information is for the 2024/25 session.

Teacher responsible: Dr Thomas Robinson

Availability: This course is available on the MPhil/PhD in International Relations and MPhil/PhD in Social Research Methods. This course is available with permission as an outside

option to students on other programmes where regulations permit. This course is available to research students only. This course is not controlled access. If you register for a place and meet the prerequisites, if any, you are likely to be given a place.

Pre-requisites: Applied Regression Analysis (MY452) or equivalent is required. Students should understand basic linear algebra and know at least one programming language. If this programming language is not R, students should take the Digital Skills Lab course in R before the start of term.

Course content: Machine learning uses algorithms to find patterns in large datasets and make predictions based on them. This course will use prominent examples from social science research to cover major machine learning tasks including regression, classification, clustering, and dimensionality reduction. Lectures will use case studies to introduce common machine learning strategies including regularised regression (e.g. LASSO), tree-based methods, distance-based algorithms and neural networks. As part of this course, students will consider ethical issues surrounding machine learning applications, including privacy and algorithm bias. Students will learn to apply algorithms to data and to validate and evaluate models. Students will work directly with social data and analyse these data using Python or R.

Teaching: This course is delivered through a combination of classes and lectures totalling a minimum of 20 hours across Winter Term.

This course has a reading week in Week 6 of WT.

Formative coursework: Students will be expected to submit 1 problem set in WT and will complete 5 quizzes across the term. The problem set will build on the first weeks of the course.

Indicative reading:

Assessment: Problem sets (100%) in the WT.

MY580

Methodology Short Courses

This information is for the 2024/25 session.

Availability: This course is available to MPhil/PhD students from across the LSE who would like to develop specific aspects of their methodological training. MY580 is not a traditional course but a series of one-off workshops. Places on individual workshops are limited, and participants must register via the Department of Methodology's Eventbrite page. This course is also available to

MSc students where regulations permit it, but priority is given to MPhil/PhD students as places on individual workshops are limited.

Course content: MY580 is a series of workshop modules that provide intensive training in specific methodological topics. The workshops cover a broad array of themes from research design to data collection to data analysis and do so from a broad array of methodological traditions – qualitative, quantitative, and computational. Topics to be covered each term will be listed on Moodle. Workshops typically range from two to four hours each and are a mix of traditional teaching and hands-on practical activities. These interdisciplinary sessions provide a space for students to develop advanced methodological skills and exchange ideas with peers.

Teaching: Sessions are to be held in term time throughout the year. Participants are required to sign up via the Department of Methodology's Eventbrite page: <https://www.eventbrite.co.uk/cc/my580-methods-short-courses-3029179>.

Research students can sign up to for as many workshops as they wish (subject to availability).

Indicative reading: Most workshops do not require reading prior to the session, but each session will provide its own recommended reading list, available on Moodle, where appropriate.

Assessment: This course is non-examinable.

MY599

Department of Methodology MPhil/PhD Students Seminar

This information is for the 2024/25 session.

Teacher responsible: Professor Flora Cornish

Availability: This course is available on the MPhil/PhD in Demography (Social/Formal) and MPhil/PhD in Social Research Methods. This course is not available as an outside option. This course is available as an option to Visiting PhD students in the Department of Methodology.

Seminars take place throughout the academic year.

Course content: MPhil/PhD students present aspects of their work in progress to an audience of their peers, with time for discussion and feedback. Students are expected to attend each seminar and to present their work once per year.

Assessment: This course is unassessed.

PB500

Current Research in Psychological and Behavioural Science

This information is for the 2024/25 session.

Teacher responsible: Dr Michael Muthukrishna and Dr Kate Laffan

Availability: This course is compulsory on the MPhil/PhD in Psychological and Behavioural Science. This course is not available as an outside option. This course is available to academic staff and research students only.

Course content: Weekly seminars during which PhD students present their work, and explore research skills (e.g. writing, grant preparation). The course runs through Autumn Term, Winter Term and Spring Term.

Teaching: 20 hours of seminars in the AT. 20 hours of seminars in the WT. 14 hours of seminars in the ST.

Assessment: Non-examinable.

PH500

Research Methods in Philosophy

This information is for the 2024/25 session.

Teacher responsible: Prof Richard Bradley

Availability: This course is available on the MPhil/PhD in Philosophy. This course is available with permission as an outside

option to students on other programmes where regulations permit.

Course content: Topics in contemporary philosophy.

Teaching: Seminars PH500 15 x two-hour (MT, LT, ST). Different members of the department will lead the seminar in each of the three terms.

A more detailed syllabus will be posted at the beginning of each term.

Assessment: This course is non-examinable.

PH501

Philosophical Problems Seminar

This information is for the 2024/25 session.

Teacher responsible: Prof Anna Mahtani and Prof Richard Bradley

Availability: This course is compulsory on the MPhil/PhD in Philosophy. This course is not available as an outside option.

Course content: In this course, we will read and carefully discuss together a range of classic papers in contemporary analytic philosophy that might not otherwise be covered in LSE Philosophy Department courses. Topics are selected from metaphysics, the philosophy of mind and action, ethics, epistemology, and the philosophy of language. This list is illustrative.

Teaching: 15 hours of seminars in the AT. 15 hours of seminars in the WT.

Indicative reading: Specific readings will be announced in a detailed syllabus at the start of the term.

Assessment: Two essays of 5000 words each over the course of the two terms. Either or both of these essays may be replaced by two shorter essays each of 2500 words.

PH502

Logic and Probability

This information is for the 2024/25 session.

Teacher responsible: Dr Wesley Wrigley

Availability: This course is available on the MPhil/PhD in Philosophy. This course is not available as an outside option. The course is, in general, only aimed at those students who have never taken a course in formal logic before. For such students the course is compulsory.

Course content: This course covers the following topics.

1. Introduction to classical logic

Logic is the study of arguments and inferences. Its main task is to give an explicit characterisation of those arguments and inferences that are logically valid. Logic tells you exactly when some conclusion follows from some premises and when it does not. The skill of devising logically valid arguments is very important for philosophers. We train this and related skills based on classical theories of logical consequence. The course covers sentential or propositional logic as well as (first-order) predicate logic.

2. The art of defining

The modern theory of definitions offers a precise definition of 'definition' as well as rigorous criteria for checking whether a definition is formally correct. The skill of defining in a correct way can hardly be overestimated in philosophy. It prevents misunderstandings and can drastically improve the clarity of concepts, claims and arguments. It is particularly important for philosophers because many philosophical questions require definitions as answers (e.g., 'What is knowledge?', 'What is truth?', 'What is a just society?', 'Under which conditions is an act morally wrong?').

3. Set theory and model theory

Scientists often use mathematical structures to model real-world systems and to predict or explain their behaviour. Model theory is the study of mathematical structures from a logical point of view. It rests on set theory, which can be viewed as the foundation of modern mathematics. Students will be introduced to core concepts of set theory and model theory that help to better understand the formal architecture of scientific theories and models.

4. Possible world semantics

Classical logic only deals with truth-functional logical connectives (e.g., 'not', 'and', 'or'). However, there are also non-truth-functional connectives which play a central role in philosophical and scientific reasoning. Prime examples are counterfactual conditionals ('if A were the case, then B would be the case') and modal notions (such as 'it is possible that A' and 'it is necessary that A'). But what exactly is the meaning of these notions? In other words: how could a semantics for such non-truth-functional connectives look like?

This course introduces students to the basic ideas of possible world semantics.

5. Probability theory and inductive logic

In the case of a deductively valid inference, it is utterly impossible that the conclusion is false when the premises are true. However, many inferences we draw in practice do not satisfy this ideal of validity. In many cases, the premises support the conclusion to some degree, but their truth would not guarantee the truth of the conclusion. For example, it does not follow logically from the premise that someone smokes 40 cigarettes a day (together with background medical theories and data) that they will die early from smoking-related illness – but it is much more probable that they will than if they did not smoke. Inductive logic is the systematic study of inferences of that type. Students will be introduced to the fundamentals of inductive logic and probability theory.

Teaching: 15 hours of lectures in the AT. 15 hours of lectures in the WT.

This course includes a reading week in week 6 of both AT and WT.

Formative coursework: Formative coursework will take the form of problem sets and online quizzes.

Indicative reading: There will be comprehensive lecture slides and materials covering the entire course content. Indicative background readings include:

- Button, T. and Magnus, P.D. (2017): forall x: Cambridge, URL = <<http://www.homepages.ucl.ac.uk/~uctytbu/OERs.html>>
- Copi I.M., Cohen, C. and McMahon K. (2014): Introduction to Logic. Pearson.
- Gupta, A. (2015): "Definitions", Stanford Encyclopedia of Philosophy, URL = <<https://plato.stanford.edu/entries/definitions/>>.
- Hodges, W. and Scanlon, T. (2018): "First-order Model Theory", Stanford Encyclopedia of Philosophy, URL = <<https://plato.stanford.edu/entries/modeltheory-fo/>>.

- Sider, T. (2010): Logic for Philosophy. OUP.
- Skyrms, B. (2010): Choice and Chance: An Introduction to Inductive Logic. Fourth edition. Wadsworth

Assessment: Exam (50%, duration: 2 hours, reading time: 15 minutes) in the January exam period.

Exam (50%, duration: 2 hours, reading time: 15 minutes) in the spring exam period.

PH551

Research Seminar in the Philosophy of Natural Sciences

This information is for the 2024/25 session.

Teacher responsible: Prof Miklos Redei and Prof Bryan Roberts

Availability: This course is available on the MPhil/PhD in Philosophy. This course is not available as an outside option.

Course content: This is a special topics course on the philosophy of the natural sciences. The course is integrated with the meetings of the Sigma Club. Approximately 3 sessions per term are Sigma Club meeting; the remaining sessions are the research seminar. The topic will be announced at the beginning of the term.

Teaching: 15 hours of seminars in the AT. 15 hours of seminars in the WT. 10 hours and 30 minutes of seminars in the ST.

Formative coursework: Students will be expected to write one essay per term and to give a seminar presentation.

PH555

Research Seminar in the Philosophy of Economics and Social Sciences

This information is for the 2024/25 session.

Teacher responsible: Prof Richard Bradley

Availability: This course is available on the MPhil/PhD in Philosophy. This course is not available as an outside option.

Course content: Philosophical issues in economics and the social sciences.

Teaching: 10 hours of seminars in the AT. 10 hours of seminars in the WT. 10 hours of seminars in the ST.

Formative coursework: Students will be expected to write one essay per term.

SO500

Aims and Methods Research Class for MPhil Students

This information is for the 2024/25 session.

Teacher responsible: Prof Suki Ali and Dr David Pinzur

Availability: This course is compulsory on the MPhil/PhD in Sociology. This course is not available as an outside option.

Course content: The research seminar aims to provide students with a practical framework within which to think through planning their research. This includes devising research questions, how to do a literature review, selecting appropriate methods for research, linking theory and practices, ethical issues and writing. The course will comprise workshops and student presentations. By the end of the course students should be able to formulate clear aims and methods for their own research. All first year MPhil students must attend.

Teaching: 15 hours of seminars in the AT. 15 hours of seminars in the WT.

Reading Weeks: Students on this course will have a reading week in AT Week 6 and WT Week 6, in line with departmental policy.

Formative coursework: A 5,000 word formative paper is to be submitted to the Course Convenor and Supervisors in ST of Year 1. The SO500 formative paper will set out the 'aims and methods' of the research based on your reading and thinking so far.

Assessment: Paper (100%) in the AT.

Upgrade Paper due in AT of Year 2: 10,000 word upgrade paper on the 'aims and methods' of the doctoral research including preliminary data collection and analysis, and a viva voce examination. The viva voce examination will be conducted by the end of the AT in Year 2. Satisfactory completion of the upgrade paper and the viva voce examination are necessary in order to upgrade from MPhil to PhD student. Part-time students may elect to be evaluated in Year 2 or Year 3.

SO501

Data Analysis Workshop

This information is for the 2024/25 session.

Teacher responsible: Prof Suki Ali

Availability: This course is compulsory on the MPhil/PhD in Sociology. This course is not available as an outside option. Only available to sociology research students in the second and subsequent years of their MPhil/PhD.

Course content: Seminars will focus on developing your doctoral studies, including going into the field, dealing with issues, and data analysis strategies. These will be student led sessions which will act as a support network and as practical sessions to allow students to develop their research skills in the context of their specific projects.

Teaching: 4.5 hours of seminars in AT and 4.5 hours in WT.

Assessment: There is no formal assessment, but participants are asked to present papers, research materials, read other students' research materials, and contribute to discussion.

SO505

Becoming a Professional Sociologist

This information is for the 2024/25 session.

Teacher responsible: Prof Suki Ali

Availability: This course is available on the MPhil/PhD in Sociology. This course is not available as an outside option. This course will be available for Year 3 and 4 students intending to pursue an academic career as an optional training course for 2022/23. It is not available to PhD students outside the department.

Pre-requisites: Students must have completed Aims and Methods Research Class for MPhil Students (SO500).

Students will have upgraded to PhD and undertaken at least one year of SO501.

Course content: This half-unit course will provide a workshop environment to discuss key aspects of developing a career as a Sociologist. These may include:

- 1 Writing, submitting and revising journal articles;
- 2 Networking and conference attendance;
- 3 Applying for research funding/jobs;
- 4 Using social media;
- 5 Developing CVs.

Students will:

- Gain an understanding of the different aspects involved in developing a career in academic Sociology
- Gain practical understanding of how to pursue the different elements of a sociological career in order to be in a good position in the job market and for postdoctoral funding
- Provide support for students as they are finishing their PhD and move into the next stage of their career as sociologists

Teaching: 2 hours of workshops in the AT. 2 hours of workshops in the WT.

Content will generally be student led.

Formative coursework: There is no formative assessment for this course.

Indicative reading: There is no reading list for this course.

Assessment: There is no summative assessment for this course.

SO511 Not available in 2024/25

Research Seminar in Political Sociology

This information is for the 2024/25 session.

Teacher responsible: Dr Robin Archer STC.S114a

Availability: This course is available on the MPhil/PhD in Cities Programme and MPhil/PhD in Sociology. This course is available as an outside option to students on other programmes where regulations permit.

This course is available as an outside option to MPhil/PhD students only with an interest in political sociology in other programmes and departments where regulations permit. Students from all departments are welcome.

Course content: Political sociologists seek to understand fundamental political phenomenon by studying them in their social context. This seminar seeks to provide a small, friendly forum in which research students can discuss important recent publications and debates in this field. It often spends a number of weeks reading recent prize-winning books and articles in the field, and sometimes examines a topical theme for part of a term. There are also occasional guest lectures. In recent years, for example, there were lectures by Michael Mann (UCLA) on the rise and fall of neo-liberalism. Theda Skocpol (Harvard) on the future of American politics, and Andreas Wimmer (Princeton) on ethnic conflict and state formation. The seminar also provides an opportunity to develop individual research projects. In each seminar, a twenty or thirty minute presentation is followed by discussion.

Teaching: 8 seminars across AT, WT and ST.

Indicative reading: A short list of some important recent books and articles that could be discussed in the seminar will be suggested at the beginning of the year, and the seminar is always

open to suggestions from participants. Readings continually change, but, for the purposes of illustration, recent seminars have discussed global anti-capitalism, conservatism and the new imperialism, Christianity and American democracy, the welfare state, the politics of free markets, labour protest in China, street politics in Egypt, comparative populism, and the crisis of social democracy.

Assessment: There is no formal assessment but participants are asked to present papers, contribute to discussion and read the work of selected scholars in the course of the session.

SO521 Not available in 2024/25 Research Seminar on Cities and Space

This information is for the 2024/25 session.

Teacher responsible: Prof Suzanne Hall STC S212 and Dr David Madden STC S209

Availability: This course is available on the MPhil/PhD in Cities Programme and MPhil/PhD in Sociology. This course is available with permission as an outside option to students on other programmes where regulations permit.

For MPhil/PhD students doing research on urban and spatial issues in the Cities Programme/Department of Sociology. If space is available, other graduate students may apply.

Course content: The PhD seminar in cities and space is a graduate seminar based on discussion of key readings in the fields of urban social theory and spatial analysis. It also provides a forum for discussion of research issues relating to the study of cities and space. In the Michaelmas term we introduce a selection of writings that engage with perspectives in urban studies and critical theory, linking these to corresponding discussions in social theory. In the Lent term we explore methodological orientations to working on, in and for the urban, ranging from approaches to methods and fieldwork to policy interventions.

Teaching: 7 hours and 30 minutes of seminars in the AT. 7 hours and 30 minutes of seminars in the WT.

One 1.5 hour seminar every two weeks in the MT and LT.

Assessment: This course is not assessed

SP501 Research Student Seminar

This information is for the 2024/25 session.

Teacher responsible: Dr Tania Burchardt

Availability: This course is compulsory on the MPhil/PhD in Social Policy. This course is available on the MPhil/PhD in Social Policy. This course is not available as an outside option.

Course content: The course for first year students provides structured sessions for MPhil students (e.g. the MPhil/PhD process, ethics, risk). It also provides the forum in which first year full-time and second year part-time MPhil students must present their work to fellow students and staff in advance of submitting their major review (upgrade) document.

The course for second and third year students provides workshops on a range of topics including career pathways, attending conferences and publishing as well as opportunities to discuss their research with fellow students.

Teaching: First year provision will be delivered by a series of seminars across the teaching year.

Second and third year: Workshops will be arranged through the year.

All teaching will be in accordance with the LSE Academic Code (<https://info.lse.ac.uk/current-students/lse-academic-code>) which specifies a "minimum of two hours taught contact time per week when the course is running in the Autumn Term (AT) and/or Winter Term (WT)". Social Policy courses are predominantly taught through a combination of in-person Lectures and In person classes/seminars. Further information will be provided by the Course Convenor in the first lecture of the course.

The course will be delivered in both AT and WT.

Formative coursework: There will be an opportunity/expectation that students will give a presentation of their research which will provide helpful feedback for their Major Review (Upgrade).

ST501 Half Unit Multilevel Modelling

This information is for the 2024/25 session.

Teacher responsible: Prof Jouni Kuha

Availability: This course is available on the MPhil/PhD in Health Policy and Health Economics and MPhil/PhD in Statistics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and basic statistical theory, including linear regression and logistic regression.

Course content: A practical introduction to multilevel modelling with applications in social research. This course deals with the analysis of data from hierarchically structured populations (e.g., students nested within schools, individuals nested within households or geographical areas) and longitudinal data (eg repeated measurements of individuals in a panel survey). Multilevel (random-effects) extensions of standard statistical techniques, including multiple linear regression and logistic regression, will be considered. The course will have an applied emphasis with computer sessions using appropriate software (e.g., Stata).

Teaching: This course will be delivered through a combination of lectures and computer classes totalling a minimum of 30 hours in Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Formative coursework is assigned fortnightly and returned to students with comments/feedback via Moodle before the lab sessions

Indicative reading: T. Snijders & R Bosker Multilevel Analysis: an Introduction to Basic and Advanced Multilevel Modelling, Sage (2011, 2nd edition)

S Rabe-Hesketh & A Skrondal, Multilevel and Longitudinal Modeling using Stata, (Third Edition), Volume I: Continuous responses (plus Chapter 10 from Volume II, which is available free on the publisher's website). Stata Press (2012).

Also recommended are:

A Skrondal & S Rabe-Hesketh, Generalized Latent Variable Modeling: Multilevel, Longitudinal and Structural Equation Models, Chapman & Hall (2004);

H Goldstein, Multilevel Statistical Models, Arnold (2003);

S W Raudenbush & A S Bryk, Hierarchical Linear Models:

Applications and Data Analysis Methods, Sage (2002);

G Verbeke & G Molenberghs, Linear Mixed Models for Longitudinal Data, Springer (2000);

E Demidenko, Mixed Models, Wiley (2004).

Assessment: Coursework (100%, 4000 words).

Assessment is by 100% coursework given to students in week 8 of the course.

ST505 Half Unit Statistical Modelling and Data Analysis

This information is for the 2024/25 session.

Teacher responsible: Prof Fiona Steele COL 7.12

Availability: This course is available on the MPhil/PhD in Statistics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and statistical theory to the level of ST102 and ST206, and linear regression to the level of ST211. Previous programming experience is not required but students who have no previous experience in R must complete an online pre-session R course from the Digital Skills Lab before the start of the course (<https://moodle.lse.ac.uk/course/view.php?id=7745>).

Course content: This course provides an overview of modern applied statistics. It will cover an introduction to quantitative research design and causal inference, exploratory data analysis and data visualisation, generalised linear models, and generalised latent variable models (including mixed effects or multilevel models, longitudinal data analysis, and structural equation models). The course will have an applied emphasis with students gaining hands-on experience in data analysis using R and practice in the interpretation of results.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 30 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce 1 project in the AT.

Students will be given a real dataset and asked to analyse the data to answer scientific questions and then write a report. Students' reports will be marked and feedback will be given.

Indicative reading: Maundonald, J., & Braun, J. (2006). Data analysis and graphics using R: an example-based approach. Cambridge University Press
Gelman, A., & Hill, J. (2006). Data analysis using regression and multilevel/hierarchical models. Cambridge University Press.
Skrondal, A. and Rabe-Hesketh (2004) Generalized latent variable modeling : multilevel, longitudinal, and structural equation models. Chapman & Hall/CRC

Imbens, G. W. and Rubin, D. B. (2015). Causal Inference for Statistics, Social, and Biomedical Sciences : An Introduction Cambridge University Press

Assessment: Project (30%, 1000 words) in the AT.
Take-home assessment (70%) in the WT.

The summative assessment will be based on one piece of coursework (30%) and one take-home exam (70%). For the coursework, students will be given a dataset in week 6 and asked to analyse the data to answer several scientific questions and submit a report in week 10. The take-home exam will be in January. The take-home exam should be no fewer than 3000 words and students will be asked to submit this within three days.

ST510 Half Unit Foundations of Machine Learning

This information is for the 2024/25 session.

Teacher responsible: Dr Chengchun Shi, COL.8.08

Availability: This course is available on the MPhil/PhD in Statistics. This course is available with permission as an outside option to students on other programmes where regulations permit.

The availability as an outside option requires a demonstration of sufficient background in mathematics and statistics and is at the discretion of the instructor.

Pre-requisites: A knowledge of probability and statistical theory to the level of ST102 and ST206 and some parts of ST505 (e.g. linear models and generalized linear models). Some experience with computer programming will be assumed (e.g., Python, R).

Course content: The goal of this course is to provide students with a training in foundations of machine learning with a focus on statistical and algorithmic aspects. Students will learn fundamental statistical principles, algorithms, and how to implement and apply machine learning algorithms using the state-of-the-art Python packages such as scikit-learn, TensorFlow, and OpenAI Gym.

The course will cover the following topics:

1. **Foundations of supervised learning:** empirical risk minimisation, empirical minimisation with inductive bias, PAC learning, learning via uniform convergence
2. **Convex optimisation:** convexity, Newton-Raphson, gradient descent, stochastic gradient descent (SGD), acceleration by momentum, smoothness, strong convexity, convergence rates, alternating direction method of multipliers
3. **Non-convex optimisation:** EM algorithm, MCMC, variational Bayesian inference, optimisation landscape, local minima and

saddle points

4. **Support vector machines:** margin and hard-SVM, soft-SVM and norm regularization, optimality conditions and support vectors, implementing soft-SVM using SGD
5. **Decision trees and random forests:** sample complexity, decision tree algorithms, random forests
6. **Neural networks:** feedforward neural networks, expressive power of neural networks, stochastic gradient descent and backpropagation
7. **Unsupervised learning - clustering:** linkage-based clustering algorithms, k-means and other cost minimisation clustering, spectral clustering, information bottleneck
8. **Unsupervised learning - dimension reduction:** PCA, matrix completion, autoencoder
9. **Online learning and optimisation:** online learnability, online classification, weighted majority, online convex optimization, regret minimisation
10. **Reinforcement learning:** multi-armed bandit processes, reinforcement learning problem, Markov Decision Problem, reinforcement learning solution methods

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 35 hours in Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 9 problem sets in the WT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

Indicative reading: 1. Avrim Blum, John Hopcroft and Ravindran Kannan, Foundations of Data Science, Cambridge University Press, 2020; text here <https://www.cs.cornell.edu/jeh/book.pdf>
2. Stephen Boyd and Lieven Vandenberghe, Convex Optimization, Cambridge University Press, 2004; text here <http://web.stanford.edu/~boyd/cvxbook/>

5. Aston Zhang, Zack C. Lipton, Mu Li, and Alex J. Smola, Deep Dive into Deep Learning, 2020; text here <https://d2l.ai/>
6. Trevor Hastie, Robert Tibshirani and Jerome Friedman, The Elements of Statistical Learning: Data Mining, Inference, and Prediction, Second Edition, Springer, 2017
7. Shai Shalev-Shwartz and Shai Ben-David, Understanding Machine Learning: from Theory to Algorithms, Cambridge University Press, 2014; text here <https://www.cs.huji.ac.il/~shais/UnderstandingMachineLearning/understanding-machine-learning-theory-algorithms.pdf>
8. Richard S. Sutton and Andrew G. Barto, Reinforcement Learning: An Introduction, Second Edition, MIT Press, Cambridge, MA, 2018; text here <http://www.incompleteideas.net/book/the-book-2nd.html>

Assessment: Project (40%, 3000 words) and take-home assessment (20%) in the WT.

Oral examination (40%) in the ST.

The summative assessment will be based on four pieces of take-home assessment assignments (20% in total; 5% each), one project assignment (40%), and one oral exam (40%).

For the take-home assessments, students will be given homework problem sets and computer programming exercises in weeks 2, 4, 7, and 9.

The project assessment will be in April. Students will be asked to submit their project reports within one month.

ST542 Half Unit Longitudinal Data Analysis

This information is for the 2024/25 session.

Teacher responsible: Prof Fiona Steele COL.7.12

Availability: This course is available on the MPhil/PhD in Health

Policy and Health Economics and MPhil/PhD in Statistics. This course is available as an outside option to students on other programmes where regulations permit.

Pre-requisites: A knowledge of probability and basic statistical theory, including linear regression and logistic regression. Please log into moodle.lse.ac.uk and self-enrol in the 'R for Statistics Pre-sessional

Course content: A practical introduction to methods for the analysis of repeated measures data, including continuous and binary outcomes. Topics include: longitudinal study designs, models for two measurements, (random effects) growth curve models, marginal models, missing data, latent class models, models for binary data and dynamic (autoregressive) models. The course will have an applied emphasis with fortnightly computer classes using R.

Teaching: This course will be delivered through a combination of lectures and computer classes totalling a minimum of 30 hours in WT.

Students are required to install R on their own laptops for use in the computer workshops.

This course includes a reading week in Week 6 of WT.

Formative coursework: Students will be expected to produce 4 exercises in the WT.

Coursework assigned fortnightly and returned to students via Moodle with feedback.

Indicative reading:

- Hedeker D, Gibbons RD. Longitudinal Data Analysis. Hoboken, New Jersey: John Wiley & Sons, Inc. (2006).
- Rabe-Hesketh S, Skrondal A. (2012) Multilevel and Longitudinal Modeling Using Stata, Third Edition. Volume I: Continuous Responses. College Station, Texas: Stata Press.
- Singer JD, Willett JB. Applied Longitudinal Data Analysis: Modeling Change and Event Occurrence. New York: Oxford University Press (2003). (Part I only).

Assessment: Coursework (100%, 4000 words) in the ST.

Assessment is by 100% coursework which is given to students in week 8

ST552 Half Unit

Probability and Mathematical Statistics I

This information is for the 2024/25 session.

Teacher responsible: Ms Giulia Livieri COL 7.10 and Prof Umut Cetin COL 6.08

Availability: This course is available on the MPhil/PhD in Statistics. This course is available with permission as an outside option to students on other programmes where regulations permit.

The availability as an outside option requires a demonstration of sufficient background in mathematics and statistics and is at the discretion of the instructor.

Course content: This course provides theoretical and axiomatic foundations of probability and mathematical statistics, and is intended for PhD students in the Statistics department. In particular, the following topics will be covered:

1. Measure spaces; Caratheodory extension theorem; Borel-Cantelli lemmas.
2. Random variables; monotone-class theorem; different kinds of convergence.
3. Kolmogorov's 0-1 law; construction of Lebesgue integral.
4. Monotone convergence theorem; Fatou's lemmas; dominated convergence theorem.
5. Expectation; L^p spaces; uniform integrability.
6. Characteristic functions; Levy inversion formula; Levy convergence theorem; CLT.
7. Principle and basis for statistical inference: populations and samples, decision theory, basic measures for estimators.
8. Estimation: U and V statistics, unbiased estimators, MVUE, MLE.
9. Hypothesis testing: Neyman-Pearson lemma, UMP, confidence sets.
10. Product measures; conditional expectation.

Teaching: This course will be delivered through a combination

of classes, lectures and Q&A sessions totalling a minimum of 30 hours across Autumn Term. This course includes a reading week in Week 6 of Autumn Term.

Formative coursework: Students will be expected to produce 9 problem sets in the AT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

Indicative reading: 1 Williams, D. (1991). Probability with Martingales. Cambridge University Press.

2 Durrett, R. (2019). Probability: Theory and Examples. Cambridge Series in Statistical and Probabilistic Mathematics.

3 Shao, J. (2007). Mathematical Statistics. Springer Texts in Statistics.

4 Keener, R. (2010). Theoretical Statistics. Springer Texts in Statistics.

Assessment: Exam (70%, duration: 3 hours, reading time: 10 minutes) in the spring exam period.

Coursework (30%).

Three of the homework problem sets will be submitted and marked as assessed coursework.

ST553 Half Unit

Probability and Mathematical Statistics II

This information is for the 2024/25 session.

Teacher responsible: Prof Umut Cetin and Prof Konstantinos Kardaras

Availability: This course is available on the MPhil/PhD in Statistics. This course is available with permission as an outside option to students on other programmes where regulations permit.

Pre-requisites: Probability and Mathematical Statistics I is a pre-requisite.

Course content: This course provides instruction in advanced topics in probability and mathematical statistics, mainly based on martingale theory. It is a continuation of Probability and Mathematical Statistics I. The following topics will in particular be covered:

1. Conditional expectation revisited; linear regression; martingales and first examples.
2. Concentration inequalities; dimension reduction; log-Sobolev inequalities.
3. Martingale transforms; optional sampling theorem; convergence theorems.
4. 160Sequential testing; backwards martingales; law of large numbers; de Finetti's theorem.
5. Markov chains; recurrence; reversibility; foundations of MCMC.
6. Ergodic theory.
7. Brownian motion; quadratic variation; stochastic integration.
8. Stochastic differential equations; diffusions; filtering.
9. Bayesian updating; Ergodic diffusions; Langevin samplers.
10. Brownian bridge; empirical processes; Kolmogorov-Smirnov statistic.

Teaching: This course will be delivered through a combination of classes, lectures and Q&A sessions totalling a minimum of 30 hours across Winter Term. This course includes a reading week in Week 6 of Winter Term.

Formative coursework: Students will be expected to produce 9 problem sets in the WT.

Weekly problem sets that are discussed in subsequent seminars. The coursework that will be used for summative assessment will be chosen from a subset of these problems.

Indicative reading: 1. Williams, D. (1991). Probability with Martingales. Cambridge University Press.

2. Durrett, R. (2019). Probability: Theory and Examples. Cambridge Series in Statistical and Probabilistic Mathematics.

3. Karatzas, I, Shreve S. (1991). Brownian motion and Stochastic Calculus. Springer GTM.

4. Shao, J. (2007). Mathematical Statistics. Springer Texts in Statistics.

5. Keener, R. (2010). Theoretical Statistics. Springer Texts in

Statistics.

Assessment: Exam (70%, duration: 3 hours, reading time: 10 minutes) in the spring exam period.

Coursework (30%).

Three of the homework problem sets will be submitted and marked as assessed coursework.

Language Centre Courses

Modern Foreign Language Certificate Courses

LN701

Arabic: Level One (Standard)

This information is for the 2024/25 session.

Teacher responsible: Mr Nadim Ben Mohamed Mahjoub PEL.6.01

Pre-requisites:

- No previous knowledge of Arabic.
- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.

Course aims:

- To develop the use of Arabic at survival level.
- To raise awareness about the two Arabic varieties (formal and colloquial).
- To learn the Arabic writing system.
- To introduce students to a major dialect of Arabic.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A1- of Common European Framework.

Communicative content:

- Greetings
- Asking for and giving personal information
- Talking about your immediate family
- Talking about studies and jobs
- Talking about your city and country
- Talking about present actions
- Talking about hobbies

Structural content:

- Alphabet
- Joining letters
- Pronunciation
- Feminine and masculine words
- Roots
- Present tense
- The definitive article
- Independent pronouns and pronoun suffixes
- Nouns-adjective phrases
- Numbers 0 to 100
- Plural
- Dual
- Word order
- Demonstrative: this (masc./fem.)
- Possessive pronouns
- Interrogatives (where, when, what, in which, etc.)
- Prepositions: in, between, etc
- Countries, nationality (nisba) and languages
- Idafa (genitive construction)
- Use of "also, where, in the same, etc."
- Use of some adverbs: a lot, a bit, well, etc.

Teaching: 16 hours of classes in the AT. 22 hours of classes in the WT. 2 hours of classes in the ST.

• This is a 40 hour-course.

• Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Students will be provided with a study pack.

Other useful materials

- Alif Baa: Introduction to Arabic, Letters and Sounds by Brustad et al. Georgetown Univ. Press, Second or Third Editions

Munther Younes, Routledge, 2014

- Mastering Arabic Grammar, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan, 2005
- Arabic as one language, Mahmoud Al-Batal (ed.), Georgetown University Press, 2018

Assessment: Continuous assessment (70%) in the AT and WT. Oral examination (30%) in the WT.

LN702

Arabic: Level One (Fast Track for Learners Familiar with Arabic Script)

This information is for the 2024/25 session.

Teacher responsible: Mr Luay Hasan PEL.6.01

Availability: This is a non-credit bearing course available to all LSE students, staff and alumni.

Pre-requisites:

- Students must have **familiarity with Arabic script**. Admission into the course upon tutor's approval during the information sessions.
- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.

Course aims:

- To develop the use of Arabic at survival level.
- To raise awareness about the two Arabic varieties (formal and colloquial).
- To further develop students' ability to use the Arabic writing system.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A1 of the Common European Framework.

Communicative content:

- Greetings
- Asking for and giving personal information, directions and opinions
- Talking about family
- Talking about your country
- Describing people, places and objects
- Talking about past events and experiences
- Using the dictionary (basic)
- Asking and giving the time
- Talking about present events
- Talking about future events (basic)
- Ordering in a restaurant
- Asking for and giving directions

Structural content:

- Roots
- The definitive article
- Independent pronouns and pronoun suffixes.
- Nouns-adjective phrases
- Numbers
- Feminine and masculine words
- Adjective-noun agreements
- Word order
- Verb-subject agreement
- Demonstratives (singular)
- Possessive pronouns
- Interrogatives (where, when, what, how many, etc)
- Prepositions: in, between

1280 Language Centre Courses

- Nisba (nationality)
- Idafa (genitive construction)
- Past tense
- Linking words (Firstly, after, lately, etc.)
- Present tense
- Future tense (basic)
- Plural (sound, masc./fem.)
- Negative phrases (past, present, future)
- Prepositions with pronoun suffixes
- Persons of the verb (sing./pl.)

Teaching: 16 hours of classes in the AT. 22 hours of classes in the WT. 2 hours of classes in the ST.

- This is a 40 hour-course.
- Please refer to the LSE timetable for course teaching arrangements.

Indicative reading:

- Textbook: Test your Arabic. Part. I, Luay Hasan, Lightning Source, 2015 (there are some samples in the LSE library)
- Students will be also provided with a study pack.

Other materials useful for this level

- Mastering Arabic 1, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan, 2007
- Mastering Arabic Grammar, Jane Wightwick and Mahmoud Gaafar, Palgrave Macmillan, 2005

- Speed up your Arabic. Strategies to avoid common errors, Sebastian Maisel, Routledge, 2015

Assessment: Continuous assessment (70%) in the AT and WT. Oral examination (30%) in the WT.

LN703

Arabic: Level Two (Standard)

This information is for the 2024/25 session.

Teacher responsible: Mr Nadim Ben Mohamed Mahjoub PEL.6.01

Pre-requisites:

- Students should have previously learnt ... see description of "Communicative content" and "Structural Content" of Level 1 Standard (LN701) and/or Level 1 Fast Track (LN702). Admission into the course upon completion of level test and tutor's approval.
- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.

Course aims:

- To develop the use of Arabic.
- To offer an insight into one major dialect of the Arabic language.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A2- of Common European Framework.

Communicative content:

- Talking about present events and experiences
- Talking about past events and experiences
- Describing people, places and objects
- Talking about daily habits/routine
- Making comparisons
- Using both past and present
- Talking about future plans (basic)
- Expressing preferences
- Expressing likes/dislikes
- Writing a biography

Structural content:

- Revision of present tense
- Revision of Nisba (nationality)
- Revision of Idafa (genitive construction)
- Revision of possessive

- Negative phrases
- Prepositions with pronoun suffixes
- Past tense
- Comparative
- Adverbs of frequency
- Introduction to Masdar (verbal noun)
- Time expressions
- Verb Kana (To be)
- Dual and Plural (sound and broken)
- Future tense
- Numbers
- Number-noun agreement (1-10)
- Adjective-noun agreement (human/non human)
- Demonstratives
- Quantities
- Introduction to cases and declination (nominative, accusative, genitive)

Teaching: 16 hours of classes in the AT. 22 hours of classes in the WT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Study Pack will be provided.

Assessment: Continuous assessment (70%) in the AT and WT.

Oral examination (30%) in the WT.

LN704

Arabic: Level Two (Fast Track)

This information is for the 2024/25 session.

Teacher responsible: Mr Nadim Ben Mohamed Mahjoub PEL.6.01

Availability: This is a non-credit bearing course available to all LSE students, staff and alumni.

Pre-requisites:

- Students should have previously learnt ... see description of "Communicative content" and "Structural Content" of Level 1 Fast Track (LN702) and/or Level 2 Standard (LN703). Admission into the course upon completion of level test and tutor's approval.
- Students should demonstrate commitment to regular attendance, completion of homework, completion of the dossier and all assessments.
- Students should dedicate at least two hours per week for coursework in addition to classes.

Course Aims:

- To develop the use of Arabic.
- To offer an insight into one major dialect of the Arabic language.
- To establish the skills, language and attitudes required to promote and facilitate further study of Arabic.
- To bring the students to level A2 of Common European Framework.

Communicative Content:

- Talking about present events and experiences
- Talking about past events and experiences
- Describing people, places and objects
- Talking about habits, hobbies and daily routine
- Making comparison between people, things or places

- Using both past and present
- Talking about future plans (further details)
- Giving opinions
- Expressing agreement
- Expressing wishes and plans for the future
- Writing a biography

Structural Content:

- Revision of past tense
- Revision of present tense
- Negative phrases
- Prepositions with pronoun suffixes
- Forms of the Arabic verb (1-4)
- Comparatives
- Adverbs of frequency
- Masdar (verbal noun)
- Time expressions
- Verb Kana (To be) and introduction to hollow verbs
- Plural (broken plural 1-5)
- Future tense
- Numbers
- Adjective-noun agreement (human/non-human)
- Use of the accusative
- Declination (nominative, genitive, accusative).

LN772

Russian: Level One (Standard)

This information is for the 2024/25 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01a and Mrs Larisa Leifland Berntsson

Pre-requisites: No previous knowledge required. For all students who aim to acquire survival level of proficiency in Russian.

Course Aim:

- To develop an ability to use Russian effectively for practical communication at a survival level.
- To deal with a range of simple predictable language tasks (using a limited vocabulary and linguistic structures) to meet language needs of everyday situations and topics.
- To establish linguistic skills and attitudes required for promoting and facilitating further study of Russian.
- To bring the students towards level A1 of .160

Communicative Content: The course is focused on the following aspects:

- Exchanging personal information, including studies, daily routine, and outside interests;
- Interpreting documents and data, containing some topical facts and figures of a country/place;
- Giving basic descriptions of people, objects, and places; expressing basic preferences and opinions;
- Demonstrating awareness and ability to use formal and informal registers in a very limited social context;
- Handling survival situations at a basic linguistic level.

Structural Content: The course covers basic vocabulary required for communicative functions and focuses on the following linguistic structures (the language command in these areas is expected to be appropriate to the level and task with differentiation of recognition and active usage):

- Gender of nouns; nouns & personal pronouns in singular in all cases;
- Adjectives and possessive pronouns;
- Formation of plural; expression of possession;
- Present & past tense of the verbs, imperative; cardinal numerals;
- Basic adverbs; simple impersonal constructions; basic expressions of time.

Teaching: 16 hours of classes in the AT. 22 hours of classes in the WT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading:

- Course Book - John Langran & Natalya Veshnieva, Russian -1, 5th edition 2021. ISBN: 978-1899785827
- Optional - L. Grushevskaja et al, A Living Russian Grammar, Part 1 Level A1-A2, Moscow: CREF, 2019, ISBN-13: 978-59243028673: 978-0954433307160

Assessment: Continuous assessment (70%) in the AT and WT. Oral examination (30%) in the WT.

LN773

Russian: Level One (Super Standard)

This information is for the 2024/25 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01a and Mrs Natalia Bershadski

Pre-requisites: No previous knowledge of Russian required, but students should: demonstrate commitment to regular attendance, completion of homework and all assessments; dedicate at least two hours per week for coursework in addition to classes. Students are expected to be experienced language learners and/or to have a good command in at least two foreign languages.

Course Aim:

- To bring students' knowledge of written and spoken Russian up to a low intermediate level, corresponding to level A1/A2 of CEFR.
- To develop an ability to use Russian effectively for practical communication in familiar work and social contexts.
- To deal with a variety of predictable simple language tasks (using a limited vocabulary and linguistic structures) to meet the needs of everyday situations and topics.
- To familiarise students with the background of Russian-speaking countries, including culture and civil societies.
- To establish linguistic skills and attitudes required for promoting and facilitating the further study of Russian.

Communicative Content: The course is focused on the following aspects:

- Exchanging personal information, including studies, daily routine, and outside interests;
- Interpreting documents and data, containing some topical facts and figures of a country/place;
- Expressing preferences and intentions;
- Giving advice; giving simple descriptions of people, objects, places, and weather;
- Demonstrating awareness and ability to use formal and informal registers in a limited social context; handling a variety of survival situations at an elementary linguistic level.

Structural Content: The course covers elementary vocabulary required for communicative functions and focuses on the following linguistic structures (the command in these areas is expected to be appropriate to the level and task with differentiation of recognition and active usage):

- Gender of nouns; nouns & personal pronouns;
- Adjectives & possessive adjectives in singular in all cases;
- Formation of plural; expression of possession;
- Basic usage of short adjectives;
- Present, past & future tense of the verbs;
- Imperative; reflexive verbs; basic verbs of motion;
- Cardinal & basic ordinal numerals;
- Wider range of adverbs;
- Simple impersonal constructions;
- Expressions of time.

Teaching: 24 hours of classes in the AT. 33 hours of classes in the WT. 3 hours of classes in the ST.

This is a 60 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading:

- Course Book - Colloquial Russian, by Svetlana Le Fleming, Susan Kay & Mikhail Vodopyanov, London: Routledge, 2023, ISBN 9781032417486
- Optional - A Living Russian Grammar, Part 1 Level A1-A2, by L. Grushevskaja et al, Moscow: CREF, 2019, ISBN-13: 978-5924302867

Assessment: Continuous assessment (70%) in the AT and WT. Oral examination (30%) in the WT.

LN774**Russian: Level Two (Standard)**

This information is for the 2024/25 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01a and Mrs Larisa Leifland Berntsson

Pre-requisites: For all students who aim to reach the functional level of proficiency in Russian.

Language skills and knowledge of Russian at the A1 level of the Common European Reference Framework for Languages (CEFR); 100 hours of language learning (including self-study).

All students must gain permission from the tutor in the Needs Analysis Interview to take this course.

Course Aim:

- To bring students' command of written and spoken Russian up to the intermediate level of proficiency, corresponding to the A2 level defined by the CEFR.
- To develop an ability to communicate effectively in Russian (using high-frequency vocabulary and structures) in everyday work and social situations.
- To improve pronunciation and sentence intonation.
- To improve basic knowledge of grammatical gender, word formation, and word order.
- To deal with a range of predictable simple language tasks using a limited range of language to meet the needs of differing but familiar situations and topics.
- To establish linguistic skills and attitudes required for promoting and facilitating further study of Russian.

Communicative Content: The course is focused on the following aspects:

- Thorough revision of the basic linguistic structures;
- Exchanging personal information and discussing the most common aspects of culture and current issues in Russia (e.g. education, mass media, festivals);
- Interpreting documents and data, containing a range of topical facts and figures of a country/place;
- Expressing preferences, intentions and opinions; giving advice and proposing alternatives;
- Making comparisons;
- Giving descriptions of people (including character), objects, places, weather & journeys;
- Demonstrating awareness and ability to use formal and informal registers in a limited social context; handling a variety of everyday situations on an adequate linguistic level (relevant high-frequency vocabulary and structures).

Structural Content: The course covers basic vocabulary required for communicative functions and focuses on the following linguistic structures (the language command in these areas is expected to be appropriate to the level and task with differentiation of recognition and active usage):

- Nouns, adjectives, personal & possessive pronouns in singular and plural in all cases;
- Demonstrative pronouns in all cases;
- Short adjectives; comparative adjectives & basic superlatives;
- Conjugation of verbs in all tenses; verbs of motion and prefixed verbs of motion;
- Introduction to aspects;
- Conjugation cardinal & ordinal numerals;
- Expressions of time and date;
- Expressions of purpose;
- Introduction to subjunctive mood.

Teaching: 16 hours of classes in the AT. 22 hours of classes in the WT. 2 hours of classes in the ST.

Indicative reading: Use of a selection of original written work from key authors, films, video footage and resources available on the World Wide Web.

Assessment: Continuous assessment (70%) in the AT and WT. Oral examination (30%) in the WT.

LN803

Spanish: Level Four (Fast Track)

This information is for the 2024/25 session.

Teacher responsible: Dr Roser Martinez-Sanchez PEL 6.01 G

Pre-requisites: This is an advanced course. Students should have previously learnt ... see the description of "Communicative content" and "Structural Content" of Level 4 standard (LN785). Admission into the course upon completion of level test and tutor's approval during the needs analysis session. Student profile: For students with a very good level of fluency in the language.

Course aims:

- To develop the ability to use Spanish effectively for purposes of dealing with complex work tasks.
- Including the following: Understanding long and complex factual texts, business reports, analytical data and associated marketing and commercial material.

- Understanding with few serious problems other texts relating to Politics, International History, Economics and other associated areas.
- Understanding extended speech at conferences or lectures, and interactive speech during meetings or seminars.
- Following TV programmes and recorded material without great effort in a wide range of both general and subject specific areas.
- Presenting clear, detailed descriptions of a wide range of subjects in the field of Social Sciences, integrating sub-themes, developing particular points and rounding off with an appropriate conclusion.
- Expressing themselves fluently and spontaneously without much need for obvious searching.
- During presentations they will be able to argue, counter-argue and interact effectively.
- Relate to other speakers and link various strands of discussion.
- Expressing themselves in a clear, well-structured text, expressing points of view at some length.
- Writing detailed expositions of complex subjects in an essay or report, underlining what they consider to be the salient issues.
- Writing different kinds of texts in an assured, personal style, appropriate to the reader in mind.
- To bring the students to level B2/C1 of CEFR.

Communicative content:

- Expressing emotions, feelings, desires and preference.
- Expressing suggestions, advice and opinions.
- Paraphrasing.
- Organising a complex oral speech.
- Organising a complex written discourse.
- Summarising.
- Talking about: Politics in Spain and Latin America.

Structural content: Revision of the indicative and subjunctive mode regular and irregular verbs. Advanced contrast between Ser and Estar. Impersonal clauses. Advanced use of the subjunctive tenses: temporal, causal, consecutive, conditional and final clauses. Links and connecting clauses. Reported speech. Relative clauses. Advanced use of prepositions "por" and "para". Idiomatic expressions. Periphrasis.

Teaching: 16 hours of classes in the AT. 22 hours of classes in the WT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Study pack. The course teacher will advise on the relevant grammar book at the beginning of the course.

Assessment: Continuous assessment (70%) in the AT and WT. Oral examination (30%) in the WT.

LN808

Mandarin Chinese: Level Five (Fast Track)

This information is for the 2024/25 session.

Teacher responsible: Dr Lijing Shi PEL 601H

Pre-requisites: This course is designed for students who have high proficiency in Chinese, typically have studied or/and lived in Chinese-speaking communities. Students are expected to have a very high level of fluency and the ability to do independent research into a chosen topic, i.e. several years of intensive study of Chinese at higher level, and also a keen interest in current issues. Students are expected to demonstrate a high level of commitment to the course: Regular attendance, Completion of homework, and all pieces of continuous assessment. Dedicate at least two hours per week to coursework in addition to classes. Admission into the course after completion of the online test and upon tutor's approval during the Needs Analysis Interview.

Course Aim:

- To maximise the speed of individual student progression.
- To attain competence in a broad range of complex and non-routine tasks across a wide variety of contexts.
- To practise the ability to use Chinese effectively for purposes of practical communication and reading comprehension dealing with linguistically challenging tasks.

- To establish the skills, language and attitudes required to promote and facilitate further study of Chinese.
- To practice the ability to use Chinese effectively for purposes of oral and written communication.
- To establish specific linguistic skills and strategies required to communicate effectively.
- To understand/analyse fairly complex texts about current issues and Chinese culture.
- To involve students in planning the course contents according to their specific needs and interests.
- To bring students to the level of C2 of CEFR.

Learners will have opportunities to practise:

- Communication in the workplace, at university and in everyday situations.
- Participation in problem solving discussions.
- Exchanging specific information.
- Writing short essays.
- Participating in discussions: expressing an opinion, agreement, disagreement.
- Logical argumentation. Reading and summarising texts from various sources.
- Using language strategies selected from an extensive repertoire in order to meet changing requirements.
- Using language strategies to cope with specialised topics: i.e. business, law, culture, politics, management, current issues.
- Advanced language tasks with reference to Chinese society, contemporary issues, international relations, history and culture.
- Mandarin pronunciation: Pinyin and tones. Simplified and traditional characters. Chinese grammar review. Regular group or individual oral presentations. Reading and summarising complex texts. Specific grammatical aspects of topical texts. Relevant grammatical issues for advanced and specialised communication.
- Students are to undertake independent research in their particular area of interest. Project work. Reading comprehension. Oral presentation.

The course will also introduce 580 words and 220 Chinese characters.

Teaching: 16 hours of classes in the AT. 22 hours of classes in the WT. 2 hours of classes in the ST.
LSE academic term structure change.

Indicative reading: Suggested course book:

The Routledge Advanced Chinese Multimedia Course: Crossing Cultural Boundaries. Lee, Liang, Jiao & Wheatley (2010)
Newspaper articles, Internet sources and other web-based material dealing with current issues.

Assessment: Continuous assessment (70%) in the AT and WT.
Oral examination (30%) in the WT.

LN810

Japanese: Level Four (Standard)

This information is for the 2024/25 session.

Teacher responsible: Dr Hua Xiang

Pre-requisites: Previous knowledge of Japanese required: 250 hours, including self-study and fluency in writing and reading Hiragana, Katakana and at least 250 Kanji. Students are expected to read at least 300 Kanji.

Course Aims: To attain competence in a broad range of complex and non-routine tasks across a wide variety of contexts. To practise the ability to use Japanese effectively for purposes of practical communication and reading completion dealing with linguistically challenging tasks. This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Minna no Nihongo Shokyu, Vol. 2, 2nd Edition (Book & CD)

Assessment: Continuous assessment (70%) in the AT, WT and ST.
Oral examination (30%) in the WT.

LN811

Korean: Level One (Standard)

This information is for the 2024/25 session.

Teacher responsible: Course coordinator: Dr Catherine Xiang, 601b, Pethick-Lawrence House

Pre-requisites: No previous knowledge required. All students welcome but they should: Demonstrate commitment to regular attendance, completion of homework, and all pieces of continuous assessment. Dedicate at least two hours per week for coursework in addition to classes. For anyone who wants to learn Korean.

Course Aim: To develop the ability to use Korean effectively for purposes of practical communication at survival level. To master the pronunciation of Korean. To have basic knowledge of Korean language: Hangul characters, some grammatical particles including the present, past and future tenses. To be able to communicate in a range of daily life situations and travelling to Korea. To establish the language skills and attitudes required to promote and facilitate further study of Korean. To increase cultural awareness of Korea. To prepare students for the equivalent of A1 CEFR.

Communicative Content: The course is focused on the following communicative functions: Greetings. Introducing yourself and others. Asking for and giving personal information. Introducing your family. Talking about date, daily routine, future plans. Talking about birthday and holiday. Asking and giving time. Arranging a date. Making suggestions. Understanding Korean currency. Shopping and bargaining. Ordering food and drinks. Eating out and reading a menu. Using public transports in Korea. Asking and giving directions. Checking into a hotel. Making simple requests. Describing past events. Talking about likes and dislikes. Making a phone call. Describing and solving problems.

Structural Content: This course will introduce the basics of Korean in the following grammatical areas: From mastering how to read and write Hangul characters. Use of some grammatical markers (subject, object, topic and location), use of honorifics, and three basic tenses including the present, past and future.

Teaching: 16 hours of classes in the AT. 22 hours of classes in the WT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading: Integrated Korean: Beginning 1 (KLEAR Textbooks in Korean Language) by Korean Language Education and Research Center (KLEAR), Young-Mee Yu Cho, Hyo Sang Lee and Carol Schulz (15 Dec 2009). Read and Speak Korean for Beginners with Audio CD, 2nd Edition (Read & Speak for Beginners) by Sunjeong Shin (1 Jul 2011). Korean: Beginner's Course (World Language) by Living Language (28 Dec 2007). Basic Korean: A Grammar and Workbook (Grammar Workbooks) by Andrew Sangpil Byon (31 Jul 2008).

Assessment: Continuous assessment (70%) in the AT, WT and ST.
Oral examination (30%) in the WT and ST.

LN814

Mandarin: Level Five (Current Issues)

This information is for the 2024/25 session.

Teacher responsible: Dr Hua Xiang 601B Pethick-Lawrence House
Dr Lijing Shi 601H Pethick-Lawrence House

Pre-requisites: Students must have completed Mandarin: Level 5 (Fast-track) (LN808) or equivalent.

Course content: This course aims to develop students' linguistic skills at an advanced level with a clear focus on current issues.

The students will be given opportunities to learn the key vocabulary of global events as well as current affairs. The topics include e-Commerce, wealth inequality, gender discrimination, migrant workers, environment protection, political movement and so on.

The course is communicative and interactive. The students are required to read authentic materials in the target language and learn to discuss, summarise and debate about current issues in China as well as the rest of the world.

Teaching: 16 hours of classes in the AT. 22 hours of classes in the WT. 2 hours of classes in the ST.

Formative coursework: Students will be expected to produce 1 project in the WT.

Indicative reading: Authentic and purposely made study pack will be provided.

Assessment: Continuous assessment (70%) in the AT and WT.
Oral examination (30%) in the WT.

LN815

Russian: Level One (Fast Track)

This information is for the 2024/25 session.

Teacher responsible: Dr Olga Sobolev PEL 6.01a and Mrs Irina Forbes

Pre-requisites: This course is designed for false-beginners and/or complete beginners with the background in Slavic languages. Students should demonstrate commitment to regular attendance, completion of homework and all assessments; dedicate at least two hours per week for coursework in addition to classes.

Students are expected to be experienced language learners or have a good command in at least two languages (one of them should be of Slavic origin).

Course Aim:

- To bring students' knowledge of written and spoken Russian up to a low intermediate level, corresponding to A1/A2 of CEFR.
- To develop an ability to use Russian effectively for practical communication in familiar work and social contexts.
- To deal with a variety of predictable simple language tasks (using a limited vocabulary and linguistic structures) to meet the needs of everyday situations and topics.
- To establish linguistic skills and attitudes required for promoting and facilitating further study of Russian.

Communicative Content: The course is focused on the following aspects:

- Exchanging personal information, including studies, daily routine, and outside interests;
- Interpreting documents and data, containing some topical facts and figures of a country/place;
- Expressing preferences and intentions;
- Giving advice; giving simple descriptions of people, objects places, and weather;
- Demonstrating awareness and ability to use formal and informal registers in a limited social context; handling a variety of survival situations at an elementary linguistic level.

Structural Content: The course covers elementary vocabulary required for communicative functions and focuses on the following linguistic structures (the command in these areas is expected to be appropriate to the level and task with the emphasis on active usage):

- Gender of nouns; nouns & personal pronouns;

- Adjectives & possessive adjectives in singular in all cases;
- Formation of plural; expression of possession;
- Basic usage of short adjectives;
- Present, past & future tense of the verbs;
- Imperative; reflexive verbs; basic verbs of motion;
- Cardinal & basic ordinal numerals;
- Wider range of adverbs;
- Simple impersonal constructions;
- Expressions of time.

Teaching: 16 hours of classes in the AT. 22 hours of classes in the WT. 2 hours of classes in the ST.

This is a 40 hour-course. Please refer to the LSE timetable for course teaching arrangements.

Indicative reading:

- Course Book - Colloquial Russian, by Svetlana Le Fleming, Susan Kay & Mikhail Vodopyanov, London: Routledge, 2023, ISBN 9781032417486
- Optional - A Living Russian Grammar, Part 1 Level A1-A2, by L. Grushevskaja et al, Moscow: CREF, 2019, ISBN-13: 978-5924302867

Assessment: Continuous assessment (70%) in the AT and WT.
Oral examination (30%) in the WT.

LN820

Korean: Level 2 (Standard)

This information is for the 2024/25 session.

Teacher responsible: Dr Hua Xiang Pethick-Lawrence House, 601B

Pre-requisites: Students must have completed Korean: Level One (Standard) (LN811).

Students who have completed LN811 Korean Level One successfully or equivalent.

Course Aim: To develop the ability to use Korean effectively for purposes of practical communication at intermediate level. To improve the pronunciation of Korean. To have enhanced knowledge of Korean language: Pinyin spelling, tones, characters, words and syntax. To be able to communicate in a range of daily life situations and travelling to Korea. To establish the language skills and attitudes required to promote and facilitate further study of Korean. To increase cultural awareness of Korea. To prepare students for the equivalent of B1 CEFR.
