In the timeline drag and drop the logo, namestrap and mp.4 file to create 3 layers as illustrated below:

NB ensure logo asset has been stretched to length of file and namestrap appears shortly after intro for approx 5 secs - ensure image displays as below:

>File>Export Video File>H.264 Main Profile

>Export File

|     | Custom                            |  | The defaults create a H.264/AAC MP4 file, which is suitable for most users and<br>purposes. Choose a <b>Preset</b> at the left before deciding to use the <b>Advanced</b> mod |
|-----|-----------------------------------|--|---|
|     | Stock                             |  | The Advanced mode does not prevent creating an invalid combination of options   |
|     | Default                           |  | From Timeline 💌   |
|     | GIF Animation                     |  | Use hardware encoder Configure  |
