

Accessing Hspace, Pdrive and LSE teaching, research and Administrative Applications

Accessing H-space, Shared drives (such as P-drive) and LSE teaching and business applications

For the most secure and reliable method of accessing these resources we recommend using a 'remote desktop' session directly launched from your computer.

For [Windows 10 and 7 devices](#) click on the 'start menu' then search for '**Remote Desktop Connection**'. This will show the shortcut to launch 'Remote Desktop Connection'. You can right-click on this shortcut to pin to the taskbar or the start menu for further ease of access.

Alternatively you can download [this file](#) to your desktop and which will open a connection.

For [LSE Apple Macbooks or iMacs](#) you can install the remote desktop client from self-service. Find 'Self-service' within your applications folder and then search for 'LSE Remote Desktop'

For [Non-LSE, personal Apple Macbooks or iMacs](#) running OS.X 10.12 (Sierra) or higher you can install the [Microsoft RDP app](#) from the App store.

For [Non-LSE, personal Apple Macbooks or iMacs](#) running OS.X 10.11 (El Capitan) or lower you can download and install this file: [Microsoft+Remote+Desktop+8.dmg](#).

Once you have opened the application enter 'terminal.lse.ac.uk' as the computer name and click 'Connect'. This will prompt you to logon with you LSE username and password, enter these details and click 'ok'.

This will load an LSE desktop window with all of the main applications you would expect from an LSE computer on campus as well as access via My Computer to files and folders in H-space and shared drive (Pdrive etc). If any drives are missing, the Service Desk can assist in creating a shortcut or mapping this drive.

For H-space and Shared Drives (e.g. P-drive)

Click on the 'Start' menu and click on 'Computer' to access files. If any drives are missing, the Service Desk can assist in creating a shortcut or mapping this drive.

Just a reminder that we recommend that you consider migrating your files and folders from H-Space to OneDrive for the best possible user experience, [see this guide](#).

For Administrative Applications:

Click on the 'start menu', click on 'All Programmes' and click-on 'Administrative Applications' and you will see the administrative applications you have permission to use. For access to 'My View' open Internet explorer within the remote desktop window and browse to <https://myview.lse.ac.uk/>

For Specialist and Teaching Applications:

Click on the 'start menu', click on 'All Programmes' and click-on 'Administrative Applications' and you will see the Specialist and Teaching applications you have permission to use.
