

Because LSE will have no recourse to disciplinary measures over an Associate, who is not a School member, the DM/HoD will take responsibility for all use of the account. Consequently, if the account is abused (e.g. to perform mass download of articles from academic journals) the Departmental Manager or Head of Department will be accountable.

IMT reserves the right to suspend, disable or terminate an LSE Associate account at any time.

2.4 External Collaborator Access Framework

Where it is both possible and appropriate, the External Collaborator Access Framework (ECAAF) will be used in favour of supplying an associate with a network account. ECAAF provides access to individual systems as opposed to blanket network access. ECAAF, however, is not suitable if an Associate needs access to a shared storage space (e.g. a resource on [\\deptshared](#))

2.5 LSE Library Associates: disambiguation

The LSE Library is also the British Library for Economic and Political Science, and as such provides access to members of the public who demonstrate a legitimate access requirement. The library as a consequence provides these people with Associate cards and access to the library upon the completion of a web form. The users generated by this route have no rights to associate accounts as laid out in this policy. Library associate identities must not be transferred to any further associate status outside that conferred by the library web form.

2.6 Maintaining data security levels

As outlined above, Associates are subject to the 'Conditions of Use of IT Facilities at LSE' and as such explicitly commit to treating data in a manner appropriate to its sensitivity. There may be additional stipulations imposed by research data providers, and it is the duty of the DM/HoD to ensure any Associate understands these responsibilities.

Every user should understand the sensitivity of their data and treat them accordingly. Even if technical security mechanisms fail or are absent, every user should still attempt to maintain the security of data commensurate to their sensitivity. The [Information Classification Standard](#) enables users to classify data appropriately and gives guidance on how to store it, irrespective of security mechanisms that may or may not be in place.

2.7 Policies and guidelines for use of accounts

LSE Associates are expected to become familiar with and abide by LSE policies, standards and guidelines for appropriate and acceptable usage of the networks and systems. This includes the [Conditions of Use of IT Services at LSE](#) and the JANET [acceptable use policy](#).

2.8 Further Policies, Codes of Practice, Procedures and Guidelines

This policy sits beneath LSE's overarching [Information Security Policy](#). Other supporting policies have been developed to strengthen and reinforce this policy statement. These, along with associated codes of practice, procedures and guidelines are published together and are available for viewing on LSE's website. All staff, students and any third parties authorised to access LSE's network or computing facilities are required to familiarise themselves with these supporting documents and to adhere to them in the working environment.

2.9 Review and Development

This policy shall be reviewed and updated regularly by the Information Security Advisory Board (ISAB) and an auditor external to IMT if required to ensure that it remains appropriate in the light of any relevant changes to the law, organisational policies or contractual obligations.

Additional regulations may be created to cover specific areas.

ISAB comprises representatives from all relevant parts of the organisation. It shall oversee the creation of information security and subsidiary policies.

The Information Security Manager will determine the appropriate levels of security measures applied to all new information systems.

3 Responsibilities

LSE Associate Users

Abide by all applicable laws, the Janet 'Acceptable Use Policy', the 'Conditions of Use of IT Facilities at LSE', the LSE Information Security Policy and any requirements as laid out by Departments, projects or research data providers.

Head of Department\Departmental Manager:

Sponsorship of the user and authorisation for account creation. Responsibility and accountability for use of the account. Supplying a termination date to IMT.

System Owners

Those with responsibility for systems (including designating access) upon which LSE data reside. This includes but is not limited to Finance, HR, Registry, Library, STICERD.

Information Management and Technology:

Responsible for:

- Account creation and termination
- Resource allocation

Information Security Manager:

Responsible for writing this policy and establishing the appropriate creation and termination procedures within IMT.

Information Security Advisory Board

Responsible for the advising on and recommending information security policies to the Information Technology Committee, assessing information security risks, identifying and implementing controls to risks.

Information Technology Committee

Responsible for approving information security policies.

ISAB	2.1.1	Clarification needed around what figures of authority could request an account	Update of definition
ISAB	1.2	Remove the word 'registered' from 'Out of Scope' definition	Word removed
ISAB	1.1	The definition of an 'Associate' needs to be expanded.	

Appendix A – LSE Associate Allocation Process

LSE Associate Accounts

“Associate Accounts” are user accounts provided to people who are not students, suppliers or staff, but have business associated with the School. This will mostly be involvement with LSE-based research.

ALL requests for associate accounts must be either from, or explicitly approved by, a DM or a HoD.

General Principles:

1. In order to make sure that Associates do not violate our licensing agreements, or otherwise be provided with access to areas they should not have, all associate accounts will be created by the IMT Systems team.
2. All requests for associate accounts must be made in the first instance to the Service Desk or a Support Team Manager.

The process below outlines how a request for an associate account will be validated and how the account will be created.

Disambiguation: Library Associate Accounts

LSE Library is also the British Library of Economic and Political Science. The library therefore provides members of the public with Associate cards and access to the Library via a WEB FORM. The users generated by this route have no right to LSE associate accounts as laid out by this process. Library associate identities must not be transferred to any further associate status outside that conferred by the WEB FORM.
